(b) the masonry surface is not sound, clean and sufficiently rough to provide a good key.

(3) Stucco applied over masonry *chimneys* shall be reinforced.

9.28.1.3. Concrete Masonry Units

(1) Stucco finish shall not be applied over concrete masonry units less than one month old unless the units have been cured by the autoclave process.

9.28.1.4. Clearance over Ground Level

(1) Stucco shall be not less than 200 mm above finished ground level except when it is applied over concrete or masonry.

9.28.1.5. Flashing and Sealants

(1) Flashing and sealants used with stucco shall conform to Subsections 9.27.3. and 9.27.4., except that if aluminum flashing is used, it shall be separated from the stucco by an impervious membrane or coating.

9.28.2. Stucco Materials

9.28.2.1. Portland Cement

(1) Portland cement shall conform to CAN/CSA-A3001, "Cementitious Materials for Use in Concrete".

9.28.2.2. Aggregate

(1) Aggregate shall be clean, well-graded natural sand or sand manufactured from crushed stone, gravel or air-cooled blast furnace slag and shall contain no significant amounts of deleterious material.

(2) Aggregate grading shall conform to Table 9.28.2.2.

Table 9.28.2.2.
Aggregate Grading for Stucco

Forming Part of Sentence 9.28.2.2.(2)

Item	Column 1	Column 2	Column 3
	Sieve Sizes, mm	% Aggregate Passing Sieve	
		Maximum	Minimum
1.	4	—	100
2.	2	—	90
3.	1	90	60
4.	0.5	60	45
5.	0.25	30	10
6.	0.125	5	—

9.28.2.3. Water

(1) Water shall be clean and free of significant amounts of deleterious material.

9.28.3. Fasteners

9.28.3.1. Materials

(1) Fasteners for stucco lath or reinforcing shall be corrosion-resistant and of a material other than aluminum.

9.28.3.2. Nails and Staples

(1) Nails for stucco lath or reinforcing shall be not less than 3.2 mm diam with a head diameter of not less than 11.1 mm.

(2) Staples for stucco lath reinforcing shall be not less than 1.98 mm diam or thickness.

(3) Staples and nails for attaching stucco lath or reinforcing to vertical surfaces shall be of sufficient length to penetrate 25 mm into framing members or to the full depth of the sheathing where the sheathing is used for attachment.

(4) On horizontal surfaces nails for stucco lath or reinforcing shall be not less than 38 mm long.

9.28.4. Stucco Lath

9.28.4.1. Materials

(1) Rib lath or expanded metal stucco mesh shall be,

(a) copper-alloy steel coated with rust-inhibitive paint after fabrication, or

(b) galvanized.

(2) Woven or welded wire mesh shall be galvanized.

9.28.4.2. No Sheathing Required

(1) Sheathing need not be provided beneath stucco where not less than 1.19 mm diam galvanized wire is applied horizontally to the framing at vertical intervals not exceeding 150 mm, or where paper-backed welded wire metal lath is used.

9.28.4.3. Stucco Lath Specifications

(1) Stucco lath shall conform to Table 9.28.4.3.

Table 9.28.4.3.
Stucco Lath

Forming Part of Sentence 9.28.4.3.(1)

Item	Column 1	Column 2	Column 3	Column 4	Column 5
	Location	Type of Lath	Minimum Diam of Wire, mm	Maximum Mesh Opening	Minimum Mass, kg/m^2
1.	Vertical surfaces	Welded or woven wire	1.15	25 mm	—
			1.30	38 mm	—
			1.50	51 mm	—
		Stucco mesh reinforcing (expanded metal)	—	25.8 cm^2	0.98
2.	Horizontal surfaces	9.5 mm rib lath	—	—	1.84
		Cedar lath	—	—	—

9.28.4.4. Self-Furring Devices

(1) Stucco lath shall be held not less than 6 mm away from the backing by means of suitable self-furring devices.

9.28.4.5. Application of Stucco Lath

(1) Stucco lath shall be applied with the long dimension horizontal.

(2) Horizontal and vertical joints in stucco lath shall be lapped not less than 50 mm.

(3) End joints of stucco lath shall be staggered and shall occur over framing members.

(4) External corners of stucco lath shall be reinforced with a vertical strip of lath or reinforcing extending not less than 150 mm on both sides of the corner, or the lath or reinforcing shall extend around corners not less than 150 mm.

9.28.4.6. Fastening

(1) Stucco lath shall be fastened in conformance with Subsection 9.27.5.

(2) Fasteners on vertical surfaces shall be spaced not more than,

(a) 150 mm o.c. vertically and 406 mm o.c. horizontally, or

(b) 100 mm o.c. vertically and 610 mm o.c. horizontally.

(3) Nailing patterns other than those required in Sentence (2) are permitted to be used provided there are not fewer than 20 fasteners per square metre of wall surface.

(4) Fasteners on horizontal surfaces shall be spaced not more than,

(a) 150 mm o.c. along the framing members when members are spaced not more than 406 mm o.c., and

(b) 100 mm o.c. along members when members are spaced not more than 610 mm o.c.

9.28.5. Stucco Mixes

9.28.5.1. Mixes

(1) Stucco mixes shall conform to Table 9.28.5.1.

Table 9.28.5.1.
Stucco Mixes

Forming Part of Sentence 9.28.5.1.(1)

Item	Column 1	Column 2	Column 3	Column 4
	Materials, volume			
	Portland Cement	Masonry Cement	Lime	Aggregate
1.	1	—	0.25 to 1	3.25 to 4 parts per part of cementitious material
2.	1	1	—	

9.28.5.2. Pigments

(1) Pigment if used shall consist of pure mineral oxides inert to the action of sun, lime and cement.

(2) Pigment shall not exceed 6% of the portland cement by weight.

9.28.5.3. Mixing

(1) Materials shall be thoroughly mixed before and after water is added.

(2) Stucco shall be applied not later than 3 h after the initial mixing.

9.28.6. Stucco Application

9.28.6.1. Low Temperature Conditions

(1) The base for stucco shall be maintained above freezing.

(2) Stucco shall be maintained at a temperature of not less than 10°C during application and for not less than 48 h afterwards.

9.28.6.2. Number of Coats and Total Thickness

(1) Stucco shall be applied with at least two base coats and one finish coat, providing a total thickness of not less than 15 mm, measured from the face of the lath or face of the masonry where no lath is used.

9.28.6.3. First Coat

(1) The first coat shall be not less than 6 mm thick, measured from the face of the lath or masonry, fully embedding the lath.

(2) The surface of the first coat shall be scored to provide a key with the second coat.

9.28.6.4. Second Coat

(1) The second coat shall be not less than 6 mm thick.

(2) The surface of the second coat shall be lightly roughened to provide a key with the finish coat if the finish coat is other than stone dash.

9.28.6.5. Finish Coat

(1) When the finish coat is other than stone dash, the base shall be dampened but not saturated before the finish coat is applied.

(2) The thickness of the finish coat shall be not less than 3 mm.

(3) When a stone dash finish is used, the stone shall be partially embedded in the second coat before the second coat starts to set or stiffen.

Section 9.29. Interior Wall and Ceiling Finishes

9.29.1. General

9.29.1.1. Fire Protection and Sound Control

(1) A wall or ceiling finish shall also conform to the appropriate requirements in Sections 9.10. and 9.11. in addition to the requirements in this Section.

9.29.2. Waterproof Wall Finish

9.29.2.1. Where Required

(1) Waterproof finish shall be provided to a height of not less than,

(a) 1 800 mm above the floor in shower stalls,

(b) 1 200 mm above the rims of bathtubs equipped with showers, and

(c) 400 mm above the rims of bathtubs not equipped with showers.

9.29.2.2. Materials

(1) Waterproof finish shall consist of ceramic, plastic or metal tile, sheet vinyl, tempered hardboard, laminated thermosetting decorative sheets or linoleum.

9.29.3. Wood Furring

9.29.3.1. Size and Spacing of Furring

(1) Wood furring for the attachment of wall and ceiling finishes shall conform to Table 9.29.3.1.

Table 9.29.3.1.
Size and Spacing of Furring

Forming Part of Sentence 9.29.3.1.(1)

Item	Column 1	Column 2	Column 3	Column 4
	Maximum Spacing of Furring, mm	Minimum Size of Furring, mm		
		Maximum Spacing of Furring Supports		
		Continuous Supports	406 mm (o.c.)	610 mm (o.c.)
1.	305	19 × 38	19 × 38	19 × 64
2.	406	19 × 38	19 × 38	19 × 64
3.	610	19 × 38	19 × 64	19 × 89

9.29.3.2. Fastening

(1) Furring shall be fastened to the framing or to wood blocks with not less than 51 mm nails.

9.29.4. Plastering

9.29.4.1. Application

(1) Application of plaster wall and ceiling finishes, including installation of metal or gypsum lath, shall conform to CSA A82.30-M, “Interior Furring, Lathing and Gypsum Plastering”.

9.29.5. Gypsum Board Finish (Taped Joints)

9.29.5.1. Application

(1) The requirements for application of gypsum board in this Subsection apply to the single layer application of gypsum board to wood furring or framing using nails or screws.

(2) Gypsum board applications not described in this Subsection shall conform to CSA A82.31-M, "Gypsum Board Application".

9.29.5.2. Materials

(1) Gypsum products shall conform to,

(a) CAN/CSA-A82.27-M, "Gypsum Board",

(b) ASTM C1178 / C1178M, "Coated Glass Mat Water-Resistant Gypsum Backing Panel", or

(c) ASTM C1396 / C1396M, "Gypsum Board".

9.29.5.3. Maximum Spacing of Supports

(1) Maximum spacing of supports for gypsum board applied as a single layer shall conform to Table 9.29.5.3.

Table 9.29.5.3.
Spacing of Supports for Gypsum Board

Forming Part of Sentence 9.29.5.3.(1)

Item	Column 1	Column 2	Column 3	Column 4	Column 5
	Thickness, mm	Orientation of Board to Framing	Maximum Spacing of Supports, mm o.c.		
			Walls	Ceilings	
				Painted Finish	Water-Based Texture Finish
1.	Gypsum board conforming to Sentence 9.29.5.2.(1) (except Sections 9 and 12 of ASTM C1396 / C1396M)				
	9.5	Parallel	—	—	—
		Perpendicular	406	406	—
	12.7	Parallel	610	406	—
		Perpendicular	610	610	406
	15.9	Parallel	610	406	—
		Perpendicular	610	610	610
2.	Gypsum board conforming to Clause 9.29.5.2.(1)(c) (only Section 12 of ASTM C1396 / C1396M)				
	12.7	Parallel	610	406	—
		Perpendicular	610	610	610

9.29.5.4. Support of Insulation

(1) Gypsum board supporting insulation shall be at least 12.7 mm thick.

9.29.5.5. Length of Fasteners

(1) The length of fasteners for gypsum board shall conform to Table 9.29.5.5., except that lesser depths of penetration are permitted for assemblies required to have a *fire-resistance rating* provided it can be shown, on the basis of fire tests, that such depths are adequate for the required rating.

Table 9.29.5.5.
Fastener Penetration into Wood Supports

Forming Part of Sentence 9.29.5.5.(1)

Item	Column 1	Column 2	Column 3	Column 4	Column 5
	Required *Fire-Resistance Rating* of Assembly	Minimum Penetration, mm			
		Walls		Ceilings	
		Nails	Screws	Nails	Screws
1.	Not required	20	15	20	15
2.	45 min	20	20	30	30
3.	1 h	20	20	45	45
4.	1.5 h	20	20	60	60

9.29.5.6. Nails

(1) Nails for fastening gypsum board to wood supports shall conform to,

(a) ASTM F1667, “Driven Fasteners: Nails, Spikes and Staples”, or

(b) CSA B111, “Wire Nails, Spikes and Staples”.

9.29.5.7. Screws

(1) Screws for fastening gypsum board to wood supports shall conform to ASTM C1002, “Steel Self-Piercing Tapping Screws for the Application of Gypsum Panel Products or Metal Plaster Bases to Wood Studs or Steel Studs”.

9.29.5.8. Spacing of Nails

(1) For single-layer application on ceilings, nails shall be spaced,

(a) not more than 180 mm o.c. on ceiling supports, or

(b) every 300 mm o.c. along ceiling supports, in pairs about 50 mm apart.

(2) Where the ceiling sheets are supported by the wall sheets around the perimeter of the ceiling, this support may be considered as equivalent to nailing at this location.

(3) Except as required by Sentence (4), for single-layer application on walls, nails shall be spaced,

(a) not more than 200 mm o.c. on vertical wall supports, or

(b) every 300 mm o.c. along vertical wall supports, in pairs about 50 mm apart.

(4) For single-layer application on walls, where gypsum board is required to provide bracing, lateral support or fire protection, nails shall be spaced not more than 200 mm o.c. on,

(a) vertical wall supports, and

(b) top and bottom plates.

(5) The uppermost nails on vertical wall supports shall be not more than 200 mm below the ceiling.

(6) Nails shall be located not less than 10 mm from the side or edge of the board.

(7) Nails shall be driven so that the heads do not puncture the paper.

9.29.5.9. Spacing of Screws

(1) For single-layer application on a ceiling, screws shall be spaced not more than 300 mm o.c. on ceiling supports.

(2) Where the ceiling sheets are supported by the wall sheets around the perimeter of the ceiling, this support may be considered as equivalent to screwing at this location.

(3) Except as required by Sentence (4), for single-layer application on walls, screws shall be spaced,

(a) not more than 300 mm o.c. on vertical wall supports where the supports are more than 406 mm o.c., or

(b) not more than 400 mm o.c. on vertical wall supports where the supports are not more than 406 mm o.c.

(4) Except as permitted by Sentence (5), for single-layer application on walls, where gypsum board is required to provide bracing, lateral support or fire protection, screws shall be spaced not more than 300 mm o.c. on,

(a) vertical wall supports, and

(b) top and bottom plates.

(5) Where a *fire-resistance rating* is determined based on Table 1 of MMAH Supplementary Standard SB-3, "Fire and Sound Resistance of Building Assemblies", Sentence (4) need not apply for the purpose of fire protection.

(6) Screws shall be located not less than 10 mm from the side or edge of the board.

(7) Screws shall be driven so that the heads do not puncture the paper.

9.29.5.10. Low Temperature Conditions

(1) In cold weather, heat shall be provided to maintain a temperature of not below 10°C for 48 h prior to taping and finishing and maintained for not less than 48 h after that.

9.29.6. Plywood Finish

9.29.6.1. Thickness

(1) Except as provided in Sentences (2) and (3), the minimum thickness of plywood interior finish shall conform to Table 9.29.6.1.

Table 9.29.6.1.
Thickness of Plywood Interior Finish

Forming Part of Articles 9.29.6.1., 9.29.6.2. and 9.29.9.2.

Item	Column 1	Column 2	Column 3
	Maximum Spacing of Supports, mm o.c.	Minimum Thickness, mm(1), on Supports with no Horizontal Blocking	Minimum Thickness, mm(1), on Supports with Blocking at Vertical Intervals not Exceeding 1.2 m
1.	406	4.7	4.0
2.	610	8.0	4.7

Notes to Table 9.29.6.1.

(1) Thickness limits shall apply to the net effective thickness (NET) of grooved, striated, textured and/or embossed panels and to the actual thickness of flat panels.

(2) A manufacturing tolerance of -0.4 mm may be applied to the thicknesses listed in Table 9.29.6.1.

(3) No minimum thickness is required where plywood is applied over continuous backing.

9.29.6.2. Grooved Plywood

(1) Except as permitted in Sentence (2), where plywood for interior finish is grooved, the grooves shall not extend through the face ply and into the plies below the face ply unless the groove is supported by framing or furring.

(2) If the grain of the face ply is at right angles to the supporting members, the groove is permitted to extend into the plies below the face ply provided the thickness of the plywood exceeds the value shown in Table 9.29.6.1. by an amount equal to not less than the depth of penetration of the grooves into the plies below the face ply.

9.29.6.3. Nails and Staples

(1) Nails for attaching plywood finishes shall not be less than 38 mm casing or finishing nails spaced not more than 150 mm o.c. along edge supports and 300 mm o.c. along intermediate supports, except that staples providing equivalent lateral resistance may also be used.

9.29.6.4. Edge Support

(1) All plywood edges shall be supported by furring, blocking or framing.

9.29.7. Hardboard Finish

9.29.7.1. Material Standard

(1) Hardboard shall conform to CAN/CGSB-11.3-M, “Hardboard”.

9.29.7.2. Thickness

(1) Hardboard shall be not less than,

(a) 3 mm thick where applied over continuous back-up,

(b) 6 mm thick where applied to supports spaced not more than 406 mm o.c., and

(c) 9 mm thick where applied to supports spaced not more than 610 mm o.c.

9.29.7.3. Nails

(1) Nails for fastening hardboard shall be casing or finishing nails not less than 38 mm long, spaced not more than 150 mm o.c. along edge supports and 300 mm o.c. along intermediate supports.

9.29.7.4. Edge Support

(1) All hardboard edges shall be supported by furring, blocking or framing where the back-up is not continuous.

9.29.8. Insulating Fibreboard Finish

9.29.8.1. Material Standard

(1) Insulating fibreboard shall conform to CAN/ULC-S706, “Wood Fibre Thermal Insulation for Buildings”.

9.29.8.2. Thickness

(1) Insulating fibreboard sheets shall be not less than 11.1 mm thick on supports not more than 406 mm o.c.

(2) Insulating fibreboard tile shall be not less than 12.7 mm thick on supports spaced not more than 406 mm o.c.

9.29.8.3. Nails

(1) Nails for fastening fibreboard sheets shall be not less than 2.6 mm shank diameter casing or finishing nails of sufficient length to penetrate not less than 20 mm into the supports.

(2) Nails shall be spaced not more than 100 mm o.c. along edge supports and 200 mm o.c. along intermediate supports.

9.29.8.4. Edge Support

(1) All fibreboard edges shall be supported by blocking, furring or framing.

9.29.9. Particleboard, OSB or Waferboard Finish

9.29.9.1. Material Standard

(1) Particleboard finish shall conform to ANSI A208.1, “Particleboard”.

(2) OSB or waferboard finish shall conform to,

(a) CAN/CSA-O325, “Construction Sheathing”, or

(b) CSA O437.0, “OSB and Waferboard”.

9.29.9.2. Minimum Thickness

(1) Except as provided in Sentences (2) and (3), the minimum thickness of O-2 grade OSB used as an interior finish shall conform to that shown for plywood in Table 9.29.6.1.

(2) Thickness listed in Table 9.29.6.1. shall permit a manufacturing tolerance of -0.4 mm.

(3) No minimum thickness is required where O-2 grade OSB is applied over continuous backing.

(4) OSB conforming to O-1 grade, waferboard conforming to R-1 grade and particleboard shall be,

(a) not less than 6.35 mm thick on supports not more than 406 mm o.c.,

(b) not less than 9.5 mm thick on supports not more than 610 mm o.c., and

(c) not less than 6.35 mm thick on supports not more than 610 mm o.c. in walls where blocking is provided at midwall height.

(5) OSB conforming to CSA-O325, “Construction Sheathing”, shall meet the minimum panel mark of,

(a) W16, on supports not more than 406 mm o.c.,

(b) W24, on supports not more than 610 mm o.c., and

(c) W16, on supports not more than 610 mm o.c. where blocking is provided at midwall height.

9.29.9.3. Nails

(1) Nails for fastening particleboard, OSB or waferboard shall be not less than 38 mm casing or finishing nails spaced not more than 150 mm o.c. along edge supports and 300 mm o.c. along intermediate supports.

9.29.9.4. Edge Support

(1) All particleboard, OSB or waferboard edges shall be supported by furring, blocking or framing.

9.29.10. Wall Tile Finish

9.29.10.1. Tile Application

(1) Ceramic tile shall be set in a mortar base or applied with an adhesive.

(2) Plastic tile shall be applied with an adhesive.

9.29.10.2. Mortar Base

(1) When ceramic tile is applied to a mortar base the cementitious material shall consist of one part Portland cement to not more than one-quarter part lime by volume.

(2) The cementitious material described in Sentence (1) shall be mixed with no fewer than three nor more than five parts of aggregate per part of cementitious material by volume.

(3) Mortar shall be applied over metal lath or masonry.

(4) Ceramic tile applied to a mortar base shall be thoroughly soaked and pressed into place forcing the mortar into the joints while the tile is wet.

9.29.10.3. Adhesives

(1) Adhesives to attach ceramic and plastic tile shall be applied to the finish coat or brown coat of plaster that has been steel-trowelled to an even surface or to gypsum board or to masonry provided the masonry has an even surface.

9.29.10.4. Moisture Resistant Backing

(1) Ceramic and plastic tile installed on walls around bathtubs or showers shall be applied over moisture resistant backing.

9.29.10.5. Joints between Tiles and Bathtub

(1) The joints between wall tiles and a bathtub or shower shall be suitably caulked with material conforming to CAN/CGSB-19.22-M, “Mildew Resistant Sealing Compound for Tubs and Tile”.

Section 9.30. Flooring

9.30.1. General

9.30.1.1. Required Finish Flooring

(1) Finished flooring shall be provided in all *residential occupancies*.

9.30.1.2. Water Resistance

(1) Finished flooring in bathrooms, kitchens, public entrance halls, laundry and general storage areas shall consist of resilient flooring, felted-synthetic-fibre floor coverings, concrete, terrazzo, ceramic tile, mastic or other types of flooring providing similar degrees of water resistance.

9.30.1.3. Sleepers

(1) Wood sleepers supporting finished flooring over a concrete base supported on the ground shall be not less than 19 mm by 38 mm and shall be treated with a wood preservative.

9.30.1.4. Finish Quality

(1) Finished flooring shall have a surface that is smooth, even and free from roughness or open defects.

9.30.2. Panel-Type Underlay

9.30.2.1. Required Underlay

(1) A panel-type underlay shall be provided under resilient flooring, parquet flooring, ceramic tile, felted-synthetic-fibre floor coverings or carpeting laid over lumber subflooring.

(2) A panel-type underlay shall be provided under resilient flooring, parquet flooring, felted-synthetic-fibre floor coverings or carpeting on panel-type subflooring whose edges are unsupported.

(3) Panel-type underlay shall be provided under ceramic tile applied with adhesive.

(4) Panel-type underlay shall be provided under resilient flooring on waferboard or strandboard subflooring.

9.30.2.2. Materials and Thickness

(1) Panel-type underlay shall be not less than 6 mm thick and shall conform to,

(a) ANSI A208.1, “Particleboard”,

(b) CAN/CGSB-11.3-M, “Hardboard”,

(c) CSA O115-M, “Hardwood and Decorative Plywood”,

(d) CSA O121, “Douglas Fir Plywood”,

(e) CSA O151, “Canadian Softwood Plywood”,

(f) CSA O153-M, “Poplar Plywood”, or

(g) CSA O437.0, “OSB and Waferboard”.

9.30.2.3. Fastening

(1) Panel-type underlay shall be fastened to the subfloor with staples, annular grooved flooring nails or spiral nails, spaced not more than 150 mm o.c. along the edges and 200 mm o.c. both ways at other locations.

(2) Nails for panel-type underlay shall be not less than 19 mm long for 6 mm thick underlay and 22 mm long for 7.9 mm thick underlay.

(3) Staples for panel-type underlay shall,

(a) have not less than a 1.2 mm shank diameter or thickness with a 4.7 mm crown, and

(b) be not less than,

(i) 22 mm long for 6 mm underlay, and

(ii) 28 mm long for 7.9 mm and 9.5 mm underlay.

9.30.2.4. Joints Offset

(1) Where panel-type underlay is required to be installed over plywood, or OSB or waferboard, the joints in the underlay shall be offset at least 200 mm from the joints in the underlying subfloor.

9.30.2.5. Surface Defects

(1) Underlay beneath resilient or ceramic floors applied with an adhesive shall have all holes or open defects on the surface patched so that the defects will not be transmitted to the finished surface.

9.30.3. Wood Strip Flooring

9.30.3.1. Thickness

(1) The thickness of wood strip flooring shall conform to Table 9.30.3.1.

Table 9.30.3.1.
Thickness of Wood Strip Flooring

Forming Part of Sentence 9.30.3.1.(1)

Item	Column 1	Column 2	Column 3	Column 4
	Type of Flooring	Maximum Joist Spacing, mm	Minimum Thickness of Flooring, mm	
			With Subfloor	No Subfloor
1.	Matched hardwood (interior use only)	406	7.9	19.0
		610	7.9	33.3
2.	Matched softwood (interior or exterior use)	406	19.0	19.0
		610	19.0	31.7
3.	Square edge softwood (exterior use only)	406	—	25.4
		610	—	38.1

9.30.3.2. Strip Direction and End Joints

(1) Wood strip flooring shall not be laid parallel to lumber subflooring unless a separate underlay is provided.

(2) If wood strip flooring is applied without a subfloor, it shall be laid at right angles to the joists so that the end joints are staggered and occur over supports or are end matched.

(3) If the flooring is end matched, it shall be laid so that no two adjoining strips break joints in the same space between supports and each strip bears on no fewer than two supports.

9.30.3.3. Nailing

(1) When nails are used, wood strip flooring shall be toe nailed or face nailed with at least one nail per strip at the spacings shown in Table 9.30.3.3., except that face nailed strips of more than 25 mm in width shall have at least two nails per strip.

(2) Face nails shall be countersunk.

Table 9.30.3.3.
Nailing of Wood Strip Flooring

Forming Part of Sentence 9.30.3.3.(1)

Item	Column 1	Column 2	Column 3
	Finish Floor Thickness, mm	Minimum Length of Flooring Nails, mm	Maximum Spacing of Flooring Nails, mm
1.	7.9	38(1)	200
2.	11.1	51	300
3.	19.0	57	400
4.	25.4	63	400
5.	31.7	70	600
6.	38.1	83	600

Notes to Table 9.30.3.3.:

(1) See Article 9.30.3.4.

9.30.3.4. Staples

(1) Staples are permitted to be used to fasten wood strip flooring not more than 7.9 mm in thickness and not more than 50 mm in width provided the staples,

(a) are not less than 29 mm long,

(b) have a shank diameter of not less than 1.19 mm,

(c) have a crown of not less than 4.7 mm, and

(d) are spaced not more than 400 mm o.c.

(2) Staples are permitted to be used to fasten wood strip flooring not more than 19 mm in thickness and not more than 83 mm in width provided the staples,

(a) are not less than 51 mm long,

(b) have a shank diameter of not less than 1.82 mm,

(c) have a crown of not less than 12.7 mm, and

(d) are spaced not more than 400 mm o.c.

9.30.4. Parquet Flooring

9.30.4.1. Adhesive

(1) Adhesive used to attach parquet block flooring shall be suitable for bonding wood to the applicable subfloor material.

9.30.5. Resilient Flooring

9.30.5.1. Materials

(1) Resilient flooring used on concrete slabs supported on ground shall consist of asphalt, rubber, vinyl-asbestos, unbacked vinyl or vinyl with an inorganic type backing.

(2) Flooring described in Sentence (1) shall be attached to the base with a suitable waterproof and alkali-resistant adhesive.

9.30.6. Ceramic Tile

9.30.6.1. Substrate

(1) Ceramic tile shall be set in a mortar bed or applied to a sound smooth base with a suitable adhesive.

(2) Panel-type subfloor to which ceramic tile is to be applied with adhesive shall have its edges supported according to Article 9.23.14.3.

Section 9.31. Plumbing Facilities

9.31.1. Scope

9.31.1.1. Application

(1) Except as provided in Sentence (2), this Section applies to *plumbing* facilities and *plumbing systems* serving *dwelling units*.

(2) *Plumbing* facilities, grab bars, floor drains and floor and wall finishes around urinals shall conform to Subsection 3.7.4. and Article 7.1.5.2. in,

(a) a *recreational camp*,

(b) a *camp for housing of workers*, or

(c) all other *buildings* not described in Sentence (1).

(3) Medical gas piping systems shall conform to Subsection 3.7.5.

9.31.2. General

9.31.2.1. General

(1) The *construction* of *plumbing systems* shall conform to Part 7.

9.31.2.2. Corrosion Protection

(1) Metal pipes in contact with cinders or other corrosive material shall be protected by a heavy coating of bitumen or other corrosion protection.

9.31.2.3. Grab Bars

(1) When provided, grab bars shall be capable of resisting a load of not less than 1.3 kN applied vertically or horizontally.

9.31.3. Water Supply and Distribution

9.31.3.1. Required Water Supply

(1) Every *dwelling unit* shall be supplied with a *water distribution system* where a *drinking water system* is available.

9.31.3.2. Required Connections

(1) In a *dwelling unit* with a *water distribution system*, piping for hot and cold water shall be connected to every kitchen sink, lavatory, bathtub, shower, slop sink and laundry area.

(2) Piping for cold water shall be run to every water closet.

9.31.4. Required Facilities

9.31.4.1. Required Fixtures

(1) A *dwelling unit* with a *water distribution system* shall contain,

(a) a kitchen sink,

(b) a lavatory,

(c) a bathtub or shower stall, and

(d) a water closet or a drainless composting toilet.

9.31.4.2. Laundry Fixtures

(1) Laundry facilities or a space for laundry facilities shall be provided in every *dwelling unit* or grouped elsewhere in the *building* in a location conveniently accessible to occupants of every *dwelling unit*.

9.31.4.3. Hot Water Supply

(1) In a *dwelling unit* with a *water distribution system*, a hot water supply shall be provided.

(2) A *water distribution system* supplying hot water to *plumbing fixtures* shall conform to the requirements in Subsection 7.6.5.

9.31.4.4. Floor Drains

(1) A floor drain shall be installed in a *basement* forming part of a *dwelling unit*.

9.31.5. Reserved

9.31.6. Service Water Heating Facilities

9.31.6.1. Hot Water Temperature

(1) Where a hot water supply is required by Article 9.31.4.3., equipment shall be installed to provide to every *dwelling unit* an adequate supply of service hot water with a temperature range from 45°C to 60°C.

(2) An electric *storage-type service water heater* shall have a minimum set storage temperature of 60°C.

9.31.6.2. Equipment and Installation

(1) Every *service water heater* and its installation shall conform to Part 7.

(2) Reserved

(3) Where the *building* is in a location where the spectral response acceleration, $S_a(0.2)$, is greater than 0.55, *service water heaters* shall be secured to the structure to resist overturning and displacement.

9.31.6.3. Corrosion-Resistant Coating

(1) Where storage tanks for *service water heaters* are steel, they shall be coated with zinc, vitreous enamel (glass lined), hydraulic cement or other corrosion-resistant material.

9.31.6.4. Fuel-Burning Heaters

(1) Fuel-burning *service water heaters* shall be connected to a *chimney flue* conforming to Section 9.21.

9.31.6.5. Heating Coils

(1) Heating coils of *service water heaters* shall not be installed in a *flue* or in the combustion chamber of a *boiler* or furnace heating a *building*.

Section 9.32. Ventilation

9.32.1. General

9.32.1.1. Application

(1) This Section applies to the ventilation of rooms and spaces in *residential occupancies* by natural ventilation and to self-contained mechanical ventilation systems serving only one *dwelling unit*.

(2) Mechanical ventilation systems, other than self-contained systems serving single *dwelling units*, shall conform to Part 6.

(3) Ventilation of rooms and spaces in other than *residential occupancies* shall conform to Part 6.

(4) A *storage garage* for more than five cars shall be ventilated in accordance with Part 6.

(5) A clothes dryer *exhaust duct* system shall conform to Part 6.

9.32.1.2. Mechanical Ventilation for Dwelling Units

(1) Every *dwelling unit* that is supplied with electrical power shall be provided with a mechanical ventilation system in accordance with Subsection 9.32.3.

9.32.1.3. Ventilation of Rooms and Spaces

(1) Except as permitted in Sentence (2), rooms or spaces in a *dwelling unit* shall be ventilated by natural means in accordance with Subsection 9.32.2.

(2) The natural ventilation of rooms or spaces required in Sentence (1) may be provided by mechanical means.

(3) Where a room or space is not provided with natural ventilation as described in Sentence (1), mechanical ventilation shall be provided to exhaust inside air from or to introduce outside air to that room or space at the rate of one-half air change per hour if the room or space is mechanically cooled in summer, and one air change per hour if it is not.

9.32.2. Natural Ventilation

9.32.2.1. Natural Ventilation Area

(1) The unobstructed openable ventilation area to the outdoors for rooms and spaces in residential *buildings* ventilated by natural means shall conform to Table 9.32.2.1.

Table 9.32.2.1.
Natural Ventilation

Forming Part of Sentence 9.32.2.1.(1)

Item	Column 1	Column 2	Column 3
	Location		Minimum Unobstructed Area
1.	Within a *dwelling unit*	Bathrooms or water closet rooms	0.09 m²
		Unfinished *basement* space	0.2 percent of the floor area
		Dining rooms, living rooms, bedrooms, kitchens, combined rooms, dens, recreation rooms and all other finished rooms	0.28 m² per room or combination of rooms
2.	Other than within a *dwelling unit*	Bathrooms or water closet rooms	0.09 m² per water closet
		Sleeping areas	0.14 m² per occupant
		Laundry rooms, kitchens, recreation rooms	4 percent of the floor area
		Corridors, storage rooms and other similar public rooms or spaces	2 percent of the floor area
		Unfinished *basement* space not used on a shared basis	0.2 percent of the floor area

(2) Where a vestibule opens directly off a living or dining room within a *dwelling unit*, ventilation to the outdoors for such rooms may be through the vestibule.

9.32.2.2. Protection from Weather and Insects

(1) Openings for natural ventilation other than windows shall be constructed to provide protection from the weather and insects.

(2) Screening shall be of rust-proof material.

9.32.3. Mechanical Ventilation

9.32.3.1. General

(1) For the purposes of this Subsection a non-solid fuel-fired *appliance* shall be classified as,

(a) direct vented whereby the combustion air is supplied directly from the outdoors to the combustion chamber via a sealed passageway, and the products of combustion are exhausted directly outdoors through an independent sealed vent,

(b) mechanically vented induced draft whereby combustion air is supplied from within the *building* envelope and the products of combustion are positively conveyed to the outdoors by means of a dedicated sealed vent, or

(c) natural draft whereby combustion air is supplied from within the *building* envelope and the products of combustion are conveyed to the outdoors through a *chimney* or Type B vent.

(2) For the purposes of this Subsection a *dwelling unit* shall be categorized as,

(a) Type I when,

(i) all fuel-fired combustion *appliances* located in the *dwelling unit* are direct vented or, except for fireplaces, are mechanically vented induced draft, and

(ii) the *dwelling unit* does not contain a solid fuel-fired combustion *appliance*,

(b) Type II when a solid fuel-fired combustion *appliance* is installed in a Type I *dwelling unit*,

(c) Type III when a mechanically vented induced draft non-solid fuel-fired fireplace or a natural draft *appliance* is present, or

(d) Type IV when *electric space heating* is present.

9.32.3.2. Required Mechanical Ventilation

(1) The mechanical ventilation system required in Article 9.32.1.2. shall comply with,

(a) Part 6, or

(b) this Subsection for a mechanical ventilation system in a Type I, Type II or Type IV *dwelling unit*.

9.32.3.3. Total Ventilation Capacity

(1) The minimum total ventilation capacity of the ventilation system required in Clause 9.32.3.2.(1)(b) shall be the sum of the individual room capacities given in Table 9.32.3.3.

Table 9.32.3.3.
Ventilation Capacity

Forming Part of Sentence 9.32.3.3.(1)

Item	Column 1	Column 2
	Room	Capacity, L/s
1.	Master bedroom(1)	10
2.	Other bedrooms	5
3.	Living room(2)	5
4.	Dining room(2)	5
5.	Kitchen	5
6.	Family room(2)	5
7.	Recreation room	5

8.	*Basement*[3]	10
9.	Other habitable rooms[4]	5
10.	Bathroom or water closet room	5
11.	Laundry room	5
12.	Utility room	5

Notes to Table 9.32.3.3.:

[1] At least one bedroom in each *dwelling unit* shall be designated as the master bedroom.

[2] Ventilation capacities assigned to any combined living/dining or family/dining space shall be determined as if the spaces were individual rooms.

[3] Where a *basement* incorporates rooms of the types designated in this Table, the assigned ventilation capacities for each room shall be as specified for those types of rooms. *Basement* areas used for other purposes that exceed ⅔ of the total *basement* floor area shall be assigned a fan capacity of 10 L/s. Those that are less than ⅔ of the total floor area shall be assigned 5 L/s.

[4] Other habitable rooms shall be assigned a ventilation capacity of 5 L/s. This does not include spaces intended solely for access, egress, storage or service equipment.

9.32.3.4. Principal Exhaust

(1) A principal exhaust fan shall be installed and shall be rated to provide not less than the capacity given in Table 9.32.3.4.A.

Table 9.32.3.4.A.
Principal Exhaust Fan Capacity

Forming Part of Sentence 9.32.3.4.(1)

Item	Column 1	Column 2
	Number of Bedrooms in *Dwelling Unit*	Capacity, L/s
1.	1	15
2.	2	22.5
3.	3	30
4.	4	37.5
5.	5	45
6.	More than 5	System must comply with Sentence 6.2.1.1.(1)

(2) Except as permitted in Sentence (3), the principal exhaust fan shall be controlled by a manual switch.

(3) A principal exhaust fan required under this Article may be controlled by a dehumidistat or other automatic control device where the manual switch required in Sentence (2) is capable of activating the fan regardless of the setting of the automatic control.

(4) The switches required in Sentences (2) and (3) shall be centrally located in the *dwelling unit* and shall be identified with the words **VENTILATION FAN**.

(5) The principal exhaust required in this Article may be provided by means of a heat recovery ventilator installed in accordance with Article 9.32.3.11.

(6) Where the installed capacity of the principal exhaust fan exceeds the minimum capacity required in Sentence (1) by more than 50%, the control required in Sentence (2) shall include provision to allow reduction of the flow to within ±10% of the minimum capacity specified in Sentence (1).

(7) Where an exhaust air intake for the principal exhaust fan is connected directly to the duct system of a forced air heating system or other central air circulating system, it shall,

(a) be connected to the return air side of the system, and

(b) be connected not less than 1 000 mm upstream from any outdoor air supply duct.

(8) Where an exhaust air intake for the principal exhaust fan is located in the kitchen, it shall be located in the ceiling or on the wall within 300 mm of the ceiling.

(9) Single or multiple *exhaust ducts* serving the principal exhaust fan required by Sentence (1) shall be sized according to Part 6 except that they may be sized according to Table 9.32.3.4.B. where,

(a) the longest total duct length, from intake grille to outdoor hood, does not exceed 12 m, and

(b) the number of elbows does not exceed 4,

but, in any case, they shall not be smaller than recommended by the manufacturer of the fan.

Table 9.32.3.4.B.
Principal Exhaust Duct Size

Forming Part of Sentences 9.32.3.4.(9) and (10)

Item	Column 1	Column 2	Column 3	Column 4	Column 5
	Number of Bedrooms in *Dwelling Unit*	Minimum *Exhaust Duct* Diameter			
		Ducts Connected to Inlet and Outlet of Principal Exhaust Fan		Ducts Connected to One Side Only of Principal Exhaust Fan	
		Smooth Duct, mm	Flexible Duct, mm	Smooth Duct, mm	Flexible Duct, mm
1.	1	100	125	100	125
2.	2	125	150	125	150
3.	3	125	150	150	175
4.	4	150	175	150	175
5.	5	150	175	150	175
6.	More than 5	Part 6 design	Part 6 design	Part 6 design	Part 6 design

(10) In applying Table 9.32.3.4.B.,

(a) where there is more than one exhaust air inlet duct connected directly to the fan, the diameter of the inlet ducts may be decreased by 25 mm, and

(b) where the *exhaust duct* is connected to the duct system of a forced air heating system, the duct diameter shall be increased by 25 mm.

9.32.3.5. Supplemental Exhaust

(1) Additional supplemental exhaust capacity shall be installed as necessary so that the total capacity of all kitchen, bathroom, water closet room and other supplemental exhaust air intakes is not less than the total ventilation capacity, as required in Article 9.32.3.3., minus the principal exhaust fan capacity, as required in Article 9.32.3.4.

(2) An exhaust air intake shall be installed in each kitchen, bathroom and water closet room.

(3) Where the intake for a supplemental exhaust fan, other than a cooking *appliance* exhaust fan serving a *cooktop*, is installed in a kitchen, it shall be installed in the ceiling or on the wall within 300 mm of the ceiling.

(4) *Exhaust ducts* serving the required kitchen, bathroom, water closet room and other supplemental exhaust air intakes shall be sized according to Part 6 except that they may be sized according to Table 9.32.3.5. where,

(a) the total duct length does not exceed 9 m, and

(b) the number of elbows does not exceed 4,

but, in any case, they shall not be smaller than recommended by the manufacturer of the fans.

Table 9.32.3.5.
Kitchen, Bathroom and Water Closet Room Exhaust Duct Size

Forming Part of Sentence 9.32.3.5.(4)

Item	Column 1	Column 2	Column 3
	Fan Capacity, L/s	Minimum *Exhaust Duct* Diameter[(1)]	
		Ducts Connected to Inlet and Outlet of Exhaust Fan, mm	Ducts Connected to One Side Only of Exhaust Fan, mm
1.	25	125	125
2.	50	150	150

Notes to Table 9.32.3.5.:

[(1)] Where flexible duct is used, the duct diameter shall be increased by 25 mm.

(5) A supplemental exhaust fan required by this Article shall be controlled by a manual switch located in the room served by the exhaust fan.

(6) Where the supplemental exhaust is provided by an exhaust fan serving multiple exhaust air intakes required in rooms described in Sentence (2), the exhaust fan shall be controlled by a manual switch located in each room served by that exhaust fan and wired in parallel.

(7) Where the supplemental exhaust is provided by a principal exhaust fan serving multiple exhaust air intakes required in rooms described in Sentence (2), the principal exhaust fan shall be controlled by a manual switch located in each room served by that exhaust fan and wired in parallel with the manual switch required in Sentence 9.32.3.4.(4).

(8) Where a supplemental fan required by this Article is controlled by a dehumidistat or other automatic control device in addition to the manual switch required by Sentences (5) to (7), the manual switch shall be capable of activating the fan regardless of the setting of the automatic control.

(9) Supplemental exhaust required in this Article may be provided by means of a heat recovery ventilator installed in accordance with Article 9.32.3.11.

9.32.3.6. Ventilation Systems Coupled with Forced Air Heating Systems

(1) This Article applies to a mechanical ventilation system in a *dwelling unit* that contains a forced air heating system which is used for delivery of ventilation air.

(2) In a Type I *dwelling unit*, a ventilation supply inlet is not required.

(3) In a Type II *dwelling unit*, the mechanical ventilation system shall include a heat recovery ventilator, coupled to the forced air heating system, installed in accordance with Article 9.32.3.11.

(4) The forced air heating system circulation fan shall be controlled by a manual switch located adjacent to the ventilation fan switch required in Sentence 9.32.3.4.(4).

(5) The switch required in Sentence (4) shall be identified by the words **CIRCULATION FAN**.

9.32.3.7. Ventilation Systems Not Coupled with Forced Air Heating Systems

(1) This Article applies to a mechanical ventilation system in a *dwelling unit* that,

(a) does not contain a forced air heating system, or

(b) contains a forced air heating system which is not used for circulation of the ventilation air.

(2) The mechanical ventilation system shall introduce air to and circulate air throughout the *dwelling unit* in compliance with this Article.

(3) The mechanical system in this Article shall include a heat recovery ventilator installed in accordance with Article 9.32.3.11.

(4) Outdoor air shall be distributed by a ductwork system from the heat recovery ventilator required in Sentence (3) to each bedroom, to any *storey* without a bedroom and, if there is no *storey* without a bedroom, to the principal living area.

(5) A *supply duct* from the outdoors to the heat recovery ventilator required in Sentence (3) and a main distribution trunk duct shall be provided and shall be sized according to Part 6, except that the *supply duct* and the main distribution trunk duct may be sized according to Table 9.32.3.7.A. where,

(a) the total duct length from the outdoor hood to any supply register does not exceed 21 m, and

(b) the total number of fittings does not exceed 8.

Table 9.32.3.7.A.
Minimum Outdoor Air Supply and Main Trunk Duct Sizes

Forming Part of Sentence 9.32.3.7.(5)

Item	Column 1	Column 2
	Number of Bedrooms in *Dwelling Unit*	Minimum Outdoor Air Supply and Main Distribution Trunk Duct Diameter, mm
1.	1	150
2.	2	150
3.	3	175
4.	4	175
5.	5	175
6.	More than 5	System must comply with Sentence 6.2.1.1.(1)

(6) The outside air *supply duct* required by Sentence (5) shall not be considered to provide combustion and/or dilution air to fuel-burning *appliances*.

(7) Branch *supply ducts* leading from the main distribution trunk duct required by Sentence (5) to the rooms to which outdoor air is to be distributed shall be provided and shall be sized according to Part 6, except that the branch *supply ducts* may be sized according to Table 9.32.3.7.B. where,

(a) the total duct length from the outdoor hood to any supply register does not exceed 21 m, and

(b) the total number of fittings does not exceed 8.

Table 9.32.3.7.B.
Minimum Branch Supply Duct Sizes

Forming Part of Sentence 9.32.3.7.(7)

Item	Column 1	Column 2	Column 3
	Room, Space or *Storey* Served	Minimum Branch *Supply Duct* Diameter, mm	
		1 and 2 Bedroom *Dwelling Units*	3, 4 and 5 Bedroom *Dwelling Units*
1.	Master bedroom	100	100
2.	Other bedrooms	75	75
3.	*Storey* with no bedrooms or living area	75	100

(8) In applying Sentence (7), where the *dwelling unit* has more than 5 bedrooms, ducting shall be sized according to Part 6.

(9) All branch *supply ducts* that are not fitted with diffusers with adjustable balance stops shall be supplied with accessible dampers that can be adjusted and fixed in their adjusted positions and that include devices to indicate the positions of the dampers.

(10) Provision shall be made for the free flow of air to all rooms by leaving gaps beneath doors, using louvred doors or installing grilles in doors.

9.32.3.8. Protection Against Depressurization

(1) When determining the need to provide protection against depressurization, consideration must be given to,

(a) whether the presence of *soil* gas is deemed to be a problem, and

(b) the presence of solid fuel-fired combustion *appliances*.

(2) Where a solid fuel-fired combustion *appliance* is installed, the ventilation system shall include a heat recovery ventilator that is designed to operate so that the flow of exhaust air does not exceed the flow of intake air in any operating mode, and that complies with the requirements of Article 9.32.3.11.

(3) The provision of make-up air is not required for mechanical exhausting devices operating a subfloor depressurization system installed for the purpose of reducing the risk of radon ingress.

9.32.3.9. Fan Ratings

(1) Except as provided in Sentence (4), capacity ratings for required fans shall be determined in accordance with,

(a) CAN/CSA-C260-M, “Rating the Performance of Residential Mechanical Ventilating Equipment”, or

(b) HVI 916, “Airflow Test Procedure”.

(2) Sound ratings for required fans shall be determined in accordance with,

(a) CAN/CSA-C260-M, “Rating the Performance of Residential Mechanical Ventilating Equipment”, or

(b) HVI 915, “Procedure for Loudness Rating of Residential Fan Products”.

(3) Capacity ratings for required fans shall be based on a static pressure differential of 50 Pa, 25 Pa or 7.5 Pa depending on whether the fan is installed with ductwork connected on both sides, one side or neither side, respectively.

(4) Except for heat recovery ventilators, exhaust fans required to make up any part of the total ventilation capacity required by Article 9.32.3.3. shall have a sound rating not greater than that specified in Table 9.32.3.9.

Table 9.32.3.9.
Fan Sound Rating

Forming Part of Sentence 9.32.3.9.(4)

Item	Column 1	Column 2	Column 3
	Fan Application	Maximum Sound Rating, sones	
		Rated according to CAN/CSA-C260-M	Rated according to HVI 915
1.	Principal exhaust fan	2.0	2.5
2.	Supplemental exhaust fans installed in bathrooms and water closet rooms and their make-up air fans	2.5	3.5
3.	Supplemental exhaust fans installed in kitchens and their make-up air fans	no rating required	no rating required

(5) Required fans shall be installed according to the manufacturer's instructions.

(6) Mechanical ventilation devices shall conform to CSA C22.2 No. 113, “Fans and Ventilators”.

9.32.3.10. Ducts

(1) Ventilation ducts shall conform to the requirements of Part 6 for *supply ducts*, except that *exhaust ducts* that serve only a bathroom or water closet room may be of *combustible* material provided the duct is reasonably airtight and constructed of a material impervious to water.

(2) *Exhaust ducts* shall not discharge into heated or unheated enclosed spaces.

(3) Where an *exhaust duct* passes through or is adjacent to unheated space, the duct shall be insulated to not less than RSI 0.5.

(4) Where a duct carrying outdoor air that is not tempered or not mixed with indoor air passes through heated space, it shall be insulated to not less than RSI 0.5 except that, where such a duct is exposed in the heated space for more than 3 m of length in the heated space, it shall be,

(a) insulated to not less than the values listed in Table 9.32.3.10.A., and

(b) provided with a *vapour barrier*.

Table 9.32.3.10.A.
Insulation of Ducts Carrying Outdoor Air

Forming Part of Sentence 9.32.3.10.(4)

Item	Column 1	Column 2

	Outside Winter Design Temperature as per MMAH Supplementary Standard SB-1, "Climatic and Seismic Data"(1), °C	Minimum Thermal Resistance, RSI
1.	–7 to –11	0.5
2.	–12 to –17	0.9
3.	–18 to –24	1.2
4.	–25 to –29	1.4
5.	–30 to –34	1.8
6.	–35 and colder	2.1

Notes to Table 9.32.3.10.A.:

(1) The outside winter design temperatures shall be those listed for the January 2.5 percent values.

(5) A kitchen *exhaust duct* not equipped with a filter at the inlet end shall be designed and installed so that the entire duct can be cleaned.

(6) Ductwork for cooking *appliance* exhaust fans shall,

(a) be of *noncombustible*, corrosion-resistant material, and

(b) lead directly to the outdoors without connection to other exhaust fans or ducts.

(7) Ductwork for cooking *appliance* exhaust fans shall be equipped with a grease filter at the intake.

(8) All ductwork shall be permanently supported or clipped to prevent sagging, excessive movement and vibration.

(9) All ducting connected to supply and exhaust fans shall be constructed so as to inhibit air leakage at joints.

(10) Where rectangular duct is used in place of round duct, it shall be selected according to Table 9.32.3.10.B.

Table 9.32.3.10.B.
Equivalent Duct Sizes

Forming Part of Sentence 9.32.3.10.(10)

Item	Column 1	Column 2	Column 3	Column 4	Column 5
	Required Round Duct Size, mm	Permitted Equivalent Rectangular Duct Size, mm			
		Stack Duct	100 mm Depth	125 mm Depth	150 mm Depth
1.	75	82 × 250	57 × 100		
2.	100	82 × 250	89 × 100	75 × 125	75 × 150
3.	125	82 × 250	125 × 100	100 × 125	89 × 150
4.	150	82 × 300	200 × 100	150 × 125	125 × 150
5.	175	82 × 350	275 × 100	200 × 125	175 × 150
6.	More than 175	Part 6 design	Part 6 design	Part 6 design	Part 6 design

9.32.3.11. Heat Recovery Ventilators

(1) Where a heat recovery ventilator is installed to provide all or part of the requirements of this Subsection, this Article shall apply.

(2) Heat recovery ventilators shall be designed to provide a minimum 55% sensible heat recovery efficiency when tested to the low temperature thermal and ventilation performance test method set out in CAN/CSA-C439, "Rating the Performance of Heat/Energy-Recovery Ventilators", at a Station 1 test temperature of –25°C at an air flow not less than 30 L/s.

(3) Where a heat recovery ventilator is connected to a forced air heating system, the supply side of the ventilator shall be directly connected to the return air side of the forced air heating system.

(4) Two or more heat recovery ventilators shall not be connected in parallel air flow to a common air *supply duct* unless specifically recommended by the manufacturer.

(5) Two or more heat recovery ventilators shall not be connected in parallel air flow to a common downstream *exhaust duct*.

(6) Heat recovery ventilators installed in unheated spaces shall be installed so as to avoid condensation of moisture on fans and motors in exhaust air, in accordance with the manufacturer's instructions.

(7) All start-up procedures recommended by the manufacturer including air balancing and air-flow determination shall be followed.

(8) Free flow of condensate shall be provided in accordance with the manufacturer's recommendations or, in their absence, a condensate drain of minimum ½ inch nominal pipe size pitched in the direction of flow and complete with a trap or condensate pump with sufficient capacity shall be installed.

(9) The heat recovery ventilator and all condensate lines shall be installed in a space where the ambient temperature will not adversely affect the operation of the system.

(10) When operating at the rate required in Article 9.32.3.4., the supply and exhaust airflow rates of the heat recovery ventilator shall be balanced so that the value of the lesser flow shall be at least 90% of the value of the greater flow, unless otherwise recommended by the manufacturer.

9.32.3.12. Outdoor Intake and Exhaust Openings

(1) Separate air intake and exhaust outlet openings, when located on the same wall or roof, shall be installed so as to avoid contamination of the ventilation air by the exhaust air.

(2) Intake openings shall be located so as to avoid contamination of the ventilation air from other local sources such as automobile exhausts and exhaust from adjacent *buildings*.

(3) The distance from the bottom of an air intake opening to finished ground level or to any nearer and lower permanent horizontal surface shall be not less than 450 mm or the depth of expected snow accumulation, whichever is greater.

(4) The distance separating air intakes from *building* envelope penetrations that are potential sources of contaminants, such as *gas vents* or oil fill pipes, shall be not less than 900 mm.

(5) Air intakes shall be clearly labelled as such for identification from locations outside the *dwelling unit*.

(6) The distance from the bottom of an exhaust outlet to finished ground level or to any nearer and lower permanent horizontal surface shall be not less than 100 mm.

(7) Where air intake and exhaust openings are in exposed locations, provision shall be made to protect them from the entry of precipitation by the use of louvres, weather cowls or other suitable protection.

(8) Air intake openings shall incorporate screens or grilles to protect against the entry of animals and insects.

(9) Except for exhaust outlets serving heat recovery ventilators, exhaust outlets shall incorporate backdraft dampers.

(10) Except for clothes dryers, exhaust outlets shall be fitted with screens of mesh not larger than 15 mm, except where climatic conditions may require larger openings.

(11) Where a screen or grille required by Sentences (8) and (10) has a screen mesh less than 6 mm, the screen or grille shall be removable for cleaning.

(12) The gross area of the screens or grilles installed in intake and exhaust openings shall be three times that of the duct served.

(13) Screens and grilles shall be of corrosion-resistant material.

(14) The net free area of an air intake or exhaust outlet shall be equal to or greater than the cross-sectional area of the duct served.

9.32.3.13. Installation

(1) Installation of fans and heat recovery ventilators shall be in accordance with manufacturer's instructions for minimizing noise and vibration transmission and achieving the required sound rating.

(2) Where flow-regulating dampers are required, they shall be adjustable and accessible without requiring the removal of fans, motors, or insulating materials and without the need for specialized tools.

(3) Ventilation equipment shall be accessible for inspection, maintenance, repair and cleaning.

(4) Ventilation equipment installed in unheated spaces shall be installed so as to avoid condensation of moisture on fans and motors in accordance with the manufacturer's instructions.

Section 9.33. Heating and Air-Conditioning

9.33.1. General

9.33.1.1. Design and Installation Requirements

(1) The design and installation of central heating systems, including requirements for combustion air, shall conform to Part 6 and this Section.

(2) The design and installation of *air-conditioning* systems shall conform to Part 6.

(3) Repairs or component replacements that change the capacity or extent of safety of an existing heating, ventilating or *air-conditioning* system and that alter the method of operation shall conform to this Code.

9.33.1.2. Solid Fuel-Burning Appliances

(1) The design, construction and installation, including the provision of combustion air, of solid-fuel burning *appliances* and equipment, including *stoves*, *cooktops* and *space heaters*, shall conform to CSA-B365, "Installation Code for Solid-Fuel-Burning Appliances and Equipment".

(2) Solid fuel-burning *stoves*, *furnaces* and hydronic heating systems designed to burn solid fuels, other than coal, shall conform to the particulate emission limits of,

(a) CSA B415.1, "Performance Testing of Solid-Fuel-Burning Heating Appliances", or

(b) the "Standards of Performance for New Residential Wood Heaters", set out in Subpart AAA of Part 60 of Title 40 of the Code of Federal Regulations, published by the United States Environmental Protection Agency, as it read on November 1, 2013.

9.33.1.3. Structural Movement

(1) Where the *building* is in a location where the spectral response acceleration, $S_a(0.2)$, is greater than 0.55, heating and *air-conditioning* equipment with fuel or power connections shall be secured to the structure to resist overturning and displacement.

9.33.2. Required Heating Systems

9.33.2.1. Residential Heating Systems

(1) Residential *buildings* intended for use in the winter months on a continuing basis shall be equipped with heating facilities conforming to this Section.

9.33.2.2. Equipment Sizing

(1) The heating system capacity shall be based on the heating load calculated in accordance with Sentence 6.2.1.1.(1).

(2) Where a cooling system is installed, the cooling system capacity shall be based on the cooling load calculated in accordance with Sentence 6.2.1.1.(1).

(3) The heating and cooling equipment capacities shall be determined in accordance with the requirements of CSA F280, "Determining the Required Capacity of Residential Space Heating and Cooling Appliances".

9.33.3. Design Temperatures

9.33.3.1. Indoor Design Temperatures

(1) At the outside design temperature, required heating facilities shall be capable of maintaining an indoor air temperature of not less than,

(a) 22°C in all living spaces,

(b) 22°C in unfinished *basements*, and

(c) 15°C in heated crawl spaces.

9.33.3.2. Outdoor Design Temperatures

(1) The outdoor conditions to be used in designing heating, ventilating and *air-conditioning* systems shall be the appropriate values for the location as set out in MMAH Supplementary Standard SB-1, "Climatic and Seismic Data", using 2.5 percent design temperature criteria.

9.33.4. Carbon Monoxide Alarms

9.33.4.1. Application

(1) This Subsection applies to every *building* that,

(a) contains a *residential occupancy*, and

(b) contains a fuel-burning *appliance* or a *storage garage*.

9.33.4.2. Location of Carbon Monoxide Alarms

(1) Where a fuel-burning *appliance* is installed in a *suite* of *residential occupancy*, a carbon monoxide alarm shall be installed adjacent to each sleeping area in the *suite*.

(2) Where a fuel-burning *appliance* is installed in a *service room* that is not in a *suite* of *residential occupancy*, a carbon monoxide alarm shall be installed,

(a) adjacent to each sleeping area in every *suite* of *residential occupancy* that is adjacent to the *service room*, and

(b) in the *service room*.

(3) Where a *storage garage* is located in a *building* containing a *residential occupancy***,** a carbon monoxide alarm shall be installed adjacent to each sleeping area in every *suite* of *residential occupancy* that is adjacent to the *storage garage*.

(4) Where a *storage garage* serves only the *dwelling unit* to which it is attached or built in, a carbon monoxide alarm shall be installed adjacent to each sleeping area in the *dwelling unit*.

(5) A carbon monoxide alarm shall be mechanically fixed,

(a) at the manufacturer's recommended height, or

(b) in the absence of specific instructions, on or near the ceiling.

9.33.4.3. Installation and Conformance to Standards

(1) The carbon monoxide alarm required by Article 9.33.4.2. shall,

(a) except as permitted in Sentence (2), be permanently connected to an electrical circuit and shall have no disconnect switch between the overcurrent device and the carbon monoxide alarm,

(b) be wired so that its activation will activate all carbon monoxide alarms within the *suite*, where located within a *suite* of *residential occupancy*,

(c) be equipped with an alarm that is audible within bedrooms when the intervening doors are closed, where located adjacent to a sleeping area, and

(d) conform to,

(i) CAN/CSA-6.19, "Residential Carbon Monoxide Alarming Devices", or

(ii) UL 2034, "Single and Multiple Station Carbon Monoxide Alarms".

(2) Where the *building* is not supplied with electrical power, carbon monoxide alarms are permitted to be battery operated.

Section 9.34. Electrical Facilities

9.34.1. General

9.34.1.1. Reserved

9.34.1.2. Required Facilities

(1) Where electrical services are available, electrical facilities shall be provided for every *building* in conformance with this Section.

9.34.1.3. Location of Equipment in Public Areas

(1) Entrance switches, meters, panel boxes, splitter boxes, time clocks and other similar equipment shall not be located in any public area unless adequate precautions are taken to prevent interference with the equipment.

9.34.1.4. Recessed Lighting Fixtures

(1) Recessed lighting fixtures shall not be located in insulated ceilings unless the fixtures are designed for such installations.

9.34.1.5. Wiring and Cables

(1) Except for *dwelling units* and except as required in Sentence (2), optical fibre cables and electrical wires and cables installed in *buildings* permitted to be of *combustible construction* shall,

(a) not convey flame or continue to burn for more than 1 min when tested in conformance with the Vertical Flame Test in Clause 4.11.1. of CSA C22.2 No. 0.3, "Test Methods for Electrical Wires and Cables", (FT1 Rating), or

(b) be located in,

(i) totally enclosed *noncombustible* raceways,

(ii) masonry walls,

(iii) concrete slabs, or

(iv) totally enclosed non metallic raceways conforming to Clause 3.1.5.20.(1)(b).

(2) Where a concealed space in a floor or ceiling assembly is used as a *plenum*, electrical wires and cables within the *plenum* shall conform to Sentence 3.6.4.3.(1).

9.34.2. Lighting Outlets

9.34.2.1. Lighting of Entrances

(1) An exterior lighting outlet with fixture controlled by a wall switch located within the *building* shall be provided at every entrance to *buildings* of *residential occupancy*.

(2) The exterior lighting outlet with fixture required by Sentence (1) may be controlled by a wall switch or panel accessible to authorized personnel only, where it serves,

(a) a *building* entrance serving multiple *suites* of *residential occupancy*,

(b) multiple *dwelling unit* entrances,

(c) *hotels*, or

(d) motels.

9.34.2.2. Outlets in Dwelling Units

(1) Except as provided in Sentence (2), a lighting outlet with fixture controlled by a wall switch shall be provided in kitchens, bedrooms, living rooms, utility rooms, laundry rooms, dining rooms, bathrooms, water closet rooms, vestibules and hallways in *dwelling units*.

(2) Where a receptacle controlled by a wall switch is provided in bedrooms or living rooms, such rooms need not conform to the requirements of Sentence (1).

9.34.2.3. Stairways

(1) Every stairway shall be lighted.

(2) Except as provided in Sentence (3), 3-way wall switches located at the head and foot of every stairway shall be provided to control at least one lighting outlet with fixture for stairways with four or more risers in *dwelling units*.

(3) The stairway lighting for *basements* that do not contain finished space or lead to an outside entrance or built-in garage and that serve not more than one *dwelling unit* is permitted to be controlled by a single switch located at the head of the stairs.

9.34.2.4. Basements

(1) A lighting outlet with fixture shall be provided for each 30 m² of floor area or fraction of it in unfinished *basements*.

(2) The outlet required in Sentence (1) nearest the stairs shall be controlled by a wall switch located at the head of the stairs.

9.34.2.5. Storage Rooms

(1) A lighting outlet with fixture shall be provided in storage rooms.

9.34.2.6. Garages and Carports

(1) A lighting outlet with fixture shall be provided for an attached, built-in or detached garage or carport.

(2) Except as provided in Sentence (3), lighting outlets required in Sentence (1) shall be controlled by a wall switch near the doorway.

(3) Where the lighting outlet and fixture required in Sentence (1) are ceiling mounted above an area not normally occupied by a parked car, or are wall mounted, a fixture with a built-in switch is permitted to be used.

(4) Where a carport is lighted by a light at the entrance to a *dwelling unit*, additional carport lighting is not required.

9.34.2.7. Public and Service Areas

(1) Every public or service area in *buildings*, including a *recreational camp* and a *camp for housing of workers*, shall have lighting outlets with fixtures controlled by a wall switch or panel to illuminate such areas.

(2) When provided by incandescent lighting, illumination required in Sentence (1) shall conform to Table 9.34.2.7.

(3) When other types of lighting are used, illumination equivalent to that shown in Table 9.34.2.7. shall be provided.

Table 9.34.2.7.
Lighting for Public Areas

Forming Part of Sentences 9.34.2.7.(2) and (3)

Item	Column 1	Column 2	Column 3
	Room or Space	Minimum Illumination, lx	Minimum Lighting Power Density, W/m^2 of *floor area* (incandescent lighting)
1.	Storage rooms	50	5
2.	*Service rooms* and laundry areas	200	20
3.	Garages	50	5
4.	Public water closet rooms	100	10
5.	Service hallways and stairways	50	5
6.	Recreation rooms	100	10
7.	Hallways, corridors, stairways and sleeping areas in *recreational camps* and *camps for housing of workers*	100	10
8.	Kitchen in *recreational camps* and *camps for housing of workers*	500	50

9.	All other rooms in *recreational camps* and *camps for housing of workers*	250	25

9.34.3. Emergency Lighting

9.34.3.1. Emergency Lighting

(1) Emergency lighting shall conform to Subsection 9.9.12.

Section 9.35. Garages and Carports

9.35.1. Scope

9.35.1.1. Application

(1) This Section applies to garages and carports serving a single *dwelling unit.*

9.35.1.2. Construction Requirements

(1) The construction of a garage or carport shall conform to the requirements for other *buildings* in this Part except as provided in this Section.

9.35.2. General

9.35.2.1. Carport Considered to be Garage

(1) Where a roofed enclosure used for the storage or parking of motor vehicles has more than 60 per cent of the total perimeter enclosed by walls, doors or windows, the enclosure shall be considered a garage.

9.35.2.2. Garage Floor

(1) Where an attached or built-in garage is provided, the garage floor shall be sloped to drain liquids to the outdoors.

9.35.3. Foundations

9.35.3.1. Foundation Required

(1) Except as permitted in this Subsection, *foundations* conforming to Sections 9.12. and 9.15. shall be provided for the support of carport and garage super-structures, including that portion beneath garage doors.

9.35.3.2. Protection from Damage due to Soil Movement

(1) In clay-type *soils* subject to significant movement with a change in *soil* moisture content, the *foundation* depth of carports or garages connected to a *dwelling unit* directly or by a breezeway shall be approximately the same depth as the main *building foundation*.

(2) Where slab-on-ground construction is used, a construction joint shall be provided between the main *building* slab and the garage or breezeway or carport slab.

(3) Except as provided in Section 9.12., *foundations* for attached unheated garages or carports shall be below frost level.

9.35.3.3. Small Garages

(1) Detached garages of less than 55 m² floor area and not more than 1 *storey* in height may be supported on wood mud sills provided the garage is not of masonry or masonry veneer construction.

9.35.3.4. Column Piers

(1) Piers for the support of carport columns shall extend not less than 150 mm above ground level.

(2) Piers referred to in Sentence (1) shall project not less than 25 mm beyond the base of the column but in no case be less than 190 mm by 190 mm in size.

9.35.4. Walls and Columns

9.35.4.1. Interior Finish

(1) Interior finish need not be applied to garage and carport walls.

9.35.4.2. Columns

(1) Columns for garages and carports shall conform to Section 9.17., except that 89 mm by 89 mm wood columns may be used.

9.35.4.3. Anchorage

(1) Garage or carport walls and columns shall be anchored to the *foundation* to resist wind uplift in conformance with Subsection 9.23.6., except that where a garage is supported on the surface of the ground, ground anchors shall be provided to resist wind uplift.

Section 9.36. Cottages

9.36.1. Scope

9.36.1.1. Application

(1) This Section applies to *buildings* of *residential occupancy* used or intended to be used as seasonal recreational *buildings*.

(2) The *buildings* described in Sentence (1) shall comply with all the requirements of this Part, except where they are specifically exempted in this Section.

9.36.2. General

9.36.2.1. Exclusions

(1) Except as provided in Subsection 9.10.15. and Articles 9.36.2.4. and 9.36.3.1., *buildings* used or intended to be used as seasonal recreational *buildings* need not comply with Sections 9.5. to 9.7. and 9.9. to 9.11.

(2) Flooring need not comply with Section 9.30., but tight-fitting floors shall be provided to support the *live* and *dead loads*.

(3) Except as provided in Sentence (4), thermal insulation, *vapour barrier*, air barrier construction, interior finishes, plumbing, heating, mechanical ventilation, *air-conditioning* and electrical facilities, need not be provided, but where any of these are provided, they shall comply with the requirements of this Part.

(4) Where heating and *air-conditioning* are provided, Article 9.33.3.1. need not be complied with.

9.36.2.2. Foundations

(1) Continuous perimeter *foundation* walls are not required, but when they are provided, they shall comply with the requirements of this Part.

(2) Where unit masonry columns are used, the height of such columns shall not exceed,

(a) in the case of hollow masonry units, 4 times the least dimension of the units,

(b) in the case of solid masonry units or hollow units with voids filled with concrete, 10 times the least dimension of the column, or

(c) where the column is reinforced with at least four 13 mm diam bars and filled with concrete, 18 times the least dimension of the column.

(3) Columns in excess of the height limitations of Clauses (2)(a) to (c) shall be designed in accordance with Part 4.

9.36.2.3. Waterproofing and Dampproofing

(1) Where *foundations* below ground level and concrete floors on ground are used, they shall comply with Section 9.13.

9.36.2.4. Smoke Alarms

(1) Every *dwelling unit* within the scope of this Section shall be provided with a *smoke alarm* in accordance with Subsection 9.10.19.

9.36.3. Tourist Accommodation

9.36.3.1. Buildings for Seasonal Tourist Accommodation or for Rent

(1) Where *buildings* are used or intended to be used for seasonal tourist accommodation or for rent, they shall comply with Sections 9.5. to 9.8. in addition to the requirements of this Section.

Section 9.37. Log Construction

9.37.1. General

9.37.1.1. Material Requirements

(1) Logs that are sound and free of fractures may be used for *foundations*, beams, posts and similar members, provided it can be shown by a structural analysis or tests or previous experience that the strength of the member is adequate for its intended purposes.

9.37.1.2. Requirement for Wood Preservative

(1) The portion of any log coming in contact with masonry or concrete at or below *grade* shall be treated with a wood preservative to prevent decay.

9.37.1.3. Exterior Joints

(1) All exterior joints between logs shall be rendered water-tight by methods such as machined joints, oakum packing, cement parging, chinking, caulking or a combination of these.

9.37.2. Walls

9.37.2.1. Logs

(1) Walls may be built of natural or manufactured logs.

9.37.2.2. Attachment of Logs

(1) Walls made of logs in a horizontal position shall have interlocking intersections that will prevent the collection of water in the joints, or the horizontal logs shall butt to a vertical corner post to which the horizontal logs shall be firmly attached.

9.37.2.3. Joining Logs

(1) Each log in a horizontal position shall be scribed as close as possible to its bearer and fastened to the bearer in at least three places throughout its length, by dowels, continuous machined joints, vertical framing members or interlocking intersections or any combination of these, but in no case shall the distance between fastenings exceed 1 800 mm.

9.37.2.4. Vertical Logs

(1) Each log in a wall built of vertical logs shall be scribed to fit as closely as possible to the adjacent logs.

9.37.2.5. Plates

(1) Logs used in a vertical position shall have a plate at the top and a plate at the bottom and the plates shall be at least as wide as the largest end diameter of any of the logs.

9.37.3. Lintels

9.37.3.1. Support Over Openings

(1) Logs placed in vertical position shall be supported over window and door openings by lintels meeting the requirements of Tables A-12 to A-16.

9.37.3.2. Clearance

(1) At every opening in a wall made of logs in a horizontal position where shrinkage can occur there shall be a clearance between the rough buck header and the lintel log of not less than 13 mm in width for each 300 mm of height to allow for settlement.

Section 9.38. Park Model Trailers

9.38.1. Scope

9.38.1.1. Application

(1) This Section applies to manufactured *buildings* designed and constructed in conformance with CAN/CSA-Z241 Series, “Park Model Trailers”, and used or intended to be used as a seasonal recreational *building* of *residential occupancy*.

9.38.2. General

9.38.2.1. General

(1) Except as provided in Subsection 9.38.3., a manufactured *building* used or intended to be used as a seasonal recreational *building* of *residential occupancy* is deemed to comply with this Code if it is designed and constructed in conformance with CAN/CSA-Z241 Series, “Park Model Trailers”.

9.38.3. Requirements

9.38.3.1. Other Building Components

(1) The requirements of this Code shall apply to *building* components designed and *constructed* outside the place of manufacture of a *building* described in Article 9.38.1.1.

9.38.3.2. Spatial Separation

(1) *Buildings* described in Article 9.38.1.1. shall comply with Section 9.10. where the *building* is,

(a) used or intended to be used for seasonal tourist accommodation, or

(b) leased or intended to be leased.

9.38.3.3. Foundations and Anchorage

(1) *Buildings* described in Article 9.38.1.1. shall be supported and anchored in conformance with the manufacturer's installation instructions.

9.38.3.4. Proximity to Above Ground Electrical Conductors

(1) *Buildings* described in Article 9.38.1.1. shall comply with Article 9.1.1.5.

Section 9.39. Reinforced Concrete Slabs

9.39.1. Scope

9.39.1.1. Application

(1) This Section applies to,

(a) reinforced concrete slabs that are suspended over cold rooms in *basements*, and are supported by *foundation* walls along the perimeter of the slab with no additional interior supports, and

(b) slabs in which the clear span between supporting walls is not more than 2.5 m along the shortest dimension of the slab.

(2) Slabs for conditions other than described in Sentence (1) shall be designed in accordance with Part 4.

(3) This Section does not apply to reinforced concrete slabs intended to support motor vehicles.

9.39.1.2. Concrete

(1) Concrete shall conform to Section 9.3.

9.39.1.3. Reinforcing Steel

(1) Reinforcing steel shall conform to Grade 400 in CSA-G30.18, Carbon Steel Bars for Concrete Reinforcement".

9.39.1.4. Slab Construction

(1) Concrete shall be cast against form work in accordance with CSA A23.1, "Concrete Materials and Methods of Concrete Construction".

(2) The slab shall be not less than 125 mm thick.

(3) The slab shall be reinforced with 10M bars spaced not more than 200 mm o.c. in each direction, with 30 mm clear cover from the bottom of the slab to the first layer of bars, and the second layer of bars laid directly on top of the lower layer in the opposite direction.

(4) The slab shall bear not less than 75 mm on the supporting *foundation* walls and be anchored to the walls with 600 mm× 600 mm 10M bent dowels spaced at not more than 600 mm o.c.

(5) Exposed slabs shall be sloped to effectively shed water away from the exterior wall.

Section 9.40. Additional Requirements for Change of Use

9.40.1. Scope

9.40.1.1. Application

(1) This Section applies where proposed *construction* in respect of an existing *building* will result in any of the following changes of use of all or part of the *building*:

(a) a change of the *major occupancy* of all or part of a *building* that is designated with a "Y" in Table 1.3.1.4. of Division C,

(b) a *suite* of a Group C *major occupancy* is converted into more than one *suite* of a Group C *major occupancy*,

(c) a *farm building* or part of a *farm building* is changed to a *major occupancy*,

(d) a *building* or part of a *building* is changed to a *post-disaster building*,

(e) a *building* or part of a *building* is changed to a retirement home regulated under the *Retirement Homes Act, 2010*, or

(f) the use of a *building* or part of a *building* is changed and the previous *major occupancy* of the *building* or part of the *building* cannot be determined.

(2) For the purposes of this Section and Sentences 11.4.2.1.(1) and 11.4.2.5.(4), the changes of use set out in Clauses (1)(b) to (f) are also deemed to constitute a change in *major occupancy*.

(3) The requirements of this Section are in addition to the requirements of other Parts of the Code as they apply to the proposed *construction.*

9.40.2. Additional Construction

9.40.2.1. Change of Use and Compensating Construction

(1) Where proposed *construction* will result in a change of use described in Clauses 9.40.1.1.(1)(a) to (e), additional *construction* shall be required in order that the *building* or part of a *building* subject to the change of use conforms to the requirements of Subsections 9.5.1. and 9.5.3. to 9.5.10., Section 9.6., Article 9.7.2.3. Sentences 9.7.5.1.(2) and 9.7.6.2.(1) and (3), Articles 9.8.8.1. and 9.9.10.1., Subsection 9.10.17. and Sections 9.31., 9.32. and 9.34. as they apply to the new *major occupancy* that the *building* or part of a *building* is to support.

(2) For the purposes of this Article, existing *buildings* shall be classified as to their *construction* and *occupancy* as provided for in Sentence 11.2.1.1.(1).

9.40.2.2. Performance Level Evaluation and Compensating Construction

(1) The *performance level* of a *building* after *construction* shall not be less than the *performance level* of the *building* prior to *construction.*

(2) For the purposes of Sentence (1), reduction of *performance level* shall be determined in accordance with Articles 11.4.2.1., 11.4.2.3. and 11.4.2.5.

(3) Where the proposed *construction* would reduce the *performance level* of an existing *building*, compensating *construction* shall be required in conformance with Articles 11.4.3.1., 11.4.3.2., 11.4.3.4. and 11.4.3.6.

(4) Section 11.5. applies in respect of the requirements of Sentences 11.4.3.4.(1), (3) and (4).

Table A-1
Maximum Spans for Floor Joists – General Cases[(1)]

Forming Part of Sentence 9.23.4.2.(1)

Item	Column 1	Column 2	Column 3	Col. 4	Col. 5	Col. 6	Col. 7	Col. 8	Col. 9	Col. 10	Col. 11	Col. 12

Notes to Table A-1:

(1) Spans apply only where the floors serve residential areas as described in Table 4.1.5.3., or the uniformly distributed *live load* on the floor does not exceed that specified for residential areas as described in Table 4.1.5.3.

(2) See Sentence 9.23.9.4.(5) for alternatives to strapping.

Table A-2
Maximum Spans for Floor Joists – Special Cases(1)

Forming Part of Sentences 9.23.4.2.(1) and 9.23.4.4.(2)

Item	Column 1	Column 2	Column 3	Col. 4	Col. 5	Col. 6	Col. 7	Col. 8	Col. 9	Col. 10	Col. 11	Col. 12

Notes to Table A-2:

(1) Spans apply only where the floors serve residential areas as described in Table 4.1.5.3., or the uniformly distributed *live load* on the floor does not exceed that specified for residential areas as described in Table 4.1.5.3.

(2) No bridging is assumed for spans for floor joists with concrete topping.

Notes to Table A-8:

(1) Beam spans apply only where the floors serve residential areas as described in Table 4.1.5.3., or the uniformly distributed *live load* on the floors does not exceed that specified for residential areas as described in Table 4.1.5.3.

(2) When the floors have a concrete topping of not more than 51 mm, the spans must be multiplied by 0.8.

(3) Supported length means half the sum of the joists spans on both sides of the beam.

(4) Straight interpolation may be used for other supported lengths.

(5) Spans are clear spans between supports. For total span, add two bearing lengths.

(6) 3-ply beams with supported lengths greater than 4.2 m require minimum bearing length of 114 mm. All other beams require minimum bearing length of 76 mm.

Notes to Table A-9:

(1) Beam spans apply only where the floors serve residential areas as described in Table 4.1.5.3., or the uniformly distributed *live load* on the floors does not exceed that specified for residential areas as described in Table 4.1.5.3.

(2) When the floors have a concrete topping of not more than 51 mm, the spans must be multiplied by 0.8.

(3) Supported length means half the sum of the joists spans on both sides of the beam.

(4) Straight interpolation may be used for other supported lengths.

(5) Spans are clear spans between supports. For total span, add two bearing lengths.

(6) 3-ply beams require minimum bearing length of 114 mm. 4-ply and 5-ply beams with supported lengths greater than 3 m require minimum bearing length of 114 mm. All other beams require minimum bearing length of 76 mm.

Notes to Table A-10:

(1) Beam spans apply only where the floors serve residential areas as described in Table 4.1.5.3., or the uniformly distributed *live load* on the floors does not exceed that specified for residential areas as described in Table 4.1.5.3.

(2) When the floors have a concrete topping of not more than 51 mm, the spans must be multiplied by 0.8.

(3) Supported length means half the sum of the joists spans on both sides of the beam.

(4) Straight interpolation may be used for other supported lengths.

(5) Spans are clear spans between supports. For total span, add two bearing lengths.

(6) 3-ply beams with supported lengths greater than 4.2 m require minimum bearing length of 152 mm. All other beams require minimum bearing length of 114 mm.

Notes to Table A-11:

(1) Spans apply only where the floors serve residential areas as described in Table 4.1.5.3., or the uniformly distributed *live load* on the floor does not exceed that specified for residential areas as described in Table 4.1.5.3.

(2) Supported length means half the sum of the joist spans on both sides of the beam.

(3) Straight interpolation may be used for other supported lengths.

(4) Spans are valid for glued-laminated timber conforming to CAN/CSA-O122 and CSA O177.

(5) Spans are clear spans between supports. For total span, add two bearing lengths.

(6) Provide a minimum bearing length of 89 mm. (Alternatively, the bearing length may be designed in accordance with Part 4.)

(7) Top edge of beam assumed to be fully laterally supported by joists.

		5 – 38 × 286	5.28	4.54	4.04	3.68	3.40

Notes to Table A-12:

(1) Beam and lintel spans are calculated based on a maximum supported length of 4.9 m. Spans may be increased by 5% for supported lengths of not more than 4.3 m, by 10% for

supported lengths of not more than 3.7 m, and by 25% for supported lengths of not more than 2.4 m.

(2) For ridge beams, supported length means half the sum of the rafter, joist or truss spans on both sides of the beam. For lintels, supported length means half the sum of truss, roof joist or rafter spans supported by the lintel plus the length of the overhang beyond the lintel.

(3) Provide a minimum bearing length of 76 mm.

		2 – 38 × 184	1.40	1.33	1.28	1.22	1.18	1.00
		2 – 38 × 235	1.71	1.63	1.56	1.50	1.44	1.22
		2 – 38 × 286	1.99	1.89	1.81	1.74	1.67	1.41

Notes to Table A-13:

[1] Where structural sheathing is used, lintel spans may be increased by 15%. Structural sheathing consists of a minimum 9.5 mm thick structural panel conforming to CSA O121, CSA O151, CSA O325 or CSA O437.0 fastened with at least two rows of fasteners to the exterior face of the lintel, and a single row to the top plates and studs. Fasteners shall conform to Table 9.23.3.5.

[2] A single piece of 89 mm thick lumber may be used in lieu of 2 pieces of 38 mm thick lumber on edge.

[3] If floor joists span the full width of the *building* without support, lintel spans shall be reduced by 15% for "Roof, ceiling and 1 *storey*", by 20% for "Roof, ceiling and 2 *storeys"*, and by 25% for "Roof, ceiling and 3 *storeys"*.

[4] For ends of lintels fully supported by walls, provide minimum bearing length of 38 mm for lintel spans up to 3 m, or minimum bearing length of 76 mm for lintel spans greater than 3 m.

[5] Spans for 0.6 m tributary width are calculated for lintels in end walls that support only a 0.6 m width of roof and ceiling, but do not support roof joists, roof rafters or roof trusses.

[6] Lintel spans are calculated based on a maximum floor joist, roof joist or rafter span of 4.9 m and a maximum roof truss span of 9.8 m. Lintel spans may be increased by 5% if rafter and joist spans are not more than 4.3 m and roof truss spans are not more than 8.6 m. Spans may be increased by 10% if rafter and joist spans are not more than 3.7 m and roof trusses are not more than 7.4 m.

[7] Spans apply only where the floors serve residential areas as described in Table 4.1.5.3., or the uniformly distributed *live load* does not exceed that specified for residential areas as described in Table 4.1.5.3.

Table A-14
Maximum Spans for Hem – Fir Lintels – No. 1 or No. 2 Grade – Non-Structural Sheathing[1]

Notes to Table A-16:

(1) Spans are valid for glued-laminated timber conforming to CAN/CSA-O122 and CSA O177.

(2) Provide a minimum bearing length of 89 mm. (Alternatively, the bearing length may be calculated in accordance with Part 4.)

(3) Top edge of lintel assumed to be fully laterally supported.

(4) Supported Length means half the length of trusses or rafters, plus the length of overhang beyond the wall.

(5) For intermediate supported lengths, straight interpolation may be used.

Table A-17
Maximum Allowable Clear Spans for Lintels in Flat Loadbearing Insulating Concrete Form (ICF) Walls[1][2][3] (1-10M Bottom Bar)

Forming Part of Sentence 9.20.17.4.(3)

		500	2.27	1.93	1.55	1.43
		600	2.47	2.11	1.70	1.56

Notes to Table A-17:

(1) Deflection criteria is L/240, where "L" is the clear span of the lintel.

(2) Linear interpolation is permitted between ground snow loads and between lintel depths.

(3) 10M stirrups are required at a maximum d/2 spacing for spans greater than 1 200 mm, where "d" is the distance from the top of the lintel to the level of the bottom reinforcing bar in the lintel.

Table A-18
Maximum Allowable Clear Spans for Lintels in Flat Loadbearing Insulating Concrete Form (ICF) Walls(1)(2)(3) (1-15M Bottom Bar)

Forming Part of Sentence 9.20.17.4.(3)

		600	3.47	2.97	2.39	2.20

Notes to Table A-18:

(1) Deflection criteria is L/240, where "L" is the clear span of the lintel.

(2) Linear interpolation is permitted between ground snow loads and between lintel depths.

(3) 10M stirrups are required at a maximum d/2 spacing for spans greater than 1 200 mm, where "d" is the distance from the top of the lintel to the level of the bottom reinforcing bar in the lintel.

Table A-19
Maximum Allowable Clear Spans for Lintels in Flat Loadbearing Insulating Concrete Form (ICF) Walls(1)(2)(3) (2-15M Bottom Bar)

Forming Part of Sentence 9.20.17.4.(3)

Item	Column 1	Column 2	Column 3	Column 4	Column 5	Column 6
	Minimum Lintel Thickness, mm	Minimum Lintel Depth, mm	Maximum Clear Span, m			
			Supporting Light-Frame Roof Only		Supporting ICF Second *Storey* and Light-Frame Roof

Notes to Table A-33:

(1) A roof dead load of 0.5 kPa has been assumed. The Table does not apply where the stud supports additional loads from heavy roofing materials such as concrete tiles or clay roofing tiles.

(2) Wall construction shall conform to the requirements of Sentence 9.23.10.1.(2).

10.3.2.	**Performance Level**
10.4.	**Compliance Alternatives**
10.4.1.	**Compliance Alternatives**

Table	Description
10.3.2.2.A.	**For Evaluation of Early Warning/Evacuation**
10.3.2.2.B	**Additional Upgrading for Multiple Major Occupancies**

Section 10.1. General

10.1.1. Scope

10.1.1.1. Scope

(1) The scope of this Part shall be as described in Subsection 1.1.2. of Division A.

10.1.1.2. Change in Major Occupancy

(1) The following changes of use are also deemed to be a change in *major occupancy* for the purposes of this Part:

(a) a *suite* of a Group C *major occupancy* is converted into more than one *suite* of a Group C *major occupancy*,

(b) a *suite* or part of a *suite* of a Group A, Division 2 or Group A, Division 4 *major occupancy* is converted to a *gaming premises*,

(c) a *farm building* or part of a *farm building* is changed to a *major occupancy*,

(d) a *building* or part of a *building* is changed to a *post-disaster building*,

(e) a *building* or part of a *building* is changed to a retirement home regulated under the *Retirement Homes Act, 2010*, or

(f) the use of a *building* or part of a *building* is changed and the previous *major occupancy* of the *building* or part of the *building* cannot be determined.

Section 10.2. Classification of Existing Buildings

10.2.1. Classification

10.2.1.1. Classification of Major Occupancy

(1) Every existing *building* or part of it shall be classified according to its *major occupancy* in accordance with the requirements of Subsection 3.1.2.

10.2.1.2. Classification According to Construction and Occupancy

(1) For the purposes of this Part, existing *buildings* shall be classified as to their *construction* and *occupancy* as provided for in Sentence 11.2.1.1.(1).

10.2.1.3. Building Size and Construction

(1) The requirements of Articles 3.2.2.20. to 3.2.2.83. do not apply to this Part.

Section 10.3. Requirements

10.3.1. General

10.3.1.1. General

(1) Except as provided in Section 10.4., a *building* or part of a *building* subject to a change of *major occupancy* shall conform to the requirements of Subsection 3.2.6., Sections 3.7., 3.11. and 3.12., Sentences 6.2.2.1.(2), 6.2.3.9.(1) and 6.2.4.7.(1), Subsections 9.5.1. and 9.5.3. to 9.5.10., Sentences 9.6.1.4.(3), (4) and (7) to (9), Article 9.7.2.3., Sentences 9.8.8.1.(5) to (9) and 9.9.10.1.(1) to (7), Subsection 9.10.17., Sections 9.31. and 9.32., and Subsections 9.34.1. to 9.34.3. as they apply to the new *major occupancy* that the *building* or part of a *building* is to support.

10.3.2. Performance Level

10.3.2.1. General

(1) The *performance level* of a *building* after the change of *major occupancy* shall not be less than the *performance level* prior to the change of *major occupancy*.

(2) For the purposes of Sentence (1), reduction of *performance level* shall be determined in accordance with Article 10.3.2.2.

10.3.2.2. Reduction in Performance Level

(1) Except as provided in Sentence (2), the *performance level* of a *building* or part of a *building* is reduced where the existing structural floor and roof framing systems and their supporting members are not adequate to support the proposed *dead loads* and *live loads* of the new *major occupancy* that the *building* is to support.

(2) The inadequacy of the existing structural floor or roof framing system and its supporting members to support the proposed *dead loads* and *live loads* does not reduce the *performance level* of the *building* if the portion of the floor affected by the proposed loads is restricted to the loading it will support and signs stating the restrictions are posted.

(3) Except as provided in Section 10.4., the *performance level* of a *building* or part of a *building* is reduced where the early warning and evacuation systems requirements of the *building* do not meet the early warning and evacuation systems requirements set out in Table 10.3.2.2.A. for the new *major occupancy* that the *building* is to support.

Table 10.3.2.2.A.
For Evaluation of Early Warning/Evacuation

Forming Part of Sentence 10.3.2.2.(3)

<table>
<tr><td>Column 1</td><td>Column 2</td></tr>
<tr><td>Early Warning / Evacuation Evaluation</td><td>Compliance Alternative (1)</td></tr>
<tr><td>Early Warning and Evacuation to be checked against
(a) access to exit widths based on occupant load in Subsection 3.3.1. or 9.9.3.;
(b) exit widths based on occupant load in Subsection 3.4.3. or 9.9.3.;
(c) exit signs in Subsection 3.4.5. or 9.9.11.;
(d) lighting of exits, lighting of access to exits and emergency lighting in Subsection 3.2.7. or 9.9.12.;
(e) fire alarm system in Subsection 3.2.4. or 9.10.18.;
(f) smoke alarms in Subsection 9.10.19.;
(g) travel distance and number of exits in other Parts of this Division;
(h) smoke control measures, and at least one elevator to permit transport of firefighters to all floors in hotels whose floor level is more than 18 m high, measured between grade and floor level of the top storey as per Subsection 3.2.6.; and</td><td>EARLY WARNING
(a) Compliance alternatives as listed may be used.
EVACUATION
(b) Compliance alternatives as listed to access to exit and exit widths, number of exits, door release hardware, and travel distance may be used.</td></tr>
<tr><td>(i) door release hardware requirements in Articles 3.3.1.12. and 3.4.6.16.,
and deficiencies shall be upgraded.</td><td></td></tr>
</table>

Notes to Table 10.3.2.2.A.:

(1) See Tables 11.5.1.1.A., 11.5.1.1.B., 11.5.1.1.C., 11.5.1.1.D/E. and 11.5.1.1.F. for *compliance alternatives* that may be used.

(4) Except as provided in Sentence (5), the *performance level* of an existing *building* is reduced where a change in use will result in a change of the *major occupancy* of all or part of an existing *building* to another *major occupancy* of a greater *hazard index*.

(5) Except as provided in Sentence (6), if the *hazard index* of the new *major occupancy* is greater than the *hazard index* of the existing *major occupancy*, the *performance level* is not reduced where the *hazard index* of the new *major occupancy* is not greater than the *construction index* of the existing *building*.

(6) Small or medium sized existing *buildings* as determined in Tables 11.2.1.1.B. to 11.2.1.1.N. facing multiple *streets* may be assigned a *hazard index* credit of 1, which may be subtracted from the *hazard index* of the new *major occupancy* provided,

(a) the *building* does not contain a Group B, Division 1, a Group C, or a Group F, Division 1 *occupancy*, and

(b) firefighting access complying with Articles 3.2.5.1. to 3.2.5.5. or Subsection 9.10.20. is provided.

(7) Except as provided in Sentence (8), the *performance level* of a *building* or part of a *building* is reduced in an existing *building combustible construction* where,

(a) the *occupancy* is changed to a *residential occupancy* in all or part of the *building*, and

(b) if the *building* was new, it would have been required to be constructed of *noncombustible construction or to be constructed in accordance with article 3.2.2.*43A or 3.2.2.50A

(8) A change in the *occupancy* of a *building* or part of a *building* to a *residential occupancy* does not reduce the *performance level* of the *building* or part of the *building* where,

(a) the *building* is *sprinklered*, and

(b) the *building* does not exceed 6 *storeys* in *building height*.

(9) The *performance level* of a *building* or part of a *building* is reduced where the new *major occupancy* in an existing *building* of multiple *occupancy* is not separated from adjoining *major occupancies* by *fire separations* having *fire-resistance ratings* conforming to Article 3.1.3.1., Subsection 9.10.9. or Table 10.3.2.2.B.

Table 10.3.2.2.B.(1)
Additional Upgrading for Multiple Major Occupancies

Forming Part of Sentence 10.3.2.2.(9)

Column 1	Column 2	Column 3	Column 4
New *Major Occupancy*	Code Requirements	*Compliance Alternative*	
All	Table 3.1.3.1. and Subsection 9.10.9.	For Existing *Building*	If *Sprinklered*
	Where:	Reduce to	Reduce to
	1 h rating required	45 min	30 min
	2 h rating required	1.5 h	1 h
	3 h rating required	2 h	1.5 h

Notes to Table 10.3.2.2.B.:

[1] For *buildings* with multiple *major occupancies* only, where there is a change in *major occupancy*.

(10) The *performance level* of a *building* is reduced where the *building* after the change of *major occupancy* will not comply with Article 3.1.3.2. or 9.10.9.12.

(11) The *performance level* of a *building* or part of a *building* is reduced where, after a change of *major occupancy*,

(a) the total daily design *sanitary sewage* flow of the new *major occupancy*, calculated in accordance with Article 8.2.1.3., exceeds the capacity of any component of a *sewage system* serving the *building*, or

(b) the type or amount of *sanitary sewage* that will, under the new *major occupancy*, be discharged to a *sewage system* serving the *building* is prohibited by Article 8.1.3.1.

(12) The *performance level* of an existing *building* or part of an existing *building* is reduced where,

(a) the use of the *building* or part of the *building* is changed to a retirement home regulated under the *Retirement Homes Act, 2010*, and

(b) any of the following applies:

(i) the retirement home is not *sprinklered*,

(ii) Clause 3.2.6.8.(1)(b) or (c), as applicable, requires that a voice communication system conforming to Article 3.2.4.23. be provided in the *building* and such a system is not provided in the *building*, or

(iii) the retirement home contains one or more doors to *suites* or sleeping rooms not within *suites*, other than doors leading directly to the exterior, that are not equipped with self-closing devices.

Section 10.4. Compliance Alternatives

10.4.1. Compliance Alternatives

10.4.1.1. Substitution

(1) Except as provided in Sentence (3), a *compliance alternative* to a requirement contained in Part 3, 4, 6 or 8 that is shown in Tables 11.5.1.1.A., 11.5.1.1.B., 11.5.1.1.C., 11.5.1.1.D/E. or 11.5.1.1.F. may be substituted for the requirement where the *chief building official* is satisfied that compliance with the requirement is impracticable because,

(a) of structural or *construction* difficulties, or

(b) it is detrimental to the preservation of a *heritage building*.

(2) Except as provided in Sentence (3), a *compliance alternative* to a requirement contained in Part 9 or 12 shown in Tables 11.5.1.1.C., 11.5.1.1.D/E. or 11.5.1.1.F. may be substituted for the requirement without satisfying the *chief building official* that the requirement is impracticable.

(3) Where the *building* has been in existence for less than five years, *compliance alternatives* may only be used in respect of requirements of this Division that are referenced in Sentences 10.3.2.2.(3), (5) and Table 10.3.2.2.B.

O. Reg. 332/12, Division B, Part 10; O. Reg. 151/13, ss. 31, 32.

11.4.2. Reduction in Performance Level
11.4.3. Compensating Construction

Section 11.5. Compliance Alternatives
11.5.1. Compliance Alternatives

Section 11.1. General

11.1.1. Scope

11.1.1.1. Scope

(1) The scope of this Part shall be as described in Subsection 1.1.2. of Division A.

11.1.1.2. Definitions

(1) In this Part,

Building system means a combination of elements or components that form a complete major division of *construction* in the design of a *building* or part of a *building*, including a structural or framing system, a waterproofing system, a *drainage system*, an *exterior cladding* system, a roofing system, a window system, a *partition* system, a corridor system, a stair system, a fire alarm and detection system, a sprinkler system or a heating, ventilation or *air-conditioning* system, a *foundation* system, a standpipe and hose system, a flooring system, a *plumbing system*, a *sewage system* or an electrical system.

11.1.2. Application

11.1.2.1. Extension, Material Alteration or Repair

(1) Where an existing *building* is subject to extension, material alteration or repair,

(a) the proposed *construction* shall comply with Section 11.3., and

(b) the *performance level* of the *building* shall be evaluated and compensating *construction* shall be undertaken in accordance with Section 11.4.

Section 11.2. Classification of Existing Buildings

11.2.1. Classification

11.2.1.1. Construction Index and Hazard Index

(1) Where proposed *construction* will result in the change of *major occupancy* of all or part of an existing *building* to another *major occupancy*, the *building* shall be classified as to its,

(a) *construction* on the basis of its *construction index* as provided for in this Part, including Table 11.2.1.1.A., and

(b) *occupancy* on the basis of its *hazard index* as provided for in this Part, including Tables 11.2.1.1.B. to 11.2.1.1.N.

(2) Small or medium sized existing *buildings* as determined in Tables 11.2.1.1.B. to 11.2.1.1.N. facing multiple *streets* may be assigned a *hazard index* credit of 1, which may be subtracted from the *hazard index* of the proposed *major occupancy* to reduce the additional upgrading required by Table 11.4.3.4.A. provided,

(a) the *building* does not contain a Group B, Division 1, a Group C, or a Group F, Division 1 *occupancy*, and

(b) firefighting access complying with Articles 3.2.5.1. to 3.2.5.5. or Subsection 9.10.20. is provided.

(3) The requirements of Articles 3.2.2.20. to 3.2.2.83. do not apply to this Part.

11.2.1.2. Multiple Occupancies

(1) The classification of an existing *building* of multiple *occupancy* under Article 11.2.1.1. shall be applied according to Articles 3.2.2.5. to 3.2.2.8.

11.2.1.3. Prohibition of Occupancy Combinations

(1) Nothing in this Part relieves an applicant from complying with the requirements of Article 3.1.3.2. or 9.10.9.12.

Section 11.3. Proposed Construction

11.3.1. New and Existing Building Systems

11.3.1.1. Material Alteration or Repair of a Building System

(1) Where an existing *building system* is materially altered or repaired, the *performance level* of the *building* after the material alteration or repair shall be at least equal to the *performance level* of the *building* prior to the material alteration or repair.

11.3.1.2. New Building Systems and Extension of Existing Building Systems

(1) Except as provided in Article 11.3.3.1. and Section 11.5., the design and *construction* of a new *building system* or the extension of an existing *building system*, shall comply with all other Parts.

11.3.2. Extension of Buildings

11.3.2.1. Portion of Extended Buildings

(1) Where an existing *building* is extended,

(a) this Part applies to the existing portion of the *building*, and

(b) the extended portion of the *building* shall comply with all other Parts.

(2) REVOKED: O. Reg. 361/13, s. 97 (2).

11.3.3. Renovation

11.3.3.1. Basic Renovation

(1) Except as provided in Sentence (2) and Article 11.3.3.2., *construction* may be carried out to maintain the existing *performance level* of all or part of an existing *building*, by the reuse, relocation or extension of the same or similar materials or components, to retain the existing character, structural uniqueness, heritage value, or aesthetic appearance of all or part of the *building*, if the *construction* will not adversely affect the early warning and evacuation systems, *fire separations* or the structural adequacy or will not create an unhealthy environment in the *building*.

(2) *Construction* in respect of a *hotel*, a Group B, Division 3 *occupancy* or a retirement home regulated under the *Retirement Homes Act, 2010* that is a Group C *occupancy* may be carried out in accordance with Sentence (1) only if the *construction* will be in conformance with the Fire Code made under the *Fire Protection and Prevention Act, 1997*.

11.3.3.2. Extensive Renovation

(1) Where existing interior walls or ceilings or floor assemblies or roof assemblies are substantially removed in an existing *building* and new interior walls, ceilings, floor assemblies or roof assemblies are installed in the *building*, structural and fire-resistance elements shall be constructed in compliance with the requirements of the other Parts.

(2) Except as provided in Section 11.5., the proposed *construction* within an existing *suite* shall comply with the requirements of Section 3.8. where,

(a) the existing interior walls or floor assemblies within the *suite* are substantially removed in an existing *building*,

(b) new interior walls or floor assemblies are installed,

(c) the *suite* has an area greater than 300 m^2, and

(d) the *suite* is located on,

(i) a *floor area* where the existing difference in elevation between the adjacent ground level and the floor level is not more than 200 mm, or

(ii) a normally occupied *floor area* which is accessible by a passenger type elevator or other platform equipped passenger elevating device from an entrance *storey* where the existing difference in elevation between the adjacent ground level and the entrance *storey* level is not more than 200 mm.

(3) Except as provided in Sentence (4), where existing interior walls or ceilings or floor assemblies or roof assemblies are substantially removed on any *storey* in an existing *building* and new interior walls, ceilings, floor assemblies or roof assemblies are installed, the *storey* shall be *sprinklered* if,

(a) the *storey* will contain a Group C *major occupancy*, and

(b) the *building* is over 3 *storeys* in *building height*.

(4) Sentence (3) does not apply where the *building*,

(a) conforms to Subclause 3.2.2.44.(1)(a)(ii), and

(b) contains *dwelling units* having *means of egress* conforming to Sentence 3.3.4.4.(8).

(5) Where existing interior walls or ceilings or floor assemblies or roof assemblies are substantially removed and new interior walls, ceilings, floor assemblies or roof assemblies are installed in an existing *building* or part of an existing *building* that is a retirement home regulated under the *Retirement Homes Act, 2010*, the following requirements apply:

(a) the retirement home shall be *sprinklered*,

(b) a voice communication system conforming to Article 3.2.4.23. shall be provided in the *building*, if Clause 3.2.6.8.(1)(b) or (c), as applicable, requires that such a voice communication system be provided in the *building*, and

(c) doors to *suites* and sleeping rooms not within *suites* in the retirement home, other than doors leading directly to the exterior, shall be equipped with self-closing devices.

11.3.3.2. Extensive Renovation

(1) Where existing interior walls or ceilings or floor assemblies or roof assemblies are substantially removed in an existing *building* and new interior walls, ceilings, floor assemblies or roof assemblies are installed in the *building*, structural and fire-resistance elements shall be constructed in compliance with the requirements of the other Parts.

(2) Except as provided in Section 11.5., the proposed *construction* within an existing *suite* shall comply with the requirements of Section 3.8. where,

(a) new interior walls or floor assemblies are installed,

(b) the *suite* has an area greater than 300 m^2, and

(c) the *suite* is located in,

(i) a *floor area* where the existing difference in elevation between the adjacent ground level and the floor level is not more than 200 mm, or

(ii) a normally occupied *floor area* which is accessible by a passenger type elevator or other platform equipped passenger elevating device from an entrance *storey* where the existing difference in elevation between the adjacent ground level and the entrance *storey* level is not more than 200 mm.

(3) Except as provided in Section 11.5., the proposed *construction* within an existing *suite*, other than a *suite* described in Sentence (2) or a *suite* in a *building* described in Clause 3.8.1.1.(1)(a), (b), (c) or (d), shall comply with the requirements of Sentences 3.8.1.3.(6), 3.8.2.3.(6), 3.8.3.1.(6), 3.8.3.3.(19), 3.8.3.7.(1), 3.8.3.15.(5) and 3.8.3.16.(4) where new interior walls or floor assemblies are installed.

(4) Except as provided in Sentence (5), where existing interior walls or ceilings or floor assemblies or roof assemblies are substantially removed on any *storey* in an existing *building* and new interior walls, ceilings, floor assemblies or roof assemblies are installed, the *storey* shall be *sprinklered* if,

(a) the *storey* will contain a Group C *major occupancy*, and

(b) the *building* is over 3 *storeys* in *building height*.

(5) Sentence (4) does not apply where the *building*,

(a) conforms to Subclause 3.2.2.44.(1)(a)(ii), and

(b) contains *dwelling units* having *means of egress* conforming to Sentence 3.3.4.4.(8).

(6) Where existing interior walls or ceilings or floor assemblies or roof assemblies are substantially removed and new interior walls, ceilings, floor assemblies or roof assemblies are installed in an existing *building* or part of an existing *building* that is a retirement home regulated under the *Retirement Homes Act, 2010*, the following requirements apply:

(a) the retirement home shall be *sprinklered*,

(b) a voice communication system conforming to Article 3.2.4.23. shall be provided in the *building*, if Clause 3.2.6.8.(1)(b) or (c), as applicable, requires that such a voice communication system be provided in the *building*, and

(c) doors to *suites* and sleeping rooms not within *suites* in the retirement home, other than doors leading directly to the exterior, shall be equipped with self-closing devices.

11.3.4. Plumbing

11.3.4.1. Extension, Material Alteration or Repair

(1) Despite Subsections 11.3.1. to 11.3.3., when an existing *building* is extended or subject to material alteration or repair, Part 7 applies,

(a) to the design and *construction* of *plumbing* in the extensions and those parts of the *building* subject to material alteration and repair, and

(b) to *plumbing* which is adversely affected by the extension, alteration or repair.

11.3.5. Sewage Systems

11.3.5.1. Existing Septic Tanks

(1) Despite Subsections 11.3.1. to 11.3.3., where an existing *septic tank* is subject to material alteration, repair or replacement, the *construction* of the *septic tank* shall comply with Part 8.

11.3.5.2. Vertical Separations and Existing Sewage Systems

(1) Despite Subsections 11.3.1. to 11.3.3., where an existing *sewage system* is extended or is subject to material alteration or repair, the requirements respecting the vertical separation to the water table set out in Part 8 apply to the extended, altered or repaired portions of the *sewage system* as well as to the existing portions of the *sewage system*.

Section 11.4. Performance Level Evaluation and Compensating Construction

11.4.1. General

11.4.1.1. Performance Level

(1) The *performance level* of a *building* after *construction* shall not be less than the *performance level* of the *building* prior to *construction.*

(2) For the purposes of Sentence (1), reduction of *performance level* shall be determined in accordance with Subsection 11.4.2.

(3) Where the proposed *construction* would reduce the *performance level* of an existing *building*, compensating *construction* shall be required in conformance with Subsection 11.4.3.

11.4.2. Reduction in Performance Level

11.4.2.1. Structural

(1) The *performance level* of an existing *building* is reduced where after proposed *construction* in all or part of an existing *building*,

(a) the *major occupancy* will change to a different *major occupancy*,

(b) the *occupant load* will increase by more than 15%, or

(c) the *live load* will increase due to change in use within the same *major occupancy*,

and the existing structural floor and roof framing systems and their supporting members after the *construction* are not adequate to support the proposed *dead loads* and *live loads*.

11.4.2.2. Increase in Occupant Load

(1) Except as provided in Sentences 11.4.2.5.(2) and (3), the *performance level* of an existing *building* is reduced where proposed *construction* will increase the *occupant load* of an existing *building* by more than 15%.

(2) The *performance level* of an existing *building* is reduced where proposed *construction* will increase the *occupant load* by 15% or less and the new *occupant load* will be more than 15% above the *occupant load* for which a fire alarm system is required under Sentence 3.2.4.1.(2).

(3) The *performance level* of an existing *building* is reduced where proposed *construction* will increase the *occupant load* by 15% or less and the new *occupant load* will be more than 15% above the existing *exit* capacity as required under Article 3.4.3.2.

11.4.2.3. Change of Major Occupancy

(1) Except as provided in Sentence 11.4.2.5.(4), the *performance level* of an existing *building* is reduced where proposed *construction* will result in,

(a) the change of the *major occupancy* of all or part of an existing *building* to another *major occupancy* of a greater *hazard index*,

(b) the conversion of a *suite* of a Group C *major occupancy* into more than one *suite* of Group C *major occupancy*,

(c) the conversion of a *suite* or part of a *suite* of a Group A, Division 2 or a Group A, Division 4 *major occupancy* into a *gaming premises*,

(d) the change of a *farm building* or part of a *farm building* to a *major occupancy*,

(e) the change of a *building* or part of a *building* to a *post-disaster building*,

(f) the change of a *building* or part of a *building* to a retirement home regulated under the *Retirement Homes Act, 2010*, or

(g) the change in use of a *building* or part of a *building* where the previous *major occupancy* of the *building* or part of the *building* cannot be determined.

(2) For the purpose of this Article and Sentences 11.4.2.1.(1) and 11.4.2.5.(4), the change of use set out in Clauses (1)(b) to (g) is also deemed to constitute a change in *major occupancy*.

(3) The *performance level* of an existing *building* is reduced where the early warning and evacuation systems requirements of other Parts for the proposed *major occupancy* exceed those of the existing *building*.

(4) The *performance level* of an existing *building* is reduced where the proposed *major occupancy* in the *building* is not separated from the adjoining *major occupancies* by *fire separations* having *fire-resistance ratings* conforming to Tables 3.1.3.1. and 11.4.3.4.B.

(5) The *performance level* of an existing *building* is reduced where the *occupancy* of all or part of an existing *building* of *combustible construction* is changed to a new *major occupancy* that would require the *building*, if it were a new *building*, to be of *noncombustible construction* or to be constructed in accordance with Article 3.2.2.43A. or 3.2.2.50A.

(6) Despite Clause (1)(a), the *performance level* of an existing *building* is reduced where proposed *construction* will result in the change of the *major occupancy* of all or part of an existing *building* to a Group C *major occupancy* in a *building* over 3 *storeys* in *building height*, except in a *building* conforming to Subclause 3.2.2.44.(1)(a)(ii) and having an egress facility conforming to Sentence 3.3.4.4.(8).

11.4.2.4. Plumbing

(1) The *performance level* of an existing *building* is reduced where the existing *building* is extended or subject to material alteration or repair, and *plumbing* in the existing *building* is adversely affected by the extension, alteration or repair.

11.4.2.5. Sewage Systems

(1) The *performance level* of an existing *building* is reduced where the existing *building* is extended or subject to material alteration or repair and a *sewage system* serving the existing *building* is adversely affected by the extension, alteration or repair of the existing *building*.

(2) Except as provided in Sentence (3), the *performance level* of an existing *building* is reduced where proposed *construction* will increase the *occupant load* of an existing *building*, and the new *occupant load* will result in the total daily design *sanitary sewage* flow of the *building*, calculated in accordance with Article 8.2.1.3., exceeding the capacity of any component of a *sewage system* serving the *building*.

(3) The *performance level* of an existing *dwelling unit* is reduced where *proposed construction* that,

(a) increases the number of bedrooms in the *dwelling unit*,

(b) exceeds 15% of the finished area of the *dwelling unit*, or

(c) adds new *plumbing fixtures* to the *dwelling unit*,

will result in the total daily design *sanitary sewage* flow of the *dwelling unit*, calculated in accordance with Article 8.2.1.3., exceeding the capacity of any component of a *sewage system* serving the *dwelling unit*.

(4) The *performance level* of an existing *building* is reduced where proposed *construction* will result in the change of a *major occupancy* of all or part of the existing *building* to another *major occupancy* and,

(a) the total daily design *sanitary sewage* flow of the proposed *major occupancy*, calculated in accordance with Article 8.2.1.3., exceeds the capacity of any component of a *sewage system* serving the *building*, or

(b) the type or amount of *sanitary sewage* which will, under the proposed *major occupancy*, be discharged to a *sewage system* serving the *building*, is prohibited by Article 8.1.3.1.

11.4.2.6. Extension of Buildings of Combustible Construction

(1) The *performance level* of an existing *building* of *combustible construction* is reduced where the existing *building* is extended by adding a *storey* or *storeys* such that the extended *building* will be more than four *storeys* in *building height*.

11.4.3. Compensating Construction

11.4.3.1. General

(1) Where the *performance level* of an existing *building* is reduced under Subsection 11.4.2., compensating *construction* shall be carried out in accordance with this Subsection.

(2) Except as provided in Sentence (3), compensating *construction* required under this Subsection applies to the part of the *building* being altered and shall include,

(a) *fire separations*, with the required *fire-resistance ratings*, separating the part being altered from the *floor areas* immediately above and below and from the immediate adjacent areas, and

(b) *access to exits* and *exits* from the *building*, where the alteration adversely affects the *exit* system of the *building*.

(3) Compensating *construction* required under this Subsection applies to the existing *building systems* that are adversely affected by the proposed *construction*.

11.4.3.2. Structural

(1) Where the *performance level* of an existing *building* is reduced under Sentence 11.4.2.1.(1),

(a) remedial measures shall be taken to support the proposed loads, or

(b) the portion of the floor affected by the proposed loads shall be restricted to the loading it will support and signs stating the restrictions shall be posted.

11.4.3.3. Increase in Occupant Load

(1) Where the *performance level* of an existing *building* is reduced under Sentence 11.4.2.2.(1), (2) or (3), the *building* shall be evaluated, and the early warning and evacuation systems shall be upgraded, in conformance with the applicable requirements of Table 11.4.3.3.

(2) Sentence (1) does not apply in a Group C *occupancy* where the new total *occupant load* is,

(a) 14 persons or fewer in a *boarding, lodging or rooming house*, except that where the *occupant load* is between 10 and 15 persons, an interconnected system of *smoke alarms* in corridors near stairways is required, or

(b) 16 persons or fewer in a *building* containing residential *suites* which are *dwelling units*, except that where the *occupant load* is between 10 and 17 persons, an interconnected system of *smoke alarms* in corridors near stairways is required.

(3) Where the *performance level* of an existing *building* is reduced under Sentence 11.4.2.2.(1), additional *construction* shall be required in order that the *building* or part of the *building* subject to the increase in *occupant load* conforms to the requirements of Sentence 6.2.2.1.(2), Subsection 3.7.4. and Article 9.31.1.1.

11.4.3.4. Change in Major Occupancy

(1) Where the *performance level* of an existing *building* is reduced under Clause 11.4.2.3.(1)(a), (b), (c), (d), (e) or (g), additional upgrading shall be required in conformance with Table 11.4.3.4.A. and so that the *construction index* of the *building* is increased to at least equal the *hazard index* of the new *major occupancy* that the *building* is to support.

(2) A *building* or part of the *building* subject to a change of *major occupancy* shall conform to the requirements of Subsection 3.2.6., Sections 3.7., 3.11., 3.12., Sentences 6.2.2.1.(2), 6.2.3.9.(1) and 6.2.4.7.(10), Subsections 9.5.1. and 9.5.3. to 9.5.10., Section 9.7., Subsection 9.10.17., Sections 9.31. and 9.32., and Subsections 9.34.1. to 9.34.3. as they apply to the new *major occupancy* that the *building* or part of the *building* is to support.

(3) Where the *performance level* of an existing *building* is reduced under Sentence 11.4.2.3.(3), the *building* shall be evaluated, and the early warning and evacuation systems shall be upgraded, in conformance with the applicable requirements of Table 11.4.3.3.

(4) Where the *performance level* of an existing *building* is reduced under Sentence 11.4.2.3.(4), upgrading of the *fire separations* shall be required in conformance with the applicable requirements of Article 3.1.3.1. and Table 11.4.3.4.B.

(5) Where the *performance level* is reduced under Sentence 11.4.2.3.(5), the requirement for the *building* to be of *noncombustible construction* or to be constructed in accordance with Article 3.2.2.43A. or 3.2.2.50A. is satisfied if the *building* is *sprinklered*.

(6) Where the *performance level* is reduced under Sentence 11.4.2.3.(6), the *storey* subject to the change shall be *sprinklered*.

(7) Where the *performance level* of an existing *building* is reduced under Clause 11.4.2.3.(1)(f), the following requirements apply:

(a) the retirement home shall be *sprinklered*,

(b) a voice communication system conforming to Article 3.2.4.23. shall be provided in the *building*, if Clause 3.2.6.8.(1)(b) or (c), as applicable, requires that such a voice communication system be provided in the *building*, and

(c) doors to *suites* and sleeping rooms not within *suites* in the retirement home, other than doors leading directly to the exterior, shall be equipped with self-closing devices.

11.4.3.5. Plumbing

(1) Where the *performance level* of an existing *building* is reduced under Sentence 11.4.2.4.(1), upgrading of *plumbing* in the existing *building* which is adversely affected by the extension, alteration or repair shall be required in conformance with Part 7.

11.4.3.6. Sewage Systems

(1) Where the *performance level* of an existing *building* is reduced under Article 11.4.2.5., upgrading of a *sewage system* which is adversely affected by the *construction*, increase in *occupant load*, increase in the total daily design *sanitary sewage* flow or change in amount or type of *sanitary sewage* shall be required in conformance with Part 8.

11.4.3.7. Extension of Buildings of Combustible Construction

(1) Where the *performance level* of an existing *building* is reduced under Article 11.4.2.6., the *building* shall be *sprinklered*.

Section 11.5. Compliance Alternatives

11.5.1. Compliance Alternatives

11.5.1.1. Compliance Alternatives

(1) A *compliance alternative* shown in Table 11.5.1.1.A., 11.5.1.1.B., 11.5.1.1.C., 11.5.1.1.D/E. or 11.5.1.1.F. may be substituted for a requirement contained in Part 3, 4, 6 or 8 where the *chief building official* is satisfied that compliance with the requirement is impracticable because,

(a) of structural or *construction* difficulties, or

(b) it is detrimental to the preservation of a *heritage building*.

(2) A *compliance alternative* shown in Table 11.5.1.1.A., 11.5.1.1.B., 11.5.1.1.C., 11.5.1.1.D/E. or 11.5.1.1.F. may be substituted for a requirement contained in Part 9 or 12 without satisfying the *chief building official* that compliance with the requirement is impracticable.

Table 11.2.1.1.A.
Construction Index

Forming Part of Sentence 11.2.1.1.(1)

Item	Column 1	Column 2	Column 3	Column 4	Column 5
	Fire-Resistance Rating			Type of *Construction*	*C.I.*[2]

	Floors over *Basement*	Other Floors	Roof		
1.	3 h	3 h	1.5 h	*Noncombustible*	8[1]
2.	2 h	2 h	1 h	*Noncombustible*	7
3.	1 h	1 h	45 min	*Noncombustible*	6
4.	45 min	45 min	0 h	*Noncombustible*	5
5.	45 min	45 min	45 min	*Heavy Timber*	5
6.	45 min	45 min	45 min	*Combustible*	5
7.	45 min	0 h	0 h	*Noncombustible*	4
8.	45 min	45 min	0 h	*Combustible*	4
9.	30 min	0 h	0 h	*Noncombustible*	3
10.	30 min	30 min	0 h	*Combustible*	3
11.	0 h	30 min	0 h	*Combustible*	2
12.	0 h	0 h	0 h	*Combustible*	1[1]

Notes to Table 11.2.1.1.A.:

(1) *C.I.* of 1 is lowest fire protection *performance level* and *C.I.* of 8 is highest.

(2) Take highest rating for *C.I.* from Table 11.2.1.1.A. for existing *building*.

Table 11.2.1.1.B. (1)(4)
Hazard Index

Forming Part of Sentences 11.2.1.1.(1) and (2)

Item	Column 1	Column 2	Column 3	Column 4
	Group A	*Occupancy H.I.*(5)		
	Division 1	Small	Medium	Large
1.	Dinner Theatres	4	5	6
2.	Live Theatres	4	5	6
3.	Motion Picture Theatres	4	5	6
4.	Opera Houses	4	5	6
5.	Television Studios (With Audience)	4	5	6

Notes to Table 11.2.1.1.B.:

(1)

Building Size (Maximum) (2)(3)	
- 300 *occupant load* maximum / 1 *storey*	Small
- 600 m^2 / 600 *occupant load* maximum / 1 *storey* with less than 40% 2 *storey* (6)	Medium
- Any area / not exceeding 18 m high, measured between *grade* and the floor level of the top *storey*	Large
- Over 18 m high, measured between *grade* and the floor level of the top *storey*	*H.I.* = 7

(2) Sizes are based on *building area* and *building height*, unless noted.

(3) *Building* size is based on the existing *building* facing one *street*.

(4) For existing *buildings* facing multiple *streets*, see Sentence 11.2.1.1.(2) and Table 11.4.3.4.A.

(5) Take lowest rating for *H.I.* from Table for *major occupancy* change.

(6) *Building* may have less than 40% of its area as 2 *storeys* for purposes as described in Clauses 3.2.2.21.(1)(b) and (c).

Table 11.2.1.1.C. (1)(4)(6)
Hazard Index

Forming Part of Sentences 11.2.1.1.(1) and (2)

Item	Column 1	Column 2	Column 3	Column 4
	Group A Division 2	*Occupancy H.I.*(5)		
		Small	Medium	Large

27.	Undertaking Premises	3	4	6

Notes to Table 11.2.1.1.C.:

(1)

Building Size (Maximum) (2)(3)	
- 400 m^2 / 1 *storey*	Small
- 250 m^2 / 3 *storey* (*Public Heritage Building*)	Small

- 800 m^2 / 2 *storey*	Medium
- Any area / not exceeding 18 m high, measured between *grade* and the floor level of the top *storey*	Large
- Over 18 m high, measured between *grade* and the floor level of the top *storey*	*H.I.* = 7

(2) Sizes are based on *building area* and *building height*, unless noted.

(3) *Building* size is based on the existing *building* facing one *street*.

(4) For existing *buildings* facing multiple *streets*, see Sentence 11.2.1.1.(2) and Table 11.4.3.4.A.

(5) Take lowest rating for *H.I.* from Table for *major occupancy* change.

(6) *Buildings* which exceed 3 *storeys* in *building height* and are of *combustible construction* shall be *sprinklered*.

Table 11.2.1.1.D. (1)(4)
Hazard Index

- 600 m^2 / 3 *storey* (*Public Heritage Building*)	Medium
- Any area / 6 *storey* not exceeding 18 m high, measured between *grade* and the floor level of the top *storey*	Large
- Over 18 m, but not exceeding 36 m high, measured between *grade* and the floor level of the top *storey*	*H.I.* = 5
- Over 36 m high, measured between *grade* and the floor level of the top *storey*	*H.I.* = 6

(2) Sizes are based on *building area* and *building height*, unless noted.

(3) *Building* size is based on the existing *building* facing one *street*.

(4) For existing *buildings* facing multiple *streets*, see Sentence 11.2.1.1.(2) and Table 11.4.3.4.A.

(5) When the size of a *building* falls into more than one category, the *H.I.* for the least restrictive is permitted to be used.

2.	Factories (Low Fire Load)	2	3	4
3.	Freight Depots (Low Fire Load)	2	3	4
4.	Laboratories (Low Fire Load)	2	3	4
5.	Manufacturers Sales (Low Fire Load)	2	3	4
6.	Power Plants	3	4	5
7.	*Public Heritage Buildings*	3	3	
8.	Sample Display Rooms (Low Fire Load)	2	3	4
9.	Storage Garages	2	3	4
10.	Storage Rooms (Low Fire Load)	2	3	4
11.	Warehouses (Low Fire Load)	2	3	4
12.	Wholesale Rooms (Low Fire Load)	2	3	4
13.	Workshops (Low Fire Load)	2	3	4

Notes to Table 11.2.1.1.N.:

(1)

Building Size (Maximum) (2)(3)	
- 800 m^2 / 2 *storey*	Small
- 1200 m^2 / 4 *storey*	Medium
- 600 m^2 / 3 *storey* (*Public Heritage Building*)	Medium
- Any area / 6 *storey* not exceeding 18 m in *building height*	Large
- Over 18 m, but not exceeding 36 m in *building height*	*H.I.* = 5
- Over 36 m in *building height*	*H.I.* = 6

(2) Sizes are based on *building area* and *building height*.

(3) *Building* size is based on the existing *building* facing one *street*.

(4) For existing *buildings* facing multiple *streets*, see Sentence 11.2.1.1.(2) and Table 11.4.3.4.A.

(5) When the size of a *building* falls into more than one category, the *H.I.* for the least restrictive is permitted to be used.

Table 11.4.3.3.
For Evaluation and Upgrading of Early Warning/Evacuation

Forming Part of Sentences 11.4.3.3.(1) and 11.4.3.4.(3)

Col. 1	Column 2	Column 3
Notes	Early Warning and Evacuation, Evaluation and Upgrading	Part 11 *Compliance Alternative* (1)
(2)	Early warning and evacuation to be checked against (a) *access to exit* widths based on *occupant load* in Subsection 3.3.1. or 9.9.3.; (b) *exit* widths based on *occupant load* in Subsection 3.4.3. or 9.9.3.; (c) *exit* signs in Subsection 3.4.5. or 9.9.11.; (d) lighting of *exits*, lighting of *access to exits* and emergency lighting in Subsection 3.2.7. or 9.9.12.; (e) fire alarm system in Subsection 3.2.4. or 9.10.18.; (f) *smoke alarms* in Subsection 9.10.19.;	EARLY WARNING (a) *Compliance alternatives* as listed may be used. EVACUATION (b) *Compliance alternatives* as listed to

	(g) travel distance and number of *exits* in other Parts; and (h) door release hardware requirements in Articles 3.3.1.12. and 3.4.6.16., and deficiencies shall be upgraded.	*access to exit* and *exit* widths, number of *exits*, door release hardware, and travel distance may be used.
(3)	Early warning and evacuation to be checked against (a) *access to exit* widths based on *occupant load* in Subsection 3.3.1. or 9.9.3.; (b) *exit* widths based on *occupant load* in Subsection 3.4.3. or 9.9.3.; (c) *exit* signs in Subsection 3.4.5. or 9.9.11.; (d) lighting of *exits*, lighting of *access to exits* and emergency lighting in Subsection 3.2.7. or 9.9.12.; (e) fire alarm system in Subsection 3.2.4. or 9.10.18.; (f) *smoke alarms* in Subsection 9.10.19.; (g) travel distance and number of *exits* in other Parts; (h) smoke control measures, and at least one elevator to permit transport of firefighters to all floors in *hotels* whose floor level is more than 18 m high measured between *grade* and floor level of the top *storey* as per Subsection 3.2.6., and (i) door release hardware requirements in Articles 3.3.1.12. and 3.4.6.16., and deficiencies shall be upgraded.	EARLY WARNING (a) *Compliance alternatives* as listed may be used. EVACUATION (b) *Compliance alternatives* as listed to *access to exit* and *exit* widths, number of *exits*, door release hardware, and travel distance may be used.

Notes to Table 11.4.3.3.:

(1) See Tables 11.5.1.1.A. to 11.5.1.1.F. for *compliance alternatives* that may be used.

(2) Applies to change of *major occupancy* to one of equal or lesser hazard, and to increase in *occupant load* by 15% or less.

(3) Applies to change of *major occupancy* to one of greater hazard, and to increase in *occupant load* greater than 15%.

Table 11.4.3.4.A.
Additional Upgrading

Forming Part of Sentences 11.2.1.1.(2) and 11.4.3.4.(1)

Item	Column 1	Column 2	Column 3	Column 4	Column 5
	New *Major Occupancy* (*H.I.*) Number (3)	Increase of *C.I.* to Equal *H.I.* to Support New *Major Occupancy*	Additional Required Upgrading	Part 11 Alternative Compliance (A.C.)	Comments (1),(2)

1.	*H.I.*2	*C.I.* 1 to 2	Comply with Table 11.2.1.1.A. ratings for *C.I.* of 2	(a) Provide early warning system, or (b) Comply with any A.C.'s in Col. 4.	
2.	*H.I.*3	*C.I.* (1 or 2) to 3	Comply with Table 11.2.1.1.A. ratings for *C.I.* of 3	(a) Provide early warning system, or (b) Comply with any A.C.'s in Col. 4.	*Combustible* to *Combustible* only.
3.	*H.I.*4	*C.I.* (1, 2 or 3) to 4	Comply with Table 11.2.1.1.A. ratings for *C.I.* of 4	Provide sprinklers in locations where assemblies do not comply with Table 11.2.1.1.A.	*Combustible* to *Combustible. Noncombustible* to *Noncombustible.*
4.	*H.I.*5	*C.I.* 4 to 5	Comply with Table 11.2.1.1.A. ratings for *C.I.* of 5	Provide sprinklers in locations where assemblies do not comply with Table 11.2.1.1.A.	
5.	*H.I.*5	*C.I.* (1, 2 or 3) to 5	Comply with Table 11.2.1.1.A. ratings for *C.I.* of 5	Provide sprinklers in locations where assemblies do not comply with Table 11.2.1.1.A.	*Combustible* to *Combustible. Noncombustible* to *Noncombustible.*
6.	*H.I.*6	*C.I.* 5 (*Noncombustible*) to 6	Comply with Table 11.2.1.1.A. ratings for *C.I.* of 6	(a) Provide sprinkler system, plus 45 min roof rating.	
7.	*H.I.*6	*C.I.* 5 (*Heavy timber*) to 6	Comply with A.C.	(b) Provide sprinkler system.	
8.	*H.I.*6	*C.I.* 5 (*Combustible*) to 6	Comply with A.C.	(c) Provide 1 h rating plus sprinkler system.	
9.	*H.I.*6	*C.I.* (3 or 4) to 6*	Comply with Table 11.2.1.1.A. ratings for *C.I.* of 6	(d) Provide sprinkler system, plus 45 min rating.	* For *Noncombustible construction* only.

10.	*H.I.*6	*C.I.* (1, 2, 3 or 4) to 6**	Comply with A.C.	(e) Provide 1 h rating plus sprinkler system.	** For *Combustible construction* only.
11.	*H.I.*7	*C.I.* 6 to 7	Comply with Table 11.2.1.1.A. ratings for *C.I.* of 7	(a) Provide sprinkler system.	
12.	*H.I.*7	*C.I.* (3, 4 or 5) to 7*	Comply with Table 11.2.1.1.A. ratings for *C.I.* of 7	(b) Provide 1 h rating plus sprinkler system.	* For *Noncombustible construction* only.
13.	*H.I.*8	*C.I.* 7 to 8	Comply with Table 11.2.1.1.A. ratings for *C.I.* of 8	(a) Provide sprinkler system.	
14.	*H.I.*8	*C.I.* 6 to 8	Comply with Table 11.2.1.1.A. ratings for *C.I.* of 8	(b) Provide supervised sprinkler system.	
15.	*H.I.*8	*C.I.* (3, 4 or 5) to 8*	Comply with Table 11.2.1.1.A. ratings for *C.I.* of 8	(d) Provide sprinkler system, plus 1 h rating.	* For *Noncombustible construction* only.

Notes to Table 11.4.3.4.A.:

(1) One asterisk (*) refers to *noncombustible construction*.

(2) Two asterisks (**) refers to *combustible construction*.

(3) Group B, *occupancy* with any *H.I.* shall be *sprinklered*.

Table 11.4.3.4.B.(1)
Additional Upgrading for Multiple Major Occupancies

Forming Part of Sentences 11.4.2.3.(4) and 11.4.3.4.(4)

Column 1	Column 2	Column 3	Column 4
New *Major Occupancy*	Code Requirements	Part 11 *Compliance Alternative*	
All(2)	Table 3.1.3.1. and Subsection 9.10.9.	For Existing *Building* Reduce to	If *Sprinklered* Reduce to
	Where:		
	1 h rating required	45 min	30 min

	2 h rating required	1.5 h	1 h
	3 h rating required	2 h	1.5 h

Notes to Table 11.4.3.4.B.:

(1) For *buildings* with multiple *major occupancies* only, where there is a change in *major occupancy*.

(2) See Section 11.4.

Table 11.5.1.1.A.
Compliance Alternatives for Assembly Occupancies

Forming Part of Article 11.5.1.1.

Item	Col. 1	Column 2	Column 3
	NUMBER	**PART 3 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
1.	A1	3.1.4.7.	Existing *heavy timber construction* acceptable where *construction* is within 90% of member sizes listed in Part 3.
2.	A2	3.1.5.2. to 3.1.5.4.; 3.1.5.6.	Existing acceptable.
3.	A3	3.1.5.7. to 3.1.5.10.	Except for exposed foamed plastics, existing acceptable. To match existing, materials may be added from on or off site.
4.	A4	3.1.5.15. to 3.1.5.17.; 3.1.5.21.; 3.1.5.23.	Existing acceptable.
5.	A5	3.1.7.1.	*Fire-resistance ratings* may also be used where they are based on: 1. HUD Rehabilitation Guidelines, “Guideline on Fire Ratings of Archaic Materials and Assemblies”. 2. DBR Technical Paper No. 194, “Fire Endurance of Protected Steel Columns and Beams”. 3. DBR Technical Paper No. 207, “Fire Endurance of Unit Masonry Walls”. 4. DBR Techncial Paper No. 222, “Fire Endurance of Light-Framed and Miscellaneous Assemblies”.
6.	A6	3.1.7.5.(3)	Existing assemblies required to be of *noncombustible construction* may be supported by *combustible construction* having at least the same *fire-resistance rating* as that supported.
7.	A7	3.1.8.5.(2)	(a) Existing functional and sound doors in existing *buildings* that are either hollow metal or kalamein and containing wired glass at least 6 mm thick and conforming to Sentence 3.1.8.14.(2) are permitted in lieu of doors not required to exceed 45 min,

			(b) all existing functional and sound hollow metal or kalamein doors which carry existing 1.5 h labels are acceptable in lieu of current 1.5 h labels and may contain wired glass panels not exceeding 0.0645 m², at least 6 mm thick and conforming to Sentence 3.1.8.14.(2), and (c) every fire door, window assembly or glass block used as a *closure* in a required *fire separation* shall be installed in conformance with good engineering practice.
8.	A8	3.1.8.7. to 3.1.8.9.	*Fire dampers* or *fire stop flaps* are not required to be installed in existing ducts at penetrations of existing *fire separations*.
9.	A9	3.1.8.10.(1)	Existing 45 mm solid core wood doors acceptable.
10.	A10	3.1.8.11.(1)	Existing functionally operable self-closing devices acceptable.
11.	A11	3.1.8.13.	Existing functionally operable latching devices, excluding draw bolts, are acceptable.
12.	A12	3.1.8.14.	Existing transoms or sidelights located in required *fire separations* may be retained if wired glass at least 6 mm thick is securely fixed to a steel frame with steel stops. Operable transoms shall be fixed closed.
13.	A13	3.1.8.15. to 3.1.8.17.	Existing acceptable.
14.	A14	3.1.11.	Where the concealed space is being materially altered, smoke or heat detection in that space in lieu of *fire blocks* and tied into fire alarm system is acceptable.
15.	A15	3.1.13.10.	Existing acceptable.
16.	A16	3.2.2.17.(1)(b) and (c)	Existing sprinkler systems need not comply.
17.	A17	3.2.3.	Existing windows. (a) Existing windows in walls may be relocated to another part of the wall, provided the existing opening is blocked up to provide the same fire rating for the wall, and the projection of the new opening, at a right angle to the property line onto another *building*, lies not closer than 300 mm from a window in such other *building*, where the “opposite” window is less than 2 400 mm from the opposite new opening, and (b) except relocation of units, shall be restricted to the same *fire compartment* and shall conform to the requirements of Article 3.2.3.14. or 9.10.12.3. where applicable, or (c) where a *building* does not satisfy the requirements of Subsection 3.2.3. for the amount of openings facing a yard or space that does not have sufficient *limiting distance*, such existing openings are allowed to be relocated provided:

			(i) such openings are not increased in size and they are protected with wired glass in steel frames conforming to Sentence 3.1.8.14.(2), or (ii) the *building* is *sprinklered.*
18.	A18	3.2.3.6.(3)	Existing roof soffit projections acceptable.
19.	A19	3.2.4.	(a) Existing fire alarm system may remain except that Article 3.2.4.5. does not apply where the fire safety plan (as described in the Fire Code made under the *Fire Protection and Prevention Act, 1997*) for the *building* addresses the intent of Subsection 3.2.4. (i.e. "stage" system, electrical supervision, detection as required, Fire Department connection and emergency power supply), and (b) extension of an existing system must ensure continuity and compatibility, and integrity of the system.
20.	A20	3.2.4.9.(2)(e)	Does not apply to existing installations in *buildings*.
21.	A21	3.2.4.10.(5)(c)	Does not apply to existing installations in *buildings*.
22.	A22	3.2.5.3.(1) and (2)	Existing acceptable.
23.	A23	3.2.5.4. to 3.2.5.6.	Existing acceptable provided the *building* is *sprinklered*.
24.	A24	3.2.5.7.	Does not apply, except where a change in *major occupancy* occurs from a lesser *hazard index*.
25.	A25	3.2.5.13.	Existing sprinkler systems in existing *buildings* that do not conform to NFPA 13 may be altered, added to, or extended from the existing system without complying with NFPA 13, provided the system is operational and adequate with respect to coverage, water supply and controls, and provided the system is evaluated by a qualified designer.
26.	A26	3.2.9.	(a) Does not apply to *buildings* 6 *storeys* and less. (b) Does not apply to *sprinklered buildings*.
27.	A27	3.3.1.5.	One egress door is allowed where the *occupant load* is not greater than 100 persons, provided *floor area* is *sprinklered* and travel distance does not exceed 25 m.
28.	A28	3.3.1.9.	Existing width of *public corridors* of not less than 914 mm is acceptable.
29.	A29	3.3.1.9.(8)	An existing dead end corridor is permitted where the *occupant load* is not greater than 20 persons, provided travel distance is not greater than 6 m plus corridor width to "*exit* choice" point.
30.	A30	3.3.1.10.; 3.3.1.11.	Existing door swings may remain in *heritage buildings*, existing or being restored, with no change in *major occupancy* and with *occupant load* no greater than 100.
31.	A31	3.3.1.12.	Existing doors may remain in a *heritage building*, existing or being restored, with no change in *major occupancy*.

32.	A32	3.3.1.18.	Existing stained, etched, bevelled, leaded or figured glass acceptable.
33.	A33	3.3.5.4.(1); 3.3.5.7.(1) to (3)	Need not comply where a gasketed door and self closer are provided in the existing *fire separation*.
34.	A34	3.4.1.5.(1)	Existing acceptable.
35.	A35	3.4.1.5.(2)	Existing acceptable provided the existing *guard* is not less than 914 mm.
36.	A36	3.4.1.8.	Existing stained, etched, bevelled, leaded or figured glass acceptable.
37.	A37	3.4.2.5.(1)	Existing travel distance acceptable where *floor area* is *sprinklered* and where there is no change in *major occupancy*.
38.	A38	3.4.3.2.(5)	Need not comply where there is no increase in *occupant load*.
39.	A39	3.4.3.2.(7)	Existing width of *exits* acceptable provided the *occupant load* is not more than 15% above the *exit* capacity.
40.	A40	3.4.3.4.	Existing acceptable.
41.	A41	3.4.3.5.	Existing headroom clearance of not less than 1 980 mm is acceptable.
42.	A42	3.4.4.4.(8)	Existing washrooms opening directly into an *exit* stairwell shall be separated from the *exit* stairwell by a 45 min *closure*.
43.	A43	3.4.5.1.(2) and (9)	Existing illuminated legible *exit* signs are acceptable.
44.	A44	3.4.6.2.	Existing acceptable, if visually apparent.
45.	A45	3.4.6.3.	Existing acceptable.
46.	A46	3.4.6.4.	Existing acceptable.
47.	A47	3.4.6.5.(2) to (11)	Existing acceptable.
48.	A48	3.4.6.6.(2), (4) and (5)	Existing acceptable.
49.	A49	3.4.6.7.(1)	Existing acceptable.
50.	A50	3.4.6.8.	Existing acceptable.
51.	A51	3.4.6.9.	Existing acceptable.
52.	A52	3.4.6.11.(1), (2) and (4)	Existing acceptable.
53.	A53	3.4.6.12.	Existing acceptable in *public heritage buildings* or a change in *occupancy* with no increase in *occupant load*.
54.	A54	3.4.6.16.(2) and (3)	Existing functionally operable panic hardware acceptable.
55.	A55	3.4.7.2.	*Combustible* fire escapes which are protected from fire in accordance with Sentence 3.2.3.14.(2) are permitted or may be reconstructed or recreated (as in the case of a *heritage building*).
56.	A56	3.5.1.	Existing acceptable.
57.	A57	3.6.2.1.(7)	Existing *fire separation* of not less than 30 min is acceptable.
58.	A58	3.6.2.2.	Existing acceptable where explosion-resistant *construction* or venting is provided.
59.	A59	3.6.2.6.	Existing acceptable.

60.	A60	3.6.2.7.(1)	2 h *fire separation* acceptable.
61.	A61	3.6.3.1.(1) to (5)	45 min *fire separation* acceptable.
62.	A62	3.6.3.3.(1) to (5) and (8)	Existing acceptable.
63.	A63	3.6.3.3.(9)	1 h acceptable if *sprinklered*.
64.	A64	3.6.3.3.(10)	Existing acceptable.
65.	A65	3.6.3.4.	Existing acceptable.
66.	A66	3.6.4.	Existing acceptable.
67.	A67	3.7.1.3.(3)	2.1 m is acceptable.
68.	A68	3.7.2.1.(3)	The minimum glass areas may be reduced by 50%.
69.	A69	3.7.4.	Where the *occupant load* is increased by more than 15% above the capacity of the existing facilities, facilities to be added to accommodate the increase.
76.	A76	3.8.3.13.(1)(f)	Existing grab bar is acceptable.
	NUMBER	**PART 4 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
77.	A77	4.1.8.	The requirements under this Subsection do not apply.
	NUMBER	**PART 6 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
78.	A78	6.2.2.1.(2)	Required outdoor air rates may be provided by mechanical, natural or combination of natural and mechanical means.
	NUMBER	**PART 8 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
79.	A79	8.2.1.4.	Existing clearances acceptable where a *sewage system* is replaced with another *sewage system* within the same class and the capacity of the replacement *sewage system* does not exceed the capacity of the existing *sewage system*.
80.	A80	8.2.1.4.	Existing clearances are acceptable where a replacement *sewage system* requires lesser clearances than those required in Part 8 for the existing *sewage system.*

70.	A70	3.8.1.2.	Existing accessible entrance acceptable. (See *C.A.* A74) Existing curb ramp conforming to Sentence 3.8.3.2.(3) is acceptable. Existing principal entrance acceptable, provided at least one *barrier-free* entrance is available.
71.	A71	3.8.1.3.(1)	Existing unobstructed width of 920 mm minimum is acceptable.
72.	A72	3.8.1.3.(4)	Existing unobstructed space not less than 1 500 mm in width and 1 500 mm in length located not more than 30 m apart is acceptable.
72.1	A72.1	3.8.3.2.(3)(b)	Existing curb ramp acceptable, provided width not less than 1 200 mm.
73.	A73	3.8.3.3.(1)	Existing doorway acceptable, provided not less than 810 mm wide.
73.1	A73.1	3.8.3.3.(11)(a)	Existing distance acceptable, provided not less than 1 200 mm plus the width of any door that swings into the space in the path of travel.
74.	A74	3.8.3.4.(1)(a)	Existing ramp acceptable, provided not less than 870 mm between handrails.
75.	A75	3.8.3.8.(5)	Existing grab bar is acceptable.
75.1	A75.1	3.8.3.12.	Existing universal washroom acceptable.
76.	A76	3.8.3.13.(2)(f)	Existing grab bar is acceptable.
76.1	A76.1	3.8.3.16.	Existing drinking fountain conforming to Clauses 3.8.3.16.(2)(a) and (b) acceptable.
76.2	A76.2	3.11.3.1.(9)	Existing clear width acceptable, provided not less than 900 mm.
76.3	A76.3	3.11.3.1.(14)	Existing painted line acceptable.

Table 11.5.1.1.B.
Compliance Alternatives for Care, Care and Treatment or Detention Occupancies

Forming Part of Article 11.5.1.1.

Item	Col. 1	Column 2	Column 3
	NUMBER	**PART 3 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
1.	B1	3.1.5.2. to 3.1.5.4.; 3.1.5.6.	Existing acceptable.
2.	B2	3.1.5.7. to 3.1.5.10.	Except for exposed foamed plastics, existing acceptable.
3.	B3	3.1.5.15. to 3.1.5.17.; 3.1.5.21.; 3.1.5.23.	Existing acceptable.
4.	B4	3.1.7.1.	*Fire-resistance ratings* may also be used where they are based on: 1. HUD Rehabilitation Guidelines, “Guideline on Fire Ratings of Archaic Materials and Assemblies”.

			2. DBR Technical Paper No. 194, “Fire Endurance of Protected Steel Columns and Beams”. 3. DBR Technical Paper No. 207, “Fire Endurance of Unit Masonry Walls”. 4. DBR Technical Paper No. 222, “Fire Endurance of Light-Framed and Miscellaneous Assemblies”.
5.	B5	3.1.7.5.(3)	Existing assemblies required to be of *noncombustible construction* may be supported by *combustible construction* having at least the same *fire-resistance rating* as that supported.
6.	B6	3.1.8.5.(2)	(a) Existing functional and sound doors in existing *buildings* that are either hollow metal or kalamein and containing wired glass at least 6 mm thick and conforming to Sentence 3.1.8.14.(2) are permitted in lieu of doors not required to exceed 45 min, (b) all existing functional and sound hollow metal or kalamein doors which carry existing 1.5 h labels are acceptable in lieu of current 1.5 h labels and may contain wired glass panels not exceeding 0.0645 m², at least 6 mm thick and conforming to Sentence 3.1.8.14.(2), and (c) every fire door, window assembly or glass block used as a *closure* in a required *fire separation* shall be installed in conformance with good engineering practice.
7.	B7	3.1.8.7. to 3.1.8.9.	*Fire dampers* or *fire stop flaps* are not required to be installed in existing ducts at penetrations of existing *fire separations*.
8.	B8	3.1.8.10.(1)	For existing unlabelled doors in existing *buildings*, at least 45 mm solid core wood or metal clad are acceptable.
9.	B9	3.1.8.11.(1)	Existing functionally operable self-closing devices acceptable, including devices with “pause” hardware.
10.	B10	3.1.8.12.(1) and (2)	Between patient or inmate rooms, and corridors, existing “pause” type self-closing devices may be used as hold-open devices where functionally operable.
11.	B11	3.1.8.13.	Existing functionally operable latching devices, excluding draw bolts, are acceptable.
12.	B12	3.1.8.14.(1) and (2)	Except in zone or *exit fire separations* not required to be greater than 1 h, existing wired glass installations are acceptable provided they are set in steel or metal clad frames.
13.	B13	3.1.8.14.(3)	Existing glass block acceptable.
14.	B14	3.1.8.15. to 3.1.8.17.	Existing acceptable.

15.	B15	3.1.9.5.(1) and (2)	Existing openings in existing ceiling membranes to remain. Existing openings may be moved to another location in the same ceiling provided the aggregate area of openings does not increase and are not cumulative, and the existing opening is blocked up to provide the same rating as the ceiling assembly.
16.	B16	3.1.11.	Where the concealed space is being materially altered, provide smoke or heat detection in that space in lieu of *fire blocks* and tie into fire alarm system.
17.	B17	3.1.14.; 3.1.15.	Existing roof assemblies and roof coverings acceptable.
18.	B18	3.2.3.	Existing windows. (a) Existing windows in walls may be relocated to another part of the wall, provided the existing opening is blocked up to provide the same fire rating for the wall, and the projection of the new opening, at a right angle to the property line onto another *building*, lies no closer than 300 mm from a window in such other *building*, where the "opposite" window is less than 2 400 mm from the opposite new opening, and (b) except relocation of units, to be restricted to the same *fire compartment* and shall conform to the requirements of Article 3.2.3.14. or 9.10.12.3. where applicable, or (c) where a *building* does not satisfy the requirements of Subsection 3.2.3. for the amount of openings facing a yard or space that does not have sufficient *limiting distance*, such existing openings are allowed to be relocated provided: (i) such openings are not increased in size and they are protected with wired glass in steel frames conforming to Sentence 3.1.8.14.(2), or (ii) the *building* is *sprinklered*.
19.	B19	3.2.3.6.(3)	Existing roof soffit projections acceptable.
20.	B20	3.2.4.	(a) Existing fire alarm system may remain except that Article 3.2.4.5. does not apply where the fire safety plan (as described in the Fire Code made under the *Fire Protection and Prevention Act, 1997*) for the *building* addresses the intent of Subsection 3.2.4. (i.e. "stage" system, electrical supervision, detection as required, Fire Department connection and emergency power supply), and (b) extension of an existing system must ensure continuity and compatibility, and integrity of the system.
21.	B21	3.2.4.9.(2)(e)	Does not apply to existing installations in *buildings*.
22.	B22	3.2.4.10.(5)(c)	Does not apply to existing installations in *buildings*.

23.	B23	3.2.5.1.; 3.2.5.2.	Existing access to an existing *occupancy* acceptable. Where the existing *building* is changed to a "B" *occupancy*, existing access are acceptable.
24.	B24	3.2.5.3.(1)	Existing acceptable, except where a change in *occupancy* occurs to a "B1" or "B2" *occupancy*.
25.	B25	3.2.5.3.(2)	Existing acceptable.
26.	B26	3.2.5.4. to 3.2.5.6.	Existing access route to existing *occupancy* is acceptable if the *building* is *sprinklered*. Where existing *building* is changed to a "B" *occupancy*, access route shall be provided.
27.	B27	3.2.5.7.; 3.2.5.18.	Does not apply except where a change in *occupancy* occurs to a "B1" or "B2" *occupancy*, where occupants are not normally evacuated from the *building*.
28.	B28	3.2.5.13.	Existing sprinkler systems in existing *buildings* that do not conform to NFPA 13 may be altered, added to, or extended from the existing system without complying with NFPA 13, provided the system is operational and adequate with respect to coverage, water supply and controls, and provided the system is evaluated by a qualified designer.
29.	B29	3.2.9.	Does not apply except where a change in *occupancy* occurs to a Group B *occupancy*, where occupants are not normally evacuated from the *building*.
30.	B30	3.3.1.9.	Existing width of *public corridors* of not less than 914 mm is acceptable, except as provided in Sentence 3.3.3.3.(2).
31.	B31	3.3.1.10.; 3.3.1.11.	Existing door swings may remain in *heritage buildings*, existing or being restored, with no change in *major occupancy* and with *occupant load* no greater than 100.
32.	B32	3.3.1.12.	Existing doors acceptable.
33.	B33	3.3.1.15.	Existing acceptable.
34.	B34	3.3.1.16.	Existing non-conforming capacities of *access to exits* are acceptable, provided that the excessive capacity is no greater than 15% and, (a) corridor *fire separations* are rated to Code plus early warning system provided, or (b) there are sprinklers, plus *smoke alarms* in *suites*.
35.	B35	3.3.1.17.	Existing acceptable.
36.	B36	3.3.1.18.	Existing stained, etched, bevelled, leaded or figured glass acceptable.
37.	B37	3.3.3.3.(1)	Existing dead end corridors acceptable with 30 min *fire separation* of corridor plus sprinklering of *floor area*, provided the *occupant load* is not greater than 10 persons and travel distance not greater than 6 m plus corridor width to "*exit* choice" point.
38.	B38	3.3.3.7.	45 min *fire separation* acceptable.

39.	B39	3.3.5.4.(1); 3.3.5.7.(3)	Need not comply where a gasketed door and self closer are provided in the existing *fire separation*.
40.	B40	3.4.1.8.	Existing stained, etched, bevelled, leaded or figured glass acceptable.
41.	B41	3.4.2.5.(1)	Existing travel distance acceptable where *floor area* is *sprinklered* and provided *fire separations* comply with Part 3.
42.	B42	3.4.3.2.(7)	Existing acceptable provided there is no change in *occupancy* to a “B2” or “B3”.
43.	B43	3.4.3.4.	Existing acceptable.
44.	B44	3.4.3.5.	Existing headroom clearance of not less than 1 980 mm is acceptable.
45.	B45	3.4.5.1.(2) and (9)	Existing illuminated legible *exit* signs are acceptable.
46.	B46	3.4.6.2.	Existing acceptable, if visually apparent.
47.	B47	3.4.6.3.(1)	Existing acceptable with rise no greater than 3.7 m.
48.	B48	3.4.6.4.(1)	Existing acceptable provided there is no change in *occupancy* to a “B2” or “B3”.
49.	B49	3.4.6.4.(2) to (4)	Existing acceptable.
50.	B50	3.4.6.5.(2) to (11)	Existing acceptable.
51.	B51	3.4.6.6.(2) to (5)	Existing acceptable.
52.	B52	3.4.6.7.(1)	Existing acceptable.
53.	B53	3.4.6.8.	Existing acceptable.
54.	B54	3.4.6.9.	Existing acceptable where there is no change in *major occupancy* or increase in *occupant load* greater than 15%.
55.	B55	3.4.6.11.(1), (2) and (4)	Existing acceptable.
56.	B56	3.4.6.12.	Existing acceptable in *public heritage buildings*.
57.	B57	3.4.6.16.(2) and (3)	Existing functionally operable panic hardware acceptable.
58.	B58	3.4.6.18.(1)(c)	Existing access to existing *occupancy* is acceptable Where the existing *building* is changed to a “B” *occupancy*, existing access is acceptable.
59.	B59	3.4.7.2.	*Combustible* fire escapes which are protected from fire in accordance with Sentence 3.2.3.14.(2) are permitted or may be reconstructed or recreated (as in the case of a *heritage building*). Where serving non-ambulatory persons, minimum width shall be 1 100 mm.
60.	B60	3.5.1.	Existing acceptable, except where *building* is classified under Subsection 3.2.6.
61.	B61	3.6.2.1.(7)	45 min *fire separation* acceptable.
62.	B62	3.6.2.6.	Existing acceptable.
63.	B63	3.6.2.7.(1)	2 h *fire separation* acceptable.
64.	B64	3.6.3.1.(1) to (5)	45 min *fire separation* acceptable.
65.	B65	3.6.3.3.(1), (3), (4)(a), (5) and (10)	Existing acceptable.
66.	B66	3.6.3.3.(2)(a)	45 min *fire separation* acceptable.

67.	B67	3.6.4.	Existing acceptable, except where a change in *occupancy* occurs to a Group B *occupancy*.
68.	B68	3.7.1.3.(1)	Existing acceptable.
69.	B69	3.7.2.1.(2)	The minimum glass areas may be reduced by 50%.
70.	B70	3.7.4.	Where the *occupant load* is increased by more than 15% above the capacity of the existing facilities, facilities to be added to accommodate the increase.
	NUMBER	**PART 4 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
78.	B78	4.1.8.	The requirements under this Subsection do not apply.
	NUMBER	**PART 6 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
79.	B79	6.2.2.1.(2)	Required outdoor air rates may be provided by mechanical, natural or combination of natural and mechanical means.
	NUMBER	**PART 8 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
80.	B80	8.2.1.4.	Existing clearances acceptable where a *sewage system* is replaced with another *sewage system* within the same class and the capacity of the replacement *sewage system* does not exceed the capacity of the existing *sewage system*.
81.	B81	8.2.1.4.	Existing clearances are acceptable where a replacement *sewage system* requires lesser clearances than those required in Part 8 for the existing *sewage system.*

Note: On January 1, 2015, Items 71 to 77 are revoked and the following substituted: (See: O. Reg. 368/13, ss. 39, 43)

71.	B71	3.8.1.2.	Existing accessible entrance acceptable. (See *C.A.* B75) Existing curb ramp conforming to Sentence 3.8.3.2.(3) is acceptable. Existing principal entrance acceptable, provided at least one *barrier-free* entrance is available.
72.	B72	3.8.1.3.(1)	Existing unobstructed width of 920 mm minimum is acceptable.
73.	B73	3.8.1.3.(4)	Existing unobstructed space not less than 1 500 mm in width and 1 500 mm in length located not more than 30 m apart is acceptable.
73.1	B73.1	3.8.3.2.(3)(b)	Existing curb ramp acceptable, provided width not less than 1 200 mm.
74.	B74	3.8.3.3.(1)	Existing doorway acceptable, provided not less than 810 mm wide.
74.1	B74.1	3.8.3.3.(11)(a)	Existing distance acceptable, provided not less than 1 200 mm plus the width of any door that swings into the space in the path of travel.
75.	B75	3.8.3.4.(1)(a)	Existing ramp acceptable, provided not less than 870 mm between handrails.
76.	B76	3.8.3.8.(5)	Existing grab bar is acceptable.
76.1	B76.1	3.8.3.12.	Existing universal washroom acceptable.
77.	B77	3.8.3.13.(2)(f)	Existing grab bar is acceptable.
77.1	B77.1	3.8.3.16.	Existing drinking fountain conforming to Clauses 3.8.3.16.(2)(a) and (b) acceptable.
77.2	B77.2	3.11.3.1.(9)	Existing clear width acceptable, provided not less than 900 mm.
77.3	B77.3	3.11.3.1.(14)	Existing painted line acceptable.

Table 11.5.1.1.C.
Compliance Alternatives for Residential Occupancies

Forming Part of Article 11.5.1.1.

Item	Col. 1	Column 2	Column 3
	NUMBER	**PART 3 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
1.	C1	3.1.4.7.	Existing *heavy timber construction* acceptable where *construction* is within 90% of member sizes listed in Part 3.
2,	C2	3.1.5.2. to 3.1.5.4.; 3.1.5.6.	Existing acceptable.
3.	C3	3.1.5.7. to 3.1.5.10.	Except for exposed foamed plastics, existing acceptable. To match existing, materials may be added from on or off site.
4.	C4	3.1.5.14. to 3.1.5.17.; 3.1.5.21.; 3.1.5.23.	Existing acceptable.
5.	C5	3.1.7.1.	*Fire-resistance ratings* may also be used where they are based on:

			1. HUD Rehabilitation Guidelines, "Guideline on Fire Ratings of Archaic Materials and Assemblies". 2. DBR Technical Paper No. 194, "Fire Endurance of Protected Steel Columns and Beams". 3. DBR Technical Paper No. 207, "Fire Endurance of Unit Masonry Walls". 4. DBR Technical Paper No. 222, "Fire Endurance of Light-Framed and Miscellaneous Assemblies".
6.	C6	3.1.7.5.(3)	Existing assemblies required to be of *noncombustible construction* may be supported by *combustible construction* having at least the same *fire-resistance rating* as that supported.
7.	C7	3.1.8.1.(2); 3.1.8.6.(1) and (2)	Existing functional *closures* are acceptable and may be relocated within the same existing *fire separation*.
8.	C8	3.1.8.5.(2)	(a) Existing functional and sound doors in existing *buildings* that are either hollow metal or kalamein and containing wired glass at least 6 mm thick and conforming to Sentence 3.1.8.14.(2) are permitted in lieu of doors not required to exceed 45 min, (b) all existing functional and sound hollow metal or kalamein doors which carry existing 1.5 h labels are acceptable in lieu of current 1.5 h labels and may contain wired glass panels not exceeding 0.0645 m², at least 6 mm thick and conforming to Sentence 3.1.8.14.(2), and (c) every fire door, window assembly or glass block used as a *closure* in a required *fire separation* shall be installed in conformance with good engineering practice.
9.	C9	3.1.8.7. to 3.1.8.9.	Except for *hotels*, *fire dampers* or *fire stop flaps* are not required to be installed in existing ducts at penetrations of existing *fire separations*.
10.	C10	3.1.8.10.(1)	For existing unlabeled doors in existing *buildings*, at least 45 mm solid core wood or metal clad are acceptable. Except for *residential occupancies*, existing closure rating of 20 min will not be required where the entire *floor area* is *sprinklered*.
11.	C11	3.1.8.13.	Existing functionally operable latching devices, excluding draw bolts, are acceptable.
12.	C12	3.1.8.14.	Existing transoms or sidelights located in *fire separations* not required to be greater than 1 h may be retained if wired glass, at least 6 mm thick, is securely fixed to a wood frame of at least 50 mm thickness with steel stops. Operable transoms shall be fixed closed.
13.	C13	3.1.8.15. to 3.1.8.17.	Existing acceptable.

14.	C14	3.1.11.	Where the concealed space is being materially altered, provide smoke or heat detection in that space in lieu of *fire blocks* and tie into fire alarm system.
15.	C15	3.2.2.17.(1)(b) and (c)	Existing sprinkler systems in 1 *storey buildings* need not comply.
16.	C16	3.2.3.	Existing windows. (a) Existing windows in walls may be relocated to another part of the wall, provided the existing opening is blocked up to provide the same fire rating for the wall, and the projection of the new opening, at a right angle to the property line onto another *building*, lies not closer than 300 mm from a window in such other *building*, where the "opposite" window is less than 2 400 mm from the opposite new opening, and (b) except relocation of units, shall be restricted to the same *fire compartment* and shall conform to the requirements of Article 3.2.3.14. or 9.10.12.3. where applicable, or (c) where a *building* does not satisfy the requirements of Subsection 3.2.3. for the amount of openings facing a yard or space that does not have sufficient *limiting distance*, such existing openings are allowed to be relocated provided: (i) such openings are not increased in size and they are protected with wired glass in steel frames conforming to Sentence 3.1.8.14.(2), or (ii) the *building* is *sprinklered.*
17.	C17	3.2.3.6.(3)	Existing roof soffit projections acceptable.
18.	C18	3.2.4.	(a) Existing fire alarm system may remain except that Article 3.2.4.5. does not apply where the fire safety plan (as described in the Fire Code made under the *Fire Protection and Prevention Act, 1997*) for the *building* addresses the intent of Subsection 3.2.4. (i.e. "stage" system, electrical supervision, detection as required, Fire Department connection, and emergency power supply), and (b) extension of an existing system must ensure continuity and compatibility, and integrity of the system.
19.	C19	3.2.4.9.(2)(e)	Does not apply to existing installations in *buildings*.
20.	C20	3.2.4.10.(5)(c)	Does not apply to existing installations in *buildings*.
21.	C21	3.2.4.22.	Such *smoke alarms* may be battery operated.
22.	C22	3.2.5.1.; 3.2.5.2.	Existing acceptable.
23.	C23	3.2.5.3.(1)	Existing access acceptable.
24.	C24	3.2.5.3.(2)	Existing acceptable.

25.	C25	3.2.5.4. to 3.2.5.6.	(a) For *buildings* 6 *storeys* and less, existing access to existing *occupancy* is acceptable, and (b) where existing *building* is changed to a "C" *occupancy*, an access route shall be provided, or the existing access is acceptable provided the *building* is *sprinklered*.
26.	C26	3.2.5.7.	Existing water supply and hydrants are acceptable in *buildings* up to 6 *storeys* in *building height*.
27.	C27	3.2.5.13.	Existing sprinkler systems in existing *buildings* that do not conform to NFPA 13 may be altered, added to, or extended from the existing system without complying with NFPA 13, provided the system is operational and adequate with respect to coverage, water supply and controls, and provided the system is evaluated by a qualified designer.
28.	C28	3.2.9.	Does not apply to *buildings* 4 *storeys* and less. For existing *buildings* over 4 *storeys* in *building height*, existing standpipe and hose systems water supply is acceptable provided it can deliver a minimum flow rate of 265 L/min for 30 min at 345 kPa (gauge) at the two highest and most remote hose valves, with not less than 132 L/min from each of the two simultaneously.
29.	C29	3.3.1.4.(1); 3.3.4.2.(1)	30 min is acceptable to separate corridors or *exits* in *buildings* not exceeding 6 *storeys* in *building height*, except that 45 min is required for *exits* in *buildings* exceeding 3 *storeys* in *building height*. For *buildings* exceeding 6 *storeys* in *building height*, 30 min is acceptable where *smoke detectors* are installed in corridors, except 1 h is required in *exits*. 30 min is acceptable to separate *public corridors*, *exits* or *suites* in *hotels*, provided *fire detectors* are installed in every room in a *suite* and in every room not located in a *suite*, other than corridors, washrooms, closets in *suites*, saunas, refrigerated areas and swimming pools.
30.	C30	3.3.1.5.(1)(c); Tables 3.3.1.5.A. and 3.3.1.5.B.	In Column 2, maximum area of room or *suite* to be unlimited.
31.	C31	3.3.1.9.	Existing width of *public corridors* of not less than 914 mm is acceptable.
32.	C32	3.3.1.10.; 3.3.1.11.	Existing door swings may remain in *heritage buildings*, existing or being restored, with no change in *major occupancy* and with *occupant load* no greater than 100.
33.	C33	3.3.1.12.	Existing doors acceptable, provided not less than 600 mm wide.
34.	C34	3.3.1.15.	Existing curved or spiral stairs acceptable.
35.	C35	3.3.1.16.	Existing non-conforming capacities of *access to exits* are acceptable, provided that the excessive capacity is no greater than 15% and,

			(a) corridor *fire separations* are rated to Code plus early warning system provided, or (b) there are sprinklers, plus *smoke alarms* in *suites*.
36.	C36	3.3.1.17.	Does not apply to *heritage buildings*.
37.	C37	3.3.1.18.	Existing stained, etched, bevelled, leaded or figured glass acceptable.
38.	C38	3.3.4.2.(3)(b)(i) 3.3.4.2.(3)(b)(ii), (iii) 3.3.4.2.(3)(b)(iv)	30 min *fire separation* acceptable. 45 min *fire separation* acceptable. 1.5 h *fire separation* acceptable.
39.	C39	3.3.4.4.(4) and (5)	For *buildings* 6 *storeys* and less, doorway from *dwelling unit* will be permitted to open directly into *exit* stairway or interior corridor served by a single *exit* if a fire alarm system complying with Subsection 3.2.4. is installed and the *dwelling unit* has a second and separate *means of egress*.
40.	C40	3.3.5.4.(1) and 3.3.5.7.(3)	Need not comply where a gasketed door and self closer are provided in the existing *fire separation*.
41.	C41	3.4.1.4.	Except for *hotels*, the following types of *exits* may also be used for *buildings* not over 6 *storeys* in *building height*: (a) connected balconies, which connect across *firewalls*, or connect to another *exit*, or with access to ground level, (b) areas of refuge where fire service rescue is possible and that comply with Measure L of Sentences (4) to (10), (18) and Clauses (20)(a), (b) and (d) in MMAH Supplementary Standard SB-4, “Measures for Fire Safety in High Buildings”.
42.	C42	3.4.1.8.	Existing stained, etched, bevelled, leaded or figured glass acceptable.
43.	C43	3.4.2.5.(1)	Existing travel distance acceptable where *floor area* is *sprinklered* and provided *fire separations* comply with Part 3.
44.	C44	3.4.3.2.(7)	Existing width of *exits* acceptable provided the *occupant load* is not more than 15% above the *exit* capacity.
45.	C45	3.4.3.4.	Except for *heritage buildings*, existing acceptable, provided not less than 800 mm.
46.	C46	3.4.3.5.	Existing headroom clearance of not less than 1 980 mm is acceptable.
47.	C47	3.4.4.1.(1)	Except for *exits*, no rating required where *floor areas* are *spinklered*.
48.	C48	3.4.4.1.	*Fire separations* of *exits* permitted in *buildings*: - 30 min, up to 3 *storeys* in *building height*; - 45 min, in *hotels* up to 3 *storeys* in *building height*; - 45 min, up to 6 *storeys* in *building height*; - 1 h, over 6 *storeys* in *building height*.

49.	C49	3.4.4.4.(8)	Existing washrooms opening directly into an *exit* stairwell shall be separated from the *exit* stairwell by a 45 min *closure*.
50.	C50	3.4.5.1.(2) and (9)	Existing illuminated legible *exit* signs are acceptable.
51.	C51	3.4.6.1.	Existing acceptable.
52.	C52	3.4.6.2.	Existing acceptable, if visually apparent.
53.	C53	3.4.6.3.(1)	Existing acceptable with rise no greater than 3.7 m.
54.	C54	3.4.6.4.(1)	Existing acceptable.
55.	C55	3.4.6.4.(2) and (3)	Existing acceptable.
56.	C56	3.4.6.5.(2) and (11)	Existing acceptable.
57.	C57	3.4.6.6.(2) and (4)	Existing acceptable.
58.	C58	3.4.6.7.(1)	Existing acceptable.
59.	C59	3.4.6.8.	Existing acceptable.
60.	C60	3.4.6.9.	Existing acceptable.
61.	C61	3.4.6.10.(2) to (6)	Existing acceptable.
62.	C62	3.4.6.11.(1) and (2)	Existing acceptable.
63.	C63	3.4.6.12.	Existing acceptable in *heritage buildings* provided the *occupant load* is not more than 60.
64.	C64	3.4.6.16.(1) to (3)	Existing functionally operable panic hardware acceptable.
65.	C65	3.4.7.2.	*Combustible* fire escapes which are protected from fire in accordance with Sentence 3.2.3.13.(2) are permitted or may be reconstructed or recreated (as in the case of a *heritage building*).
66.	C66	3.5.1.	Existing acceptable except where *building* is classified under Subsection 3.2.6.
67.	C67	3.6.2.1.(7)	45 min *fire separation* acceptable.
68.	C68	3.6.2.2.	Existing acceptable where explosion-resistant *construction* or venting is provided.
69.	C69	3.6.2.6.	Existing acceptable.
70.	C70	3.6.2.7.(1)	2 h *fire separation* acceptable.
71.	C71	3.6.3.1.(1) to (5)	45 min *fire separation* acceptable up to 6 *storeys*.
72.	C72	3.6.3.3.(2)	Where 2 h *fire separation* is required,1 h is acceptable. Except for linen discharge rooms where 1 h *fire separation* is required, 45 min is acceptable.
73.	C73	3.6.3.3.(4) and (5)	Existing sizes acceptable.
74.	C74	3.6.3.3.(9)	Where 2 h *fire separation* is required,1 h is acceptable.
75.	C75	3.6.4.2.	Ceiling *fire separation* need not have a *fire-resistance rating* where sprinklering, subject to *C.A.* C27, of *fire compartments* on both sides of vertical *fire separation* is provided and where such *fire separation* is not required to exceed 1 h.
76.	C76	3.6.4.3.(1)	Existing to meet *flame-spread rating* of 25 or to be *sprinklered*.
77.	C77	3.6.4.4. to 3.6.4.6.	Existing access acceptable.

78.	C78	3.7.1.1.(2)	Minimum room height shall be not less than 1 950 mm over the required floor area and any location that would normally be used as a *means of egress*.
79.	C79	3.7.2.1.	(a) Where windows are not used as *means of egress* and where they do not conflict with ventilation requirements, the minimum glass areas as shown in Table 9.7.2.3. may be reduced by 50%, or (b) an existing room converted to an interior room, created by an addition, shall not require a window, provided there is an opening in a dividing wall occupying not less than 30% of the separating plane to an adjoining room, where the adjoining room has a minimum of 5% window area of the combined floor areas, and provided the required ventilation for the combined room is maintained.
80.	C80	3.7.4.	Where the *occupant load* is increased by more than 15% above the capacity of the existing facilities, facilities to be added to accommodate the increase.
	NUMBER	**PART 4 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
88.	C88	4.1.8.	The requirements under this Subsection do not apply.
	NUMBER	**PART 6 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
89.	C89	6.2.2.1.(2)	Required outdoor air rates may be provided by mechanical, natural or combination of natural and mechanical means.
90.	C90	6.2.3.2.; 6.2.3.8.; 6.2.3.18; 6.2.3.19.	Existing acceptable.

91.	C91	6.2.3.9.(1)	In a *building* containing not more than four *dwelling units* or residential *suites*, the existing heating or *air-conditioning* system may be altered to serve more than one *dwelling unit* or *suite*, provided *smoke alarms* are installed in each *dwelling unit* or *suite* and provided a *smoke detector* is installed in the supply or return air duct system serving the entire *building* which would turn off the fuel supply and electrical power to the heating system upon activation of such detector.
92.	C92	6.2.3.12.	Existing openings, grilles and diffusers acceptable.
93.	C93	6.2.4.2.(1); 6.2.4.3.(1) to (3), (5), (11) and (12)	Existing acceptable.
94.	C94	6.2.4.3.(10)	Where the duct system is being altered, lesser amounts and extent of insulation will be permitted.
95.	C95	6.2.4.7.(10)	In a *building* containing not more than four *dwelling units* or residential *suites*, the existing heating or *air-conditioning* system may be altered to serve more than one *dwelling unit* or *suite*, provided *smoke alarms* are installed in each *dwelling unit* or *suite* and provided a *smoke detector* is installed in the supply or return air duct system serving the entire *building* which would turn off the fuel supply and electrical power to the heating system upon activation of such detector.
96.	C96	6.2.9.2.	Existing acceptable.
97.	C97	6.2.12.3.(1)	Carbon monoxide alarms may be battery operated or plugged into an electrical outlet.
98.	C98	6.3.1.	Existing acceptable, provided products of combustion are safely vented.
	NUMBER	**PART 8 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
99.	C99	8.2.1.4.	Existing clearances acceptable where a *sewage system* is replaced with another *sewage system* within the same class and the capacity of the replacement *sewage system* does not exceed the capacity of the existing *sewage system*.
100.	C100	8.2.1.4.	Existing clearances are acceptable where a replacement *sewage system* requires lesser clearances than those required in Part 8 for the existing *sewage system.*
	NUMBER	**PART 9 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
101.	C101	9.3.2.1.	Sound used lumber may be acceptable for reuse without a grade stamp provided that: (a) visual examination shows no excessive weakening by holes, notches, nail splits or other damage, (b) where the grade or species is unknown, the minimum grade shall apply for span table use, and (c) lumber has not been subjected to termite infestation.

102.	C102	9.5.3.1.	In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, (a) minimum room height shall not be less than 1 950 mm over the required floor area and in any location that would normally be used as a *means of egress*, or (b) minimum room height shall not be less than 2 030 mm over at least 50% of the required floor area, provided that any part of the floor having a clear height of less than 1 400 mm shall not be considered in computing the required floor area.
103.	C103	9.5.11.1.	Doors may be lesser heights to suit ceiling heights.
104.	C104	9.5.11.2.	Existing acceptable, provided not less than 600 mm.
105.	C105	9.6.1.2.(2) and (3); 9.6.1.4.(1) and (2)	Existing doors and sidelights being reused or relocated need not conform if identified or protected.
106.	C106	9.6.1.4.(3)	Existing acceptable, if marked to indicate their existence and position.
107.	C107	9.7.2.3.	(a) Where windows are not used as a *means of egress* and where they do not conflict with ventilation requirements, the minimum glass areas as shown in Table 9.7.2.3. may be reduced by 50%, and (b) an existing room converted to an interior room, created by an addition, shall not require a window, provided there is an opening in a dividing wall occupying not less than 30% of the separating plane to an adjoining room, where the adjoining room has a minimum of 5% window area of the combined floor areas, and provided the required ventilation for the combined room is maintained.
108.	C108	9.7	Existing acceptable.
109.	C109	9.8.1. to 9.8.4.	Replacement or extension of existing stair systems shall be exempt from the provisions of these Subsections, except that they shall have: (a) a minimum width between wall faces of 700 mm, and (b) a minimum clear height over tread nosing or landing of 1 800 mm.
110.	C110	9.8.4.3.	Existing curved or spiral stairs are acceptable.
111.	C111	9.8.4.5.	Where a stair complies with Subsection 9.8.4., an extension to a stair may contain two sets of winders provided that they are separated by at least three treads or a landing.
112.	C112	9.8.5.1.(2)	Existing ramps acceptable, where practical.
113.	C113	9.8.7.	Existing handrails acceptable, unless considered unsafe by *chief building official*.
114.	C114	9.8.8.	Existing *guards* acceptable, unless considered unsafe by *chief building official*.

115.	C115	9.8.9.6.(4)	Existing acceptable.
116.	C116	9.9.2.1.(1) to (3)	Except for *hotels*, the following types of *exits* may also be used: (a) connected balconies, which connect across *firewalls*, or connect to another *exit*, or with access to grade, (b) areas of refuge approved by the *chief building official*, where fire service rescue is possible, or (c) *combustible* or *noncombustible* exterior stairways or fire escapes which are protected in accordance with Sentence 3.2.3.13.(2). These may be reconstructed or recreated (as in the case of a *heritage building*).
117.	C117	9.9.2.1.(4)	Except for *hotels*, existing acceptable.
118.	C118	9.9.3.2.	(a) In a *building* containing not more than four *dwelling units*, the width of every *exit* facility may be as the existing, but not less than 800 mm, or (b) in a *building* containing more than four *dwelling units*, the width of every *exit* facility may be as the existing, but not less than 900 mm.
119.	C119	9.9.3.3.	(a) In a *building* containing not more than four *dwelling units*, the minimum width of a *public corridor* may be 800 mm, or (b) in a *building* containing more than four *dwelling units*, the minimum width of a *public corridor* may be 900 mm.
120.	C120	9.9.3.4.	Existing clear height of not less than 1 950 mm is acceptable.
121.	C121	9.9.4.2.	Except as permitted in *C.A.* C136, in a *building* containing not more than four *dwelling units* or *suites*, one *exit* need not be separated from the remainder of the *building* at the *first storey* where there are one or more other *exits* complying with *C.A.* C122.
122.	C122	9.9.4.2.(1) and (2)	30 min *fire separation* acceptable.
123.	C123	9.9.5.4.	Existing acceptable.
124.	C124	9.9.5.8.	Existing acceptable provided minimum 45 min *fire separation* and where explosion-resistant *construction* or venting is provided.
125.	C125	9.9.5.9.	Existing acceptable, provided that the enclosure has a 45 min *fire-resistance rating*.
126.	C126	9.9.6.1.	Except for *hotels*, existing acceptable.
127.	C127	9.9.6.2.	Existing clear opening height of not less than 1 950 mm is acceptable.
128.	C128	9.9.6.3.	Existing door widths are acceptable, provided *exit* widths conform to *C.A.* C118.
129.	C129	9.9.6.5.	Existing door swings acceptable. Existing acceptable in *public heritage buildings*, where approved by *chief building official*.

130.	C130	9.9.6.6.(1)	Where *exit* doors open onto a landing, they shall not extend beyond the face of the first riser.
131.	C131	9.9.6.8.	Existing functionally operable passage or panic hardware acceptable.
132.	C132	9.9.7.4.(1)(a)	Maximum area of existing room or *suite* does not apply.
133.	C133	9.9.7.5.	Except as provided in *C.A.* C136, in detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, the Code requirement applies.
134.	C134	9.9.8.2.(1)	Existing travel distance acceptable where *floor area* is *sprinklered* and provided *fire separations* comply with Part 9.
135.	C135	9.9.8.5.	In a *building* containing not more than four *dwelling units* or *suites*, existing glazed solid wood doors to lobby may remain in lieu of new 20 minute doors, provided the *fire separations* for the floor above or below are provided as per *C.A.* C147, and a second *means of egress* from the *dwelling units* complies with the Code requirements.
136.	C136	9.9.9.	In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, *exit* requirements are acceptable if at least one of the following conditions exists: (a) a door, including a sliding door, that opens directly to the exterior from a *dwelling unit*, serves only that *dwelling unit* and has reasonable access to ground level, and the *dwelling units* are equipped with *smoke alarms* installed in conformance with Subsection 9.10.19., (b) an *exit* that is accessible to more than one *dwelling unit* and provides the only *means of egress* from each *dwelling unit*, provided that the *means of egress* is separated from the remainder of the *building* and common areas by a *fire separation* having a 30 min *fire-resistance rating* and provided further that the required *access to exit* from any *dwelling unit* cannot be through another *dwelling unit*, *service room* or other *occupancy*, and both *dwelling units* and common areas are provided with *smoke alarms* that are installed in conformance with Subsection 9.10.19. and are interconnected, or (c) access to an *exit* from one *dwelling unit* which leads through another *dwelling unit* where, (i) an additional means of escape is provided through a window that conforms to the following: (A) the sill height is not more than 1 000 mm above or below adjacent ground level,

			(B) the window can be opened from the inside without the use of tools, (C) the window has an individual unobstructed open portion having a minimum area of 0.38 m² with no dimension less than 460 mm, (D) the sill height does not exceed 900 mm above the floor or fixed steps, (E) where the window opens into a window well, a clearance of not less than 1 000 mm shall be provided in front of the window, and (F) *smoke alarms* are installed in every *dwelling unit* and in common areas in conformance with Subsection 9.10.19. and are interconnected, (ii) an additional means of escape is provided through a window that conforms to the following: (A) a casement window not less than 1 060 mm high, 560 mm wide, with a sill height not more than 900 mm above the inside floor, (B) the sill height of the window is not more than 5 m above adjacent ground level, and (C) *smoke alarms* are installed in every *dwelling unit* and in common areas in conformance with Subsection 9.10.19. and are interconnected, or (iii) the *building* is *sprinklered* and the *dwelling units* are equipped with *smoke alarms* installed in conformance with Subsection 9.10.19.
137.	C137	9.9.10.1.	In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, existing acceptable, where there is direct access to the exterior.
138.	C138	9.9.11.	In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, the requirements under this Subsection do not apply.
139.	C139	9.9.11.3.	Existing illuminated legible signs are acceptable for *exit* signs, if approved by *chief building official*.
140.	C140	9.9.12.	In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, the requirements under this Subsection apply only where the condition described in (b) of *C.A.* C136 exists.
141.	C141	9.10.1.1.	Assemblies required to be of *noncombustible construction* may be supported by *combustible construction* having at least the same *fire-resistance rating* as that supported.
142.	C142	9.10.1.3.(8) to (10)	Existing installations acceptable subject to *C.A.*'s C26, C27 and C28.

143.	C143	9.10.3.	*Fire-resistance ratings* may also be used where they are based on: 1. HUD Rehabilitation Guidelines, "Guideline on Fire Ratings of Archaic Materials and Assemblies". 2. DBR Technical Paper No. 194, "Fire Endurance of Protected Steel Columns and Beams". 3. DBR Technical Paper No. 207, "Fire Endurance of Unit Masonry Walls". 4. DBR Technical Paper No. 222, "Fire Endurance of Light-Framed and Miscellaneous Assemblies".
144.	C144	9.10.5.1.	(a) Existing openings in existing wall or ceiling membranes to remain. (b) Existing openings may be moved to another location in the same wall or ceiling, provided the aggregate area of openings does not increase and are not cumulative, and the existing opening is blocked up to provide the same rating as the existing wall or ceiling assembly.
145.	C145	9.10.6.2.	Existing *heavy timber construction* acceptable where *construction* is within 90% of member sizes listed in Part 3.
146.	C146	9.10.7.	Existing acceptable for *heritage buildings*, subject to approval of *chief building official*.
147.	C147	9.10.8.1.; 9.10.8.3.; 9.10.8.8.	(a) Except as provided in (b) and (c), 30 min rating is acceptable. (b) In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, 15 min horizontal *fire separation* is acceptable where, (i) *smoke alarms* are installed in every *dwelling unit* and in common areas in conformance with Subsection 9.10.19., and (ii) *smoke alarms* are interconnected. (c) In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, the *fire-resistance rating* of the *fire separation* is waived where the *building* is *sprinklered*.
148.	C148	9.10.9.7.; 9.10.9.9.	Existing acceptable in existing *fire separations*.
149.	C149	9.10.9.10.(1)	Ceiling *fire separation* need not have a *fire-resistance rating* where sprinklering, subject to *C.A.* C27, of *fire compartments* on both sides of vertical *fire separation* is provided and where such *fire separation* is not required to exceed 1 h.
150.	C150	9.10.9.11.(1)	Except for *hotels*, 30 min *fire separation* acceptable.

151.	C151	9.10.9.11.(2)	In lieu of the 2 h *fire separation*, sprinklers may be used in the *mercantile occupancy* or *medium hazard industrial occupancy*, with a 1 h *fire separation*.
152.	C152	9.10.9.14.(1) and (3); 9.10.9.15.(1)	(a) Except as provided in (b) and (c), 30 min *fire separation* is acceptable. (b) In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, 15 min horizontal *fire separation* is acceptable where, (i) *smoke alarms* are installed in every *dwelling unit* and in common areas in conformance with Subsection 9.10.19., and (ii) *smoke alarms* are interconnected. (c) In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, the *fire-resistance rating* of the *fire separation* is waived where the *building* is *sprinklered*.
153.	C153	9.10.10.3.	(a) Except as provided in (b) and (c) and in Articles 9.10.10.5. and 9.10.10.6., 30 min *fire separation* is acceptable. (b) In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, the *fire-resistance rating* of the vertical *fire separation* is waived where, (i) *smoke alarms* are installed in every *dwelling unit* and in common areas in conformance with Subsection 9.10.19., and (ii) *smoke alarms* are interconnected. (c) In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, the *fire-resistance rating* of the vertical *fire separation* is waived where *service rooms* are *sprinklered*.
154.	C154	9.10.11.2.(1)	In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, a *party wall* with 1 h *fire-resistance rating* is acceptable.
155.	C155	9.10.13.1	Existing functional *closures* are acceptable subject to *C.A.*'s C8 and C156.
156.	C156	9.10.13.2.(1)	In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, existing unlabelled doors at least 45 mm solid core wood or metal clad are acceptable. For existing *closures*, ratings of 20 min will not be required where the entire *floor area* is *sprinklered*.

157.	C157	9.10.13.2.(1)	In a *building* containing not more than four *dwelling units* or *suites*, existing glazed solid wood doors to corridors may remain in lieu of new 20 min doors, provided they are not located in a dead end corridor.
158.	C158	9.10.13.3.	Existing acceptable provided that wood door frames are secured with hinge screws going through frame into the stud.
159.	C159	9.10.13.5.	Existing wired glass acceptable. Existing transoms or sidelights located in required *fire separations* may be retained if wired glass, at least 6 mm thick, is securely fixed to a wood frame of at least 50 mm thickness with steel stops. Operable transoms shall be fixed closed.
160.	C160	9.10.13.6.	Existing steel door frames acceptable.
161.	C161	9.10.13.7.	Existing glass block acceptable.
162.	C162	9.10.13.8.	Existing sizes acceptable.
163.	C163	9.10.13.9.	Existing operable latches acceptable.
164.	C164	9.10.13.10.(1)	Existing functionally operable self-closing devices acceptable.
165.	C165	9.10.13.11.	Existing operable self-releasing electromagnetic hold-open device acceptable, and except for *hotels*, fusible link hold-open devices acceptable.
166.	C166	9.10.13.12.	Existing swings acceptable.
167.	C167	9.10.13.13.(1)	Except as permitted in *C.A.* C168, in a *building* containing not more than four *dwelling units*, the existing heating or *air-conditioning* system may be altered to serve more than one *dwelling unit*, provided *smoke alarms* are installed in each *dwelling unit* and provided a *smoke detector* is installed in the supply or return air duct system serving the entire *building* which would turn off the fuel supply and electrical power to the heating system upon activation of such detector.
168.	C168	9.10.13.13.(1)	In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, existing acceptable.
169.	C169	9.10.13.14.; 9.10.5.1.	Except as permitted in *C.A.* C170, in a *building* containing not more than four *dwelling units*, the existing heating or *air-conditioning* system may be altered to serve more than one *dwelling unit*, provided *smoke alarms* are installed in each *dwelling unit* and provided a *smoke detector* is installed in the supply or return air duct system serving the entire *building* which would turn off the fuel supply and electrical power to the heating system upon activation of such detector.
170.	C170	9.10.13.14.; 9.10.5.1.	In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, existing acceptable.

171.	C171	9.10.14.2.(2) and (3); 9.10.14.4.(2); 9.10.15.2.(2) and (3); 9.10.15.4.(4)	Where an addition to an existing residential *building* has its *exposing building face* further distant from the line than the existing *exposing building face* and the *limiting distance* is at least 1 200 mm, the total area of allowable *unprotected openings* may be determined under Sentence 9.10.14.2.(2) or 9.10.15.2.(2) for the combined new and existing *exposing building faces* and, (a) where the existing *exposing building face* has no *unprotected openings*, or the existing *unprotected openings* are to be filled in, the total allowable area of *unprotected openings* may be installed in the new *exposing building face*, or (b) where the existing *unprotected openings* are to remain, (i) their area shall be deducted from the total allowable area of *unprotected openings*, and the balance may be installed in the new *exposing building face*, and (ii) Sentences 9.10.14.2.(3) and 9.10.14.4.(2) or Sentences 9.10.15.2.(3) and 9.10.15.4.(4) apply only to the new *exposing building face*.
172.	C172	9.10.14.4.; 9.10.15.4.	Existing windows. (a) Existing windows in walls may be relocated to another part of the wall, provided the existing opening is blocked up to provide the same fire rating for the wall, and the projection of the new opening, at a right angle to the property line onto another *building*, lies no closer than 300 mm from a window in such other *building*, where the "opposite" window is less than 2 400 mm from the opposite new opening, and (b) except relocation of units, to be restricted to the same *fire compartment* and shall conform to the requirements of Article 3.2.3.14. or 9.10.12.3. where applicable, or (c) where a *building* does not satisfy the requirements of Subsection 3.2.3. for the amount of openings facing a yard or space that does not have sufficient *limiting distance*, such existing openings are allowed to be relocated provided: (i) such openings are not increased in size and they are protected with wired glass in steel frames conforming to Sentence 3.1.8.14.(2), or (ii) the *building* is *sprinklered*.
173.	C173	9.10.16.2.(1)	Where balloon framing is exposed during renovation, *fire blocks* shall be provided.

174.	C174	9.10.18.	(a) Subject to approval by the *chief building official*, existing fire alarm system may remain where the fire safety plan (as described in the Fire Code made under the *Fire Protection and Prevention Act, 1997*) for the *building* addresses the intent of Subsection 3.2.4. (i.e. "stage" system, electrical supervision, detection as required, Fire Department connection, and emergency power supply), and (b) extension of an existing system must ensure continuity and compatibility, and integrity of the system.
175.	C175	9.10.19.4.	*Smoke alarms* may be battery operated.
176.	C176	9.10.20.	Existing access acceptable.
177.	C177	9.14.2.1.(2)	Existing acceptable.
178.	C178	9.18.2.	Existing access acceptable.
179.	C179	9.18.3.	Existing vents and ventilation acceptable.
180.	C180	9.19.	Existing acceptable.
181.	C181	9.20.2.2.	Used masonry may be reused for patching and filling openings to match adjacent work. Used interior brick may not be used for exterior applications.
182.	C182	9.20.3.	Archaic mortars may be used to match existing jointing.
183.	C183	9.20.4.1.	Sound jointing techniques may be employed to match existing archaic joints.
184.	C184	9.20.12.1.	Corbelling may be constructed to match existing or original details, provided that it is structurally adequate for the proposed use.
185.	C185	9.21.	Existing acceptable, provided the products of combustion are safely vented and provided no fire hazard is created.
186.	C186	9.22.1. to 9.22.7.	Sound period materials, designs and techniques may be employed in recreated fireplaces, provided no fire hazard is created. Existing need not comply with Article 9.22.1.4.
187.	C187	9.23.	Existing acceptable.
188.	C188	9.24.	Existing acceptable.
189.	C189	9.25.	A *vapour barrier* may consist of paint or other coating with specified perm rating such as two coats of leafing aluminum pigmented paint.
190.	C190	9.26.	Existing acceptable, except when removing and replacing shingles, comply with the eave protection requirements of Subsection 9.26.5.
191.	C191	9.27.	Existing acceptable.
192.	C192	9.28.	All replacement or recreation of existing stucco may be compatible with the existing materials and application.
193.	C193	9.29.4.	Existing acceptable. All replacement or recreation of existing plaster may be compatible with the existing materials and application.

194.	C194	9.32.	In detached houses, semi-detached houses, townhouses and row houses containing not more than two *dwelling units*, rooms or spaces in *dwelling units* to be ventilated by natural means in accordance with Subsection 9.32.2. or by providing adequate mechanical ventilation.
195.	C195	9.33.1.1.	In a *building* containing not more than four *dwelling units*, the existing heating or *air-conditioning* system may be altered to serve more than one *dwelling unit*, provided *smoke alarms* are installed in each *dwelling unit* and provided a *smoke detector* is installed in the supply or return air duct system serving the entire *building* which would turn off the fuel supply and electrical power to the heating system upon activation of such detector.
196.	C196	9.33.1.2.	Sound, used or antique *appliances* are acceptable, provided that: (a) visual examination shows no excessive weakening by corrosion or other damage, (b) no structural parts are missing, (c) no cracks are present in the components intended to support the *appliance* or enclose the fire, and (d) loading and ash removal door latches and hinges hold the door closed.
197.	C197	9.33.4.3.(1)	Carbon monoxide alarms may be battery operated or plugged into an electrical outlet.
198.	C198	9.37.	Sound used materials shall be acceptable for reuse, subject to the following limitations: (a) visual examination shows no excessive weakening by holes, notches, nail splits or other damage, and (b) logs have not been subjected to termite infestation.
	NUMBER	**PART 12 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
199.	C199	12.2.1.1.(3)	(a) Where the framing systems are being altered to match the existing framing, lesser amounts and extent of insulation and *vapour barrier* is acceptable. (b) Existing acceptable for Article 2.1.1.9. of MMAH Supplementary Standard SB-12, “Energy Efficiency for Housing”. (c) Existing previously occupied log houses that are dismantled and reconstructed are exempt from Article 2.1.1.5. of MMAH Supplementary Standard SB-12, “Energy Efficiency for Housing”.

81.	C81	3.8.1.2.	Existing accessible entrance acceptable. (see *C.A.* C85) Existing curb ramp conforming to Sentence 3.8.3.2.(3) is acceptable. Existing principal entrance acceptable, provided at least one *barrier-free* entrance is available.
82.	C82	3.8.1.3.(1)	Existing unobstructed width of 920 mm minimum is acceptable.
83.	C83	3.8.1.3.(4)	Existing unobstructed space not less than 1 500 mm in width and 1 500 mm in length located not more than 30 m apart is acceptable.
83.1	C83.1	3.8.3.2.(3)(b)	Existing curb ramp acceptable, provided width not less than 1 200 mm.
84.	C84	3.8.3.3.(1)	Existing doorway acceptable, provided not less than 810 mm wide.
84.1	C84.1	3.8.3.3.(11)(a)	Existing distance acceptable, provided not less than 1 200 mm plus the width of any door that swings into the space in the path of travel.
85.	C85	3.8.3.4.(1)(a)	Existing ramp acceptable, provided not less than 870 mm between handrails.
86.	C86	3.8.3.8.(5)	Existing grab bar is acceptable.
86.1	C86.1	3.8.3.12.	Existing universal washroom acceptable.
87.	C87	3.8.3.13.(2)(f)	Existing grab bar is acceptable.
87.1	C87.1	3.8.3.16.	Existing drinking fountain conforming to Clauses 3.8.3.16.(2)(a) and (b) acceptable.
87.2	C87.2	3.11.3.1.(9)	Existing clear width acceptable, provided not less than 900 mm.
87.3	C87.3	3.11.3.1.(14)	Existing painted line acceptable.

Table 11.5.1.1.D/E.
Compliance Alternatives for Business/Mercantile Occupancies

Forming Part of Article 11.5.1.1.

Item	Col. 1	Column 2	Column 3
	NUMBER	**PART 3 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
1.	DE1	3.1.4.7.	Existing *heavy timber construction* acceptable where *construction* is within 90% of member sizes listed in Part 3.
2.	DE2	3.1.5.2. to 3.1.5.4.; 3.1.5.6.	Existing acceptable.
3.	DE3	3.1.5.7. to 3.1.5.10.	Except for exposed foamed plastics, existing acceptable. To match existing, materials may be added from on or off site.
4.	DE4	3.1.5.15. to 3.1.5.17.; 3.1.5.21.; 3.1.4.23.	Existing acceptable.
5.	DE5	3.1.7.1.	*Fire-resistance ratings* may also be used where they are based on:

			1. HUD Rehabilitation Guidelines, “Guideline on Fire Ratings of Archaic Materials and Assemblies”. 2. DBR Technical Paper No. 194, “Fire Endurance of Protected Steel Columns and Beams”. 3. DBR Technical Paper No. 207, “Fire Endurance of Unit Masonry Walls”. 4. DBR Technical Paper No. 222, “Fire Endurance of Light-Framed and Miscellaneous Assemblies”.
6.	DE6	3.1.7.5.(3)	Existing assemblies required to be of *noncombustible construction* may be supported by *combustible construction* having at least the same *fire-resistance rating* as that supported.
7.	DE7	3.1.8.1.(2); 3.1.8.6.	Existing functional *closures* are acceptable and may be relocated within the same existing *fire separation*.
8.	DE8	3.1.8.5.(2)	(a) Existing functional and sound doors in existing *buildings* that are either hollow metal or kalamein and containing wired glass at least 6 mm thick and conforming to Sentence 3.1.8.14.(2) are permitted in lieu of doors not required to exceed 45 min, (b) all existing functional and sound hollow doors which carry existing 1.5 h labels are acceptable in lieu of current 1.5 h labels and may contain wired glass panels not exceeding 0.0645 m², at least 6 mm thick and conforming to Sentence 3.1.8.14.(2), and (c) every fire door, window assembly or glass block used as a *closure* in a required *fire separation* shall be installed in conformance with good engineering practice.
9.	DE9	3.1.8.7.; 3.1.8.9.	*Fire dampers* or *fire stop flaps* are not required to be installed in existing ducts at penetrations of existing *fire separations*.
10.	DE10	3.1.8.10.(1)	For existing unlabelled doors in existing *buildings*, at least 45 mm solid core wood or metal clad are acceptable.
11.	DE11	3.1.8.13.	Existing functionally operable latching devices, excluding draw bolts, are acceptable.
12.	DE12	3.1.8.14.	Existing transoms or sidelights located in required *fire separations* may be retained if wired glass, at least 6 mm thick, is securely fixed to a wood frame of at least 50 mm thickness with steel stops. Operable transoms shall be fixed closed.
13.	DE13	3.1.8.15. to 3.1.8.17.	Existing acceptable.
14.	DE14	3.1.11.	Where the concealed space is being materially altered, smoke or heat detection in that space in lieu of *fire blocks* and tied into fire alarm system is acceptable.
15.	DE15	3.2.2.17.(1)(b) and (c)	Existing sprinkler systems in 1 *storey buildings* need not comply.

16.	DE16	3.2.3.	Existing windows. (a) Existing windows in walls may be relocated to another part of the wall, provided the existing opening is blocked up to provide the same fire rating for the wall, and the projection of the new opening, at a right angle to the property line onto another *building*, lies not closer than 300 mm from a window in such other *building*, where the "opposite" window is less than 2 400 mm from the opposite new opening, and (b) except relocation of units, shall be restricted to the same *fire compartment* and shall conform to the requirements of Article 3.2.3.14. or 9.10.12.3. where applicable, or (c) where a *building* does not satisfy the requirements of Subsection 3.2.3. for the amount of openings facing a yard or space that does not have sufficient *limiting distance*, such existing openings are allowed to be relocated provided: (i) such openings are not increased in size and they are protected with wired glass in steel frames conforming to Sentence 3.1.8.14.(2), or (ii) the *building* is *sprinklered*.
17.	DE17	3.2.3.6.(3)	Existing roof soffit projections acceptable.
18.	DE18	3.2.3.17.	Need not comply for "E" *occupancy*.
19.	DE19	3.2.4.	(a) Existing fire alarm system may remain except that Article 3.2.4.5. does not apply where the fire safety plan (as described in the Fire Code made under the *Fire Protection and Prevention Act, 1997*) for the *building* addresses the intent of Subsection 3.2.4. (i.e. "stage" system, electrical supervision, detection as required, Fire Department connection, and emergency power supply), and (b) extension of an existing system must ensure continuity and compatibility, and integrity of the system.
20.	DE20	3.2.4.9.(2)(e)	Does not apply to existing installations in *buildings*.
21.	DE21	3.2.4.10.(5)(c)	Does not apply to existing installations in *buildings*.
22.	DE22	3.2.5.1.; 3.2.5.2.	Existing acceptable.
23.	DE23	3.2.5.3.	Existing access acceptable.
24.	DE24	3.2.5.4. to 3.2.5.6.	Existing acceptable provided the *building* is *sprinklered*.
25.	DE25	3.2.5.7.	Does not apply, except where a change in *major occupancy* occurs from a lesser *hazard index*.

26.	DE26	3.2.5.13.	Existing sprinkler systems in existing *buildings* that do not conform to NFPA 13 may be altered, added to, or extended from the existing system without complying with NFPA 13, provided the system is operational and adequate with respect to coverage, water supply and controls, and provided the system is evaluated by a qualified designer.
27.	DE27	3.2.9.	Does not apply to *buildings* 6 *storeys* and less. Does not apply to *sprinklered buildings*.
28.	DE28	3.3.1.5.(1)(c); Tables 3.3.1.5.A. and 3.3.1.5.B.	In Column 2, maximum area of room or *suite* to be unlimited.
29.	DE29	3.3.1.9.(1)	Existing width of *public corridors* of not less than 914 mm is acceptable.
30.	DE30	3.3.1.10.; 3.3.1.11.	Existing door swings may remain in *heritage buildings*, existing or being restored, with no change in *major occupancy* and with *occupant load* no greater than 100.
31.	DE31	3.3.1.12.	Existing doors acceptable, provided not less than 600 mm wide.
32.	DE32	3.3.1.15.	Existing curved or spiral stairs acceptable.
33.	DE33	3.3.1.16.	Existing non-conforming capacities of *access to exits* are acceptable, provided that: (a) the increase in *occupant load* is not greater than 15%, (b) the corridor *fire separations* are rated to Code, and (c) early warning systems are provided, or (d) there are sprinklers, plus *smoke alarms* in *suites*.
34.	DE34	3.3.1.17.	Does not apply to *heritage buildings*.
35.	DE35	3.3.1.18.	Existing stained, etched, bevelled, leaded or figured glass acceptable.
36.	DE36	3.3.5.4.; 3.3.5.7.(3)	Need not comply where a gasketed door and self closer are provided in the existing *fire separation*.
37.	DE37	3.4.1.4.	The following types of *exits* may also be used for *buildings* not over 6 *storeys* in *building height*: (a) connected balconies, which connect across *firewalls*, or connect to another *exit*, or with access to grade, (b) areas of refuge where fire service rescue is possible and that comply with Measure L of Sentences (4) to (10), (18), and Clauses (20)(a), (b) and (d) in MMAH Supplementary Standard SB-4, “Measures for Fire Safety in High Buildings”.
38.	DE38	3.4.1.8.	Existing stained, etched, bevelled, leaded or figured glass acceptable.
39.	DE39	3.4.2.5.(1)	Existing travel distance acceptable where *floor area* is *sprinklered*.
40.	DE40	3.4.3.2.(7)	Existing width of *exits* acceptable provided the *occupant load* is not more than 15% above the *exit* capacity.
41.	DE41	3.4.3.4.	Existing acceptable.

42.	DE42	3.4.3.5.	Existing headroom clearance of not less than 1 980 mm is acceptable.
43.	DE43	3.4.4.1.	*Fire separations* of *exits* permitted in *buildings*: - 30 min, up to 3 *storeys* in *building height*; - 45 min, up to 6 *storeys* in *building height*; - 1 h, over 6 *storeys* in *building height*.
44.	DE44	3.4.4.4.(8)	Existing washrooms opening directly into *exit* stairwell shall be separated from *exit* stairwell by a 45 min *closure*.
45.	DE45	3.4.5.1.(2) and (9)	Existing illuminated legible *exit* signs are acceptable.
46.	DE46	3.4.6.1.	Existing acceptable.
47.	DE47	3.4.6.2.	Existing acceptable, if visually apparent.
48.	DE48	3.4.6.3.(1)	Existing acceptable with rise no greater than 3.7 m.
49.	DE49	3.4.6.4.(1)	Existing acceptable.
50.	DE50	3.4.6.4.(2) and (3)	Existing acceptable.
51.	DE51	3.4.6.5.(2) to (11)	Existing acceptable.
52.	DE52	3.4.6.6.(1) to (5)	Existing acceptable.
53.	DE53	3.4.6.7.(1)	Existing acceptable.
54.	DE54	3.4.6.8.	Existing acceptable.
55.	DE55	3.4.6.9.	Existing acceptable.
56.	DE56	3.4.6.10.(2) to (6)	Existing acceptable.
57.	DE57	3.4.6.11.(1) and (2)	Existing acceptable.
58.	DE58	3.4.6.12.	Existing acceptable in *public heritage buildings* or a change in *occupancy* with no increase in *occupant load*.
59.	DE59	3.4.6.13.	Existing acceptable.
60.	DE60	3.4.6.14.	Existing acceptable.
61.	DE61	3.4.6.16.	Existing functionally operable panic hardware acceptable.
62.	DE62	3.4.7.2.	*Combustible* fire escapes which are protected from fire in accordance with Sentence 3.2.3.13.(2) are permitted or may be reconstructed or recreated (as in the case of a *heritage building*).
63.	DE63	3.5.1.	Existing acceptable except where *building* is classified under Subsection 3.2.6.
64.	DE64	3.6.2.1.(7)	Existing *fire separation* of not less than 30 min is acceptable
65.	DE65	3.6.2.2.	Existing acceptable where explosion-resistant *construction* or venting is provided.
66.	DE66	3.6.2.6.	Existing acceptable.
67.	DE67	3.6.2.7.(1)	2 h *fire separation* acceptable.
68.	DE68	3.6.3.1.(1) to (5)	45 min *fire separation* acceptable up to 6 *storeys*.
69.	DE69	3.6.3.3.	(a) Where 2 h *fire separation* is required, 1 h is acceptable. (b) Where 1 h *fire separation* is required, 45 min is acceptable.

			(c) Existing need not comply with Sentence 3.6.3.3.(5).
70.	DE70	3.6.4.2.	Ceiling *fire separation* need not have a *fire-resistance rating* where sprinklering, subject to *C.A.* DE27, of *fire compartments* on both sides of vertical *fire separation* is provided and where such *fire separation* is not required to exceed 1 h.
71.	DE71	3.6.4.3.(1)	Existing to meet *flame-spread rating* of 25 or to be *sprinklered*.
72.	DE72	3.6.4.4. to 3.6.4.6.	Existing access acceptable.
73.	DE73	3.7.4.	Where the *occupant load* is increased by more than 15% above the capacity of the existing facilities, facilities to be added to accommodate the increase.
	NUMBER	**PART 4 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
81.	DE81	4.1.8.	The requirements under this Subsection do not apply.
	NUMBER	**PART 6 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
82.	DE82	6.2.2.1.(2)	Required outdoor air rates may be provided by mechanical, natural or combination of natural and mechanical means.
83.	DE83	6.2.3.2.; 6.2.3.9.; 6.2.3.18; 6.2.3.19.	Existing acceptable.
84.	DE84	6.2.3.8.(18)	Existing acceptable.
85.	DE85	6.2.3.12.	Existing openings, grilles and diffusers acceptable, subject to approval of *chief building official*.
	NUMBER	**PART 8 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
86.	DE86	8.2.1.4.	Existing clearances acceptable where a *sewage system* is replaced with another *sewage system* within the same class and the capacity of the replacement *sewage system* does not exceed the capacity of the existing *sewage system*.

87.	DE87	8.2.1.4.	Existing clearances are acceptable where a replacement *sewage system* requires lesser clearances than those required in Part 8 for the existing *sewage system.*
	NUMBER	**PART 9 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
88.	DE88	9.3.2.1.	Sound used lumber may be acceptable for reuse without a grade stamp provided that: (a) visual examination shows no excessive weakening by holes, notches, nail splits or other damage, (b) where the grade or species is unknown, the minimum grade shall apply for span table use, and (c) lumber has not been subjected to termite infestation.
89.	DE89	9.5.11.2.	Existing acceptable, provided not less than 600 mm.
90.	DE90	9.6.1.2.(2) and (3); 9.6.1.4.(1) and (2)	Existing doors and sidelights being reused or relocated need not conform if identified or protected.
91.	DE91	9.6.1.4.(3) and (4); 9.8.8.1.(7) and (9)	Existing acceptable.
92.	DE92	9.7.	Existing acceptable.
93.	DE93	9.8.1. to 9.8.4.	Replacement or extension of existing stair systems shall be exempt from the provisions of these Subsections, except that they shall have: (a) a minimum width between wall faces of 700 mm, and (b) a minimum clear height over tread nosing or landing of 1 800 mm.
94.	DE94	9.8.3.2.	Existing acceptable.
95.	DE95	9.8.4.3.	Existing curved or spiral stairs acceptable.
96.	DE96	9.8.5.1.(2)	Existing ramps acceptable, where practical.
97.	DE97	9.8.7.	Existing handrails acceptable, unless considered unsafe by *chief building official*.
98.	DE98	9.8.8.	Existing *guards* acceptable, unless considered unsafe by *chief building official*.
99.	DE99	9.9.1.1.	Existing acceptable.
100.	DE100	9.9.2.1.(1) to (3)	The following types of *exits* may also be used: (a) connected balconies, which connect across *firewalls*, or connect to another *exit*, or with access to grade, (b) areas of refuge approved by the *chief building official*, where fire service rescue is possible, or (c) *combustible* or *noncombustible* exterior stairways or fire escapes which are protected in accordance with Sentence 3.2.3.13.(2). These may be reconstructed or recreated (as in the case of a *heritage building*).
101.	DE101	9.9.2.1.(4)	Existing acceptable.
102.	DE102	9.9.3.2.	Existing width of *exits* acceptable.
103.	DE103	9.9.3.3.	Existing width of *public corridors* of not less than 965 mm is acceptable.

104.	DE104	9.9.3.4.	Existing clear height of not less than 1 950 mm is acceptable.
105.	DE105	9.9.4.2.	30 min *fire separation* acceptable.
106.	DE106	9.9.5.4.; 9.9.5.5.	Existing acceptable.
107.	DE107	9.9.5.8.	Existing acceptable provided minimum 45 min *fire separation* and where explosion-resistant *construction* or venting is provided.
108.	DE108	9.9.5.9.	Existing acceptable, provided that the enclosure has a 45 min *fire-resistance rating*.
109.	DE109	9.9.6.1.	Existing acceptable.
110.	DE110	9.9.6.2.	Existing clear opening height of not less than 1 950 mm is acceptable.
111.	DE111	9.9.6.3.	Existing door widths are acceptable, provided *exit* widths comply with *C.A.* DE103.
112.	DE112	9.9.6.5.	Existing door swings are acceptable. Existing acceptable in *public heritage buildings*, where approved by *chief building official*.
113.	DE113	9.9.6.6.(1)	Where *exit* doors open onto a landing, they shall not extend beyond the face of the first riser.
114.	DE114	9.9.6.8.	Existing functionally operable passage or panic hardware acceptable.
115.	DE115	9.9.7.4.	Maximum area of existing room or *suite* to be unlimited.
116.	DE116	9.9.8.2.(1)	Existing travel distance acceptable where *floor area* is *sprinklered* and provided *fire separations* comply with Part 9.
117.	DE117	9.9.11.3.	Existing illuminated legible signs are acceptable for *exit* signs, if approved by *chief building official*.
118.	DE118	9.10.1.1.	Assemblies required to be of *noncombustible construction* may be supported by *combustible construction* having at least the same *fire-resistance rating* as that supported.
119.	DE119	9.10.1.3.(8) to (10)	Existing installations acceptable subject to *C.A.*'s DE26 and DE27.
120.	DE120	9.10.3.	*Fire-resistance ratings* may also be used where they are based on: 1. HUD Rehabilitation Guidelines, "Guideline on Fire Ratings of Archaic Materials and Assemblies". 2. DBR Technical Paper No. 194, "Fire Endurance of Protected Steel Columns and Beams". 3. DBR Technical Paper No. 207, "Fire Endurance of Unit Masonry Walls". 4. DBR Technical Paper No. 222, "Fire Endurance of Light-Framed and Miscellaneous Assemblies".
121.	DE121	9.10.5.1.	(a) Existing openings in existing wall or ceiling membranes to remain.

			(b) Existing openings may be moved to another location in the same wall or ceiling, provided the aggregate area of openings does not increase and are not cumulative, and the existing opening is blocked up to provide the same rating as the existing wall or ceiling assembly.
122.	DE122	9.10.6.2.	Existing *heavy timber construction* acceptable where *construction* is within 90% of the member sizes listed in Part 3.
123.	DE123	9.10.7.	Existing acceptable for *heritage buildings*, subject to approval of *chief building official*.
124.	DE124	9.10.8.1.	Existing 30 min rating acceptable.
125.	DE125	9.10.8.2.	Existing sprinkler systems complying with *C.A.* DE27 and Sentence 3.2.2.17.(1) are acceptable.
126.	DE126	9.10.8.3.	Existing acceptable, subject to approval of the *chief building official*.
127.	DE127	9.10.8.8.	30 min rating acceptable.
128.	DE128	9.10.9.7.; 9.10.9.9.	Existing acceptable in existing *fire separations*.
129.	DE129	9.10.9.10.(1)	Ceiling *fire separation* need not be fire-resistance rated where sprinklering of *fire compartments* on both sides of vertical *fire separation* is provided and where such *fire separation* is not required to exceed 1 h.
130.	DE130	9.10.9.11.(2)	In lieu of the 2 h *fire separation*, sprinklers may be used in the *mercantile occupancy* with a 1 h *fire separation*.
131.	DE131	9.10.9.13.	30 min *fire separation* acceptable.
132.	DE132	9.10.9.15.(1)	30 min *fire separation* acceptable.
133.	DE133	9.10.9.15.(3)	Need not comply for *mercantile occupancy*.
134.	DE134	9.10.10.3.(1)	45 min *fire separation* acceptable.
135.	DE135	9.10.13.1.	Existing functional *closures* are acceptable subject to *C.A.* DE8.
136.	DE136	9.10.13.2.	Existing acceptable.
137.	DE137	9.10.13.3.	Existing acceptable, provided that wood door frames are secured with hinge screws going through frame into the stud.
138.	DE138	9.10.13.5.	Existing acceptable. Existing transoms or sidelights located in required *fire separations* may be retained if wired glass, at least 6 mm thick, is securely fixed to a wood frame of at least 50 mm thickness with steel stops. Operable transoms shall be fixed closed.
139.	DE139	9.10.13.6.	Existing steel door frames acceptable.
140.	DE140	9.10.13.7.	Existing glass block acceptable.
141.	DE141	9.10.13.8.	Existing sizes acceptable.
142.	DE142	9.10.13.9.	Existing operable latches acceptable.
143.	DE143	9.10.13.10.(1)	Existing functionally operable self-closing devices acceptable.

144.	DE144	9.10.13.10.(2)	Existing functionally operable self-closing devices acceptable in "E" *occupancy*.
145.	DE145	9.10.13.11.	Existing operable self-releasing electromagnetic and fusible link hold-open devices acceptable.
146.	DE146	9.10.13.12.	Existing swings acceptable.
147.	DE147	9.10.14.4.	Existing windows. (a) Existing windows in walls may be relocated to another part of the wall, provided the existing opening is blocked up to provide the same fire rating for the wall, and the projection of the new opening, at a right angle to the property line onto another *building*, lies no closer than 300 mm from a window in such other *building*, where the "opposite" window is less than 2 400 mm from the opposite new opening, and (b) except relocation of units, to be restricted to the same *fire compartment* and shall conform to the requirements of Article 3.2.3.14. or 9.10.12.3. where applicable, or (c) where a *building* does not satisfy the requirements of Subsection 3.2.3. for the amount of openings facing a yard or space that does not have sufficient *limiting distance*, such existing openings are allowed to be relocated provided: (i) such openings are not increased in size and they are protected with wired glass in steel frames conforming to Sentence 3.1.8.14.(2), or (ii) the *building* is *sprinklered*.
148.	DE148	9.10.16.2.(1)	Where balloon framing is exposed during renovation, *fire blocks* shall be provided.
149.	DE149	9.10.18.	(a) Subject to approval by the *chief building official*, existing fire alarm system may remain where the fire safety plan (as described in the Fire Code made under the *Fire Protection and Prevention Act, 1997*) for the *building* addresses the intent of 3.2.4. (i.e. "stage' system, electrical supervision, detection as required, Fire Department connection, and emergency power supply), and (b) extension of an existing system must ensure continuity and compatibility, and integrity of the system.
150.	DE150	9.10.20.	Existing access acceptable.
151.	DE151	9.18.2.	Existing access acceptable.
152.	DE152	9.18.3.	Existing vents and ventilation acceptable.
153.	DE153	9.19.	Existing acceptable.

154.	DE154	9.20.2.2.	Used masonry may be reused for patching and filling openings to match adjacent work. Used interior brick may not be used for exterior applications.
155.	DE155	9.20.3.	Archaic mortars may be used to match existing jointing.
156.	DE156	9.20.4.1.	Sound jointing techniques may be employed to match existing archaic joints.
157.	DE157	9.20.12.1.	Corbelling may be constructed to match existing or original details, provided that it is structurally adequate for the proposed use.
158.	DE158	9.21.	Existing acceptable, provided the products of combustion are safely vented and provided no fire hazard is created.
159.	DE159	9.22.1. to 9.22.7.	Sound period materials, designs and techniques may be employed in recreated fireplaces, provided no fire hazard is created. Existing need not comply with Article 9.22.1.4.
160.	DE160	9.23.	Existing acceptable.
161.	DE161	9.24.	Existing acceptable.
162.	DE162	9.26.	Existing acceptable, except when removing and replacing shingles, comply with eave protection requirements in Subsection 9.26.5.
163.	DE163	9.27.	Existing acceptable.
164.	DE164	9.28.	All replacement or recreation of existing stucco may be compatible with the existing materials and application.
165.	DE165	9.29.4.	Existing acceptable. All replacement or recreation of existing plaster may be compatible with the existing materials and application.
166.	DE166	9.33.1.2.	Sound, used or antique *appliances* are acceptable, provided that: (a) visual examination shows no excessive weakening by corrosion or other damage, (b) no structural parts are missing, (c) no cracks are present in the components intended to support the *appliance* or enclose the fire, and (d) loading and ash removal door latches and hinges hold the door closed.
167.	DE167	9.37.	Sound used materials shall be acceptable for reuse, subject to the following limitations: (a) visual examination shows no excessive weakening by holes, notches, nail splits or other damage, and (b) logs have not been subjected to termite infestation.

74.	DE74	3.8.1.2.	Existing accessible entrance acceptable. (See *C.A.* DE78)

			Existing curb ramp conforming to Sentence 3.8.3.2.(3) is acceptable. Existing principal entrance acceptable, provided at least one *barrier-free* entrance is available.
75.	DE75	3.8.1.3.(1)	Existing unobstructed width of 920 mm minimum is acceptable.
76.	DE76	3.8.1.3.(4)	Existing unobstructed space not less than 1 500 mm in width and 1 500 mm in length located not more than 30 m apart is acceptable.
76.1	DE76.1	3.8.3.2.(3)(b)	Existing curb ramp acceptable, provided width not less than 1 200 mm.
77.	DE77	3.8.3.3.(1)	Existing doorway acceptable, provided not less than 810 mm wide.
77.1	DE77.1	3.8.3.3.(11)(a)	Existing distance acceptable, provided not less than 1 200 mm plus the width of any door that swings into the space in the path of travel.
78.	DE78	3.8.3.4.(1)(a)	Existing ramp acceptable, provided not less than 870 mm between handrails.
79.	DE79	3.8.3.8.(5)	Existing grab bar is acceptable.
79.1	DE79.1	3.8.3.12.	Existing universal washroom acceptable.
80.	DE80	3.8.3.13.(2)(f)	Existing grab bar is acceptable.
80.1	DE80.1	3.8.3.16.	Existing drinking fountain conforming to Clauses 3.8.3.16.(2)(a) and (b) acceptable.

Table 11.5.1.1.F.
Compliance Alternatives for Industrial Occupancies

Forming Part of Article 11.5.1.1.

Item	Col. 1	Column 2	Column 3
	NUMBER	**PART 3 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
1.	F1	3.1.4.7.	Existing *heavy timber construction* acceptable where *construction* is within 90% of member sizes listed in Part 3.
2.	F2	3.1.5.2. to 3.1.5.4.; 3.1.5.6.	Existing acceptable.
3.	F3	3.1.5.7. to 3.1.5.10.	Except for exposed foamed plastics, existing acceptable for “F2” and “F3” *occupancies*. To match existing, materials may be added from on or off site.
4.	F4	3.1.5.15. to 3.1.5.17.; 3.1.5.21.; 3.1.5.23.	Existing acceptable.
5.	F5	3.1.7.1.	*Fire-resistance ratings* may also be used where they are based on: 1. HUD Rehabilitation Guidelines, “Guideline on Fire Ratings of Archaic Materials and Assemblies”. 2. DBR Technical Paper No. 194, “Fire Endurance of Protected Steel Columns and Beams”.

			3. DBR Technical Paper No. 207, "Fire Endurance of Unit Masonry Walls". 4. DBR Technical Paper No. 222, "Fire Endurance of Light-Framed and Miscellaneous Assemblies".
6.	F6	3.1.7.5.(3)	Existing assemblies required to be of *noncombustible construction* may be supported by *combustible construction* having at least the same *fire-resistance rating* as that supported.
7.	F7	3.1.8.1.(2); 3.1.8.6.	Existing functional *closures* are acceptable and may be relocated within the same existing *fire separation*.
8.	F8	3.1.8.5.(2)	(a) Existing functional and sound doors in existing *buildings* that are either hollow metal or kalamein and containing wired glass at least 6 mm thick and conforming to Sentence 3.1.8.14.(2) are permitted in lieu of doors not required to exceed 45 min, (b) all existing functional and sound hollow metal or kalamein doors which carry existing 1.5 h labels are acceptable in lieu of current 1.5 h labels and may contain wired glass panels not exceeding 0.0645 m², at least 6 mm thick and conforming to Sentence 3.1.8.14.(2), and (c) every fire door, window assembly or glass block used as a *closure* in a required *fire separation* shall be installed in conformance with good engineering practice.
9.	F9	3.1.8.7.; 3.1.8.9.	*Fire dampers* or *fire stop flaps* are not required to be installed in existing ducts at penetrations of existing *fire separations*.
10.	F10	3.1.8.10.(1)	For existing unlabelled doors in existing *buildings*, at least 45 mm solid core wood or metal clad are acceptable.
11.	F11	3.1.8.11.(1)	Existing functionally operable devices acceptable for "F2" and "F3" *occupancies*.
12.	F12	3.1.8.13.	Existing functionally operable latching devices, excluding draw bolts, are acceptable.
13.	F13	3.1.8.14.	Existing transoms or sidelights located in required *fire separations* may be retained if wired glass, at least 6 mm thick, is securely fixed to a wood frame of at least 50 mm thickness with steel stops. Operable transoms shall be fixed closed.
14.	F14	3.1.8.15. to 3.1.8.17.	Existing acceptable.
15.	F15	3.1.11.	Where the concealed space is being materially altered, smoke or heat detection in that space in lieu of *fire blocks* and tied into fire alarm system is acceptable.
16.	F16	3.2.2.17.(1)(b) and (c)	Existing sprinkler systems in 1 *storey buildings* need not comply.

17.	F17	3.2.3.	Existing need not comply with Article 3.2.3.18. for "F2" *occupancy*. Existing windows. (a) Existing windows in walls may be relocated to another part of the wall, provided the existing opening is blocked up to provide the same fire rating for the wall, and the projection of the new opening, at a right angle to the property line onto another *building*, lies not closer than 300 mm from a window in such other *building*, where the "opposite" window is less than 2 400 mm from the opposite new opening, and (b) except relocation of units, shall be restricted to the same *fire compartment* and shall conform to the requirements of Article 3.2.3.14. or 9.10.12.3. where applicable, or (c) where a *building* does not satisfy the requirements of Subsection 3.2.3. for the amount of openings facing a yard or space that does not have sufficient *limiting distance*, such existing openings are allowed to be relocated provided: (i) such openings are not increased in size and they are protected with wired glass in steel frames conforming to Sentence 3.1.8.14.(2), or (ii) the *building* is *sprinklered*.
18.	F18	3.2.3.6.(3)	Existing roof soffit projections acceptable.
19.	F19	3.2.3.17.	Need not comply for "F2" *occupancy*.
20.	F20	3.2.4.	(a) Existing fire alarm system may remain except that Article 3.2.4.5. does not apply where the fire safety plan (as described in the Fire Code made under the *Fire Protection and Prevention Act, 1997*) for the *building* addresses the intent of Subsection 3.2.4. (i.e. "stage" system, electrical supervision, detection as required, Fire Department connection, and emergency power supply), and (b) extension of an existing system must ensure continuity and compatibility, and integrity of the system.
21.	F21	3.2.4.9.(2)(e)	Does not apply to existing installations in *buildings*.
22.	F22	3.2.4.10.(5)(c)	Does not apply to existing installations in *buildings*.
23.	F23	3.2.5.1; 3.2.5.2.	Existing acceptable.
24.	F24	3.2.5.3.	Existing access acceptable.
25.	F25	3.2.5.4. to 3.2.5.6.	Existing acceptable provided the *building* is *sprinklered*.
26.	F26	3.2.5.7.	Does not apply, except where a change in *major occupancy* occurs from a lesser *hazard index*.

27.	F27	3.2.5.13.	Existing sprinkler systems in existing *buildings* that do not conform to NFPA 13 may be altered, added to, or extended from the existing system without complying with NFPA 13, provided the system is operational and adequate with respect to coverage, water supply and controls, and provided the system is evaluated by a qualified designer.
28.	F28	3.2.9.	Does not apply to *buildings* 6 *storeys* and less of "F2" and "F3" *occupancies*. Does not apply to *sprinklered buildings*.
29.	F29	3.3.1.4.(1)	30 min is acceptable to separate *public corridors* or *exits* in *buildings* not exceeding 6 *storeys* in *building height*, except that 45 min is required for *exits* in *buildings* exceeding 3 *storeys* in *building height*. Except for *exits*, no rating required where *floor areas* are *sprinklered*.
30.	F30	3.3.1.5.(1)(c); Tables 3.3.1.5.A. and 3.3.1.5.B.	For "F2" and "F3" *occupancies* in Column 2, maximum area of room or *suite* to be unlimited.
31.	F31	3.3.1.9.	Existing width of *public corridors* of not less than 914 mm is acceptable.
32.	F32	3.3.1.9.(13) and (14)	Need not comply where connected balcony or area of refuge is provided in compliance with *C.A.* F39.
33.	F33	3.3.1.10.; 3.3.1.11.	Existing door swings may remain in *heritage buildings*, existing or being restored, with no change in *major occupancy* and with *occupant load* no greater than 100.
34.	F34	3.3.1.12.	Existing doors acceptable, provided not less than 600 mm wide.
35.	F35	3.3.1.15.	Existing curved or spiral stairs acceptable.
36.	F36	3.3.1.18.	Existing stained, etched, bevelled, leaded or figured glass acceptable.
37.	F37	3.3.5.4.(2), (3) and (5)	Existing acceptable.
38.	F38	3.3.5.6.; 3.3.5.7.	Need not comply where a gasketed door and self closer are provided in the existing *fire separation*.
39.	F39	3.4.1.4.	For "F2" and "F3" *occupancies*, the following types of *exits* may also be used for *buildings* not over 6 *storeys* in *building height*: (a) connected balconies, which connect across *firewalls*, or connect to another *exit*, or with access to grade, (b) areas of refuge where fire service rescue is possible and that comply with Measure L in Sentences (4) to (10), (18) and Clauses (20)(a), (b) and (d) in MMAH Supplementary Standard SB-4, "Measures for Fire Safety in High Buildings".
40.	F40	3.4.1.8.	Existing stained, etched, bevelled, leaded or figured glass acceptable.

41.	F41	3.4.2.5.(1)	For “F2” and “F3” *occupancies*, existing travel distance acceptable where the *floor area* is *sprinklered*.
42.	F42	3.4.3.2.(7)	For “F2” and “F3” *occupancies*, existing width of *exits* acceptable provided the *occupant load* is not more than 15% above the *exit* capacity.
43.	F43	3.4.3.4.	Existing acceptable.
44.	F44	3.4.3.5.	Existing headroom clearance of not less than 1 980 mm is acceptable.
45.	F45	3.4.4.1.	*Fire separations* of *exits* permitted in *buildings*: - 30 min, up to 3 *storeys* in *building height*; - 45 min, up to 6 *storeys* in *building height*; - 1 h, over 6 *storeys* in *building height*.
46.	F46	3.4.4.4.(8)	Existing washrooms opening directly into *exit* stairwell shall be separated from *exit* stairwell by 45 min *closure*.
47.	F47	3.4.5.1.(2) and (9)	Existing illuminated legible *exit* signs are acceptable.
48.	F48	3.4.6.1.	Existing acceptable.
49.	F49	3.4.6.2.	Existing acceptable, if visually apparent.
50.	F50	3.4.6.3.(1)	Existing acceptable with rise no greater than 3.7 m.
51.	F51	3.4.6.4.(1)	Existing acceptable.
52.	F52	3.4.6.4.(2) and (3)	Existing acceptable.
53.	F53	3.4.6.5.(2) to (11)	Existing acceptable.
54.	F54	3.4.6.6.(1) to (5)	Existing acceptable.
55.	F55	3.4.6.7.(1)	Existing acceptable.
56.	F56	3.4.6.8.	Existing acceptable.
57.	F57	3.4.6.9.	Existing acceptable.
58.	F58	3.4.6.10.(2) to (6)	Existing acceptable.
59.	F59	3.4.6.11.(1) and (2)	Existing acceptable.
60.	F60	3.4.6.12.	For “F2” and “F3” *occupancies*, existing acceptable in *public heritage buildings* or a change in *occupancy* with no increase in *occupant load*.
61.	F61	3.4.6.13.; 3.4.6.14.	Existing acceptable.
62.	F62	3.4.6.16.	Existing functionally operable panic hardware acceptable.
63.	F63	3.4.7.2.	*Combustible* fire escapes which are protected from fire in accordance with Sentence 3.2.3.13.(2) are permitted or may be reconstructed or recreated (as in the case of a *heritage building*).
64.	F64	3.5.1.	Existing acceptable, except where *building* classified under Subsection 3.2.6. and except where existing elevators are “open” type.
65.	F65	3.6.2.1.(7)	45 min *fire separation* acceptable.
66.	F66	3.6.2.2.	Existing acceptable where explosion-resistant *construction* or venting is provided.
67.	F67	3.6.2.6.	Existing acceptable.
68.	F68	3.6.2.7.(1)	2 h *fire separation* acceptable.

69.	F69	3.6.3.1.(1) to (5)	45 min *fire separation* acceptable up to 6 *storeys*.
70.	F70	3.6.3.3.	(a) Where 2 h *fire separation* is required, 1 h is acceptable. (b) Where 1 h *fire separation* is required, 45 min is acceptable. (c) Existing need not comply with Sentences 3.6.3.3.(4) and (5).
71.	F71	3.6.4.2.	Ceiling *fire separation* need not be fire-resistance rated where sprinklering, subject to *C.A.* F27, of *fire compartments* on both sides of vertical *fire separation* is provided and where such *fire separation* is not required to exceed 1 h.
72.	F72	3.6.4.3.(1)	Existing to meet *flame-spread rating* of 25 or to be *sprinklered*.
73.	F73	3.6.4.4. to 3.6.4.6.	Existing access acceptable.
74.	F74	3.7.4.	Where the *occupant load* is increased by more than 15% above the capacity of the existing facilities, facilities to be added to accommodate the increase.
	NUMBER	**PART 4 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
82.	F82	4.1.8.	The requirements under this Subsection do not apply.
	NUMBER	**PART 6 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
83.	F83	6.2.2.3.(1), (3) and (4)	*Storage garages* with a total capacity of fewer than 20 motor vehicles need not have mechanical ventilating systems if the downward slope of the floor to the outside door is 1 in 120 and the garage floor is above outside ground level.
84.	F84	6.2.3.2.; 6.2.3.9.; 6.2.3.18; 6.2.3.19.	Existing acceptable for “F2” and “F3” *occupancies*.
85.	F85	6.2.3.12.	Existing openings, grilles and diffusers acceptable.
86.	F86	6.2.9.2.	Existing acceptable for “F2” and “F3” *occupancies*.

	NUMBER	PART 8 REQUIREMENTS	PART 11 *COMPLIANCE ALTERNATIVE*
87.	F87	8.2.1.4.	Existing clearances acceptable where a *sewage system* is replaced with another *sewage system* within the same class and the capacity of the replacement *sewage system* does not exceed the capacity of the existing *sewage system*.
88.	F88	8.2.1.4.	Existing clearances are acceptable where a replacement *sewage system* requires lesser clearances than those required in Part 8 for the existing *sewage system.*
	NUMBER	**PART 9 REQUIREMENTS**	**PART 11 *COMPLIANCE ALTERNATIVE***
89.	F89	9.3.2.1.	Sound used lumber is acceptable for reuse without a grade stamp provided that: (a) visual examination shows no excessive weakening by holes, notches, nail splits or other damage, (b) where the grade or species is unknown, the minimum grade shall apply for span table use, and (c) lumber has not been subjected to termite infestation.
90.	F90	9.5.11.2.	Existing acceptable, provided not less than 600 mm.
91.	F91	9.6.1.2.(2) and (3); 9.6.1.4.(1) and (2)	Existing doors and sidelights being reused or relocated need not conform if identified or protected.
92.	F92	9.6.1.4.(3) and (4); 9.8.8.1.(7) and (9)	Existing barriers acceptable.
93.	F93	9.7.	Existing acceptable.
94.	F94	9.8.1. to 9.8.4.	Replacement or extension of existing stair systems shall be exempt from the provisions of these Articles, except that they shall have: (a) a minimum width between wall faces of 700 mm, and (b) a minimum clear height over tread nosing or landing of 1 800 mm.
95.	F95	9.8.4.3.	Existing curved or spiral stairs acceptable.
96.	F96	9.8.5.1.(2)	Existing ramps acceptable, where practical.
97.	F97	9.8.7.	Existing handrails acceptable, unless considered unsafe by *chief building official*.
98.	F98	9.8.8.	Existing *guards* acceptable, unless considered unsafe by *chief building official*.
99.	F99	9.8.9.6.(4)	Existing acceptable.
100.	F100	9.9.1.1.	Existing acceptable.
101.	F101	9.9.2.1.(1) to (3)	The following types of *exits* may also be used: (a) connected balconies, which connect across *firewalls*, or connect to another *exit*, or with access to grade, (b) areas of refuge approved by the *chief building official*, where fire service rescue is possible, or

			(c) *combustible* or *noncombustible* exterior stairways or fire escapes which are protected in accordance with Sentence 3.2.3.13.(2). These may be reconstructed or recreated (as in the case of a *heritage building*).
102.	F102	9.9.2.1.(4)	Existing acceptable.
103.	F103	9.9.3.2.	Existing width of *exits* acceptable.
104.	F104	9.9.3.3.	Existing width of *public corridors* of not less than 965 mm is acceptable.
105.	F105	9.9.3.4.	Existing clear height of not less than 1 950 mm is acceptable.
106.	F106	9.9.4.2.	30 min *fire separation* acceptable.
107.	F107	9.9.5.4.	Existing acceptable.
108.	F108	9.9.5.8.	Existing acceptable provided minimum 45 min *fire separation* and where explosion-resistant *construction* or venting is provided.
109.	F109	9.9.5.9.	Existing acceptable, provided that the enclosure has a 45 min *fire-resistance rating*.
110.	F110	9.9.6.3.	Existing door widths are acceptable, provided *exit* widths comply with *C.A.* F104.
111.	F111	9.9.6.5.	Existing door swings acceptable. Existing acceptable in *public heritage buildings*, where approved by *chief building official*.
112.	F112	9.9.6.6.(1)	Where *exit* doors open onto a landing, such doors shall not extend beyond the face of the first riser.
113.	F113	9.9.6.8.	Existing functionally operable passage or panic hardware acceptable.
114.	F114	9.9.7.4.	Maximum area of existing room or *suite* does not apply.
115.	F115	9.9.8.2.(1)	Existing travel distance acceptable where *floor area* is *sprinklered* and provided *fire separations* comply with Part 9.
116.	F116	9.9.11.3.	Existing illuminated legible signs are acceptable for *exit* signs, if approved by *chief building official*.
117.	F117	9.10.1.1.	Assemblies required to be of *noncombustible construction* may be supported by *combustible construction* having at least the same *fire-resistance rating* as that supported.
118.	F118	9.10.1.3.(8) to (10)	Existing acceptable subject to *C.A.*'s F27 and F28.
119.	F119	9.10.3.	*Fire-resistance ratings* may also be used where they are based on: 1. HUD Rehabilitation Guidelines, "Guideline on Fire Ratings of Archaic Materials and Assemblies". 2. DBR Technical Paper No. 194, "Fire Endurance of Protected Steel Columns and Beams". 3. DBR Technical Paper No. 207, "Fire Endurance of Unit Masonry Walls".

			4. DBR Technical Paper No. 222. Fire Endurance of Light-Framed and Miscellaneous Assemblies".
120.	F120	9.10.5.1.	Existing openings in existing wall or ceiling membranes to remain. Existing openings may be moved to another location in the same wall or ceiling, provided the aggregate area of openings does not increase and are not cumulative, and the existing opening is blocked up to provide the same rating as the existing wall or ceiling assembly.
121.	F121	9.10.6.2.	Existing *heavy timber construction* acceptable where *construction* is within 90% of the member sizes listed in Part 3.
122.	F122	9.10.7.	Existing acceptable for *heritage buildings*, subject to approval of *chief building official*.
123.	F123	9.10.8.1.	Existing 30 min rating acceptable.
124.	F124	9.10.8.2.	Existing sprinkler systems complying with *C.A.* F27 and Sentence 3.2.2.17.(1) are acceptable.
125.	F125	9.10.8.3.	Existing acceptable, subject to approval of *chief building official*.
126.	F126	9.10.8.8.	30 min rating acceptable.
127.	F127	9.10.9.7.; 9.10.9.9.	Existing acceptable in existing *fire separations*.
128.	F128	9.10.9.10.(1)	Ceiling *fire separation* need not be *fire-resistance rated* where sprinklering of *fire compartments* on both sides of vertical *fire separation* is provided and where such *fire separation* is not required to exceed 1 h.
129.	F129	9.10.9.11.(2)	In lieu of the 2 h *fire separation*, sprinklers may be used in the *medium hazard industrial occupancy* with a 1 h *fire separation*.
130.	F130	9.10.9.13.; 9.10.9.15.(1)	30 min *fire separation* acceptable.
131.	F131	9.10.10.3.(1)	45 min *fire separation* acceptable.
132.	F132	9.10.13.1.	Existing functional *closures* are acceptable subject to *C.A.* F8.
133.	F133	9.10.13.2.	Existing acceptable.
134.	F134	9.10.13.3.	Existing acceptable, provided that wood door frames are secured with hinge screws going through frame into the stud.
135.	F135	9.10.13.5.	Existing wired glass acceptable. Existing transoms or sidelights located in required *fire separations* may be retained if wired glass, at least 6 mm thick, is securely fixed to a wood frame of at least 50 mm thickness with steel stops. Operable transoms shall be fixed closed.
136.	F136	9.10.13.6.	Existing steel door frames acceptable.
137.	F137	9.10.13.7.	Existing glass block acceptable.
138.	F138	9.10.13.8.	Existing sizes acceptable.
139.	F139	9.10.13.9.	Existing operable latches acceptable.

140.	F140	9.10.13.10.(1)	Existing functionally operable self-closing devices acceptable.
141.	F141	9.10.13.11.	Existing operable self-releasing electromagnetic and fusible link hold-open devices acceptable.
142.	F142	9.10.13.12.	Existing swings acceptable.
143.	F143	9.10.14.4.	Existing windows. (a) Existing windows in walls may be relocated to another part of the wall, provided the existing opening is blocked up to provide the same fire rating for the wall, and the projection of the new opening, at a right angle to the property line onto another *building*, lies no closer than 300 mm from a window in such other *building*, where the "opposite" window is less than 2 400 mm from the opposite new opening, and (b) except relocation of units, to be restricted to the same *fire compartment* and shall conform to the requirements of Article 3.2.3.14. or 9.10.12.3. where applicable, or (c) where a *building* does not satisfy the requirements of Subsection 3.2.3. for the amount of openings facing a yard or space that does not have sufficient *limiting distance*, such existing openings are allowed to be relocated provided: (i) such openings are not increased in size and they are protected with wired glass in steel frames conforming to Sentence 3.1.8.14.(2), or (ii) the *building* is *sprinklered*.
144.	F144	9.10.16.2.(1)	Where balloon framing is exposed during renovation, *fire blocks* shall be provided.
145.	F145	9.10.18.	(a) Subject to approval by the *chief building official*, existing fire alarm system may remain where the fire safety plan (as described in the Fire Code made under the *Fire Protection and Prevention Act, 1997*) for the *building* addresses the intent of Subsection 3.2.4. (i.e. "stage" system, electrical supervision, detection as required, Fire Department connection, and emergency power supply), and (b) extension of an existing system must ensure continuity and compatibility, and integrity of the system.
146.	F146	9.10.20.	Existing access acceptable.
147.	F147	9.18.2.	Existing access acceptable.
148.	F148	9.18.3.	Existing vents and ventilation acceptable.
149.	F149	9.19.2.1.	Existing access acceptable.

150.	F150	9.20.2.2.	Used masonry may be reused for patching and filling openings to match adjacent work. Used interior brick may not be used for exterior applications.
151.	F151	9.20.3.	Archaic mortars may be used to match existing jointing.
152.	F152	9.20.4.1.	Sound jointing techniques may be employed to match existing archaic joints.
153.	F153	9.20.12.1.	Corbelling may be constructed to match existing or original details, provided that it is structurally adequate for the proposed use.
154.	F154	9.21.	Existing acceptable, provided the products of combustion are safely vented and provided no fire hazard is created.
155.	F155	9.22.1. to 9.22.7.	Sound period materials, designs and techniques may be employed in recreated fireplaces provided no fire hazard is created. Existing need not comply with Article 9.22.1.4.
156.	F156	9.23.	Existing acceptable.
157.	F157	9.24.	Existing acceptable.
158.	F158	9.26.	Existing acceptable.
159.	F159	9.27.	Existing acceptable.
160.	F160	9.28.	All replacement or recreation of existing stucco may be compatible with the existing materials and application.
161.	F161	9.29.4.	Existing acceptable. All replacement or recreation of existing plaster may be compatible with the existing materials and application.
162.	F162	9.33.1.2.	Sound, used or antique *appliances* are acceptable, provided that: (a) visual examination shows no excessive weakening by corrosion or other damage, (b) no structural parts are missing, (c) no cracks are present in the components intended to support the *appliance* or enclose the fire, and (d) loading and ash removal door latches and hinges hold the door closed.
163.	F163	9.37.	Sound used materials shall be acceptable for reuse, subject to the following limitations: (a) visual examination shows no excessive weakening by holes, notches, nail splits or other damage, and (b) logs have not been subjected to termite infestation.

75.	F75	3.8.1.2.	Existing accessible entrance acceptable. (See *C.A.* F79) Existing curb ramp conforming to Sentence 3.8.3.2.(3) is acceptable. Existing principal entrance acceptable, provided at least one *barrier-free* entrance is available.

76.	F76	3.8.1.3.(1)	Existing unobstructed width of 920 mm minimum is acceptable.
77.	F77	3.8.1.3.(4)	Existing unobstructed space not less than 1 500 mm in width and 1 500 mm in length located not more than 30 m apart is acceptable.
77.1	F77.1	3.8.3.2.(3)(b)	Existing curb ramp acceptable, provided width not less than 1 200 mm.
78	F78	3.8.3.3.(1)	Existing doorway acceptable, provided not less than 810 mm wide.
78.1	F78.1	3.8.3.3.(11)(a)	Existing distance acceptable, provided not less than 1 200 mm plus the width of any door that swings into the space in the path of travel.
79.	F79	3.8.3.4.(1)(a)	Existing ramp acceptable, provided not less than 870 mm between handrails.
80.	F80	3.8.3.8.(5)	Existing grab bar is acceptable.
80.1	F80.1	3.8.3.12.	Existing universal washroom acceptable.
81.	F81	3.8.3.13.(2)(f)	Existing grab bar is acceptable.
81.1	F81.1	3.8.3.16.	Existing drinking fountain conforming to Clauses 3.8.3.16.(2)(a) and (b) acceptable.

O. Reg. 332/12, Division B, Part 11; O. Reg. 151/13, ss. 33-37; O. Reg. 361/13, ss. 97-113.

12.2.4.	**Motion Sensors**
12.3.	**Energy Efficiency for Buildings of Residential Occupancy Within the Scope of Part 9**
12.3.1.	**General**
12.4.	**Water Efficiency**
12.4.1.	**General**

Section 12.1. General

12.1.1. Application

12.1.1.1. Scope

(1) The scope of this Part shall be as described in Subsection 1.1.2. of Division A.

12.1.1.2. Application

(1) This Part applies to resource conservation and environmental integrity in the design and *construction* of *buildings*.

Section 12.2. Energy Efficiency, Carbon Dioxide Equivalents and Peak Electric Demand

12.2.1. Energy Efficiency Design

12.2.1.1. Energy Efficiency Design Before January 1, 2017

(1) This Article applies to *construction* for which a permit has been applied for before January 1, 2017.

(2) Except as provided in Sentences (3) and (4), the energy efficiency of all *buildings* shall conform to Division 1 and Division 2 or 4 of MMAH Supplementary Standard SB-10, "Energy Efficiency Requirements".

(3) Except as provided in Sentence (4), the energy efficiency of a *building* or part of a *building* of *residential occupancy* that is within the scope of Part 9 and is intended for occupancy on a continuing basis during the winter months shall,

(a) meet the performance level that is equal to a rating of 80 or more when evaluated in accordance with NRCan, "EnerGuide for New Houses: Administrative and Technical Procedures", or

(b) conform to Chapters 1 and 2 of MMAH Supplementary Standard SB-12, "Energy Efficiency for Housing".

(4) This Article does not apply to,

(a) a *farm building*,

(b) a *building* that does not use electrical power or fossil fuel,

(c) a manufactured *building* described in Article 9.1.1.9., or

(d) a seasonal recreational *building* described in Section 9.36. or 9.38.

12.2.1.2. Energy Efficiency Design After December 31, 2016

(1) This Article applies to *construction* for which a permit has been applied for after December 31, 2016.

(2) Except as provided in Sentences (3) and (4), the energy efficiency of all *buildings* shall,

(a) be designed to exceed by not less than 13% the energy efficiency levels required by Sentence 12.2.1.1.(2), or

(b) conform to Division 1 and Division 3 or 5 of MMAH Supplementary Standard SB-10, "Energy Efficiency Requirements".

(3) Except as provided in Sentence (4), the energy efficiency of a *building* or part of a *building* of *residential occupancy* that is within the scope of Part 9 and is intended for occupancy on a continuing basis during the winter months shall,

(a) be designed to exceed by not less than 15% the energy efficiency levels required by Sentence 12.2.1.1.(3), or

(b) conform to Chapters 1 and 3 of MMAH Supplementary Standard SB-12, "Energy Efficiency for Housing".

(4) This Article does not apply to,

(a) a *farm building*,

(b) a *building* that does not use electrical power or fossil fuel,

(c) a manufactured *building* described in Article 9.1.1.9., or

(d) a seasonal recreational *building* described in Section 9.36. or 9.38.

12.2.2. Carbon Dioxide Equivalents

12.2.2.1. Carbon Dioxide Equivalents

(1) Except as provided in Sentence (2), all *buildings* shall be designed to conform to the CO_2e emission requirements set out in MMAH Supplementary Standard SB-10, "Energy Efficiency Requirements".

(2) This Article does not apply to,

(a) a *building* or part of a *building* of *residential occupancy* that is within the scope of Part 9 and is intended for occupancy on a continuing basis during the winter months,

(b) a *farm building*,

(c) a *building* that does not use electrical power or fossil fuel,

(d) a manufactured *building* described in Article 9.1.1.9., or

(e) a seasonal recreational *building* described in Section 9.36. or 9.38.

12.2.3. Peak Electric Demand

12.2.3.1. Peak Electric Demand

(1) Except as provided in Sentence (2), all *buildings* shall be designed to conform to the peak electric demand requirements set out in MMAH Supplementary Standard SB-10, "Energy Efficiency Requirements".

(2) This Article does not apply to,

(a) a *building* or part of a *building* of *residential occupancy* that is within the scope of Part 9 and is intended for occupancy on a continuing basis during the winter months,

(b) a *farm building*,

(c) a *building* that does not use electrical power or fossil fuel,

(d) a manufactured *building* described in Article 9.1.1.9., or

(e) a seasonal recreational *building* described in Section 9.36. or 9.38.

12.2.4. Motion Sensors

12.2.4.1. Motion Sensors

(1) Lighting installed to provide the minimum illumination levels required by this Code may be controlled by motion sensors except where the lighting,

(a) is installed in an *exit*,

(b) is installed in a corridor serving patients or residents in a Group B, Division 2 or Division 3 *occupancy*, or

(c) is required to conform to Sentence 3.2.7.1.(6).

(2) Where motion sensors are used to control minimum lighting in a *public corridor* or corridor providing *access to exit* for the public, the motion sensors shall be installed with switch controllers equipped for fail-safe operation and illumination timers set for a minimum 15-minute duration.

(3) A motion sensor shall not be used to control emergency lighting.

Section 12.3. Energy Efficiency for Buildings of Residential Occupancy Within the Scope of Part 9

12.3.1. General

12.3.1.1. Application

(1) This Section applies to the energy efficiency of a *building* or part of a *building* of *residential occupancy* that is within the scope of Part 9 and is intended for occupancy on a continuing basis during the winter months.

12.3.1.2. Windows and Sliding Glass Doors

(1) The energy rating and the overall coefficient of heat transfer required for windows and sliding glass doors shall be determined in conformance with,

(a) CAN/CSA-A440.2, “Fenestration Energy Performance”, or

(b) NFRC 100, “Procedure for Determining Fenestration Product U-factors” and NFRC 200, “Procedure for Determining Fenestration Product Solar Heat Gain Coefficient and Visible Transmittance at Normal Incidence”.

12.3.1.3. Temperature Control in Dwelling Units

(1) Except as provided in Sentence (3) and except where space heating energy is provided by a solid fuel-burning *appliance* or a ground source heat pump, the indoor air temperature in a *dwelling unit* shall be controlled by at least one programmable thermostatic control device.

(2) The programmable thermostatic control device required in Sentence (1) shall,

(a) allow the setting of different air temperatures for at least,

(i) four time periods per day, and

(ii) two different day-types per week,

(b) include a manual override, and

(c) allow the setting of the air temperature to,

(i) 13°C or lower in heating mode, and

(ii) 29°C or higher in cooling mode, where *air-conditioning* is provided.

(3) A manual thermostatic control device is permitted if it,

(a) controls a heating or cooling system where the heating or cooling capacity is not more than 2 kW, or

(b) serves an individual room or space.

12.3.1.4. Hot Water Piping Insulation

(1) Hot water pipes that are vertically connected to a hot water storage tank shall have heat traps on both inlet and outlet piping as close as practical to the tank, except where the tank,

(a) has an integral heat trap, or

(b) serves a recirculating system.

(2) The first 2.5 m of hot water outlet piping of a hot water storage tank serving a non-recirculating system shall be insulated to provide a thermal resistance of not less than RSI 0.62.

(3) The inlet pipe of a hot water storage tank between the heat trap and the tank serving a non-recirculating system shall be insulated to provide a thermal resistance of not less than RSI 0.62.

12.3.1.5. Residential Furnaces After December 31, 2014

(1) Sentence (2) applies to *construction* for which a permit has been applied for after December 31, 2014.

(2) A furnace serving a *dwelling unit* shall be equipped with a brushless direct current motor.

12.3.1.6. Energy Supply for Kitchen and Laundry Facilities After December 31, 2014

(1) This Article applies to *construction* for which a permit has been applied for after December 31, 2014.

(2) In order to supply energy to cooking appliances and clothes dryers, every kitchen and laundry space shall be provided with,

(a) an electrical outlet,

(b) a natural gas line, or

(c) a propane line.

Section 12.4. Water Efficiency

12.4.1. General

12.4.1.1. Plumbing Systems

(1) All *buildings* shall conform to the water efficiency requirements of Subsection 7.6.4.

O. Reg. 332/12, Division B, Part 12; O. Reg. 361/13, ss. 114-119.

1.7.1.1.	Enforcement of the provisions of the Act and this Code Related to Sewage Systems

Section 1.1. Administration

1.1.1. Administration

1.1.1.1. Conformance with Administrative Requirements

(1) This Code shall be administered in conformance with the Act.

Section 1.2. Design and General Review

1.2.1. Design

1.2.1.1. Application

(1) Article 1.2.1.2. applies with respect to a *building* described in clause 11 (3) (a) or (b) of the *Architects Act* or subsection 12 (4) or clause 12 (5) (a) of the *Professional Engineers Act*.

1.2.1.2. Design by Architect or Professional Engineer

(1) Where the *foundations* of a *building* are to be *constructed* below the level of the footings of an adjacent *building* and within the angle of repose of the *soil*, as drawn from the bottom of the footings, the *foundations* shall be designed by a *professional engineer*.

(2) A sprinkler protected glazed wall assembly described in Article 3.1.8.18. of Division B shall be designed by a *professional engineer*.

(3) A *shelf and rack storage system* described in Section 3.16. of Division B shall be designed by a *professional engineer*.

(4) The time-based egress analysis for a *shelf and rack storage system* described in Sentence 3.16.1.7.(7) of Division B shall be prepared or provided by an *architect* or a *professional engineer* or a combination of both.

(5) The supporting framing structure and anchorage system for a tent occupying an area greater than 225 m^2 shall be designed by a *professional engineer*.

(6) A sign structure attached in any manner to a *building* shall be designed by an *architect* or a *professional engineer* or a combination of both where it is,

(a) a projecting sign that weighs more than 115 kg, or

(b) a roof sign that has any face that is more than 10 m^2.

(7) A projecting sign attached in any manner to a parapet wall shall be designed by an *architect* or a *professional engineer* or a combination of both.

1.2.2. General Review

1.2.2.1. General Review by Architect or Professional Engineer

(1) The *construction*, including, for greater certainty, enlargement or alteration, of every *building* or part of it described in Table 1.2.2.1. shall be reviewed by an *architect* or a *professional engineer* or a combination of both as set out in Column 3 of the Table.

Table 1.2.2.1.(4)
General Review

Forming Part of Sentence 1.2.2.1.(1)

Item	Column 1 *Building* Classification by *Major Occupancy*	Column 2 *Building* Description	Column 3 General Review by:
1.	*Assembly occupancy* only	Every *building*	*Architect* and *professional engineer*(1)
2.	*Assembly occupancy* and any other *major occupancy* except *industrial*	Every *building*	*Architect* and *professional engineer*(1)
3.	*Care, care and treatment* or *detention occupancy* only	Every *building*	*Architect* and *professional engineer*(1)
4.	*Care, care and treatment* or *detention occupancy* and any other *major occupancy* except *industrial*	Every *building*	*Architect* and *professional engineer*(1)
5.	*Residential occupancy* only	Every *building* that exceeds 3 *storeys* in *building height*	*Architect* and *professional engineer*(1)
		Every *building* that exceeds 600 m^2 in *gross area* and that contains a *residential occupancy* other than a *dwelling unit* or *dwelling units*	*Architect*(2)
6.	*Residential occupancy* only	Every *building* that exceeds 600 m^2 in *gross area* and contains a *dwelling unit* above another *dwelling unit*	*Architect*(2)
		Every *building* that exceeds 600 m^2 in *building area*, contains 3 or more *dwelling units* and has no *dwelling unit* above another *dwelling unit*	*Architect*(2)
7.	*Residential occupancy* and any other *major occupancy* except *assembly, care, care and treatment, detention* or *industrial occupancy*	Every *building* that exceeds 600 m^2 in *gross area* or 3 *storeys* in *building height*	*Architect* and *professional engineer*(1)
8.	*Business and personal services occupancy* only	Every *building* that exceeds 600 m^2 in *gross area* or 3 *storeys* in *building height*	*Architect* and *professional engineer*(1)

9.	*Business and personal services occupancy* and any other *major occupancy* except *assembly*, *care*, *care and treatment*, *detention* or *industrial occupancy*	Every *building* that exceeds 600 m^2 in *gross area* or 3 *storeys* in *building height*	*Architect* and *professional engineer*(1)
10.	*Mercantile occupancy* only	Every *building* that exceeds 600 m^2 in *gross area* or 3 *storeys* in *building height*	*Architect* and *professional engineer*(1)
11.	*Mercantile occupancy* and any other *major occupancy* except *assembly*, *care*, *care and treatment*, *detention* or *industrial occupancy*	Every *building* that exceeds 600 m^2 in *gross area* or 3 *storeys* in *building height*	*Architect* and *professional engineer*(1)
12.	*Industrial occupancy* only and where there are no subsidiary *occupancies*	Every *building* that exceeds 600 m^2 in *gross area* or 3 *storeys* in *building height*	*Architect* or *professional engineer*(3)
13.	*Industrial occupancy* and one or more other *major occupancies* where the portion of the area occupied by one of the other *major* or subsidiary *occupancies* exceeds 600 m^2	The non-industrial portion of every *building*	*Architect* and *professional engineer*(1)
		The industrial portion of every *building*	*Architect* or *professional engineer*(3)
14.	*Industrial occupancy* and one or more other *major occupancies* where no portion of the area occupied by one of the other *major* or subsidiary *occupancies* exceeds 600 m^2	Every *building* that exceeds 600 m^2 in *gross area* or 3 *storeys* in *building height*	*Architect* or *professional engineer*(3)

Notes to Table 1.2.2.1.:

(1) An *architect* shall provide general review services within the practice of architecture and a *professional engineer* shall provide general review services within the practice of professional engineering.

(2) An *architect* may engage a *professional engineer* to provide general review services within the practice of professional engineering.

(3) Only a *professional engineer* may provide general review services within the practice of professional engineering.

(4) Requirements for general review by an *architect* or a *professional engineer* or a combination of both for the *construction*, including, for greater certainty, enlargement or alteration, of a *building* are set out in the *Architects Act* and the *Professional Engineers Act*.

(2) A person who intends to *construct* or have *constructed* a *building* or part of it required by Sentences (1) and (4) to (9) to be reviewed by an *architect* or a *professional engineer* or a combination of both, shall ensure that an *architect*, *professional engineer* or both are retained to undertake the general review of the *construction* of the *building* in accordance with the performance standards of the Ontario Association of Architects or the Association of Professional Engineers of Ontario, as applicable, to determine whether

the *construction* is in general conformity with the plans, sketches, drawings, graphic representations, specifications and other documents that form the basis for the issuance of a permit under section 8 of the Act or any changes to it authorized by the *chief building official*.

(3) The *architect*, *professional engineer* or both who have been retained to undertake the general review of the *construction* of a *building*, shall forward copies of written reports arising out of the general review to the *chief building official* or *registered code agency*, as the case may be.

(4) Where the *foundations* of a *building* are to be *constructed* below the level of the footings of an adjacent *building* and within the angle of repose of the *soil*, as drawn from the bottom of the footings, the *construction* of the *foundations* shall be reviewed by a *professional engineer*.

(5) The *construction* of a sprinkler protected glazed wall assembly described in Article 3.1.8.18. of Division B shall be reviewed by a *professional engineer*.

(6) The *construction* of a *shelf and rack storage system* described in Section 3.16. of Division B shall be reviewed by a *professional engineer*.

(7) The *construction* of a supporting framing structure and anchorage system for a tent occupying an area greater than 225 m^2 shall be reviewed by a *professional engineer*.

(8) The *construction* of a sign structure shall be reviewed by an *architect* or a *professional engineer* or a combination of both, where the sign is,

(a) a ground sign that exceeds 7.5 m in height above the adjacent finished ground,

(b) a projecting sign that weighs more than 115 kg, or

(c) a roof sign that has any face that is more than 10 m^2.

(9) The *construction* of a projecting sign attached in any manner to a parapet wall shall be reviewed by an *architect*, *professional engineer* or a combination of both.

1.2.2.2. Restriction for General Review

(1) Only an *architect* may carry out or provide the general review of the *construction* of a *building*,

(a) that is *constructed* in accordance with a design prepared or provided by an *architect*, or

(b) in relation to services that are provided by an *architect* in connection with the design in accordance with which the *building* is *constructed*.

(2) Only a *professional engineer* may carry out or provide the general review of the *construction* of a *building*,

(a) that is *constructed* in accordance with a design prepared or provided by a *professional engineer*, or

(b) in relation to services that are provided by a *professional engineer* in connection with the design in accordance with which the *building* is *constructed*.

1.2.2.3. Demolition of a Building

(1) The applicant for a permit respecting the *demolition* of a *building* shall retain a *professional engineer* to undertake the general review of the project during *demolition*, where,

(a) the *building* exceeds 3 *storeys* in *building height* or 600 m² in *building area*,

(b) the *building* structure includes pre-tensioned or post-tensioned members,

(c) it is proposed that the *demolition* will extend below the level of the footings of any adjacent *building* and occur within the angle of repose of the *soil*, as drawn from the bottom of such footings, or

(d) explosives or a laser are to be used during the course of *demolition*.

Section 1.3. Permits and Inspections

1.3.1. Permits

1.3.1.1. Requirement for Permits

(1) A person is exempt from the requirement to obtain a permit under section 8 of the Act,

(a) for the *demolition* of a *building* located on a farm,

(b) subject to Sentence (2), for the *construction* or *demolition* of a *building* in territory without municipal organization, or

(c) for the *construction* of a Class 1 *sewage system*.

(2) The exemption in Clause (1)(b) from the requirement to obtain a permit does not apply to the *construction* of a *sewage system* in territory without municipal organization.

(3) The application for a permit respecting the *demolition* of a *building* to which Sentence 1.2.2.3.(1) applies shall include descriptions of the structural design characteristics of the *building* and the method of *demolition* of the *building*.

(4) No person shall commence *demolition* of a *building* or any part of a *building* before the *building* has been vacated by the occupants except where the safety of the occupants is not affected.

(5) A tent or group of tents is exempt from the requirement to obtain a permit under section 8 of the Act and is exempt from compliance with the Code provided that the tent or group of tents are,

(a) not more than 60 m^2 in aggregate ground area,

(b) not attached to a *building*, and

(c) constructed more than 3 m from other structures.

1.3.1.2. Applications for Permits under Section 8 of the Act

(1) An application for a permit under section 8 of the Act to *construct* or *demolish* a *building* shall be made by,

(a) the owner of the property on which the proposed *construction* or *demolition* is to take place, or

(b) the authorized agent of the owner referred to in Clause (a).

(2) An application referred to in Sentence (1) shall be in a form approved by the *Minister*.

(3) In Sentence (1),

"owner" includes, in respect of the property on which the *construction* or *demolition* will take place, the registered owner, a lessee and a mortgagee in possession.

1.3.1.3. Period Within Which a Permit is Issued or Refused

(1) Subject to Sentences (2) and (3) and unless the circumstances set out in Sentence (6) exist, if an application for a permit under subsection 8 (1) of the Act that meets the requirements of Sentence (5) is submitted to a *chief building official*, the *chief building official* shall, within the time period set out in Column 2 of Table 1.3.1.3. corresponding to the class of *building* described in Column 1 of Table 1.3.1.3. for which the application is made,

(a) issue the permit, or

(b) refuse to issue the permit and provide in writing all of the reasons for the refusal.

(2) If an application for a permit under subsection 8 (1) of the Act proposes *construction* or *demolition* of two or more *buildings* of different classes described in Column 1 of Table 1.3.1.3. that have different time periods in Column 2 of Table 1.3.1.3., the longer of the time periods shall be the time period for the purposes of Sentence (1).

(3) If an application for a permit under subsection 8 (1) of the Act proposes *construction* or *demolition* of a *building* described in Sentence (4), the time period for the purposes of Sentence (1) shall be the longer of,

(a) 10 days, and

(b) the time period corresponding to the class of the *building* described in Column 1 of Table 1.3.1.3. that the *building* described in Sentence (4) serves, if any.

(4) A *building* referred to in Sentence (3) is,

(a) a structure occupying an area of 10 m^2 or less that contains *plumbing*, including the *plumbing* appurtenant to it,

(b) *plumbing* not located in a structure,

(c) a *sewage system*, or

(d) a structure designated in Article 1.3.1.1. of Division A.

(5) The requirements that an application for a permit under subsection 8 (1) of the Act must meet for the purposes of Sentence (1) are,

(a) that the application is made in the form described in Sentence 1.3.1.2.(2),

(b) that the applicant for the permit is a person described in Clause 1.3.1.2.(1)(a) or (b),

(c) that all applicable fields on the application form and required schedules are completed,

(d) that all required schedules are submitted with the application,

(e) that payment is made of all fees that are required, under the applicable by-law, resolution or regulation made under clause 7 (1) (c) of the Act, to be paid when the application is made, and

(f) that the applicant has declared in writing that,

(i) the application meets all the requirements set out in Clauses (a) to (e),

(ii) the application is accompanied by the plans and specifications prescribed by the applicable by-law, resolution or regulation made under clause 7 (1) (b) of the Act,

(iii) the application is accompanied by the information and documents prescribed by the applicable by-law, resolution or regulation made under clause 7 (1) (b) of the Act which enable the *chief building official* to determine whether the proposed *building*, *construction* or *demolition* will contravene any *applicable law*, and

(iv) the proposed *building*, *construction* or *demolition* will not contravene any *applicable law*.

(6) The *chief building official* is not required to make a decision within the time period required by Sentence (1) with respect to an application that meets the requirements of Sentence (5) if the *chief building official*,

(a) determines that,

(i) the application is not accompanied by the plans, specifications, information and documents referred to in Subclauses (5)(f)(ii) and (iii), or

(ii) the proposed *building*, *construction* or *demolition* will contravene any *applicable law*, and

(b) advises the applicant of his or her determination and provides in writing the reasons for the determination within two days.

(7) Subject to Sentences (9) and (10), the time period described in Sentences (1) to (3) and in Clause (6)(b) shall begin on the day following the day on which an application that meets the requirements of Sentence (5) is submitted to the *chief building official*.

(8) The time periods described in Column 2 of Table 1.3.1.3. and in Clause (6)(b) shall not include Saturdays, holidays and all other days when the offices of the *principal authority* are not open for the transaction of business with the public.

(9) The time period in Sentence (10) applies where,

(a) an application is made for the *construction* of a *building* that is served by a *sewage system*,

(b) *construction* is proposed in respect of the *sewage system* that serves the *building*, and

(c) a board of health, conservation authority, planning board or the council of an upper-tier municipality is responsible for the enforcement of the provisions of the Act and this Code related to the *sewage system* under section 3.1 of the Act or pursuant to an agreement under section 6.2 of the Act.

(10) The time period described in Sentences (1) to (3) and in Clause (6)(b) for an application referred to in Clause (9)(a) shall begin on the day following the later of,

(a) the day on which an application that meets the requirements of Sentence (5) is submitted to the *chief building official*, and

(b) the day on which a permit for the *construction* of the *sewage system* referred to in Clause (9)(b) is issued.

Table 1.3.1.3.
Period Within Which Permit Shall be Issued or Refused

Forming Part of Article 1.3.1.3.

Item	Column 1 Class of *Building*	Column 2 Time Period
1.	(a) A detached house, semi-detached house, townhouse, or row house where no *dwelling unit* is located above another *dwelling unit*. (b) A detached structure that serves a *building* described in Clause (a) and does not exceed 55 m^2 in *building area*. (c) A tent to which Section 3.14. of Division B applies. (d) A sign to which Section 3.15. of Division B applies.	10 days
2.	(a) *Buildings* described in Clause 1.1.2.4.(1)(a), (b) or (c) of Division A, other than *buildings* described in Column 1 of any of Items 1 and 4 of this Table. (b) *Farm buildings* that do not exceed 600 m^2 in *building area*.	15 days
3.	(a) *Buildings* described in Clause 1.1.2.2.(1)(a) or (b) of Division A, other than *buildings* described in Column 1 of any of Items 1 and 4 of this Table. (b) *Farm buildings* exceeding 600 m^2 in *building area*.	20 days
4.	(a) *Post-disaster buildings*. (b) *Buildings* to which Subsection 3.2.6. of Division B or any provision in Articles 3.2.8.3. to 3.2.8.11. of Division B applies.	30 days

1.3.1.4. Permits Under Section 10 of the Act

(1) Except as provided in Sentence (2), the following changes in use of a *building* or part of a *building* constitute an increase in hazard for the purposes of section 10 of the Act and require a permit under section 10 of the Act:

(a) a change of the *major occupancy* of all or part of a *building* that is designated with a "Y" in Table 1.3.1.4. takes place,

(b) a *suite* of a Group C *major occupancy* is converted into more than one *suite* of Group C *major occupancy*,

(c) a *suite* or part of a *suite* of a Group A, Division 2 or a Group A, Division 4 *major occupancy* is converted to a *gaming premises*,

(d) a *farm building* or part of a *farm building* is changed to a *major occupancy*,

(e) a *building* or part of a *building* is changed to a *post-disaster building*,

(f) a *building* or part of a *building* is changed to a retirement home regulated under the *Retirement Homes Act, 2010*, or

(g) the use of a *building* or part of a *building* is changed and the previous *major occupancy* of the *building* or part of the *building* cannot be determined.

Notes to Table 1.3.1.4.:

[1] See Clause 1.3.1.4.(1)(a), Subclause 3.17.1.1.(1)(a)(i) of Division B and Clause 9.40.1.1.(1)(a) of Division B.

[2] *Major occupancy* of all or part of a *building* before change of use.

[3] *Major occupancy* of all or part of a *building* after change of use.

[4] See Clause 1.3.1.4.(1)(b), Subclause 3.17.1.1.(1)(a)(ii) of Division B and Clauses 9.40.1.1.(1)(b) and 11.4.2.3.(1)(b) of Division B.

[5] "N" is only applicable where the *major occupancy* of the entire *suite* is changed.

(2) A person is exempt from the requirement to obtain a permit under section 10 of the Act where the change in use of the *building* or part of the *building* will result from proposed *construction* and a permit under section 8 of the Act has been issued in respect of such *construction*.

(3) A person is exempt from the requirement to obtain a permit under section 10 of the Act for the change of use of a *building* in unorganized territory.

1.3.1.5. Conditional Permits

(1) The *chief building official* shall not issue a conditional permit for any stage of *construction* under subsection 8 (3) of the Act unless compliance with the following applicable laws has been achieved in respect of the proposed *building* or *construction*:

(a) regulations made by a conservation authority under clause 28 (1) (c) of the *Conservation Authorities Act* with respect to permission of the authority for the *construction* of a *building* or structure if, in the opinion of the authority, the control of flooding, erosion, dynamic beaches or pollution or the conservation of land may be affected by the development,

(b) section 5 of the *Environmental Assessment Act* with respect to the approval of the Minister or the Environmental Review Tribunal to proceed with an undertaking,

(c) subsection 24 (3) of the *Niagara Escarpment Planning and Development Act*,

(d) subsection 27 (3) of the *Ontario Heritage Act*,

(e) subsection 30 (2) of the *Ontario Heritage Act* with respect to a consent of the council of a *municipality* to the alteration or *demolition* of a *building* where the council of the *municipality* has given a notice of intent to designate the *building* under subsection 29 (3) of that Act,

(f) section 33 of the *Ontario Heritage Act* with respect to the consent of the council of a *municipality* for the alteration of property,

(g) section 34 of the *Ontario Heritage Act* with respect to the consent of the council of a *municipality* for the *demolition* of a *building*,

(h) section 34.5 of the *Ontario Heritage Act* with respect to the consent of the Minister to the alteration or *demolition* of a designated *building*,

(i) subsection 34.7 (2) of the *Ontario Heritage Act* with respect to a consent of the Minister to the alteration or *demolition* of a *building* where the Minister has given a notice of intent to designate the *building* under section 34.6 of that Act,

(j) by-laws made under section 40.1 of the *Ontario Heritage Act*,

(k) section 42 of the *Ontario Heritage Act* with respect to the permit given by the council of a *municipality* for the erection, alteration or *demolition* of a *building*.

(2) For the purposes of issuing a conditional permit under subsection 8 (3) of the Act, a person is exempt from the requirement in clause 8 (3) (a) of the Act of compliance with by-laws passed under sections 34 and 38 of the *Planning Act* where,

(a) a committee of adjustment has made a decision under section 45 of the *Planning Act* authorizing one or more minor variances from the provisions of any by-laws made under sections 34 and 38 of that Act,

(b) such minor variance or variances result in the achievement of full compliance with such by-laws, and

(c) no person informed the committee of adjustment of objections to the minor variances either in writing or in person at the hearing of the application.

(3) For the purposes of issuing a conditional permit under subsection 8 (3) of the Act, a person is exempt from the requirement in clause 8 (3) (a) of the Act of compliance with by-laws passed under sections 34 and 38 of the *Planning Act* where the *construction* in respect of which the conditional permit is issued is required in order to comply with an order issued under subsection 21 (1) of the *Fire Protection and Prevention Act, 1997* or under subsection 15.9 (4) of the Act.

(4) A permit issued under subsection 8 (3) of the Act shall indicate its conditional nature.

1.3.1.6. Information to be given to Tarion Warranty Corporation

(1) This Article prescribes, for the purposes of subsection 8 (8.1) of the Act, the information relating to permits issued under section 8 of the Act and the applications for those permits that the *chief building official* is required to give to *Tarion Warranty Corporation* and the time within which the information is required to be given.

(2) The *chief building official* shall give the following information to *Tarion Warranty Corporation* with respect to permits issued under section 8 of the Act in respect of the *construction* of *buildings* described in Sentence (4),

(a) the dates the permits are issued and the numbers or other identifying symbols for the permits, and

(b) the information contained in the application forms submitted in respect of the permits, other than the information contained in the schedules or other attachments to the application forms.

(3) Despite Sentence (2), the *chief building official* is not required to give to *Tarion Warranty Corporation* information which relates to the extension or material alteration or repair of an existing *building*.

(4) The *buildings* referred to in Sentence (2) are any *building* whose proposed use is classified as a Group C *major occupancy* and which is not a *boarding, lodging or rooming house* or a *building* containing a *hotel*.

(5) The *chief building official* shall give the information described in Sentence (2) within 45 days after the day on which the permits to which the information relates are issued.

(6) The time period described in Sentence (5) shall not include Saturdays, holidays and all other days when the offices of the *principal authority* are not open for the transaction of business with the public.

1.3.2. Site Documents

1.3.2.1. Permit Posting

(1) Where a permit has been issued pursuant to the Act, the person to whom it is issued shall have the permit or a copy of it posted at all times during *construction* or *demolition* in a conspicuous place on the property in respect of which the permit was issued.

1.3.2.2. Documentation on Site

(1) The person in charge of the *construction* of the *building* shall keep and maintain on the site of the *construction*,

(a) at least one copy of drawings and specifications certified by the *chief building official* or a person designated by the *chief building official* to be a copy of those submitted with the application for the permit to *construct* the *building*, together with changes that are authorized by the *chief building official* or a person designated by the *chief building official*,

(b) copies of authorizations of the Building Materials Evaluation Commission on the basis of which the permit was issued, and

(c) copies of rulings of the *Minister*, made under clause 29 (1) (a) or (c) of the Act, on the basis of which the permit was issued.

1.3.3. Occupancy of Buildings

1.3.3.1. Occupancy Permit — General

(1) Except as permitted in Sentence 1.3.3.2.(1), a person may occupy or permit to be occupied any *building* or part of it that has not been fully completed at the date of occupation where the *chief building official* or a person designated by the *chief building official* has issued a permit authorizing occupation of the *building* or part of it prior to its completion in accordance with Sentence (3).

(2) Sentence (1) does not apply in respect of the occupancy of a *building* to which Article 1.3.3.4. or 1.3.3.5. applies.

(3) The *chief building official* or a person designated by the *chief building official* shall issue a permit authorizing occupation of a *building*, where,

(a) the structure of the *building* or part of it is completed to the roof,

(b) the enclosing walls of the *building* or part of them are completed to the roof,

(c) the walls enclosing the space to be occupied are completed, including balcony *guards*,

(d) all required *fire separations* and *closures* are completed on all *storeys* to be occupied,

(e) all required *exits* are completed, including all *fire separations*, doors, door hardware, self-closing devices, *guards* and handrails, from the uppermost floor to be occupied down to *grade* level and below if an *exit* connects with lower *storeys*,

(f) all shafts including *closures* are completed to the floor-ceiling assembly above the *storey* to be occupied and have a temporary *fire separation* at such assembly,

(g) measures have been taken to prevent access to parts of the *building* and site that are incomplete or still under construction,

(h) floors, halls, lobbies and required *means of egress* are free of loose materials and other hazards,

(i) if *service rooms* should be in operation, required *fire separations* and *closures* are completed,

(j) all *building drains*, *building sewers*, *water systems*, *drainage systems* and *venting systems* are complete and tested as operational for the *storeys* to be occupied,

(k) required lighting, heating and electrical supply are provided for the *suites*, rooms and common areas to be occupied,

(l) required lighting in corridors, stairways and *exits* is completed and operational up to and including all *storeys* to be occupied,

(m) required standpipe, sprinkler and fire alarm systems are complete and operational up to and including all *storeys* to be occupied, together with required pumper connections for such standpipes and sprinklers,

(n) required fire extinguishers have been installed on all *storeys* to be occupied,

(o) main garbage rooms, chutes and ancillary services are completed to all *storeys* to be occupied,

(p) required firefighting access routes have been provided and are accessible, and

(q) the *sewage system* has been completed and is operational.

(4) Where a *registered code agency* has been appointed to perform the functions described in clause 4.1 (4) (b) or (c) of the Act in respect of the *construction* of the *building*, the *chief building official* or a person designated by the *chief building official* shall issue the permit referred to in Sentence (3) after receipt of a *certificate for the occupancy of a building not fully completed* issued by the *registered code agency* in respect of the *building*.

1.3.3.2. Conditions for Residential Occupancy

(1) A person may occupy or permit to be occupied a *building* intended for *residential occupancy* that has not been fully completed at the date of occupation provided that,

(a) the *building*,

(i) is of three or fewer *storeys* in *building height* and has a *building area* not exceeding 600 m²,

(ii) has not more than 1 *dwelling unit* above another *dwelling unit*,

(iii) has not more than 2 *dwelling units* sharing a common *means of egress*, and

(iv) has no accommodation for tourists,

(b) the following *building* components and systems are complete, operational and inspected:

(i) required *exits*, handrails and *guards*, fire alarm and detection systems, and *fire separations*,

(ii) required exhaust fume barriers and self-closing devices on doors between an attached or built-in garage and a *dwelling unit*,

(iii) water supply, sewage disposal, lighting and heating systems, and

(iv) protection of foamed plastics required by Article 9.10.17.10. of Division B,

(c) the following *building* components and systems are complete, operational, inspected and tested:

(i) *water systems*,

(ii) *building drains* and *building sewers*, and

(iii) *drainage systems* and *venting systems*, and

(d) where applicable, the *building* conforms to Article 9.1.1.7. of Division B.

(2) Sentence (1) does not apply in respect of the occupancy of a *building* to which Article 1.3.3.4. or 1.3.3.5. applies.

1.3.3.3. Notification

(1) Where a person has occupied or permitted the occupancy of a *building* under Article 1.3.3.1. or 1.3.3.2., such person shall notify the *chief building official* forthwith upon completion of the *building*.

1.3.3.4. Occupancy Permit — Certain Buildings of Residential Occupancy

(1) No person shall occupy or permit to be occupied a *building* described in Sentence (3), or part of it, unless the *chief building official* or a person designated by the *chief building official* has issued a permit authorizing occupation of the *building* or part of it in accordance with Sentence (4).

(2) This Article does not apply in respect of the occupancy of an existing *building*, or part of it, that has been subject to extension or material alteration or repair.

(3) A *building* referred to in Sentence (1) is a *building* intended for *residential occupancy* that,

(a) is of three or fewer *storeys* in *building height* and has a *building area* not exceeding 600 m²,

(b) has no accommodation for tourists,

(c) does not have a *dwelling unit* above another *dwelling unit*, and

(d) does not have any *dwelling units* sharing a common *means of egress*.

(4) The *chief building official* or a person designated by the *chief building official* shall issue a permit authorizing occupation of a *building* described in Sentence (3), where,

(a) the structure of the *building* with respect to the *dwelling unit* to be occupied is substantially complete and ready to be used for its intended purpose,

(b) the *building* envelope, including, but not limited to, cladding, roofing, windows, doors, assemblies requiring *fire-resistance ratings*, *closures*, insulation, *vapour barriers* and air barriers, with respect to the *dwelling unit* to be occupied, is substantially complete,

(c) the walls enclosing the *dwelling unit* to be occupied conform to Sentence 9.25.2.3.(7) of Division B,

(d) required electrical supply is provided for the *dwelling unit* to be occupied,

(e) required firefighting access routes to the *building* have been provided and are accessible,

(f) the following *building* components and systems are complete and operational for the *dwelling unit* to be occupied:

(i) required *exits*, floor access and egress systems, handrails, *guards*, *smoke alarms*, carbon monoxide alarms and *fire separations*, including, but not limited to, *fire stops*,

(ii) required exhaust fume barriers and self-closing devices on doors between an attached or built-in garage and the *dwelling unit*,

(iii) water supply, sewage disposal, lighting and heating systems, and

(iv) protection of foamed plastics required by Article 9.10.17.10. of Division B,

(g) the following *building* components and systems are complete, operational and tested for the *dwelling unit* to be occupied:

(i) *water system*,

(ii) *building drain* and *building sewer*, and

(iii) *drainage system* and *venting system*,

(h) required *plumbing fixtures* in the *dwelling unit* to be occupied are substantially complete and operational, and

(i) where applicable, the *building* conforms to Article 9.1.1.7. of Division B with respect to the *dwelling unit* to be occupied.

(5) Where a *registered code agency* has been appointed to perform the functions described in clause 4.1 (4) (b) or (c) of the Act in respect of the *construction* of a *building* described in Sentence (3), the *chief building official* or a person designated by the *chief building official* shall issue the permit referred to in Sentence (4) after receipt of a *certificate for the occupancy of a building described in Sentence 1.3.3.4.(3) of Division C* issued by the *registered code agency* in respect of the *building*.

1.3.3.5. Occupancy Permit — Buildings within the scope of Article 3.2.2.43A. or 3.2.2.50A.

(1) No person shall occupy or permit to be occupied a *building* within the scope of Article 3.2.2.43A. or 3.2.2.50A. of Division B, or part of it, unless the *chief building official* or a person designated by the *chief building official* has issued a permit authorizing occupation of the *building* or part of it in accordance with Sentence (3).

(2) This Article does not apply in respect of the occupancy of an existing *building*, or part of it, that has been subject to extension or material alteration or repair.

(3) The *chief building official* or a person designated by the *chief building official* shall issue a permit authorizing occupation of a *building* described in Sentence (1), where,

(a) the structure of the *building* is completed to the roof,

(b) the *building* envelope, including, but not limited to, cladding, roofing, windows, doors, assemblies requiring *fire-resistance ratings*, *closures*, insulation, *vapour barriers* and air barriers, is complete,

(c) the walls enclosing the space to be occupied are completed, including balcony *guards*,

(d) all required *fire separations* and *closures* are completed,

(e) all required *exits* are completed, including all *fire separations*, doors, door hardware, self-closing devices, *guards* and handrails,

(f) all shafts including *closures* are completed,

(g) measures have been taken to prevent access to parts of the *building* and site that are incomplete or still under construction,

(h) floors, halls, lobbies and required *means of egress* are free of loose materials and other hazards,

(i) if *service rooms* should be in operation, required *fire separations* and *closures* are completed,

(j) all *building drains*, *building sewers*, *water systems*, *drainage systems* and *venting systems* are complete and tested as operational for the *storeys* to be occupied,

(k) required lighting, heating and electrical supply are provided for the *suites*, rooms and common areas to be occupied,

(l) required lighting in corridors, stairways and *exits* is completed and operational,

(m) required standpipe, sprinkler and fire alarm systems are complete and operational, together with required pumper connections for such standpipes and sprinklers,

(n) required *smoke alarms* and carbon monoxide alarms are complete and operational,

(o) required fire extinguishers have been installed,

(p) main garbage rooms, chutes and ancillary services are completed to all *storeys* to be occupied,

(q) required firefighting access routes have been provided and are accessible, and

(r) the *sewage system* has been completed and is operational.

(4) Where a *registered code agency* has been appointed to perform the functions described in clause 4.1 (4) (b) or (c) of the Act in respect of the *construction* of a *building* described in Sentence (1), the *chief building official* or a person designated by the *chief building official* shall issue the permit referred to in Sentence (3) after receipt of a *certificate for the occupancy of a building described in Sentence 1.3.3.5.(1) of Division C* issued by the *registered code agency* in respect of the *building*.

1.3.4. Fire Department Inspection

1.3.4.1. Fire Department Approval

(1) Subject to Sentence (2), if the council of a *municipality* assigns specific responsibility for the enforcement of any portion of this Code respecting fire safety matters to an *inspector* who is the chief of the fire department of the *municipality*, the *chief building official* shall not issue a permit to *construct* a *building* unless the *inspector* approves the drawings submitted with the application for the permit as complying with that portion of this Code.

(2) If a *registered code agency* has been appointed under clause 4.1 (4) (a) or (c) of the Act,

(a) a *municipality* shall not assign responsibility under Sentence (1) to the chief of the fire department with respect to a *building* for which the *registered code agency* has been appointed, and

(b) any assignment of responsibility under Sentence (1) with respect to a *building* for which the *registered code agency* is appointed shall be cancelled as of the date of the appointment.

1.3.5. Notices and Inspections

1.3.5.1. Prescribed Notices

(1) This Article sets out the notices that are required under section 10.2 of the Act.

(2) The person to whom a permit under section 8 of the Act is issued shall notify the *chief building official* or, where a *registered code agency* is appointed under the Act in respect of the *construction* to which the notice relates, the *registered code agency* of,

(a) readiness to *construct* footings,

(b) substantial completion of footings and *foundations* prior to commencement of backfilling,

(c) substantial completion of structural framing and ductwork and piping for heating and *air-conditioning* systems, if the *building* is within the scope of Part 9 of Division B,

(d) substantial completion of structural framing and roughing-in of heating, ventilation, *air-conditioning* and air-contaminant extraction equipment, if the *building* is not a *building* to which Clause (c) applies,

(e) substantial completion of insulation and *vapour barriers*,

(f) substantial completion of *air barrier systems*,

(g) substantial completion of all required *fire separations* and *closures* and all fire protection systems including standpipe, sprinkler, fire alarm and emergency lighting systems,

(h) substantial completion of fire access routes,

(i) readiness for inspection and testing of,

(i) *building sewers* and *building drains*,

(ii) *water service pipes*,

(iii) *fire service mains*,

(iv) *drainage systems* and *venting systems*,

(v) the *water distribution system*, and

(vi) *plumbing* fixtures and *plumbing* appliances,

(j) readiness for inspection of suction and gravity outlets, covers and suction piping serving outlets of an *outdoor pool* described in Clause 1.3.1.1.(1)(j) of Division A, a *public pool* or a *public spa*,

(k) substantial completion of the circulation / *recirculation system* of an *outdoor pool* described in Clause 1.3.1.1.(1)(j) of Division A, a *public pool* or *public spa* and substantial completion of the pool before it is first filled with water,

(l) readiness to *construct* the *sewage system*,

(m) substantial completion of the installation of the *sewage system* before the commencement of backfilling,

(n) substantial completion of installation of *plumbing* not located in a structure, before the commencement of backfilling,

(o) completion of *construction* and installation of components required to permit the issue of an occupancy permit under Sentence 1.3.3.1.(3) or to permit occupancy under Sentence 1.3.3.2.(1), if the *building* or part of the *building* to be occupied is not fully completed, and

(p) completion of *construction* and installation of components required to permit the issue of an occupancy permit under Sentence 1.3.3.4.(4) or 1.3.3.5.(3).

1.3.5.2. Additional Notices

(1) A by-law, resolution or regulation made by a *principal authority* under clause 7 (1) (e) of the Act may require that notice of one or more of the following stages of *construction* be given by the person to whom a permit is issued under section 8 of the Act:

(a) commencement of *construction* of the *building*,

(b) substantial completion of structural framing for each *storey*, if the *building* is a type of *building* that is within the scope of Division B, other than Part 9,

(c) commencement of *construction* of,

(i) masonry fireplaces and masonry *chimneys*,

(ii) factory-built fireplaces and allied *chimneys*, or

(iii) *stoves*, ranges, *space heaters* and add-on *furnaces* using solid fuels and allied *chimneys*,

(d) substantial completion of interior finishes,

(e) substantial completion of heating, ventilating, *air-conditioning* and air-contaminant extraction equipment,

(f) substantial completion of exterior cladding,

(g) substantial completion of site grading,

(h) substantial completion of the pool deck and dressing rooms for a *public pool* or *public spa* and readiness for inspection of the emergency stop system for a *public pool* or *public spa*,

(i) completion and availability of drawings of the *building* as constructed, and

(j) completion of a *building* for which an occupancy permit is required under Article 1.3.3.4. or 1.3.3.5.

1.3.5.3. Prescribed Inspections

(1) Except as provided in Sentence (2), an *inspector* or *registered code agency*, as the case may be, shall, not later than two days after receipt of a notice given under Sentence 1.3.5.1.(2), undertake a site inspection of the *building* to which the notice relates.

(2) Where a notice given under Sentence 1.3.5.1.(2) relates to matters described in Clause 1.3.5.1.(2)(l) or (m), an *inspector* or *registered code agency*, as the case may be, shall, not later than five days after receipt of the notice, undertake a site inspection of the *sewage system* to which the notice relates.

(3) When undertaking an inspection required under Sentence (1) or (2), the *inspector* or *registered code agency*, as the case may be, may consider reports concerning whether the *building* or a part of the *building* complies with the Act or this Code.

(4) The time periods referred to in Sentences (1) and (2) shall begin on the day following the day on which the notice is given.

(5) The time periods referred to in Sentences (1) and (2) shall not include Saturdays, holidays and all other days when the offices of the *principal authority* are not open for the transaction of business with the public.

1.3.5.4. Construction of Sewage Systems

(1) The following information is prescribed for the purposes of subsection 15.12 (3) of the Act and must be provided to the *chief building official* before the commencement of the *construction* of a *sewage system*:

(a) the information described in Sentence 3.3.4.1.(2) as it relates to,

(i) the person registered under Article 3.3.3.2., and

(ii) the person with the qualifications described in Clause 3.3.3.2.(1)(a) who will supervise *construction* on-site of the *sewage system*, and

(b) the name and telephone number of the representative of the person described in Subclause (a)(i) who may be contacted by the *chief building official* in respect of the *construction* of the *sewage system*.

1.3.5.5. Orders

(1) An order issued under subsection 12 (2), 13 (1) or (6), 14 (1) or 15.10.1 (2) or clause 18 (1) (f) of the Act shall be in a form approved by the *Minister*.

1.3.6. As Constructed Plans

1.3.6.1. Application

(1) Where a by-law, resolution or regulation has been made by a *principal authority* under clause 7 (1) (g) of the Act, the *chief building official* may require that *as constructed plans* for the whole of, or any part or system of, a *building* or any class of *buildings* be provided by the persons responsible for the *construction*.

Section 1.4. Search Warrant

1.4.1. Forms

1.4.1.1. Information & Warrant Forms

(1) An information to obtain a warrant to enter and search a *building*, receptacle or place under subsection 21 (1) of the Act shall be in Form 1.4.1.1.A.

(2) A warrant to enter and search a *building*, receptacle or place under subsection 21 (1) of the Act shall be in Form 1.4.1.1.B.

FORM 1.4.1.1.A.

Section 1.5. Designated Persons and Powers

1.5.1. General

1.5.1.1. General

(1) The *director* and employees in the Ministry of Municipal Affairs and Housing who work under the supervision of the *director* and are specified by the *director* are designated for the purposes of the enforcement of the Act and this Code in relation to the qualifications of,

(a) *chief building officials*,

(b) *inspectors*,

(c) *registered code agencies*,

(d) persons engaging in the activities described in subsection 15.11 (5) of the Act, and

(e) persons engaged in the business of *constructing* on site, installing, repairing, servicing, cleaning or emptying *sewage systems*.

(2) The *director* may, for the purposes set out in Sentence (1), exercise the following powers under the Act of a *chief building official*:

(a) certify for the purposes of subsection 37 (2) of the Act statements as to any matter of record in the office of the *director*, and

(b) apply for an order under section 38 of the Act.

(3) The employees in the Ministry of Municipal Affairs and Housing designated by the *director* may, for the purposes set out in Sentence (1), exercise the following powers under the Act of an *inspector*:

(a) subject to section 16 of the Act, exercise the powers of entry for inspection purposes in subsection 12 (1) of the Act, and

(b) exercise the powers of an *inspector* under section 18 of the Act.

(4) Sections 15.23 and 19 of the Act apply to the exercise of powers under this Article by the *director* and employees in the Ministry of Municipal Affairs and Housing designated by the *director*.

Section 1.6. Prescribed Person

1.6.1. General

1.6.1.1. General

(1) The *director* is prescribed for the purposes of section 38.1 of the Act.

Section 1.7. Enforcement of the Provisions of the Act and this Code Related to Sewage Systems

1.7.1. General

1.7.1.1. General

(1) The boards of health and conservation authorities listed in Column 1 of Table 1.7.1.1. are prescribed, for the purposes of subsection 3.1 (1) of the Act, as the boards of health and conservation authorities that are responsible for the enforcement of the provisions of the Act and this Code related to *sewage systems* in the *municipalities* and territory without municipal organization prescribed in Column 2 of Table 1.7.1.1.

Table 1.7.1.1.
Enforcement of the provisions of the Act and this Code Related to Sewage Systems

Forming Part of Sentence 1.7.1.1.(1)

Item	Column 1	Column 2
	Board of Health or Conservation Authority	Geographic Area
1.	Board of Health of the Northwestern Health Unit	All *municipalities* and territory without municipal organization located in the Northwestern Health Unit
2.	Board of Health of the Thunder Bay District Health Unit	All *municipalities* and territory without municipal organization located in the Thunder Bay District Health Unit
3.	Board of Health of the Porcupine Health Unit	All *municipalities* and territory without municipal organization located in the Porcupine Health Unit
4.	Board of Health of the Algoma Health Unit	All *municipalities* and territory without municipal organization located in the Algoma Health Unit
5.	Board of Health of the Sudbury and District Health Unit	All *municipalities* and territory without municipal organization located in the Sudbury and District Health Unit
6.	Board of Health of the Timiskaming Health Unit	All *municipalities* and territory without municipal organization located in the Timiskaming Health Unit
7.	North Bay-Mattawa Conservation Authority	All *municipalities* and territory without municipal organization located in: a. the District of Nipissing, except those parts of the District of Nipissing located in the Timiskaming Health Unit, and b. the District of Parry Sound, except for the Township of The Archipelago, the geographic Townships of Blair, Brown, Harrison, Henvey, Mowat and Wallbridge and the unsurveyed territory north of the geographic Township of Henvey to the French River.

Section 1.8. Language

1.8.1. Language

1.8.1.1. Language Used on Required Signs

(1) All required signs in this Code shall be displayed in the English language or in the English and French languages, including operational material on all life safety equipment and devices.

Section 1.9. Fees

1.9.1. Fees

1.9.1.1. Annual Report

(1) The report referred to in subsection 7 (4) of the Act shall contain the following information in respect of fees authorized under clause 7 (1) (c) of the Act:

(a) total fees collected in the 12-month period ending no earlier than three months before the release of the report,

(b) the direct and indirect costs of delivering services related to the administration and enforcement of the Act in the area of jurisdiction of the *principal authority* in the 12-month period referred to in Clause (a),

(c) a breakdown of the costs described in Clause (b) into at least the following categories:

(i) direct costs of administration and enforcement of the Act, including the review of applications for permits and inspection of *buildings*, and

(ii) indirect costs of administration and enforcement of the Act, including support and overhead costs, and

(d) if a reserve fund has been established for any purpose relating to the administration or enforcement of the Act, the amount of the fund at the end of the 12-month period referred to in Clause (a).

(2) The *principal authority* shall give notice of the preparation of a report under subsection 7 (4) of the Act to every person and organization that has requested that the *principal authority* provide the person or organization with such notice and has provided an address for the notice.

1.9.1.2. Change of Fees

(1) Before passing a by-law or resolution or making a regulation under clause 7 (1) (c) of the Act to introduce or change a fee imposed for applications for a permit, for the issuance of a permit or for a maintenance inspection, a *principal authority* shall,

(a) hold the public meeting required under subsection 7 (6) of the Act,

(b) ensure that a minimum of 21 days notice of the public meeting is given in accordance with Clause (c), including giving 21 days notice to every person and organization that has, within five years before the day of the public meeting, requested that the *principal authority* provide the person or organization with such notice and has provided an address for the notice,

(c) ensure that the notice under Clause (b),

(i) sets out the intention of the *principal authority* to pass the by-law or resolution or make a regulation under section 7 of the Act and whether the by-law, resolution or regulation would impose any fee that was not in effect on the day the notice is given or would change any fee that was in force on the day the notice is given,

(ii) is sent by regular mail to the last address provided by the person or organization that requested the notice in accordance with Clause (b), and

(iii) sets out the information described in Clause (d) or states that the information will be made available at no cost to any member of the public upon request, and

(d) make the following information available to the public:

(i) an estimate of the costs of administering and enforcing the Act by the *principal authority*,

(ii) the amount of the fee or of the change to the existing fee, and

(iii) the rationale for imposing or changing the fee.

Section 1.10. Sewage System Maintenance Inspection Programs

1.10.1. Discretionary Maintenance Inspection Programs

1.10.1.1. Scope

(1) This Subsection governs, for the purposes of subsection 34 (2.1) of the Act, *maintenance inspection programs* established under clause 7 (1) (b.1) of the Act in respect of *sewage systems*.

1.10.1.2. Application and Inspections

(1) A *maintenance inspection program* referred to in Sentence 1.10.1.1.(1) shall apply to all *sewage systems* in the area affected by the *maintenance inspection program*.

(2) A *maintenance inspection program* referred to in Sentence 1.10.1.1.(1) shall provide that, subject to Article 1.10.1.3., an *inspector* shall inspect all *sewage systems* affected by the *maintenance inspection program* for compliance with the standards prescribed under clause 34 (2) (b) of the Act in relation to *sewage systems* that are enforced by the program.

1.10.1.3. Certificate as Alternative to Maintenance Inspection

(1) A *principal authority* that establishes a *maintenance inspection program* in respect of *sewage systems* may, as an alternative to conducting an inspection of a *sewage system* required under Sentence 1.10.1.2.(2) accept a certificate described in Sentence (2) from the owner of the property on which the *sewage system* is located.

(2) The certificate referred to in Sentence (1) shall,

(a) be in a form approved by the *Minister*,

(b) be signed by a person described in Sentence (3), and

(c) confirm that the person,

(i) has conducted an inspection of the *sewage system* to which the certificate relates, and

(ii) is satisfied on reasonable grounds that, on the date on which the certificate is signed, the *sewage system* to which the certificate relates is in compliance with the standards prescribed under clause 34 (2) (b) of the Act in relation to *sewage systems* that are enforced by the *maintenance inspection program*.

(3) Subject to Sentence (4), the following persons are authorized to sign a certificate referred to in Sentence (1):

(a) a person registered under Article 3.2.4.2. in the class of registration set out in Column 1 of Item 10 of Table 3.5.2.1.,

(b) a person registered under Article 3.3.3.2.,

(c) an *architect*,

(d) a *professional engineer*.

(4) A person shall not sign a certificate referred to in Sentence (1) if the person would be in a conflict of interest.

(5) For the purposes of Sentence (4), a person would be in a conflict of interest if the person, or an officer, director, partner or employee of the person (where the person is a corporation or partnership), or any person engaged by the person to perform functions for the person,

(a) has participated or participates, in any capacity, in *design activities* or *construction* relating to any part of the *sewage system* to which the certificate relates,

(b) is or has been employed within the previous 180 days by a person who carried out *design activities* or *construction* relating to any part of the *sewage system* to which the certificate relates,

(c) has a professional or financial interest in,

(i) the *construction* of the *sewage system* to which the certificate relates,

(ii) the *sewage system* to which the certificate relates, or

(iii) the person responsible for the design of the *sewage system* to which the certificate relates, or

(d) is an elected official, officer or employee of a *principal authority*.

1.10.2. Mandatory Maintenance Inspection Program

1.10.2.1. Scope

(1) This Subsection establishes and governs, for the purposes of subsection 34 (2.2) of the Act, a *maintenance inspection program* in respect of standards prescribed under clause 34 (2) (b) of the Act in relation to *sewage systems*.

1.10.2.2. Administration of Maintenance Inspection Program

(1) The *principal authority* that has jurisdiction in an area affected by the *maintenance inspection program* established under Sentence 1.10.2.3.(1) shall administer the program for that area and shall conduct inspections under the program in accordance with this Subsection.

1.10.2.3. Maintenance Inspection Program

(1) Subject to Article 1.10.2.5., an *inspector* shall inspect all *sewage systems* located in whole or in part in the areas set out in Sentence (2) for compliance with the requirements of Section 8.9. of Division B.

(2) The areas referred to in Sentence (1) are:

(a) the strip of land that is located along the *Lake Simcoe shoreline* and that is 100 m wide measured horizontally and perpendicular to and upland from the *Lake Simcoe shoreline*, except for the portions of the strip of land that are described in Sentence (3),

(a.1) portions of the strip of land along the *Lake Simcoe shoreline* described in Sentence (3),

(a.2) the strip of land that is located along each of the following rivers, streams, lakes or ponds and that is 100 m wide measured horizontally and perpendicular to and upland from the river, stream, lake or pond,

(i) any river or stream in the *Lake Simcoe watershed* that continually flows in an average year,

(ii) any lake or pond in the *Lake Simcoe watershed* that is connected on the surface to a river or stream described in Subclause (i), and

(iii) any other lake or pond in the *Lake Simcoe watershed* that has a surface area greater than 8 hectares, and

(b) areas within a *vulnerable area* that are located in a *source protection area* and that are identified in the most recent of the following documents as the areas where an activity described in Sentence (4) is or would be a *significant drinking water threat*:

(i) the assessment report for the *source protection area*, as initially approved under the *Clean Water Act, 2006* or as most recently approved following any updating under that Act, or

(ii) the *source protection plan* for the *source protection area*, as initially approved under the *Clean Water Act, 2006* or as most recently approved following any amendments or reviews under that Act.

(3) The excepted portions of the strip of land along the *Lake Simcoe shoreline* referred to in Clause (2)(a) are:

(a) that portion of the strip of land in the geographic Township of Oro, now in the municipal Township of Oro-Medonte, in the County of Simcoe, and in the geographic Townships of Innisfil and Vespra, now in the City of Barrie, being bounded on the north by the east limit of Lot 1, Concession 1 East Penetanguishene Road of the said geographic Township of Oro and its southerly prolongation and on the south by the east limit of Lot 14, Concession 13 of the said geographic Township of Innisfil and its northerly prolongation,

(b) that portion of the strip of land in the geographic Townships of North Gwillimbury and Georgina, now in the Town of Georgina, and in the geographic Township of East Gwillimbury, now in the Town of East Gwillimbury, all in The Regional Municipality of York, being bounded on the west by the west limit of Lot 6, Concession 1 of the said geographic Township of North Gwillimbury and its northerly prolongation and on the east by the east limit of Lot 3, Concession 8 of the said geographic Township of Georgina and its northerly prolongation, and

(c) that portion of the strip of land in the geographic Township of Mara, now in the municipal Township of Ramara, in the County of Simcoe, and in the geographic Township of Thorah, now in the municipal Township of Brock, in The Regional Municipality of Durham, being bounded on the north by the west limit of Lot 13, Concession C of the said geographic Township of Mara and its southerly prolongation and on the south by the west limit of Lot 14, Concession 6 of the said geographic Township of Thorah and its northerly prolongation.

(4) The activity referred to in Clause (2)(b) is an activity that is subject to the Act and that is described in paragraph 2 of subsection 1.1 (1) of Ontario Regulation 287/07 (General) made under the *Clean Water Act, 2006*.

1.10.2.4. Time Periods for Maintenance Inspections

(1) An inspection required under Sentence 1.10.2.3.(1) shall be conducted in respect of a *sewage system* in an area described in Clause 1.10.2.3.(2)(a),

(a) initially, no later than,

(i) January 1, 2016, in the case of a *sewage system constructed* before January 1, 2011, or

(ii) five years after the *construction* of the *sewage system*, in the case of a *sewage system constructed* on or after January 1, 2011, and

(b) thereafter, every five years after the most recent inspection of the *sewage system* has been conducted.

(1.1) An inspection required under Sentence 1.10.2.3.(1) shall be conducted in respect of a *sewage system* in an area described in Clause 1.10.2.3.(2)(a.1) or (a.2),

(a) initially, no later than,

(i) January 1, 2021, in the case of a *sewage system constructed* before January 1, 2016, or

(ii) five years after the *construction* of the *sewage system*, in the case of a *sewage system constructed* on or after January 1, 2016, and

(b) thereafter, every five years after the most recent inspection of the *sewage system* has been conducted.

(2) An inspection required under Sentence 1.10.2.3.(1) shall be conducted in respect of a *sewage system* in an *area affected by a significant drinking water threat*,

(a) initially, no later than,

(i) five years after the date on which notice of the approval of one of the following documents is published on the environmental registry under the *Clean Water Act, 2006*, in the case of a *sewage system constructed* before the date of publication,

(A) the assessment report for the *source protection area*, if the *source protection plan* is one prepared under section 22 of the *Clean Water Act, 2006*, or

(B) the *source protection plan* for the *source protection area*, if the *source protection plan* is one prepared under section 26 or 33 of the *Clean Water Act, 2006*, or

(ii) five years after the *construction* of the *sewage system*, in the case of a *sewage system constructed* on or after the date of publication, and

(b) thereafter, every five years after the most recent inspection of the *sewage system* has been conducted.

(3) If additional *areas affected by a significant drinking water threat* are identified for a *source protection area* after the date of publication referred to in Clause (2)(a), an inspection required under Sentence 1.10.2.3.(1) shall be conducted in respect of a *sewage system* in those additional areas,

(a) initially, no later than,

(i) five years after the following date of approval or publication, as applicable, in the case of a *sewage system constructed* before that date,

(A) the date of approval under section 19 of the *Clean Water Act, 2006* of the updated assessment report in which the additional areas are identified, or

(B) the date of publication on the environmental registry under the *Clean Water Act, 2006* of notice of the approval of the amended or updated *source protection plan* in which the additional areas are identified, or

(ii) five years after the *construction* of the *sewage system*, in the case of a *sewage system constructed* on or after the date of approval or publication, as applicable, and

(b) thereafter, every five years after the most recent inspection of the *sewage system* has been conducted.

1.10.2.5. Certificate as Alternative to Maintenance Inspection

(1) The *principal authority* that administers the *maintenance inspection program* established under Sentence 1.10.2.3.(1), may, as an alternative to conducting an inspection of a *sewage system* required under Sentence 1.10.2.3.(1), accept a certificate described in Sentence (2) from the owner of the property on which the *sewage system* is located.

(2) The certificate required by Sentence (1) shall satisfy the requirements of Sentence 1.10.1.3.(2) and for these purposes Sentences 1.10.1.3.(3) to (5) apply with necessary modifications.

Section 2.1. Alternative Solutions

2.1.1. Documentation of Alternative Solutions

2.1.1.1. Documentation

(1) The person proposing the use of an *alternative solution* shall provide documentation to the *chief building official* or *registered code agency* that,

(a) identifies applicable *objectives*, *functional statements* and *acceptable solutions*, and

(b) establishes on the basis of past performance, tests described in Article 2.1.1.2. or other evaluation that the proposed *alternative solution* will achieve the level of performance required under Article 1.2.1.1. of Division A.

(2) The documentation described in Sentence (1) shall include information about relevant assumptions, limiting or restricting factors, testing procedures, studies or *building* performance parameters, including any commissioning, operational and maintenance requirements.

2.1.1.2. Tests

(1) Where no published test method to establish the suitability of an *alternative solution* proposed under Article 2.1.1.1. exists, then the tests used for the purposes of that Article shall be designed to simulate or exceed anticipated service conditions or shall be designed to compare the performance of the material or system with a similar material or system that is known to be acceptable.

(2) The results of tests or evaluations based on test standards, other than as described in this Code, may be used for the purposes of Sentence (1), if the alternate test standards provide comparable results.

Section 2.2. Building Code Commission

2.2.1. Hearings

2.2.1.1. Divisions

(1) The Building Code Commission may sit in two or more divisions simultaneously so long as a quorum of each division is present.

2.2.1.2. Single Member

(1) One member of the Building Code Commission may, with the approval of the chair or vice-chair, hear and determine any dispute set out in Sentence (2) and, for that purpose, the member has all the jurisdiction and powers of the Commission.

(2) The disputes referred to in Sentence (1) are,

(a) any dispute described in clause 24 (1) (a) of the Act respecting the sufficiency of compliance with technical requirements of this Code related to *sewage systems*, and

(b) any dispute described in clause 24 (1) (b) or (c) of the Act.

2.2.1.3. Time Period

(1) A hearing to decide a dispute described in Clause 2.2.1.2.(2)(b) shall be held not more than five days after the Commission receives an application for a hearing in a form approved by the Commission.

(2) The time period described in Sentence (1) commences on the day after the Commission receives the application and excludes Saturdays, holidays and all other days when the offices of the Government of Ontario are not open for the transaction of business with the public.

2.2.1.4. Eligibility

(1) The following relationships to a *registered code agency* are prescribed for the purposes of clause 23 (3) (d) of the Act as relationships to a *registered code agency* that make a person ineligible to be a member of the Commission:

(a) the person is registered under Article 3.4.3.2. as a *registered code agency*,

(b) the person is an officer, director, partner or employee of a *registered code agency*, or

(c) the person is engaged by a *registered code agency* to perform functions under the Act on behalf of the *registered code agency*.

2.2.1.5. Application Fee

(1) The fee on an application to the Building Code Commission under subsection 24 (1.1) of the Act is,

(a) $170, for 2014, and

(b) the amount determined in accordance with Sentences (2) and (3) rounded to the nearest dollar, for 2015 and subsequent calendar years.

(2) On and after January 1, 2015, the fee for a calendar year is the fee for the previous calendar year adjusted by the percentage change from year to year in the Consumer Price Index for Ontario (All-Items) as reported monthly by Statistics Canada under the authority of the *Statistics Act* (Canada), averaged over the 12-month period that ends on March 31 of the previous calendar year, rounded to the first decimal point.

(3) Despite Sentence (2), if the percentage change results in a negative amount, the fee for a calendar year shall remain at the same level as the previous calendar year.

Section 2.3. Building Materials Evaluation Commission

2.3.1. Application Fee

2.3.1.1. Application Fee

(1) The fee on an application to the Building Materials Evaluation Commission is,

(a) $5,000, for 2015,

(b) $7,000, for 2016,

(c) $9,000, for 2017, and

(d) $11,000, for 2018 and subsequent calendar years.

Section 2.4. Rulings and Interpretations

2.4.1. Minister's Rulings — Innovative Materials, Systems or Building Designs

2.4.1.1. Designated Materials Evaluation Bodies

(1) The following body is designated as a materials evaluation body for the purposes of clause 29 (1) (a) of the Act:

Canadian Construction Materials Centre of the National Research Council of Canada

2.4.1.2. Fee

(1) The fee on a request for a ruling under clause 29 (1) (a) of the Act is,

(a) $560, for 2014, and

(b) the amount determined in accordance with Sentences (2) and (3) rounded to the nearest dollar, for 2015 and subsequent calendar years.

(2) On and after January 1, 2015, the fee for a calendar year is the fee for the previous calendar year adjusted by the percentage change from year to year in the Consumer Price Index for Ontario (All-Items) as reported monthly by Statistics Canada under the authority of the *Statistics Act* (Canada), averaged over the 12-month period that ends on March 31 of the previous calendar year, rounded to the first decimal point

averaged over the 12-month period that ends on March 31 of the previous calendar year, rounded to the first decimal point.

(3) Despite Sentence (2), if the percentage change results in a negative amount, the fee for a calendar year shall remain at the same level as the previous calendar year.

2.4.2. Minister's Rulings — Alternative Materials, Systems or Building Designs

2.4.2.1. Criteria

(1) Sentence (2) sets out criteria to be followed by the *Minister* when making a ruling under clause 29 (1) (c) of the Act to approve the use of an alternative material, system or *building* design.

(2) The *Minister's* approval of the use of an alternative material, system or *building* design referred to in Sentence (1) may be granted only if the approval is consistent with,

(a) a decision of the Building Code Commission in respect of a dispute described in clause 24 (1) (a) of the Act,

(b) an approval of the use of the material, system or *building* design in the whole of another province or territory in accordance with the law of that province or territory, or

(c) a revision of the CCBFC NRCC 53301, "National Building Code of Canada", or the CCBFC NRCC 53302, "National Plumbing Code of Canada", that has been approved by the Canadian Commission on Building and Fire Codes.

2.4.3. Interpretations By Minister

2.4.3.1. Interpretations By Minister

(1) Every interpretation issued by the *Minister* under section 28.1 of the Act shall be made available to the public,

(a) by posting the interpretation on the *Building Code website*, and

(b) by providing a written copy of the interpretation on receipt of a request for it.

Section 3.1. Qualifications for Chief Building Officials and Inspectors

3.1.1. Scope and Definition

3.1.1.1. Scope

(1) Except as provided in Sentence (2), this Section prescribes, for the purposes of subsections 15.11 (1), (2) and (3) of the Act,

(a) the qualifications that a person must satisfy to be appointed and to remain appointed as,

(i) a *chief building official* under the Act, or

(ii) an *inspector* who has the same powers and duties as a *chief building official* in relation to *plumbing*,

(b) the qualifications that a person must satisfy to be appointed and to remain appointed as,

(i) an *inspector* who has the same powers and duties as a *chief building official* in relation to *sewage systems*, or

(ii) an *inspector* whose duties include plans review or inspection of *sewage systems* under the Act, and

(c) the qualifications that a person must satisfy to be appointed and to remain appointed as an *inspector* under the Act, other than an *inspector* described in Subclause (a)(ii) or (b)(i) or (ii).

(2) The qualification requirements for *chief building officials* and *inspectors* in Sentence (1) do not apply to plans review and inspection of,

(a) site services including,

(i) surface drainage, and

(ii) *plumbing* located underground either outside a *building* or under a *building*,

(b) *construction* of a factory-built house certified to CSA A277, “Procedure for Factory Certification of Buildings”,

(c) *construction* of a mobile home conforming to CSA Z240 MH Series, “Manufactured Homes”,

(d) *construction* of a park model trailer conforming to CAN/CSA-Z241 Series, “Park Model Trailers”, or

(e) signs.

3.1.1.2. Definition

(1) In this Section,

“registered” means registered under Sentence 3.1.2.2.(1), 3.1.3.2.(1) or 3.1.4.2.(1), as applicable.

3.1.2. Chief Building Officials

3.1.2.1. Qualifications

(1) The following are prescribed as qualifications for a person to be appointed and to remain appointed under the Act as a *chief building official* or as an *inspector* who has the same powers and duties as a *chief building official* in relation to *sewage systems* or *plumbing*:

(a) the person must be registered with the *director*.

(2) A registration shall be in a form established by the *director*.

(3) A person who was qualified on December 31, 2014 under Sentence 3.1.2.1.(1), as it read on that date, is deemed to have the qualification set out in Sentence (1) until the earlier of,

(a) the day the person is registered under Sentence 3.1.2.2.(1), and

(b) March 31, 2015.

3.1.2.2. Registration and Renewal of a Registration

(1) Subject to Article 3.1.5.7., the *director* may register an applicant, or renew a registration, if,

(a) the applicant or registered person has successfully completed the examination program administered or authorized by the Ministry of Municipal Affairs and Housing relating to the person's knowledge of the Act and this Code and the powers and duties of *chief building officials*,

(b) the applicant or registered person also has the qualification set out in Sentence 3.1.4.1.(1), in the case of an applicant or registered person who, under subsection 22 (2) of the Act, will also exercise any of the powers or perform any of the duties of an *inspector*,

(c) the application is complete, and

(d) all fees required under Article 3.1.5.3. are paid.

(2) For the purposes of a registration or a renewal of a registration, a person who was qualified on December 31, 2014 under Sentence 3.1.2.1.(1), as it read on that date, is deemed to have the qualifications set out in Clause (1)(a).

(3) If a person is given notice of a knowledge maintenance examination either after December 31, 2014 under Sentence 3.1.5.6.(1) or, on or before December 31, 2014, under Sentence 3.1.5.1.(2), as it read on that date, and does not successfully complete the knowledge maintenance examination referred in the notice by the end of the eighteenth month following the month in which the *director* gives notice of the knowledge maintenance examination to the person, Sentence (2) ceases to apply to the person at the end of that period.

3.1.3. Supervisors and Managers

3.1.3.1. Qualifications

(1) The following are prescribed as qualifications for a person to be appointed and to remain appointed under the Act as an *inspector* whose duties are solely the supervision or management of *inspectors*:

(a) the person must be registered with the *director*.

(2) A registration shall be in a form established by the *director*.

(3) A person who was qualified on December 31, 2014 under Sentence 3.1.3.1.(1), as it read on that date, is deemed to have the qualification set out in Sentence (1) until the earlier of,

(a) the day the person is registered under Sentence 3.1.3.2.(1), and

(b) March 31, 2015.

3.1.3.2. Registration and Renewal of a Registration

(1) Subject to Article 3.1.5.7., the *director* may register an applicant, or renew a registration, if,

(a) the applicant or registered person has successfully completed the examination program administered or authorized by the Ministry of Municipal Affairs and Housing relating to the person's knowledge of the Act and this Code and the powers and duties of *chief building officials*,

(b) the applicant or registered person has successfully completed the examination program administered or authorized by the Ministry of Municipal Affairs and Housing relating to the person's knowledge of the Act and this Code in any one category of qualification set out in Column 2 of Table 3.5.2.1.,

(c) the application is complete, and

(d) all fees required under Article 3.1.5.3. are paid.

(2) For the purposes of a registration or a renewal of a registration, a person who was qualified on December 31, 2014 under Sentence 3.1.3.1.(1), as it read on that date, is deemed to have the qualifications set out in Clauses (1)(a) and (b).

(3) If a person is given notice of a knowledge maintenance examination that relates to the subject matter of an examination program referred to in Clause (1)(a) or (b), as applicable, either after December 31, 2014 under Sentence 3.1.5.6.(1) or, on or before December 31, 2014, under Sentence 3.1.5.1.(2), as it read on that date, and does not successfully complete the knowledge maintenance examination referred in the notice by the end of the eighteenth month following the month in which the *director* gives notice of the knowledge maintenance examination to the person, Sentence (2) ceases to apply to the person at the end of that period with respect to the qualifications set out in Clause (1)(a) or (b), as applicable.

3.1.4. Inspectors

3.1.4.1. Qualifications

(1) Except as provided in Article 3.1.4.3. or 3.1.4.4., the following are prescribed as qualifications for a person to be appointed and to remain appointed under the Act as an *inspector* whose duties include plans review or inspection under the Act:

(a) the person must be registered with the *director*.

(2) A registration shall be in a form established by the *director*.

(3) A person who was qualified on December 31, 2014 under Sentence 3.1.4.1.(1) in a category of qualification set out in Column 2 of Table 3.5.2.1., as they read on that date,

is deemed to be registered in the class of registration that corresponds to that category of qualification until the earlier of,

(a) the day the person is registered in that class of registration under Sentence 3.1.4.2.(1), and

(b) March 31, 2015.

3.1.4.2. Registration and Renewal of a Registration

(1) Subject to Article 3.1.5.7., the *director* may register an applicant, or renew a registration, in each class of registration applied for, if,

(a) the applicant or registered person has successfully completed the examination program administered or authorized by the Ministry of Municipal Affairs and Housing relating to the person's knowledge of the Act and this Code in the category of qualification set out in Column 2 of Table 3.5.2.1. that corresponds to each class of registration set out in Column 1 of Table 3.5.2.1. for which application is made,

(b) the application is complete, and

(c) all fees required under Article 3.1.5.3. are paid.

(2) For the purposes of a registration or a renewal of a registration in a class of registration, a person who was qualified on December 31, 2014 under Sentence 3.1.4.1.(1) in a category of qualification set out in Column 2 of Table 3.5.2.1., as they read on that date, is deemed to have the qualifications set out in Clause (1)(a) in that category of qualification.

(3) If a person is given notice of a knowledge maintenance examination that relates to the subject matter of an examination program in the category of qualification either after December 31, 2014 under Sentence 3.1.5.6.(1) or, on or before December 31, 2014, under Sentence 3.1.5.1.(2), as it read on that date, and does not successfully complete the knowledge maintenance examination referred in the notice by the end of the eighteenth month following the month in which the *director* gives notice of the knowledge maintenance examination to the person, Sentence (2) ceases to apply to the person at the end of that period.

3.1.4.3. Qualifications for Intern Inspectors

(1) A person may be appointed or remain appointed under the Act as an intern *inspector* whose duties include supervised plans review or inspection under the Act, even if the person does not have the qualification set out in Article 3.1.4.1., provided the person is enrolled in an internship program approved by the *Minister*.

(2) An intern *inspector* who is exempt under Sentence (1) shall be supervised by an *inspector* or *chief building official* who is registered in the class of registration in respect of which the intern *inspector* will exercise the powers or perform the duties.

(3) An intern *inspector* who is exempt under Sentence (1) shall not,

(a) issue orders under the Act except orders under subsection 12 (2) or 13 (1) of the Act, or

(b) undertake a site inspection of a *building* related to a notice in respect of,

(i) substantial completion of footings and *foundations* prior to commencement of backfilling, or

(ii) completion of *construction* and installation of components required to permit the issuance of an occupancy permit under Sentence 1.3.3.1.(3), 1.3.3.4.(4) or 1.3.3.5.(3) or to permit occupancy under Sentence 1.3.3.2.(1), if the *building* or part of the *building* to be occupied is not fully completed.

3.1.4.4. Qualifications for Maintenance Program Inspectors

(1) A person may be appointed or remain appointed under the Act as an *inspector* whose duties include *maintenance inspections* of *sewage systems*, even if the person does not have the qualification set out in Article 3.1.4.1. in respect of these duties.

(2) An *inspector* who is exempt under Sentence (1) is authorized to conduct *maintenance inspections* of *sewage systems* only if the following conditions are met:

(a) the person is supervised by an *inspector* or *chief building official* who is registered in the class of registration described in Column 1 of Item 10 of Table 3.5.2.1., and

(b) the person does not issue orders under the Act.

3.1.5. Qualifications — Chief Building Officials, Supervisors and Managers, and Inspectors

3.1.5.1. Application for Registration or Renewal of a Registration

(1) An application for registration or renewal of a registration shall be made to the *director* in a form established by the *director*.

(2) An application for renewal of a registration shall be made at least 60 days before the expiry of the registration to be renewed.

(3) An application for registration or renewal of a registration shall include an undertaking by the applicant or registered person to comply with the conditions set out in Article 3.1.5.5.

(4) An application for registration or renewal of a registration shall,

(a) set out the applicant's or registered person's name, residence address, residential mailing address, if different from the residence address, and email address, if applicable,

(b) set out the name and address of every *principal authority* that has appointed the person as a *chief building official* or *inspector* under the Act, and

(c) contain evidence, provided by the applicant or registered person, that the applicant or registered person has the qualifications set out in Clauses 3.1.2.2.(1)(a) and (b), 3.1.3.2.(1)(a) and (b), or 3.1.4.2.(1)(a), as applicable.

3.1.5.2. Term

(1) A registration expires one year after it is issued but the *director* may, for the purposes of staggering the renewal dates of the registrations, issue the initial registration for a term of not less than 90 days and not more than 18 months.

3.1.5.3. Fees

(1) The fee payable for an application to take an examination that is part of an examination program referred to in Clause 3.1.2.2.(1)(a), 3.1.3.2.(1)(a) or (b) or 3.1.4.2.(1)(a) is $150.

(2) The fee for a registration or renewal of a registration is,

(a) $105, for 2015, and

(b) the amount determined in accordance with Sentences (3) and (4) rounded to the nearest dollar, for 2016 and subsequent calendar years.

(3) On and after January 1, 2016, the fee for a calendar year is the fee for the previous calendar year adjusted by the percentage change from year to year in the Consumer Price Index for Ontario (All-Items) as reported monthly by Statistics Canada under the authority of the *Statistics Act* (Canada), averaged over the 12-month period that ends on March 31 of the previous calendar year, rounded to the first decimal point.

(4) Despite Sentence (3), if the percentage change results in a negative amount, the fee for a calendar year shall remain at the same level as the previous calendar year.

3.1.5.4. Not Transferable

(1) A registration is not transferable.

3.1.5.5. Conditions

(1) The following are the conditions of a registration:

(a) the registered person shall, within 15 days after the event, notify the *director* in writing of any change in the information set out in Clause 3.1.5.1.(4)(a) or (b),

(b) in the case of a registered person who is given notice of a knowledge maintenance examination under Sentence 3.1.5.6.(1), the person shall successfully complete the knowledge maintenance examination referred to in the notice by the end of the eighteenth month following the month in which the *director* gives notice of the knowledge maintenance examination to the person, and

(c) in the case of an *inspector* registered under Sentence 3.1.4.2.(1), the person shall exercise his or her powers and perform his or her duties only in respect of the type of *buildings* described in Column 3 of Table 3.5.2.1. that correspond to the class or classes of registration held by the person.

3.1.5.6. Knowledge Maintenance

(1) The *director* shall give notice of a knowledge maintenance examination administered or authorized by the Ministry of Municipal Affairs and Housing in respect of changes described in Sentence (2) that relate to the subject matter of an examination program referred to in Clause 3.1.2.2.(1)(a), 3.1.3.2.(1)(a) or (b) or 3.1.4.2.(1)(a), as applicable, to every person who, on December 31, 2013, has the qualifications set out in Sentence 3.1.2.1.(1), 3.1.3.1.(1) or 3.1.4.1.(1), as applicable, of Division C of Ontario Regulation 350/06 (Building Code) made under the Act.

(2) The changes referred to in Sentence (1) are changes made to the Act and Ontario Regulation 350/06 from December 31, 2006 to December 31, 2013 and changes made at the time that regulation is replaced by this Code on January 1, 2014.

(3) The *director* may give the notice referred to in Sentence (1) by sending it,

(a) by regular mail to the last address of the person that has been filed with the *director*, or

(b) by email to the last email address of the person that has been filed with the *director*.

3.1.5.7. Suspension, Revocation, Refusal to Register or Renew a Registration

(1) The *director* may, in the circumstances set out in Sentence (2),

(a) refuse to register an applicant or to renew a registration, or

(b) suspend or revoke a registration.

(2) The circumstances referred to in Sentence (1) are,

(a) the registered person is in breach of a condition of the registration,

(b) the registration was issued on the basis of mistaken, false or incorrect information,

(c) an order under subsection 69 (2) of the *Provincial Offences Act* is in effect directing that the registration of the person be suspended and that no registration be issued to that person until a fine is paid,

(d) the application is incomplete, or

(e) any fees required under Article 3.1.5.3. remain unpaid.

(3) If the *director* proposes to refuse to register or renew a registration or proposes to suspend or revoke a registration, the *director* shall serve a notice of the proposal, together with the reasons for it, on the applicant or registered person.

(4) A notice under Sentence (3) shall state that the applicant or registered person is entitled to a hearing before the *Tribunal* if the applicant or registered person, within 15 days after service of the notice referred to in Sentence (3), serves the *director* and the *Tribunal* with notice in writing requesting a hearing.

(5) If the applicant or registered person does not request a hearing by the *Tribunal* in accordance with Sentence (4), the *director* may carry out the proposal stated in the notice under Sentence (3).

(6) If the applicant or registered person requests a hearing before the *Tribunal* in accordance with Sentence (4), the *Tribunal* shall appoint a time for and hold a hearing and may by order direct the *director* to carry out the *director's* proposal or refrain from carrying it out and to take such other action as the *Tribunal* considers the *director* ought to take in accordance with the Act and this Code, and for those purposes, the *Tribunal* may substitute its opinion for that of the *director*.

(7) The *director*, the applicant or registered person who requested the hearing, and such other persons as the *Tribunal* may specify, are parties to proceedings before the *Tribunal*.

(8) Sentences (3) to (7) do not apply and the *director* may cancel the registration of a registered person upon receipt of a request in writing for cancellation from the registered person in a form established by the *director*.

(9) If, within the time period set out in Sentence 3.1.5.1.(2), the registered person has applied for renewal of a registration and paid the fee required under Article 3.1.5.3., the registration is deemed to continue until the earlier of,

(a) the day the registration is renewed, and

(b) if the registered person is served with notice that the *director* proposes to refuse to renew the registration, the day the time for giving notice requesting a hearing expires or, if a hearing is held, the day the *Tribunal* makes its order.

3.1.6. Public Register

3.1.6.1. Public Register

(1) The *director* shall establish and maintain a register available to the public that lists every person who has the qualifications required by subsections 15.11 (1), (2) and (3) of the Act and has been appointed as a *chief building official* or *inspector* by a *principal authority*.

(2) The register referred to in Sentence (1) shall contain the following information with respect to each registered person:

(a) the name of the registered person,

(b) any identifying number assigned by the *director* to the registered person,

(c) the name and address of each *principal authority* that has appointed the registered person as a *chief building official* or *inspector*, and

(d) the classes of registration of the registered person.

3.1.7. Classes of Registration and Categories of Qualifications

3.1.7.1. Classes and Categories

(1) Table 3.5.2.1. contains the classes of registration and categories of qualifications for the purposes of this Section.

Section 3.2. Qualifications for Designers

3.2.1. Scope

3.2.1.1. Scope

(1) This Section prescribes, for the purposes of clause 8 (2) (c) and subsection 15.11 (5) of the Act, the qualifications for a person who carries out *design activities*.

3.2.2.2. Other Designers

(1) Every person who carries out *design activities* must have the qualification set out in Sentence 3.2.5.1.(1), if the person is not required to have the qualification set out in Sentence 3.2.4.1.(1).

3.2.3. Definition

3.2.3.1. Definition

(1) "Registered" means,

(a) in Subsection 3.2.4., registered under Sentence 3.2.4.2.(1), and

(b) in Subsection 3.2.5., registered under Sentence 3.2.5.2.(1).

3.2.4. Qualifications – Persons Engaged in the Business of Providing Design Activities to the Public

3.2.4.1. General

(1) Except as provided in Sentences (3) and (4), every person engaged in the business of providing *design activities* to the public must have the following qualification:

(a) the person must be registered with the *director*.

(2) A registration shall be in a form established by the *director*.

(3) A person is exempt from the requirement to comply with the qualification in Sentence (1), if the person's *design activities* relate only to,

(a) *construction* of a home as defined under the *Ontario New Home Warranties Plan Act* that will be constructed or sold by that person, if the person is a builder or vendor as defined in that Act and is registered under that Act,

(b) *construction* of a *building* that is owned by that person,

(c) *construction* of a *farm building* that,

(i) is of *low human occupancy*,

(ii) is 2 *storeys* or less in *building height*, and

(iii) has a *building area* of less than 600 m^2,

(d) the extension, material alteration or repair of a detached house, semi-detached house, townhouse or row house containing not more than two *dwelling units* in each house,

(e) a *sewage system* to be constructed by that person if the person is registered under Article 3.3.3.2.,

(f) *construction* of tents described in Sentence 3.14.1.2.(2) of Division B,

(g) *construction* of signs,

(h) *construction* of site services, including,

(i) surface drainage, and

(ii) *plumbing* located underground, either outside a *building* or under a *building*,

(i) *construction* of a factory-built house certified to CSA A277, "Procedure for Factory Certification of Buildings",

(j) *construction* of a mobile home conforming to CSA Z240 MH Series, "Manufactured Homes",

(k) *construction* of a park model trailer conforming to CAN/CSA-Z241 Series, "Park Model Trailers",

(l) *construction* of pre-engineered elements of a *building*, if the design of the elements is carried out by a person competent in the specific discipline appropriate to the circumstances,

(m) *construction* of appliances, equipment and similar incidental components of a *building*, or

(n) *construction* of a *building* for which a permit under section 8 of the Act is applied for or issued before January 1, 2006 and for which *construction* is commenced within six months after the permit is issued.

(4) A person is exempt from the requirements to comply with the qualification in Sentence (1), if the person's *design activities* are with respect to a detached house, semi-detached house, townhouse or row house containing not more than two *dwelling units* in each house and the *design activities* relate only to,

(a) a *plumbing* system,

(b) a heating, ventilation and *air-conditioning* system, or

(c) ancillary *buildings* such as garages.

3.2.4.2. Registration and Renewal of a Registration

(1) Subject to Articles 3.2.4.9. and 3.2.4.10., the *director* may register an applicant, or renew a registration, in each class of registration applied for, if,

(a) the applicant or registered person or, if the applicant or registered person is a corporation or partnership, a director, officer, partner or employee of the applicant or registered person, has successfully completed the examination program administered or authorized by the Ministry of Municipal Affairs and Housing relating to the person's knowledge of the Act and this Code in the category of qualification set out in Column 2 of Table 3.5.2.1. that corresponds to each class of registration set out in Column 1 of Table 3.5.2.1. for which application is made,

(b) all other persons engaged by the applicant or registered person who will review and take responsibility for *design activities* provided to the public by the applicant or registered person for the purposes of Clause 3.2.4.7.(1)(d) have successfully completed the examination program administered or authorized by the Ministry of Municipal Affairs and Housing relating to the person's knowledge of the Act and this Code in the category of qualification set out in Column 2 of Table 3.5.2.1. that corresponds to each class of registration set out in Column 1 of Table 3.5.2.1. for which application is made,

(c) the applicant or registered person is covered by the insurance required under Subsection 3.6.2. during the term of the registration applied for,

(d) the application is complete, and

(e) all fees required under Article 3.2.4.5. are paid.

(2) Subject to Articles 3.2.4.9. and 3.2.4.10., a person who, on December 31, 2013, is registered in a class of registration under Sentence 3.2.4.2.(1) of Division C of Ontario Regulation 350/06 (Building Code) made under the Act and complies with the conditions of registration set out in Article 3.2.4.7. of Division C of that regulation is deemed to be registered in the class of registration under Sentence 3.2.4.2.(1) of this Code, and for these purposes, the person's registration in the class of registration is deemed to continue until its term expires.

(3) For the purposes of a registration or a renewal of a registration, a person who, on December 31, 2013, has the qualifications set out in Clause 3.2.4.2.(1)(a) or (b), as applicable, of Division C of Ontario Regulation 350/06 in a class of registration is deemed to have the qualifications set out in Clause 3.2.4.2.(1)(a) or (b), as applicable, of this Code, in the class of registration, but ceases to be deemed to have these qualifications if the person does not successfully complete a knowledge maintenance examination as required under Subclause 3.2.4.7.(1)(d)(i) or (ii), as applicable.

3.2.4.3. Application for Registration or Renewal of a Registration

(1) An application for registration or renewal of a registration shall be made to the *director* in a form established by the *director*.

(2) An application for renewal of a registration shall be made at least 60 days before the expiry of the registration to be renewed.

(3) An application for registration or renewal of a registration shall include an undertaking by the applicant or registered person to comply with the conditions set out in Article 3.2.4.7.

(4) If a partnership or a corporation is the applicant for registration or renewal of a registration, the application shall set out the names and residence addresses of all its partners, directors or officers, as the case may be.

(5) An application for registration or renewal of a registration shall contain the names of all partners, directors, officers or employees of the applicant or registered person, as the case may be, and all other persons engaged by the applicant or registered person, who,

(a) have the qualifications set out in Clause 3.2.4.2.(1)(a) in the class or classes of registration for which the application is made, and

(b) have the qualifications set out in Clause 3.2.4.2.(1)(b) and will review and take responsibility for the *design activities* provided to the public by the applicant or registered person in the class or classes of registration for which the application is made.

(6) An application for registration or renewal of a registration shall contain evidence, provided by the applicant or registered person, that the persons referred to in Sentence (5) have the qualifications set out in Clause 3.2.4.2.(1)(a) or (b).

(7) An application for registration or renewal of a registration shall contain evidence, provided by the applicant or registered person in such form and in such detail as may be required by the *director*, that the applicant or registered person is covered by the insurance required under Subsection 3.6.2. during the term of the registration applied for.

3.2.4.4. Term

(1) A registration expires one year after it is issued but the *director* may, for the purposes of staggering the renewal dates of the registrations, issue the initial registration for a term of not less than 90 days and not more than 18 months.

3.2.4.5. Fees

(1) The fee payable for an application to take an examination that is part of an examination program referred to in Clause 3.2.4.2.(1)(a) or (b) is $150.

(2) The fee for a registration is,

(a) $165, for 2015, and

(b) the amount determined in accordance with Sentences (5) and (6) rounded to the nearest dollar, for 2016 and subsequent calendar years.

(3) The fee for the addition of a new class of registration is,

(a) $35, for 2015, and

(b) the amount determined in accordance with Sentences (5) and (6) rounded to the nearest dollar, for 2016 and subsequent calendar years.

(4) The fee for renewal of a registration is,

(a) $125, for 2015, and

(b) the amount determined in accordance with Sentences (5) and (6) rounded to the nearest dollar, for 2016 and subsequent calendar years.

(5) On and after January 1, 2016, the fee for a calendar year is the fee for the previous calendar year adjusted by the percentage change from year to year in the Consumer Price Index for Ontario (All-Items) as reported monthly by Statistics Canada under the authority of the *Statistics Act* (Canada), averaged over the 12-month period that ends on March 31 of the previous calendar year, rounded to the first decimal point.

(6) Despite Sentence (5), if the percentage change results in a negative amount, the fee for a calendar year shall remain at the same level as the previous calendar year.

3.2.4.6. Not Transferable

(1) A registration is not transferable.

3.2.4.7. Conditions

(1) The following are the conditions of a registration:

(a) the registered person shall carry out *design activities* only in respect of the type of *buildings* described in Column 3 of Table 3.5.2.1. that correspond to the class or classes of registration held by the registered person,

(b) if the registered person is a corporation or partnership, there must throughout the term of the registration be an officer, director, partner or employee of the registered person who has the qualifications set out in Clause 3.2.4.2.(1)(a) for each class of registration set out in Column 1 of Table 3.5.2.1. that is held by the registered person,

(c) the registered person shall ensure that a person who has the qualifications set out in Clause 3.2.4.2.(1)(a) or (b) in respect of the class of registration set out in Column 1 of Table. 3.5.2.1. to which the *design activities* relate will review and take responsibility for *design activities* in each class of registration that are provided to the public by the registered person,

(d) by the end of the eighteenth month following the month in which the *director* gives notice of a notice of a knowledge maintenance examination to the registered person under Sentence 3.2.4.8.(1), the registered person shall ensure that the following persons have successfully completed the knowledge maintenance examination referred to in the notice:

(i) the registered person and the persons described in Clause (b) who are deemed under Sentence 3.2.4.2.(3) to have the qualifications set out in Clause 3.2.4.2.(1)(a) in the class of registration to which the notice relates, and

(ii) persons described in Clause (c) who are deemed under Sentence 3.2.4.2.(3) to have the qualifications set out in Clause 3.2.4.2.(1)(b) in respect of the class of registration to which the notice relates and who will review and take responsibility for *design activities* provided to the public by the registered person in the class of registration,

(e) the registered person shall ensure that a person described in Clause (c) who reviews and takes responsibility for *design activities* provided to the public by the registered person shall include the following information on any document submitted to a *chief building official* or *registered code agency* in the circumstances set out in subsection 15.11 (5) of the Act:

(i) the name of the registered person and any registration number issued to the registered person by the *director*,

(ii) a statement that the person has reviewed and taken responsibility for the *design activities*,

(iii) the person's name and any identifying number issued to the person by the *director* in respect of the qualifications described in Clause 3.2.4.2.(1)(a) or (b) that the person has, and

(iv) the person's signature,

(f) the registered person shall, during the term of the registration, be covered by the insurance required under Subsection 3.6.2.,

(g) the registered person shall, within 15 days after the event, notify the *director* in writing of,

(i) any change in address of the registered person for correspondence relating to the registration, and

(ii) any change in the information set out in Sentences 3.2.4.3.(4) and (5),

(h) the registered person shall give prompt written notice to the *director* of any material change in any of the information, other than the information referred to in Clause (g), that is contained in or accompanies an application for registration or renewal of a registration,

(i) the registered person shall, from time to time, at the registered person's expense, give the *director* such documents or information relating to the registration or to activities carried out under the registration as the *director* may reasonably require, and

(j) the registered person shall allow the representatives of the *director* access to the registered person's books and records during normal business hours for the purpose of confirming matters related to the registration.

3.2.4.8. Knowledge Maintenance

(1) The *director* shall give notice of a knowledge maintenance examination administered or authorized by the Ministry of Municipal Affairs and Housing in respect of changes described in Sentence (2) that relate to the subject matter of an examination program referred to in Clause 3.2.4.2.(1)(a) or (b) to every person who is registered under Sentence 3.2.4.2.(1) in a class of registration to which the knowledge maintenance examination relates.

(2) The changes referred to in Sentence (1) are changes made to the Act and Ontario Regulation 350/06 (Building Code) from December 31, 2006 to December 31, 2013 and changes made at the time that regulation is replaced by this Code on January 1, 2014.

(3) The *director* may give the notice referred to in Sentence (1) by sending it,

(a) by regular mail to the last address of the registered person that has been filed with the *director*, or

(b) by email to the last email address of the registered person that has been filed with the *director*.

3.2.4.9. Suspension, Revocation, Refusal to Register or Renew a Registration

(1) The *director* may, in the circumstances set out in Sentence (2),

(a) refuse to register an applicant or to renew a registration, or

(b) suspend or revoke a registration.

(2) The circumstances referred to in Sentence (1) are,

(a) the registered person is in contravention of the Act or this Code,

(b) the registered person is in breach of a condition of the registration other than the condition set out in Clause 3.2.4.7.(1)(f),

(c) the registration was issued on the basis of mistaken, false or incorrect information,

(d) the *director* is of the opinion that the past conduct of the applicant or registered person or, if the applicant or registered person is a partnership or a corporation, the partners, officers or directors of the applicant or registered person, as the case may be, affords reasonable grounds for belief that the business that would be or is authorized by the registration will not be carried on in accordance with law,

(e) the application is incomplete, or

(f) any fees required under Article 3.2.4.5. remain unpaid.

(3) If the *director* proposes to refuse to register or renew a registration or proposes to suspend or revoke a registration under Sentence (1), the *director* shall serve a notice of the proposal, together with the reasons for it, on the applicant or registered person.

(4) A notice under Sentence (3) shall state that the applicant or registered person is entitled to a hearing before the *Tribunal* if the applicant or registered person, within 15

days after service of the notice referred to in Sentence (3), serves the *director* and the *Tribunal* with notice in writing requesting a hearing.

(5) If the applicant or registered person does not request a hearing by the *Tribunal* in accordance with Sentence (4), the *director* may carry out the proposal stated in the notice under Sentence (3).

(6) If the applicant or registered person requests a hearing before the *Tribunal* in accordance with Sentence (4), the *Tribunal* shall appoint a time for and hold a hearing and may by order direct the *director* to carry out the *director's* proposal or refrain from carrying it out and to take such other action as the *Tribunal* considers the *director* ought to take in accordance with the Act and this Code, and for those purposes the *Tribunal* may substitute its opinion for that of the *director*.

(7) The *director*, the applicant or registered person who requested the hearing, and such other persons as the *Tribunal* may specify, are parties to proceedings before the *Tribunal*.

(8) Sentences (3) to (7) do not apply and the *director* may cancel the registration of a registered person upon receipt of a request in writing for cancellation from the registered person in a form established by the *director*.

(9) If, within the time period set out in Sentence 3.2.4.3.(2), the registered person has applied for renewal of a registration, paid the fee required under Article 3.2.4.5. and provided evidence satisfactory to the *director* that the registered person is covered by insurance required under Subsection 3.6.2. for the term of the renewal of the registration, the registration is deemed to continue until the earliest of,

(a) the day the registration is renewed,

(b) if the registered person is served with notice that the *director* proposes to refuse to renew the registration, the day the time for giving notice requesting a hearing expires or, if a hearing is held, the day the *Tribunal* makes its order, and

(c) the day when the registered person ceases to be covered by the insurance required under Subsection 3.6.2.

3.2.4.10. Mandatory Suspension or Revocation of Registration or Refusal to Register or Renew Registration

(1) The *director* shall, in the circumstances set out in Sentence (2),

(a) refuse to register an applicant,

(b) refuse to renew a registration, or

(c) suspend or revoke a registration.

(2) The circumstances referred to in Sentence (1) are that,

(a) the applicant or registered person is not covered by the insurance required under Subsection 3.6.2., or

(b) an order under subsection 69 (2) of the *Provincial Offences Act* is in effect directing that the registration of the person be suspended and no registration be issued to the person until a fine is paid.

(3) If the *director* refuses to register an applicant, refuses to renew a registration or suspends or revokes a registration under Sentence (1), the *director* shall serve a notice of the refusal, suspension or revocation, together with the reasons for it, on the applicant or registered person.

(4) A suspension or revocation of a registration under Sentence (1) takes effect immediately and the commencement of a proceeding before the *Tribunal* does not stay the operation of the suspension or revocation of the registration.

(5) A notice under Sentence (3) shall state that the applicant or registered person is entitled to a hearing before the *Tribunal* if the applicant or registered person, within 15 days after service of the notice referred to in Sentence (3), serves the *director* and the *Tribunal* with notice in writing requesting a hearing.

(6) The *Tribunal* may, on the application of the registered person, stay the operation of a decision of the *director* to suspend or revoke the registration, and may grant the stay subject to conditions.

(7) If the applicant or registered person requests a hearing before the *Tribunal* in accordance with Sentence (5), the *Tribunal* shall appoint a time for and hold a hearing and may by order confirm, alter or revoke the decision of the *director* to refuse to register or to suspend or revoke the registration, as the case may be, and may take such action as the *Tribunal* considers the *director* ought to take in accordance with the Act and this Code, and for those purposes the *Tribunal* may substitute its opinion for that of the *director*.

(8) The *director*, the applicant or registered person who requested the hearing, and such other persons as the *Tribunal* may specify, are parties to proceedings before the *Tribunal*.

3.2.5. Qualifications — Other Designers

3.2.5.1. General

(1) Except as provided in Sentence (3), a person who carries out *design activities* but is not required under Sentence 3.2.4.1.(1) to be registered with the *director* under Sentence 3.2.4.2.(1) must have the following qualification:

(a) the person must be registered with the *director* under Sentence 3.2.5.2.(1).

(2) A registration shall be in a form established by the *director*.

(3) A person is exempt from the requirement to comply with the qualification in Sentence (1), if his or her *design activities* relate only to,

(a) *design activities* in respect of which a person described in Clause 3.2.4.7.(1)(c) or who has the qualification required under Sentence (1) will review and take responsibility,

(b) *construction* of,

(i) a detached house, semi-detached house, townhouse or row house owned by the person and containing not more than two *dwelling units* in each house, or

(ii) an ancillary *building* that serves a *building* described in Subclause (i),

(c) *construction* of a *farm building* that,

(i) is of *low human occupancy*,

(ii) is 2 *storeys* or less in *building height*, and

(iii) has a *building area* of less than 600 m^2,

(d) a *sewage system* to be *constructed* by that person and,

(i) the person is registered under Article 3.3.3.2., or

(ii) the *sewage system* is owned by the person,

(e) *construction* of tents described in Sentence 3.14.1.2.(2) of Division B,

(f) *construction* of signs,

(g) *construction* of site services including,

(i) surface drainage, and

(ii) *plumbing* located underground, either outside a *building* or under a *building*,

(h) *construction* of pre-engineered elements of a *building*, if the design of the elements is carried out by a person competent in the specific discipline appropriate to the circumstances,

(i) *construction* of appliances, equipment and similar incidental components of a *building*,

(j) *construction* of an ancillary *building*,

(i) that serves a detached house, semi-detached house, townhouse or row house if the house contains not more than two *dwelling units*, and

(ii) that has a *building area* of not more than 55 m^2, or

(k) *construction* of a *building* for which a permit under section 8 of the Act is applied for or issued before January 1, 2006 and for which *construction* is commenced within six months after the permit is issued.

(4) A person who was qualified on December 31, 2014 under Sentence 3.2.5.1.(1) in a category of qualification set out in Column 2 of Table 3.5.2.1., as they read on that date, is deemed to be registered in the class of registration that corresponds to that category of qualification until the earlier of,

(a) the day the person is registered in that class of registration under Sentence 3.2.5.2.(1), and

(b) March 31, 2015.

3.2.5.2. Registration and Renewal of a Registration

(1) Subject to Article 3.2.5.8., the *director* may register an applicant, or renew a registration, in each class of registration applied for, if,

(a) the applicant or registered person has successfully completed the examination program administered or authorized by the Ministry of Municipal Affairs and Housing relating to the person's knowledge of the Act and this Code in the category

of qualification set out in Column 2 of Table 3.5.2.1. that corresponds to each class of registration set out in Column 1 of Table 3.5.2.1. for which application is made.

(b) the application is complete, and

(c) all fees required under Article 3.2.5.5. are paid.

(2) For the purposes of a registration or a renewal of a registration in a class of registration, a person who was qualified on December 31, 2014 under Clauses 3.2.5.1.(1)(a) and (b) in a category of qualification set out in Column 2 of Table 3.5.2.1., as they read on that date, is deemed to have the qualifications set out in Clause (1)(a) in that category of qualification.

(3) If a person is given notice of a knowledge maintenance examination that relates to the subject matter of an examination program in the category of qualification either after December 31, 2014 under Sentence 3.2.5.7.(1) or, on or before December 31, 2014, under Sentence 3.2.5.2.(2), as it read on that date, and does not successfully complete the knowledge maintenance examination referred in the notice by the end of the eighteenth month following the month in which the *director* gives notice of the knowledge maintenance examination to the person, Sentence (2) ceases to apply to the person at the end of that period.

3.2.5.3. Application for Registration or Renewal of a Registration

(1) An application for registration or renewal of a registration shall be made to the *director* in a form established by the *director*.

(2) An application for renewal of a registration shall be made at least 60 days before the expiry of the registration to be renewed.

(3) An application for registration or renewal of a registration shall include an undertaking by the applicant or registered person to comply with the conditions set out in Article 3.2.5.6.

(4) An application for registration or renewal of a registration shall,

(a) set out the applicant's or registered person's name, residence address, residential mailing address, if different from the residence address, and email address, if applicable, and

(b) contain evidence, provided by the applicant or registered person, that the applicant or registered person has the qualifications set out in Clause 3.2.5.2.(1)(a).

3.2.5.4. Term

(1) A registration expires one year after it is issued but the *director* may, for the purposes of staggering the renewal dates of the registrations, issue the initial registration for a term of not less than 90 days and not more than 18 months.

3.2.5.5. Fees

(1) The fee payable for an application to take an examination that is part of an examination program referred to in Clause 3.2.5.2.(1)(a) is $150.

(2) The fee for a registration or renewal of a registration is,

(a) $105, for 2015, and

(b) the amount determined in accordance with Sentences (3) and (4) rounded to the nearest dollar, for 2016 and subsequent calendar years.

(3) On and after January 1, 2016, the fee for a calendar year is the fee for the previous calendar year adjusted by the percentage change from year to year in the Consumer Price Index for Ontario (All-Items) as reported monthly by Statistics Canada under the authority of the *Statistics Act* (Canada), averaged over the 12-month period that ends on March 31 of the previous calendar year, rounded to the first decimal point.

(4) Despite Sentence (3), if the percentage change results in a negative amount, the fee for a calendar year shall remain at the same level as the previous calendar year.

3.2.5.6. Conditions

(1) The following are the conditions of a registration:

(a) the registered person shall carry out *design activities* only in respect of the type of *buildings* described in Column 3 of Table 3.5.2.1. that correspond to the class or classes of registration held by the registered person,

(b) in the case of a registered person who is given notice of a knowledge maintenance examination under Sentence 3.2.5.7.(1), the person shall successfully complete the knowledge maintenance examination referred to in the notice by the end of the eighteenth month following the month in which the *director* gives notice of the knowledge maintenance examination to the person,

(c) the registered person shall, within 15 days after the event, notify the *director* in writing of any change in the information set out in Clause 3.2.5.3.(4)(a),

(d) the registered person shall include the following information on any document respecting *design activities* that the person has reviewed and taken responsibility for and that is submitted to a *chief building official* or *registered code agency* in the circumstances set out in subsection 15.11 (5) of the Act:

(i) the person's name and any identifying number assigned to the person by the *director* in respect of the person's registration,

(ii) a statement that the person has reviewed and taken responsibility for the *design activities*, and

(iii) the person's signature.

3.2.5.7. Knowledge Maintenance

(1) The *director* shall give notice of a knowledge maintenance examination administered or authorized by the Ministry of Municipal Affairs and Housing in respect of changes described in Sentence (2) that relate to the subject matter of an examination program referred to in Clause 3.2.5.2.(1)(a) to every person who, on December 31, 2013, has the qualifications set out in Clauses 3.2.5.1.(1)(a) and (b) of Division C of Ontario Regulation 350/06 (Building Code) made under the Act.

(2) The changes referred to in Sentence (1) are changes made to the Act and Ontario Regulation 350/06 from December 31, 2006 to December 31, 2013 and changes made at the time that regulation is replaced by this Code on January 1, 2014.

(3) The *director* may give the notice referred to in Sentence (1) by sending it,

(a) by regular mail to the last address of the person that has been filed with the *director*, or

(b) by email to the last email address of the person that has been filed with the *director*.

3.2.5.8. Suspension, Revocation, Refusal to Register or Renew a Registration

(1) The *director* may, in the circumstances set out in Sentence (2),

(a) refuse to register an applicant or to renew a registration, or

(b) suspend or revoke a registration.

(2) The circumstances referred to in Sentence (1) are,

(a) the registered person is in breach of a condition of the registration,

(b) the registration was issued on the basis of mistaken, false or incorrect information,

(c) an order under subsection 69 (2) of the *Provincial Offences Act* is in effect directing that the registration of the person be suspended and that no registration be issued to that person until a fine is paid,

(d) the application is incomplete, or

(e) any fees required under Article 3.2.5.5. remain unpaid.

(3) If the *director* proposes to refuse to register or renew a registration or proposes to suspend or revoke a registration, the *director* shall serve a notice of the proposal, together with the reasons for it, on the applicant or registered person.

(4) A notice under Sentence (3) shall state that the applicant or registered person is entitled to a hearing before the *Tribunal* if the applicant or registered person, within 15 days after service of the notice referred to in Sentence (3), serves the *director* and the *Tribunal* with notice in writing requesting a hearing.

(5) If the applicant or registered person does not request a hearing by the *Tribunal* in accordance with Sentence (4), the *director* may carry out the proposal stated in the notice under Sentence (3).

(6) If the applicant or registered person requests a hearing before the *Tribunal* in accordance with Sentence (4), the *Tribunal* shall appoint a time for and hold a hearing and may by order direct the *director* to carry out the *director's* proposal or refrain from carrying it out and to take such other action as the *Tribunal* considers the *director* ought to take in accordance with the Act and this Code, and for those purposes, the *Tribunal* may substitute its opinion for that of the *director*.

(7) The *director*, the applicant or registered person who requested the hearing, and such other persons as the *Tribunal* may specify, are parties to proceedings before the *Tribunal*.

(8) Sentences (3) to (7) do not apply and the *director* may cancel the registration of a registered person upon receipt of a request in writing for cancellation from the registered person in a form established by the *director*.

(9) If, within the time period set out in Sentence 3.2.5.3.(2), the registered person has applied for renewal of a registration and paid the fee required under Article 3.2.5.5., the registration is deemed to continue until the earlier of,

(a) the day the registration is renewed, and

(b) if the registered person is served with notice that the *director* proposes to refuse to renew the registration, the day the time for giving notice requesting a hearing expires or, if a hearing is held, the day the *Tribunal* makes its order.

3.2.6. Public Register

3.2.6.1. Public Register

(1) The *director* shall establish and maintain a register available to the public that lists every person who has the qualifications required by clause 8 (2) (c) and subsection 15.11 (5) of the Act.

(2) The register referred to in Sentence (1) shall contain the following information with respect to every person registered under Sentence 3.2.4.2.(1):

(a) the name of the registered person,

(b) any identifying number assigned by the *director* to the registered person,

(c) the business address of the registered person,

(d) the classes of registration of the registered person,

(e) the names of the person or persons who will review and take responsibility for *design activities* carried out by the registered person in each class of registration, and

(f) any identifying number assigned by the *director* to the person or persons referred to in Clause (e).

(3) The register referred to in Sentence (1) shall contain the following information with respect to every person registered under Sentence 3.2.5.2.(1):

(a) the name of the registered person,

(b) any identifying number assigned by the *director* to the registered person, and

(c) the classes of registration of the registered person.

3.2.7. Classes of Registration and Categories of Qualifications

3.2.7.1. Classes and Categories

(1) Table 3.5.2.1. contains the classes of registration and categories of qualifications for the purposes of this Section.

Section 3.3. Qualifications for Persons Engaged in the Business of Constructing On Site, Installing, Repairing, Servicing, Cleaning or Emptying Sewage Systems

3.3.1. Scope

3.3.1.1. Scope

(1) This Section prescribes, for the purposes of subsection 15.12 (1) of the Act, the qualifications for persons engaged in the business of *constructing* on site, installing, repairing, servicing, cleaning or emptying *sewage systems*.

3.3.2. Definition

3.3.2.1. Definition

(1) In this Section,

"registered" means registered under Sentence 3.3.3.2.(1).

3.3.3. Qualifications

3.3.3.1. General

(1) Persons engaged in the business of *constructing* on site, installing, repairing, servicing, cleaning or emptying *sewage systems* shall have the following qualification:

(a) the person must be registered with the *director*.

(2) A registration shall be in a form established by the *director*.

(3) A person is exempt from the requirement to comply with the qualification in Sentence (1) in respect of the activities of cleaning and emptying *sewage systems* if,

(a) the person has been issued,

(i) before October 31, 2011, a certificate of approval under section 39 of the *Environmental Protection Act* in respect of these activities, or

(ii) on or after October 31, 2011, an environmental compliance approval under the *Environmental Protection Act* in respect of these activities, and

(b) the certificate of approval or the environmental compliance approval, as applicable, has not been suspended or revoked under that Act.

3.3.3.2. Registration and Renewal of a Registration

(1) Subject to Article 3.3.3.9., the *director* may register an applicant, or renew a registered person's registration, if,

(a) all persons who will supervise the *construction* on site, installation, repair, servicing, cleaning or emptying of *sewage systems* carried out by the applicant or registered person have successfully completed the examination program administered or authorized by the Ministry of Municipal Affairs and Housing relating to the person's knowledge of the Act, this Code and the *construction*, maintenance and operation of *sewage systems*,

(b) the application is complete, and

(c) all fees required under Article 3.3.3.5. are paid.

(2) Subject to Article 3.3.3.9., a person who, on December 31, 2013, is registered under Sentence 3.3.3.2.(1) of Division C of Ontario Regulation 350/06 (Building Code) made under the Act and complies with the conditions of registration set out in Article 3.3.3.7. of Division C of that regulation is deemed to be registered under Sentence 3.3.3.2.(1) of this Code, and for these purposes, the person's registration is deemed to continue until its term expires.

(3) For the purposes of a registration or a renewal of a registration, a person who, on December 31, 2013, has the qualifications set out in Clause 3.3.3.2.(1)(a) of Division C of Ontario Regulation 350/06 is deemed to have the qualifications set out in Clause 3.3.3.2.(1)(a) of this Code, but ceases to be deemed to have these qualifications if the

person does not successfully complete a knowledge maintenance examination as required under Clause 3.3.3.7.(1)(b).

3.3.3.3. Application for Registration or Renewal of a Registration

(1) An application for registration or renewal of a registration shall be made to the *director* in a form established by the *director*.

(2) An application for renewal of a registration shall be made at least 60 days before the expiry of the registration to be renewed.

(3) An application for registration or renewal of a registration shall include an undertaking by the applicant or registered person to comply with the conditions set out in Article 3.3.3.7.

(4) If a partnership or a corporation is the applicant for registration or renewal of a registration, the application shall set out the names and residence addresses of all its partners, directors or officers, as the case may be.

(5) An application for registration or renewal of a registration shall contain the names of all partners, directors, officers or employees of the applicant or registered person, as the case may be, and all other persons engaged by the applicant or registered person, who,

(a) have the qualifications set out in Clause 3.3.3.2.(1)(a), and

(b) will supervise the *construction* on site, installation, repair, servicing, cleaning or emptying of *sewage systems* to be carried out by the applicant or registered person.

(6) An application for registration or renewal of a registration shall contain evidence, provided by the applicant or registered person, that the persons referred to in Sentence (5) have the qualifications set out in Clause 3.3.3.2.(1)(a).

3.3.3.4. Term

(1) A registration expires one year after the date of its issuance.

(2) Despite Sentence (1), a registration expires three years after the date of its issuance, if the application for registration or renewal of a registration is made before January 1, 2015.

3.3.3.5. Fees

(1) The fee payable for an application to take an examination that is part of an examination program referred to in Clause 3.3.3.2.(1)(a) is $150.

(2) The fee for a registration or renewal of a registration is,

(a) $105, for 2015, and

(b) the amount determined in accordance with Sentences (3) and (4) rounded to the nearest dollar, for 2016 and subsequent calendar years.

(3) On and after January 1, 2016, the fee for a calendar year is the fee for the previous calendar year adjusted by the percentage change from year to year in the Consumer Price Index for Ontario (All-Items) as reported monthly by Statistics Canada under the authority of the *Statistics Act* (Canada), averaged over the 12-month period that ends on March 31 of the previous calendar year, rounded to the first decimal point.

(4) Despite Sentence (3), if the percentage change results in a negative amount, the fee for a calendar year shall remain at the same level as the previous calendar year.

3.3.3.6. Not Transferable

(1) A registration is not transferable.

3.3.3.7. Conditions

(1) The following are the conditions of a registration:

(a) the registered person shall ensure that the *construction* on site, installation, repair, servicing, cleaning or emptying of *sewage systems* carried out by the registered person is supervised by a person who has the qualifications set out in Clause 3.3.3.2.(1)(a),

(b) by the end of the eighteenth month following the month in which the *director* gives notice of a knowledge maintenance examination to the registered person under Sentence 3.3.3.8.(1), the registered person shall ensure that persons who are deemed under Sentence 3.3.3.2.(3) to have the qualifications set out in Clause 3.3.3.2.(1)(a) and who will supervise the *construction* on site, installation, repair, servicing, cleaning or emptying of *sewage systems* carried out by the registered person have successfully completed the knowledge maintenance examination referred to in the notice,

(c) the registered person shall, within 15 days after the event, notify the *director* in writing of,

(i) any change in address of the registered person for correspondence relating to the registration, and

(ii) any change in the information set out in Sentences 3.3.3.3.(4) and (5),

(d) the registered person shall give prompt written notice to the *director* of any material change in any of the information, other than the information referred to in Clause (c), that is contained in or accompanies an application for registration or renewal of a registration,

(e) the registered person shall, from time to time, at the registered person's expense, give the *director* such documents or information relating to the registration or to activities carried out under the registration as the *director* may reasonably require, and

(f) the registered person shall allow the representatives of the *director* access to the registered person's books and records during normal business hours for the purpose of confirming matters related to the registration.

3.3.3.8. Knowledge Maintenance

(1) The *director* shall give notice of a knowledge maintenance examination administered or authorized by the Ministry of Municipal Affairs and Housing in respect of changes described in Sentence (2) that relate to the subject matter of an examination program referred to in Clause 3.3.3.2.(1)(a) to every person who is registered under Sentence 3.3.3.2.(1).

(2) The changes referred to in Sentence (1) are changes made to the Act and Ontario Regulation 350/06 (Building Code) from December 31, 2006 to December 31, 2013 and changes made at the time that regulation is replaced by this Code on January 1, 2014.

(3) The *director* may give the notice referred to in Sentence (1) by sending it,

(a) by regular mail to the last address of the registered person that has been filed with the *director*, or

(b) by email to the last email address of the registered person that has been filed with the *director*.

3.3.3.9. Suspension, Revocation, Refusal to Register or Renew a Registration

(1) The *director* may, in the circumstances set out in Sentence (2),

(a) refuse to register an applicant or to renew a registration, or

(b) suspend or revoke a registration.

(2) The circumstances referred to in Sentence (1) are,

(a) the registered person is in contravention of the Act or this Code,

(b) the registered person is in breach of a condition of the registration,

(c) the registration was issued on the basis of mistaken, false or incorrect information,

(d) the *director* is of the opinion that the past conduct of the applicant or registered person or, if the applicant or registered person is a partnership or a corporation, the partners, officers or directors of the applicant or registered person, as the case may be, affords reasonable grounds for belief that the business that would be or is authorized by the registration will not be carried on in accordance with law,

(e) an order under subsection 69 (2) of the *Provincial Offences Act* is in effect directing that the registration of the person be suspended and that no registration be issued to that person until a fine is paid,

(f) the application is incomplete, or

(g) any fees required under Article 3.3.3.5. remain unpaid.

(3) If the *director* proposes to refuse to register or renew a registration or proposes to suspend or revoke a registration, the *director* shall serve a notice of the proposal, together with the reasons for it, on the applicant or registered person.

(4) A notice under Sentence (3) shall state that the applicant or registered person is entitled to a hearing before the *Tribunal* if the applicant or registered person, within 15 days after service of the notice referred to in Sentence (3), serves the *director* and the *Tribunal* with notice in writing requesting a hearing.

(5) If the applicant or registered person does not request a hearing by the *Tribunal* in accordance with Sentence (4), the *director* may carry out the proposal stated in the notice under Sentence (3).

(6) If the applicant or registered person requests a hearing before the *Tribunal* in accordance with Sentence (4), the *Tribunal* shall appoint a time for and hold a hearing and may by order direct the *director* to carry out the *director's* proposal or refrain from

carrying it out and to take such other action as the *Tribunal* considers the *director* ought to take in accordance with the Act and this Code, and for those purposes the *Tribunal* may substitute its opinion for that of the *director*.

(7) The *director*, the applicant or registered person who requested the hearing, and such other persons as the *Tribunal* may specify, are parties to proceedings before the *Tribunal*.

(8) Sentences (3) to (7) do not apply and the *director* may cancel the registration of a registered person upon receipt of a request in writing for cancellation from the registered person in a form established by the *director*.

(9) If, within the time period set out in Sentence 3.3.3.3.(2), the registered person has applied for renewal of a registration and paid the fee required under Article 3.3.3.5., the registration is deemed to continue until the earlier of,

(a) the day the registration is renewed, and

(b) if the registered person is served with notice that the *director* proposes to refuse to renew the registration, the day the time for giving notice requesting a hearing expires or, if a hearing is held, the day the *Tribunal* makes its order.

3.3.4. Public Register

3.3.4.1. Public Register

(1) The *director* shall establish and maintain a register available to the public that lists every person who has the qualifications required by subsection 15.12 (1) of the Act.

(2) The register referred to in Sentence (1) shall contain the following information with respect to every registered person:

(a) the name of the registered person,

(b) any identifying number assigned by the *director* to the registered person,

(c) the business address of the registered person,

(d) the names of the person or persons who will supervise the *construction* on site, installation, repair, servicing, cleaning or emptying of *sewage systems* carried out by the registered person, and

(e) any identifying number assigned by the *director* to the person or persons referred to in Clause (d).

Section 3.4. Qualifications for Registered Code Agencies

3.4.1. Scope

3.4.1.1. Scope

(1) This Section prescribes, for the purposes subsection 15.11 (4) of the Act, the qualifications that a person must have in order to be eligible to be appointed as a *registered code agency* under the Act.

3.4.2. Definition

3.4.2.1. Definition

(1) In this Section,

"registered" means registered under Sentence 3.4.3.2.(1).

3.4.3. Qualifications

3.4.3.1. General

(1) The following are prescribed as qualifications for persons to be appointed under the Act as a *registered code agency*:

(a) the person must be registered with the *director*.

(2) A registration shall be in a form established by the *director*.

3.4.3.2. Registration and Renewal of a Registration

(1) Subject to Articles 3.4.3.9. and 3.4.3.10., the *director* may register an applicant, or renew a registered person's registration, in each class of registration applied for, if,

(a) the applicant or registered person or, if the applicant or registered person is a corporation or partnership, a director, officer, partner or employee of the applicant or registered person, has successfully completed the examination program administered or authorized by the Ministry of Municipal Affairs and Housing relating to the person's knowledge of the Act and this Code and the powers and duties of a *registered code agency*,

(b) the applicant or registered person or, if the applicant or registered person is a corporation or partnership, one or more directors, officers, partners or employees of the applicant or registered person, have successfully completed the examination program administered or authorized by the Ministry of Municipal Affairs and Housing relating to the person's knowledge of the Act and this Code in the category of qualification set out in Column 2 of Table 3.5.2.2. that corresponds to each class of registration set out in Column 1 of Table 3.5.2.2. for which application is made,

(c) all persons who will carry out plans review and inspection activities on behalf of the registered person have successfully completed the examination program administered or authorized by the Ministry of Municipal Affairs and Housing relating to the person's knowledge of the Act and this Code in the category of qualification set out in Column 2 of Table 3.5.2.2. that corresponds to each class of registration set out in Column 1 of Table 3.5.2.2. for which application is made,

(d) the applicant or registered person has in place a quality management plan referred to in Sentence 3.4.3.3.(3) for carrying out the activities of the applicant or registered person under the registration that is acceptable to the *director*,

(e) the applicant or registered person is covered by the insurance required under Subsection 3.6.2. during the term of the registration applied for,

(f) the application is complete, and

(g) all fees required under Article 3.4.3.5. are paid.

(2) Subject to Articles 3.4.3.9. and 3.4.3.10., a person who, on December 31, 2013, is registered in a class of registration under Sentence 3.4.3.2.(1) of Division C of Ontario Regulation 350/06 (Building Code) made under the Act and complies with the conditions

of registration set out in Article 3.4.3.7. of Division C of that regulation is deemed to be registered in the class of registration under Sentence 3.4.3.2.(1) of this Code, and for these purposes, the person's registration in the class of registration is deemed to continue until its term expires.

(3) For the purposes of a registration or a renewal of a registration,

(a) a person who, on December 31, 2013, has the qualifications set out in Clause 3.4.3.2.(1)(a) of Division C of Ontario Regulation 350/06 is deemed to have the qualifications set out in Clause 3.4.3.2.(1)(a) of this Code, but ceases to be deemed to have these qualifications if the person does not successfully complete a knowledge maintenance examination as required under Clause 3.4.3.7.(1)(c),

(b) a person who, on December 31, 2013, has the qualifications set out in Clause 3.4.3.2.(1)(b) of Division C of Ontario Regulation 350/06 in a class of registration is deemed to have the qualifications set out in Clause 3.4.3.2.(1)(b) of this Code in the class of registration, but ceases to be deemed to have these qualifications if the person does not successfully complete a knowledge maintenance examination as required under Clause 3.4.3.7.(1)(c), and

(c) a person who, on December 31, 2013, has the qualifications set out in Clause 3.4.3.2.(1)(c) of Division C of Ontario Regulation 350/06 in a class of registration is deemed to have the qualifications set out in Clause 3.4.3.2.(1)(c) of this Code in the class of registration, but ceases to be deemed to have these qualifications if the person does not successfully complete a knowledge maintenance examination as required under Sentence 3.7.4.2.(2).

3.4.3.3. Application for Registration or Renewal of a Registration

(1) An application for registration or renewal of a registration shall be made to the *director* in a form established by the *director*.

(2) An application for renewal of a registration shall be made at least 60 days before the expiry of the registration to be renewed.

(3) An application for registration or renewal of a registration shall include a quality management plan for carrying out the activities of the applicant or registered person under the registration, including, without limitation,

(a) procedures relating to the commencement of activities as a *registered code agency*, including procedures to verify that the applicant or registered person is qualified to undertake the activities and to verify that there exists no conflict of interest within the meaning of Sentence 3.7.2.1.(4),

(b) identification of the responsibilities of persons who will carry out plans review and inspection activities of the applicant or registered person and procedures for the supervision of those persons,

(c) procedures for assessing plans and specifications for conformity with this Code, including procedures for the assessment of *alternative solutions*,

(d) procedures for inspecting the *construction* of *buildings*,

(e) procedures for receipt of notices that *construction* is ready for inspection and of written reports from *architects* and *professional engineers* arising out of the general review of the *construction* of *buildings*,

(f) procedures for the issuance of certificates and orders under the Act, including the responsibility of the persons with the qualifications set out in Sentences 3.7.4.3.(1) and (2),

(g) procedures for referral of matters to a *chief building official* under subsection 14 (5) of the Act,

(h) procedures for participation of the applicant or registered person in proceedings before the Building Code Commission under section 24 of the Act and before the Superior Court of Justice under section 25 of the Act,

(i) procedures for documenting the activities of the applicant or registered person under the registration, including data control, records retention and the maintenance of security and confidentiality of records, and transferring records to the *principal authority*,

(j) procedures for training and supervision of personnel, and

(k) procedures for the review and updating of the quality management plan.

(4) An application for registration or renewal of a registration shall include an undertaking by the applicant or registered person to comply with the conditions set out in Article 3.4.3.7.

(5) If a partnership or a corporation is the applicant for registration or renewal of a registration, the application shall set out the names and residence addresses of all its partners, directors or officers, as the case may be.

(6) An application for registration or renewal of a registration shall contain the names of all partners, directors, officers or employees of the applicant or registered person, as the case may be, and all other persons engaged by the applicant or registered person, who,

(a) have the qualifications set out in Clause 3.4.3.2.(1)(a),

(b) have the qualifications set out in Clause 3.4.3.2.(1)(b) in the class or classes of registration for which the application is made, and

(c) have the qualifications set out in Clause 3.4.3.2.(1)(c) in the class or classes of registration for which the application is made and will exercise powers and perform functions under the Act on behalf of the applicant or registered person in that class of registration.

(7) An application for registration or renewal of a registration shall contain evidence, provided by the applicant or registered person, that the persons referred to in Sentence (6) have the qualifications set out in Clause 3.4.3.2.(1)(a), (b) or (c).

(8) An application for registration or renewal of a registration shall contain evidence, provided by the applicant or registered person in such form and in such detail as may be required by the *director*, that the applicant or registered person is covered by the insurance required under Subsection 3.6.2. during the term of the registration applied for.

3.4.3.4. Term

(1) A registration expires one year after the date of its issuance.

3.4.3.5. Fees

(1) The fee payable for an application to take an examination that is part of an examination program referred to in Clause 3.4.3.2.(1)(a), (b) or (c) is $150.

(2) The fee for a registration is,

(a) $395, for 2015, and

(b) the amount determined in accordance with Sentences (5) and (6) rounded to the nearest dollar, for 2016 and subsequent calendar years.

(3) The fee for the addition of a new class of registration is,

(a) $65, for 2015, and

(b) the amount determined in accordance with Sentences (5) and (6) rounded to the nearest dollar, for 2016 and subsequent calendar years.

(4) The fee for renewal of a registration is,

(a) $290, for 2015, and

(b) the amount determined in accordance with Sentences (5) and (6) rounded to the nearest dollar, for 2016 and subsequent calendar years.

(5) On and after January 1, 2016, the fee for a calendar year is the fee for the previous calendar year adjusted by the percentage change from year to year in the Consumer Price Index for Ontario (All-Items) as reported monthly by Statistics Canada under the authority of the *Statistics Act* (Canada), averaged over the 12-month period that ends on March 31 of the previous calendar year, rounded to the first decimal point.

(6) Despite Sentence (5), if the percentage change results in a negative amount, the fee for a calendar year shall remain at the same level as the previous calendar year.

3.4.3.6. Not Transferable

(1) A registration is not transferable.

3.4.3.7. Conditions

(1) The following are the conditions of a registration:

(a) the registered person shall carry out activities under the registration in accordance with the Act, this Code and the quality management plan described in Clause 3.4.3.2.(1)(d),

(b) if the registered person is a corporation or partnership, during the term of the registration there must be,

(i) an officer, director, partner or employee of the registered person who has the qualifications set out in Clause 3.4.3.2.(1)(a), and

(ii) one or more officers, directors, partners or employees of the registered person who have the qualifications set out in Clause 3.4.3.2.(1)(b) in respect of each class of registration that is held by the registered person,

(c) by the end of the eighteenth month following the month in which the *director* gives notice of a knowledge maintenance examination to the registered person under Sentence 3.4.3.8.(1), the registered person shall ensure that the persons who are deemed under Clause 3.4.3.2.(3)(a) or (b) to have the qualifications set out in Clause 3.4.3.2.(1)(a) or (b), as applicable, have successfully completed the knowledge maintenance examination referred to in the notice,

(d) the registered person shall, during the term of the registration, be covered by the insurance required under Subsection 3.6.2.,

(e) the registered person shall, within 15 days after the event, notify the *director* in writing of,

(i) any change in address of the registered person for correspondence relating to the registration, and

(ii) any change in the information set out in Sentences 3.4.3.3.(5) and (6) ,

(f) the registered person shall give prompt written notice to the *director* of any material change in any of the information, other than the information referred to in Clause (e), that is contained in or accompanies an application for registration or renewal of a registration,

(g) the registered person shall, from time to time, at the registered person's expense, give to the *director* such documents or information relating to the registration or to activities carried out under the registration as the *director* may reasonably require, and

(h) the registered person shall allow the representatives of the *director* access to the registered person's books and records during normal business hours for the purpose of confirming matters related to the registration.

3.4.3.8. Knowledge Maintenance

(1) The *director* shall give notice of a knowledge maintenance examination administered or authorized by the Ministry of Municipal Affairs and Housing in respect of changes described in Sentence (2) that relate to the subject matter of an examination program referred to in Clause 3.4.3.2.(1)(a), (b) or (c) to every person who is registered under Sentence 3.4.3.2.(1) in a class of registration set out in Column 1 of Table 3.5.2.2. to which the examination relates.

(2) The changes referred to in Sentence (1) are changes made to the Act and Ontario Regulation 350/06 (Building Code) from December 31, 2006 to December 31, 2013 and changes made at the time that regulation is replaced by this Code on January 1, 2014.

(3) The *director* may give the notice referred to in Sentence (1) by sending it,

(a) by regular mail to the last address of the registered person that has been filed with the *director*, or

(b) by email to the last email address of the registered person that has been filed with the *director*.

3.4.3.9. Suspension, Revocation, Refusal to Register or Renew a Registration

(1) The *director* may, in the circumstances set out in Sentence (2),

(a) refuse to register an applicant,

(b) refuse to renew a registration, or

(c) suspend or revoke a registration.

(2) The circumstances referred to in Sentence (1) are,

(a) the registered person is in contravention of the Act or this Code,

(b) the registered person is in breach of a condition of the registration other than the condition set out in Clause 3.4.3.7.(1)(d),

(c) the registration was issued on the basis of mistaken, false or incorrect information,

(d) the *director* is of the opinion that the past conduct of the applicant or registered person or, if the applicant or registered person is a partnership or a corporation, the partners, officers or directors of the applicant or registered person, as the case may be, affords reasonable grounds for belief that the business that would be or is authorized by the registration will not be carried on in accordance with law,

(e) the *director* is of the opinion that there are reasonable grounds for belief that the activities of the applicant or registered person are or will be carried on in a manner that poses a threat to public safety,

(f) the application is incomplete, or

(g) any fees required under Article 3.4.3.5. remain unpaid.

(3) If the *director* proposes to refuse to register or renew a registration or proposes to suspend or revoke a registration under Sentence (1), the *director* shall serve a notice of the proposal, together with the reasons for it, on the applicant or registered person.

(4) A notice under Sentence (3) shall state that the applicant or registered person is entitled to a hearing before the *Tribunal* if the applicant or registered person, within 15 days after service of the notice referred to in Sentence (3), serves the *director* and the *Tribunal* with notice in writing requesting a hearing.

(5) If an applicant or registered person does not request a hearing by the *Tribunal* in accordance with Sentence (4), the *director* may carry out the proposal stated in the notice under Sentence (3).

(6) If the applicant or registered person requests a hearing before the *Tribunal* in accordance with Sentence (4), the *Tribunal* shall appoint a time for and hold a hearing and may by order direct the *director* to carry out the *director's* proposal or refrain from carrying it out and to take such other action as the *Tribunal* considers the *director* ought to take in accordance with the Act and this Code, and for those purposes the *Tribunal* may substitute its opinion for that of the *director*.

(7) The *director*, the applicant or registered person who requested the hearing, and such other persons as the *Tribunal* may specify, are parties to proceedings before the *Tribunal*.

(8) A proposal to suspend or revoke a registration by reason of Clause (2)(e) takes effect immediately and the commencement of a proceeding before the *Tribunal* does not stay the operation of the proposal to suspend or revoke the registration.

(9) The *Tribunal* may, on the application of the registered person, stay the operation of the proposal of the *director* to suspend or revoke the registration, and may grant the stay subject to conditions.

(10) Sentences (3) to (9) do not apply and the *director* may cancel the registration of a registered person upon receipt of a request in writing for cancellation from the registered person in a form established by the *director*.

(11) Subject to Sentence (8), if within the time period set out in Sentence 3.4.3.3.(2) a registered person has applied for renewal of a registration, paid the fee required under Article 3.4.3.5. and provided evidence satisfactory to the *director* that the registered person is covered by insurance required under Subsection 3.6.2. for the term of the renewal of the registration, the registration is deemed to continue until the earliest of,

(a) the day the registration is renewed,

(b) if the registered person is served with notice that the *director* proposes to refuse to renew the registration, the day the time for giving notice requesting a hearing expires or, if a hearing is held, the day the *Tribunal* makes its order, and

(c) the day when the registered person ceases to be covered by the insurance required under Subsection 3.6.2.

3.4.3.10. Mandatory Suspension or Revocation of Registration or Refusal to Register or Renew a Registration

(1) The *director* shall, in the circumstances set out in Sentence (2),

(a) refuse to register an applicant,

(b) refuse to renew a registration, or

(c) suspend or revoke a registration.

(2) The circumstances referred to in Sentence (1) are that,

(a) the applicant or registered person is not covered by the insurance required under Subsection 3.6.2., or

(b) an order under subsection 69 (2) of the *Provincial Offences Act* is in effect directing that the registration of the person be suspended and no registration be issued to that person until a fine is paid.

(3) If the *director* refuses to register an applicant, refuses to renew a registration or suspends or revokes a registration under Sentence (1), the *director* shall serve a notice of the refusal, suspension or revocation, together with the reasons for it, on the applicant or registered person.

(4) A suspension or revocation of a registration under Sentence (1) takes effect immediately and the commencement of a proceeding before the *Tribunal* does not stay the operation of the suspension or revocation of the registration.

(5) The *Tribunal* may, on the application of the registered person, stay the operation of a decision of the *director* to suspend or revoke the registration, and may make the stay subject to conditions.

(6) A notice under Sentence (3) shall state that the applicant or registered person is entitled to a hearing before the *Tribunal* if the applicant or registered person, within 15 days after service of the notice referred to in Sentence (3), serves the *director* and the *Tribunal* with notice in writing requesting a hearing.

(7) If the applicant or registered person requests a hearing before the *Tribunal* in accordance with Sentence (6), the *Tribunal* shall appoint a time for and hold a hearing and may by order confirm, alter or revoke the decision of the *director* to refuse to register or to suspend or revoke the registration, as the case may be, and may take such action as the *Tribunal* considers the *director* ought to take in accordance with the Act and this Code, and for such purposes the *Tribunal* may substitute its opinion for that of the *director*.

(8) The *director*, the applicant or registered person who requested the hearing, and such other persons as the *Tribunal* may specify, are parties to proceedings before the *Tribunal*.

3.4.4. Public Register

3.4.4.1. Public Register

(1) The *director* shall establish and maintain a register available to the public that lists every person who has the qualifications required by subsection 15.11 (4) of the Act.

(2) The register referred to in Sentence (1) shall contain the following information with respect to every registered person:

(a) the name of the registered person,

(b) any identifying number assigned by the *director* to the registered person,

(c) the business address of the registered person,

(d) the classes of registration of the registered person, and

(e) the names of any persons who will exercise powers and perform functions under the Act on behalf of the registered person in each class of registration and any identifying number assigned by the *director* to that person.

3.4.5. Classes of Registration and Categories of Qualifications

3.4.5.1. Classes and Categories

(1) Table 3.5.2.2. contains the classes of registration and categories of qualifications for the purposes of this Section.

Section 3.5. Classes of Registration and Categories of Qualifications

3.5.1. Scope

3.5.1.1. Scope

(1) This Section sets out classes of registration and categories of qualifications for the purposes of Sections 3.1., 3.2., 3.4. and 3.7.

3.5.2. Classes of Registration and Categories of Qualifications

3.5.2.1. Inspectors and Persons Who Carry out Design Activities

(1) Table 3.5.2.1. sets out the classes of registration and categories of qualifications for *inspectors* and persons who carry out *design activities*.

Table 3.5.2.1.
Classes of Registration and Categories of Qualifications for Inspectors and Persons Who Carry out Design Activities(1) (2)

Forming Part of Sentence 3.5.2.1.(1)

Item	Column 1 Classes of Registration for *Inspectors* and Persons Who Carry out *Design Activities*	Column 2 Categories of Qualifications for *Inspectors* and Persons Described in Clauses 3.2.4.2.(1)(a) and (b) and 3.2.5.2.(1)(a)	Column 3 Type of *Building*
1.	House	House	(a) A detached house, semi-detached house, townhouse or row house containing not more than two *dwelling units* in each house and the *building* systems, works, fixtures and service systems appurtenant to these *buildings*, including: (b) an ancillary *building* that serves the *building*, and excluding: (c) *buildings* and parts of *buildings* described in Column 3 of any of Items 5, 6, 7, 8, 10 and 11 of this Table.
2.	Small *Buildings*	Small *Buildings*	(a) *Buildings* described in Sentence 1.1.2.4.(1) of Division A and the *building* systems, works, fixtures and service systems appurtenant to these *buildings*, including: (b) *buildings* and parts of *buildings*, (i) described in Column 3 of Item 1 of this Table, or (ii) to which any of Sections 3.10., 3.11., 3.12., 3.14. and 3.15. of Division B apply and that are appurtenant to or serve *buildings* described in Clause (a), excluding: (c) *buildings* and parts of *buildings* described in Column 3 of any of Items 4 to 10 of this Table, and

			(d) signs described in Clause 1.3.1.1.(1)(e) of Division A.
3.	Large *Buildings*	Large *Buildings*	(a) *Buildings* described in Sentence 1.1.2.2.(1), (3) or (4) of Division A and the *building* systems, works, fixtures and service systems appurtenant to these *buildings*, excluding: (b) *buildings* and parts of *buildings* described in Column 3 of any of Items 4 to 11 of this Table, and (c) signs described in Clause 1.3.1.1.(1)(e) of Division A.
4.	Complex *Buildings*	Complex *Buildings*	*Building* systems, works, fixtures and service systems to which Subsection 3.2.6. of Division B or any provision in Articles 3.2.8.3. to 3.2.8.11. of Division B applies.
5.	*Plumbing* – House	*Plumbing* - House	All *plumbing* systems to which Part 7 of Division B applies that are appurtenant to a *building* that is a detached house, semi-detached house, townhouse or row house containing not more than two *dwelling unit*s in each house.
6.	*Plumbing* - All *Buildings*	*Plumbing* - All *Buildings*	(a) All *plumbing* systems to which Part 7 of Division B applies, including: (b) *buildings* and parts of *buildings* described in Column 3 of Item 5 of this Table.
7.	HVAC – House	HVAC – House	All *building* systems, works, fixtures and service systems to which Section 9.32. or 9.33. of Division B applies that are appurtenant to a *building* that is a detached house, semi-detached house, townhouse or row house containing not more than two *dwelling unit*s in each house.
8.	*Building* Services	*Building* Services	(a) *Building* systems, works, fixtures and service systems that are appurtenant to *buildings* described in Sentence 1.1.2.2.(1), (3) or (4) or Sentence 1.1.2.4.(1) of Division A and that relate to fire suppression, fire detection, smoke control, exhaust, vertical movement of smoke, energy efficiency, lighting and emergency power, and

			(b) *building* systems, works, fixtures and service systems appurtenant to *buildings* to which Part 6 of Division B applies or to which Section 9.32. or 9.33. of Division B applies, including: (c) *buildings* and parts of *buildings* described in Column 3 of Item 7 or 11 of this Table.
9.	*Building* Structural	*Building* Structural	Internal and external *loadbearing* structural elements essential to the stability or strength of a *building* described in Sentence 1.1.2.2.(2) or 1.1.2.4.(1) of Division A and that resist *dead loads* or *live loads* including, but not limited to, *foundations*, floors, walls, roofs, columns and beams.
10.	On-site *Sewage Systems*	On-site *Sewage Systems*	*Sewage systems* to which Part 8 of Division B applies.
11.	Detection, Lighting and Power	Detection, Lighting and Power	Early warning and electrical systems including systems appurtenant to *buildings* described in Sentence 1.1.2.2.(1) or 1.1.2.4.(1) of Division A and that relate to fire alarm and detection systems, voice communication systems, lighting systems, emergency lighting systems or emergency power systems for *building* services in all *buildings*.
12.	Fire Protection	Fire Protection	Fire suppression, fire detection, firefighting and fire safety systems appurtenant to *buildings* described in Sentence 1.1.2.2.(1) or Sentence 1.1.2.4.(1) of Division A.

Notes to Table 3.5.2.1.:

(1) An *inspector* registered in one class of registration may carry out plans review and inspection in another class where to do so does not constitute a substantial part of the plans review or inspection on any project.

(2) A person registered in one class of registration may carry out *design activities* in another class where to do so does not constitute a substantial part of the *design activities* on any project.

3.5.2.2. Registered Code Agencies

(1) Table 3.5.2.2. sets out the classes of registration for *registered code agencies* and the categories of qualifications for persons described in Clauses 3.4.3.2.(1)(a) to (c).

Table 3.5.2.2.
Classes of Registration and Categories of Qualifications for Registered Code Agencies

Forming Part of Sentence 3.5.2.2.(1)

Item	Column 1	Column 2	Column 3
	Classes of Registration for *Registered Code Agencies*	Category of Qualification for Persons Described in Clauses 3.4.3.2.(1)(a) to (c)	Type of *Building* Reference to Table 3.5.2.1.
1.	House	House	Column 3 of Item 1
		Plumbing - House	Column 3 of Item 5
		HVAC – House	Column 3 of Item 7
		On-Site *Sewage Systems*	Column 3 of Item 10
2.	Small *Buildings*	Small *Buildings*	Column 3 of Item 2
		Plumbing - All *Buildings*	Column 3 of Item 6
		Building Services	Column 3 of Item 8
		Building Structural	Column 3 of Item 9
		On-Site *Sewage Systems*	Column 3 of Item 10
3.	Large *Buildings*	Large *Buildings*	Column 3 of Item 3
		Plumbing - All Buildings	Column 3 of Item 6
		Building Services	Column 3 of Item 8
		Building Structural	Column 3 of Item 9
		On-site *Sewage Systems*	Column 3 of Item 10
4.	Complex *Buildings*	Complex *Buildings*	Column 3 of Item 4
		Plumbing - All *Buildings*	Column 3 of Item 6
		Building Services	Column 3 of Item 8
		Building Structural	Column 3 of Item 9
		On-site *Sewage Systems*	Column 3 of Item 10
5.	On-site *Sewage Systems*	On-site *Sewage Systems*	Column 3 of Item 10

Section 3.6. Insurance

3.6.1. Scope

3.6.1.1. Scope

(1) This Section prescribes, for the purposes of subsection 15.13 (1) of the Act, the insurance coverage that *registered code agencies* and persons referred to in subsection 15.11 (5) of the Act must have.

3.6.2. Insurance for Registered Code Agencies and Persons Referred to in Subsection 15.11 (5) of the Act

3.6.2.1. Definition

(1) In this Subsection,

"registered person" means a person who is registered under Sentence 3.2.4.2.(1) or 3.4.3.2.(1).

3.6.2.2. Scope

(1) Every registered person shall have insurance coverage under an insurance policy that satisfies the requirements set out in Article 3.6.2.3.

3.6.2.3. Insurance Coverage

(1) The insurance policy,

(a) shall indemnify the registered person against liability imposed by law arising out of the performance of or the failure to perform services as a registered person during any time while the person is registered under Sentence 3.2.4.2.(1) or 3.4.3.2.(1) for claims that are first made and reported to the insurer during the period of insurance or during any extended reporting period required by Clause (1)(c),

(b) shall set out the name of the registered person,

(c) in the case of a *registered code agency* registered under Sentence 3.4.3.2.(1),

(i) shall require an extended reporting period of two years for the purposes of giving notice of any claim or occurrence that the *registered code agency* could reasonably foresee might give rise to a claim, with respect to an event that occurs prior to the person ceasing to be insured,

(ii) shall provide that the extended reporting period described in Subclause (i) shall commence on the day the *registered code agency* ceases to be insured, and

(iii) shall require the *registered code agency* to make full payment of all premiums for the extended reporting period referred to in Subclause (i) as part of the premiums for the issuance of the insurance policy,

(d) shall provide for insurance coverage to commence,

(i) on the date the registered person becomes registered, or

(ii) in the case of a registered person previously insured in accordance with this Article, on the expiry of the previous policy,

(e) shall require the insurer to provide prompt written notice to the *director* if the policy is declared void for material misrepresentation,

(f) shall specify a limit of indemnity for any one claim and in the aggregate during any one period of insurance that is not less than,

(i) in the case of persons registered under Sentence 3.2.4.2.(1),

(A) $1,000,000 per claim and $2,000,000 in the aggregate, if the person billed $100,000 or more in fees in the 12 months immediately before the issuance of the policy,

(B) $500,000 per claim and $1,000,000 in the aggregate, if the person billed more than $50,000 and less than $100,000 in fees in the 12 months immediately before the issuance of the policy,

(C) $250,000 per claim and $500,000 in the aggregate, if the person billed $50,000 or less in fees in the 12 months immediately before the issuance of the policy, or

(D) the limits of indemnity for any one claim and in the aggregate that are set out in Sub-subclause (A), (B) or (C), as determined by reference to the person's estimated fees billings for the 12-month period immediately after the issuance of the policy, if the person has been registered less than one year before the issuance of the policy, and

(ii) in the case of a *registered code agency* registered under Sentence 3.4.3.2.(1), $1,000,000 per claim and $2,000,000 in the aggregate, except that those limits shall apply exclusively to the exercise of the powers and performance of the duties of a *registered code agency* under the Act and shall be in addition to any insurance applicable to any other activities carried on by the *registered code agency*,

(g) shall provide that any costs and expenses necessarily incurred by the insurer in the investigation, defence or settlement of claims under the policy shall not be part of the limit of indemnity set out in Clause (f) unless the limit of indemnity from any one claim exceeds $2,000,000,

(h) shall not provide that the insured shall be responsible for the first portion of any sum that the insured becomes legally liable to pay in respect of a claim made against him, her or it in respect of any one claim or occurrence in an amount exceeding the lesser of,

(i) $70,000, and

(ii) 5% of,

(A) the amount of fees billed by the insured in the 12 months immediately before the issuance of the policy, or

(B) the amount of the insured's estimated fees billings for the 12-month period immediately after the issuance of the policy, if the insured has been registered under Sentence 3.2.4.2.(1) less than one year before the issuance of the policy,

(i) shall provide that it cannot be cancelled by the insured unless,

(i) the insured immediately replaces the policy with another policy that satisfies the requirements of this Article,

(ii) the insurer has given notice in writing of the proposed cancellation to the *director*, and

(iii) the notice described in Subclause (ii) was received by the *director* at least 30 days before the day the policy is cancelled,

(j) shall provide that it cannot be cancelled by the insurer unless,

(i) it is cancelled for non-payment of a premium,

(ii) the insurer has given notice in writing of the proposed cancellation to the *director*, and

(iii) the notice described in Subclause (ii) was sent to the *director* at least 30 days before the day the policy is cancelled,

(k) shall provide for the continuation of coverage if the insured is adjudged a bankrupt, insolvent, incompetent or dies during the period of insurance, and

(l) may provide that coverage be subject to such exclusions and conditions and otherwise on such terms as are consistent with normal insurance industry practice from time to time.

Section 3.7. Registered Code Agencies

3.7.1. When a Registered Code Agency may not be Appointed under Section 4.1 of the Act

3.7.1.1. Agreements

(1) A *registered code agency* may not be appointed under subsection 4.1 (2) of the Act, unless the agreement entered into between a *principal authority* and the *registered code agency* complies with the requirements set out in Sentences (2) and (3).

(2) An agreement described in Sentence (1) shall,

(a) be made in writing,

(b) specify the functions that the *registered code agency* is authorized to perform,

(c) specify the *construction* of the *building* or class of *buildings* in respect of which the functions will be performed,

(d) set out the procedure by which the *principal authority* will appoint the *registered code agency* to perform specified functions in respect of the *construction* of a *building* or class of *buildings*,

(e) require that the *registered code agency* carry out its functions under the agreement in accordance with the Act and this Code and the quality management plan described in Clause 3.4.3.2.(1)(d), and

(f) provide for the provision by the *principal authority* to the *registered code agency* of such plans, specifications and other information, including applications for permits, that the *registered code agency* may require in order to act under the appointment.

(3) An agreement described in Sentence (1),

(a) may contain provisions in addition to the provisions required under Sentence (2) if the additional provisions are not inconsistent with the provisions required under that Sentence, and

(b) shall not contain any provision that relates to the *construction* of *buildings* for a class of registration for which the *registered code agency* is not registered under Sentence 3.4.3.2.(1).

3.7.1.2. Appointments

(1) A *registered code agency* may not be appointed under subsection 4.1 (2) of the Act unless the appointment complies with the requirements of Sentences (2) and (3).

(2) An appointment described in Sentence (1) shall,

(a) be made in writing,

(b) specify the *construction* of the *building* or class of *buildings* in respect of which the appointment relates,

(c) specify the functions described in section 15.15 of the Act that the *registered code agency* is appointed to perform, and

(d) require that the *registered code agency* carry out its functions under the appointment in accordance with the Act and this Code and the quality management plan described in Clause 3.4.3.2.(1)(d).

(3) An appointment described in Sentence (1) may contain provisions in addition to the provisions required under Sentence (2) if the additional provisions are not inconsistent with the provisions required under that Sentence.

3.7.2. When a Registered Code Agency may not be Appointed or Continue to Act under an Appointment

3.7.2.1. General

(1) A *registered code agency* may not be appointed to perform functions under section 15.15 of the Act in respect of a *building* or continue to act under an appointment in respect of a *building* if the *registered code agency*,

(a) is not registered under Sentence 3.4.3.2.(1) in respect of the class of registration to which the *construction* of the *building* relates, or

(b) is in breach of a condition of its registration under Article 3.4.3.7.

(2) Where the design and general review of *construction* of a *building* must be undertaken by an *architect* or a *professional engineer* or a combination of both, a *registered code agency* may not be appointed to perform functions under section 15.15 of the Act or continue to act under an appointment in respect of the *construction* of the *building* unless the *registered code agency* or an officer, director, partner or employee of the *registered code agency* is an *architect* or *professional engineer* or both, as the case may be.

(3) A *registered code agency* may not be appointed under the Act or continue to act under an appointment if the *registered code agency* would be in a conflict of interest.

(4) For the purposes of Sentence (3), a *registered code agency* would be in a conflict of interest if the *registered code agency* or an officer, director, partner or employee of the *registered code agency* or any person engaged by the *registered code agency* to perform functions for it,

(a) has participated or participates, in any capacity, in *design activities* or *construction* relating to any part of the *building* to which an appointment relates,

(b) is or has been employed within the previous 180 days by a person who carried out *design activities* or *construction* relating to any part of the *building*,

(c) has a professional or financial interest in,

(i) the *construction* of the *building* to which the appointment relates,

(ii) the *building* to which the appointment relates, or

(iii) the person responsible for the design of the *building* to which the appointment relates, or

(d) is an elected official, officer or employee of a *principal authority*.

(5) For the purposes of Clause (4)(c), involvement with a *building* as a *registered code agency* and entitlement to any fee paid for acting as a *registered code agency* in respect of a *building* shall not be considered to be a professional or financial interest in the *construction* of the *building*, the *building* or the person responsible for the design of the *building*.

3.7.3. Additional Functions that Registered Code Agencies may be Appointed to Perform

3.7.3.1. General

(1) In addition to the functions described in paragraphs 1 to 5 of section 15.15 of the Act, a *registered code agency* may be appointed to perform the functions set out in Sentence 3.7.4.3.(5) or (6).

3.7.4. Manner in Which Registered Code Agency Shall Perform Functions

3.7.4.1. General

(1) The *registered code agency* shall perform the functions specified in an appointment in accordance with the Act and this Code and the quality management plan described in Clause 3.4.3.2.(1)(d).

(2) The *registered code agency* shall perform the functions specified in an appointment in accordance with the code of conduct set out in MMAH Supplementary Standard SC-1, “Code of Conduct for Registered Code Agencies”.

3.7.4.2. Plans Review and Inspection Activities

(1) The *registered code agency* shall ensure that plans review and inspection activities of the *registered code agency* are carried out by a person who has the qualifications set out in Clause 3.4.3.2.(1)(b) or (c) in respect of the type of *building* set out in Column 3 of Table 3.5.2.2. for which the person is carrying out the activities.

(2) By the end of the eighteenth month following the month in which the *director* gives notice of a knowledge maintenance examination to the *registered code agency* under Sentence 3.4.3.8.(1), the *registered code agency* shall ensure that the persons described in Sentence (1) who are deemed under Clause 3.4.3.2.(3)(b) or (c), as applicable, to have the qualifications set out in Clause 3.4.3.2.(1)(b) or (c), as applicable, in the category of qualification to which the notice relates and who will carry out plans review and inspection activities of the *registered code agency* in that category of qualification, have successfully completed the knowledge maintenance examination referred to in the notice.

(3) A *registered code agency* shall prepare written records of every inspection of the *construction* of a *building* that is undertaken by the *registered code agency* in the course of performing functions under an appointment.

(4) The record required under Sentence (3) shall include,

(a) the date of receipt of the notice of readiness for inspection, if any,

(b) the date of the inspection,

(c) the reason for the inspection, and

(d) whether non-compliance with this Code was observed in the course of the inspection and the details of the non-compliance.

(5) If a *registered code agency* has issued an order under subsection 12 (2), 13 (1) or 13 (6) of the Act, the *registered code agency* shall prepare a written record consisting of,

(a) a copy of the order,

(b) the persons on whom the order was served and the date and manner of service,

(c) when and how the order was complied with, and

(d) if the order has not been complied with, the efforts made by the *registered code agency* to achieve compliance by the persons responsible for compliance.

3.7.4.3. Issuance of Certificates by Registered Code Agencies

(1) Subject to Sentence (2), every certificate issued under the Act by a *registered code agency* shall, in accordance with the quality management plan described in Clause 3.4.3.2.(1)(d), be signed by the *registered code agency* or, if the *registered code agency* is a corporation or partnership, by a person who has the qualifications set out in Clause 3.4.3.2.(1)(a).

(2) If the certificate is issued in respect of the *construction* of a *building* that would be required to be designed by and under the general review of an *architect* or a *professional engineer* or a combination of both, the certificate shall also be signed on behalf of the *registered code agency* by an *architect* or a *professional engineer* or both, as the case may be, who is an officer, director, partner or employee of the *registered code agency*.

(3) A *registered code agency* may issue a *plans review certificate* if the *registered code agency*,

(a) has been appointed to perform the functions described in clause 4.1 (4) (a) or (c) of the Act in respect of the proposed *construction* of the *building* to which the *plans review certificate* applies,

(b) has, in conformity with the Act, this Code and the quality management plan described in Clause 3.4.3.2.(1)(d), carried out the applicable functions for which the *registered code agency* was appointed, and

(c) is satisfied on reasonable grounds that, on date on which the *plans review certificate* is issued, the proposed *construction* of the *building* to which the *plans review certificate* relates is in compliance with this Code.

(4) A *registered code agency* may issue a *change certificate* if the *registered code agency*,

(a) has been appointed to perform the functions described in clause 4.1 (4) (a), (b) or (c) of the Act in respect of the *construction* or proposed *construction* of the *building* to which the *change certificate* applies,

(b) has, in conformity with the Act, this Code and the quality management plan described in Clause 3.4.3.2.(1)(d) , carried out the applicable functions for which the *registered code agency* was appointed, and

(c) is satisfied on reasonable grounds that, on the date on which the *change certificate* is issued, the proposed *construction* of the *building* to which the *change certificate* relates is in compliance with this Code.

(5) A *registered code agency* may issue a *certificate for the occupancy of a building not fully completed* if the *registered code agency*,

(a) has been appointed to perform the functions described in clause 4.1 (4) (b) or (c) of the Act in respect of the *construction* of the *building* to which the *certificate for the occupancy of a building not fully completed* applies,

(b) has, in conformity with the Act, this Code and the quality management plan described in Clause 3.4.3.2.(1)(d), carried out the applicable functions for which the *registered code agency* was appointed, and

(c) is satisfied on reasonable grounds that, on the date on which the *certificate for the occupancy of a building not fully completed* is issued, the *construction* of the *building* to which the *certificate for the occupancy of a building not fully completed* relates is in compliance with Clauses 1.3.3.1.(3)(a) to (q).

(6) A *registered code agency* may issue a *certificate for the occupancy of a building described in Sentence 1.3.3.4.(3) of Division C* if the *registered code agency*,

(a) has been appointed to perform the functions described in clause 4.1 (4) (b) or (c) of the Act in respect of the *construction* of a *building* described in Sentence 1.3.3.4.(3) to which the certificate applies,

(b) has, in conformity with the Act, this Code and the quality management plan described in Clause 3.4.3.2.(1)(d), carried out the applicable functions for which the *registered code agency* was appointed, and

(c) is satisfied on reasonable grounds that, on the date on which the *certificate for the occupancy of a building described in Sentence 1.3.3.4.(3) of Division C* is issued, the *construction* of the *building* to which the certificate relates is in compliance with Clauses 1.3.3.4.(4)(a) to (i).

(7) A *registered code agency* may issue a *certificate for the occupancy of a building described in Sentence 1.3.3.5.(1) of Division C* if the *registered code agency*,

(a) has been appointed to perform the functions described in clause 4.1 (4) (b) or (c) of the Act in respect of the *construction* of a *building* described in Sentence 1.3.3.5.(1) to which the certificate applies,

(b) has, in conformity with the Act, this Code and the quality management plan described in Clause 3.4.3.2.(1)(d), carried out the applicable functions for which the *registered code agency* was appointed, and

(c) is satisfied on reasonable grounds that, on the date on which the *certificate for the occupancy of a building described in Sentence 1.3.3.5.(1) of Division C* is issued,

the *construction* of the *building* to which the certificate relates is in compliance with Clauses 1.3.3.5.(3)(a) to (r).

(8) A *registered code agency* may issue a *final certificate* if the *registered code agency*,

(a) has been appointed to perform the functions described in clause 4.1 (4) (b) or (c) of the Act in respect of the *construction* of the *building* to which the *final certificate* applies,

(b) has, in conformity with the Act, this Code and the quality management plan described in Clause 3.4.3.2.(1)(d), carried out the applicable functions for which the *registered code agency* was appointed, and

(c) is satisfied on reasonable grounds that on the date on which the *final certificate* is issued, the *construction* of the *building* to which the *final certificate* relates is in compliance with this Code.

(9) Every certificate issued under the Act by a *registered code agency* shall be in a form approved by the *Minister*.

3.7.4.4. Issuance of Orders by Registered Code Agencies

(1) Orders under subsections 13 (6) and 14 (1) of the Act shall, in accordance with the quality management plan described in Clause 3.4.3.2.(1)(d), be signed by the *registered code agency* or a person who has the qualifications set out in Clause 3.4.3.2.(1)(a).

(2) Orders under subsections 12 (2) and 13 (1) and clause 18 (1) (f) of the Act shall, in accordance with the quality management plan described in Clause 3.4.3.2.(1)(d), be signed by the *registered code agency* or by a person who has the qualifications set out in Clause 3.4.3.2.(1)(b) or (c).

3.7.4.5. Authorized Persons

(1) Persons who have the qualifications set out in Clause 3.4.3.2.(1)(a), (b) or (c) are prescribed for the purposes of subsection 15.17 (1) of the Act.

(2) The certificate of authorization referred to in subsection 15.17 (2) of the Act shall, in accordance with the quality management plan described in Clause 3.4.3.2.(1)(d), be signed by a representative of the *registered code agency* who has the qualifications set out in Clause 3.4.3.2.(1)(a) and shall contain the following information:

(a) the name of the *registered code agency* and any identifying number issued by the *director* to the *registered code agency*,

(b) the title, business address and business telephone number of a representative of the *registered code agency* who may be contacted to answer questions about the certificate and the authorization to which it relates,

(c) the name of the authorized person and any identifying number issued by the *director* to the authorized person in respect of that person's qualifications,

(d) the scope of the powers that may be exercised and the functions that may be performed by the authorized person,

(e) the date of issuance of the certificate.

(3) Every person described in Sentence (1) shall carry his or her certificate of authorization when performing duties and shall produce the certificate for inspection upon request.

3.7.4.6. Prohibition

(1) A *registered code agency* shall not dismiss, suspend, demote, discipline, harass or otherwise disadvantage an employee, or deny an employee a benefit of employment, by reason that,

(a) the employee, acting in good faith and on the basis of reasonable belief, has disclosed to the *director* that the *registered code agency* or any other person has contravened or intends to contravene a provision of the Act or this Code or a predecessor of this Code,

(b) the employee, acting in good faith and on the basis of reasonable belief, has refused or stated an intention of refusing to do anything that is a contravention of a provision of the Act or this Code or a predecessor of this Code,

(c) the employee, acting in good faith and on the basis of reasonable belief, has done or stated an intention of doing anything that is required to be done in order that a provision of the Act or this Code or a predecessor of this Code not be contravened, or

(d) the *registered code agency* believes that the employee will do anything referred to in Clause (a), (b) or (c).

(2) Nothing in this Section impairs any right of an employee either at law or under an employment contract or collective agreement.

(3) In this Article,

"employee" includes an independent contractor and "employer" includes the person who retains an employee who is an independent contractor.

3.7.4.7. Information and Records

(1) The *registered code agency* shall maintain records of all plans review and inspection activity, of all certificates and orders and of any other activities taken in carrying out functions under an appointment in accordance with the quality management plan described in Clause 3.4.3.2.(1)(d).

(2) Any information collected by a *registered code agency* in the course of the exercise of powers and the performance of duties under the Act may be used only for the purpose of performing functions under an appointment under subsection 4.1 (2) of the Act and may be disclosed only,

(a) to a *principal authority* pursuant to an agreement under subsection 4.1 (1) of the Act,

(b) to a *principal authority* to aid the enforcement in any manner of the Act, or

(c) where required or permitted under the Act, this Code, other applicable legislation or an order of a court.

(3) A *registered code agency* shall ensure that any agreement under which the *registered code agency* engages a person to assist the *registered code agency* to perform functions under an appointment includes a provision that requires the person to comply with Sentences (1) and (2).

3.7.5. Termination of Appointment of a Registered Code Agency

3.7.5.1. Termination of an Appointment Made under Subsection 4.1 (2) of the Act

(1) A *principal authority* may, in accordance with the terms of an agreement under subsection 4.1 (1) of the Act, terminate the appointment of a *registered code agency* before the appointment expires under section 15.19 of the Act.

3.7.6. Information to be Provided

3.7.6.1. Information to be Provided by a Principal Authority to the Director

(1) If a *principal authority* that has appointed a *registered code agency* terminates the appointment before the appointment expires under section 15.19 of the Act, the *principal authority* shall, as soon as possible after the termination, give the *director* notice of the termination and such other information concerning the circumstances of the termination and as may be required by the *director*.

(2) If a *chief building official* has issued an order under subsection 15.21 (1) of the Act, the *principal authority* shall as soon as possible after the order is issued give the *director* a copy of the order and such other information concerning the circumstances of the order and as may be required by the *director*.

3.7.6.2. Information to be Provided by a Registered Code Agency to the Director

(1) A *registered code agency* that becomes or expects to become unable to carry out the functions for which the *registered code agency* was appointed shall as soon as possible give notice to the *director* of this situation.

3.7.6.3. Information to be Provided by a Registered Code Agency to the Chief Building Official

(1) A *registered code agency* shall notify the *chief building official* if the *registered code agency* becomes or expects to become unable to carry out the functions for which the *registered code agency* was appointed.

(2) A *registered code agency* shall give copies of the following records to the *chief building official*,

(a) all orders issued by the *registered code agency* under subsections 12 (2), 13 (1) and 13 (6) of the Act,

(b) all written records prepared by the *registered code agency* under Sentences 3.7.4.2.(3), (4) and (5),

(c) all *final certificates* that are issued by the *registered code agency*,

(d) records described in Section 2.1. relating to the use of an *alternative solution*, and

(e) any records of information, copies of documents or things, tests, samples or photographs produced, removed, required, taken or ordered to be taken under subsection 18 (1) of the Act.

(3) The documents referred to in Sentence (2) shall be given to the *chief building official*,

(a) within the time period specified in any agreement under Article 3.7.1.1. or appointment under Article 3.7.1.2. in respect of which the documents relate, whichever time period ends earlier,

(b) within 15 days after the expiry or termination of the appointment of the *registered code agency* in respect of which the documents relate, if there is no time period specified in the agreement or appointment referred to in Clause (a), or

(c) if the *chief building official* has given notice to the *registered code agency* that he or she requires the documents before the time set out in Clause (a) or (b), within 2 days after the request for documents.

(4) The requirements of Sentence (2) apply even if the *registered code agency* is no longer registered under Sentence 3.4.3.2.(1).

(5) If a *registered code agency* in the course of carrying out functions under an appointment has reason to believe that a *building* described in Sentence (7) is unsafe within the meaning of subsection 15.9 (2) or (3) of the Act, the *registered code agency* shall as soon as possible give notice to the *chief building official* of,

(a) the location of the *building*, and

(b) the reason why the *registered code agency* has reason to believe that the *building* is unsafe.

(6) A *registered code agency* that has given a notice to the *chief building official* under Sentence (5) shall give the *chief building official* such other information about the unsafe condition as the *chief building official* may require.

(7) Sentence (5) applies to,

(a) a *building* in respect of which the *registered code agency* has been appointed to perform functions, and

(b) a *building* that has been adversely affected by the *construction* of a *building* referred to in Clause (a).

(8) For the purposes of Sentence (3), a time period referred to in Clause (3)(a), (b) or (c),

(a) does not start until the day after the day on which the obligation to provide the documents arises, and

(b) does not include Saturdays, holidays and all other days on which the offices of the *principal authority* are not open for the transaction of business with the public.

3.7.7. Referral of Stop Work Order

3.7.7.1. Referral

(1) A *registered code agency* shall refer a matter under subsection 14 (5) of the Act to the *chief building official* by giving the *chief building official*, as soon as possible,

(a) a report that contains the following information:

(i) a copy of the order made under section 12 or 13 of the Act that was not complied with and of the order under section 14 of the Act,

(ii) the persons on whom the orders were served and the date and manner of service,

(iii) a statement that the orders have not been complied with, and

(iv) the efforts made by the *registered code agency* to achieve compliance with the orders by the persons responsible for compliance, and

(b) such other information as the *chief building official* may require in respect of the matter that has been referred.

(2) The report under Clause (1)(a) shall be signed, in accordance with the quality management plan described in Clause 3.4.3.2.(1)(d), by the *registered code agency* or, if the *registered code agency* is a corporation or partnership, by a person who has the qualifications set out in Clause 3.4.3.2.(1)(a).

O. Reg. 332/12, Division C, Part 3; O. Reg. 360/13, ss. 4, 8, 9, 11, 12, 15, 17-19, 21, 22 (2), 23; O. Reg. 361/13, ss. 123-136.

PART 4
TRANSITION, AMENDMENTS, REVOCATION AND COMMENCEMENT

Section 4.1. Transition Rule
4.1.1. Transition, January 2014
4.1.2. Transition, January 2015
4.1.3 Transition January 2017

Section 4.1. Transition Rule

4.1.1. Transition, January 2014

4.1.1.1. Transition Rule

(1) Subject to Sentence (2), Ontario Regulation 350/06 (Building Code) made under the Act, as it read on December 31, 2013, is deemed to continue in force with respect to *construction* for which a permit has been applied for before January 1, 2014.

(2) Sentence (1) does not apply unless the *construction* is commenced within six months after the permit is issued.

4.1.2. Transition, January 2015

4.1.2.1. Transition Rule

(1) Subject to Sentence (2), this Regulation, as it read on December 31, 2014, is deemed to continue in force with respect to *construction* for which a permit has been applied for before January 1, 2015.

(2) Sentence (1) does not apply unless the *construction* is commenced within six months after the permit is issued.

(1) applies, on and after that date, to a person who engages in the activity at that location. 2006, c. 22, s. 58 (3).

Same

(4) If an activity was engaged in at a particular location immediately before the source protection plan took effect and the risk management official gives notice to a person who is engaged in the activity at that location that, in the opinion of the risk management official, subsection (1) should apply to the person, subsection (1) applies to a person who engages in the activity at that location on and after a date specified in the notice that is at least 120 days after the date the notice is given. 2006, c. 22, s. 58 (4).

Agreement on risk management plan

(5) Subject to subsections (15) and (16), a person engaged in an activity or proposing to engage in an activity and a risk management official may agree to a risk management plan for the activity at a particular location if,

(a) a source protection plan designates the activity as an activity to which this section should apply and an area within which this section should apply to the activity; and

(b) the location is in the area referred to in clause (a). 2006, c. 22, s. 58 (5).

Notice of plan

(6) If a risk management official and a person agree to a risk management plan under subsection (5), the risk management official shall provide written notice to the person and shall attach a copy of the plan to the notice. 2006, c. 22, s. 58 (6).

Deadline for agreement

(7) The risk management official may give a person a notice indicating that, if no risk management plan is agreed to under subsection (5) by a date specified in the notice, the risk management official intends to establish a risk management plan for the activity at the location. 2006, c. 22, s. 58 (7).

Specified date

(8) A date specified in a notice under subsection (7) shall be at least 120 days after the date the notice is given. 2006, c. 22, s. 58 (8).

Waiving notice period

(9) A person to whom a notice has been given under subsection (7) may consent in writing to the establishment of the risk management plan before the date specified in the notice. 2006, c. 22, s. 58 (9).

Order establishing risk management plan

(10) Subject to subsections (9), (15) and (16), if a notice is given under subsection (7) and no risk management plan is agreed to under subsection (5) by the date specified in the notice, the risk management official shall, by order, establish a risk management plan for the activity at the location. 2006, c. 22, s. 58 (10).

Application for risk management plan

(11) A person engaged in an activity or proposing to engage in an activity to which this section applies at a location within an area to which this section applies may apply to the risk management official for the establishment of a risk management plan for the activity at the location. 2006, c. 22, s. 58 (11).

Order establishing plan

(12) Subject to subsections (15) and (16), if an application is made under subsection (11), the risk management official shall, by order, establish a risk management plan for the activity at the location. 2006, c. 22, s. 58 (12).

Amendment of risk management plan

(13) Subject to subsections (14) and (17), subsections (5) to (12) apply, with necessary modifications,

(a) to the amendment of a risk management plan agreed to or established under this section; and

(b) to the amendment of a risk management plan agreed to or established under section 56, if, pursuant to subsection 56 (12), the plan cannot be amended under that section. 2006, c. 22, s. 58 (13).

Amendment; deadline

(14) For the purpose of subsection (13), the 120-day period referred to in subsection (8) may be shortened by the risk management official if,

(a) the risk management official is of the opinion that the amendment of the risk management plan is required to prevent a drinking water health hazard; and

(b) the notice given under subsection (7) sets out the reasons for the opinion referred to in clause (a). 2006, c. 22, s. 58 (14).

Criteria for agreeing to or establishing risk management plan

(15) Subject to subsection (16), a risk management official shall agree to or establish a risk management plan for an activity at a location under this section if, and only if, all applicable fees have been paid and,

(a) the risk management official,

(i) is satisfied that the risk management plan complies with the requirements, if any, of the regulations, rules and source protection plan, and

(ii) is satisfied that the activity will not be a significant drinking water threat if it is engaged in at that location in accordance with the risk management plan; or

(b) in circumstances prescribed under clause 55 (1) (h), a person with qualifications prescribed by the regulations has stated, in a form obtained from or approved by the Director, that the person,

(i) is satisfied that the risk management plan complies with the requirements, if any, of the regulations, rules and source protection plan, and

(ii) is satisfied that the activity will not be a significant drinking water threat if it is engaged in at that location in accordance with the risk management plan. 2006, c. 22, s. 58 (15).

Refusal to establish plan

(16) The risk management official may refuse to agree to or establish a risk management plan if the past conduct of the applicant or, if the applicant is a corporation, of its officers or directors, affords reasonable grounds to believe that the applicant will not engage in the activity in accordance with the risk management plan. 2006, c. 22, s. 58 (16).

Application of subss. (15) and (16) to amendments

(17) Subsections (15) and (16) apply, with necessary modifications, to the amendment of a risk management plan and, for that purpose, a reference in subsection (15) or (16) to a risk management plan shall be deemed to be a reference to the amended plan. 2006, c. 22, s. 58 (17).

Compliance with risk management plan

(18) If a risk management plan is agreed to or established under this section for an activity at a location, a person shall not engage in that activity at that location except in accordance with the plan. 2006, c. 22, s. 58 (18).

Restricted land uses

59. (1) If a source protection plan that is in effect designates a land use as a land use to which this section should apply and an area within which this section should apply,

(a) a person shall not make an application under a provision of the *Planning Act* prescribed by the regulations for the purpose of using land for that land use at any location within that area; and

(b) despite section 58, a person shall not construct or change the use of a building at any location within that area, if the building will be used in connection with that land use,

unless the risk management official issues a notice to the person under subsection (2). 2006, c. 22, s. 59 (1).

Issuance of notice

(2) The risk management official shall, on application, issue a notice to a person for the purpose of subsection (1) if, and only if, the applicant has paid all applicable fees and,

(a) neither section 57 nor section 58 applies to the activity for which the land is to be used at the location where the land is to be used; or

(b) section 58 applies to the activity for which the land is to be used at the location where the land is to be used and a risk management plan that applies to that activity at that location has been agreed to or established under section 56 or 58. 2006, c. 22, s. 59 (2).

Time for application

(3) If section 58 applies to the activity for which the land is to be used at the location where the land is to be used, an application for the issuance of a notice under subsection (2) may be made at the same time that an application is made in respect of the activity under section 58 or 60. 2006, c. 22, s. 59 (3).

Copies

(4) If a risk management official issues a notice under subsection (2), he or she shall give a copy of the notice to the persons prescribed by the regulations. 2006, c. 22, s. 59 (4).

Definitions

(5) In this section,

"building" has the same meaning as in the *Building Code Act, 1992*; ("bâtiment")

"construct" has the same meaning as in the *Building Code Act, 1992*. ("construire") 2006, c. 22, s. 59 (5).

Risk assessment can exclude application of ss. 56, 57 and 58

60. (1) Sections 56, 57 and 58 do not apply to an activity that is engaged in at a particular location if,

(a) a risk assessment relating to the activity at that location has been submitted to the risk management official;

(b) the risk assessment concludes that the activity, if engaged in at that location, is not a significant drinking water threat at that location; and

(c) the risk management official has accepted the risk assessment under this section. 2006, c. 22, s. 60 (1).

Acceptance of risk assessment

(2) On application, the risk management official shall accept a risk assessment that concludes that an activity is not a significant drinking water threat if, and only if, all applicable fees have been paid and,

(a) the risk management official is satisfied that the activity has been assessed in accordance with the regulations and the rules; or

(b) in circumstances prescribed under clause 55 (1) (h), a person with qualifications prescribed by the regulations has stated, in a form obtained from or approved by the Director, that the person is satisfied that the activity has been assessed in accordance with the regulations and the rules. 2006, c. 22, s. 60 (2).

Report on activity

61. (1) A risk management official may, by order, require a person who engages in or proposes to engage in an activity to which section 56 or 58 applies to provide the risk management official with a report that describes the manner in which the activity is being or is proposed to be engaged in, including any risk management measures that are being or are proposed to be taken with respect to the protection of drinking water sources. 2006, c. 22, s. 61 (1).

Same

(2) A person who is required to provide a report under subsection (1) shall ensure that it is prepared and submitted to the risk management official in accordance with the order. 2006, c. 22, s. 61 (2).

Inspections

62. (1) Subject to subsections (2) and (3), a risk management inspector may, for the purpose of enforcing this Part, enter property, without the consent of the owner or occupier and without a warrant, if,

(a) the risk management inspector has reasonable grounds to believe that an activity to which section 56, 57 or 58 applies is being engaged in on the property; or

(b) the risk management inspector has reasonable grounds to believe that there are documents or data on the property that relate to an activity to which section 56, 57 or 58 applies. 2006, c. 22, s. 62 (1).

Training

(2) A risk management inspector shall not enter property unless the risk management inspector has received training prescribed by the regulations. 2006, c. 22, s. 62 (2).

Dwellings

Definition

(3) In this section,

"trailer camp" means any land on which a trailer is kept. 2006, c. 11, Sched. A, s. 95 (3).

Restrictions re group homes

96. (1) The City shall not pass by-laws under paragraph 11 of subsection 8 (2) providing for a system of licences for group homes unless there is in effect in the City a by-law passed under section 34 of the *Planning Act* that permits the establishment and use of group homes in the City. 2006, c. 11, Sched. A, s. 96 (1).

Same

(2) A by-law under paragraph 11 of subsection 8 (2) providing for a system of licences for group homes may prohibit a person from carrying on the business of a group home without a licence and may provide for the following conditions, but shall not provide for any additional conditions concerning the operation of the group home:

1. The by-law may require the payment of licence fees.
2. The by-law may require a licensee or an applicant for a licence to give the City such information as the City considers appropriate concerning the business name, ownership and method of contacting the licensee or applicant. 2006, c. 11, Sched. A, s. 96 (2).

CLOSING OF BUSINESS ESTABLISHMENTS

Closing of business establishments

97. (1) Without limiting sections 7 and 8, those sections authorize the City to require business establishments to be closed to the public at any time. 2006, c. 11, Sched. A, s. 97 (1).

Same

(2) Despite subsection (1), a by-law described in that subsection applies to only those premises where goods or services are sold or offered for sale by retail. 2006, c. 11, Sched. A, s. 97 (2).

Exemptions

(3) The by-law does not apply to the sale or offering for sale by retail of,

(a) goods or services in the form of or in connection with prepared meals or living accommodation;

(a.1) liquor under the authority of a licence or permit issued under the *Liquor Licence Act*; and

(b) any other prescribed goods or services. 2006, c. 11, Sched. A, s. 97 (3); 2006, c. 32, Sched. B, s. 18.

HEALTH, SAFETY AND WELL-BEING

Smoking in public places, etc.

98. (1) This section applies to a city by-law to prohibit or regulate the smoking of tobacco in public places and workplaces. 2006, c. 11, Sched. A, s. 98 (1).

Crown bound

(2) The by-law binds the Crown. 2006, c. 11, Sched. A, s. 98 (2).

Restriction

(3) The by-law shall not apply to a highway but may apply to public transportation vehicles and taxicabs on a highway. 2006, c. 11, Sched. A, s. 98 (3).

Scope of by-law

(4) The by-law may,

(a) define "public place" for the purpose of the by-law;

(b) require the owner or occupier of a public place, the employer of a workplace, other than a public transportation vehicle and a taxicab, or the owner or operator of a public transportation vehicle or a taxicab to ensure compliance with the by-law. 2006, c. 11, Sched. A, s. 98 (4).

Conflicts

(5) Despite section 11, if there is a conflict between a provision of any Act or regulation and a provision of the by-law, the provision that is the most restrictive of the smoking of tobacco prevails. 2006, c. 11, Sched. A, s. 98 (5).

Definitions

(6) In this section,

"smoking of tobacco" includes the holding of lighted tobacco; ("usage du tabac")

"workplace" includes a public transportation vehicle and a taxicab. ("lieu de travail") 2006, c. 11, Sched. A, s. 98 (6).

Entry on land re emergency communication system

99. For the purposes of establishing, maintaining and operating a centralized communication system for emergency response purposes, the City may at any reasonable time enter upon land to affix numbers to buildings or erect signs setting out numbers on land. 2006, c. 11, Sched. A, s. 99.

Pits and quarries

100. A city by-law prohibiting or regulating the operation of pits and quarries does not apply to a pit or quarry, as those terms are defined in the *Aggregate Resources Act*, located in a part of Ontario designated in a regulation under subsection 5 (2) of that Act. 2006, c. 11, Sched. A, s. 100.

Repairs or alterations, authorized entry

101. (1) The City may authorize the owner or occupant of land to enter adjoining land, at any reasonable time, for the purpose of making repairs or alterations to any building, fence or other structures on the land of the owner or occupant but only to the extent necessary to carry out the repairs or alterations. 2006, c. 11, Sched. A, s. 101 (1).

Conditions

(2) The following apply to a power of entry under a by-law under this section:

1. The power of entry may be exercised by an employee or agent of the owner or occupant of land.
2. A person exercising the power of entry must display or, on request, produce proper identification.
3. Nothing in a by-law under this section authorizes entry into a building.
4. The owner or occupant shall provide reasonable notice of the proposed entry to the occupier of the adjoining land.
5. The owner or occupant of land shall, in so far as is practicable, restore the adjoining land to its original condition and shall provide compensation for any damages caused by the entry or by anything done on the adjoining land. 2006, c. 11, Sched. A, s. 101 (2).

Fortification of land

102. (1) This section applies to a city by-law,

(a) regulating in respect of the fortification of and protective elements applied to land in relation to the use of the land; and

(b) prohibiting the excessive fortification of land or excessive protective elements being applied to land in relation to the use of the land. 2006, c. 11, Sched. A, s. 102 (1).

Definitions

(2) In this section,

"land" means land, including buildings, mobile homes, mobile buildings, mobile structures, outbuildings, fences, erections, physical barriers and any other structure on the land or on or in any structure on the land; ("bien-fonds")

"protective elements" include surveillance equipment. ("éléments protecteurs") 2006, c. 11, Sched. A, s. 102 (2).

By-law and building code

(3) A permit shall not be issued under the *Building Code Act, 1992* if the proposed building or construction or use of the building will contravene a by-law to which this section applies. 2006, c. 11, Sched. A, s. 102 (3); 2009, c. 33, Sched. 21, s. 4 (2).

Conflict

(4) Despite section 35 of the *Building Code Act, 1992*, if there is a conflict between the building code under the *Building Code Act, 1992* and a by-law to which this section applies, the building code prevails. 2006, c. 11, Sched. A, s. 102 (4); 2009, c. 33, Sched. 21, s. 4 (3).

Period for compliance for existing fortifications

(5) If the City makes an order to do work under subsection 385 (1) with respect to a contravention of the by-law, the order shall give not less than three months to complete the work if the fortifications or protective elements were present on the land on the day the by-law is passed. 2006, c. 11, Sched. A, s. 102 (5).

Conveyance of prisoners

103. If the attendance of a prisoner in a correctional institution is required at a hearing or proceeding and if the City was responsible for delivering the prisoner to the correctional institution, the City is responsible for conveying the prisoner from the correctional institution to the place of the hearing or proceeding and for the prisoner's return. 2006, c. 11, Sched. A, s. 103.

NATURAL ENVIRONMENT

Trees

104. (1) This section applies to a city by-law prohibiting or regulating the destruction or injuring of trees. 2006, c. 11, Sched. A, s. 104 (1).

Same

(2) In passing a by-law prohibiting or regulating the destruction or injuring of trees in woodlands, the City shall have regard to good forestry practices as defined in the *Forestry Act*. 2006, c. 11, Sched. A, s. 104 (2).

Exception from by-law

(3) The by-law does not apply to,

(a) activities or matters undertaken under a licence issued under the *Crown Forest Sustainability Act, 1994*;

(b) the injuring or destruction of trees by a person licensed under the *Surveyors Act* to engage in the practice of cadastral surveying or his or her agent, while making a survey;

(c) the injuring or destruction of trees imposed after December 31, 2002 as a condition to the approval of a site plan, a plan of subdivision or a consent under section 41, 51 or 53, respectively, of the *Planning Act* or as a requirement of a site plan agreement or subdivision agreement entered into under those sections;

(c.1) the injuring or destruction of trees imposed under subsection 114 (11) as a condition to the approval of plans or drawings for a site plan control area;

(d) the injuring or destruction of trees imposed after December 31, 2002 as a condition to a development permit authorized by regulation made under section 70.2 of the *Planning Act* or as a requirement of an agreement entered into under the regulation;

(e) the injuring or destruction of trees by a transmitter or distributor, as those terms are defined in section 2 of the *Electricity Act, 1998*, for the purpose of constructing and maintaining a transmission system or a distribution system, as those terms are defined in that section;

(f) the injuring or destruction of trees undertaken on land described in a licence for a pit or quarry or a permit for a wayside pit or wayside quarry issued under the *Aggregate Resources Act*; or

(g) the injuring or destruction of trees undertaken on land in order to lawfully establish and operate or enlarge any pit or quarry on land,

(i) that has not been designated under the *Aggregate Resources Act* or a predecessor of that Act, and

(ii) on which a pit or quarry is a permitted land use under a by-law passed under section 34 of the *Planning Act*. 2006, c. 11, Sched. A, s. 104 (3); 2006, c. 32, Sched. B, s. 19; 2009, c. 33, Sched. 21, s. 4 (4).

Definition

(4) In this section,

"woodlands" means woodlands as defined in the *Forestry Act* that are one hectare or more in area. 2006, c. 11, Sched. A, s. 104 (4).

Site alteration

105. (1) This section applies to a city by-law with respect to prohibiting or regulating,

(a) the placing or dumping of fill;

(b) the removal of topsoil; or

(c) the alteration of the grade of land. 2006, c. 11, Sched. A, s. 105 (1).

Exemptions

(2) The by-law does not apply to,

(a) the placing or dumping of fill, removal of topsoil or alteration of the grade of land imposed after December 31, 2002 as a condition to the approval of a site plan, a plan of subdivision or a consent under section 41, 51 or 53, respectively, of the *Planning Act* or as a requirement of a site plan agreement or subdivision agreement entered into under those sections;

(a.1) the placing or dumping of fill, removal of topsoil or alteration of the grade of land imposed under subsection 114 (11) as a condition to the approval of plans or drawings for a site plan control area;

(b) the placing or dumping of fill, removal of topsoil or alteration of the grade of land imposed after December 31, 2002 as a condition to a development permit authorized by regulation made under section 70.2 of the *Planning Act* or as a requirement of an agreement entered into under that regulation;

(c) the placing or dumping of fill, removal of topsoil or alteration of the grade of land undertaken by a transmitter or distributor, as those terms are defined in section 2 of the *Electricity Act, 1998*, for the purpose of constructing and maintaining a transmission system or a distribution system, as those terms are defined in that section;

(d) the placing or dumping of fill, removal of topsoil or alteration of the grade of land undertaken on land described in a licence for a pit or quarry or a permit for a wayside pit or wayside quarry issued under the *Aggregate Resources Act*;

(e) the placing or dumping of fill, removal of topsoil or alteration of the grade of land undertaken on land in order to lawfully establish and operate or enlarge any pit or quarry on land,

(i) that has not been designated under the *Aggregate Resources Act* or a predecessor of that Act, and

(ii) on which a pit or quarry is a permitted land use under a by-law passed under section 34 of the *Planning Act*;

(f) the placing or dumping of fill, removal of topsoil or alteration of the grade of land undertaken as an incidental part of drain construction under the *Drainage Act* or the *Tile Drainage Act*. 2006, c. 11, Sched. A, s. 105 (2); 2006, c. 32, Sched. B, s. 20.

Exceptions

(3) The by-law respecting the removal of topsoil does not apply to the removal of topsoil as an incidental part of a normal agricultural practice including such removal as an incidental part of sod-farming, greenhouse operations and nurseries for horticultural products. 2006, c. 11, Sched. A, s. 105 (3).

Exclusion

(4) The exception described in subsection (3) respecting the removal of topsoil as an incidental part of a normal agricultural practice does not include the removal of topsoil for sale, exchange or other disposition. 2006, c. 11, Sched. A, s. 105 (4).

By-law ceases to have effect

(5) If a regulation is made under section 28 of the *Conservation Authorities Act* respecting the placing or dumping of fill, removal of topsoil or alteration of the grade of land in any area of the municipality, a by-law passed under this section is of no effect in respect of that area. 2006, c. 11, Sched. A, s. 105 (5).

Definition

(6) In this section,

"topsoil" means those horizons in a soil profile, commonly known as the "O" and the "A" horizons, containing organic material and includes deposits of partially decomposed organic matter such as peat. 2006, c. 11, Sched. A, s. 105 (6).

Power of entry re: dangerous trees

105.1 (1) The City may enter on land, without notice to the owner, tenant or occupant of the land, to inspect a tree located on the land that, in the opinion of the City, is in a condition creating an immediate danger to persons or property. 2006, c. 32, Sched. B. s. 21.

Elimination of immediate danger

(2) If, upon inspection under subsection (1) or under subsection 375 (1) in respect of a by-law described in subsection (3), a tree on the land appears, in the opinion of the City, to be in a condition creating an immediate danger to persons or property, the City may enter on the land after making reasonable efforts to notify the owner, tenant or occupant of the land and remove the tree or otherwise eliminate the condition creating the immediate danger. 2006, c. 32, Sched. B. s. 21.

Subject of by-law

(3) A by-law for the purpose of subsection (2) is a by-law requiring owners or persons in charge of any premises to remove decayed, damaged or dangerous trees or branches that pose a danger to persons or property. 2006, c. 32, Sched. B. s. 21.

Lien

(4) Any amount spent by the City in doing what is authorized under subsection (2), together with interest at a rate to be determined by the City, is payable to the City and shall have priority lien status, and the certificate of the city clerk as to the amount is final. 2006, c. 32, Sched. B. s. 21.

Added to tax roll

(5) The amount payable to the City may be added to the tax roll to be collected in one year or to be collected in instalments over a period of not more than five years. 2006, c. 32, Sched. B. s. 21.

General provision not applicable

(6) Paragraphs 4 and 5 of subsection 375 (1) do not apply to the powers of entry under this section. 2006, c. 32, Sched. B. s. 21.

Registration of agreements respecting ravines

105.2 (1) An agreement described in subsection (2) may be registered against the land to which it applies and the City may enforce its provisions against the owner and, subject to the *Registry Act* and the *Land Titles Act*, any and all subsequent owners of the land. 2006, c. 32, Sched. B. s. 21.

Same

(2) Subsection (1) applies to an agreement that the City has entered into with the owner of land, under a City by-law, as a condition of a consent to destroy trees or other natural vegetation on a ravine, to excavate, grade or otherwise alter in elevation or contour any ravine or to provide facilities for and methods of disposal of storm, surface and waste water from any ravine and from any buildings or structures on the ravine and that deals with,

(a) walls, fences, hedges, trees, shrubs or other groundcover or facilities for the landscaping of the land of the owner or the protection of adjoining lands; or

(b) grading or alteration in elevation or contour of the land of the owner and the provision of facilities for and methods of disposal of storm, surface and waste water from the land and from any building or structure on the land. 2006, c. 32, Sched. B. s. 21.

ANIMALS

Impounding animals

106. If the City passes a by-law regulating or prohibiting with respect to the being at large or trespassing of animals, it may provide for,

(a) the seizure and impounding of animals being at large or trespassing contrary to the by-law;

(b) the sale of impounded animals,

(i) if they are not claimed within a reasonable time,

(ii) if the expenses of the City respecting the impounding of the animals are not paid, or

(iii) at such time and in such manner as is provided in the by-law. 2006, c. 11, Sched. A, s. 106.

Muzzling of dogs

107. (1) If the City requires the muzzling of a dog under any circumstances, city council shall, upon the request of the owner of the dog, hold a hearing to determine whether or not to exempt the owner in whole or in part from the requirement. 2006, c. 11, Sched. A, s. 107 (1).

Conditions

(2) An exemption may be granted subject to such conditions as council considers appropriate. 2006, c. 11, Sched. A, s. 107 (2).

Request does not stay requirement

(3) A request of the owner of a dog for a hearing under this section does not act as a stay of the muzzling requirement. 2006, c. 11, Sched. A, s. 107 (3).

STRUCTURES, INCLUDING FENCES AND SIGNS

Construction of green roofs or alternative roof surfaces

108. (1) Without limiting sections 7 and 8, those sections authorize the City to pass a by-law requiring and governing the construction of green roofs or of alternative roof surfaces that achieve similar levels of performance to green roofs if the provisions of the by-law do not conflict with the provisions of a regulation made under the *Building Code Act, 1992* respecting public health and safety, fire protection, structural sufficiency, conservation and environmental protection and the requirements respecting barrier-free access. 2006, c. 11, Sched. A, s. 108 (1); 2006, c. 32, Sched. B, s. 22 (1); 2009, c. 33, Sched. 21, s. 4 (5).

Same

(2) A by-law under subsection (1) prevails over a regulation made under the *Building Code Act, 1992*, despite section 35 of that Act. 2006, c. 11, Sched. A, s. 108 (2); 2006, c. 32, Sched. B, s. 22 (2).

Definition

(3) For the purposes of subsection (1),

"green roof" means a roof surface that supports the growth of vegetation over a substantial portion of its area for the purpose of water conservation or energy conservation. 2006, c. 11, Sched. A, s. 108 (3).

Repeal

(4) **This section is repealed on a day to be named by proclamation of the Lieutenant Governor. 2006, c. 11, Sched. A, s. 108 (4).**

Non-application of *Line Fences Act*

109. (1) The City may provide that the *Line Fences Act* does not apply to all or any part of the City. 2006, c. 11, Sched. A, s. 109 (1).

Exclusion

(2) Despite a by-law passed under subsection (1), section 20 of the *Line Fences Act* continues to apply throughout the City. 2006, c. 11, Sched. A, s. 109 (2).

Advertising devices

110. (1) A City by-law respecting advertising devices, including signs, does not apply to an advertising device that was lawfully erected or displayed on the day the by-law comes into force if the advertising device is not substantially altered, and the maintenance and repair of the advertising device or a change in the message or contents displayed is deemed not in itself to constitute a substantial alteration. 2006, c. 32, Sched. B, s. 23.

Lien for costs and charges

(2) All costs and charges incurred by the City for the removal, care and storage of an advertising device that is erected or displayed in contravention of a City by-law are a lien on the advertising device that may be enforced by the City under the *Repair and Storage Liens Act*. 2006, c. 32, Sched. B, s. 23.

Disposal costs

(3) All costs and charges incurred for disposing of an advertising device described in subsection (2) may be recovered by the City as a debt owed by the owner of the device. 2006, c. 32, Sched. B, s. 23.

Demolition and conversion of residential rental properties

111. (1) The City may prohibit and regulate the demolition of residential rental properties and may prohibit and regulate the conversion of residential rental properties to a purpose other than the purpose of a residential rental property. 2006, c. 11, Sched. A, s. 111 (1).

Same

(2) The power to pass a by-law respecting a matter described in subsection (1) includes the power,

(a) to prohibit the demolition of residential rental properties without a permit;

(b) to prohibit the conversion of residential rental properties to a purpose other than the purpose of a residential rental property without a permit; and

(c) to impose conditions as a requirement of obtaining a permit. 2006, c. 11, Sched. A, s. 111 (2).

Restriction

(3) The City cannot prohibit or regulate the demolition or conversion of a residential rental property that contains less than six dwelling units. 2006, c. 11, Sched. A, s. 111 (3).

Effect of building code, etc.

(4) Despite section 35 of the *Building Code Act, 1992*, in the event that the *Building Code Act, 1992* or a regulation made under that Act and a by-law prohibiting or regulating the demolition or conversion of a residential rental property treat the same subject matter in different ways, that Act or the regulation under that Act prevails and the by-law is inoperative to the extent that the Act or regulation and the by-law treat the same subject matter. 2006, c. 11, Sched. A, s. 111 (4).

Same

(5) If a permit to demolish a residential rental property is issued under this section, no permit is required under section 8 of the *Building Code Act, 1992* to demolish the property. 2006, c. 11, Sched. A, s. 111 (5).

Report

(6) The City shall report statistics and other information concerning the demolition and conversion of residential rental properties to the Minister of Municipal Affairs and Housing and shall do so at the times and in the form and manner specified by the Minister. 2006, c. 11, Sched. A, s. 111 (6).

112. REPEALED: 2006, c. 32, Sched. B, s. 24.

Zoning by-laws re area, density and height

113. (1) The authority to regulate provided in paragraph 4 of subsection 34 (1) of the *Planning Act* includes and, despite the decision of any court, is deemed always to have included the authority to regulate the minimum area of the parcel of land mentioned therein and to regulate the minimum and maximum density and the minimum and maximum height of development in the City or in the area or areas defined in the by-law. 2006, c. 11, Sched. A, s. 113 (1).

Zoning with conditions

(2) If the official plan in effect in the City contains policies relating to zoning with conditions, the City may, in a by-law passed under section 34 of the *Planning Act*, permit a use of land or the erection, location or use of buildings or structures and impose one or more prescribed conditions on the use, erection or location. 2006, c. 11, Sched. A, s. 113 (2).

Same

(2.1) The prescribed conditions referred to in subsection (2) may be made subject to such limitations as may be prescribed. 2006, c. 32, Sched. B, s. 25.

Same

(3) When a prescribed condition is imposed under subsection (2),

(a) the City may require an owner of land to which the by-law applies to enter into an agreement with the City relating to the condition;

(b) the agreement may be registered against the land to which it applies; and

(c) the City may enforce the agreement against the owner and any and all subsequent owners of the land. 2006, c. 11, Sched. A, s. 113 (3).

Notice or public meeting not required

113.1 Despite section 34 of the *Planning Act*, the City may amend by-laws passed under that section without giving notice to any person and without holding open houses, public meetings or public hearings if the effect of the amending by-law is only to set out the municipal addresses to which the original by-law applies. 2006, c. 32, Sched. B, s. 26.

Front yard parking

Definitions

113.2 (1) In this section,

"front yard" means that portion of private property located between the front wall of a residential building on the property and the abutting public highway; ("cour avant")

"front yard parking" means the parking of a private passenger motor vehicle or motorcycle in a front yard. ("stationnement en cour avant") 2006, c. 32, Sched. B, s. 26.

Conflict between by-laws

(2) Despite section 71 of the *Planning Act*, in the event of a conflict between a by-law passed under sections 7 and 8 authorizing front yard parking and a by-law passed under the *Planning Act*, or a predecessor of that Act, prohibiting front yard parking, the by-law passed under sections 7 and 8 prevails. 2006, c. 32, Sched. B, s. 26.

Site plan control area

Definition

114. (1) In this section,

"development" means the construction, erection or placing of one or more buildings or structures on land or the making of an addition or alteration to a building or structure that has the effect of substantially increasing the size or usability thereof, or the laying out and establishment of a commercial parking lot or of sites for the location of three or more trailers or of sites for the location of three or more mobile homes as defined in subsection 46 (1) of the *Planning Act* or of sites for the construction, erection or location of three or more land lease community homes as defined in subsection 46 (1) of the *Planning Act*. 2006, c. 11, Sched. A, s. 114 (1).

Establishment of site plan control area

(2) Where in an official plan an area is shown or described as a proposed site plan control area, the City may, by by-law, designate the whole or any part of such area as a site plan control area. 2006, c. 11, Sched. A, s. 114 (2).

Designation of site plan control area

(3) A by-law passed under subsection (2) may designate a site plan control area by reference to one or more land use designations contained in a by-law passed under section 34 of the *Planning Act*. 2006, c. 11, Sched. A, s. 114 (3).

Consultation

(4) The City,

(a) shall permit applicants to consult with the City before submitting plans and drawings for approval under subsection (5); and

(b) may, by by-law, require applicants to consult with the City as described in clause (a). 2006, c. 11, Sched. A, s. 114 (4).

Approval of plans or drawings

(5) No person shall undertake any development in an area designated under subsection (2) unless the City or, where a referral has been made under subsection (15), the Ontario Municipal Board has approved one or both, as the City may determine, of the following:

1. Plans showing the location of all buildings and structures to be erected and showing the location of all facilities and works to be provided in conjunction therewith and of all facilities and works required under clause (11) (a).
2. Drawings showing plan, elevation and cross-section views for each building to be erected, except a building to be used for residential purposes containing less than 25 dwelling units, which drawings are sufficient to display,

i. the massing and conceptual design of the proposed building,

ii. the relationship of the proposed building to adjacent buildings, streets, and exterior areas to which members of the public have access,

iii. the provision of interior walkways, stairs, elevators and escalators to which members of the public have access from streets, open spaces and interior walkways in adjacent buildings,

iv. matters relating to exterior design, including without limitation the character, scale, appearance and design features of buildings, and their sustainable design, but only to the extent that it is a matter of exterior design, if an official plan and a by-law passed under subsection (2) that both contain provisions relating to such matters are in effect in the City, and

v. the sustainable design elements on any adjoining highway under the City's jurisdiction, including without limitation trees, shrubs, hedges, plantings or other ground cover, permeable paving materials, street furniture, curb ramps, waste and recycling containers and bicycle parking facilities, if an official plan and a by-law passed under subsection (2) that both contain provisions relating to such matters are in effect in the City. 2006, c. 11, Sched. A, s. 114 (5).

Exclusions from site plan control

(6) The following matters are not subject to site plan control:

1. The interior design.
2. The layout of interior areas, excluding interior walkways, stairs, elevators and escalators referred to in subparagraph 2 iii of subsection (5).
3. The manner of construction and construction standards. 2006, c. 11, Sched. A, s. 114 (6).

Dispute about scope of site plan control

(7) The owner of land or the City may make a motion for directions to have the Ontario Municipal Board determine a dispute about whether a matter referred to in paragraph 1 or 2 of subsection (5) is subject to site plan control. 2006, c. 11, Sched. A, s. 114 (7).

Final determination

(8) The Ontario Municipal Board's determination under subsection (7) is not subject to appeal or review. 2006, c. 11, Sched. A, s. 114 (8).

Drawings for residential buildings

(9) Despite the exception provided in paragraph 2 of subsection (5), city council may require the drawings mentioned in that paragraph for a building to be used for residential purposes containing less than 25 dwelling units if the proposed building is to be located in an area specifically designated in the official plan mentioned in subsection (2) as an area in which such drawings may be required. 2006, c. 11, Sched. A, s. 114 (9).

Proviso

(10) Nothing in this section is deemed to confer on the City power to limit the height or density of buildings to be erected on the land. 2006, c. 11, Sched. A, s. 114 (10).

Conditions to approval of plans

(11) As a condition to the approval of the plans and drawings referred to in subsection (5), the City may require the owner of the land to,

(a) provide to the satisfaction of and at no expense to the City any or all of the following:

(i) subject to subsection (12), widenings of highways that abut on the land,

(ii) facilities to provide access to and from the land such as access ramps and curbings and traffic direction signs,

(iii) off-street vehicular loading and parking facilities, either covered or uncovered, access driveways, including driveways for emergency vehicles, and the surfacing of such areas and driveways,

(iv) walkways and walkway ramps, including the surfacing thereof, and all other means of pedestrian access,

(v) facilities for the lighting, including floodlighting, of the land or of any buildings or structures thereon,

(vi) walls, fences, hedges, trees, shrubs or other groundcover or facilities for the landscaping of the lands or the protection of adjoining lands,

(vii) vaults, central storage and collection areas and other facilities and enclosures for the storage of garbage and other waste material,

(viii) easements conveyed to the City for the construction, maintenance or improvement of watercourses, ditches, land drainage works, sanitary sewage facilities and other public utilities of the City on the land,

(ix) grading or alteration in elevation or contour of the land and provision for the disposal of storm, surface and waste water from the land and from any buildings or structures thereon;

(b) maintain to the satisfaction of the City and at the sole risk and expense of the owner any or all of the facilities or works mentioned in subclauses (a) (ii) to (ix), including the removal of snow from access ramps and driveways, parking and loading areas and walkways;

(c) enter into one or more agreements with the City dealing with and ensuring the provision of any or all of the facilities, works or matters mentioned in clause (a) or (e) and the maintenance thereof as mentioned in clause (b) or with the provision and approval of the plans and drawings referred to in subsection (5);

(d) enter into one or more agreements with the City ensuring that development proceeds in accordance with the plans and drawings approved under subsection (5);

(e) subject to subsection (13), convey part of the land to the City to the satisfaction of and at no expense to the City for a public transit right of way. 2006, c. 11, Sched. A, s. 114 (11).

Widening must be described in official plan

(12) An owner may not be required to provide a highway widening under subclause (11) (a) (i) unless the highway to be widened is shown on or described in an official plan as a highway to be widened and the extent of the proposed widening is likewise shown or described. 2006, c. 11, Sched. A, s. 114 (12).

Limitation

(13) An owner of land may not be required to convey land under clause (11) (e) unless the public transit right of way to be provided is shown on or described in an official plan. 2006, c. 11, Sched. A, s. 114 (13).

Registration of agreements

(14) Any agreement entered into under clause (11) (c) or (d) may be registered against the land to which it applies and the City is entitled to enforce the provisions thereof against the owner and, subject to the provisions of the *Registry Act* and the *Land Titles Act*, any and all subsequent owners of the land. 2006, c. 11, Sched. A, s. 114 (14).

Appeal to O.M.B.

(15) If the City fails to approve the plans or drawings referred to in subsection (5) within 30 days after they are submitted to the City or if the owner of the land is not satisfied with any requirement made by the City under subsection (11) or with any part thereof, including the terms of any agreement required, the owner may require the plans or drawings or the unsatisfactory requirements, or parts thereof, including the terms of any agreement required, to be referred to the Ontario Municipal Board by written notice to the secretary of the Board and to the city clerk. 2006, c. 11, Sched. A, s. 114 (15).

Hearing

(16) The Ontario Municipal Board shall hear and determine the matter in issue and determine the details of the plans or drawings and determine the requirements, including the provisions of any agreement required, and the decision of the Board is final. 2006, c. 11, Sched. A, s. 114 (16).

Classes of development, delegation

(17) Where the City has designated a site plan control area under this section, the City may, by by-law,

(a) define any class or classes of development that may be undertaken without the approval of plans and drawings otherwise required under subsection (5); and

(b) delegate to either a committee of city council or to an appointed officer of the City identified in the by-law either by name or position occupied, any of the City's powers or authority under this section, except the authority to define any class or classes of development as mentioned in clause (a). 2006, c. 11, Sched. A, s. 114 (17).

Development permit system

114.1 A regulation made under section 70.2 of the *Planning Act* may,

(a) vary, supplement or override section 113 or 114 of this Act or any by-law passed under either of those sections as necessary to establish a development permit system;

(b) authorize or require the City to pass a by-law to vary, supplement or override a by-law passed under section 113 or 114 as necessary to establish a development permit system;

(c) if the City has adopted or established a development permit system,

(i) exempt it from any provision of section 113 or 114 set out in the regulation,

(ii) prohibit it from passing a by-law under those provisions of section 113 or 114 that are specified in the regulation. 2006, c. 32, Sched. B, s. 27.

Appeal body for local land use planning matters

115. (1) The City may by by-law constitute and appoint one appeal body for local land use planning matters, composed of such persons as the City considers advisable, subject to subsections (2), (3) and (4). 2006, c. 11, Sched. A, s. 115 (1).

Term and qualifications

(2) A person who is appointed to the appeal body,

(a) shall serve for the prescribed term, or if no term is prescribed, for the term specified in the by-law; and

(b) shall have the prescribed qualifications, if any. 2006, c. 11, Sched. A, s. 115 (2).

Eligibility criteria

(3) In appointing persons to the appeal body, the City shall have regard to any prescribed eligibility criteria. 2006, c. 11, Sched. A, s. 115 (3).

Restriction

(4) The City shall not appoint to the appeal body a person who is,

(a) a city employee;

(b) a member of city council, a land division committee, a committee of adjustment or a planning advisory committee; or

(c) a member of a prescribed class. 2006, c. 11, Sched. A, s. 115 (4).

Power to hear appeals

(5) The City may by by-law empower the appeal body to hear appeals under,

(a) subsection 45 (12) of the *Planning Act*;

(b) subsections 53 (14), (19) and (27) of the *Planning Act*; or

(c) the provisions listed in both clauses (a) and (b). 2006, c. 11, Sched. A, s. 115 (5).

Effect of by-law under subs. (5)

(6) If a by-law has been passed under subsection (5),

(a) the appeal body has all the powers and duties of the Ontario Municipal Board under this section and the relevant provisions of the *Planning Act*;

(b) all references in this section and the *Planning Act* to the Ontario Municipal Board in connection with appeals shall be read as references to the appeal body; and

(c) appeals under the relevant provisions shall be made to the appeal body, not to the Ontario Municipal Board. 2006, c. 11, Sched. A, s. 115 (6).

Prescribed requirements

(7) The appeal body shall comply with any prescribed requirements, including, without limitation, requirements for the rules governing the practice and procedure before the appeal body. 2006, c. 11, Sched. A, s. 115 (7).

Fee

the authority may levy the minimum sum against the municipality. R.S.O. 1990, c. C.27, s. 27 (4); 1996, c. 1, Sched. M, s. 47 (3).

Notice of apportionment

(5) The secretary-treasurer of the authority, forthwith after the amounts have been apportioned under subsections (2), (3) and (4), shall certify to the clerk of each participating municipality the total amount that has been levied under those subsections, and the amount shall be collected by the municipality in the same manner as municipal taxes for general purposes. R.S.O. 1990, c. C.27, s. 27 (5).

Levy where only part of municipality in area

(6) Where only a part of a participating municipality is situated in the area over which the authority has jurisdiction, the amount apportioned to that municipality may be charged only against the rateable property in that part of the municipality and shall be collected in the same manner as municipal taxes for general purposes. R.S.O. 1990, c. C.27, s. 27 (6).

Enforcement of payment

(7) An authority may enforce payment against any participating municipality of any portion of the maintenance costs or administration costs levied against the municipality as a debt due by the municipality to the authority. R.S.O. 1990, c. C.27, s. 27 (7).

Appeal

(8) A municipality against which a levy is made under this section may appeal the levy to the Mining and Lands Commissioner appointed under the *Ministry of Natural Resources Act*. 1996, c. 1, Sched. M, s. 47 (4).

Time for appeal

(9) The appeal must be commenced within 30 days after the municipality receives notice of the levy from the authority. 1996, c. 1, Sched. M, s. 47 (4).

Parties

(10) The parties to the appeal are the municipality, the authority and any other person added as a party by the Commissioner. 1996, c. 1, Sched. M, s. 47 (4).

Compliance pending determination

(11) The municipality shall comply with the levy pending the determination of the appeal. 1996, c. 1, Sched. M, s. 47 (4).

Matters to be considered at hearing

(12) The Commissioner shall hold a hearing on the appeal and shall consider,

(a) whether the levy complies with this section and the regulations made under subsection (16); and

(b) whether the levy is otherwise appropriate. 1996, c. 1, Sched. M, s. 47 (4).

Powers of Commissioner

(13) The Commissioner may, by order, confirm, rescind or vary the amount of the levy and may order the authority or the municipality to pay any amount owing as a result. 1996, c. 1, Sched. M, s. 47 (4).

No appeal

(14) No appeal lies from the decision of the Commissioner. 1996, c. 1, Sched. M, s. 47 (4).

When subss. (8-14) begin to apply

(15) Subsections (8) to (14) do not apply until the first regulation made under subsection (16) comes into force. 1996, c. 1, Sched. M, s. 47 (4).

Regulations re levies

(16) The Lieutenant Governor in Council may make regulations governing the nature and amount of the levies made by authorities under this section, including regulations that restrict or prohibit the making of levies described in the regulations. 1996, c. 1, Sched. M, s. 47 (4).

Regulations by authority re area under its jurisdiction

28. (1) Subject to the approval of the Minister, an authority may make regulations applicable in the area under its jurisdiction,

(a) restricting and regulating the use of water in or from rivers, streams, inland lakes, ponds, wetlands and natural or artificially constructed depressions in rivers or streams;

(b) prohibiting, regulating or requiring the permission of the authority for straightening, changing, diverting or interfering in any way with the existing channel of a river, creek, stream or watercourse, or for changing or interfering in any way with a wetland;

(c) prohibiting, regulating or requiring the permission of the authority for development if, in the opinion of the authority, the control of flooding, erosion, dynamic beaches or pollution or the conservation of land may be affected by the development;

(d) providing for the appointment of officers to enforce any regulation made under this section or section 29;

(e) providing for the appointment of persons to act as officers with all of the powers and duties of officers to enforce any regulation made under this section. 1998, c. 18, Sched. I, s. 12.

Delegation of powers

(2) A regulation made under subsection (1) may delegate any of the authority's powers or duties under the regulation to the authority's executive committee or to any other person or body, subject to any limitations and requirements that may be set out in the regulation. 1998, c. 18, Sched. I, s. 12.

Conditional permission

(3) A regulation made under clause (1) (b) or (c) may provide for permission to be granted subject to conditions and for the cancellation of the permission if conditions are not met. 1998, c. 18, Sched. I, s. 12.

References to maps

(4) A regulation made under subsection (1) may refer to any area affected by the regulation by reference to one or more maps that are filed at the head office of the authority and are available for public review during normal office business hours. 1998, c. 18, Sched. I, s. 12.

Minister's approval of development regulations

(5) The Minister shall not approve a regulation made under clause (1) (c) unless the regulation applies only to areas that are,

(a) adjacent or close to the shoreline of the Great Lakes-St. Lawrence River System or to inland lakes that may be affected by flooding, erosion or dynamic beach hazards;

(b) river or stream valleys;

(c) hazardous lands;

(d) wetlands; or

(e) other areas where, in the opinion of the Minister, development should be prohibited or regulated or should require the permission of the authority. 1998, c. 18, Sched. I, s. 12.

Regulations by L.G. in C. governing content of authority's regulations

(6) The Lieutenant Governor in Council may make regulations governing the content of regulations made by authorities under subsection (1), including flood event standards and other standards that may be used, and setting out what must be included or excluded from regulations made by authorities under subsection (1). 1998, c. 18, Sched. I, s. 12.

Invalid regulation

(7) A regulation made by an authority under subsection (1) that does not conform with the requirements of a regulation made by the Lieutenant Governor in Council under subsection (6) is not valid. 1998, c. 18, Sched. I, s. 12.

Transition

(8) Subject to subsection (9), if a regulation is made by the Lieutenant Governor in Council under subsection (6), subsection (7) does not apply to a regulation that was previously made by an authority

under subsection (1) until two years after the regulation made by the Lieutenant Governor in Council comes into force. 1998, c. 18, Sched. I, s. 12.

Same

(9) If a regulation made by the Lieutenant Governor in Council under subsection (6) is amended by an amending regulation, subsection (7) does not apply, in respect of the amendment, to a regulation that was made by an authority under subsection (1) before the amending regulation, until such time as may be specified in the amending regulation. 1998, c. 18, Sched. I, s. 12.

Exceptions

(10) No regulation made under subsection (1),

(a) shall limit the use of water for domestic or livestock purposes;

(b) shall interfere with any rights or powers conferred upon a municipality in respect of the use of water for municipal purposes;

(c) shall interfere with any rights or powers of any board or commission that is performing its functions for or on behalf of the Government of Ontario; or

(d) shall interfere with any rights or powers under the *Electricity Act, 1998* or the *Public Utilities Act.* 1998, c. 15, Sched. E, s. 3 (8); 1998, c. 18, Sched. I, s. 12.

Activities under the *Aggregate Resources Act*

(11) A requirement for permission of an authority in a regulation made under clause (1) (b) or (c) does not apply to an activity approved under the *Aggregate Resources Act* after the *Red Tape Reduction Act, 1998* received Royal Assent. 1998, c. 18, Sched. I, s. 12.

Right to hearing

(12) Permission required under a regulation made under clause (1) (b) or (c) shall not be refused or granted subject to conditions unless the person requesting the permission has been given the opportunity to require a hearing before the authority or, if the authority so directs, before the authority's executive committee. 1998, c. 18, Sched. I, s. 12.

Powers of authority

(13) After holding a hearing under subsection (12), the authority or executive committee, as the case may be, shall,

(a) refuse the permission; or

(b) grant the permission, with or without conditions. 1998, c. 18, Sched. I, s. 12.

Grounds for refusing permission

(13.1) If the permission that the person requests is for development related to a renewable energy project, as defined in section 1 of the *Green Energy Act, 2009*, the authority or executive committee, as the case may be,

(a) shall not refuse the permission unless it is necessary to do so to control pollution, flooding, erosion or dynamic beaches; and

(b) shall not impose conditions unless they relate to controlling pollution, flooding, erosion or dynamic beaches. 2009, c. 12, Sched. L, s. 2.

Reasons for decision

(14) If the authority or its executive committee, after holding a hearing, refuses permission or grants permission subject to conditions, the authority or executive committee, as the case may be, shall give the person who requested permission written reasons for the decision. 1998, c. 18, Sched. I, s. 12.

Appeal

(15) A person who has been refused permission or who objects to conditions imposed on a permission may, within 30 days of receiving the reasons under subsection (14), appeal to the Minister who may,

(a) refuse the permission; or

(b) grant the permission, with or without conditions. 1998, c. 18, Sched. I, s. 12.

(2) For the purposes of clause (1) (a), the following matters shall be embodied in the corporation's letters patent:

1. The corporation shall have at least five directors.
2. No employee of the corporation may be a director of it.
3. The corporation shall not purchase goods or services from any director, officer or person related to a director or officer of the corporation unless there is only one available source of the goods or services within a reasonable distance of the day nursery.
4. The corporation shall not sell goods or services, other than child care services, to any director, officer or person related to a director or officer of the corporation.
5. The corporation shall not lend money to or borrow money from any director, officer or person related to a director or officer of the corporation.
6. The corporation shall not rent property to or from any director, officer or person related to a director or officer of the corporation.
7. The corporation shall not engage in any other transaction which may directly or indirectly confer a financial benefit on one of its directors.
8. The directors of the corporation shall serve as directors without remuneration but may be reimbursed for reasonable expenses incurred in the performance of their duties.
9. No director of the corporation shall directly or indirectly receive any form of money or money's worth as a result of his or her position as director.
10. Upon dissolution of the corporation and after payment of all of its debts and liabilities, the remaining property of the corporation shall be distributed or disposed of only to charitable or non-profit organizations which provide child care, which are beneficial to the community and which operate solely in Ontario. O. Reg. 708/92, s. 2; O. Reg. 17/94, s. 1 (2); O. Reg. 505/06, s. 2.

(3) For the purposes of paragraphs 3, 4 and 5 of subsection (2), a person is related to a director or officer if,

(a) the person is married to the director or officer;

(b) the person is living in a conjugal relationship outside marriage with the director or officer;

(c) the person is the son or daughter or mother or father of the director or officer;

(d) the person is a relative of the director or officer and they have the same home;

(e) the person is a corporation and voting securities in the corporation that together carry more than 10 per cent of the voting rights attached to all voting securities of the corporation outstanding at the time are beneficially owned directly or indirectly by any combination of,

(i) the director or officer,

(ii) any of the persons referred to in clauses (a) to (d), and

(iii) the partner or the employer of the director or officer. O. Reg. 708/92, s. 2; O. Reg. 38/00, s. 2; O. Reg. 287/05, s. 2.

ORGANIZATION AND MANAGEMENT

3. (1) Subject to subsections (2) and (3), every operator shall be responsible for the operation and management of each day nursery or private-home day care agency operated by the operator, including the program, financial and personnel administration of each such day nursery or private-home day care agency. R.R.O. 1990, Reg. 262, s. 3 (1).

(2) An operator may appoint a person who shall be responsible to the operator for the day-to-day operation and management of each day nursery or private-home day care agency in accordance with subsection (1). R.R.O. 1990, Reg. 262, s. 3 (2).

(3) Where an operator or a person appointed under subsection (2) is absent, the powers and duties of the operator or the person appointed under subsection (2) shall be exercised and performed by such person as the operator designates. R.R.O. 1990, Reg. 262, s. 3 (3).

(4) Every operator of a private-home day care agency shall employ at least one full-time private-home day care visitor, who shall be a person described in section 61, for each twenty-five locations where private-home day care is provided by the operator, unless otherwise approved by a Director, who shall provide support and supervision at each location where private-home day care is provided by the operator and who shall be responsible to the operator. R.R.O. 1990, Reg. 262, s. 3 (4).

(5) Every operator of a day nursery shall employ a supervisor, who shall be a person described in section 58, who shall plan and direct the program of the day nursery, be in charge of the children, oversee the staff and who shall be responsible to the operator. R.R.O. 1990, Reg. 262, s. 3 (5).

BUILDING AND ACCOMMODATION

4. (1) Every person who applies for a licence to establish, operate or maintain a day nursery under section 11 of the Act shall at the time of application file with a Director evidence that the premises used or to be used as a day nursery comply with,

(a) the laws affecting the health of inhabitants of the municipality or the reserve of a band, as the case may be;

(b) any rule, regulation, direction or order of the local board of health and any direction or order of the local medical officer of health that may affect the operation;

(c) any by-law of the municipality or any by-law of the council of the band on the reserve, as the case may be, and any other law for the protection of persons from fire hazards;

(d) any restricted area, standard of housing or building by-law passed by the municipality in which the premises are located pursuant to Part V of the *Planning Act* or any predecessor thereof and any by-law of the council of the band on the reserve to regulate the construction, repair or use of buildings;

(e) the requirements of the Building Code made under the *Building Code Act, 1992*, where applicable; and

(f) the requirements of the Fire Code made under the *Fire Protection and Prevention Act, 1997*, where applicable. R.R.O. 1990, Reg. 262, s. 4 (1); O. Reg. 505/06, s. 3.

(2) Every person who applies for a licence to establish, operate or maintain a private-home day care agency under section 11 of the Act shall ensure that each location used or to be used by the person to provide private-home day care complies with clauses (1) (a), (b), (c) and (d). R.R.O. 1990, Reg. 262, s. 4 (2).

5. (1) Where a person proposes that a new building be erected or an existing building be used, altered or renovated for use as a day nursery or that alterations or renovations be made to premises used by a day nursery, the person shall not commence the erection, use, alteration or renovation until plans, including those of the playground area for the day nursery, are approved by a Director, except where the plans are approved by the Minister under section 69. R.R.O. 1990, Reg. 262, s. 5 (1).

(2) The plans referred to in subsection (1) shall include space designated for each of the following:

1. Washing, dressing, toileting and isolation.
2. Storage for toys, indoor play materials and equipment.
3. Storage for food.
4. Storage of required records.
5. Storage for medical supplies, cleaning materials and equipment and other hazardous substances.
6. Heating and electrical equipment. R.R.O. 1990, Reg. 262, s. 5 (2).

(3) Every operator of a day nursery shall ensure that the spaces in each day nursery operated by the operator that are referred to in paragraphs 5 and 6 of subsection (2) are inaccessible to children. R.R.O. 1990, Reg. 262, s. 5 (3).

(4) The operator of a day nursery that has a program that runs for six hours or more in a day shall ensure that in addition to the spaces referred to in subsection (2) the day nursery has space designated for each of the following:

1. Eating and resting.
2. The preparation of food if meals are prepared on the premises.
3. Storage for beds and linen.
4. A staff rest area.
5. Storage for outdoor play equipment.
6. Office area. R.R.O. 1990, Reg. 262, s. 5 (4).

6. (1) Subject to subsection (2), every operator of a day nursery shall ensure that each day nursery operated by the operator has play activity space of at least 2.8 square metres of unobstructed floor space for each child based on the licensed capacity. R.R.O. 1990, Reg. 262, s. 6 (1).

(2) In the case of a day nursery for handicapped children, the play activity space referred to in subsection (1) shall,

(a) be at least five square metres of unobstructed floor space for each child based on the licensed capacity; and

(b) where more than twelve children but fewer than twenty-four children are enrolled, be divided into two separate rooms with one additional room being provided for each twelve children or less where there are in excess of twenty-three children. R.R.O. 1990, Reg. 262, s. 6 (2).

7. Every operator of an integrated day nursery that enrols handicapped children funded under the Act or the *Developmental Services Act* shall ensure that each such day nursery operated by the operator has one room or area set aside as a resource area for individual and small group training of the handicapped children. R.R.O. 1990, Reg. 262, s. 7; O. Reg. 435/01, s. 2.

8. (1) Every operator of a day nursery shall ensure that each day nursery operated by the operator has,

(a) where the day nursery is licensed to enrol children under eighteen months of age,

(i) a separate play activity room for each ten children or less based on the licensed capacity, and

(ii) a separate sleeping area that is separated from any play activity space for each ten children or less based on the licensed capacity;

(b) where a day nursery is licensed to care for children eighteen months of age or over up to and including thirty months of age, a separate play activity room for each fifteen children or less based on the licensed capacity;

(c) where the day nursery is licensed to care for children thirty-one months of age or over up to and including five years of age, a separate play activity room for each twenty-four children or less based on the licensed capacity;

(d) where the day nursery is licensed to care for children 44 months of age or over and up to and including 67 months of age as of August 31 of the year, a separate play activity room for each 20 children or less based on the licensed capacity;

(e) where the day nursery is licensed to care for children 56 months of age or over and up to and including 67 months of age as of August 31 of the year, a separate play area for each 24 children or less based on the licensed capacity; and

(f) where the day nursery is licensed to care for children 68 months of age or over as of August 31 of the year up to and including 12 years of age, a separate play area for each 30 children or less based on the licensed capacity, unless otherwise approved by a Director. R.R.O. 1990, Reg. 262, s. 8; O. Reg. 505/06, s. 4 (1).

(2) In respect of operators who held a licence before November 3, 2006, this section as it read immediately before November 3, 2006 continues to apply to those operators until the licence is renewed under subsection 75 (7). O. Reg. 505/06, s. 4 (2).

9. Every operator of a day nursery shall ensure that each room in each day nursery operated by the operator that is for the use of children under six years of age or for the use of handicapped children is on or below the second storey unless otherwise approved by a Director. R.R.O. 1990, Reg. 262, s. 9.

10. Every operator of a day nursery shall ensure that the window glass area in each play activity room of each day nursery operated by the operator that has a program that runs for six hours or more and that was licensed for the first time after the 31st day of December, 1983, contains an area that is at least equivalent to 10 per cent of the floor area of the play activity room. R.R.O. 1990, Reg. 262, s. 10.

11. Every operator of a day nursery shall ensure that artificial illumination in each play activity room of each day nursery operated by the operator is at the level of at least 55 dekalux. R.R.O. 1990, Reg. 262, s. 11.

12. Every operator shall ensure that in each day nursery operated by the operator and in each location where private-home day care is provided by the operator, the temperature is maintained at a level of at least twenty degrees Celsius. R.R.O. 1990, Reg. 262, s. 12.

13. (1) Every operator of a private-home day care agency shall ensure that before a premises is used as a location where private-home day care is to be provided by the operator, the premises, including the outdoor play space, is inspected by a private-home day care visitor employed by the operator to ensure compliance with the Act and this Regulation and, where the premises is so used, that further inspections

(2) The notice required under this section must be mailed not later than 20 days after the day the council's decision is made. 1997, c. 27, s. 21 (2).

Appeal of council's decision

22. (1) A complainant may appeal the decision of the council of the municipality to the Ontario Municipal Board by filing with the clerk of the municipality, on or before the last day for appealing the decision, a notice of appeal setting out the reasons for the appeal. 1997, c. 27, s. 22 (1).

Additional ground

(2) A complainant may also appeal to the Ontario Municipal Board if the council of the municipality does not deal with the complaint within 60 days after the complaint is made by filing with the clerk of the municipality a notice of appeal. 1997, c. 27, s. 22 (2).

Clerk's duties on appeal

23. (1) If a notice of appeal under subsection 22 (1) is filed with the clerk of the municipality on or before the last day for appealing a decision, the clerk shall compile a record that includes,

(a) a copy of the development charge by-law certified by the clerk;

(b) the original or a true copy of the complaint and all written submissions and material received in support of the complaint;

(c) a copy of the council's decision certified by the clerk; and

(d) an affidavit or declaration certifying that notice of the council's decision and of the last day for appealing it was given in accordance with this Act. 1997, c. 27, s. 23 (1).

Same

(2) If a notice of appeal under subsection 22 (2) is filed with the clerk of the municipality, the clerk shall compile a record that includes,

(a) a copy of the development charge by-law certified by the clerk; and

(b) the original or a true copy of the complaint and all written submissions and material received in support of the complaint. 1997, c. 27, s. 23 (2).

Same

(3) The clerk shall forward a copy of the notice of appeal and the record to the secretary of the Ontario Municipal Board within 30 days after the notice is received and shall provide such other information and material that the Board may require in respect of the appeal. 1997, c. 27, s. 23 (3).

OMB hearing of appeal

24. (1) The Ontario Municipal Board shall hold a hearing to deal with any notice of appeal relating to a complaint forwarded by the clerk of a municipality. 1997, c. 27, s. 24 (1).

Parties

(2) The parties to the appeal are the appellant and the municipality. 1997, c. 27, s. 24 (2).

Notice to parties

(3) The Ontario Municipal Board shall give notice of the hearing to the parties. 1997, c. 27, s. 24 (3).

Powers of OMB

(4) After the hearing, the Ontario Municipal Board may do anything that could have been done by the council of the municipality under subsection 20 (6). 1997, c. 27, s. 24 (4).

Dismissal without hearing

(5) Despite subsection (1), the Ontario Municipal Board may, where it is of the opinion that the complaint set out in the notice of appeal is insufficient, dismiss the appeal without holding a full hearing after notifying the appellant and giving the appellant an opportunity to make representations as to the merits of the appeal. 1997, c. 27, s. 24 (5).

Refund if development charge reduced

25. (1) If a development charge that has already been paid is reduced by the council of a municipality under section 20 or by the Ontario Municipal Board under section 24, the municipality shall immediately refund the overpayment. 1997, c. 27, s. 25 (1).

Interest

(2) The municipality shall pay interest on an amount it refunds at a rate not less than the prescribed minimum interest rate from the time the amount was paid to the municipality to the time it is refunded. 1997, c. 27, s. 25 (2).

COLLECTION OF DEVELOPMENT CHARGES

When development charge is payable

26. (1) A development charge is payable for a development upon a building permit being issued for the development unless the development charge by-law provides otherwise under subsection (2). 1997, c. 27, s. 26 (1).

Special case, approval of plan of subdivision

(2) A municipality may, in a development charge by-law, provide that a development charge for services set out in paragraphs 1, 2, 3, 4 or 5 of subsection 5 (5) for development that requires approval of a plan of subdivision under section 51 of the *Planning Act* or a consent under section 53 of the *Planning Act* and for which a subdivision agreement or consent agreement is entered into, be payable immediately upon the parties entering into the agreement. 1997, c. 27, s. 26 (2).

Agreement prevails

(3) This section does not apply in cases where there is an agreement under section 27. 1997, c. 27, s. 26 (3).

Agreement, early or late payment

27. (1) A municipality may enter into an agreement with a person who is required to pay a development charge providing for all or any part of a development charge to be paid before or after it would otherwise be payable. 1997, c. 27, s. 27 (1).

Amount of charge payable

(2) The total amount of a development charge payable under an agreement under this section is the amount of the development charge that would be determined under the by-law on the day specified in the agreement or, if no such day is specified, at the earlier of,

(a) the time the development charge or any part of it is payable under the agreement;

(b) the time the development charge would have been payable in the absence of the agreement. 1997, c. 27, s. 27 (2).

Interest on late payments

(3) An agreement under this section may allow the municipality to charge interest, at a rate stipulated in the agreement, on that part of the development charge paid after it would otherwise be payable. 1997, c. 27, s. 27 (3).

Withholding of building permit until charge paid

28. Despite any other Act, a municipality is not required to issue a building permit for development to which a development charge applies unless the development charge has been paid. 1997, c. 27, s. 28.

Upper-tier municipalities, development charges

29. If a development charge is imposed by an upper-tier municipality on a development in an area municipality, the following apply:

1. The treasurer of the upper-tier municipality shall certify to the treasurer of the area municipality that the charge has been imposed, the amount of the charge, the manner in which the charge is to be paid and when the charge is payable.
2. The treasurer of the area municipality shall collect the charge when it is payable and shall, unless otherwise agreed by the upper-tier municipality, pay the charge to the treasurer of the upper-tier

municipality on or before the 25th day of the month following the month in which the charge is received by the area municipality.

3. If the charge is collected by the upper-tier municipality, the treasurer of the upper-tier municipality shall certify to the treasurer of the area municipality that the charge has been collected. 1997, c. 27, s. 29.

If upper-tier issues building permits

30. If an upper-tier municipality issues building permits, the treasurer of each area municipality within the upper-tier municipality shall, when all development charges are paid with respect to a development in the area municipality, certify to the chief building official of the upper-tier municipality that those charges have been paid. 1997, c. 27, s. 30; 1997, c. 31, s. 146.

Agreement, upper-tier to collect charges

31. (1) If building permits are issued by an upper-tier municipality, the upper-tier municipality may agree with an area municipality to collect all the development charges on development in the area municipality. 1997, c. 27, s. 31 (1); 1997, c. 31, s. 146.

Sections 29 and 30

(2) If an agreement is made under this section, sections 29 and 30 do not apply with respect to development in the area municipality. 1997, c. 27, s. 31 (2).

Unpaid charges added to taxes

32. (1) If a development charge or any part of it remains unpaid after it is payable, the amount unpaid shall be added to the tax roll and shall be collected in the same manner as taxes. 1997, c. 27, s. 32 (1).

Treasurer certifies unpaid amount

(2) If a development charge or any part of it imposed by an upper-tier municipality remains unpaid after it is payable, the treasurer of the upper-tier municipality shall certify to the treasurer of the area municipality in which the land is located the amount that is unpaid. 1997, c. 27, s. 32 (2).

RESERVE FUNDS AND THE USE OF DEVELOPMENT CHARGES

Reserve funds

33. A municipality that has passed a development charge by-law shall establish a separate reserve fund for each service to which the development charge relates. 1997, c. 27, s. 33.

Development charges paid into reserve funds

34. The municipality shall pay each development charge it collects into the reserve fund or funds to which the charge relates. 1997, c. 27, s. 34.

Use of reserve funds

35. The money in a reserve fund established for a service may be spent only for capital costs determined under paragraphs 2 to 8 of subsection 5 (1). 1997, c. 27, s. 35.

Municipality may borrow from reserve fund

36. Despite section 35, a municipality may borrow money from a reserve fund but if it does so, the municipality shall repay the amount used plus interest at a rate not less than the prescribed minimum interest rate. 1997, c. 27, s. 36.

Exclusions

37. (1) Subsections 417 (2), (3) and (4) and 418 (3) and (4) of the *Municipal Act, 2001* and any equivalent provisions of, or made under, the *City of Toronto Act, 2006* do not apply to development charges collected by a municipality. 2002, c. 17, Sched. F, Table; 2006, c. 32, Sched. C, s. 12 (2).

Limitation

(2) Development charges may not be advanced by a municipality to its capital account as interim financing of capital undertakings of the municipality, except for those capital undertakings for which the development charges may be spent under this Act. 2002, c. 17, Sched. F, Table.

Clerk's duties if objection

48. (1) If the clerk of the municipality receives a notice of objection on or before the last day for filing an objection, the clerk shall compile a record that includes,

(a) a copy, certified by the clerk, of every development charge by-law that applies to the area defined in the front-ending agreement;

(b) a copy of the front-ending agreement certified by the clerk;

(c) an affidavit or declaration certifying that notice of the front-ending agreement and of the last day for filing an objection to it was given in accordance with this Act. 1997, c. 27, s. 48 (1).

Same

(2) The clerk shall forward a copy of the notice of objection and the record to the secretary of the Ontario Municipal Board within 30 days after the last day for filing an objection and shall provide such other information or material as the Board may require in respect of the objection. 1997, c. 27, s. 48 (2).

Affidavit, declaration conclusive evidence

(3) An affidavit or declaration of the clerk of a municipality that notice of the front-ending agreement and of the last day for filing an objection to it was given in accordance with this Act is conclusive evidence of the facts stated in the affidavit or declaration. 1997, c. 27, s. 48 (3).

OMB hearing of objection

49. (1) The Ontario Municipal Board shall hold a hearing to deal with any notice of objection to a front-ending agreement forwarded by the clerk of a municipality. 1997, c. 27, s. 49 (1).

Powers of OMB

(2) After the hearing, the Ontario Municipal Board may,

(a) dismiss the objection in whole or in part;

(b) terminate the agreement;

(c) order that the agreement is terminated unless the parties amend it in accordance with the Board's order. 1997, c. 27, s. 49 (2).

Same

(3) If the Ontario Municipal Board terminates the agreement or makes an order under clause (2) (c), the Board may order the municipality to refund any amount paid under the agreement in excess of,

(a) if the agreement is terminated, what would have been payable under the development charge by-law; or

(b) if the agreement is amended, what would have been payable under the amended agreement. 1997, c. 27, s. 49 (3).

Effective date of amendment

(4) An amendment in accordance with an order under clause (2) (c) shall be deemed to have come into force on the day the agreement comes into force. 1997, c. 27, s. 49 (4).

Dismissal without hearing

(5) Despite subsection (1), the Ontario Municipal Board may, where it is of the opinion that the objection to the agreement set out in the notice of objection is insufficient, dismiss the objection without holding a full hearing after notifying the person filing the objection and giving that person an opportunity to make representations as to the merits of the objection. 1997, c. 27, s. 49 (5).

Objections to amendments

50. Sections 46 to 49 apply, with necessary modifications, to an amendment to a front-ending agreement other than an amendment pursuant to an order of the Ontario Municipal Board. 1997, c. 27, s. 50.

MISCELLANEOUS

When agreements in force

51. (1) A front-ending agreement comes into force on the day the agreement is made. 1997, c. 27, s. 51 (1).

If agreement terminated

(2) A front-ending agreement that is terminated by the Ontario Municipal Board shall be deemed to have never come into force. 1997, c. 27, s. 51 (2).

Application to amendments

(3) This section applies, with necessary modifications, with respect to amendments to front-ending agreements. 1997, c. 27, s. 51 (3).

Non-parties bound by agreement

52. (1) A person who develops land within the area defined in a front-ending agreement shall pay any amount the agreement provides under clause 44 (1) (c). 1997, c. 27, s. 52 (1).

When amounts payable

(2) An amount that is payable under subsection (1) is payable upon a building permit being issued for the development unless the front-ending agreement provides for the amount to be payable on a later day or on an earlier day as allowed under subsection (3). 1997, c. 27, s. 52 (2).

Same

(3) A front-ending agreement may provide that an amount payable under subsection (1) for development that requires approval of a plan of subdivision under section 51 of the *Planning Act* or a consent under section 53 of the *Planning Act* and for which a subdivision agreement or consent agreement is entered into, be payable immediately upon the parties entering into the subdivision or consent agreement. 1997, c. 27, s. 52 (3).

Amounts paid to municipality

(4) Amounts paid under subsection (1) shall be paid to the municipality. 1997, c. 27, s. 52 (4).

Building permits withheld until amounts paid

53. If an amount is payable under a front-ending agreement by a person who develops land, no municipality shall issue a building permit for the development until the amount is paid. 1997, c. 27, s. 53.

Use of money received under an agreement

54. (1) A municipality that receives money under a front-ending agreement shall place the money in a special account. 1997, c. 27, s. 54 (1).

Use of money in special account

(2) The money in the special account shall be used, in accordance with the agreement, only for the following purposes:

1. To pay for work provided for under the agreement.
2. To reimburse those who, under the agreement, have a right to be reimbursed. 1997, c. 27, s. 54 (2).

Return of excess funds

(3) Despite subsection (2), if the municipality receives money from parties to the agreement to pay for work provided under the agreement, the municipality shall, if the agreement so provides, return to the parties any amounts that are not needed to pay for the work. 1997, c. 27, s. 54 (3).

Money held until objections disposed of

(4) If an objection to a front-ending agreement is made, the municipality shall retain any money received from persons who are not parties to the agreement until all the objections to the agreement are disposed of by the Ontario Municipal Board. If the Board makes an order that the agreement be terminated unless the parties amend it in accordance with the Board's order the municipality shall retain the money until the agreement is either terminated or amended. 1997, c. 27, s. 54 (4).

Application to amendments

(5) Subsection (4) applies with necessary modifications with respect to amendments to front-ending agreements. 1997, c. 27, s. 54 (5).

Credits

55. (1) A person is entitled to be given a credit towards a development charge for the amount of their non-reimbursable share of the costs of work under a front-ending agreement. 1997, c. 27, s. 55 (1).

Restriction on the amount

(2) If the work would result in a level of service that exceeds the average level of the service in the 10-year period immediately preceding the preparation of the background study for the development charge by-law, the amount of the credit must be reduced in the same proportion that the costs of the work that relate to a level of service that exceeds that average level of service bear to the costs of the work. Any regulations relating to the level of service and average level of service for the purposes of paragraph 4 of subsection 5 (1) also apply with necessary modifications for the purposes of this subsection. 1997, c. 27, s. 55 (2).

Credits are treated like s. 38 credits

(3) Credits under this section shall be treated, for the purposes of this Act, as though they were credits under section 38. 1997, c. 27, s. 55 (3).

Registration of agreement

56. A party to a front-ending agreement may register the agreement or a certified copy of it against the land to which it applies. 1997, c. 27, s. 56.

Notice to other tier

57. (1) An upper-tier municipality that is a party to a front-ending agreement shall, within 20 days after the agreement is made or amended, give a copy of the agreement or amendment to any area municipality that is not a party to the agreement and whose territory includes any part of the area defined in the agreement. 1997, c. 27, s. 57 (1).

Same

(2) An area municipality that is a party to a front-ending agreement shall, within 20 days after the agreement is made or amended, give a copy of the agreement or amendment to the upper-tier municipality that the area municipality is part of, if the upper-tier municipality is not a party to the agreement. 1997, c. 27, s. 57 (2).

PART IV
GENERAL

58. REPEALED: 2009, c. 33, Sched. 2, s. 24.

***Planning Act*, ss. 51, 53**

59. (1) A municipality shall not, by way of a condition or agreement under section 51 or 53 of the *Planning Act*, impose directly or indirectly a charge related to a development or a requirement to construct a service related to development except as allowed in subsection (2). 1997, c. 27, s. 59 (1).

Exception for local services

(2) A condition or agreement referred to in subsection (1) may provide for,

(a) local services, related to a plan of subdivision or within the area to which the plan relates, to be installed or paid for by the owner as a condition of approval under section 51 of the *Planning Act*;

(b) local services to be installed or paid for by the owner as a condition of approval under section 53 of the *Planning Act*. 1997, c. 27, s. 59 (2).

Limitation

(3) This section does not prevent a condition or agreement under section 51 or 53 of the *Planning Act* from requiring that services be in place before development begins. 1997, c. 27, s. 59 (3).

Notice of development charges at transfer

(4) In giving approval to a draft plan of subdivision under subsection 51 (31) of the *Planning Act*, the approval authority shall use its power to impose conditions under clause 51 (25) (d) of the *Planning Act*

(d) respecting the establishment of bodies to represent the public for the purpose of the public consultations;

(e) governing the intervals at which a board may adopt a new policy or amend an existing policy providing for the payment of honoraria under this section. 2006, c. 10, s. 16.

General or particular

(5) A regulation made under subsection (4) may be general or particular. 2006, c. 10, s. 16.

Same

(6) Without limiting the generality of subsection (5), a regulation made under subsection (4) may treat district school boards and school authorities differently. 2006, c. 10, s. 16.

Retroactivity

(7) A regulation made under subsection (4) may be retroactive to a date no earlier than September 1, 2005. 2006, c. 10, s. 16.

Transition

(8) Despite the repeal of sections 191 and 191.1 by section 16 of the *Education Statute Law Amendment Act (Student Performance), 2006*, a board may continue to pay honoraria in accordance with section 191 or 191.1, as the case may be, until honoraria may lawfully be paid under section 191, as re-enacted by section 16 of the *Education Statute Law Amendment Act (Student Performance), 2006*. 2006, c. 10, s. 16.

191.1 REPEALED: 2006, c. 10, s. 16.

Expenses

Travel expenses to attend board and committee meetings

191.2 (1) In respect of travel of a member of a board to and from his or her residence to attend a meeting of the board, or of a committee of the board, that is held within the area of jurisdiction of the board, the board may,

(a) reimburse the member for his or her out-of-pocket expenses reasonably incurred or such lesser amount as may be determined by the board; or

(b) pay the member an allowance at a rate per kilometre determined by the board. 1997, c. 31, s. 97.

Other travel expenses

(2) A board may by resolution authorize a member, teacher or official of the board to travel on specific business of the board and may reimburse the member, teacher or official for his or her out-of-pocket expenses reasonably incurred or such lesser amount as may be determined by the board. 1997, c. 31, s. 97.

Other expenses

(3) A board may establish a policy under which a member of the board may be reimbursed for all or part of his or her out-of-pocket expenses reasonably incurred in connection with carrying out the responsibilities of a board member. 1997, c. 31, s. 97.

Same

(4) A board may, in accordance with a policy established by it under subsection (3), reimburse a member for his or her out-of-pocket expenses reasonably incurred in connection with carrying out the responsibilities of a board member. 1997, c. 31, s. 97.

Deduction because of absence

(5) A board may provide for a deduction of a reasonable amount from the allowance of a member because of absence from meetings of the board or of a committee of the board. 1997, c. 31, s. 97.

Committee members

(6) Subsections (1) to (4) apply with necessary modifications to members of a committee established by the board who are not members of the board. 1997, c. 31, s. 97.

Deemed expenses

191.3 Despite this Act or any other Act, where an elected member of a board is, under a by-law or resolution of the board, paid a salary, indemnity, allowance or other remuneration, one-third of such amount shall be deemed to be for expenses incident to the discharge of his or her duties as a member of the board. 2002, c. 17, Sched. F, Table.

PROPERTY

Property vested in board for school purposes

192. (1) All lands that before the 24th day of July, 1850, were granted, devised or otherwise conveyed to any person or persons in trust for common school purposes and held by such person or persons and their heirs or other successors in the trust, and have been heretofore vested in a public school board or a board of education having jurisdiction in the municipality in which the lands are situate, continue to be vested in such board, and continue to be held by it and its successors upon the like trusts and subject to the same conditions and for the estates upon or subject to or for which the lands are respectively held. R.S.O. 1990, c. E.2, s. 192 (1).

Same

(1.1) In subsection (1),

"public school board" and "board of education" have the same meaning as they had immediately before the *Education Quality Improvement Act, 1997* received Royal Assent. 1997, c. 31, s. 98.

Same

(2) All property heretofore granted or devised to, acquired by or vested in any person or corporation,

(a) for the secondary school purposes of a secondary school district or any part thereof; or

(b) for the separate school purposes in a separate school zone,

is vested in the board having jurisdiction in the secondary school district or separate school zone, as the case may be. R.S.O. 1990, c. E.2, s. 192 (2).

Dealings with property

193. (1) A board may take possession of all property acquired or given for school purposes and hold and apply it according to the terms on which it was acquired or given. R.S.O. 1990, c. E.2, s. 193 (1).

Idem

(2) A Roman Catholic board has power to acquire and hold as a corporation, by any title whatsoever, land, movable property, money or income given to or acquired by the board at any time for school purposes and hold or apply the same according to the terms on which it was acquired or received. R.S.O. 1990, c. E.2, s. 193 (2); 1997, c. 31, s. 99 (1).

Same

(3) A public district school board may appropriate any property acquired by it or in its possession or control for any of the purposes of the board. 1997, c. 31, s. 99 (2).

Dealings with property

Disposal of realty

194. (1) A board that is in possession of real property that was originally granted by the Crown for school purposes and that has reverted or may have reverted to the Crown may continue in possession of the real property for school purposes and when the board determines that the real property is no longer required for school purposes, the board may, with the approval of the Lieutenant Governor in Council and subject to such conditions as are prescribed by the Lieutenant Governor in Council, sell, lease or otherwise dispose of the real property. R.S.O. 1990, c. E.2, s. 194 (1).

Application for removal of restrictions on use of school lands

(2) Where land, the use of which is restricted by deed in any manner to school purposes so as to appear that some other person may have an interest therein, has been vested in a board for at least fifty years, the board may apply to the Superior Court of Justice to remove the restriction, and the court may make such order on the application as it considers just including, where the land adjoins land being used as a farm, a requirement that the board shall, where the board intends to sell the land, first offer it at a

reasonable price to the owner or owners of such adjoining land. R.S.O. 1990, c. E.2, s. 194 (2); 2000, c. 11, s. 21.

Lease or sale of site or property

(3) Subject to subsections (3.3) and (4), a board has power to sell, lease or otherwise dispose of any school site or part of a school site of the board or any property of the board,

(a) on the adoption of a resolution that the site or part or property is not required for the purposes of the board; or

(b) on the adoption of a resolution that the sale, lease or other disposition is a reasonable step in a plan to provide accommodation for pupils on the site or part or property. 1997, c. 31, s. 100 (1); 2002, c. 18, Sched. G, s. 7 (1).

Application of proceeds

(3.1) The board shall apply the proceeds of a sale, lease or other disposition under subsection (3) for the purposes of the board and shall advise the Minister of the sale or disposition or of the lease, where the term of the lease exceeds one year, of any of its schools. 1997, c. 31, s. 100 (1).

Conflict

(3.2) In the event of a conflict between subsection (3.1) and a regulation referred to in clause (3.4) (c), the regulation prevails. 1997, c. 31, s. 100 (1).

Regulations

(3.3) The Minister may make regulations governing the sale, lease or other disposition of school sites or parts of school sites or property to which resolutions referred to in clause (3) (a) apply. 1997, c. 31, s. 100 (1).

Same

(3.4) Regulations that may be made under subsection (3.3) include but are not limited to regulations,

(a) respecting to whom school sites or parts of school sites or property must be offered;

(b) respecting the price or other consideration for a disposition or class of dispositions;

(c) respecting the use of the proceeds of a disposition or class of dispositions;

(d) respecting the purposes for which school sites or parts of school sites or property that is disposed of to other boards must be used by the transferee board;

(e) requiring a transferee board to return a school site or part of a school site or property to the transferor board if no longer used for the purposes referred to in clause (d);

(f) respecting the price or other consideration for a return or class of returns required under clause (e). 1997, c. 31, s. 100 (1).

General or particular

(3.5) A regulation made under this section may be general or particular and may be made to apply to any class of boards. 1997, c. 31, s. 100 (1).

Classes

(3.6) A class may be defined with respect to any attribute and may be defined to consist of or to exclude any specified member of the class, whether or not with the same attributes. 1997, c. 31, s. 100 (1).

Approval of Minister re disposition, demolition

(4) Despite any provision of this or any other Act, a board shall not sell, lease or otherwise dispose of a school site, part of a school site or property or demolish a building unless, in addition to any other approval that may be required, the board has obtained the approval of the Minister. 2002, c. 18, Sched. G, s. 7 (2).

(4.1) REPEALED: 2002, c. 18, Sched. G, s. 7 (3).

Exceptions

(5) Subsection (4) does not apply,

(a) in respect of a school site, part of a school site or property to which a resolution referred to in clause (3) (a) applies;

(b) to the use of a building or part thereof pursuant to an agreement under section 183; or

(c) to the use of a building or part of a building for a purpose that does not interfere with the proper conduct of a school, if the building or part of the building is in use as a school. 2002, c. 18, Sched. G, s. 7 (4).

Dealings with property

Board may purchase or expropriate within its jurisdiction

195. (1) Subject to the provisions of section 90 as to the approval of the site of a new school by a rural separate school board, every board may select and may acquire, by purchase, lease or otherwise, or may expropriate, a school site that is within its area of jurisdiction. R.S.O. 1990, c. E.2, s. 195 (1); 1997, c. 31, s. 101 (1).

Purchase or lease of site in adjoining jurisdiction

(2) A public board may, with the approval of the Minister, acquire by purchase, lease or otherwise a school site in an adjoining school section or secondary school district, as the case may be, for the purpose of operating a school thereon, but the board shall not expropriate any such site. R.S.O. 1990, c. E.2, s. 195 (2); 1997, c. 31, s. 101 (2).

School outside designated area

(3) A separate district school board may, with the approval of the Minister, acquire by purchase, lease or otherwise, a school site that is outside the area of jurisdiction established in respect of the board by regulation made under subsection 58.1 (2) and may operate a separate school on the site, but a separate district school board shall not expropriate such a site. 1997, c. 31, s. 101 (3).

Buildings on land owned by board

(4) Subject to section 196 or subsection 197 (1), a board may erect, add to or alter buildings for its purposes on land owned by the board. R.S.O. 1990, c. E.2, s. 195 (4).

Buildings on leased land

(5) A board may erect a school building on land that is leased by the board where the term of the lease, the school site and the plans of the school building are approved by the Minister. R.S.O. 1990, c. E.2, s. 195 (5).

Additions or alterations

(6) A board may, with the approval of the Minister, make an addition, alteration or improvement to a school building that is acquired by the board under a lease. R.S.O. 1990, c. E.2, s. 195 (6).

Agreement for multi-use building

196. Where a board plans to provide, other than by way of a lease, accommodation for pupils on a school site that is not to be occupied or used exclusively by the board, the board shall obtain the prior approval of the Minister to enter into negotiations with a person, other than a board or a municipality, in respect of the provision of such accommodation, and an agreement for such purposes may be entered into with such person only after the proposed agreement, the plans of the school and of the building of which it may be a part and the site have been approved by the Minister. R.S.O. 1990, c. E.2, s. 196.

OUT-OF-CLASSROOM PROGRAMS

Dealings with land for out-of-classroom programs

197. (1) Where a board acquires a school site under subsection 195 (1), (2) or (3) for the purpose of conducting thereon a natural science program and other out-of-classroom programs, the board shall obtain the approval of the Minister before it erects, adds to or alters buildings on or makes other improvements to the school site for such purpose. R.S.O. 1990, c. E.2, s. 197 (1).

Same

(a) a copy of the education development charge by-law, as amended to the day the amending by-law was passed, certified by the secretary;

(b) a copy of the amending by-law certified by the secretary;

(c) a copy of the education development charge background study for the education development charge by-law;

(d) a copy of the information made available to the public under subclause 257.72 (b) (ii) for the amending by-law and all previous amending by-laws amending the education development charge by-law; and

(e) an affidavit or declaration certifying that notice of the passing of the amending by-law and of the last day for appealing it was given in accordance with this Division. 1997, c. 31, s. 113 (5).

Same

(2) The secretary shall forward a copy of the notice of appeal and the record to the secretary of the Ontario Municipal Board within 30 days after the last day of appeal and shall provide such other information or material as the Ontario Municipal Board may require in respect of the appeal. 1997, c. 31, s. 113 (5).

Affidavit, declaration conclusive evidence

(3) An affidavit or declaration of the secretary of a board that notice of the passing of the amending by-law and of the last day for appealing it was given in accordance with this Division is conclusive evidence of the facts stated in the affidavit or declaration. 1997, c. 31, s. 113 (5).

OMB hearing of appeal

257.76 (1) The Ontario Municipal Board shall hold a hearing to deal with any notice of appeal of a by-law amending an education development charge by-law forwarded by the secretary of a board. 1997, c. 31, s. 113 (5).

Who to get notice

(2) The Ontario Municipal Board shall determine who shall be given notice of the hearing and in what manner. 1997, c. 31, s. 113 (5).

Powers of OMB

(3) After the hearing, the Ontario Municipal Board may,

(a) dismiss the appeal in whole or in part;

(b) order the board to repeal or amend the amending by-law in accordance with the Ontario Municipal Board's order;

(c) repeal or amend the amending by-law in such manner as the Ontario Municipal Board may determine. 1997, c. 31, s. 113 (5).

Limitation on powers

(4) The Ontario Municipal Board may not amend or order the amendment of an amending by-law so as to,

(a) increase the amount of an education development charge that will be payable in any particular case under the education development charge by-law as amended by the amending by-law;

(b) remove, or reduce the scope of, an exemption under the education development charge by-law as amended by the amending by-law;

(c) change the date the education development charge by-law will expire as provided in that by-law as amended by the amending by-law. 1997, c. 31, s. 113 (5).

Dismissal without hearing

(5) Despite subsection (1), the Ontario Municipal Board may, where it is of the opinion that the objection to the amending by-law set out in the notice of appeal is insufficient, dismiss the appeal without holding a full hearing after notifying the appellant and giving the appellant an opportunity to make representations as to the merits of the appeal. 1997, c. 31, s. 113 (5).

When OMB ordered repeals, amendments effective

257.77 The repeal or amendment of a by-law amending an education development charge by-law by the Ontario Municipal Board, or by a board pursuant to an order of the Ontario Municipal Board, shall be deemed to have come into force on the day the amending by-law came into force. 1997, c. 31, s. 113 (5).

Refunds, if OMB repeals by-law, etc.

257.78 Section 257.69 applies, with necessary modifications, with respect to the repeal or amendment of a by-law amending an education development charge by-law by the Ontario Municipal Board or pursuant to an order of the Ontario Municipal Board. 1997, c. 31, s. 113 (5).

Non-application of certain provisions to OMB amendments

257.79 Subsection 257.70 (2) and sections 257.71 to 257.77 do not apply with respect to the amendment, by the Ontario Municipal Board or pursuant to an order of the Ontario Municipal Board, of an education development charge by-law or a by-law amending an education development charge by-law. 1997, c. 31, s. 113 (5).

COLLECTION OF EDUCATION DEVELOPMENT CHARGES

When charge payable

257.80 An education development charge is payable upon a building permit being issued. 1997, c. 31, s. 113 (5).

Who charge payable to

257.81 An education development charge is payable to the municipality issuing the building permit. 1997, c. 31, s. 113 (5).

Education development charge accounts

257.82 (1) A board that has passed an education development charge by-law shall establish education development charge accounts in accordance with the regulations. 1997, c. 31, s. 113 (5); 2009, c. 34, Sched. I, s. 18.

Deposit of charges into accounts

(2) A municipality that receives an education development charge shall deposit the charge in the appropriate education development charge account not later than the 25th day of the month after the month in which the charge was received. 1997, c. 31, s. 113 (5); 2009, c. 34, Sched. I, s. 21.

Withholding of building permit until charge paid

257.83 Despite any other Act, a municipality shall not issue a building permit for development to which an education development charge applies unless the charge has been paid. 1997, c. 31, s. 113 (5).

Land given for credit

257.84 (1) A board that has passed a by-law imposing education development charges on land of an owner may, with the consent of the Minister, accept land for pupil accommodation in place of the payment of all or a part of the education development charges. 1997, c. 31, s. 113 (5).

Same

(2) A board that accepts land under subsection (1) shall, in accordance with the regulations made under section 257.101, give the owner credits toward the education development charges imposed on the owner by the board. 1997, c. 31, s. 113 (5).

COMPLAINTS ABOUT EDUCATION DEVELOPMENT CHARGES

Complaint to council of municipality

257.85 (1) An owner, the owner's agent or a board, may complain to the council of the municipality to which an education development charge is payable that,

(a) the amount of the education development charge was incorrectly determined;

(b) a credit is or is not available to be used against the education development charge, or that the amount of a credit was incorrectly determined; or

(c) there was an error in the application of the education development charge by-law. 1997, c. 31, s. 113 (5).

Time limit

(2) A complaint may not be made under subsection (1) later than 90 days after the day the education development charge, or any part of it, is payable. 1997, c. 31, s. 113 (5).

Form of complaint

(3) The complaint must be in writing, must state the complainant's name, the address where notice can be given to the complainant and the reasons for the complaint. 1997, c. 31, s. 113 (5).

Parties

(4) The parties to the complaint are the complainant and,

(a) the board if the complainant is the owner or the owner's agent; or

(b) the owner if the complainant is the board. 1997, c. 31, s. 113 (5).

Hearing

(5) The council shall hold a hearing into the complaint and shall give the parties an opportunity to make representations at the hearing. 1997, c. 31, s. 113 (5).

Notice of hearing

(6) The clerk of the municipality shall mail a notice of the hearing to the parties at least 14 days before the hearing. 1997, c. 31, s. 113 (5).

Council's powers

(7) After hearing the evidence and submissions of the parties, the council may dismiss the complaint or rectify any incorrect determination or error that was the subject of the complaint. 1997, c. 31, s. 113 (5).

Notice of decision and time for appeal

257.86 (1) The clerk of the municipality shall mail to the parties a notice of the council's decision, and of the last day for appealing the decision, which shall be the day that is 40 days after the day the decision is made. 1997, c. 31, s. 113 (5).

Requirements of notice

(2) The notice required under this section must be mailed not later than 20 days after the day the council's decision is made. 1997, c. 31, s. 113 (5).

Appeal of council's decision

257.87 (1) A party may appeal the decision of the council of the municipality to the Ontario Municipal Board by filing with the clerk of the municipality, on or before the last day for appealing the decision, a notice of appeal setting out the reasons for the appeal. 1997, c. 31, s. 113 (5).

Additional ground

(2) A party may also appeal to the Ontario Municipal Board if the council of the municipality does not deal with the complaint within 60 days after the complaint is made by filing with the clerk of the municipality a notice of appeal. 1997, c. 31, s. 113 (5).

Clerk's duties on appeal

257.88 (1) If a notice of appeal under subsection 257.87 (1) is filed with the clerk of the municipality on or before the last day for appealing a decision, the clerk shall compile a record that includes,

(a) a copy of the education development charge by-law certified by the clerk;

(b) the original or a true copy of the complaint and all written submissions and material received from the parties;

(c) a copy of the council's decision certified by the clerk; and

(d) an affidavit or declaration certifying that notice of the council's decision and of the last day for appealing it was given in accordance with this Division. 1997, c. 31, s. 113 (5).

Same

(2) If a notice of appeal under subsection 257.87 (2) is filed with the clerk of the municipality, the clerk shall compile a record that includes,

(a) a copy of the education development charge by-law certified by the clerk; and

(b) the original or a true copy of the complaint and all written submissions and material received from the parties. 1997, c. 31, s. 113 (5).

Same

(3) The clerk shall forward a copy of the notice of appeal and the record to the secretary of the Ontario Municipal Board within 30 days after the notice is received and shall provide such other information and material that the Board may require in respect of the appeal. 1997, c. 31, s. 113 (5).

OMB hearing of appeal

257.89 (1) The Ontario Municipal Board shall hold a hearing to deal with any notice of appeal relating to a complaint forwarded by the clerk of a municipality. 1997, c. 31, s. 113 (5).

Notice to parties

(2) The Ontario Municipal Board shall give notice of the hearing to the parties. 1997, c. 31, s. 113 (5).

Powers of OMB

(3) After the hearing, the Ontario Municipal Board may do anything that could have been done by the council of the municipality under subsection 257.85 (7). 1997, c. 31, s. 113 (5).

Refund if education development charge reduced

257.90 (1) If an education development charge that has already been paid is reduced by the council of a municipality under section 257.85 or by the Ontario Municipal Board under section 257.89, the overpayment shall immediately be refunded. 1997, c. 31, s. 113 (5).

Interest

(2) Interest shall be paid on an amount refunded under subsection (1) at the prescribed interest rate from the time the amount was paid to the time it is refunded. 1997, c. 31, s. 113 (5).

Source of refund, interest

(3) An amount refunded under subsection (1) and interest paid under subsection (2) shall be paid out of the appropriate education development charge account. 1997, c. 31, s. 113 (5); 2009, c. 34, Sched. I, s. 21.

Who refund paid to

(4) An amount refunded under subsection (1) and any interest on it shall be paid to the person who paid the education development charge. 1997, c. 31, s. 113 (5).

Payment if education development charge increased

257.91 If an education development charge that has already been paid is increased by the council of a municipality under section 257.85 or by the Ontario Municipal Board under section 257.89, the increase shall immediately be paid by the person who paid the education development charge. 1997, c. 31, s. 113 (5).

SPECIAL CASES

Territory without municipal organization

257.92 If there is an education development charge on land that is in territory without municipal organization, sections 257.81 to 257.91 apply with the following modifications:

1. Under section 257.81, the charge is payable to the board under whose by-law the charge is imposed and subsection 257.82 (2) applies to the board.
2. Section 257.83 applies to the official responsible for issuing building permits for the area the land is in.

3. Complaints under section 257.85 may be made to the board by the owner or the owner's agent. The complainant is the only party to the complaint. In sections 257.85 to 257.90, all references to the municipality or the council of the municipality shall be deemed to be references to the board and all references to the clerk of the municipality shall be deemed to be references to the secretary of the board.
4. If the decision of the board is appealed to the Ontario Municipal Board under section 257.87, the parties to the appeal are the complainant and the board. 1997, c. 31, s. 113 (5).

Areas where province issues building permits

257.93 If the council of a municipality has entered into an agreement providing for the enforcement of the *Building Code Act, 1992* by Ontario, sections 257.81 to 257.91 apply with the modifications set out in the regulations. 1997, c. 31, s. 113 (5).

MISCELLANEOUS

Different types of boards treated the same

257.94 In doing anything under this Division the Ontario Municipal Board shall treat English-language public boards, English-language Roman Catholic boards, French-language public district school boards and French-language separate district school boards in the same manner. 1997, c. 31, s. 113 (5).

Registration of by-law

257.95 A board that has passed an education development charge by-law may register the by-law or a certified copy of it against the land to which it applies. 1997, c. 31, s. 113 (5).

Recovery of unpaid amounts, lien on land

257.96 Section 349 of the *Municipal Act, 2001* or section 314 of the *City of Toronto Act, 2006*, as the case may be, applies with necessary modifications with respect to an education development charge or any part of it that remains unpaid after it is payable. 1997, c. 31, s. 113 (5); 2002, c. 17, Sched. F, Table; 2006, c. 32, Sched. C, s. 15 (33).

Reports by municipalities to boards

257.97 (1) Each month a municipality shall make a report to a board if, in the period that the report would cover, any education development charges payable under an education development charge by-law of the board would be payable to the municipality. 1997, c. 31, s. 113 (5).

When due

(2) The monthly reports shall be made on or before the 5th day of each month. 1997, c. 31, s. 113 (5).

Contents

(3) The monthly reports shall contain the prescribed information. 1997, c. 31, s. 113 (5).

Statement of treasurer

257.98 (1) The treasurer of a board shall each year on or before such date as the board may direct, give the board a financial statement relating to education development charge by-laws and education development charge accounts. 1997, c. 31, s. 113 (5); 2009, c. 34, Sched. I, s. 19 (1).

Requirements

(2) A statement must include, for the preceding year, statements of the opening and closing balances of the education development charge accounts and of the transactions relating to the accounts and such other information as is prescribed in the regulations. 1997, c. 31, s. 113 (5); 2009, c. 34, Sched. I, s. 19 (2).

Copy to Minister

(3) The treasurer shall give a copy of a statement to the Minister within 60 days after giving the statement to the board. 1997, c. 31, s. 113 (5).

Board may borrow from account

257.99 A board may borrow money from an education development charge account but if it does so, the board shall repay the amount used plus interest at a rate not less than the prescribed minimum interest rate. 1997, c. 31, s. 113 (5); 2009, c. 34, Sched. I, s. 21.

257.100 REPEALED: 2009, c. 33, Sched. 2, s. 25 (2).

Regulations

257.101 (1) The Lieutenant Governor in Council may make regulations that may have general or particular application in respect of a board,

(a) prescribing any matter that is referred to as prescribed in this Division;

(b) for the purposes of clause 257.54 (3) (b), prescribing classes of residential buildings, prescribing the maximum number of additional dwelling units, not exceeding two, for buildings in such classes, prescribing restrictions and governing what constitutes a separate building;

(c) defining or clarifying "gross floor area" and "existing industrial building" for the purposes of this Division;

(d) dividing the area of the jurisdiction of a board into two or more prescribed regions for the purposes of section 257.57;

(e) governing the expiry of education development charge by-laws that are passed by different boards but that apply to the same area;

(f) for the purposes of clause 257.63 (1) (b), subsection 257.64 (2), clause 257.72 (a) and subsection 257.73 (2), governing notices referred to in those provisions;

(g) prescribing modifications to the application of sections 257.81 to 257.91 in the circumstances set out in section 257.93;

(h) prescribing information to be included in monthly reports under section 257.97 and prescribing the period that each report must cover;

(i) prescribing the interest rate or a method for determining the interest rate that shall be paid under subsections 257.69 (3) and 257.90 (2);

(j) prescribing the minimum interest rate or a method for determining the minimum interest rate that boards shall pay under section 257.99;

(k) governing education development charge accounts, including,

(i) governing the establishment and administration of such accounts,

(ii) the use of money from such accounts,

(iii) requiring the approval of the Minister in respect of the manner in which or the rate at which the money is withdrawn from such accounts;

(l) requiring the approval of the Minister to any factor, criterion, rate, amount, portion, estimate or project used in determining an education development charge;

(m) prescribing the manner of calculating or determining education development charges and prescribing classes of persons that may make determinations necessary for the calculation of education development charges;

(n) providing for the sharing of proceeds where more than one board establishes education development charges in respect of the same area;

(o) prescribing information that boards must provide to other boards and to the Minister for the purposes of developing education development charges under this Division;

(p) prescribing the terms of agreements for credit in lieu of payment of education development charges, determining the amount of the credit and governing the allocation of the credit between or among boards;

(q) requiring a board to exempt an owner from an educational development charge if the owner meets the prescribed conditions;

(c) the purchase or other acquisition of vacant land for the purpose of constructing a building or buildings thereon,

(d) the erection of a new building, or any part thereof,

(e) the demolition of a building,

(f) the installation of public utilities, sewers and items or services necessary for access to the land or building or buildings. ("projet de construction")

(2) The amount of capital grant payable under the Act for a building project of a municipality or an approved corporation shall be equal to 30 per cent of the approved cost of the building project. R.R.O. 1990, Reg. 314, s. 3.

4. (1) An application for a capital grant shall be made to the Minister on a form provided by the Minister.

(2) An applicant who applies under subsection (1) shall file with the Minister two copies of a site plan showing the location of the building or buildings, if any, on the site and, in the case of a building project with one or more of the elements referred to in clause (a), (b), (d) or (f) of the definition of "building project" in subsection 3 (1),

(a) building plans and specifications prepared by an architect or professional engineer showing the structure, fixtures and arrangements of the building or buildings and describing the areas of the building or buildings to be used for the purposes of the Act; or

(b) where the Minister approves structural sketches and specifications prepared by a person other than an architect or professional engineer describing the building or buildings and the areas of the building or buildings or contiguous to the building or buildings to be used for the purposes of the Act.

(3) No plan, specification or structural sketch filed with the Minister shall be amended or altered without the approval of the Minister. R.R.O. 1990, Reg. 314, s. 4.

5. (1) No payment of a capital grant shall be made for a building project except where,

(a) the building project has been approved by the Minister; and

(b) the approved cost has been determined.

(2) An approval of a building project by the Minister referred to in subsection (1) expires on the first anniversary of the date upon which the approval is given unless the building project has been commenced before such anniversary date.

(3) A capital grant may be paid as a single payment or in two or more instalments and, except where the Minister directs otherwise, the aggregate of the amounts of the capital grant paid at any point in time shall not exceed the greater of,

(a) an amount that bears the same proportion to the estimated total payment as the amount of progress made at the time towards completion of the project bears to the total estimated amount of work required for completion; and

(b) an amount that bears the same proportion to the estimated total payment as the amount of cost incurred at the time bears to the total estimated cost of the project.

(4) A single payment, or in the case of payment in two or more instalments, the final payment of an amount payable for a building project shall not be made until,

(a) an architect or professional engineer certifies, or the Minister is otherwise satisfied, that the building project has been completed in accordance with the plans filed under clause 4 (2) (a) or the sketches thereof approved by the Minister under clause 4 (2) (b) and the building or addition is ready for use and occupancy; and

(b) the applicant for the payment submits a report containing,

(i) a statement of the actual cost of the building project,

(ii) a statement indicating that all refundable sales tax has been taken into account,

(iii) a statement indicating that the total amount of the unpaid accounts applicable to the building project does not exceed the amount of the grant remaining to be paid, and

(iv) an undertaking that the amount of the grant remaining to be paid will be applied first to the payment of the unpaid accounts,

and, where the applicant is an approved corporation, an authorized officer of the board of directors of the approved corporation certifies that the council of the municipality in which the centre is situate, or the council of that municipality together with the councils of one or more contiguous municipalities, has directed payment to the corporation of an amount equal to at least 20 per cent of the actual cost of the building project, or contributed to the corporation real or personal property, approved by the Minister, that is equivalent in value to at least 20 per cent of the actual cost of the building project. R.R.O. 1990, Reg. 314, s. 5.

6. No applicant for or recipient of a capital grant for a building project shall, without the written approval of the Minister,

(a) acquire a building or land for the building project;

(b) call tenders for the building project;

(c) commence construction of the building project; or

(d) erect any temporary or permanent sign, tablet or plaque on the site or building project. R.R.O. 1990, Reg. 314, s. 6.

7. It is a term and condition of a payment of a capital grant under the Act in respect of a building, buildings or land forming part of a building project that the applicant for payment shall enter into an agreement with the Minister in which the applicant shall,

(a) agree not to change the site, structure, use of or sell, agree to sell, lease, mortgage, encumber, donate or otherwise dispose of all or any part of the building, buildings or land without the approval of the Minister;

(b) agree not to demolish or make alterations or additions to all or any part of the building or buildings without the approval of the Minister; and

(c) agree to reimburse the Ministry in the same ratio as the Ministry's contribution to the acquisition of the building, buildings or land, the construction of the building or buildings or the renovations upon termination of the agreement or where there is a contravention of any term of the agreement or where a circumstance set out in clause (a) or (b) takes place. R.R.O. 1990, Reg. 314, s. 7.

8. Expenditures incurred by a municipality or an approved corporation for furnishings or equipment that are not replacements or for repairs to or maintenance of a capital asset that,

(a) are approved by the Minister as capital expenditures;

(b) are, in the opinion of the Minister, necessary for the efficient operation of an approved centre and the cost of which is not excessive for the purpose; and

(c) are in excess of $3,000,

are capital expenditures for which a grant may be paid under subsection 4 (1) of the Act upon application by the municipality or the approved corporation in an amount equal to 30 per cent of the approved expenditures incurred. R.R.O. 1990, Reg. 314, s. 8; O. Reg. 391/08, s. 1.

9. A municipality or an approved corporation shall in respect of every approved centre operated by it keep and maintain a current inventory of all furnishings and equipment acquired by the centre and the inventory shall set forth each addition to or removal from inventory and the reasons therefor and shall be prepared in such manner and contain such additional information as the Director may require. R.R.O. 1990, Reg. 314, s. 9.

10. (1) An application by a municipality or an approved corporation for payment of the subsidy under subsection 4 (2) of the Act shall be made in a form provided by the Minister and may be submitted monthly, quarter-yearly, half-yearly or yearly and shall be submitted to the Director not later than the last day of the month immediately following the period for which the application is made. R.R.O. 1990, Reg. 314, s. 10 (1).

(2) Subject to subsections (3) and (4), the monthly amount to be paid under subsection 4 (2) of the Act shall be up to 50 per cent of the net monthly cost to the municipality or approved corporation of maintaining and operating its approved centre or centres, determined in accordance with the form referred to in subsection (1). R.R.O. 1990, Reg. 314, s. 10 (2).

(3) In respect of expenditures incurred on and after April 1, 2008, the amount to be paid in a fiscal year under subsection 4 (2) of the Act for any approved centre maintained and operated by a municipality or approved corporation shall not exceed,

(a) $32,000, for the period beginning on April 1, 2008 and ending on March 31, 2010; and

(b) $42,700, after March 31, 2010. O. Reg. 391/08, s. 2.

(4) In determining the maximum net monthly expenditure under subsection (2),

(a) the Director may average the expenditure for any approved centre by the municipality or approved corporation, as the case may be, over the fiscal year of the approved centre or approved corporation;

(b) the cost of rent or the monthly amount repaid for principal and interest under a mortgage in respect of an approved centre for which a capital grant has been paid under subsection 4 (1) of the Act shall not be included. R.R.O. 1990, Reg. 314, s. 10 (4).

11. The sum payable by a municipality or municipalities to an approved corporation under subsection 4 (2) of the Act shall be equal to,

(a) for corporations that are approved under subsection 2 (1) of the Act on or after April 1, 2008, at least 20 per cent of the net monthly cost to the approved corporation of maintaining and operating its approved centre or centres determined in accordance with the form referred to in subsection 10 (1); and

(b) for corporations that were approved under subsection 2 (1) of the Act before April 1, 2008, at least 20 per cent of the net monthly cost to the approved corporation in the 2007-2008 fiscal year of maintaining and operating its approved centre or centres determined in accordance with the form referred to in subsection 10 (1). O. Reg. 391/08, s. 3.

12. It is a term and condition of payment of a grant under subsection 4 (2) of the Act that the net monthly cost of maintaining and operating an approved centre for the purposes of the form referred to in subsection 10 (1) be approved by the Director. R.R.O. 1990, Reg. 314, s. 12.

13. A grant may be paid under section 5 of the Act to a municipality or to an approved corporation for costs of a program of services for elderly persons in an approved centre, but in no case shall the total grant under section 5 of the Act exceed $15,000 for any approved centre for any fiscal year. R.R.O. 1990, Reg. 314, s. 13.

14. A municipality or an approved corporation shall in respect of every approved centre operated by it,

(a) provide a program of services approved by the Minister;

(b) provide, when requested by the Director, a letter from the local fire chief stating that the premises meet all the requirements of any statute, regulation or by-law for the protection from fire of persons using the premises;

(c) establish requirements and policies for the admission of elderly persons to the facilities and services of a centre that are satisfactory to the Director;

(d) keep separate books of account,

(i) setting forth the revenue and expenditures of the centre,

(ii) containing a separate record of the money received by the centre from sources other than under the Act, and

(iii) that are audited at least once a year by a licensed public accountant in the case of the approved corporation and an auditor licensed and appointed in accordance with the *Municipal Act* in the case of the municipality,

and each book of account shall be retained for at least six years from the date of the last entry in a book for a particular year;

(e) furnish to the Director not later than the last day of the fourth month following the end of each fiscal year the financial statement of the centre for the immediately preceding fiscal year, together with a report of a licensed public accountant in the case of the approved corporation or of an auditor licensed in accordance with the *Municipal Affairs Act* and appointed in accordance with the *Municipal Act* in the case of the municipality, stating whether in the person's opinion,

(i) the person has received all the information and explanations the person has required,

(ii) the financial statement and the claims for provincial subsidy are in accordance with the books and records of the centre and approved corporation, as the case may be,

(iii) the calculation of the provincial subsidy is in accordance with the regulations, and

(iv) the financial statement has been prepared in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year,

(2) The Minister may by order vary or dispense with a requirement imposed under this Act with respect to the undertaking in order to facilitate the effective operation of the requirements of both jurisdictions. 1996, c. 27, s. 2.

Declaration of non-application

(3) The Minister may by order declare that this Act does not apply with respect to the undertaking. 1996, c. 27, s. 2.

Notice and comment

(4) When the Minister proposes to make an order under this section, the Minister shall give adequate public notice of the proposed order and shall ensure that members of the public have an opportunity to comment on it. 1996, c. 27, s. 2.

Reasons

(5) When making an order, the Minister shall give written reasons. 1996, c. 27, s. 2.

Declaration

3.2 (1) With the approval of the Lieutenant Governor in Council or of such ministers of the Crown as the Lieutenant Governor in Council may designate, the Minister may by order,

(a) declare that this Act, the regulations or a matter provided for under the Act does not apply with respect to a proponent, a class of proponents, an undertaking or a class of undertakings;

(b) suspend or revoke the declaration;

(c) impose conditions on the declaration; or

(d) amend or revoke conditions imposed on the declaration,

if the Minister considers that it is in the public interest to do so having regard to the purpose of this Act and weighing it against the injury, damage or interference that might be caused to any person or property by the application of this Act to the undertaking or class. 1996, c. 27, s. 2.

***Legislation Act, 2006*, Part III**

(2) Part III (Regulations) of the *Legislation Act, 2006* does not apply with respect to an order made under subsection (1). 1996, c. 27, s. 2; 2006, c. 21, Sched. F, s. 136 (1).

Exclusion of traffic calming measures

3.3 (1) A traffic calming measure is not an undertaking for the purposes of this Act and cannot be included in the definition of a class for the purposes of this Act. 2006, c. 11, Sched. B, s. 5.

Same

(2) Sections 3.0.1 and 3.1 do not apply with respect to traffic calming measures. 2006, c. 11, Sched. B, s. 5.

Transition

(3) If an application, or part of an application, made under a provision of this Act in respect of proposed traffic calming measures is not finally determined before the day on which section 5 of Schedule B to the *Stronger City of Toronto for a Stronger Ontario Act, 2006* comes into force, the application or part thereof in respect of traffic calming measures is discontinued on that day. 2006, c. 11, Sched. B, s. 5.

Same

(4) If any process, or part of a process, in respect of proposed traffic calming measures under an approved class environmental assessment has not been completed before the day on which section 5 of Schedule B to the *Stronger City of Toronto for a Stronger Ontario Act, 2006* comes into force, the process or part thereof in respect of the proposed traffic calming measures are discontinued on that day. 2006, c. 11, Sched. B, s. 5.

Immunity

(5) No damages, amount in lieu of damages or other amount is payable by the Crown, a public body, a municipality or any other person as a result of or relating to the enactment of this section. 2006, c. 11, Sched. B, s. 5.

Definition

(6) In this section,

"traffic calming measures" means physical measures designed to control traffic speeds and to encourage driving behaviour that is appropriate to the environment. 2006, c. 11, Sched. B, s. 5.

The Crown

4. This Act binds the Crown. R.S.O. 1990, c. E.18, s. 4.

PART II
ENVIRONMENTAL ASSESSMENTS

Application For Approval

Approval for undertaking

5. (1) Every proponent who wishes to proceed with an undertaking shall apply to the Minister for approval to do so. 1996, c. 27, s. 3.

Application

(2) The application consists of the proposed terms of reference submitted under subsection 6 (1) and the environmental assessment subsequently submitted under subsection 6.2 (1). 1996, c. 27, s. 3.

Prohibition

(3) No person shall proceed with an undertaking unless the Minister gives his or her approval to proceed under section 9 or the Tribunal gives its approval under section 9.1. 1996, c. 27, s. 3; 2000, c. 26, Sched. F, s. 11 (6).

Same

(4) No person shall proceed with an undertaking in a manner inconsistent with a condition imposed by the Minister or the Tribunal for proceeding with it. 1996, c. 27, s. 3; 2000, c. 26, Sched. F, s. 11 (6).

Potential non-compliance

(5) A proponent who has received approval to proceed with an undertaking shall promptly notify the Minister if the proponent may not be able to comply with the approval as a result of a change in circumstances. 1996, c. 27, s. 3.

Obligation to consult

5.1 When preparing proposed terms of reference and an environmental assessment, the proponent shall consult with such persons as may be interested. 1996, c. 27, s. 3.

Terms of reference

6. (1) The proponent shall give the Ministry proposed terms of reference governing the preparation of an environmental assessment for the undertaking. 1996, c. 27, s. 3.

Same

(2) The proposed terms of reference must,

(a) indicate that the environmental assessment will be prepared in accordance with the requirements set out in subsection 6.1 (2);

(b) indicate that the environmental assessment will be prepared in accordance with such requirements as may be prescribed for the type of undertaking the proponent wishes to proceed with; or

(c) set out in detail the requirements for the preparation of the environmental assessment. 1996, c. 27, s. 3.

Same

(3) The proposed terms of reference must be accompanied by a description of the consultations by the proponent and the results of the consultations. 1996, c. 27, s. 3.

Public notice

(3.1) The proponent shall give public notice of the proposed terms of reference and shall do so by the prescribed deadline and in the manner required by the Director. 2000, c. 26, Sched. E, s. 2 (2).

Same

(3.2) The public notice must indicate where and when members of the public may inspect the proposed terms of reference and state that they may give their comments about the proposed terms of reference to the Ministry. It must also contain such other information as may be prescribed or as the Director may require. 2000, c. 26, Sched. E, s. 2 (2).

Notice to clerk of a municipality

(3.3) The proponent shall give the information contained in the public notice to the clerk of each municipality in which the undertaking is to be carried out and shall do so by the deadline for giving the public notice. 2000, c. 26, Sched. E, s. 2 (2).

Notice to other persons

(3.4) The proponent shall give the information contained in the public notice to such other persons as the Director may require and shall do so by the deadline for giving the public notice. 2000, c. 26, Sched. E, s. 2 (2).

Public inspection

(3.5) Any person may inspect the proposed terms of reference in the places and at the times set out in the public notice. 2000, c. 26, Sched. E, s. 2 (2).

Comments

(3.6) Any person may comment in writing on the proposed terms of reference to the Ministry and, if the person wishes the comments to be considered by the Minister in deciding whether to approve the proposed terms of reference, shall submit the comments by the prescribed deadline. 2000, c. 26, Sched. E, s. 2 (2).

Approval

(4) The Minister shall approve the proposed terms of reference, with any amendments that he or she considers necessary, if he or she is satisfied that an environmental assessment prepared in accordance with the approved terms of reference will be consistent with the purpose of this Act and the public interest. 2000, c. 26, Sched. E, s. 2 (3).

Mediation

(5) Before approving proposed terms of reference, the Minister may refer a matter in connection with them to mediation and section 8 applies with necessary modifications. 1996, c. 27, s. 3.

Deadline

(6) The Minister shall notify the proponent whether or not the proposed terms of reference are approved and shall do so by the prescribed deadline. 1996, c. 27, s. 3.

Same

(7) Different deadlines may be prescribed with respect to proposed terms of reference that are referred to mediation and with respect to those that are not. 1996, c. 27, s. 3.

Preparation of environmental assessment

6.1 (1) The proponent shall prepare an environmental assessment for an undertaking in accordance with the approved terms of reference. 1996, c. 27, s. 3.

Contents

(2) Subject to subsection (3), the environmental assessment must consist of,

(a) a description of the purpose of the undertaking;

(b) a description of and a statement of the rationale for,

(i) the undertaking,

(ii) the alternative methods of carrying out the undertaking, and

(5) Subsections (1) to (4) do not relieve any person from liability except liability as owner of waste that is delivered to and accepted by the operator of a waste disposal site in accordance with law including an applicable environmental compliance approval, applicable renewable energy approval or applicable regulation made under clause 176 (2.4) (e). 2009, c. 12, Sched. G, s. 3 (2); 2010, c. 16, Sched. 7, s. 2 (32).

Owner of land

(6) Where the operator of a waste disposal site is not the owner of the land on which the site is located, subsections (1) and (2) do not prevent the ownership of waste that is accepted or deposited at the site from being transferred to the owner of the land. R.S.O. 1990, c. E.19, s. 42 (6).

Order for removal of waste

43. Where waste has been deposited upon, in, into or through any land or land covered by water or in any building that has not been approved as a waste disposal site or in respect of which no registration under Part II.2 is in effect, the Director may issue an order to remove the waste and to restore the site to a condition satisfactory to the Director to,

(a) an owner or previous owner or a person who otherwise has or had charge and control of the land or building or waste;

(b) an occupant or previous occupant of the land or building; or

(c) a person that the Director reasonably believes engaged in an activity prohibited by section 40 or 41 that resulted in the deposit of the waste. 1998, c. 35, s. 6; 2010, c. 16, Sched. 7, s. 2 (33).

Order by Director

44. Where a waste management system or a waste disposal site is not in conformity with this Part or the regulations, the Director may order an owner or previous owner to take such action as is required to bring the system or the site into conformity with this Part or the regulations within the time specified in the order. R.S.O. 1990, c. E.19, s. 44.

Right to compensation

45. (1) Within thirty days after the receipt of notice that the Director has refused to renew or has suspended or revoked an environmental compliance approval, any owner who has suffered pecuniary loss as a result of such decision affecting the owner's waste disposal site or waste management system may apply to the Director for compensation for such loss where such owner,

(a) has received an environmental compliance approval for the waste disposal site or waste management system affected by the Director's decision; and

(b) since receiving the environmental compliance approval, has strictly complied with this Act and the regulations. R.S.O. 1990, c. E.19, s. 45 (1); 2010, c. 16, Sched. 7, s. 2 (34-36).

Same

(1.1) Within 30 days after the receipt of notice or an order that the Director has suspended a registration under Part II.2 or removed a registration under Part II.2 from the registry established under that Part, any owner who has suffered pecuniary loss as a result of such decision affecting the owner's waste disposal site or waste management system may apply to the Director for compensation for such loss where such owner,

(a) has received a confirmation of registration under Part II.2 in respect of the waste disposal site or waste management system affected by the Director's decision; and

(b) since registering the activity, has strictly complied with this Act and the regulations. 2010, c. 16, Sched. 7, s. 2 (37).

Exception

(1.2) Subsection (1.1) does not apply if the Director removes the registration from the registry as a result of issuing an order under section 20.18, unless the Director refuses to issue an environmental compliance approval in respect of the waste disposal site or waste management system. 2010, c. 16, Sched. 7, s. 2 (38).

Notice of decision and right to appeal

(2) A notice of the decision of the Director in disposing of the application and a notice stating the right to an appeal under this section shall be served on the owner either personally or by registered mail addressed to the owner at the owner's last known address. R.S.O. 1990, c. E.19, s. 45 (2).

Right to appeal

(3) Within fifteen days after receipt of the notices referred to in subsection (2), the owner may by written notice received by the Ministry and the Tribunal, appeal the amount of compensation, if any, to the Tribunal, and such appeal shall be a new hearing and the Tribunal may dismiss the appeal or alter the decision of the Director establishing the amount of the compensation, if any, and the decision of the Tribunal shall be final. R.S.O. 1990, c. E.19, s. 45 (3); 2000, c. 26, Sched. F, s. 12 (12).

Payment of compensation

(4) Where the Director or the Tribunal, as the case may be, has established the amount of the compensation, if any, the Minister of the Environment shall certify the amount thereof to the Minister of Finance and the Minister of Finance shall pay such amount to the person entitled thereto out of the Consolidated Revenue Fund. R.S.O. 1990, c. E.19, s. 45 (4); 2000, c. 26, Sched. F, s. 12 (12); 2001, c. 9, Sched. G, s. 5 (2).

Former disposal sites

46. No use shall be made of land or land covered by water which has been used for the disposal of waste within a period of twenty-five years from the year in which such land ceased to be so used unless the approval of the Minister for the proposed use has been given. R.S.O. 1990, c. E.19, s. 46.

Security Fund

47. (1) There shall be an account in the Consolidated Revenue Fund to be known in English as "The Waste Well Disposal Security Fund" and in French as "Caisse de garantie des propriétaires de puits d'élimination des déchets", referred to in this section as the "Fund", into which shall be paid the prescribed fees received under this Act. R.S.O. 1990, c. E.19, s. 47 (1).

Interest

(2) Interest shall be credited to the Fund out of the Consolidated Revenue Fund at a rate to be determined from time to time by the Lieutenant Governor in Council, and such interest shall be made up at the close of each fiscal year upon the balance in the Fund at the end of the previous calendar year. R.S.O. 1990, c. E.19, s. 47 (2).

Owner of waste disposal well to pay fee

(3) The owner of every well that is a waste disposal site shall pay a fee calculated upon the amount and type of waste disposed of in the well. R.S.O. 1990, c. E.19, s. 47 (3).

Fee paid to Minister of Finance

(4) The fee shall be paid to the Minister of Finance for payment into the Fund. R.S.O. 1990, c. E.19, s. 47 (4); 2001, c. 9, Sched. G, s. 5 (22).

Calculation and payment of fee

(5) The fee shall be at the rate or rates prescribed by the regulations, shall be paid upon the amount and type of waste disposed of in the well in each calendar year and shall be paid in advance in each calendar year. R.S.O. 1990, c. E.19, s. 47 (5).

Estimate by Director

(6) The Director shall estimate the amount of the fee for each calendar year based upon the amount and type of waste disposed of in the well in the previous calendar year and where waste was not disposed of in the well in the previous calendar year the Director shall estimate the fee on the basis of the amount and type of waste that in the Director's opinion will be disposed of in the well in the current calendar year and may revise such estimate at any time before payment of the estimated fee as required by subsection (7). R.S.O. 1990, c. E.19, s. 47 (6).

Payment of estimated fee

(7) The estimated fee for each calendar year shall be paid within thirty days after receipt of the notice or revised notice by the owner of the well of the amount of the fee estimated by the Director. R.S.O. 1990, c. E.19, s. 47 (7).

Adjustment of fee

(8) At the end of each calendar year, the Director shall calculate the amount of the fee for the year and,

(a) where the fee estimated and paid for the year is less than the calculated fee, the Director shall add the difference to the estimated fee for the next calendar year or may, by a notice in writing, require the owner of the well to pay the difference forthwith to the Minister of Finance; and

(b) where the fee estimated and paid for the year is greater than the calculated fee, the Director shall deduct the difference from the estimated fee for the next calendar year or may certify to the Minister of Finance the amount of such difference and the Minister of Finance shall pay such amount to the owner of the well. R.S.O. 1990, c. E.19, s. 47 (8); 2001, c. 9, Sched. G, s. 5 (22).

Person suffering damage to be compensated

(9) Where the water in any well, lake, river, pond, spring, stream, reservoir or other water or watercourse that any person takes for ordinary household purposes or for the watering of livestock, poultry, home gardens or lawns, or for the watering or irrigation of crops grown for sale, is rendered unfit for such use by reason of the operation of any well that is a waste disposal site, the person is entitled to be compensated out of the Fund so far as the Fund is sufficient for that purpose, having regard to any other charges thereon, if the person gives notice to the Director forthwith after becoming aware that the water has been rendered unfit and makes a claim therefor under subsection (10) within six months, or such longer period of time as may be determined by the Director, from the date that the Director received the notice that the water has been rendered unfit. R.S.O. 1990, c. E.19, s. 47 (9).

Claim for compensation

(10) A person claiming to be entitled to compensation out of the Fund shall make application therefor to the Director in writing, setting out therein the person's full name and address and the particulars of the person's claim and shall furnish to the Director such additional information with respect to the subject-matter of the claim that the Director may require and that is within the person's knowledge. R.S.O. 1990, c. E.19, s. 47 (10).

Determination by Director

(11) The Director shall investigate or cause an investigation to be made and shall determine whether there are reasonable grounds for believing that the water referred to in subsection (9) has been rendered unfit for any of the purposes set out therein and for which it was used and that it has been rendered unfit by the disposal of waste in any well that is a waste disposal site and in such case shall determine the amount of the claimant's reasonable and necessary expenses incurred in obtaining a temporary or permanent alternate supply of water substantially equivalent in quantity and quality to such water. R.S.O. 1990, c. E.19, s. 47 (11); 2005, c. 12, s. 1 (12).

Director's certificate

(12) The Director shall set out his or her determination in a certificate together with written reasons therefor and send a copy thereof to the claimant by registered mail at the address set out in the application. R.S.O. 1990, c. E.19, s. 47 (12).

When certificate final

(13) The certificate of the Director is final at the end of thirty days from the date of mailing it to the claimant unless notice of appeal is served within that time. R.S.O. 1990, c. E.19, s. 47 (13).

Appeal

(14) The claimant may appeal to the Tribunal at any time before the certificate of the Director becomes final and the procedure thereon shall be the same as upon an appeal from an order of the Director under Part XIII. R.S.O. 1990, c. E.19, s. 47 (14); 2000, c. 26, Sched. F, s. 12 (12).

Payment out of Fund

(15) Where the Director has sent the certificate by registered mail to the claimant and the time for any appeal has expired or, where an appeal is taken, it is disposed of, and it is finally determined that the claimant is entitled to payment of compensation out of the Fund, the Director shall certify to the Minister of Finance the sum found to be payable and the Minister of Finance shall pay such sum to the claimant out of the Fund. R.S.O. 1990, c. E.19, s. 47 (15); 2001, c. 9, Sched. G, s. 5 (22).

Recovery of money

(16) Where a claimant who has received any payment out of the Fund recovers any money directly or indirectly from the owner of a well that is a waste disposal site, in respect of the expenses for which the payment was made out of the Fund, the claimant shall repay to the Minister of Finance for credit to the Fund an amount equal to the payment out of the Fund or the money received from the owner of the well, whichever is the lesser, and such amount may be recovered with costs in any court of competent jurisdiction as a debt due to the Crown. R.S.O. 1990, c. E.19, s. 47 (16); 2001, c. 9, Sched. G, s. 5 (22).

Recovery of fees owing

(17) Any fee or any difference between the estimated fee and the calculated fee referred to in clause (8) (a) that is payable under this section may be recovered in any court of competent jurisdiction as a debt due to the Crown. R.S.O. 1990, c. E.19, s. 47 (17).

PART V.0.1
RENEWABLE ENERGY

Definition

47.1 In this Part,

"environment" has the same meaning as in the *Environmental Assessment Act*. 2009, c. 12, Sched. G, s. 4 (1).

Purpose

47.2 (1) The purpose of this Part is to provide for the protection and conservation of the environment. 2009, c. 12, Sched. G, s. 4 (1).

Application of s. 3 (1)

(2) Subsection 3 (1) does not apply to this Part. 2009, c. 12, Sched. G, s. 4 (1).

Requirement for renewable energy approval

47.3 (1) A person shall not engage in a renewable energy project except under the authority of and in accordance with a renewable energy approval issued by the Director if engaging in the project involves engaging in any of the following activities:

1. An activity for which, in the absence of subsection (2), subsection 9 (1) of this Act would require an environmental compliance approval.
2. An activity for which, in the absence of subsection (2), subsection 27 (1) of this Act would require an environmental compliance approval.
3. An activity for which, in the absence of subsection (2), subsection 34 (3) of the *Ontario Water Resources Act* would require a permit.

Note: On the later of the day subsection 4 (1) of Schedule G to the *Green Energy and Green Economy Act, 2009* comes into force and the day subsection 1 (8) of the *Safeguarding and Sustaining Ontario's Water Act, 2007* comes into force, paragraph 3 is repealed and the following substituted:

3. An activity for which, in the absence of subsection (2), subsection 34 (1) of the *Ontario Water Resources Act* would require a permit, if the activity would not involve a transfer as defined in subsection 34.5 (1) of that Act.

See: 2009, c. 12, Sched. G, ss. 4 (2), 26 (2).

4. An activity for which, in the absence of subsection (2), section 36 of the *Ontario Water Resources Act* would require a well construction permit.
5. An activity for which, in the absence of subsection (2), subsection 53 (1) of the *Ontario Water Resources Act* would require an environmental compliance approval.
6. An activity for which, in the absence of subsection (2), a provision prescribed by the regulations would require an approval, permit or other instrument.
7. Any other activity prescribed by the regulations. 2009, c. 12, Sched. G, s. 4 (1); 2010, c. 16, Sched. 7, s. 2 (39-41).

Exemptions

(2) The following provisions do not apply to a person who is engaging in a renewable energy project:

1. Subsection 9 (1) of this Act.
2. Subsection 27 (1) of this Act.
3. Subsection 34 (3) of the *Ontario Water Resources Act*.

Note: On the later of the day subsection 4 (1) of Schedule G to the *Green Energy and Green Economy Act, 2009* comes into force and the day subsection 1 (8) of the *Safeguarding and Sustaining Ontario's Water Act, 2007* comes into force, paragraph 3 is repealed and the following substituted:

3. Subsection 34 (1) of the *Ontario Water Resources Act*, if the person engaging in the renewable energy project is not engaged in a taking of water that involves a transfer as defined in subsection 34.5 (1) of that Act.

See: 2009, c. 12, Sched. G, ss. 4 (3), 26 (2).

4. Section 36 of the *Ontario Water Resources Act*.

5. Section 53 of the *Ontario Water Resources Act*.

6. A provision prescribed by the regulations for the purpose of paragraph 6 of subsection (1). 2009, c. 12, Sched. G, s. 4 (1); 2010, c. 16, Sched. 7, s. 2 (42).

Application

47.4 (1) An application for the issue or renewal of a renewable energy approval shall be prepared in accordance with the regulations and submitted to the Director. 2009, c. 12, Sched. G, s. 4 (1).

Director may require information

(2) The Director may require an applicant under subsection (1) to submit any plans, specifications, engineers' reports or other information and to carry out and report on any tests or experiments relating to the renewable energy project. 2009, c. 12, Sched. G, s. 4 (1).

Director's powers

47.5 (1) After considering an application for the issue or renewal of a renewable energy approval, the Director may, if in his or her opinion it is in the public interest to do so,

(a) issue or renew a renewable energy approval; or

(b) refuse to issue or renew a renewable energy approval. 2009, c. 12, Sched. G, s. 4 (1).

Terms and conditions

(2) In issuing or renewing a renewable energy approval, the Director may impose terms and conditions if in his or her opinion it is in the public interest to do so. 2009, c. 12, Sched. G, s. 4 (1).

Other powers

(3) On application or on his or her own initiative, the Director may, if in his or her opinion it is in the public interest to do so,

(a) alter the terms and conditions of a renewable energy approval after it is issued;

(b) impose new terms and conditions on a renewable energy approval; or

(c) suspend or revoke a renewable energy approval. 2009, c. 12, Sched. G, s. 4 (1).

Same

(4) A renewable energy approval is subject to any terms and conditions prescribed by the regulations. 2009, c. 12, Sched. G, s. 4 (1).

Water transfers: Great Lakes-St. Lawrence River, Nelson and Hudson Bay Basins

47.6 A renewable energy approval shall not authorize a person to take water contrary to subsection 34.3 (2) of the *Ontario Water Resources Act*. 2009, c. 12, Sched. G, s. 4 (1).

Policies, renewable energy approvals

47.7 (1) The Minister may, in writing, issue, amend or revoke policies in respect of renewable energy approvals. 2009, c. 12, Sched. G, s. 4 (1).

Same

(2) A policy or the amendment or revocation of a policy takes effect on the later of the following days:

1. The day that notice of the policy, amendment or revocation, as the case may be, is given in the environmental registry established under the *Environmental Bill of Rights, 1993*.

2. The effective day specified in the policy, amendment or revocation, as the case may be. 2009, c. 12, Sched. G, s. 4 (1).

Same

(3) Subject to section 145.2.2, decisions made under this Act in respect of renewable energy approvals shall be consistent with any policies issued under subsection (1) that are in effect on the date of the decision. 2009, c. 12, Sched. G, s. 4 (1).

PART V.1
VEHICLE PERMITS AND NUMBER PLATES

Seizure of permits and number plates

Definitions, ss. 48 to 55

48. (1) In this section and in sections 49 to 55,

"number plates" means number plates issued under the *Highway Traffic Act*; ("plaques d'immatriculation")

"offence" means offence under this Act, the *Nutrient Management Act, 2002*, the *Ontario Water Resources Act*, the *Pesticides Act*, the *Safe Drinking Water Act, 2002* or the *Toxics Reduction Act, 2009*; ("infraction")

"permit" means permit issued under section 7 of the *Highway Traffic Act*; ("certificat d'immatriculation")

"Registrar" means Registrar of Motor Vehicles under the *Highway Traffic Act*. ("registrateur") R.S.O. 1990, c. E.19, s. 48 (1); 1998, c. 35, s. 8 (1, 2); 2002, c. 4, s. 62 (2); 2009, c. 19, s. 67 (2).

Seizure of permit and number plates

(2) A police officer or a provincial officer may seize the permit and the number plates for a vehicle where he or she reasonably believes that the vehicle was used or is being used in connection with the commission of an offence and the seizure is necessary to prevent the continuation or repetition of the offence. 1998, c. 35, s. 8 (3).

Safekeeping

(3) The police officer or provincial officer,

(a) shall deliver the permit and the number plates into the custody of the Registrar pending disposition as provided in sections 49 to 55; and

(b) shall give notice to the Registrar of the date when the permit and the number plates were seized. R.S.O. 1990, c. E.19, s. 48 (3).

Notice by Registrar

(4) The Registrar shall give notice of the delivery into custody and of the date of the seizure to the person to whom the permit and the number plates were issued. R.S.O. 1990, c. E.19, s. 48 (4).

Suspension of permit and detention of number plates

49. (1) Where a person is convicted of an offence, the court may order the suspension of the permit and the detention of the number plates for any vehicle that the court is satisfied was used in connection with the commission of the offence. 1998, c. 35, s. 9 (1).

Term of suspension and detention

(2) The court may fix such period of time, not exceeding five years, for the suspension of the permit and the detention of the number plates as the court considers proper.

Idem

(3) Where the permit and the number plates were seized under section 48, the period of the suspension and detention shall be calculated from the day of the seizure.

Order for seizure

(4) Where the permit and the number plates have not been seized, the court may order that the permit and the number plates shall be seized and delivered to the Registrar.

Out-of-province permit and number plates

(5) Where the permit to drive the vehicle on a highway and the number plates were issued by an authority outside Ontario and not under the *Highway Traffic Act*, the court shall not act under subsection (1) but may order the Registrar to return the permit and the number plates to the authority that issued them.

Order is additional to any other penalty

Same

(4) In an inspection under subsection (2), the provincial officer or police officer may,

(a) require the driver of the motor vehicle to submit the motor vehicle to such tests at such places and times as the provincial officer or police officer considers reasonable;

(b) require the driver of the motor vehicle to produce any documents, including licenses and permits, related to the operation or ownership of the motor vehicle; and

(c) require the driver of the motor vehicle to operate, use or set in motion the vehicle or any part of the vehicle, under the conditions specified by the provincial officer or police officer.

Police assistance

(5) Where a provincial officer considers it necessary or expedient to do so, he or she may call for the assistance of any member of the Ontario Provincial Police Force or the police force in the area where the assistance is required for an inspection under subsection (2), and it is the duty of every member of a police force to render the assistance. 1998, c. 35, s. 26.

167. REPEALED: 1998, c. 35, s. 27.

Matters confidential

168. (1) Except as to information in respect of the deposit, addition, emission or discharge of a contaminant into the natural environment, every provincial officer shall preserve secrecy in respect of all matters that come to his or her knowledge in the course of any survey, examination, test or inquiry under this Act or the regulations and shall not communicate any such matters to any person except,

(a) as may be required in connection with the administration of this Act and the regulations or any proceeding under this Act or the regulations;

(a.1) as authorized under the *Regulatory Modernization Act, 2007*;

(b) to the provincial officer's counsel; or

(c) with the consent of the person to whom the information relates. R.S.O. 1990, c. E.19, s. 168 (1); 2007, c. 4, s. 30 (2); 2009, c. 19, s. 67 (9).

Testimony in civil suit

(2) Except in a proceeding under this Act or the regulations, no provincial officer shall be required to give testimony, other than testimony in respect of the deposit, addition, emission or discharge of a contaminant into the natural environment, in any civil suit or proceeding with regard to information obtained by him or her in the course of any survey, examination, test or inquiry under this Act or the regulations. R.S.O. 1990, c. E.19, s. 168 (2); 2009, c. 19, s. 67 (9).

PART XV.1
RECORDS OF SITE CONDITION

Definitions, Part XV.I

168.1 In this Part,

"building" has the same meaning as in the *Building Code Act, 1992*; ("bâtiment")

"construct" has the same meaning as in the *Building Code Act, 1992*; ("construire")

"owner" includes a person prescribed by the regulations; ("propriétaire")

"phase one environmental site assessment" means an assessment of property conducted in accordance with the regulations by or under the supervision of a qualified person to determine the likelihood that one or more contaminants have affected any land or water on, in or under the property; ("évaluation environnementale de site de phase I")

"phase two environmental site assessment" means an assessment of property conducted in accordance with the regulations by or under the supervision of a qualified person to determine the location and concentration of one or more contaminants in the land or water on, in or under the property; ("évaluation environnementale de site de phase II")

"qualified person" means a person who meets the qualifications prescribed by the regulations; ("personne compétente")

"Registry" means the Environmental Site Registry; ("Registre")

"risk assessment" means an assessment of risks prepared in accordance with the regulations by or under the supervision of a qualified person. ("évaluation des risques") 2001, c. 17, s. 2 (36); 2007, c. 7, Sched. 13, s. 3.

Interpretation, effect on cause of action

168.2 (1) Except as provided in subsections 168.3 (3) and (4) and 168.9 (12), this Part shall not be construed as affecting any cause of action that a person would have in the absence of this Part. 2001, c. 17, s. 2 (36); 2006, c. 19, Sched. K, s. 2 (4); 2007, c. 7, Sched. 13, s. 4 (1).

Interpretation, meeting standards

(2) For purposes of this Part, a property meets the applicable site condition standards prescribed by the regulations for all contaminants prescribed by the regulations or the standards specified in a risk assessment for a contaminant if the concentration of the contaminants in the land and water on, in or under the property does not exceed the standards. 2007, c. 7, Sched. 13, s. 4 (2).

Environmental Site Registry

168.3 (1) The Director shall establish, maintain and operate a registry known in English as the Environmental Site Registry and in French as Registre environnemental des sites. 2001, c. 17, s. 2 (36).

Purposes

(2) The purposes of the Registry are:

1. To allow the filing of records of site condition for the purposes of this Part.
2. To facilitate public access to information contained in records of site condition that have been filed under this Part and to other information filed in accordance with this Act and the regulations.
3. Such other purposes as are prescribed. 2001, c. 17, s. 2 (36); 2007, c. 7, Sched. 13, s. 5 (1).

Protection from liability

(3) Despite subsection 180 (2), no action or other proceeding shall be commenced against the Crown in right of Ontario, a public servant employed under Part III of the *Public Service of Ontario Act, 2006*, a person or body to whom powers and duties of the Director are delegated under section 168.9 or an employee of a person or body to whom powers and duties of the Director are delegated under section 168.9 arising from any inaccuracy contained in a record of site condition that is filed in the Registry under this Act. 2001, c. 17, s. 2 (36); 2006, c. 35, Sched. C, s. 36 (6).

Same

(4) No action or other proceeding shall be commenced against a municipality or a conservation authority or against an officer, employee or agent of a municipality or conservation authority in relation to the following, if the action or proceeding arises from any inaccuracy contained in a record of site condition that is filed in the Registry under this Act:

1. The issuance of a permit under section 8 or 10 of the *Building Code Act, 1992*.
2. Any act done in the execution or intended execution of any power or duty under the *Planning Act* or any alleged neglect or default in the execution of any such power or duty.
3. Any act done in the execution or intended execution of any power or duty under any other prescribed Act or any prescribed provisions under a prescribed Act or any alleged neglect or default in the execution of any such power or duty. 2007, c. 7, Sched. 13, s. 5 (2).

Prohibition on certain changes of use

168.3.1 (1) Subject to subsection (2), a person shall not,

(a) change the use of a property from industrial or commercial use to residential or parkland use;

(b) change the use of a property in a manner prescribed by the regulations; or

(c) construct a building if the building will be used in connection with a change of use that is prohibited by clause (a) or (b). 2001, c. 17, s. 2 (37).

Exception

(2) Subsection (1) does not apply if,

(a) a record of site condition has been filed in the Registry in respect of the property under section 168.4; and

(b) the use specified under paragraph 3 of subsection 168.4 (2) in the record of site condition is the use to which the property is changed under clause (1) (a) or (b). 2001, c. 17, s. 2 (37).

Submission for filing, record of site condition

168.4 (1) An owner of a property may submit for filing in the Registry a record of site condition in respect of the property if all of the following criteria are satisfied:

1. A qualified person has certified in the record of site condition that a phase one environmental site assessment of the property has been conducted.
2. A qualified person has certified in the record of site condition that,
   i. a phase two environmental site assessment of all or part of the property was conducted with respect to one or more contaminants, or
   ii. as of the certification date, no phase two environmental site assessment is required by the regulations for any part of the property and, in the opinion of the qualified person, it is not necessary for any other reason to conduct a phase two environmental site assessment for any part of the property.
3. If a phase two environmental site assessment was conducted but for only part of the property, a qualified person has certified in the record of site condition that, as of the certification date,
   i. no phase two environmental site assessment was required by the regulations for any other part of the property, and
   ii. in the opinion of the qualified person, it was not necessary for any other reason to conduct a phase two environmental site assessment for any other part of the property.
4. If a phase two environmental site assessment was conducted for all or part of the property, a qualified person has certified in the record of site condition that,
   i. as of the certification date, the property for which the phase two environmental site assessment was conducted meets,
      A. the applicable full depth background site condition standards prescribed by the regulations for all contaminants prescribed by the regulations, except for those contaminants specified by the qualified person,
      B. the applicable full depth generic site condition standards prescribed by the regulations for all contaminants prescribed by the regulations, except for those contaminants specified by the qualified person, or
      C. the applicable stratified site condition standards prescribed by the regulations for all contaminants prescribed by the regulations, except for those contaminants specified by the qualified person, and
   ii. for each contaminant excepted by the qualified person from the certification under subparagraph i,
      A. a risk assessment was prepared for the contaminant with respect to the property for which the phase two environmental site assessment was conducted,
      B. the Director has accepted the risk assessment under clause 168.5 (1) (a), and
      C. as of the certification date, the property for which the phase two environmental site assessment was conducted meets the standards specified in the risk assessment for the contaminant.
5. The record of site condition contains everything required by subsection (2) and has been completed in accordance with the regulations. 2001, c. 17, s. 2 (36); 2007, c. 7, Sched. 13, s. 6 (1).

Contents of record of site condition

(2) The person who submits for filing a record of site condition in respect of a property shall ensure that, in accordance with the regulations, the record of site condition contains the following:

1. A description of the property.
2. The name of the person submitting the record of site condition for filing and the names of any other owners of the property.
3. The type of property use to which the property for which the record of site condition is submitted for filing is to be put.

4. Which standards prescribed by the regulations were applied for the purpose of the record of site condition.
5. A description of any soil removals or other action taken to reduce the concentration of contaminants on, in or under the property.
6. For each contaminant for which sampling and analysis has been performed, the maximum known concentration of the contaminant on, in or under the property as of the certification date.
7. A statement indicating whether a certificate of property use has been issued in respect of the property.
8. A list of all reports relied on by qualified persons in making the certifications referred to in subsection (1).
9. Such other certifications, information and documents as are prescribed by the regulations. 2001, c. 17, s. 2 (36); 2007, c. 7, Sched. 13, s. 6 (2-5).

Submitting a record of site condition

(3) If a record of site condition is submitted for filing under this section in respect of a property, the Director shall,

(a) give a notice of receipt to the owner who submitted the record of site condition, once the Director is satisfied that everything required by subsection (2) has been submitted for filing; and

(b) within the time prescribed by the regulations from the date set out in the notice of receipt given under clause (a), give a notice or acknowledgement under subsection (3.1) to the owner who submitted the record of site condition. 2007, c. 7, Sched. 13, s. 6 (6).

Same

(3.1) The Director shall give one of the following to the person to whom the Director has given a notice of receipt under clause (3) (a):

1. Written notice that the record of site condition cannot be filed because it has not been completed in accordance with the regulations.
2. Written notice stating that the Director intends to conduct a review in relation to the record of site condition before the record of site condition can be filed in the Registry.
3. Written acknowledgement, specifying the date, that the record of site condition has been filed in the Registry. 2007, c. 7, Sched. 13, s. 6 (6).

Notice that a record of site condition cannot be filed

(3.2) A notice given under paragraph 1 of subsection (3.1) shall identify the manner in which the record of site condition has not been completed in accordance with the regulations. 2007, c. 7, Sched. 13, s. 6 (6).

Notice after review relating to record of site condition

(3.3) If a notice is given under paragraph 2 of subsection (3.1), after conducting the review, the Director shall,

(a) give a notice to the owner indicating that a defect prescribed by the regulations has been found in relation to the record of site condition; or

(b) give a written acknowledgment to the owner, specifying the date, that the record of site condition has been filed in the Registry. 2007, c. 7, Sched. 13, s. 6 (6).

Correction of defect

(3.4) If an owner to whom notice has been given under clause (3.3) (a),

(a) submits for filing a new record of site condition in respect of the property under subsection (1); or

(b) submits further information or documents to the Director in relation to the original record of site condition that was submitted under subsection (1),

and the Director is satisfied that, as a result of the submission, there is no defect prescribed by the regulations in relation to the record of site condition, the Director shall give a written acknowledgment to the owner, specifying the date, that the record of site condition has been filed in the Registry. 2007, c. 7, Sched. 13, s. 6 (6).

Date of filing

(4) A record of site condition is deemed to have been filed in the Registry under this section on the date specified in the acknowledgement given by the Director under this section. 2007, c. 7, Sched. 13, s. 6 (7).

Retention of reports

(5) If a qualified person has relied on a report in making a certification referred to in subsection (1) or (2) in a record of site condition that has been filed under this section, the following persons shall retain a copy of the report for the period prescribed by the regulations:

1. The owner of the property who submitted the record of site condition for filing or who filed the record of site condition.
2. The qualified person who made the certification. 2007, c. 7, Sched. 13, s. 6 (8, 9).

Transition

(6) If, pursuant to the Ministry publication entitled "Guideline for Use at Contaminated Sites in Ontario", originally dated June 1996 and later revised, a record of site condition in respect of a property was submitted to the Ministry before this section came into force, the owner of the property may, despite subsections (1) and (2), file the record of site condition in the Registry if both of the following criteria are satisfied:

1. The Ministry has acknowledged in writing receipt of the record of site condition.
2. The owner of the property files a notice in the Registry certifying that the requirements prescribed by the regulations have been complied with. 2001, c. 17, s. 2 (36).

Same

(7) If a record of site condition is filed in the Registry under subsection (6),

(a) the notice referred to in paragraph 2 of subsection (6) shall be deemed to be part of the record of site condition;

(b) the land use specified in the record of site condition shall be deemed to have been specified as the type of property use under paragraph 3 of subsection (2); and

(c) the record of site condition shall be deemed to contain,

(i) a certification under sub-subparagraph 4 i A of subsection (1), if the record of site condition indicates that a background assessment or restoration approach was used,

(ii) a certification under sub-subparagraph 4 i B of subsection (1), if the record of site condition indicates that a generic full depth assessment or restoration approach was used,

(iii) a certification under sub-subparagraph 4 i C of subsection (1), if the record of site condition indicates that a generic stratified assessment or restoration approach was used, or

(iv) a certification under subparagraph 4 ii of subsection (1), if the record of site condition indicates that a site specific risk assessment approach was used. 2001, c. 17, s. 2 (36).

Acknowledgment of filing

(8) If a record of site condition is filed in the Registry under subsection (6), the Director shall promptly give the person who filed the record of site condition a written acknowledgment. 2007, c. 7, Sched. 13, s. 6 (10).

Date of filing

(9) A record of site condition that is filed in the Registry under subsection (6) shall be deemed to have been filed in the Registry on the date specified in the acknowledgment given under subsection (8). 2007, c. 7, Sched. 13, s. 6 (10).

Note: On a day to be named by proclamation of the Lieutenant Governor, section 168.4 is amended by the Statutes of Ontario, 2007, chapter 7, Schedule 13, subsection 6 (11) by adding the following subsection:

Correction of errors

(10) If an owner of property for which a record of site condition has been filed in the Registry under this section requests the Director to correct an error in the record of site condition, the Director shall correct the error in the record of site condition if the error is of a prescribed type and if the correction is made in the circumstances that satisfy the criteria, if any, prescribed by the regulations and does not contravene any prohibition, if any, prescribed by the regulations. 2007, c. 7, Sched. 13, s. 6 (11).

See: 2007, c. 7, Sched. 13, ss. 6 (11), 14 (2).

Director's response to risk assessment

168.5 (1) If an owner of property submits a risk assessment relating to a contaminant and the property to the Director, the Director shall, within the time prescribed by the regulations,

(a) give the person notice in writing that the Director accepts the risk assessment; or

(b) give the person notice in writing that the Director does not accept the risk assessment for reasons specified by the Director in the notice. 2001, c. 17, s. 2 (36).

Validity of decision

(2) A decision of the Director to accept or not accept a risk assessment is not invalid solely on the ground that the decision was not made within the time prescribed by the regulations. 2001, c. 17, s. 2 (36).

Certificate of property use

168.6 (1) If a risk assessment relating to a property has been accepted under clause 168.5 (1) (a), the Director may issue a certificate of property use to the owner of the property, requiring the owner to do any of the following things:

1. Take any action that is specified in the certificate and that, in the Director's opinion, is necessary to prevent, eliminate or ameliorate any adverse effect that has been identified in the risk assessment, including installing any equipment, monitoring any contaminant or recording or reporting information for that purpose.
2. Refrain from using the property for any use specified in the certificate or from constructing any building specified in the certificate on the property. 2001, c. 17, s. 2 (36); 2006, c. 19, Sched. K, s. 2 (5, 6); 2007, c. 7, Sched. 13, s 7.

Restriction

(2) A certificate of property use shall not require an owner of property to take any action that would have the effect of reducing the concentration of a contaminant on, in or under the property to a level below the level that is required to meet the standards specified for the contaminant in the risk assessment. 2001, c. 17, s. 2 (36).

Revocation or amendment

(3) The Director may, on his or her own initiative or on application by the owner of the property in respect of which a certificate has been issued under subsection (1),

(a) alter any terms and conditions in the certificate or impose new terms and conditions; or

(b) revoke the certificate. 2001, c. 17, s. 2 (36).

Occupants

(4) If a certificate of property use contains a provision requiring the owner of property to refrain from using the property for a specified use or from constructing a specified building on the property,

(a) the owner of the property shall ensure that a copy of the provision is given to every occupant of the property;

(b) the provision applies, with necessary modifications, to every occupant of the property who receives a copy of the provision; and

(c) the owner of the property shall ensure that every occupant of the property complies with the provision. 2001, c. 17, s. 2 (36).

Notice to prescribed persons

(5) If a certificate of property use is issued, altered or revoked under this section, the Director shall give notice of the certificate, alteration or revocation to the persons prescribed by the regulations. 2001, c. 17, s. 2 (38).

Prohibition on construction or use

(6) Despite any other Act, if a certificate of property use contains a provision requiring the owner of property to refrain from using the property for a specified use or from constructing a specified building on the property, no permit, licence, approval or other instrument shall be issued to any person, under any provision prescribed by the regulations, that would authorize the person to use the property for the

specified use, to construct the specified building or to construct a building that will be used for the specified use. 2001, c. 17, s. 2 (38).

Consequences of filing record of site condition

168.7 (1) If a record of site condition is filed in the Registry in accordance with section 168.4 with respect to a property, no order shall be issued to any of the following persons under section 7, 8, 12, 17, 18, 97, 157 or 157.1 in respect of a contaminant that was discharged into the natural environment before the certification date and was on, in or under the property as of the certification date:

1. The person who filed or who submitted for filing the record of site condition or a subsequent owner of the property.
2. A person who is in occupation of the property or who was in occupation of the property at any time after the record of site condition was filed.
3. A person who has charge, management or control of the property or who had charge, management or control of the property at any time after the record of site condition was filed.
4. A person who meets the requirements prescribed by the regulations and who, before the certification date,
   i. owned the property,
   ii. was in occupation of the property, or
   iii. had charge, management or control of the property. 2001, c. 17, s. 2 (36); 2007, c. 7, Sched. 13, s. 8 (1, 2).

False or misleading information, etc.

(2) Subsection (1) does not apply if the record of site condition contains false or misleading information or false or misleading certifications. 2007, c. 7, Sched. 13, s. 8 (3).

Contaminants that move to other property

(3) Subsection (1) does not apply if, after the certification date, any of the contaminant moved from the property to which the record of site condition relates to another property. 2001, c. 17, s. 2 (36).

Note: On a day to be named by proclamation of the Lieutenant Governor, subsection (3) is repealed by the Statutes of Ontario, 2007, chapter 7, Schedule 13, subsection 8 (4) and the following substituted:

Contaminants that move to other property

(3) Subject to section 168.7.1, subsection (1) does not apply if, after the certification date, any of the contaminant moved from the land or water on, in or under the property for which a record of site condition has been filed to another property. 2007, c. 7, Sched. 13, s. 8 (4).

See: 2007, c. 7, Sched. 13, ss. 8 (4), 14 (2).

Different use

(4) If the actual use of the property is different from the use specified under paragraph 3 of subsection 168.4 (2) in the record of site condition, subsection (1) does not apply to a person who causes or permits the change in use and who owns, occupies or has charge, management or control of the property at the time of the change unless,

(a) the record of site condition did not contain any certification under subparagraph 4 ii of subsection 168.4 (1);

(b) all of the full depth background site condition standards that are applicable under the regulations to the actual use are the same as or less stringent than the full depth background site condition standards that are applicable to the use specified in the record of site condition, if the record of site condition contained a certification under sub-subparagraph 4 i A of subsection 168.4 (1);

(c) all of the full depth generic site condition standards that are applicable under the regulations to the actual use are the same as or less stringent than the full depth generic site condition standards that are applicable to the use specified in the record of site condition, if the record of site condition contained a certification under sub-subparagraph 4 i B of subsection 168.4 (1); and

(d) all of the stratified site condition standards that are applicable under the regulations to the actual use are the same as or less stringent than the stratified site condition standards that are applicable to the use specified in the record of site condition, if the record of site condition contained a certification under sub-subparagraph 4 i C of subsection 168.4 (1). 2007, c. 7, Sched. 13, s. 8 (5).

Idem

(2) Any person who is a producer and distributor shall be deemed to have received in the capacity of a distributor, from himself, herself or itself in the capacity of a producer, the milk that the person both produces and distributes, and to have contracted in that capacity with himself, herself or itself in the capacity of a producer for the marketing of the milk, upon the condition that the regulations, orders, directions, agreements and awards and the renegotiated agreements and awards made under this Act apply. R.S.O. 1990, c. M.12, s. 10 (2).

Idem

(3) A producer or group of two or more producers who, directly or through a corporation of which the producer or producers is or are members or shareholders, or through an agent, arranges for the distributing, on the account of the producer or producers, by a distributor of any milk produced by the producer or producers, shall be deemed to be a producer and distributor or producers and distributors for the purposes of subsections (1) and (2). R.S.O. 1990, c. M.12, s. 10 (3).

Producer-processors

11. (1) Any person who is a producer and processor is entitled in the person's respective capacities as a producer and as a processor to all the rights and privileges and is subject to all the duties and obligations of a producer and of a processor. R.S.O. 1990, c. M.12, s. 11 (1).

Idem

(2) Any person who is a producer and processor shall be deemed to have received in the capacity of a processor from himself, herself or itself in the capacity of a producer, the milk that the person both produces and processes, and to have contracted in that capacity with himself, herself or itself in the capacity of a producer for the marketing of the milk, upon the condition that the regulations, orders, directions, agreements and awards and the renegotiated agreements and awards made under this Act apply. R.S.O. 1990, c. M.12, s. 11 (2).

Idem

(3) A producer or group of two or more producers who, directly or through a corporation of which the producer or producers is or are members or shareholders, or through an agent, arrange for the processing, on the account of the producer or producers, by a processor of any milk produced by the producer or producers, shall be deemed to be a producer and processor or producers and processors for the purposes of subsections (1) and (2). R.S.O. 1990, c. M.12, s. 11 (3).

12. REPEALED: 1997, c. 44, s. 6.

Production of books, etc., to field-person

13. (1) Every person engaged in the producing, processing or marketing of milk or milk products, when requested so to do by a field-person appointed for the exercise of the powers and the performance of the duties of the Director, shall, in respect of milk and milk products, produce the person's books, records and documents and permit inspection thereof and furnish copies thereof or extracts therefrom and permit inspection of the person's premises and any equipment, milk or milk products therein. R.S.O. 1990, c. M.12, s. 13 (1).

Obstruction of field-person

(2) No person shall hinder or obstruct an officer or field-person mentioned in subsection (1) in the course of his or her duties, furnish him or her with false information or refuse to furnish him or her with information. R.S.O. 1990, c. M.12, s. 13 (2).

Certificate of appointment of field-person

(3) The production by a field-person mentioned in subsection (1) of a certificate of appointment purporting to be signed by the Director shall be accepted by any person engaged in the producing, processing or marketing of milk or milk products as proof of such appointment. R.S.O. 1990, c. M.12, s. 13 (3).

CONSTRUCTION AND OPERATION OF PLANTS

Permits re plants

Permit to construct plant

14. (1) No person shall construct or alter any building intended for use as a plant without a permit from the Director. R.S.O. 1990, c. M.12, s. 14 (1).

Permit to alter plant

(2) No person shall alter a plant without a permit from the Director. R.S.O. 1990, c. M.12, s. 14 (2).

Conditions precedent to issue of permit

(3) No permit shall be issued by the Director unless,

(a) in the opinion of the Director, the plant is necessary and desirable, having regard to the needs of the producers in the locality in which it is proposed to locate the plant and to the facilities of the existing plants in operation; and

(b) the proposed plant complies with the regulations. R.S.O. 1990, c. M.12, s. 14 (3).

Licences

Licence to operate plant

15. (1) No person shall operate a plant without a licence therefor from the Director. R.S.O. 1990, c. M.12, s. 15 (1).

Licence to operate as distributor

(2) No person shall carry on business as a distributor without a licence therefor from the Director. R.S.O. 1990, c. M.12, s. 15 (2).

Prohibitions

Shade of butter

16. (1) Except as provided in the regulations, no person shall process, sell, offer for sale or have in possession for sale butter that has a tint or shade containing less than one and six-tenths degrees or more than ten and one-half degrees of yellow, or of yellow and red collectively, measured in terms of the Lovibond tintometer scale or the equivalent of such measurement. R.S.O. 1990, c. M.12, s. 16 (1).

Reconstituted milk

(2) Except as provided in the regulations, no person shall process, sell, offer for sale or have in possession for sale reconstituted milk. R.S.O. 1990, c. M.12, s. 16 (2).

Basis of payment for milk and cream

17. All milk and cream received at a plant shall be paid for on the basis of its milk-fat content or on such other basis as is prescribed in the regulations. R.S.O. 1990, c. M.12, s. 17.

18. REPEALED: 2002, c. 18, Sched. P, s. 42.

Regulations with respect to the operation of plants

19. (1) The Commission may make regulations,

1. providing for the issue, renewal, suspension or revocation of or refusal to issue or renew licences for the operation of any class of plant, and prescribing the fees payable for licences or the renewal thereof;

2. providing for the issue, renewal, suspension or revocation of or refusal to issue or renew licences for any class of distributor, and prescribing the fees payable for licences or the renewal thereof;

3. prescribing the terms and conditions upon which licences under paragraphs 1 and 2 are issued, renewed, suspended or revoked;

4. providing that the Director may impose such terms and conditions upon a licence under paragraphs 1 and 2 as the Director considers proper;

4.1 exempting classes of persons from the requirement under section 14 to hold a permit and under section 15 to hold a licence, in such circumstances as may be prescribed and subject to such restrictions as may be prescribed;

5. subject to subsection (2), providing for the imposition, amount, disposition and use of penalties where, after a hearing, the Director is of the opinion that the applicant or licensee has failed to

comply with or has contravened any term or condition of a licence under paragraphs 1 and 2 or any provision of this Act, the regulations, any plan or any order or direction of the Commission;

6. requiring and providing for the furnishing of security or proof of financial responsibility or of a performance bond by a distributor or class of distributors or any person engaged in the operation of a plant or any class of plant;
7. providing for the administration, forfeiture and disposition by the Commission or Director of bonds or any money recovered under any such bonds or any money or securities furnished as proof of financial responsibility by a distributor or by an operator of a plant;
8. providing for the submission of drawings and specifications for the construction or alteration of a building intended for use as a plant or for the alteration of a plant;
9. prescribing the methods of construction or alteration of a building intended for use as a plant and the materials that shall be used for such construction or alteration;
10. prescribing the location of plants, the equipment that shall be used in connection with plants and the sanitary requirements for plants;
11. providing for the issue of permits for the construction or alteration of a building intended for use as a plant and for the alteration of a plant, and prescribing the terms and conditions therefor;
12. respecting the health of cows;
13. respecting sanitary conditions of cows, premises on which cows are kept or milked and the equipment used in connection with the producing, handling, storing or transporting of milk or cream, or any class thereof;
14. respecting the premises and equipment used in connection with the producing, handling, storing, testing, or transporting of milk or cream, or any class thereof;
15. prohibiting the delivering, selling or offering for sale to a plant or the receiving at a plant of milk or cream, or any class thereof, that is not produced, handled, stored, collected, delivered, supplied, received or transported in accordance with the regulations or that has been rejected in accordance with the regulations;
16. prescribing conditions for the delivering, supplying, selling or offering for sale to a plant or the receiving at a plant of milk or cream, or any class thereof, that has been graded at or on behalf of another plant in accordance with the regulations;
17. providing for the addition of a food colouring to milk or cream, or any class thereof, that has been delivered or offered for sale to a plant and rejected in accordance with the regulations;
18. governing the collection, transportation, delivery, handling, storing, supplying or receiving of milk or cream, or any class thereof, and prescribing the time therefor;
19. providing for the identification, labelling and use of containers used for transporting milk or cream, or any class thereof;
20. providing for the cleaning and sanitation of vehicles used in transporting, collecting, delivering, supplying or receiving milk or cream, or any class thereof, and prescribing methods therefor;
21. respecting the quality of milk or cream, or any class thereof, delivered, supplied, sold or offered for sale to a plant or received at a plant;
22. providing for,
    (a) the control of the quality of milk by the imposing on and collecting from a producer of penalties where any milk supplied by the producer fails to comply with the standards of quality for such milk prescribed by the regulations or is produced on premises or with equipment that fails to comply with the regulations and, without limiting the generality of the foregoing, where such milk,
        (i) contains any substance prohibited by the regulations,
        (ii) contains a substance in excess of the amount thereof permitted by the regulations, or
        (iii) has a substance removed therefrom contrary to the regulations;

(3) A by-law under this section does not apply to a pit or a quarry, as those terms are defined in the *Aggregate Resources Act*, located in a part of Ontario designated in a regulation under subsection 5 (2) of that Act. 2001, c. 25, s. 124 (3).

Heating and cooking appliances

125. Without limiting sections 9, 10 and 11, a local municipality may regulate,

(a) the use and installation of heating and cooking appliances;

(b) the storage of fuel for use in heating and cooking appliances. 2006, c. 32, Sched. A, s. 66.

Public fairs and events

126. Without limiting sections 9, 10 and 11, a local municipality may,

(a) regulate cultural, recreational and educational events including public fairs;

(b) prohibit the activities described in clause (a) unless a permit is obtained from the municipality for those activities and may impose conditions for obtaining, continuing to hold and renewing the permit, including requiring the submission of plans. 2006, c. 32, Sched. A, s. 66.

Refuse and debris

127. Without limiting sections 9, 10 and 11, a local municipality may,

(a) require the owner or occupant of land to clean and clear the land, not including buildings, or to clear refuse or debris from the land, not including buildings;

(b) regulate when and how matters required under clause (a) shall be done;

(c) prohibit the depositing of refuse or debris on land without the consent of the owner or occupant of the land; and

(d) define "refuse" for the purpose of this section. 2001, c. 25, s. 127; 2006, c. 32, Sched. A, s. 67.

Public nuisances

128. (1) Without limiting sections 9, 10 and 11, a local municipality may prohibit and regulate with respect to public nuisances, including matters that, in the opinion of council, are or could become or cause public nuisances. 2001, c. 25, s. 128 (1); 2006, c. 32, Sched. A, s. 68.

Not subject to review

(2) The opinion of council under this section, if arrived at in good faith, is not subject to review by any court. 2001, c. 25, s. 128 (2).

Noise, odour, dust, etc.

129. Without limiting sections 9, 10 and 11, a local municipality may,

(a) prohibit and regulate with respect to noise, vibration, odour, dust and outdoor illumination, including indoor lighting that can be seen outdoors; and

(b) prohibit the matters described in clause (a) unless a permit is obtained from the municipality for those matters and may impose conditions for obtaining, continuing to hold and renewing the permit, including requiring the submission of plans. 2006, c. 32, Sched. A, s 69.

130. REPEALED: 2006, c. 32, Sched. A, s. 69.

Wrecking, salvaging of motor vehicles

131. Without limiting sections 9, 10 and 11, a local municipality may prohibit and regulate the use of any land for the storage of used motor vehicles for the purpose of wrecking or dismantling them or salvaging parts from them for sale or other disposition. 2006, c. 32, Sched. A, s. 69.

Repairs or alterations

132. (1) A local municipality may authorize the owner or occupant of land to enter adjoining land, at any reasonable time, for the purpose of making repairs or alterations to any building, fence or other structures on the land of the owner or occupant but only to the extent necessary to carry out the repairs or alterations. 2001, c. 25, s. 132 (1).

Conditions

(2) The following apply to a power of entry under a by-law under this section:

1. The power of entry may be exercised by an employee or agent of the owner or occupant of land.
2. A person exercising the power of entry must display or, on request, produce proper identification.
3. Nothing in a by-law under this section authorizes entry into a building.
4. The owner or occupant shall provide reasonable notice of the proposed entry to the occupier of the adjoining land.
5. The owner or occupant of land shall, in so far as is practicable, restore the adjoining land to its original condition and shall provide compensation for any damages caused by the entry or by anything done on the adjoining land. 2001, c. 25, s. 132 (2).

Fortification of land

133. (1) Without limiting sections 9, 10 and 11, a municipality that is responsible for the enforcement of the *Building Code Act, 1992* may,

(a) regulate in respect of the fortification of and protective elements applied to land in relation to the use of the land; and

(b) prohibit the excessive fortification of land or excessive protective elements being applied to land in relation to the use of the land. 2001, c. 25, s. 133 (1); 2006, c. 32, Sched. A, s. 70 (1).

Definitions

(2) In this section,

"land" means land, including buildings, mobile homes, mobile buildings, mobile structures, outbuildings, fences, erections, physical barriers and any other structure on the land or on or in any structure on the land; ("bien-fonds")

"protective elements" include surveillance equipment. ("éléments protecteurs") 2001, c. 25, s. 133 (2).

(3) REPEALED: 2006, c. 32, Sched. A, s. 70 (2).

By-law and building code

(4) A permit shall not be issued under the *Building Code Act, 1992* if the proposed building or construction or use of the building will contravene a by-law to which this section applies. 2001, c. 25, s. 133 (4); 2009, c. 33, Sched. 21, s. 6 (1).

Conflict

(5) Despite section 35 of the *Building Code Act, 1992*, if there is a conflict between the building code under the *Building Code Act, 1992* and a by-law to which this section applies, the building code prevails. 2001, c. 25, s. 133 (5); 2009, c. 33, Sched. 21, s. 6 (2).

Period for compliance for existing fortifications

(6) If a municipality makes an order to do work under subsection 445 (1) with respect to a contravention of the by-law, the order shall give not less than three months to complete the work if the fortifications or protective elements were present on the land on the day the by-law is passed. 2006, c. 32, Sched. A, s. 70 (3).

(7)-(9) REPEALED: 2006, c. 32, Sched. A, s. 70 (3).

Conveyance of prisoners

134. If the attendance of a prisoner in a correctional institution is required at a hearing or proceeding, the municipality that was responsible for delivering the prisoner to the correctional institution is responsible for conveying the prisoner from the correctional institution to the place of the hearing or proceeding and for the prisoner's return. 2001, c. 25, s. 134.

NATURAL ENVIRONMENT

Tree by-laws

135. (1) Subject to subsection (4) and without limiting sections 9, 10 and 11, a local municipality may prohibit or regulate the destruction or injuring of trees. 2006, c. 32, Sched. A, s. 71 (1).

Woodlands

(2) Without limiting sections 9, 10 and 11, an upper-tier municipality may prohibit or regulate the destruction or injuring of trees in woodlands designated in the by-law. 2006, c. 32, Sched. A, s. 71 (1).

Definition

(3) In this section,

"woodlands" means woodlands as defined in the *Forestry Act* that are one hectare or more in area. 2001, c. 25, s. 135 (3).

Restriction

(4) If an upper-tier municipality by-law in respect of woodlands is in effect in a lower-tier municipality, the lower-tier municipality may not prohibit or regulate the destruction of trees in any woodlands designated in the upper-tier by-law and any lower-tier by-law, whether passed before or after the upper-tier by-law comes into force, is inoperative to the extent that it applies to trees in the designated woodlands. 2001, c. 25, s. 135 (4).

Factor to be considered

(5) In passing a by-law regulating or prohibiting the injuring or destruction of trees in woodlands, a municipality shall have regard to good forestry practices as defined in the *Forestry Act*. 2001, c. 25, s. 135 (5); 2002, c. 17, Sched. A, s. 27 (1).

Notice

(6) An upper-tier municipality shall immediately notify its lower-tier municipalities of the passing of a by-law under subsection (2). 2001, c. 25, s. 135 (6).

Conditions

(7) Without limiting sections 9, 10 and 11, a municipality may, in a by-law passed under this section,

(a) require that a permit be obtained to injure or destroy trees; and

(b) impose conditions to a permit, including conditions relating to the manner in which destruction occurs and the qualifications of persons authorized to injure or destroy trees. 2001, c. 25, s. 135 (7); 2006, c. 32, Sched. A, s. 71 (2).

Delegation to lower-tier municipality

(8) An upper-tier municipality may delegate all or part of its power to pass a by-law respecting the destruction or injuring of trees in woodlands to one or more of its lower-tier municipalities with the agreement of the lower-tier municipality or municipalities, as the case may be. 2001, c. 25, s. 135 (8).

Effect of delegation

(9) Subsection (4) does not apply to that part of a lower-tier by-law authorized by the delegation of power from the upper-tier municipality. 2001, c. 25, s. 135 (9).

Delegation to upper-tier municipality

(10) A lower-tier municipality may delegate all or part of its power to pass a by-law respecting the destruction or injuring of trees to its upper-tier municipality with the agreement of the upper-tier municipality. 2001, c. 25, s. 135 (10).

(11) REPEALED: 2006, c. 32, Sched. A, s. 71 (3).

Exemption from by-law

(12) A by-law passed under this section does not apply to,

(a) activities or matters undertaken by a municipality or a local board of a municipality;

(b) activities or matters undertaken under a licence issued under the *Crown Forest Sustainability Act, 1994*;

(c) the injuring or destruction of trees by a person licensed under the *Surveyors Act* to engage in the practice of cadastral surveying or his or her agent, while making a survey;

20. When the Niagara Escarpment Plan is in effect, the Minister may, out of the money appropriated therefor by the Legislature, provide financial assistance to any person, organization or corporation, including a municipal corporation, undertaking any policy or program that implements the Plan. R.S.O. 1990, c. N.2, s. 20; 2009, c. 12, Sched. L, ss. 7, 16.

Transfer of Commission functions

21. (1) Where, in the opinion of the Lieutenant Governor in Council, the Niagara Escarpment Plan has been substantially completed for any part of the Niagara Escarpment Planning Area, the Lieutenant Governor in Council may by order and subject to such terms and conditions as the Lieutenant Governor in Council considers appropriate, transfer any of the functions of the Commission to the council of an upper-tier municipality or of a single-tier municipality outside of an upper-tier municipality. R.S.O. 1990, c. N.2, s. 21 (1); 2000, c. 5, s. 16 (2); 2002, c. 17, Sched. F, Table; 2009, c. 12, Sched. L, s. 7.

Limitation

(2) No order shall be made under subsection (1) except upon application made to the Lieutenant Governor in Council by the council of the municipality, and every such application shall include a statement of the administrative procedures intended to be followed in the exercise of such functions. R.S.O. 1990, c. N.2, s. 21 (2); 2000, c. 5, s. 16 (3).

Regulations

22. The Minister may make regulations designating any area or areas of land within the Niagara Escarpment Planning Area as an area of development control. R.S.O. 1990, c. N.2, s. 22.

Regulations

23. The Minister may make regulations,

(a) providing that where an area of development control is designated, such zoning by-laws and such orders made under section 47 of the *Planning Act*, or any part thereof, as are designated in the regulation, cease to have effect in the area or in any defined part thereof, provided that where land is removed from an area of development control such land is thereupon subject again to the aforementioned by-laws or orders or parts thereof, as the case may be, unless in the meantime such by-laws or orders or parts thereof have been repealed or revoked;

(b) providing for the issuance of development permits and prescribing terms and conditions of permits;

(c) providing for the exemption of any class or classes of development within any development area from the requirement of obtaining a development permit;

(d) prescribing the form of application for a development permit;

(e) defining urban uses. R.S.O. 1990, c. N.2, s. 23; 2005, c. 1, s. 25 (4).

Regulations by L.G. in C.

23.1 Despite any other Act, the Lieutenant Governor in Council may, in respect of the area covered by the Niagara Escarpment Plan, make regulations to vary, supplement or override any provision in this Act or the Niagara Escarpment Plan in order to facilitate the effective operation of the Greenbelt Plan established under section 3 of the *Greenbelt Act, 2005*. 2005, c. 1, s. 25 (5); 2009, c. 12, Sched. L, ss. 7, 16.

Development permits

24. (1) Despite any other general or special Act, if an area of development control is established by regulation made under section 22, no person shall undertake any development in the area unless such development is exempt under the regulations or unless the development complies with a development permit issued under this Act. 1999, c. 12, Sched. N, s. 4 (9).

Terms and conditions

(2) The Minister may issue development permits and may include such terms and conditions as he or she considers advisable. 1999, c. 12, Sched. N, s. 4 (9).

Agreements

(2.1) The Minister may, as a condition of issuing a development permit, enter into an agreement with an owner of land, the agreement may be registered against the land and the Minister is entitled to enforce the provisions of the agreement against the owner and, subject to the *Registry Act* and the *Land Titles Act*, against any subsequent owners of the land. 2000, c. 26, Sched. L, s. 7 (10).

Other permits

(3) No building permit, work order, certificate or licence that relates to development shall be issued, and no approval, consent, permission or other decision that is authorized or required by an Act and that relates to development shall be made, in respect of any land, building or structure within an area of development control, unless the development is exempt under the regulations or,

(a) a development permit relating to the land, building or structure has been issued under this Act; and

(b) the building permit, work order, certificate, licence, approval, consent, permission or decision is consistent with the development permit. 1999, c. 12, Sched. N, s. 4 (9).

Offence

(4) Every person who contravenes subsection (1) is guilty of an offence and on conviction is liable,

(a) on a first conviction to a fine of not more than $25,000; and

(b) on a subsequent conviction to a fine of not more than $10,000 for each day or part thereof upon which the contravention has continued after the day on which the person was first convicted. R.S.O. 1990, c. N.2, s. 24 (4).

Corporation

(5) Despite subsection (4), if a corporation is convicted under subsection (1), the maximum penalty that may be imposed is,

(a) on a first conviction a fine of not more than $50,000; and

(b) on a subsequent conviction a fine of not more than $25,000 for each day or part thereof upon which the contravention has continued after the day on which the corporation was first convicted. R.S.O. 1990, c. N.2, s. 24 (5).

Order to demolish, etc.

(6) Where any person undertakes any development that is in contravention of subsection (1), the Minister may order such person to demolish any building or structure erected in connection with the development or to restore the site to the condition it was in prior to the undertaking of the development, or both, within such time as the order specifies. R.S.O. 1990, c. N.2, s. 24 (6).

Order to stop work, etc.

(6.1) If a person undertakes any development that is in contravention of subsection (1) and the Minister has reasonable grounds to believe that the contravention is causing or is likely to cause a risk to public safety or significant environmental damage, the Minister may order the person to,

(a) stop work on the development;

(b) take such steps as the Minister considers necessary to protect public safety or prevent environmental damage, within such time as the order specifies. 2000, c. 26, Sched. L, s. 7 (11).

Cost of work

(7) Where a person to whom an order is directed under subsection (6) or (6.1) fails to comply with the order within the time specified in it, the Minister may cause the necessary work to be done and charge such person with the cost thereof, which cost may be recovered with costs, as a debt due to Her Majesty, in any court of competent jurisdiction. R.S.O. 1990, c. N.2, s. 24 (7); 2000, c. 26, Sched. L, s. 7 (12).

Offence

(7.1) Every person who contravenes an order made under subsection (6) or (6.1) is guilty of an offence and on conviction is liable,

(a) on a first conviction, to a fine of not more than $10,000 for each day or part of a day on which the contravention continued; and

(b) on a subsequent conviction, to a fine of not more than $25,000 for each day or part of a day on which the contravention continued. 2000, c. 26, Sched. L, s. 7 (13).

Penalty for corporation

(7.2) Despite subsection (7.1), if a corporation is convicted of an offence under subsection (7.1), the maximum penalty that may be imposed is,

(a) on a first conviction, a fine of not more than $25,000 for each day or part of a day on which the contravention continued; and

(b) on a subsequent conviction, a fine of not more than $50,000 for each day or part of a day on which the contravention continued. 2000, c. 26, Sched. L, s. 7 (13).

Delegation of authority

(8) Subject to subsection (9), where the Minister has delegated his or her authority under section 25, the delegate has, in lieu of the Minister, all the powers and rights of the Minister under this section. 2000, c. 26, Sched. L, s. 7 (14).

Same

(9) Subsection (8) does not apply to the powers and rights of the Minister under subsection (6.1) unless the delegate is the Commission or the director of the Commission. 2000, c. 26, Sched. L, s. 7 (14).

Delegation

25. (1) Subject to subsection (2), the Minister may in writing, and subject to such conditions as he or she considers appropriate, delegate authority to issue development permits to,

(a) the Commission;

(b) an officer or employee of the Commission who is designated by the Commission;

(c) an upper-tier municipality having jurisdiction in the Niagara Escarpment Planning Area or any part thereof; or

(d) a single-tier municipality outside an upper-tier municipality having jurisdiction in the Niagara Escarpment Planning Area or any part thereof. 1999, c. 12, Sched. N, s. 4 (11); 2002, c. 17, Sched. F, Table.

Limitation on delegation

(2) No delegation shall be made under subsection (1) to a municipality, except where the municipality on application therefor has been designated by order of the Minister as a municipality to which may be delegated the authority to issue development permits under subsection (1), and every such application shall include a statement of the organizational structure to be established and the administrative procedures intended to be followed. 2002, c. 17, Sched. F, Table.

Withdrawal of delegation

(3) The Minister may in writing withdraw any delegation made under subsection (1) where, in his or her opinion, it is in the public interest to do so. R.S.O. 1990, c. N.2, s. 25 (3).

Delegate's power of decision

(4) Where the Minister has delegated his or her authority under subsection (1), the delegate, on receiving an application for a development permit and, after giving consideration to the merits of the application, may make a decision in accordance with the Niagara Escarpment Plan to issue the development permit or to refuse to issue the permit or to issue the permit subject to such terms and conditions as the delegate considers desirable. 1999, c. 12, Sched. N, s. 4 (12); 2000, c. 26, Sched. L, s. 7 (15); 2009, c. 12, Sched. L, s. 7.

Notice of decision

(5) The delegate to whom the Minister has delegated his or her authority under subsection (1) shall give notice of decision on any application for a development permit as follows:

1. By regular or registered mail or personal service to the Minister, to the applicant for the permit, to persons who have requested to receive notice of the decision, to persons whom the delegate

(2) The exemption described in subsection (1) does not apply to a storage site or facility used for the storage of NASM if,

(a) the NASM is intended for use on a different farm unit; or

(b) the storage site or facility is subject to an environmental compliance approval issued in respect of an activity mentioned in subsection 27 (1) of the *Environmental Protection Act*. O. Reg. 338/09, s. 9; O. Reg. 266/11, s. 4.

PART II
NUTRIENT MANAGEMENT STRATEGIES, PLANS AND NASM PLANS: GENERAL

NUTRIENT MANAGEMENT STRATEGIES

Application of strategies

9. (1) A nutrient management strategy applies to an agricultural operation carried out on a farm unit. O. Reg. 338/09, s. 11.

(2) A separate nutrient management strategy is required for each farm unit on which an agricultural operation to which a nutrient management strategy applies is carried out. O. Reg. 338/09, s. 11.

Compliance with strategy

10. (1) A person who owns or controls an agricultural operation to which this section applies shall ensure that prescribed materials generated on a farm unit in the course of the operation are managed in accordance with a nutrient management strategy that is in force with respect to the operation and the farm unit. O. Reg. 338/09, s. 12.

(2) No person shall manage prescribed materials that are generated on a farm unit in the course of an agricultural operation to which this section applies except in accordance with a nutrient management strategy that is in force with respect to the operation and the farm unit. O. Reg. 338/09, s. 12.

(3) This section does not apply to an agricultural fair at which farm animals are present for 25 days or less if all of the manure generated at the fair is disposed of under a broker agreement. O. Reg. 267/03, s. 10 (3).

Phasing-in, agricultural operations

11. (1) Section 10 applies to an agricultural operation that generates agricultural source materials if the person who owns or controls the land, on which the operation is carried out and that the current owner acquired under a single transfer as defined in the *Land Registration Reform Act*, has not carried out the operation on the land at any time before September 30, 2003 and submits an application, on or after that date and before December 31, 2005, for a building permit under the *Building Code Act, 1992* with respect to any building or structure that is used to house farm animals and that is located or to be located on the land. O. Reg. 267/03, s. 11 (1); O. Reg. 511/05, s. 4 (1).

(2) REVOKED: O. Reg. 511/05, s. 4 (2).

(3) Section 10 applies to an agricultural operation that generates agricultural source materials if the number of farm animals on a farm unit on which the operation is carried out is sufficient, at any time on or after July 1, 2005, to generate 300 or more nutrient units annually. O. Reg. 511/05, s. 4 (3).

(4) Section 10 applies to an agricultural operation that generates agricultural source materials if, at any time on or after December 31, 2005, a person who owns or controls the land on which the operation is carried out,

(a) submits an application for a building permit under the *Building Code Act, 1992* in respect of any building or structure that is used to house farm animals or to store manure and that is located or to be located on the land;

(b) constructs or causes to be constructed any building or structure that is used to house farm animals or to store manure and that is located or to be located on the land, if a building permit in respect of the building or structure would be required under the *Building Code Act, 1992*, but for the application of clause 1.3.1.1. (1) (b) of Division C of the Building Code made under that Act; or

(c) constructs or causes to be constructed a permanent nutrient storage facility made of earth on the land. O. Reg. 511/05, s. 4 (3); O. Reg. 338/09, s. 13.

(4.1) Section 10 applies to an agricultural operation carried out on a farm unit that receives off-farm anaerobic digestion materials for treatment through mixed anaerobic digestion in a regulated mixed anaerobic digestion facility. O. Reg. 394/07, s. 3 (1).

(5) Section 10 applies to an agricultural operation that generates agricultural source materials at the earliest time that subsections (1), (3), (4) and (4.1) determine that the section is to apply and continues to apply to the operation during each year in which the operation generates agricultural source materials. O. Reg. 511/05, s. 4 (3); O. Reg. 394/07, s. 3 (2).

Construction of buildings or structures

11.1 (1) If this Regulation requires a person who owns or controls an agricultural operation to have a nutrient management strategy for carrying out the operation, no person shall construct a building or structure on a farm unit on which the operation is carried out, where the building or structure is used to house farm animals or store nutrients, unless,

(a) the nutrient management strategy applicable to the operation carried out on the farm unit contemplates the construction of the building or structure; and

(b) the nutrient management strategy has been approved in accordance with this Regulation. O. Reg. 394/07, s. 4.

(2) No person shall construct a regulated mixed anaerobic digestion facility on a farm unit on which an agricultural operation is carried out unless the nutrient management strategy applicable to the operation carried out on the farm unit contemplates the construction of the facility and has been approved in accordance with this Regulation. O. Reg. 394/07, s. 4.

12. REVOKED: O. Reg. 338/09, s. 14 (2).

NUTRIENT MANAGEMENT PLANS

Application of plans

13. (1) A nutrient management plan applies to an agricultural operation carried out on a farm unit. O. Reg. 267/03, s. 13 (1).

(2) A separate nutrient management plan is required for each farm unit on which an agricultural operation to which a nutrient management plan applies is carried out. O. Reg. 267/03, s. 13 (2).

Compliance with plan

14. (1) A person who owns or controls an agricultural operation to which this section applies shall ensure that any nutrients that are applied to the land of a farm unit in the course of the operation are managed in accordance with a nutrient management plan that is in force with respect to the operation and the farm unit. O. Reg. 338/09, s. 15.

(2) No person shall manage nutrients that are stored on or applied to the land of a farm unit in the course of an agricultural operation to which this section applies except in accordance with a nutrient management plan that is in force with respect to the operation and the farm unit. O. Reg. 338/09, s. 15.

Phasing-in

15. (1) Subject to subsection (2), section 14 applies to an agricultural operation that is carried out on a farm unit as soon as the person who owns or controls it is required to have a nutrient management strategy for carrying out the operation on the farm unit. O. Reg. 267/03, s. 15; O. Reg. 511/05, s. 5 (1).

(2) Subject to subsection (3), if on the day subsection (1) requires the person who owns or controls an agricultural operation in the course of which nutrients are applied to the land of a farm unit to ensure that the nutrients are managed in accordance with a nutrient management plan, the number of farm animals on the farm unit is not sufficient to generate 300 or more nutrient units annually, section 14 does not apply to the operation until the day on which the number of farm animals on the farm unit is increased to a level that is sufficient to generate 300 or more nutrient units annually. O. Reg. 338/09, s. 16 (2).

(3) Subsection (2) does not apply to an agricultural operation that generates agricultural source materials if any portion of the land of the farm unit used for the operation lies within 100 metres of a municipal well. O. Reg. 511/05, s. 5 (2).

(4), (5) REVOKED: O. Reg. 266/11, s. 5.

NASM PLANS

Application of NASM plans

15.1 (1) A NASM plan applies to an agricultural operation carried out on a NASM plan area if Category 2 or Category 3 NASM is,

(a) applied to a NASM application area that is part of the NASM plan area; or

(b) stored in an associated NASM storage facility. O. Reg. 338/09, s. 17.

(2) A separate NASM plan is required for each NASM plan area within which Category 2 or Category 3 NASM is applied to land or stored. O. Reg. 338/09, s. 17.

Compliance with NASM plan

15.2 (1) A person who owns or controls an agricultural operation to which this section applies shall ensure that any Category 2 or Category 3 NASM that is applied to the land of a NASM application area in the course of the operation is managed in accordance with a NASM plan that is in force with respect to the operation and the NASM plan area. O. Reg. 338/09, s. 17.

(2) No person shall manage nutrients that are stored on or applied to the land of a NASM plan area in the course of an agricultural operation to which this section applies except in accordance with a NASM plan that is in force with respect to the operation and the NASM plan area. O. Reg. 338/09, s. 17.

Phasing-in

15.3 (1) Subject to subsections (2), (3) and (4), section 15.2 applies to an agricultural operation in the course of which Category 2 or Category 3 NASM is stored on or applied to the land of a NASM plan area on and after January 1, 2011. O. Reg. 338/09, s. 17.

(2) If, on January 1, 2011, a certificate of approval or provisional certificate of approval under Part V of the *Environmental Protection Act* authorizing the application of the NASM to the land has been issued, has not been suspended or revoked and has not expired, ceased to be in force or otherwise ceased to authorize the application of the NASM to the land, section 15.2 does not apply to the agricultural operation until the earlier of the following:

1. The day the certificate is suspended or revoked or expires, ceases to be in force or otherwise ceases to authorize the application of the NASM to the land.
2. January 1, 2016. O. Reg. 338/09, s. 17.

(3) If, on January 1, 2011, a nutrient management plan that provides for the application of the NASM to the land has been approved under section 28 and the approval has not been suspended or revoked and has not ceased to be in force, section 15.2 does not apply to the agricultural operation until the day on which,

(a) the nutrient management plan is suspended or revoked or ceases to be in force;

(b) the person who owns or controls the agricultural operation,

(i) applies NASM to a part of the land of the farm unit that is not identified in the plan as land to which NASM will be applied,

(ii) applies NASM, other than the specific NASM provided for in the plan, to the land of the farm unit, or

(iii) stores NASM on the land of the farm unit in a NASM storage facility that is not identified as such in the plan; or

(c) there is a change of ownership or control of the agricultural operation. O. Reg. 338/09, s. 17.

(4) After December 31 of the last year set out in a NASM plan, section 15.2 does not apply to the agricultural operation carried out on the NASM plan area unless Category 2 or Category 3 NASM is stored on or applied to the land of the NASM plan area on or after January 1 of the next year. O. Reg. 338/09, s. 17.

PART III
NUTRIENT MANAGEMENT STRATEGIES, PLANS AND NASM PLANS: PREPARATION

PRECONDITION

Requirement for other agreements

16. (1) A person who is required to have a nutrient management strategy, plan or NASM plan that mentions a transfer agreement that a person is required to enter into under subsection 20 (1) or an agreement that a broker is required to enter into under subsection 36 (1) or 37 (1) shall,

(a) enter into those agreements that are applicable to the person or the person's agricultural operation; and

(b) ensure that the agreements mentioned in clause (a) are in force at the time the strategy, plan or NASM plan comes into force. O. Reg. 338/09, s. 19.

(7) The heritage standards and guidelines approved under this section are not regulations within the meaning of Part III (Regulations) of the *Legislation Act, 2006*. 2005, c. 6, s. 13; 2006, c. 21, Sched. F, s. 136 (1).

Application

25.3 Section 37 applies with necessary modifications to property to which this Part applies. 2005, c. 6, s. 13.

PART IV
CONSERVATION OF PROPERTY OF CULTURAL HERITAGE VALUE OR INTEREST

Definitions and Application

Definition

26. (1) In this Part,

"property" means real property and includes all buildings and structures thereon. 2005, c. 6, s. 14.

Same

(2) In sections 27 to 34.4,

"designated property" means property designated by a municipality under section 29. 2005, c. 6, s. 14.

Publication of notice, City of Toronto

(3) Where the City of Toronto is required by this Part to publish a notice in a newspaper having general circulation in the municipality, notice given in accordance with a policy adopted by the City under section 212 of the *City of Toronto Act, 2006* is deemed to satisfy the requirement of this Part to publish notice in a newspaper. 2006, c. 11, Sched. B, s. 11 (1).

Publication of notice

(4) Where a municipality is required by this Part to publish a notice in a newspaper having general circulation in the municipality, notice given in accordance with a policy adopted by the municipality under section 270 of the *Municipal Act, 2001* is deemed to satisfy the requirement of this Part to publish notice in a newspaper. 2006, c. 32, Sched. D, s. 13 (1).

Application

26.1 (1) This Part does not apply to property described in clause 25.2 (2) (a). 2005, c. 6, s. 14.

Conflict

(2) If a property described in clause 25.2 (2) (b) is designated under section 29 or under section 34.5, and if there is a conflict between a provision of the heritage standards and guidelines prepared under Part III.1 and a provision in Part IV as they apply to that property, the provision in Part IV prevails. 2005, c. 6, s. 14.

Exception

(3) Nothing in subsection (1) shall prevent a municipality acting under subsection 27 (1.2) from including in the register referred to in that subsection a reference to property described in clause 25.2 (2) (a). 2005, c. 6, s. 14.

Register and Municipal Heritage Committee

Register

27. (1) The clerk of a municipality shall keep a register of property situated in the municipality that is of cultural heritage value or interest. 2005, c. 6, s. 15.

Contents of register

(1.1) The register kept by the clerk shall list all property situated in the municipality that has been designated by the municipality or by the Minister under this Part and shall contain, with respect to each property,

(a) a legal description of the property;

(b) the name and address of the owner; and

(c) a statement explaining the cultural heritage value or interest of the property and a description of the heritage attributes of the property. 2005, c. 6, s. 15.

Same

(1.2) In addition to the property listed in the register under subsection (1.1), the register may include property that has not been designated under this Part but that the council of the municipality believes to be of cultural heritage value or interest and shall contain, with respect to such property, a description of the property that is sufficient to readily ascertain the property. 2005, c. 6, s. 15.

Consultation

(1.3) Where the council of a municipality has appointed a municipal heritage committee, the council shall, before including a property that has not been designated under this Part in the register under subsection (1.2) or removing the reference to such a property from the register, consult with its municipal heritage committee. 2005, c. 6, s. 15.

Extracts

(2) The clerk of a municipality shall issue extracts from the Register referred to in subsection (1) to any person on payment of the fee set by the municipality by by-law. R.S.O. 1990, c. O.18, s. 27 (2); 2002, c. 18, Sched. F, s. 2 (6).

Restriction on demolition, etc.

(3) If property included in the register under subsection (1.2) has not been designated under section 29, the owner of the property shall not demolish or remove a building or structure on the property or permit the demolition or removal of the building or structure unless the owner gives the council of the municipality at least 60 days notice in writing of the owner's intention to demolish or remove the building or structure or to permit the demolition or removal of the building or structure. 2006, c. 11, Sched. B, s. 11 (2).

Same

(4) Subsection (3) applies only if the property is included in the register under subsection (1.2) before any application is made for a permit under the *Building Code Act, 1992* to demolish or remove a building or structure located on the property. 2006, c. 11, Sched. B, s. 11 (2).

Same

(5) The notice required by subsection (3) shall be accompanied by such plans and shall set out such information as the council may require. 2006, c. 11, Sched. B, s. 11 (2).

Municipal heritage committee

28. (1) The council of a municipality may by by-law establish a municipal heritage committee to advise and assist the council on matters relating to this Part, matters relating to Part V and such other heritage matters as the council may specify by by-law. 2002, c. 18, Sched. F, s. 2 (7).

Members

(2) The committee shall be composed of not fewer than five members appointed by the council. 2002, c. 18, Sched. F, s. 2 (7).

Continuation of old committees

(3) Every local architectural conservation advisory committee established by the council of a municipality before the day subsection 2 (7) of Schedule F to the *Government Efficiency Act, 2002* comes into force is continued as the municipal heritage committee of the municipality, and the persons who were the members of the local architectural conservation advisory committee immediately before that day become the members of the municipal heritage committee. 2002, c. 18, Sched. F, s. 2 (7).

DESIGNATION OF PROPERTIES BY MUNICIPALITIES

Designation by municipal by-law

29. (1) The council of a municipality may, by by-law, designate a property within the municipality to be of cultural heritage value or interest if,

(a) where criteria for determining whether property is of cultural heritage value or interest have been prescribed by regulation, the property meets the prescribed criteria; and

(b) the designation is made in accordance with the process set out in this section. 2005, c. 6, s. 17 (1).

Notice required

(1.1) Subject to subsection (2), if the council of a municipality intends to designate a property within the municipality to be of cultural heritage value or interest, it shall cause notice of intention to designate the property to be given by the clerk of the municipality in accordance with subsection (3). 2005, c. 6, s. 17 (1).

Consultation

(2) Where the council of a municipality has appointed a municipal heritage committee, the council shall, before giving notice of its intention to designate a property under subsection (1), consult with its municipal heritage committee. R.S.O. 1990, c. O.18, s. 29 (2); 2002, c. 18, Sched. F, s. 2 (9).

Notice of intention

(3) Notice of intention to designate under subsection (1) shall be,

(a) served on the owner of the property and on the Trust; and

(b) published in a newspaper having general circulation in the municipality. R.S.O. 1990, c. O.18, s. 29 (3); 2005. c. 6. s. 1.

Contents of notice

(4) Notice of intention to designate property that is served on the owner of property and on the Trust under clause (3) (a) shall contain,

(a) an adequate description of the property so that it may be readily ascertained;

(b) a statement explaining the cultural heritage value or interest of the property and a description of the heritage attributes of the property; and

(c) a statement that notice of objection to the designation may be served on the clerk within 30 days after the date of publication of the notice of intention in a newspaper of general circulation in the municipality under clause (3) (b). 2005, c. 6, s. 17 (2).

Same

(4.1) Notice of intention to designate property that is published in a newspaper of general circulation in a municipality under clause (3) (b) shall contain,

(a) an adequate description of the property so that it may be readily ascertained;

(b) a statement explaining the cultural heritage value or interest of the property;

(c) a statement that further information respecting the proposed designation is available from the municipality; and

(d) a statement that notice of objection to the designation may be served on the clerk within 30 days after the date of publication of the notice of intention in a newspaper of general circulation in the municipality under clause (3) (b). 2005, c. 6, s. 17 (2).

Objection

(5) A person who objects to a proposed designation shall, within thirty days after the date of publication of the notice of intention, serve on the clerk of the municipality a notice of objection setting out the reason for the objection and all relevant facts. R.S.O. 1990, c. O.18, s. 29 (5); 1996, c. 4, s. 55 (2); 2009, c. 33, Sched. 11, s. 6 (4).

If no notice of objection

(6) If no notice of objection is served within the 30-day period under subsection (5), the council,

(a) shall,

(i) pass a by-law designating the property,

(ii) cause a copy of the by-law, together with a statement explaining the cultural heritage value or interest of the property and a description of the heritage attributes of the property,

(A) to be served on the owner of the property and on the Trust, and

(B) to be registered against the property affected in the proper land registry office, and

(iii) publish notice of the by-law in a newspaper having general circulation in the municipality; or

(b) shall withdraw the notice of intention to designate the property by causing a notice of withdrawal,

(i) to be served on the owner of the property and on the Trust, and

(ii) to be published in a newspaper having general circulation in the municipality. 2002, c. 18, Sched. F, s. 2 (11); 2005, c. 6, ss. 1, 17 (3).

Referral to Review Board

(7) Where a notice of objection has been served under subsection (5), the council shall, upon expiration of the thirty-day period under subsection (4), refer the matter to the Review Board for a hearing and report. R.S.O. 1990, c. O.18, s. 29 (7).

Hearing

(8) Pursuant to a reference by the council under subsection (7), the Review Board, as soon as is practicable, shall hold a hearing open to the public to determine whether the property in question should be designated, and the council, the owner, any person who has filed an objection under subsection (5) and such other persons as the Review Board may specify, are parties to the hearing. R.S.O. 1990, c. O.18, s. 29 (8).

Place of hearing

(9) A hearing under subsection (8) shall be held at such place in the municipality as the Review Board may determine, and notice of such hearing shall be published in a newspaper having general circulation in the municipality at least ten days prior to the date of such hearing. R.S.O. 1990, c. O.18, s. 29 (9).

Review Board may combine hearings

(10) The Review Board may combine two or more related hearings and conduct them in all respects and for all purposes as one hearing. R.S.O. 1990, c. O.18, s. 29 (10).

(11) REPEALED: 2005, c. 6, s. 17 (4).

Report

(12) Within thirty days after the conclusion of a hearing under subsection (8), the Review Board shall make a report to the council setting out its findings of fact, its recommendations as to whether or not the property should be designated under this Part and any information or knowledge used by it in reaching its recommendations, and the Review Board shall send a copy of its report to the other parties to the hearing. R.S.O. 1990, c. O.18, s. 29 (12).

Failure to report

(13) Where the Review Board fails to make a report within the time limited by subsection (12), such failure does not invalidate the procedure. R.S.O. 1990, c. O.18, s. 29 (13).

Decision of council

(14) After considering the report under subsection (12), the council, without a further hearing,

(a) shall,

(i) pass a by-law designating the property,

(ii) cause a copy of the by-law, together with a statement explaining the cultural heritage value or interest of the property and a description of the heritage attributes of the property,

(A) to be served on the owner of the property and on the Trust, and

(B) to be registered against the property affected in the proper land registry office, and

(iii) publish notice of the by-law in a newspaper having general circulation in the municipality; or

(b) shall withdraw the notice of intention to designate the property by causing a notice of withdrawal,

(i) to be served on the owner of the property and on the Trust, and

(ii) to be published in a newspaper having general circulation in the municipality. 2002, c. 18, Sched. F, s. 2 (12); 2005, c. 6, ss. 1, 17 (5).

Decision final

(14.1) The decision of the council under subsection (14) is final. 2002, c. 18, Sched. F, s. 2 (12).

Withdrawal of objection

(15) A person who has served a notice of objection under subsection (5) may withdraw the objection at any time before the conclusion of a hearing into the matter by serving a notice of withdrawal on the clerk of the municipality and on the Review Board. 2009, c. 33, Sched. 11, s. 6 (5).

No hearing

(15.1) If the Review Board has received notices of withdrawal for all the notices of objection that were served under subsection (5), the Review Board shall not hold a hearing into the matter or, if a hearing into the matter is in progress, shall discontinue the hearing and the council shall act in accordance with subsection (6) as if no notice of objection had been served. 2009, c. 33, Sched. 11, s. 6 (5).

Transition

(16) If, on the day subsection 2 (8) of Schedule F to the *Government Efficiency Act, 2002* comes into force, the clerk of a municipality has given a notice of intention to designate a property as a property of historic or architectural value or interest but the council has not yet passed a by-law so designating the property and has not withdrawn its notice of intention,

(a) this section does not apply to the notice of intention;

(b) despite its amendment by section 2 of Schedule F to the *Government Efficiency Act, 2002*, this section, as it read immediately before its amendment, continues to apply to the notice of intention. 2002, c. 18, Sched. F, s. 2 (13).

Same

(17) If, on or before the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, the clerk of a municipality had given a notice of intention to designate a property that complied with subsection (4) as it read immediately before that day but, as of that day, the council had not yet passed a by-law designating the property under this section and had not withdrawn the notice,

(a) the notice continues to have been validly given; and

(b) the requirements of subsection (4) or (4.1), as enacted on that day by subsection 17 (2) of the *Ontario Heritage Amendment Act, 2005*, do not apply to the notice of intention. 2005, c. 6, s. 17 (6).

Effect of notice of designation
Permits void

30. (1) If a notice of intention to designate a property as property of cultural heritage value or interest is given under section 29, any permit that allowed for the alteration or demolition of the property and that was issued by the municipality under any Act, including a building permit, before the day the notice was served on the owner of the property and on the Trust and published in a newspaper is void as of the day the notice of intention is given in accordance with subsection 29 (3). 2005, c. 6, s. 18.

Interim control of alteration, demolition or removal

(2) Sections 33 and 34 apply with necessary modifications to property as of the day notice of intention to designate the property is given under subsection 29 (3) as though the designation process were complete and the property had been designated under section 29. 2005, c. 6, s. 18.

Amendment of designating by-law

30.1 (1) The council of a municipality may, by by-law, amend a by-law designating property made under section 29 and section 29 applies with necessary modifications to an amending by-law as though it were a by-law to designate property under that section. 2005, c. 6, s. 19.

Exception

(2) Despite subsection (1), subsections 29 (1) to (6) do not apply to an amending by-law if the purpose of the amendment is,

(a) to clarify or correct the statement explaining the property's cultural heritage value or interest or the description of the property's heritage attributes;

(b) to correct the legal description of the property; or

(c) to otherwise revise the language of the by-law to make it consistent with the requirements of this Act or the regulations. 2005, c. 6, s. 19.

Same

(3) If the council of a municipality proposes to make an amendment described in subsection (2), the council shall give the owner of the designated property written notice of the proposed amendment in accordance with subsection (4). 2005, c. 6, s. 19.

Content of notice

(4) A notice of a proposed amendment shall,

(a) contain an explanation of the purpose and effect of the proposed amendment; and

(b) inform the owner of the right to object to the proposed amendment by filing a notice of objection with the clerk of the municipality within 30 days of receiving the notice. 2005, c. 6, s. 19.

Consultation with committee

(5) The council of a municipality shall consult with its municipal heritage committee, if one has been established, before giving notice of a proposed amendment to the owner of property under subsection (3). 2005, c. 6, s. 19.

Objection

(6) The owner of a property who receives notice of a proposed amendment from a municipality under subsection (3) may, within 30 days of receiving notice of the amendment, file a notice of objection to the amendment with the clerk of the municipality setting out the reasons for the objection and all relevant facts. 2005, c. 6, s. 19.

Where no objection

(7) If no notice of objection is filed within the 30-day period under subsection (6), the council of the municipality may pass the proposed amending by-law described in subsection (2). 2005, c. 6, s. 19.

Application of s. 29

(8) If the owner of the property files a notice of objection under subsection (6) in relation to a proposed amendment described in subsection (2), subsections 29 (7) to (15.1) apply with necessary modifications to the notice of objection. 2005, c. 6, s. 19; 2009, c. 33, Sched. 11, s. 6 (6).

Notice of amendment

(9) The clerk of a municipality shall provide a copy of the by-law, as amended under this section, to the owner of the property and to the Trust and shall register the by-law against the property in the proper land registry office. 2005, c. 6, s. 19.

Requirement to update old by-laws

(10) If the council of a municipality proposes to amend a by-law designating property made under section 29 before the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, the council shall include in the amendment such changes as are necessary to ensure that the by-law satisfies the requirements of section 29, as it read on the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent. 2005, c. 6, s. 19.

Repeal of designating by-law, council's initiative

31. (1) Subject to subsection (2), where the council of a municipality intends to repeal a by-law or part thereof designating property, it shall cause notice of intention to repeal the by-law or part thereof to be given by the clerk of the municipality in accordance with subsection (3). R.S.O. 1990, c. O.18, s. 31 (1).

Consultation

(2) Where the council of a municipality has appointed a municipal heritage committee, the council shall, before repealing a by-law or part thereof designating property, consult with its municipal heritage committee. R.S.O. 1990, c. O.18, s. 31 (2); 2002, c. 18, Sched. F, s. 2 (14).

Notice of intention

(3) Notice of intention to repeal a by-law or part thereof under subsection (1) shall be,

(a) served on the owner of the property and on the Trust; and

(b) published in a newspaper having general circulation in the municipality. R.S.O. 1990, c. O.18, s. 31 (3); 2005, c. 6, s. 1.

Contents of notice

(4) Notice of intention to repeal a by-law or part thereof under subsection (1) shall contain,

(a) an adequate description of the property so that it may be readily ascertained;

(b) a statement of the reason for the proposed repealing by-law; and

(c) a statement that notice of objection to the repealing by-law may be served on the clerk within thirty days of the date of publication of the notice of intention in a newspaper having general circulation in the municipality. R.S.O. 1990, c. O.18, s. 31 (4); 1996, c. 4, s. 56 (1).

Objection

(5) A person who objects to a proposed repealing by-law shall object to the repealing by-law in the manner set out in subsection 29 (5). R.S.O. 1990, c. O.18, s. 31 (5).

Application

(6) Subsections 29 (6) to (15.1) as they apply to an intention to designate a property apply with necessary modifications to an intention to repeal a by-law or part thereof designating a property under this section. R.S.O. 1990, c. O.18, s. 31 (6); 1996, c. 4, s. 56 (2); 2009, c. 33, Sched. 11, s. 6 (7).

Deletion from Register

(7) Where the council of a municipality passes a by-law repealing the designation of a property under this section, it shall cause the clerk of the municipality to delete any reference to the property from the Register referred to in subsection 27 (1). R.S.O. 1990, c. O.18, s. 31 (7).

Repeal of designating by-law, owner's initiative

32. (1) An owner of property designated under this Part may apply to the council of the municipality in which the property is situate to repeal the by-law or part thereof designating the property. R.S.O. 1990, c. O.18, s. 32 (1).

Decision of council

(2) After consultation with its municipal heritage committee, where one is established, the council shall consider an application under subsection (1) and within ninety days of receipt thereof shall,

(a) refuse the application and cause notice of its decision to be given to the owner and to the Trust; or

(b) consent to the application and,

(i) cause notice of the intention to repeal the by-law to be served on the owner and the Trust, and

(ii) publish notice of the intention to repeal the by-law in a newspaper of general circulation in the municipality. R.S.O. 1990, c. O.18, s. 32 (2); 2002, c. 18, Sched. F, s. 2 (15); 2005, c. 6, ss. 1, 20 (1).

Extension of time

(3) The applicant and the council may agree to extend the time under subsection (2) and, where the council fails to notify the applicant of its decision within such extended time as may be agreed upon, the council shall be deemed to have consented to the application. R.S.O. 1990, c. O.18, s. 32 (3).

Application for hearing

(4) Where the council refuses the application under subsection (2), the owner may within thirty days after receipt of the notice under subsection (2) apply to the council for a hearing before the Review Board. R.S.O. 1990, c. O.18, s. 32 (4).

Referral to Review Board

(5) The council shall, upon receipt of an application under subsection (4), refer the matter to the Review Board for a hearing and report, and shall publish a notice of the hearing in a newspaper having general circulation in the municipality at least ten days prior to the date of the hearing. R.S.O. 1990, c. O.18, s. 32 (5).

Hearing

(6) The Review Board shall as soon as is practicable hold a hearing open to the public to review the application, and the council and the owner and such other persons as the Review Board may specify are parties to the hearing. R.S.O. 1990, c. O.18, s. 32 (6).

Place of hearing

(7) A hearing under subsection (6) shall be held at such place in the municipality as the Review Board may determine. R.S.O. 1990, c. O.18, s. 32 (7).

(8) REPEALED: 2005, c. 6, s. 20 (2).

Report

(9) Within thirty days after the conclusion of a hearing under subsection (6), the Review Board shall make a report to the council setting out its findings of fact, its recommendations as to whether or not the application should be approved, and any information or knowledge used by it in reaching its recommendations, and shall send a copy of its report to the other parties to the hearing. R.S.O. 1990, c. O.18, s. 32 (9).

Failure to report

(10) Where the Review Board fails to make a report within the time limited by subsection (9), such failure does not invalidate the procedure. R.S.O. 1990, c. O.18, s. 32 (10).

Decision of council

(11) After considering a report under subsection (9), the council without further hearing shall,

(a) refuse the application and cause notice of its decision to be given to the owner; or

(b) consent to the application and,

(i) cause notice of the intention to repeal the by-law to be served on the owner and the Trust, and

(ii) publish notice of the intention to repeal the by-law in a newspaper of general circulation in the municipality. 2005, c. 6, s. 20 (3).

Decision final

(11.1) A decision made under clause (11) (a) is final. 2005, c. 6, s. 20 (3).

(12) REPEALED: 2005, c. 6, s. 20 (4).

Withdrawal of application

(13) The owner may withdraw an application made under subsection (4) at any time before the conclusion of a hearing into the matter by serving a notice of withdrawal on the clerk of the municipality and on the Review Board and, upon receipt of the notice of withdrawal, the Review Board shall not hold a hearing into the matter or, if a hearing into the matter is in progress, shall discontinue the hearing and the council shall act in accordance with subsection (2) as if no application had been made under subsection (4). 1996, c. 4, s. 57.

Objection

(14) Any person may, within 30 days after the date of publication of the notice of intention under subclause (2) (b) (ii) or (11) (b) (ii), serve on the clerk of the municipality a notice of objection to the repeal of a by-law, or a part of a by-law, designating property as property of cultural heritage value or interest. 2005, c. 6, s. 20 (5).

Content of notice of objection

(15) A notice of objection shall set out the reason for the objection. 2005, c. 6, s. 20 (5).

If no objection made

(16) If no notice of objection is served within the 30-day period referred to in subsection (14), the council shall pass a by-law repealing the by-law, or the part of the by-law, that designated the property as property of cultural heritage value or interest and cause,

(a) a copy of the repealing by-law to be served on the owner of the property and the Trust;

(b) the reference to the property in the Register referred to in subsection 27 (1) to be deleted;

(c) notice of the repealing by-law to be published in a newspaper of general circulation in the municipality; and

(d) a copy of the repealing by-law to be registered against the property in the proper land registry office. 2005, c. 6, s. 20 (5).

Referral of objection to Review Board

(17) If a notice of objection is served on the municipality under subsection (14), the council shall, upon expiration of the 30-day period referred to in that subsection, refer the matter to the Review Board for a hearing and report. 2005, c. 6, s. 20 (5).

Application

(18) Subsections 29 (7) to (13) apply with necessary modifications to the hearing and report by the Review Board required under subsection (17). 2005, c. 6, s. 20 (5).

Decision of council

(19) After considering the report of the Review Board, the council shall, without a further hearing,

(a) refuse the application and cause notice of its decision to be given to the owner; or

(b) consent to the application, pass a by-law repealing the by-law, or the part of the by-law, that designated the property as property of cultural heritage value or interest and cause,

(i) a copy of the repealing by-law to be served on the owner of the property and the Trust,

(ii) the reference to the property in the Register referred to in subsection 27 (1) to be deleted,

(iii) notice of the repealing by-law to be published in a newspaper of general circulation in the municipality, and

(iv) a copy of the repealing by-law to be registered against the property in the proper land registry office. 2005, c. 6, s. 20 (5).

Decision final

(20) The decision of the council under subsection (19) is final. 2005, c. 6, s. 20 (5).

Withdrawal of objection

(21) A person who has served a notice of objection under subsection (14) may withdraw the objection at any time before the conclusion of a hearing into the matter by serving a notice of withdrawal on the clerk of the municipality and on the Review Board. 2005, c. 6, s. 20 (5).

No hearing

(22) If the Review Board has received notices of withdrawal for all the notices of objection that were served under subsection (14), the Review Board shall not hold a hearing into the matter or, if a hearing into the matter is in progress, shall discontinue the hearing and the council shall act in accordance with subsection (16) as if no notice of objection had been served. 2009, c. 33, Sched. 11, s. 6 (8).

Reapplication

(23) Where the council refuses an application under clause (11) (a) or (19) (a), the owner of the property may not reapply to have the by-law, or the part of the by-law, that designates the property as property of cultural heritage value or interest revoked for 12 months from the service of the notice under clause (19) (a), except with the consent of the council. 2005, c. 6, s. 20 (5).

Alteration of property

33. (1) No owner of property designated under section 29 shall alter the property or permit the alteration of the property if the alteration is likely to affect the property's heritage attributes, as set out in the description of the property's heritage attributes that was required to be served and registered under subsection 29 (6) or (14), as the case may be, unless the owner applies to the council of the municipality in which the property is situate and receives consent in writing to the alteration. 2002, c. 18, Sched. F, s. 2 (16); 2005, c. 6, s. 21 (1).

Transition

(1.1) If property is designated under this Part as property of historic or architectural value or interest, either before the day section 29 of this Act is amended by section 2 of Schedule F to the *Government Efficiency Act, 2002* or under subsection 29 (16) of this Act after that day,

(a) subsection (1) of this section does not apply to the property;

(b) despite its amendment by subsection 2 (16) of Schedule F to the *Government Efficiency Act, 2002*, subsection (1) of this section, as it read immediately before the day subsection 2 (16) of Schedule F to the *Government Efficiency Act, 2002* came into force, continues to apply to the property. 2002, c. 18, Sched. F, s. 2 (16).

Application

(2) An application under subsection (1) shall be accompanied by a detailed plan and shall set out such information as the council may require. R.S.O. 1990, c. O.18, s. 33 (2).

Notice of receipt

(3) The council, upon receipt of an application under subsection (1) together with such information as it may require under subsection (2), shall cause a notice of receipt to be served on the applicant. R.S.O. 1990, c. O.18, s. 33 (3).

Decision of council

(4) Within 90 days after the notice of receipt is served on the applicant under subsection (3), the council, after consultation with its municipal heritage committee, if one is established,

(a) shall,

(i) consent to the application,

(ii) consent to the application on terms and conditions, or

(iii) refuse the application; and

(b) shall give notice of its decision to the owner of the property and to the Trust. 2002, c. 18, Sched. F, s. 2 (17); 2005, c. 6, s. 1.

Extension of time

(5) The applicant and the council may agree to extend the time under subsection (4) and, where the council fails to notify the applicant of its decision within ninety days after the notice of receipt is served on the applicant or within such extended time as may be agreed upon, the council shall be deemed to have consented to the application. R.S.O. 1990, c. O.18, s. 33 (5).

Application for hearing

(6) Where the council consents to an application upon certain terms and conditions or refuses the application, the owner may, within thirty days after receipt of the notice under subsection (4), apply to the council for a hearing before the Review Board. R.S.O. 1990, c. O.18, s. 33 (6).

Referral to Review Board

(7) The council shall, upon receipt of a notice under subsection (6), refer the matter to the Review Board for a hearing and report, and shall publish a notice of the hearing in a newspaper having general circulation in the municipality, at least ten days prior to the date of such hearing. R.S.O. 1990, c. O.18, s. 33 (7).

Hearing

(8) The Review Board shall as soon as is practicable hold a hearing open to the public to review the application, and the council and the owner and such other persons as the Review Board may specify are parties to the hearing. R.S.O. 1990, c. O.18, s. 33 (8).

Place for hearing

(9) A hearing under subsection (8) shall be held at such place in the municipality as the Review Board may determine. R.S.O. 1990, c. O.18, s. 33 (9).

(10) REPEALED: 2005, c. 6, s. 21 (2).

Report

(11) Within thirty days after the conclusion of a hearing under subsection (8), the Review Board shall make a report to the council setting out its findings of fact, its recommendations as to whether or not the application should be approved, and any information or knowledge used by it in reaching its recommendations, and shall send a copy of its report to the other parties to the hearing. R.S.O. 1990, c. O.18, s. 33 (11).

Failure to report

(12) Where the Review Board fails to make a report within the time limited by subsection (11), the failure does not invalidate the procedure. R.S.O. 1990, c. O.18, s. 33 (12).

Decision of council

(13) After considering the report under subsection (11), the council without a further hearing shall confirm or revise its decision under subsection (4) with such modifications as the council considers proper and shall cause notice of its decision to be served on the owner and the Trust and to the other parties to the hearing, and its decision is final. R.S.O. 1990, c. O.18, s. 33 (13); 2005, c. 6. s. 1.

Withdrawal of application

(14) The owner may withdraw an application made under subsection (6) at any time before the conclusion of a hearing into the matter by serving a notice of withdrawal on the clerk of the municipality and on the Review Board and, upon receipt of the notice of withdrawal, the Review Board shall not hold a hearing into the matter or, if a hearing into the matter is in progress, shall discontinue the hearing and the council shall act in accordance with subsection (4) as if no application had been made under subsection (6). 1996, c. 4, s. 58.

Delegation of council's consent

(15) The power to consent to alterations to property under this section may be delegated by by-law by the council of a municipality to an employee or official of the municipality if the council has established a municipal heritage committee and has consulted with the committee prior to delegating the power. 2005, c. 6, s. 21 (3).

Scope of delegation

(16) A by-law that delegates the council's power to consent to alterations to a municipal employee or official may delegate the power with respect to all alterations or with respect to such classes of alterations as are described in the by-law. 2005, c. 6, s. 21 (3).

Demolition or removal of structure

34. (1) No owner of property designated under section 29 shall demolish or remove a building or structure on the property or permit the demolition or removal of a building or structure on the property unless the owner applies to the council of the municipality in which the property is situate and receives consent in writing to the demolition or removal. 2002, c. 18, Sched. F, s. 2 (18); 2005, c. 6, s. 22 (1).

Application

(1.1) An application made under subsection (1) shall be accompanied by any plans and set out any information the council may require. 2009, c. 33, Sched. 11, s. 6 (9).

Notice of receipt

(1.2) The council, on receipt of an application under subsection (1) together with any information it may require under subsection (1.1), shall serve a notice of receipt on the applicant. 2009, c. 33, Sched. 11, s. 6 (9).

Decision of council

(2) Within 90 days after the notice of receipt is served on the applicant under subsection (1.2) or within such longer period as is agreed upon by the owner and the council, the council, after consultation with its municipal heritage committee, if one is established,

(a) may,

(i) consent to the application,

(i.1) consent to the application, subject to such terms and conditions as may be specified by the council, or

(ii) refuse the application;

(b) shall give notice of its decision to the owner and to the Trust; and

(c) shall publish its decision in a newspaper having general circulation in the municipality. 2002, c. 18, Sched. F, s. 2 (18); 2005, c. 6, ss. 1, 22 (2); 2009, c. 33, Sched. 11, s. 6 (10).

(3) REPEALED: 2005, c. 6, s. 22 (3).

Deemed consent

(4) If the council fails to notify the owner under clause (2) (b) within the time period mentioned in subsection (2), the council shall be deemed to have consented to the application. 2002, c. 18, Sched. F, s. 2 (18).

Transition

(5) If, on or before the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, an owner of property designated under section 29 had applied to a municipality for consent to demolish or remove a building or structure on the property and no decision had been made by the council of the municipality as of that day,

(a) the council's decision shall be made in accordance with subsection (2), as amended by subsection 22 (2) of the *Ontario Heritage Amendment Act, 2005*; and

(b) subsections (5) and (7), as they read immediately before the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, do not apply if the council decides to refuse the application. 2005, c. 6, s. 22 (4).

Same

(6) If, on or before the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, an owner of property designated under section 29 had applied to a municipality for consent to demolish or remove a building or structure on the property and the council of the municipality had refused the application under subsection (2), then, even though 180 days had elapsed since the date of the council's decision and the owner had complied with the requirements of clause (5) (b) or (7) (b), as they read immediately before that day,

(a) subsections (5) and (7), as they read immediately before the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, do not apply with respect to the refusal of the application; and

(b) the owner shall not demolish or remove the building or structure on the property. 2005, c. 6, s. 22 (4).

Same, exception

(7) Despite subsections (5) and (6), if, on the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, a situation described in subsection (6) existed and the owner of the property had not only prepared the property for the demolition or removal of a building or structure but was in the course of demolishing or removing the building or structure, then,

(a) subsections (5) and (7), as they read immediately before the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, continue to apply to the refusal of the application;

(b) the owner may continue the demolition or removal of the building or structure; and

(c) sections 34.1, 34.2 and 34.3, as they read immediately before the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, continue to apply to the application. 2005, c. 6, s. 22 (4).

(8) REPEALED: 2005, c. 6, s. 22 (4).

Appeal to Board

34.1 (1) If the council of a municipality consents to an application subject to terms and conditions under subclause 34 (2) (a) (i.1) or refuses an application under subclause 34 (2) (a) (ii), the owner of the property that was the subject of the application may appeal the council's decision to the Board within 30 days of the day the owner received notice of the council's decision. 2005, c. 6, s. 23.

Notice of appeal

(2) An owner of property who wishes to appeal the decision of the council of a municipality shall, within 30 days of the day the owner received notice of the council's decision, give notice of appeal to the Board and to the clerk of the municipality. 2005, c. 6, s. 23.

Content of notice

(3) A notice of appeal shall set out the reasons for the objection to the decision of the council of the municipality and be accompanied by the fee prescribed under the *Ontario Municipal Board Act*. 2005, c. 6, s. 23.

Hearing

(4) Upon receiving notice of an appeal, the Board shall set a time and place for hearing the appeal and give notice of the hearing to the owner of the property and to such other persons or bodies as the Board may determine. 2005, c. 6, s. 23.

Notice of hearing

(5) The Board shall give notice of a hearing in such manner as the Board determines necessary. 2005, c. 6, s. 23.

Powers of Board

(6) After holding a hearing, the Board may order,

(a) that the appeal be dismissed; or

(b) that the municipality consent to the demolition or removal of a building or structure without terms and conditions or with such terms and conditions as the Board may specify in the order. 2005, c. 6, s. 23.

Decision final

(7) The decision of the Board is final. 2005, c. 6, s. 23.

Transition, appeal to Board

34.2 (1) Within 90 days of the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, the owner of property designated under section 29 who, before that day, had been refused an application to demolish or remove a building or structure from the property under subsection 34 (2) by the council of a municipality, may appeal the decision to the Board if,

(a) the owner has lost his right to demolish or remove the building or structure 180 days after the day the council of the municipality refused the application under subsection 34 (2) by virtue of subsection 34 (6); and

(b) subsection 34 (7) does not apply to the application. 2005, c. 6, s. 23.

Notice of appeal

(2) An owner of property who wishes to appeal the decision of the council of a municipality under subsection (1) shall, within 90 days of the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, give notice of appeal to the Board and to the clerk of the municipality. 2005, c. 6, s. 23.

Application

(3) Subsections 34.1 (3) to (7) apply with necessary modifications to an appeal under this section. 2005, c. 6, s. 23.

Repeal of by-law designating property

34.3 (1) The council of a municipality shall pass a by-law to repeal a by-law or the part thereof designating a property under section 29 if the owner of the property has applied in writing to the council for consent to the demolition or removal of a building or structure on the property and,

(a) the council consents to the application under subclause 34 (2) (a) (i) or (i.1) or is deemed to have consented to the application under subsection 34 (4); or

(b) the Board has ordered that the municipality give its consent under clause 34.1 (6) (b). 2005, c. 6, s. 24.

Duties upon passing a repealing by-law

(2) When the council passes a repealing by-law under this section, the council shall cause,

(a) a copy of the repealing by-law to be served on the owner of the property and on the Trust;

(b) notice of the repealing by-law to be published in a newspaper having general circulation in the municipality;

(c) reference to the property to be deleted from the Register referred to in subsection 27 (1); and

(d) a copy of the repealing by-law to be registered against the property affected in the proper land registry office. 2002, c. 18, Sched. F, s. 2 (18); 2005, c. 6, s. 1.

Transition

34.4 A process relating to a matter dealt with in any of sections 34 to 34.3 that was commenced but not completed under an Act or a part of an Act repealed by section 4 of Schedule F to the *Government Efficiency Act, 2002*, that was continued under sections 34 to 34.3 of this Act by this section on the day subsection 2 (18) of Schedule F to the *Government Efficiency Act, 2002* came into force, and that was not complete on the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, shall be continued under sections 34 to 34.3 as they read on and after the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent. 2005, c. 6, s. 25.

DESIGNATION OF PROPERTIES BY MINISTER

Designation by Minister

34.5 (1) After consultation with the Trust, the Minister may, by order, designate any property within a municipality or in unorganized territory as property of cultural heritage value or interest of provincial significance if,

(a) the property meets the criteria prescribed by regulation; and

(b) the designation is made in accordance with the process set out in section 34.6. 2005, c. 6, s. 26.

Effect of designation

(2) If property is designated by the Minister under subsection (1), the owner of the property shall not,

(a) carry out or permit an alteration of the property of a kind described in subsection (3) unless the Minister consents to the alteration; or

(b) carry out or permit the demolition or removal of a building or structure on the property unless the Minister consents to the demolition or removal or the Board orders the demolition or removal under subsection (6). 2005, c. 6, s. 26.

Alterations to property

(3) Clause (2) (a) applies in respect of alterations that are likely to affect the property's heritage attributes as described in the notice of intention to designate the property given under section 34.6. 2005, c. 6, s. 26.

Application for consent, alteration

(4) The owner of a property designated under subsection (1) may apply to the Minister for the Minister's consent to an alteration of the property and subsections 33 (2) to (14) apply with necessary modifications to such an application. 2005, c. 6, s. 26.

Same

(5) For the purposes of the application of subsection 33 (4) to an application for the Minister's consent made under subsection (4), subsection 33 (4) shall be deemed to require the Minister to consult with the Trust, and not with a municipal heritage committee, before rendering a decision under that subsection. 2005, c. 6, s. 26.

Same, demolition or removal

(6) The owner of a property designated under subsection (1) may apply to the Minister for the Minister's consent to the demolition or removal of a building or structure on the property. 2005, c. 6, s. 26.

Decision of Minister

(7) Within 90 days after receipt of an application under subsection (6), or within such longer period as is agreed upon by the owner and the Minister, the Minister, having consulted with the Trust, may,

(a) consent to the application;

(b) consent to the application, subject to such terms and conditions as may be specified by the Minister; or

(c) refuse the application. 2005, c. 6, s. 26.

Notice of decision

(8) The Minister shall, within the time period specified in subsection (7), give notice of its decision under subsection (7) to the owner of the property and to the Trust and,

(a) in the case of property situated in a municipality, shall publish the decision in a newspaper having general circulation in the municipality; and

(b) in the case of property situated in unorganized territory, shall publish its decision or otherwise make its decision known in a manner and at such times as the Minister considers adequate to give the public in the territory reasonable notice. 2005, c. 6, s. 26.

Deemed consent

(9) If the Minister fails to give notice of its decision to the owner within the time period specified in subsection (7), the Minister shall be deemed to have consented to the application. 2005, c. 6, s. 26.

Application, appeal to Board

(10) Section 34.1 applies with necessary modifications where the Minister refuses an application for consent under clause (7) (c) or consents to the application, subject to terms and conditions specified by the Minister under clause (7) (b). 2005, c. 6, s. 26.

Delegation

(11) The Minister may delegate in writing his or her power to consent to the alteration of a property designated under subsection (1) and to consent to the demolition or removal of a building or structure on property designated under subsection (1),

(a) to the Trust, or to an official of the Trust designated by the Trust for the purposes of such a delegation; or

(b) in the case of property situated in a municipality, to the council of the municipality or to an official of the municipality designated by the council of the municipality for the purposes of such a delegation. 2005, c. 6, s. 26.

Scope of delegation

(12) The Minister may limit a delegation under subsection (11) so as to delegate the power to consent to only one of the types of changes to property described in subsection (11), or to such combination thereof as may be specified in the delegation, or to consent to such classes of alterations as are set out in the delegation. 2005, c. 6, s. 26.

Designation process

34.6 (1) If the Minister intends to designate property as property of cultural heritage value or interest of provincial significance, the Minister shall ensure that a notice of intention to designate the property is,

(a) served on the owner of the property and, if the property is situated in a municipality, on the clerk of the municipality;

(b) in the case of property situated in a municipality, published in a newspaper of general circulation in the municipality; and

(c) in the case of property situated in unorganized territory, published or otherwise made known in the territory in a manner and at such times as the Minister considers adequate to give the public in the territory reasonable notice. 2005, c. 6, s. 26.

Content of notice

(2) A notice of intention to designate property served on an owner of property and on the clerk of a municipality under clause (1) (a) shall contain,

(a) an adequate description of the property so that it may be readily ascertained;

(b) a statement explaining the cultural heritage value or interest of the property and a description of the heritage attributes of the property; and

(c) a statement that notice of objection to the designation may be served on the Minister, within 30 days after the day the notice of intention was first published or made known to the public under clause (1) (b) or (c). 2005, c. 6, s. 26.

Same

(3) A notice of intention to designate property published under clause (1) (b) or (c) shall contain,

(a) an adequate description of the property so that it may be readily ascertained;

(b) a statement explaining the cultural heritage value or interest of the property;

(c) a statement that further information respecting the proposed designation is available from the Minister; and

(d) a statement that notice of objection to the designation may be served on the Minister, within 30 days after the day the notice of intention was first published or made known to the public under clause (1) (b) or (c). 2005, c. 6, s. 26.

Objection

(4) Within 30 days after the day the notice of intention was first published or made known to the public under clause (1) (b) or (c), a person may serve on the Minister a notice of objection setting out the reason for the objection and all relevant facts. 2005, c. 6, s. 26.

If no notice of objection

(5) If no notice of objection is served within the 30-day period referred to in subsection (4), the Minister,

(a) shall make an order designating the property as property of cultural heritage value or interest of provincial significance and shall,

(i) cause a copy of the order together with a statement explaining the cultural heritage value or interest of the property and a description of the heritage attributes of the property,

(A) to be served on the owner of the property, on the Trust and, if the property is situated in a municipality, on the clerk of the municipality, and

(B) to be registered against the property affected in the proper land registry office,

(ii) in the case of property situated in a municipality, publish notice of the order in a newspaper of general circulation in the municipality, and

(iii) in the case of property situated in unorganized territory, publish notice of the order or otherwise make it known in the territory in a manner and at such times as the Minister considers adequate to give the public in the territory reasonable notice; or

(b) shall withdraw the notice of intention to designate the property by causing a notice of withdrawal,

(i) to be served on the owner of the property, on the Trust and, if the property is situated in a municipality, on the clerk of the municipality,

(ii) in the case of property situated in a municipality, to be published in a newspaper of general circulation in the municipality, and

(iii) in the case of property situated in unorganized territory, to be published or otherwise made known in the territory in a manner and at such times as the Minister considers adequate to give the public in the territory reasonable notice. 2005, c. 6, s. 26.

Referral of objection to Review Board

(6) If a notice of objection is served on the Minister under subsection (4), the Minister shall, upon expiration of the 30-day period referred to in that subsection, refer the matter to the Review Board for a hearing and report. 2005, c. 6, s. 26.

Hearing

(7) If a matter is referred to the Review Board under subsection (6), the Review Board shall hold a hearing as soon as practicable to determine whether the property in question should be designated as property of cultural heritage value or interest of provincial significance. 2005, c. 6, s. 26.

Parties

(8) The Minister, the owner of the property in question, any person who has served a notice of objection under subsection (4) and such other persons as the Review Board may specify are parties to the hearing. 2005, c. 6, s. 26.

Open hearing

(9) A hearing under subsection (7) is open to the public. 2005, c. 6, s. 26.

Place of hearing

(10) A hearing under subsection (7) shall be held at such place in the municipality or in the unorganized territory, as the case may be, as the Review Board may determine. 2005, c. 6, s. 26.

Notice of hearing

(11) Notice of a hearing under subsection (7) shall be,

(a) if the hearing is with respect to property situated in a municipality, published in a newspaper of general circulation in the municipality at least 10 days before the day of the hearing; and

(b) if the hearing is with respect to property situated in unorganized territory, published or otherwise made known in the territory in a manner and at such times as the Review Board considers adequate to give the public in the territory reasonable notice of the hearing. 2005, c. 6, s. 26.

Combining hearings

(12) The Review Board may combine two or more related hearings and conduct them in all respects and for all purposes as one hearing. 2005, c. 6, s. 26.

Reports

(13) Within 30 days after the conclusion of a hearing under subsection (7) or as soon thereafter as is practicable, the Review Board shall make a report to the Minister setting out its findings of fact, its recommendations as to whether or not the property in question should be designated under section 34.5 and any information or knowledge used by it in reaching its recommendations. 2005, c. 6, s. 26.

Copies

(14) The Review Board shall send a copy of its report to the other parties to the hearing. 2005, c. 6, s. 26.

Decision of Minister

(15) After considering the report of the Review Board, the Minister, without further hearing, shall make any order or take any action set out in subsection (5) and follow the requirements of that subsection. 2005, c. 6, s. 26.

Decision final

(16) The decision of the Minister under subsection (15) is final. 2005, c. 6, s. 26.

Withdrawal of objection

(17) A person who has served a notice of objection under subsection (4) may withdraw the objection at any time before the conclusion of a hearing into the matter by serving notice of withdrawal on the Minister and on the Review Board. 2005, c. 6, s. 26.

No hearing

(18) If the Review Board has received notices of withdrawal for all the notices of objection that were served under subsection (4), the Review Board shall not hold a hearing into the matter or, if a hearing into the matter is in progress, shall discontinue the hearing and the council shall act in accordance with subsection (5) as if no notice of objection had been served. 2009, c. 33, Sched. 11, s. 6 (11).

Effect of notice of designation
Permits void

34.7 (1) If a notice of intention to designate a property as property of cultural heritage value or interest of provincial significance is given under section 34.6, any permit that allowed for the alteration or demolition of the property and that was issued under any Act, including a building permit, before the day the notice was served on the owner of the property and on the Trust and published or made known under subsection 34.6 (1) is void as of that day. 2005, c. 6, s. 26.

Interim control of alteration, demolition or removal

(2) Subsections 34.5 (2) to (10) apply with necessary modifications to property as of the day a notice of intention to designate the property is given under section 34.6 as though the designation process were complete and the property had been designated under subsection 34.5 (1). 2005, c. 6, s. 26.

Repeal of order, Minister's initiative

34.8 (1) If, after consultation with the Trust, the Minister decides to repeal an order designating property as property of cultural heritage value or interest of provincial significance, the Minister shall give notice of intention to repeal the order in accordance with subsection (2). 2005, c. 6, s. 26.

Notice of intention

(2) A notice of intention to repeal an order designating property shall be served on the owner of the property and on the Trust and,

(a) in the case of property situated in a municipality, shall be published in a newspaper of general circulation in the municipality; or

(b) in the case of property situated in unorganized territory, shall be published or otherwise made known in the territory in a manner and at such times as the Minister considers adequate to give the public in the territory reasonable notice. 2005, c. 6, s. 26.

Content of notice

(3) A notice of intention to repeal an order designating property shall contain,

(a) an adequate description of the property so that it may be readily ascertained;

(b) a short statement of the reason for repealing the order; and

(c) a statement that notice of objection to the repeal of the order may be served on the Minister, within 30 days after the day the notice of intention was first published or made known to the public under clause (2) (a) or (b). 2005, c. 6, s. 26.

Objection

(4) Within 30 days after the day the notice of intention was first published or made known to the public under clause (2) (a) or (b), a person may serve on the Minister a notice of objection to the repeal of an order designating property setting out the reason for the objection and all relevant facts. 2005, c. 6, s. 26.

Application

(5) Subsections 34.6 (5) to (18), as they apply to an intention to make an order to designate property, apply with necessary modifications to an intention to make an order repealing the designation of the property. 2005, c. 6, s. 26.

Repeal of order, owner's initiative

34.9 (1) An owner of a property designated under subsection 34.5 (1) may apply to the Minister for a repeal of the order designating the property. 2005, c. 6, s. 26.

Decision of Minister

(2) Within 90 days of receipt of an application under subsection (1), the Minister, having consulted with the Trust, shall,

(a) refuse the application and cause notice of its decision to be given to the owner and to the Trust; or

(b) consent to the application and,

(i) cause notice of the intention to repeal the order to be served on the owner and the Trust,

(ii) if the property is situated in a municipality, publish notice of the intention to repeal the order in a newspaper of general circulation in the municipality, and

(iii) if the property is situated in unorganized territory, publish or otherwise make known the notice of intention to repeal the order in a manner and at such times as the Minister considers adequate to give the public in the territory reasonable notice. 2005, c. 6, s. 26.

Extension of time

(3) The applicant and the Minister may agree to extend the time under subsection (2) within which the Minister is to make a decision. 2005, c. 6, s. 26.

Deemed decision

(4) If the Minister fails to notify the applicant of his or her decision within the 90-day period referred to in subsection (2) or within such further time as may have been agreed to under subsection (3), the Minister shall be deemed to have consented to the application. 2005, c. 6, s. 26.

Application for hearing

(5) Within 30 days of receipt of a notice of a refusal of an application under clause (2) (a), the owner of the property in question may apply to the Minister for a hearing before the Review Board. 2005, c. 6, s. 26.

Application

(6) Subsections 32 (5) to (10) and (13) apply with necessary modifications to a hearing by the Review Board under this section. 2005, c. 6, s. 26; 2009, c. 33, Sched. 11, s. 6 (12).

Decision of Minister

(7) After considering the report of the Review Board, the Minister, without further hearing, shall,

(a) refuse the application and cause notice of its decision to be given to the owner and to the Trust; or

(b) consent to the application and,

(i) cause notice of the intention to repeal the order to be served on the owner and the Trust,

(ii) if the property is situated in a municipality, publish notice of the intention to repeal the order in a newspaper of general circulation in the municipality, and

(iii) if the property is situated in unorganized territory, publish or otherwise make known the notice of intention to repeal the order in a manner and at such times as the Minister considers adequate to give the public in the territory reasonable notice. 2005, c. 6, s. 26.

Objection

(8) Within 30 days after the day the notice of intention was first published or made known to the public under clause (2) (b) or (7) (b), a person may serve on the Minister a notice of objection to the repeal of an order designating property setting out the reason for the objection and all relevant facts. 2005, c. 6, s. 26.

Application

(9) Subsections 34.6 (5) to (18), as they apply to an intention to make an order to designate property, apply with necessary modifications to an intention to make an order repealing the designation of the property. 2005, c. 6, s. 26.

Reapplication

(10) Where the Minister refuses an application under this section, the owner of the property may not reapply to have the order that designates the property as property of cultural heritage value or interest of provincial significance revoked for 12 months from day the owner receives notice of the Minister's decision, except with the consent of the Minister. 2005, c. 6, s. 26.

GENERAL

Notice of change of ownership

35. (1) Where there is a change in the ownership of property designated under section 29 by a municipality, the new owner of the property shall give notice of the change to the clerk of the municipality within 30 days of becoming the owner of the property. 2005, c. 6, s. 27.

Same, Minister

(2) Where there is a change in the ownership of property designated under section 34.5 by the Minister, the new owner of the property shall give notice of the change to the Minister within 30 days of becoming the owner of the property. 2005, c. 6, s. 27.

Conflict

35.1 In the event of a conflict between an order by the Minister designating property under section 34.5 and a municipal by-law that affects the same property, the order prevails to the extent of the conflict, but in all other respects the by-law remains in full force and effect. 2005, c. 6, s. 27.

Stop order

35.2 (1) The Minister may issue a stop order with respect to any property in the Province to prevent the alteration of the property, any damage to the property or the demolition or removal of any building or structure on the property if the Minister is of the opinion that,

(a) the property may be property of cultural heritage value or interest of provincial significance; and

(b) the property is likely to be altered or damaged or a building or structure located on the property is likely to be removed or demolished. 2005, c. 6, s. 27.

Same

(2) The Minister may make an order under this section with respect to property designated under section 29 even if the municipality has consented to the alteration, demolition or removal in question. 2005, c. 6, s. 27.

Order

(3) A stop order issued under this section shall direct the owner of the property in question or any person in apparent possession of the property to ensure that any activity that is likely to result in the alteration of or damage to the property or the demolition or removal of any building or structure on the property not be commenced or be discontinued for a period of up to 60 days. 2005, c. 6, s. 27.

Assessment

(4) During the time that a stop order is in effect, the Minister, or any person authorized by the Minister in writing, may prepare a study to assist in determining whether the property is property of cultural heritage value or interest of provincial significance and which procedures, if any, should be commenced under this Act or otherwise, in order to protect and conserve the property. 2005, c. 6, s. 27.

Service of order

(5) The Minister may serve a stop order issued under this section on the owner of the property in question or any person in apparent possession of the property by any method of service described in subsection 67 (1) and by posting the order in a conspicuous place on the property to which it applies. 2009, c. 33, Sched. 11, s. 6 (13).

Service deemed effective

(6) Service under subsection (5) is effective from the earlier of the date of posting or the effective date of service described in subsections 67 (2) to (4). 2009, c. 33, Sched. 11, s. 6 (13).

Building standards by-law

35.3 (1) If a by-law passed under section 15.1 of the *Building Code Act, 1992* setting out standards for the maintenance of property in the municipality is in effect in a municipality, the council of the municipality may, by by-law,

(a) prescribe minimum standards for the maintenance of the heritage attributes of property in the municipality that has been designated by the municipality under section 29 or by the Minister under section 34.5; and

(b) require property that has been designated under section 29 or 34.5 and that does not comply with the standards to be repaired and maintained to conform with the standards. 2005, c. 6, s. 27.

Application

(2) Sections 15.2, 15.3, 15.4, 15.5 and 15.8 of the *Building Code Act, 1992* apply with necessary modifications to the enforcement of a by-law made under subsection (1). 2005, c. 6, s. 27.

Purchase or lease by-laws

36. (1) The council of a municipality may pass by-laws providing for acquiring, by purchase, lease or otherwise, any property or part thereof designated under this Part, including any interest therein, for the use or purposes of this Part and for disposing of such property, or any interest therein, by sale, lease or otherwise, when no longer so required, upon such terms and conditions as the council considers necessary for the purposes of this Part. R.S.O. 1990, c. O.18, s. 36 (1).

Expropriating by-law

(2) Subject to the *Expropriations Act*, the council of every municipality may pass by-laws providing for the expropriation of any property designated under this Part and required for the purposes of this Part and may sell, lease or otherwise dispose of the property, when no longer so required, upon such terms and conditions as the council considers necessary for the purposes of this Part. R.S.O. 1990, c. O.18, s. 36 (2).

Delegation

(3) The council of a municipality that forms part of an upper-tier municipality may delegate its power under this Part to the council of the upper-tier municipality. 2002, c. 17, Sched. F, Table.

Easements

37. (1) Despite subsection 36 (1), after consultation with its municipal heritage committee, if one is established, the council of a municipality may pass by-laws providing for the entering into of easements or covenants with owners of real property or interests in real property, for the conservation of property of cultural heritage value or interest. 2002, c. 18, Sched. F, s. 2 (19).

Idem

(2) Any easement or covenant entered into by a council of a municipality may be registered, against the real property affected, in the proper land registry office. R.S.O. 1990, c. O.18, s. 37 (2).

Idem

(3) Where an easement or covenant is registered against real property under subsection (2), such easement or covenant shall run with the real property and the council of the municipality may enforce such easement or covenant, whether positive or negative in nature, against the owner or any subsequent owners of the real property, and the council of the municipality may enforce such easement or covenant even where it owns no other land which would be accommodated or benefited by such easement or covenant. R.S.O. 1990, c. O.18, s. 37 (3).

Assignment

(4) Any easement or covenant entered into by the council of a municipality under subsection (2) may be assigned to any person and such easement or covenant shall continue to run with the real property and the assignee may enforce the easement or covenant as if it were the council of the municipality and it

owned no other land which would be accommodated or benefited by such easement or covenant. R.S.O. 1990, c. O.18, s. 37 (4).

Conflict

(5) Where there is a conflict between an easement or covenant entered into by a council of a municipality under subsection (1) and section 33 or 34, the easement or covenant shall prevail. R.S.O. 1990, c. O.18, s. 37 (5).

Inspection

38. (1) For the purpose of carrying out this Part, any person authorized by the council of a municipality in writing may, upon producing proper identification, inspect at any reasonable time property designated or property proposed to be designated under this Part where a notice of intention to designate has been served and published under subsection 29 (3).

Obstruction of investigator

(2) No person shall obstruct a person authorized to make an investigation under this section or conceal or destroy anything relevant to the subject-matter of the investigation. R.S.O. 1990, c. O.18, s. 38.

Grants and loans

39. (1) The council of a municipality may pass by-laws providing for the making of a grant or loan to the owner of a property designated under this Part for the purpose of paying for the whole or any part of the cost of alteration of such designated property on such terms and conditions as the council may prescribe. R.S.O. 1990, c. O.18, s. 39 (1).

Loan is lien or charge on land

(2) The amount of any loan made under a by-law passed under subsection (1), together with interest at a rate to be determined by the council, may be added by the clerk of the municipality to the collector's roll and collected in like manner as municipal taxes over a period fixed by the council, not exceeding five years, and such amount and interest shall, until payment thereof, be a lien or charge upon the land in respect of which the loan was made. R.S.O. 1990, c. O.18, s. 39 (2).

Non-application of s. 106 of *Municipal Act, 2001*

(3) Section 106 of the *Municipal Act, 2001* does not apply to a grant or loan made under subsection (1). 2009, c. 33, Sched. 11, s. 6 (14).

PART V
HERITAGE CONSERVATION DISTRICTS

Definition

39.1 (1) In this Part,

"property" means real property and includes all buildings and structures thereon. 2002, c. 18, Sched. F, s. 2 (20).

Publication of notice, City of Toronto

(2) Where the City of Toronto is required by this Part to publish a notice in a newspaper having general circulation in the municipality, notice given in accordance with a policy adopted by the City under section 212 of the *City of Toronto Act, 2006* is deemed to satisfy the requirement of this Part to publish notice in a newspaper. 2006, c. 11, Sched. B, s. 11 (3).

Publication of notice

(3) Where a municipality is required by this Part to publish a notice in a newspaper having general circulation in the municipality, notice given in accordance with a policy adopted by the municipality under section 270 of the *Municipal Act, 2001* is deemed to satisfy the requirement of this Part to publish notice in a newspaper. 2006, c. 32, Sched. D, s. 13 (2).

Application

39.1.1 (1) This Part does not apply to property described in clause 25.2 (2) (a). 2005, c. 6. s. 28.

Conflict

(2) If a property described in clause 25.2 (2) (b) is included in a heritage conservation study area designated under section 40.1 or in a heritage conservation district designated under section 41, and if there is a conflict between a provision of the heritage standards and guidelines prepared under Part III.1 and a provision in Part V as they apply to that property, the provision in Part V prevails. 2005, c. 6. s. 28.

Register

39.2 (1) The clerk of a municipality shall keep a register of all heritage conservation districts designated under this Part that are situate in the municipality and shall ensure that the register contains a map or description of the area of each such heritage conservation district. 2002, c. 18, Sched. F, s. 2 (21).

Extracts

(2) The clerk of a municipality shall issue extracts from the register referred to in subsection (1) to any person on payment of the fee set by the municipality by by-law. 2002, c. 18, Sched. F, s. 2 (21).

Area study

40. (1) The council of a municipality may undertake a study of any area of the municipality for the purpose of designating one or more heritage conservation districts. 2005, c. 6. s. 29.

Scope of study

(2) A study under subsection (1) shall,

(a) examine the character and appearance of the area that is the subject of the study, including buildings, structures and other property features of the area, to determine if the area should be preserved as a heritage conservation district;

(b) examine and make recommendations as to the geographic boundaries of the area to be designated;

(c) consider and make recommendations as to the objectives of the designation and the content of the heritage conservation district plan required under section 41.1;

(d) make recommendations as to any changes that will be required to the municipality's official plan and to any municipal by-laws, including any zoning by-laws. 2005, c. 6. s. 29.

Consultation

(3) If the council of a municipality has established a municipal heritage committee under section 28, the council shall consult with the committee with respect to the study. 2005, c. 6. s. 29.

Designation of study area

40.1 (1) If the council of a municipality undertakes a study under section 40, the council may by by-law designate the area specified in the by-law as a heritage conservation study area for a period of up to one year. 2005, c. 6. s. 29.

Same

(2) A by-law made under subsection (1) may prohibit or set limitations with respect to,

(a) the alteration of property situated in the heritage conservation study area; and

(b) the erection, demolition or removal of buildings or structures, or classes of buildings or structures, in the heritage conservation study area. 2005, c. 6. s. 29.

Notice of by-law

(3) If the council of a municipality passes a by-law under subsection (1), the council shall, within 30 days after the by-law is passed, cause notice of the by-law,

(a) to be served on each owner of property located in the heritage conservation study area and on the Trust; and

(b) to be published in a newspaper of general circulation in the municipality. 2005, c. 6. s. 29.

Appeal to Board

(4) Any person who objects to a by-law passed under subsection (1) may appeal to the Board by giving the clerk of the municipality, within 30 days after the date of publication under clause (3) (b), a

notice of appeal setting out the objection to the by-law and the reasons in support of the objection, accompanied by the fee prescribed under the *Ontario Municipal Board Act*. 2005, c. 6. s. 29.

Application

(5) Subsections 41 (6) to (9) apply with necessary modifications to an appeal under subsection (4). 2005, c. 6. s. 29; 2006, c. 11, Sched. B, s. 11 (4).

Limitation

(6) Where the designation of a study area in a municipality ceases to be in effect, the council of the municipality shall not, during the following three years, pass a by-law designating another study area that includes an area that was part of the previously designated study area. 2005, c. 6. s. 29.

Designation of heritage conservation district

41. (1) Where there is in effect in a municipality an official plan that contains provisions relating to the establishment of heritage conservation districts, the council of the municipality may by by-law designate the municipality or any defined area or areas thereof as a heritage conservation district. R.S.O. 1990, c. O.18, s. 41 (1); 2002, c. 18, Sched. F, s. 2 (23).

Property designated under Part IV

(2) A property that is designated under Part IV may subsequently be included in an area designated as a heritage conservation district under this Part, and a property that is included in an area designated as a heritage conservation district under this Part may subsequently be designated under Part IV. 2002, c. 18, Sched. F, s. 2 (24).

Which Part applies

(2.1) A property that is designated by the Minister under subsection 34.5 (1) and is included in an area designated as a heritage conservation district under this Part is subject to subsections 34.5 (2) to (12), and not to this Part, with respect to any alterations of the property or any demolition or removal of buildings or structures on the property. 2005, c. 6. s. 30 (1).

Same

(2.2) A property that is designated by a municipality under section 29 and is included in an area designated as a heritage conservation district under this Part is subject to section 30 and sections 33 to 34.4, and not to this Part, with respect to any alterations of the property or any demolition or removal of buildings or structures on the property if,

(a) the designation of the heritage conservation district was made before the day section 41.1 came into force; and

(b) no heritage conservation district plan has been adopted by the council of the municipality under section 41.1 with respect to the heritage conservation district. 2005, c. 6. s. 30 (1).

Same

(2.3) Subject to subsection (2.4), a property that is designated by a municipality under section 29 and is included in an area designated as a heritage conservation district under this Part for which a heritage conservation district plan has been adopted under section 41.1 is subject to this Part and to the plan with respect to any alterations of the property or demolition or removal of buildings or structures on the property, and is not subject to section 30 or to sections 33 to 34.4. 2005, c. 6. s. 30 (1).

Same

(2.4) If the owner of a property referred to in subsection (2.3) intends to alter or permit alterations to the interior of a building or structure on the property, the owner shall comply with the requirements of section 33. 2005, c. 6. s. 30 (1).

Notice of by-law

(3) If the council of a municipality passes a by-law under this section designating the municipality or any defined area or areas of the municipality as a heritage conservation district, the council shall cause notice of the passage of the by-law,

(a) to be served on each owner of property located in the heritage conservation district and on the Trust; and

(b) to be published in a newspaper having general circulation in the municipality. 2002, c. 18, Sched. F, s. 2 (25); 2005, c. 6. s. 1.

Appeal to Board

(4) Any person who objects to the by-law may appeal to the Board by giving the clerk of the municipality, within 30 days after the date of publication under clause (3) (b), a notice of appeal setting out the objection to the by-law and the reasons in support of the objection, accompanied by the fee prescribed under the *Ontario Municipal Board Act*. 2002, c. 18, Sched. F, s. 2 (25).

If no notice of appeal

(5) If no notice of appeal is given to the clerk within the time period specified in subsection (4),

(a) the by-law comes into force on the day following the last day of the period; and

(b) the clerk shall ensure that a copy of the by-law is registered against the properties affected by the by-law in the appropriate land registry office. 2005, c. 6. s. 30 (2).

If notice of appeal

(6) If a notice of appeal is given to the clerk within the time period specified in subsection (4), the Board shall hold a hearing open to the public and, before holding the hearing, shall give notice of the hearing to such persons or bodies and in such manner as the Board may determine. 2002, c. 18, Sched. F, s. 2 (25).

Powers of Board

(7) After holding the hearing, the Board shall,

(a) dismiss the appeal; or

(b) allow the appeal in whole or in part and,

(i) repeal the by-law,

(ii) amend the by-law in such manner as the Board may determine,

(iii) direct the council of the municipality to repeal the by-law, or

(iv) direct the council of the municipality to amend the by-law in accordance with the Board's order. 2002, c. 18, Sched. F, s. 2 (25).

Dismissal without hearing of appeal

(8) Despite the *Statutory Powers Procedure Act* and subsections (6) and (7), the Board may, on its own motion or on the motion of any party, dismiss all or part of the appeal without holding a hearing on the appeal if,

(a) the Board is of the opinion that,

(i) the reasons set out in the notice of appeal do not disclose any apparent ground upon which the Board could allow all or part of the appeal, or

(ii) the appeal is not made in good faith, is frivolous or vexatious, or is made only for the purpose of delay;

(b) the appellant has not provided written reasons in support of the objection to the by-law;

(c) the appellant has not paid the fee prescribed under the *Ontario Municipal Board Act*;

(d) the appellant has not responded to a request by the Board for further information within the time specified by the Board; or

(e) the appellant has not participated in the public process for the adoption of the relevant heritage conservation district plan under section 41.1 by either making an oral submission at a public meeting or by submitting written submissions to the council of the municipality and the Board believes there is no reasonable explanation for failing to do so. 2002, c. 18, Sched. F, s. 2 (25); 2005, c. 6, s. 30 (3).

Representations

(9) Before dismissing all or part of an appeal on any of the grounds mentioned in subsection (8), the Board shall,

(a) notify the appellant of the proposed dismissal; and

(b) hold a hearing with respect to the proposed dismissal or give the appellant an opportunity to make representations with respect to the proposed dismissal. 2002, c. 18, Sched. F, s. 2 (25).

Coming into force

(10) If one or more notices of appeal are given to the clerk within the time period specified in subsection (4),

(a) the by-law comes into force when all of such appeals have been withdrawn or dismissed;

(b) if the by-law is amended by the Board under subclause (7) (b) (ii), the by-law, as amended by the Board, comes into force on the day it is so amended; or

(c) if the by-law is amended by the council pursuant to subclause (7) (b) (iv), the by-law, as amended by the council, comes into force on the day it is so amended. 2002, c. 18, Sched. F, s. 2 (25).

Registration of by-law

(10.1) The clerk of a municipality shall ensure that a copy of the by-law made under this section is registered in the appropriate land registry office promptly after it comes into force. 2005, c. 6, s. 30 (4).

Transition

(11) If, on the day subsection 2 (25) of Schedule F to the *Government Efficiency Act, 2002* comes into force, a by-law designating a heritage conservation district has been passed by a municipality and the Board has not begun to hold a hearing under subsection (6) of this section, as it read immediately before that day, subsections (3) to (10) of this section apply to the by-law. 2002, c. 18, Sched. F, s. 2 (25).

Same

(12) If, on the day subsection 2 (25) of Schedule F to the *Government Efficiency Act, 2002* comes into force, a by-law designating a heritage conservation district has been passed by a municipality and the Board has completed or has begun to hold a hearing under subsection (6) of this section, as it read before that day, but has not yet issued its formal order,

(a) subsections (3) to (10) of this section do not apply to the by-law;

(b) despite their repeal by subsection 2 (25) of Schedule F to the *Government Efficiency Act, 2002*, subsections (3) to (8) of this section, as they read immediately before the day subsection 2 (25) of Schedule F to the *Government Efficiency Act, 2002* came into force, continue to apply to the by-law. 2002, c. 18, Sched. F, s. 2 (25).

Heritage conservation district plans

41.1 (1) A by-law under section 41 designating one or more heritage conservation districts in a municipality shall adopt a heritage conservation district plan for each district that is designated in the by-law. 2005, c. 6, s. 31.

Same, where district already designated

(2) If, on or before the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, the council of a municipality had passed a by-law designating one or more heritage conservation districts, it may pass a by-law adopting a heritage conservation district plan for any one of the designated districts. 2005, c. 6, s. 31.

Notice

(3) If the council of a municipality passes a by-law adopting a heritage conservation district plan under subsection (2), the council shall cause notice of the by-law,

(a) to be served on each owner of property located in the heritage conservation district and on the Trust; and

(b) to be published in a newspaper having general circulation in the municipality. 2005, c. 6, s. 31.

Application

(4) Subsections 41 (4) to (10) apply with necessary modifications to a by-law passed under subsection (2). 2005, c. 6, s. 31.

Content of plan

(5) A heritage conservation district plan shall include,

(a) a statement of the objectives to be achieved in designating the area as a heritage conservation district;

(b) a statement explaining the cultural heritage value or interest of the heritage conservation district;

(c) a description of the heritage attributes of the heritage conservation district and of properties in the district;

(d) policy statements, guidelines and procedures for achieving the stated objectives and managing change in the heritage conservation district; and

(e) a description of the alterations or classes of alterations that are minor in nature and that the owner of property in the heritage conservation district may carry out or permit to be carried out on any part of the property, other than the interior of any structure or building on the property, without obtaining a permit under section 42. 2005, c. 6, s. 31.

Consultation

(6) Before a by-law adopting a heritage conservation district plan is made by the council of a municipality under subsection 41 (1) or under subsection (2), the council shall ensure that,

(a) information relating to the proposed heritage conservation district plan, including a copy of the plan, is made available to the public;

(b) at least one public meeting is held with respect to the proposed heritage conservation district plan; and

(c) if the council of the municipality has established a municipal heritage committee under section 28, the committee is consulted with respect to the proposed heritage conservation district plan. 2005, c. 6, s. 31.

Notice of public meeting

(7) The clerk of a municipality shall give notice of a public meeting to discuss a proposed heritage conservation district plan in such manner as the council of the municipality determines is appropriate and to such persons and bodies the council believes may have an interest in the plan. 2005, c. 6, s. 31.

Time of public meeting

(8) The public meeting shall take place 20 days after notice is given under subsection (7) or at such later time as may be specified in the notice. 2005, c. 6, s. 31.

Oral representations

(9) Any person attending the public meeting shall be given an opportunity to make oral representations with respect to the plan. 2005, c. 6, s. 31.

Information provided at meeting

(10) The council of a municipality shall ensure that information is provided to persons attending a public meeting explaining that, in accordance with subsection 41 (8), a person who does not raise objections to the adoption of a proposed heritage conservation district plan by making oral representations under subsection (9) or written submissions under subsection (11) may be later denied an opportunity to appeal the passing of a by-law adopting the plan under subsection 41 (1) or under subsection (2). 2005, c. 6, s. 31.

Written submissions

(11) Any person or body may make written submissions with respect to a proposed heritage conservation district plan to the council of a municipality at any time before the by-law adopting the plan is made. 2005, c. 6, s. 31.

Copies of proposed plan available

(12) The council shall provide copies of a proposed heritage conservation district plan to any person upon request. 2005, c. 6, s. 31.

Consistency with heritage conservation district plan

41.2 (1) Despite any other general or special Act, if a heritage conservation district plan is in effect in a municipality, the council of the municipality shall not,

(a) carry out any public work in the district that is contrary to the objectives set out in the plan; or

(b) pass a by-law for any purpose that is contrary to the objectives set out in the plan. 2005, c. 6, s. 31.

Conflict

(2) In the event of a conflict between a heritage conservation district plan and a municipal by-law that affects the designated district, the plan prevails to the extent of the conflict, but in all other respects the by-law remains in full force. 2005, c. 6, s. 31.

Erection, demolition, etc.

42. (1) No owner of property situated in a heritage conservation district that has been designated by a municipality under this Part shall do any of the following, unless the owner obtains a permit from the municipality to do so:

1. Alter, or permit the alteration of, any part of the property, other than the interior of any structure or building on the property.
2. Erect, demolish or remove any building or structure on the property or permit the erection, demolition or removal of such a building or structure. 2005, c. 6, s. 32 (1).

Exception

(2) Despite subsection (1), the owner of a property situated in a designated heritage conservation district may, without obtaining a permit from the municipality, carry out such minor alterations or classes of alterations as are described in the heritage conservation district plan in accordance with clause 41.1 (5) (e) to any part of the property in respect of which a permit would otherwise be required under subsection (1). 2005, c. 6, s. 32 (1).

Application for permit

(2.1) The owner of property situated in a designated heritage conservation district may apply to the municipality for a permit to alter any part of the property other than the interior of a building or structure on the property or to erect, demolish or remove a building or structure on the property. 2005, c. 6, s. 32 (1).

Content of application

(2.2) An application under this section shall include such information as the council of the municipality may require. 2005, c. 6, s. 32 (1).

Notice of receipt

(3) The council, upon receipt of an application under this section together with such information as it may require under subsection (2), shall cause a notice of receipt to be served on the applicant. 2002, c. 18, Sched. F, s. 2 (26); 2005, c. 6, s. 32 (2).

Decision of council

(4) Within 90 days after the notice of receipt is served on the applicant under subsection (3) or within such longer period as is agreed upon by the applicant and the council, the council may give the applicant,

(a) the permit applied for;

(b) notice that the council is refusing the application for the permit; or

(c) the permit applied for, with terms and conditions attached. 2005, c. 6, s. 32 (3).

Consultation

(4.1) If the council of a municipality has established a municipal heritage committee under section 28, the council shall, before taking any action under subsection (4) with respect to an application to

demolish or remove any building or structure on property in a heritage conservation district, consult with its municipal heritage committee. 2005, c. 6, s. 32 (3).

Deemed permit

(5) If the council fails to do any of the things mentioned in subsection (4) within the time period mentioned in subsection (4), the council shall be deemed to have given the applicant the permit applied for. 2002, c. 18, Sched. F, s. 2 (26).

Appeal to Board

(6) If the council refuses the permit applied for or gives the permit with terms and conditions attached, the owner of the property may appeal to the Board. 2005, c. 6, s. 32 (4).

Notice of appeal

(7) To appeal to the Board, the owner must give a notice of appeal to the Board within 30 days after the owner receives notice that the council is refusing the application, or receives the permit with the terms and conditions attached, as the case may be. 2002, c. 18, Sched. F, s. 2 (26).

Board's powers

(8) The Board shall hear the appeal and shall,

(a) dismiss the appeal; or

(b) direct that the permit be issued without terms and conditions or with such terms and conditions as the Board by its order may direct. 2002, c. 18, Sched. F, s. 2 (26).

Transition, prior failure to give permit or notice

(9) If, on the day subsection 2 (26) of Schedule F to the *Government Efficiency Act, 2002* comes into force, an appeal to the Board, that was commenced under subsection 44 (1) of this Act as a result of the council's failure to make a decision within the period provided for in section 43 of this Act, has not been finally disposed of,

(a) subsection (5) of this section does not apply;

(b) despite its repeal by subsection 2 (26) of Schedule F to the *Government Efficiency Act, 2002*, subsection 44 (1) of this Act, as it read immediately before the day subsection 2 (26) of Schedule F to the *Government Efficiency Act, 2002* came into force, continues to apply to the appeal. 2002, c. 18, Sched. F, s. 2 (26).

Transition

(10) If, on or before the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, an owner of property situated in a designated heritage conservation district had applied to a municipality for a permit to demolish or remove a building or structure on the property and no decision had been made by the council of the municipality as of that day,

(a) the council's decision shall be made in accordance with subsection (4), as amended by subsection 32 (3) of the *Ontario Heritage Amendment Act, 2005*; and

(b) subsections (10) and (12), as they read immediately before the day *Ontario Heritage Amendment Act, 2005* received Royal Assent, do not apply if the council decides to refuse the application. 2005, c. 6, s. 32 (5).

Same

(11) If, on or before the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, an owner of property situated in a designated heritage conservation district had applied to a municipality for a permit to demolish or remove a building or structure on the property and the council of the municipality had refused the application under subsection (4), then, even though 180 days had elapsed since the date of the council's decision and the owner had complied with the requirements of clause (10) (b) or (12) (b), as they read immediately before that day,

(a) subsections (10) and (12), as they read immediately before the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, do not apply with respect to the refusal of the application; and

(b) the owner shall not demolish or remove the building or structure on the property. 2005, c. 6, s. 32 (5).

Same, exception

(12) Despite subsections (10) and (11), if, on the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, a situation described in subsection (11) existed and the owner of the property had not only prepared the property for the demolition or removal of a building or structure but was in the course of demolishing or removing the building or structure, then,

(a) subsections (10) and (12), as they read immediately before the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, continue to apply to the refusal of the application;

(b) the owner may continue the demolition or removal of the property; and

(c) section 43, as it read immediately before the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, continues to apply to the application. 2005, c. 6, s. 32 (5).

Transition, appeal to Board

(13) Within 90 days of the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, the owner of property situated in a heritage conservation district designated under section 41 who, before that day, had been refused an application to demolish or remove a building or structure from the property under subsection (4) by the council of a municipality, may appeal the decision to the Board if,

(a) the owner has lost his right to demolish or remove the building or structure 180 days after the day the council of the municipality refused the application under subsection (4) by virtue of subsection (11); and

(b) subsection (12) does not apply to the application. 2005, c. 6, s. 32 (5).

Notice of appeal

(14) An owner of property who wishes to appeal the decision of the council of a municipality under subsection (13) shall, within 90 days of the day the *Ontario Heritage Amendment Act, 2005* received Royal Assent, give notice of appeal to the Board and to the clerk of the municipality. 2005, c. 6, s. 32 (5).

Application

(15) Subsections (7) and (8) apply with necessary modification to an appeal under this section. 2005, c. 6, s. 32 (5).

Delegation

(16) The council of a municipality may delegate by by-law its power to grant permits for the alteration of property situated in a heritage conservation district designated under this Part to an employee or official of the municipality if the council has established a municipal heritage committee and consulted with it before the delegation. 2005, c. 6, s. 32 (6).

Same

(17) A by-law under subsection (16) may specify the alterations or classes of alterations in respect of which power to grant permits is delegated to the employee or official of the municipality. 2005, c. 6, s. 32 (6).

43. REPEALED: 2005, c. 6, s. 33.

44. REPEALED: 2005, c. 6, s. 33.

Application, ss. 36 to 39

45. Sections 36, 37, 38 and 39 apply in respect of any building or structure and the land appurtenant thereto that is situate within the area that has been designated by by-law under this Part as a heritage conservation district. R.S.O. 1990, c. O.18, s. 45.

Building standards by-law

45.1 (1) If a by-law passed under section 15.1 of the *Building Code Act, 1992* setting out standards for the maintenance of property in the municipality is in effect in a municipality, the council of the municipality may, by by-law,

(a) prescribe minimum standards for the maintenance of the heritage attributes of property situated in a heritage conservation district designated under this Part; and

(b) require property that is situated in a heritage conservation district designated under this Part and that does not comply with the standards to be repaired and maintained to conform with the standards. 2005, c. 6, s. 34.

Application

(2) Sections 15.2, 15.3, 15.4, 15.5 and 15.8 of the *Building Code Act, 1992* apply with necessary modifications to the enforcement of a by-law made under subsection (1). 2005, c. 6, s. 34.

Delegation

46. The council of a municipality that forms part of an upper-tier municipality may delegate its power under this Part to the council of the upper-tier municipality. 2002, c. 17, Sched. F, Table.

PART VI
CONSERVATION OF RESOURCES OF ARCHAEOLOGICAL VALUE

Definitions, Part VI

47. In this Part,

"designated property" means property that is designated by the Minister under this Part; ("bien désigné")

"property" means real property, but does not include buildings or structures other than ruins, burial mounds, petroglyphs and earthworks. ("bien") R.S.O. 1990, c. O.18, s. 47.

Licence, activity on archaeological sites

48. (1) Subject to subsection (2), no person shall do any of the following unless the person applies to the Minister and is issued a licence under this Part that allows the person to carry out the activity in question:

1. Carry out archaeological fieldwork.
2. Knowing that a site is a marine or other archaeological site, within the meaning of the regulations, alter the site or remove an artifact or any other physical evidence of past human use or activity from the site.
3. With respect to a marine archaeological site that is prescribed by regulation,
   i. Dive within 500 metres of the site or within any other distance of the site as may be prescribed by regulation.
   ii. Operate within 500 metres of the site or within any other distance of the site as may be prescribed by regulation any type of submersible vehicle, including a remotely operated vehicle, autonomous underwater vehicle or submarine.
   iii. Operate within 500 metres of the site or within any other distance of the site as may be prescribed by regulation any type of equipment, machine, device or thing capable of being used to conduct a survey, whether towed or not, including a side scan sonar or a camera. 2002, c. 18, Sched. F, s. 2 (27); 2005, c. 6, s. 35; 2009, c. 33, Sched. 11, s. 6 (15).

No licence required

(2) A licence is not required if,

(a) the site is prescribed, or belongs to a class of sites prescribed, by the regulations;

(b) the activity undertaken can be classified as normal agricultural work or the routine maintenance of property; or

(c) the activity undertaken is prescribed, or belongs to a class of activities prescribed, by the regulations. 2002, c. 18, Sched. F, s. 2 (27).

Same

(3) A licence is not required under subsection (1) if,

(a) a licensee under this Part,

Options

(4) If submissions are received by the Minister under subsection (2), the Minister may,

(a) appoint a hearing officer to conduct a hearing with respect to the proposed amendment and make a written recommendation on it;

(b) refer the matter to the Ontario Municipal Board to conduct a hearing with respect to the proposed amendment and make a written recommendation on it; or

(c) after considering the submissions, approve the proposed amendment in whole or in part or make modifications to it and approve the amendment as modified or refuse the proposed amendment in whole or in part. 1994, c. 23, Sched. A, s. 7 (4).

Submissions received

8. (1) If submissions are received by the Minister within the time specified by the Minister under clause 6 (7) (a) or (b), the Minister may,

(a) appoint a hearing officer to conduct a hearing with respect to the proposed amendment and make a written recommendation on it;

(b) refer the matter to the Ontario Municipal Board to conduct a hearing with respect to the proposed amendment and make a written recommendation on it;

(c) after considering the submissions, approve the proposed amendment in whole or in part or make modifications to it and approve the amendment as modified; or

(d) after considering the submissions, propose to refuse the proposed amendment in whole or in part. 1994, c. 23, Sched. A, s. 8 (1).

Proposed refusal

(2) If the Minister proposes to refuse a requested amendment under clause (1) (d), subsections 7 (2) to (4) apply with necessary modifications to the refusal. 1994, c. 23, Sched. A, s. 8 (2).

Hearing officer

9. (1) If a hearing officer is appointed, the Minister shall fix the time and place for a hearing and shall require that notice be given to such persons and public bodies and in such manner as the Minister may determine. 1994, c. 23, Sched. A, s. 9 (1).

Time of hearing

(2) At least 30 days notice shall be given before the hearing is held. 1994, c. 23, Sched. A, s. 9 (2).

Procedures

(3) The hearing officer may adopt rules of procedure for the hearing. 1994, c. 23, Sched. A, s. 9 (3).

Protection from personal liability

(4) A hearing officer is not personally liable for anything done by him or her in good faith in the execution of his or her duty under this Act or for any neglect or default in the execution in good faith of his or her duty. 1994, c. 23, Sched. A, s. 9 (4).

Presentation at hearing

(5) At any hearing, the proposed amendment and the reasons for it shall be presented by,

(a) the Minister, if the Minister initiated the proposed amendment; or

(b) the applicant, if the applicant initiated the proposed amendment. 1994, c. 23, Sched. A, s. 9 (5).

Report

(6) Not more than 30 days after the conclusion of the hearing or within such extended time as the Minister determines, the hearing officer shall make a written recommendation to the Minister and to the parties to the hearing recommending whether the Minister should approve the proposed amendment, in

whole or in part, make modifications and approve the amendment as modified or refuse the proposed amendment, in whole or in part, and giving reasons for the recommendation. 1994, c. 23, Sched. A, s. 9 (6).

Inspection

(7) The recommendation and the reasons for the recommendation of the hearing officer shall be made available to the public for inspection in the offices of the Ministry of Municipal Affairs and Housing, in the office of the clerk of each municipality or secretary-treasurer of the planning board which is within the area covered by the proposed amendment and in such other locations as the Minister determines. 1994, c. 23, Sched. A, s. 9 (7); 2002, c. 17, Sched. F, Table.

Hearing by O.M.B.

10. (1) If a matter is referred to the Ontario Municipal Board, it shall conduct a hearing. 1994, c. 23, Sched. A, s. 10 (1).

Notice

(2) Notice of the hearing shall be given to such persons or bodies and in such manner as the Board may determine and the Board shall make a written recommendation to the Minister stating whether the Minister should approve the proposed amendment, in whole or in part, make modifications and approve the amendment as modified or refuse the proposed amendment, in whole or in part, and giving reasons for the recommendation. 1994, c. 23, Sched. A, s. 10 (2).

Decision of the Minister

11. After considering the submissions and comments received and the recommendation of the hearing officer or the Ontario Municipal Board, the Minister may approve the proposed amendment, in whole or in part, make modifications and approve the amendment as modified or refuse the amendment, in whole or in part. 1994, c. 23, Sched. A, s. 11.

Notice of decision

12. The Minister shall forward a copy of his or her decision to the clerk of each municipality or secretary-treasurer of each planning board which is within the area covered by the proposed amendment, the parties to the hearing and such other persons or public bodies as the Minister may determine. 1994, c. 23, Sched. A, s. 12.

By-laws, etc., to conform to plan

13. Despite any other Act, if a development plan is in effect,

(a) no municipality or local board as defined in the *Municipal Affairs Act* having jurisdiction over the area covered by the plan or in any part of it and no ministry shall undertake any public work, any improvement of a structural nature or any other undertaking within the area covered by the development plan that conflicts with the plan; and

(b) no municipality or planning board having jurisdiction in such area shall pass a by-law for any purpose that conflicts with the plan. 1994, c. 23, Sched. A, s. 13; 2002, c. 17, Sched. F, Table.

Conflicts

14. Despite any other Act, if there is a conflict between a development plan and an official plan or zoning by-law covering part or all of the same area, the development plan prevails. 1994, c. 23, Sched. A, s. 14.

Resolutions of conflicts

15. (1) If, in the opinion of the Minister, an official plan or a zoning by-law is in conflict with a development plan that covers, in whole or in part, the same area, the Minister shall advise the council of the municipality or the planning board that adopted the official plan or that passed the zoning by-law of the particulars of the conflict and shall invite the municipality or the planning board to submit, within such time as the Minister specifies, proposals for the resolution of the conflict. 1994, c. 23, Sched. A, s. 15 (1).

Power to amend local plan

(2) If the council of a municipality or the planning board fails to submit proposals to resolve the conflict within the time specified by the Minister or, if after consultation with the Minister on such proposals, the conflict cannot be resolved and the Minister so notifies the council or the board in writing, the Minister may by order amend the official plan to make it conform to the development plan. 1994, c. 23, Sched. A, s. 15 (2).

Effect of order

(3) An order under subsection (2) shall have the same effect as though it were an amendment to the official plan adopted by the council of the municipality or the planning board and approved by the appropriate approval authority. 1994, c. 23, Sched. A, s. 15 (3).

Not regulation

(4) An order under subsection (2) is not a regulation within the meaning of Part III (Regulations) of the *Legislation Act, 2006*. 1994, c. 23, Sched. A, s. 15 (4); 2006, c. 21, Sched. F, s. 136 (1).

Official plan or zoning by-law required

16. (1) If a development plan is in effect in a municipality or any part of it and the municipality does not have an official plan in effect or has not passed a zoning by-law covering the municipality or that part of the municipality covered by the development plan, the council of the municipality, upon being notified in writing by the Minister, shall, within such time as is specified in the notice, prepare and adopt a plan for approval as an official plan or pass a zoning by-law that conforms to the development plan and submit the plan for approval. 1994, c. 23, Sched. A, s. 16 (1).

Official plan or zoning by-law required

(2) If a development plan is in effect in a planning area or any part of it and the planning board does not have an official plan in effect or has not passed a zoning by-law covering that part of the planning area consisting of territory without municipal organization that is covered by the development plan, the planning board, upon being notified in writing by the Minister, shall, within such time as is specified in the notice, prepare and adopt a plan for approval as an official plan or pass a zoning by-law that conforms to the development plan and submit the plan for approval. 1994, c. 23, Sched. A, s. 16 (2).

Minister's order

17. (1) The Minister may, in respect of any land in the area covered by a development plan, make orders exercising any of the powers conferred upon the Minister under clause 47 (1) (a) and subsection 47 (2) of the *Planning Act*. 1994, c. 23, Sched. A, s. 17 (1).

Same

(2) Section 3 of the *Planning Act* does not apply to an order under subsection (1) and an order need not conform to an official plan in effect in the area covered by the order. 1994, c. 23, Sched. A, s. 17 (2).

Zoning orders

18. Nothing in this Act derogates from the power of the Minister to make an order under section 47 of the *Planning Act* even if there is a development plan in effect in the area to be covered by the order. 1994, c. 23, Sched. A, s. 18.

Power to acquire land

19. (1) For the purpose of developing any feature of a development plan, the Minister may, in the name of Her Majesty, acquire by purchase, lease or otherwise or, subject to the *Expropriations Act*, expropriate any land or interest in it within the area covered by the plan and sell, lease or otherwise dispose of any such land or interest. 1994, c. 23, Sched. A, s. 19 (1).

Designated minister

(2) The Lieutenant Governor in Council may designate any minister of the Crown to have responsibility over any land acquired under subsection (1) and the minister so designated may, for the purpose of developing any feature of the development plan,

(a) clear, grade or otherwise prepare the land for development or construct, repair or improve buildings, works and facilities on it; or

(b) sell, lease or otherwise dispose of any of the land or interest in it. 1994, c. 23, Sched. A, s. 19 (2).

Financial assistance

20. If a development plan is in effect, the Minister may provide financial assistance to any person, organization or corporation, including a municipal corporation or a planning board, undertaking any policy or program that implements the plan, including expenditures incurred in preparing a plan for adoption as an official plan, an official plan amendment or a zoning by-law. 1994, c. 23, Sched. A, s. 20.

Regulations

21. The Minister may make regulations prescribing information and material that must be submitted in an application to amend any development plan. 1994, c. 23, Sched. A, s. 21.

Transition, Parkway Belt Plan

22. (1) The Parkway Belt Plan, also known as the Parkway Belt West Plan, shall be deemed to be a plan under this Act. 1994, c. 23, Sched. A, s. 22 (1).

Applications continued

(2) An application for an amendment to the Parkway Belt Plan, also known as the Parkway Belt West Plan, shall be deemed to have been made and shall be continued under this Act. 1994, c. 23, Sched. A, s. 22 (2).

Land use regulations

(3) A land use regulation made under section 4 of the *Parkway Belt Planning and Development Act* shall be deemed to be an order under section 17. 1994, c. 23, Sched. A, s. 22 (3).

Amendments

(4) An application for an amendment to a land use regulation made under section 4 of the *Parkway Belt Planning and Development Act* shall be deemed to have been made and shall be continued under section 17. 1994, c. 23, Sched. A, s. 22 (4).

Development planning areas

(5) A development planning area established under the *Parkway Belt Planning and Development Act* shall be deemed to be a development planning area under this Act. 1994, c. 23, Sched. A, s. 22 (5).

Proposed development plan

(6) A proposed development plan commenced under the *Ontario Planning and Development Act* (R.S.O. 1990, c. O.35) shall be continued under this Act. 1994, c. 23, Sched. A, s. 22 (6).

Amendments to the Parkway Belt Plan

22.1 (1) On the day section 27 of the *Greenbelt Act, 2005* comes into force,

(a) the Parkway Belt Plan, also known as the Parkway Belt West Plan, referred to in section 22 shall cease to apply to the lands that are part of the Niagara Escarpment Planning Area and described in paragraphs 26, 30, 31 and 33 of the Schedule to Regulation 684 of the Revised Regulations of Ontario, 1980 (as the Schedule read on December 31, 1990); and

(b) the provisions of the Parkway Belt Plan, also known as the Parkway Belt West Plan, that describe the lands to which the Plan applies shall be deemed not to refer to the lands referred to in clause (a). 2005, c. 1, s. 27.

Non-application

leased or otherwise disposed of unless the person or authority to whom it is disposed of enters into a written agreement with the municipality that the person or authority will keep and maintain the land and building and the use thereof in conformity with the community improvement plan until such a by-law or amending by-law is in force, but the municipality may, during the period of the development of the plan, lease any land or any building or part thereof in the area for any purpose, whether or not in conformity with the community improvement plan, for a term of not more than three years at any one time. R.S.O. 1990, c. P.13, s. 28 (10).

Registration of agreement

(11) An agreement concerning a grant or loan made under subsection (7) or an agreement entered into under subsection (10), may be registered against the land to which it applies and the municipality shall be entitled to enforce the provisions thereof against any party to the agreement and, subject to the provisions of the *Registry Act* and the *Land Titles Act*, against any and all subsequent owners or tenants of the land. R.S.O. 1990, c. P.13, s. 28 (11); 2006, c. 23, s. 14 (10).

Debentures

(12) Despite subsection 408 (3) of the *Municipal Act, 2001* or any regulation under section 256 of the *City of Toronto Act, 2006*, debentures issued by the municipality for the purpose of this section may be for such term of years as the debenture by-law, with the approval of the Municipal Board, provides. 2002, c. 17, Sched. B, s. 9; 2006, c. 32, Sched. C, s. 47 (4).

Dissolution of area

(13) When the council is satisfied that the community improvement plan has been carried out, the council may, by by-law, dissolve the community improvement project area. R.S.O. 1990, c. P.13, s. 28 (13).

Agreement re studies and development

29. (1) A municipality, with the approval of the Minister, may enter into agreement with any governmental authority or any agency thereof created by statute, for the carrying out of studies and the preparation and implementation of plans and programs for the development or improvement of the municipality.

Where approval of Minister not required

(2) Despite subsection (1), a municipality may enter into agreement with one or more other municipalities under subsection (1) without the approval of the Minister. R.S.O. 1990, c. P.13, s. 29.

Agreements for grants in aid of community improvement

30. The Minister, with the approval of the Lieutenant Governor in Council, and a municipality may enter into agreement providing for payment to the municipality on such terms and conditions and in such amounts as may be approved by the Lieutenant Governor in Council to assist in the community improvement of a community improvement project area as defined in section 28, including the carrying out of studies for the purpose of selecting areas for community improvement. R.S.O. 1990, c. P.13, s. 30.

31. REPEALED: 1997, c. 24, s. 226 (1).

Note: Despite the repeal of section 31, an order made under that section is continued as an order made under the corresponding provision of the *Building Code Act, 1992*. See: 1997, c. 24, ss. 226 (2), 228.

Grants or loans for repairs

32. (1) When a by-law under section 15.1 of the *Building Code Act, 1992* is in force in a municipality, the council of the municipality may pass a by-law for providing for the making of grants or loans to the registered owners or assessed owners of lands in respect of which an order has been made under subsection 15.2 (2) of that Act to pay for the whole or any part of the cost of the repairs required to be done, or of the clearing, grading and levelling of the lands, on such terms and conditions as the council may prescribe. R.S.O. 1990, c. P.13, s. 32 (1); 1997, c. 24, s. 226 (3).

Loans collected as taxes, lien on land

(2) The amount of any loan made under a by-law passed under this section, together with interest at a rate to be determined by the council, may be added by the clerk of the municipality to the collector's roll

and collected in like manner as municipal taxes over a period fixed by the council, and such amount and interest shall, until payment thereof, be a lien or charge upon the land in respect of which the loan has been made.

Registration of certificate

(3) A certificate signed by the clerk of the municipality setting out the amount loaned to any owner under a by-law passed under this section, including the rate of interest thereon, together with a description of the land in respect of which the loan has been made, sufficient for registration, shall be registered in the proper land registry office against the land, and, upon repayment in full to the municipality of the amount loaned and interest thereon, a certificate signed by the clerk of the municipality showing such repayment shall be similarly registered, and thereupon the lien or charge upon the land in respect of which the loan was made is discharged. R.S.O. 1990, c. P.13, s. 32 (2, 3).

Demolition control area

33. (1) In this section,

"dwelling unit" means any property that is used or designed for use as a domestic establishment in which one or more persons may sleep and prepare and serve meals; ("logement")

"residential property" means a building that contains one or more dwelling units, but does not include subordinate or accessory buildings the use of which is incidental to the use of the main building. ("immeuble d'habitation") R.S.O. 1990, c. P.13, s. 33 (1).

Establishment of demolition control area by by-law

(2) When a by-law under section 15.1 of the *Building Code Act, 1992* or a predecessor thereof is in force in a municipality or when a by-law prescribing standards for the maintenance and occupancy of property under any special Act is in force in a municipality, the council of the local municipality may by by-law designate any area within the municipality to which the standards of maintenance and occupancy by-law applies as an area of demolition control and thereafter no person shall demolish the whole or any part of any residential property in the area of demolition control unless the person is the holder of a demolition permit issued by the council under this section. R.S.O. 1990, c. P.13, s. 33 (2); 1997, c. 24, s. 226 (4).

Council may issue or refuse to issue permit

(3) Subject to subsection (6), where application is made to the council for a permit to demolish residential property, the council may issue the permit or refuse to issue the permit.

Appeal to O.M.B.

(4) Where the council refuses to issue the permit or neglects to make a decision thereon within thirty days after the receipt by the clerk of the municipality of the application, the applicant may appeal to the Municipal Board and the Board shall hear the appeal and either dismiss the same or direct that the demolition permit be issued, and the decision of the Board shall be final.

Notice of appeal

(5) The person appealing to the Municipal Board under subsection (4) shall, in such manner and to such persons as the Board may direct, give notice of the appeal to the Board.

Application for demolition permit where building permit issued

(6) Subject to subsection (7), the council shall, on application therefor, issue a demolition permit where a building permit has been issued to erect a new building on the site of the residential property sought to be demolished.

Conditions of demolition permit

(7) A demolition permit under subsection (6) may be issued on the condition that the applicant for the permit construct and substantially complete the new building to be erected on the site of the residential property proposed to be demolished by not later than such date as the permit specifies, such date being not less than two years from the day demolition of the existing residential property is commenced, and on the condition that on failure to complete the new building within the time specified in the permit, the clerk of the municipality shall be entitled to enter on the collector's roll, to be collected in like manner as municipal taxes, such sum of money as the permit specifies, but not in any case to exceed the sum of $20,000 for each dwelling unit contained in the residential property in respect of which the demolition

permit is issued and such sum shall, until payment thereof, be a lien or charge upon the land in respect of which the permit to demolish the residential property is issued.

Registration of notice

(8) Notice of any condition imposed under subsection (7) may be registered in the proper land registry office against the land to which it applies.

Registration of certificate

(9) Where the clerk of the municipality adds a sum of money to the collector's roll under subsection (7), a certificate signed by the clerk setting out the sum added to the roll, together with a description of the land in respect of which the sum has been added to the roll, sufficient for registration, shall be registered in the proper land registry office against the land, and upon payment in full to the municipality of the sum added to the roll, a certificate signed by the clerk of the municipality showing such payment shall be similarly registered, and thereupon the lien or charge upon the land in respect of which the sum was added to the roll is discharged.

Appeal to O.M.B.

(10) Where an applicant for a demolition permit under subsection (6) is not satisfied as to the conditions on which the demolition permit is proposed to be issued, the applicant may appeal to the Municipal Board for a variation of the conditions and, where an appeal is brought, the Board shall hear the appeal and may dismiss the same or may direct that the conditions upon which the permit shall be issued be varied in such manner as the Board considers appropriate, and the decision of the Board shall be final.

Application to council for relief from conditions of demolition permit

(11) Where a condition has been imposed under subsection (7) and the holder of the demolition permit considers that it is not possible to complete the new building within the time specified in the permit or where the holder of the permit is of the opinion that the construction of the new building has become not feasible on economic or other grounds, the permit holder may apply to the council of the municipality for relief from the conditions on which the permit was issued.

Notice of application

(12) Notice of application under subsection (11) shall be sent by registered mail to the clerk of the municipality not less than sixty days before the time specified in the permit for the completion of the new building and, where the council under subsection (14) extends the time for completion of the new building, application may similarly be made for relief by sending notice of application not less than sixty days before the expiry of the extended completion time.

Extension of time

(13) Despite subsection (12), the council may, at any time, extend the date specified in that subsection for the making of an application for relief from the conditions on which the permit was issued.

Powers of council on application

(14) Where an application is made under subsection (11), the council shall consider the application and may grant the same or may extend the time for completion of the new building for such period of time and on such terms and conditions as the council considers appropriate or the council may relieve the person applying from the requirement of constructing the new building.

Appeal to O.M.B.

(15) Any person who has made application to the council under subsection (11) may appeal from the decision of the council to the Municipal Board within twenty days of the mailing of the notice of the decision, or where the council refuses or neglects to make a decision thereon within thirty days after the receipt by the clerk of the application, the applicant may appeal to the Municipal Board and the Board shall hear the appeal and the Board on the appeal has the same powers as the council has under subsection (14) and the decision of the Board shall be final.

Offence

(16) Every person who demolishes a residential property, or any portion thereof, in contravention of subsection (2) is guilty of an offence and on conviction is liable to a fine of not more than $50,000 for

each dwelling unit contained in the residential property, the whole or any portion of which residential property has been demolished.

Standards for health and safety remain in force

(17) The provisions of any general or special Act and any by-law passed thereunder respecting standards relating to the health or safety of the occupants of buildings and structures remain in full force and effect in respect of residential property situate within an area of demolition control. R.S.O. 1990, c. P.13, s. 33 (3-17).

Certain proceedings stayed

(18) Subject to subsection (17), an application to the council for a permit to demolish any residential property operates as a stay to any proceedings that may have been initiated under any by-law under section 15.1 of the *Building Code Act, 1992* or a predecessor thereof or under any special Act respecting maintenance or occupancy standards in respect of the residential property sought to be demolished, until the council disposes of the application, or where an appeal is taken under subsection (4), until the Municipal Board has heard the appeal and issued its order thereon. R.S.O. 1990, c. P.13, s. 33 (18); 1997, c. 24, s. 226 (5).

Exemption re Building Code

(19) Where a permit to demolish residential property is obtained under this section, it is not necessary for the holder thereof to obtain the permit mentioned in subsection 8 (1) of the *Building Code Act, 1992*. R.S.O. 1990, c. P.13, s. 33 (19); 1997, c. 24, s. 226 (6).

PART V
LAND USE CONTROLS AND RELATED ADMINISTRATION

Zoning by-laws

34. (1) Zoning by-laws may be passed by the councils of local municipalities:

Restricting use of land

1. For prohibiting the use of land, for or except for such purposes as may be set out in the by-law within the municipality or within any defined area or areas or abutting on any defined highway or part of a highway.

Restricting erecting, locating or using of buildings

2. For prohibiting the erecting, locating or using of buildings or structures for or except for such purposes as may be set out in the by-law within the municipality or within any defined area or areas or upon land abutting on any defined highway or part of a highway.

Marshy lands, etc.

3. For prohibiting the erection of any class or classes of buildings or structures on land that is subject to flooding or on land with steep slopes, or that is rocky, low-lying, marshy, unstable, hazardous, subject to erosion or to natural or artificial perils.

Contaminated lands; sensitive or vulnerable areas

3.1 For prohibiting any use of land and the erecting, locating or using of any class or classes of buildings or structures on land,

i. that is contaminated,

ii. that contains a sensitive groundwater feature or a sensitive surface water feature, or

iii. that is within an area identified as a vulnerable area in a drinking water source protection plan that has taken effect under the *Clean Water Act, 2006*.

Natural features and areas

3.2 For prohibiting any use of land and the erecting, locating or using of any class or classes of buildings or structures within any defined area or areas,

i. that is a significant wildlife habitat, wetland, woodland, ravine, valley or area of natural and scientific interest,

ii. that is a significant corridor or shoreline of a lake, river or stream, or

iii. that is a significant natural corridor, feature or area.

Significant archaeological resources

3.3 For prohibiting any use of land and the erecting, locating or using of any class or classes of buildings or structures on land that is the site of a significant archaeological resource.

Construction of buildings or structures

4. For regulating the type of construction and the height, bulk, location, size, floor area, spacing, character and use of buildings or structures to be erected or located within the municipality or within any defined area or areas or upon land abutting on any defined highway or part of a highway, and the minimum frontage and depth of the parcel of land and the proportion of the area thereof that any building or structure may occupy.

Minimum elevation of doors, etc.

5. For regulating the minimum elevation of doors, windows or other openings in buildings or structures or in any class or classes of buildings or structures to be erected or located within the municipality or within any defined area or areas of the municipality.

Loading or parking facilities

6. For requiring the owners or occupants of buildings or structures to be erected or used for a purpose named in the by-law to provide and maintain loading or parking facilities on land that is not part of a highway. R.S.O. 1990, c. P.13, s. 34 (1); 1994, c. 23, s. 21 (1, 2); 1996, c. 4, s. 20 (1-3); 2006, c. 22, s. 115.

Pits and quarries

(2) The making, establishment or operation of a pit or quarry shall be deemed to be a use of land for the purposes of paragraph 1 of subsection (1). R.S.O. 1990, c. P.13, s. 34 (2).

Area, density and height

(3) The authority to regulate provided in paragraph 4 of subsection (1) includes and, despite the decision of any court, shall be deemed always to have included the authority to regulate the minimum area of the parcel of land mentioned therein and to regulate the minimum and maximum density and the minimum and maximum height of development in the municipality or in the area or areas defined in the by-law. 2006, c. 23, s. 15 (1).

City of Toronto

(3.1) Subsection (3) does not apply with respect to the City of Toronto. 2006, c. 23, s. 15 (2).

Interpretation

(4) A trailer as defined in subsection 164 (4) of the *Municipal Act, 2001* or subsection 3 (1) of the *City of Toronto Act, 2006*, as the case may be, and a mobile home as defined in subsection 46 (1) of this Act are deemed to be buildings or structures for the purpose of this section. 2006, c. 32, Sched. C, s. 47 (5).

Prohibition of use of land, etc., availability of municipal services

(5) A by-law passed under paragraph 1 or 2 of subsection (1) or a predecessor of that paragraph may prohibit the use of land or the erection or use of buildings or structures unless such municipal services as may be set out in the by-law are available to service the land, buildings or structures, as the case may be. R.S.O. 1990, c. P.13, s. 34 (5).

Certificates of occupancy

(6) A by-law passed under this section may provide for the issue of certificates of occupancy without which no change may be made in the type of use of any land covered by the by-law or of any building or structure on any such land, but no such certificate shall be refused if the proposed use is not prohibited by the by-law. R.S.O. 1990, c. P.13, s. 34 (6).

Use of maps

(7) Land within any area or areas or abutting on any highway or part of a highway may be defined by the use of maps to be attached to the by-law and the information shown on such maps shall form part of the by-law to the same extent as if included therein. R.S.O. 1990, c. P.13, s. 34 (7).

Acquisition and disposition of non-conforming lands

(8) The council may acquire any land, building or structure used or erected for a purpose that does not conform with a by-law passed under this section and any vacant land having a frontage or depth less than the minimum established for the erection of a building or structure in the defined area in which such land is situate, and the council may dispose of any of such land, building or structure or may exchange any of such land for other land within the municipality. R.S.O. 1990, c. P.13, s. 34 (8); 1996, c. 4, s. 20 (4).

Excepted lands and buildings

(9) No by-law passed under this section applies,

(a) to prevent the use of any land, building or structure for any purpose prohibited by the by-law if such land, building or structure was lawfully used for such purpose on the day of the passing of the by-law, so long as it continues to be used for that purpose; or

(b) to prevent the erection or use for a purpose prohibited by the by-law of any building or structure for which a permit has been issued under subsection 8 (1) of the *Building Code Act, 1992*, prior to the day of the passing of the by-law, so long as the building or structure when erected is used and continues to be used for the purpose for which it was erected and provided the permit has not been revoked under subsection 8 (10) of that Act. R.S.O. 1990, c. P.13, s. 34 (9); 2009, c. 33, Sched. 21, s. 10 (1).

By-law may be amended

(10) Despite any other provision of this section, any by-law passed under this section or a predecessor of this section may be amended so as to permit the extension or enlargement of any land, building or structure used for any purpose prohibited by the by-law if such land, building or structure continues to be used in the same manner and for the same purpose as it was used on the day such by-law was passed. R.S.O. 1990, c. P.13, s. 34 (10).

Consultation

(10.0.1) The council,

(a) shall permit applicants to consult with the municipality before submitting applications to amend by-laws passed under this section; and

(b) may, by by-law, require applicants to consult with the municipality as described in clause (a). 2006, c. 23, s. 15 (3).

Prescribed information

(10.1) A person or public body that applies for an amendment to a by-law passed under this section or a predecessor of this section shall provide the prescribed information and material to the council. 1996, c. 4, s. 20 (5).

Other information

(10.2) A council may require that a person or public body that applies for an amendment to a by-law passed under this section or a predecessor of this section provide any other information or material that the council considers it may need, but only if the official plan contains provisions relating to requirements under this subsection. 2006, c. 23, s. 15 (4).

Refusal and timing

(10.3) Until the council has received the information and material required under subsections (10.1) and (10.2), if any, and any fee under section 69,

(a) the council may refuse to accept or further consider the application for an amendment to the by-law; and

(b) the time period referred to in subsection (11) does not begin. 2006, c. 23, s. 15 (4).

Response re completeness of application

(10.4) Within 30 days after the person or public body that makes the application for an amendment to a by-law pays any fee under section 69, the council shall notify the person or public body that the information and material required under subsections (10.1) and (10.2), if any, have been provided, or that they have not been provided, as the case may be. 2006, c. 23, s. 15 (4).

Motion re dispute

(10.5) Within 30 days after a negative notice is given under subsection (10.4), the person or public body or the council may make a motion for directions to have the Municipal Board determine,

(a) whether the information and material have in fact been provided; or

(b) whether a requirement made under subsection (10.2) is reasonable. 2006, c. 23, s. 15 (4).

Same

(10.6) If the council does not give any notice under subsection (10.4), the person or public body may make a motion under subsection (10.5) at any time after the 30-day period described in subsection (10.4) has elapsed. 2006, c. 23, s. 15 (4).

Notice of particulars and public access

(10.7) Within 15 days after the council gives an affirmative notice under subsection (10.4), or within 15 days after the Municipal Board advises the clerk of its affirmative decision under subsection (10.5), as the case may be, the council shall,

(a) give the prescribed persons and public bodies, in the prescribed manner, notice of the application for an amendment to a by-law, accompanied by the prescribed information; and

(b) make the information and material provided under subsections (10.1) and (10.2) available to the public. 2006, c. 23, s. 15 (4).

Final determination

(10.8) The Municipal Board's determination under subsection (10.5) is not subject to appeal or review. 2006, c. 23, s. 15 (4).

Notice of refusal

(10.9) When a council refuses an application to amend its by-law, it shall, not later than 15 days after the day of the refusal, ensure that written notice of the refusal, containing the prescribed information, is given to,

(a) the person or public body that made the application;

(b) each person and public body that filed a written request to be notified of a refusal; and

(c) any prescribed person or public body. 2006, c. 23, s. 15 (4).

Appeal to O.M.B.

(11) Where an application to the council for an amendment to a by-law passed under this section or a predecessor of this section is refused or the council refuses or neglects to make a decision on it within 120 days after the receipt by the clerk of the application, any of the following may appeal to the Municipal Board by filing a notice of appeal with the clerk of the municipality:

1. The applicant.
2. The Minister. 2006, c. 23, s. 15 (5).

Consolidated Hearings Act

(11.0.1) Despite the *Consolidated Hearings Act*, the proponent of an undertaking shall not give notice to the Hearings Registrar under subsection 3 (1) of that Act in respect of an application for an amendment to a by-law unless the council has made a decision on the application or the time period referred to in subsection (11) has expired. 2006, c. 23, s. 15 (5).

Appeal to O.M.B.

(11.0.2) The Municipal Board shall hear the appeal under subsection (11) and shall,

(a) dismiss it;

(b) amend the by-law in such manner as the Board may determine; or

(c) direct that the by-law be amended in accordance with the Board's order. 2006, c. 23, s. 15 (5).

Time for filing certain appeals

(11.0.3) A notice of appeal under subsection (11) with respect to the refusal of an application shall be filed no later than 20 days after the day that the giving of notice under subsection (10.9) is completed. 2006, c. 23, s. 15 (5).

Appeals restricted re certain amendments

(11.0.4) Despite subsection (11), there is no appeal in respect of all or any part of an application for an amendment to a by-law if the amendment or part of the amendment proposes to implement,

(a) an alteration to all or any part of the boundary of an area of settlement; or

(b) a new area of settlement. 2006, c. 23, s. 15 (5).

Same

(11.0.5) Despite subsection (11), if the official plan contains policies dealing with the removal of land from areas of employment, there is no appeal in respect of all or any part of an application for an amendment to a by-law if the amendment or part of the amendment proposes to remove any land from an area of employment, even if other land is proposed to be added. 2006, c. 23, s. 15 (5).

Withdrawal of appeal

(11.1) If all appeals under subsection (11) are withdrawn, the secretary of the Municipal Board shall notify the clerk of the municipality and the decision of the council is final and binding or the council may proceed to give notice of the public meeting or pass or refuse to pass the by-law, as the case may be. 1999, c. 12, Sched. M, s. 25 (1).

Information and public meeting; open house in certain circumstances

(12) Before passing a by-law under this section, except a by-law passed pursuant to an order of the Municipal Board made under subsection (11.0.2) or (26),

(a) the council shall ensure that,

(i) sufficient information and material is made available to enable the public to understand generally the zoning proposal that is being considered by the council, and

(ii) at least one public meeting is held for the purpose of giving the public an opportunity to make representations in respect of the proposed by-law; and

(b) in the case of a by-law that is required by subsection 26 (9) or is related to a development permit system, the council shall ensure that at least one open house is held for the purpose of giving the public an opportunity to review and ask questions about the information and material made available under subclause (a) (i). 2006, c. 23, s. 15 (6); 2009, c. 33, Sched. 21, s. 10 (2).

Notice

(13) Notice of the public meeting required under subclause (12) (a) (ii) and of the open house, if any, required by clause (12) (b),

(a) shall be given to the prescribed persons and public bodies, in the prescribed manner; and

(b) shall be accompanied by the prescribed information. 2006, c. 23, s. 15 (6).

Timing of open house

(14) The open house required by clause (12) (b) shall be held no later than seven days before the public meeting required under subclause (12) (a) (ii) is held. 2006, c. 23, s. 15 (6).

Timing of public meeting

(14.1) The public meeting required under subclause (12) (a) (ii) shall be held no earlier than 20 days after the requirements for giving notice have been complied with. 2006, c. 23, s. 15 (6).

Participation in public meeting

(14.2) Every person who attends a public meeting required under subclause (12) (a) (ii) shall be given an opportunity to make representations in respect of the proposed by-law. 2006, c. 23, s. 15 (6).

Alternative procedure

(14.3) If an official plan sets out alternative measures for informing and securing the views of the public in respect of proposed zoning by-laws, and if those measures are complied with, subsections (12) to (14.2) do not apply to the proposed by-laws, but subsections (14.4) and (14.6) do apply. 2006, c. 23, s. 15 (6).

Open house

(14.4) If subsection (14.3) applies and the proposed by-law is required by subsection 26 (9) or is related to a development permit system,

(a) the council shall ensure that at least one open house is held for the purpose of giving the public an opportunity to review and ask questions about the proposed by-law; and

(b) if a public meeting is also held, the open house shall be held no later than seven days before the public meeting. 2006, c. 23, s. 15 (6).

Information

(14.5) At a public meeting under subclause (12) (a) (ii), the council shall ensure that information is made available to the public regarding who is entitled to appeal under subsections (11) and (19). 2006, c. 23, s. 15 (6).

Where alternative procedures followed

(14.6) If subsection (14.3) applies, the information required under subsection (14.5) shall be made available to the public at a public meeting or in the manner set out in the official plan for informing and securing the views of the public in respect of proposed zoning by-laws. 2006, c. 23, s. 15 (6).

Information to public bodies

(15) The council shall forward to such public bodies as the council considers may have an interest in the zoning proposal sufficient information to enable them to understand it generally and such information shall be forwarded not less than twenty days before passing a by-law implementing the proposal. R.S.O. 1990, c. P.13, s. 34 (15); 1994, c. 23, s. 21 (5).

Conditions

(16) If the official plan in effect in a municipality contains policies relating to zoning with conditions, the council of the municipality may, in a by-law passed under this section, permit a use of land or the erection, location or use of buildings or structures and impose one or more prescribed conditions on the use, erection or location. 2006, c. 23, s. 15 (7).

Same

(16.1) The prescribed conditions referred to in subsection (16) may be made subject to such limitations as may be prescribed. 2006, c. 23, s. 15 (7).

Same

(16.2) When a prescribed condition is imposed under subsection (16),

(a) the municipality may require an owner of land to which the by-law applies to enter into an agreement with the municipality relating to the condition;

(b) the agreement may be registered against the land to which it applies; and

(c) the municipality may enforce the agreement against the owner and, subject to the *Registry Act* and the *Land Titles Act*, any and all subsequent owners of the land. 2006, c. 23, s. 15 (7).

City of Toronto

(16.3) Subsections (16), (16.1) and (16.2) do not apply with respect to the City of Toronto. 2006, c. 23, s. 15 (8).

Further notice

(17) Where a change is made in a proposed by-law after the holding of the public meeting mentioned in subclause (12) (a) (ii), the council shall determine whether any further notice is to be given in respect of the proposed by-law and the determination of the council as to the giving of further notice is final and not subject to review in any court irrespective of the extent of the change made in the proposed by-law. R.S.O. 1990, c. P.13, s. 34 (17); 2006, c. 23, s. 15 (9).

Notice of passing of by-law

(18) If the council passes a by-law under this section, except a by-law passed pursuant to an order of the Municipal Board made under subsection (11.0.2) or (26), the clerk of the municipality shall give written notice of the passing of the by-law not later than 15 days after the day the by-law is passed in the manner and in the form and to the persons or public bodies prescribed and the notice shall contain the prescribed information. 1994, c. 23, s. 21 (7); 1996, c. 4, s. 20 (7); 2009, c. 33, Sched. 21, s. 10 (3).

Appeal to O.M.B.

(19) Not later than 20 days after the day that the giving of notice as required by subsection (18) is completed, any of the following may appeal to the Municipal Board by filing with the clerk of the municipality a notice of appeal setting out the objection to the by-law and the reasons in support of the objection, accompanied by the fee prescribed under the *Ontario Municipal Board Act*:

1. The applicant.
2. A person or public body who, before the by-law was passed, made oral submissions at a public meeting or written submissions to the council.
3. The Minister. 2006, c. 23, s. 15 (10).

No appeal re second unit policies

(19.1) Despite subsection (19), there is no appeal in respect of a by-law that gives effect to the policies described in subsection 16 (3), including, for greater certainty, no appeal in respect of any requirement or standard in such a by-law. 2011, c. 6, Sched. 2, s. 5.

When giving of notice deemed completed

(20) For the purposes of subsection (19), the giving of written notice shall be deemed to be completed,

(a) where notice is given by publication in a newspaper, on the day that such publication occurs;

(b) where notice is given by personal service, on the day that the serving of all required notices is completed;

(c) where notice is given by mail, on the day that the mailing of all required notices is completed; and

(d) where notice is given by telephone transmission of a facsimile of the notice, on the day that the transmission of all required notices is completed. R.S.O. 1990, c. P.13, s. 34 (20); 1994, c. 23, s. 21 (9).

When by-law deemed to have come into force

(21) When no notice of appeal is filed under subsection (19), the by-law shall be deemed to have come into force on the day it was passed except that where the by-law is passed under circumstances mentioned in subsection 24 (2) the by-law shall not be deemed to have come into force on the day it was passed until the amendment to the official plan comes into effect. R.S.O. 1990, c. P.13, s. 34 (21); 1994, c. 23, s. 21 (10); 1996, c. 4, s. 20 (8).

Affidavit re no appeal, etc.

(22) An affidavit or declaration of an employee of the municipality that notice was given as required by subsection (18) or that no notice of appeal was filed under subsection (19) within the time allowed for appeal shall be conclusive evidence of the facts stated therein. R.S.O. 1990, c. P.13, s. 34 (22); 1996, c. 4, s. 20 (9).

Record

(23) The clerk of a municipality who receives a notice of appeal under subsection (11) or (19) shall ensure that,

(a) a record that includes the prescribed information and material is compiled;

(b) the notice of appeal, record and fee are forwarded to the Municipal Board within 15 days after the last day for filing a notice of appeal under subsection (11.0.3) or (19), as the case may be; and

(c) such other information or material as the Municipal Board may require in respect of the appeal is forwarded to the Board. 2006, c. 23, s. 15 (11).

Withdrawal of appeals

(23.1) If all appeals to the Municipal Board under subsection (19) are withdrawn and the time for appealing has expired, the secretary of the Board shall notify the clerk of the municipality and the decision of the council is final and binding. 1993, c. 26, s. 53 (3).

Exception

(23.2) Despite clause (23) (b), if all appeals under subsection (19) are withdrawn within 15 days after the last day for filing a notice of appeal, the municipality is not required to forward the materials described under clauses (23) (b) and (c) to the Municipal Board. 1999, c. 12, Sched. M, s. 25 (2).

Decision final

(23.3) If all appeals to the Municipal Board under subsection (19) are withdrawn within 15 days after the last day for filing a notice of appeal, the decision of the council is final and binding. 1999, c. 12, Sched. M, s. 25 (2).

Hearing and notice thereof

(24) On an appeal to the Municipal Board, the Board shall hold a hearing of which notice shall be given to such persons or bodies and in such manner as the Board may determine. R.S.O. 1990, c. P.13, s. 34 (24).

Restriction re adding parties

(24.1) Despite subsection (24), in the case of an appeal under subsection (11) that relates to all or part of an application for an amendment to a by-law that is refused, or in the case of an appeal under subsection (19), only the following may be added as parties:

1. A person or public body who satisfies one of the conditions set out in subsection (24.2).
2. The Minister. 2006, c. 23, s. 15 (12).

Same

(24.2) The conditions mentioned in paragraph 1 of subsection (24.1) are:

1. Before the by-law was passed, the person or public body made oral submissions at a public meeting or written submissions to the council.
2. The Municipal Board is of the opinion that there are reasonable grounds to add the person or public body as a party. 2006, c. 23, s. 15 (12).

New information and material at hearing

(24.3) This subsection applies if information and material that is presented at the hearing of an appeal described in subsection (24.1) was not provided to the municipality before the council made the decision that is the subject of the appeal. 2006, c. 23, s. 15 (12).

Same

(24.4) When subsection (24.3) applies, the Municipal Board may, on its own initiative or on a motion by the municipality or any party, consider whether the information and material could have materially affected the council's decision, and if the Board determines that it could have done so, it shall not be admitted into evidence until subsection (24.5) has been complied with and the prescribed time period has elapsed. 2006, c. 23, s. 15 (12).

Notice to council

(24.5) The Municipal Board shall notify the council that it is being given an opportunity to,

(a) reconsider its decision in light of the information and material; and

(b) make a written recommendation to the Board. 2006, c. 23, s. 15 (12).

Council's recommendation

(24.6) The Municipal Board shall have regard to the council's recommendation if it is received within the time period mentioned in subsection (24.4), and may but is not required to do so if it is received afterwards. 2006, c. 23, s. 15 (12).

Conflict with *SPPA*

(24.7) Subsections (24.1) to (24.6) apply despite the *Statutory Powers Procedure Act*. 2006, c. 23, s. 15 (12).

Dismissal without hearing

(25) Despite the *Statutory Powers Procedure Act* and subsections (11.0.2) and (24), the Municipal Board may dismiss all or part of an appeal without holding a hearing, on its own initiative or on the motion of any party, if,

(a) it is of the opinion that,

(i) the reasons set out in the notice of appeal do not disclose any apparent land use planning ground upon which the Board could allow all or part of the appeal,

(ii) the appeal is not made in good faith or is frivolous or vexatious,

(iii) the appeal is made only for the purpose of delay, or

(iv) the appellant has persistently and without reasonable grounds commenced before the Board proceedings that constitute an abuse of process;

(a.1) REPEALED: 2006, c. 23, s. 15 (15).

(b) the appellant has not provided written reasons for the appeal;

(c) the appellant has not paid the fee prescribed under the *Ontario Municipal Board Act*; or

(d) the appellant has not responded to a request by the Municipal Board for further information within the time specified by the Board. 1994, c. 23, s. 21 (11); 1996, c. 4, s. 20 (11, 12); 2006, c. 23, s. 15 (13-15); 2009, c. 33, Sched. 21, s. 10 (4).

Representation

(25.1) Before dismissing all or part of an appeal, the Municipal Board shall notify the appellant and give the appellant the opportunity to make representation on the proposed dismissal but this subsection does not apply if the appellant has not complied with a request made under clause (25) (d). 2000, c. 26, Sched. K, s. 5 (2).

Same

(25.1.1) Despite the *Statutory Powers Procedure Act* and subsections (11.0.2) and (24), the Municipal Board may, on its own initiative or on the motion of the municipality or the Minister, dismiss all or part of an appeal without holding a hearing if, in the Board's opinion, the application to which the appeal relates is substantially different from the application that was before council at the time of its decision. 2006, c. 23, s. 15 (16).

Dismissal

(25.2) Despite the *Statutory Powers Procedure Act*, the Municipal Board may dismiss all or part of an appeal after holding a hearing or without holding a hearing on the motion under subsection (25) or (25.1.1), as it considers appropriate. 2006, c. 23, s. 15 (17).

Powers of O.M.B.

(26) The Municipal Board may,

(a) dismiss the appeal; or

(b) allow the appeal in whole or in part and repeal the by-law in whole or in part or amend the by-law in such manner as the Board may determine or direct the council of the municipality to repeal the by-law in whole or in part or to amend the by-law in accordance with the Board's order. R.S.O. 1990, c. P.13, s. 34 (26).

Matters of provincial interest

(27) Where an appeal is made to the Municipal Board under subsection (11) or (19), the Minister, if he or she is of the opinion that a matter of provincial interest is, or is likely to be, adversely affected by the by-law, may so advise the Board in writing not later than 30 days before the day fixed by the Board for the hearing of the appeal and the Minister shall identify,

(a) the part or parts of the by-law by which the provincial interest is, or is likely to be, adversely affected; and

(b) the general basis for the opinion that a matter of provincial interest is, or is likely to be, adversely affected. 2004, c. 18, s. 6 (3).

No hearing or notice required

(28) The Minister is not required to give notice or to hold a hearing before taking any action under subsection (27). 2004, c. 18, s. 6 (3).

No order to be made

(29) If the Municipal Board has received notice from the Minister under subsection (27) and has made a decision on the by-law, the Board shall not make an order under subsection (11.0.2) or (26) in respect of the part or parts of the by-law identified in the notice. 2004, c. 18, s. 6 (3); 2009, c. 33, Sched. 21, s. 10 (5).

Action of L.G. in C.

(29.1) The Lieutenant Governor in Council may confirm, vary or rescind the decision of the Municipal Board in respect of the part or parts of the by-law identified in the notice and in doing so may repeal the by-law in whole or in part or amend the by-law in such a manner as the Lieutenant Governor in Council may determine. 2004, c. 18, s. 6 (3).

Coming into force

(30) If one or more appeals have been filed under subsection (19), the by-law does not come into force until all of such appeals have been withdrawn or finally disposed of, whereupon the by-law, except for those parts of it repealed or amended under subsection (26) or as are repealed or amended by the Lieutenant Governor in Council under subsection (29.1), shall be deemed to have come into force on the day it was passed. 1996, c. 4, s. 20 (13); 2004, c. 18, s. 6 (4).

Unappealed portions

(31) Despite subsection (30), before all of the appeals have been finally disposed of, the Municipal Board may make an order providing that any part of the by-law not in issue in the appeal shall be deemed to have come into force on the day the by-law was passed. 1993, c. 26, s. 53 (5).

Method

(32) The Municipal Board may make an order under subsection (31) on its own initiative or on the motion of any person or public body. 1993, c. 26, s. 53 (5); 1996, c. 4, s. 20 (14); 2006, c. 23, s. 15 (18).

Notice and hearing

(33) The Municipal Board may,

(a) dispense with giving notice of a motion under subsection (32) or require the giving of such notice of the motion as it considers appropriate; and

(b) make an order under subsection (31) after holding a hearing or without holding a hearing on the motion, as it considers appropriate. 1993, c. 26, s. 53 (5).

Notice

(34) Despite clause (33) (a), the Municipal Board shall give notice of a motion under subsection (32) to any person or public body who filed with the Board a written request to be notified if a motion is made. 1993, c. 26, s. 53 (5); 1994, c. 23, s. 21 (14).

No distinction on the basis of relationship

35. (1) REPEALED: 1996, c. 4, s. 21 (1).

No distinction on the basis of relationship

(2) The authority to pass a by-law under section 34, subsection 38 (1) or section 41 does not include the authority to pass a by-law that has the effect of distinguishing between persons who are related and persons who are unrelated in respect of the occupancy or use of a building or structure or a part of a building or structure, including the occupancy or use as a single housekeeping unit. 1994, c. 2, s. 43.

Provision of no effect

(3) A provision in a by-law passed under section 34, subsection 38 (1) or section 41 or in an order made under subsection 47 (1) is of no effect to the extent that it contravenes the restrictions described in subsection (2). 1994, c. 2, s. 43; 1996, c. 4, s. 21 (2).

(4) REPEALED: 1996, c. 4, s. 21 (3).

By-laws to give effect to second unit policies

35.1 (1) The council of each local municipality shall ensure that the by-laws passed under section 34 give effect to the policies described in subsection 16 (3). 2011, c. 6, Sched. 2, s. 6.

Regulations

(2) The Minister may make regulations,

(a) authorizing the use of residential units referred to in subsection 16 (3);

(b) establishing requirements and standards with respect to residential units referred to in subsection 16 (3). 2011, c. 6, Sched. 2, s. 6.

Regulation applies as zoning by-law

(3) A regulation under subsection (2) applies as though it is a by-law passed under section 34. 2011, c. 6, Sched. 2, s. 6.

Regulation prevails

(4) A regulation under subsection (2) prevails over a by-law passed under section 34 to the extent of any inconsistency, unless the regulation provides otherwise. 2011, c. 6, Sched. 2, s. 6.

Exception

(5) A regulation under subsection (2) may provide that a by-law passed under section 34 prevails over the regulation. 2011, c. 6, Sched. 2, s. 6.

Regulation may be general or particular

(6) A regulation under subsection (2) may be general or particular in its application and may be restricted to those municipalities or parts of municipalities set out in the regulation. 2011, c. 6, Sched. 2, s. 6.

Holding provision by-law

36. (1) The council of a local municipality may, in a by-law passed under section 34, by the use of the holding symbol "H" (or "h") in conjunction with any use designation, specify the use to which lands, buildings or structures may be put at such time in the future as the holding symbol is removed by amendment to the by-law. R.S.O. 1990, c. P.13, s. 36 (1).

Condition

(2) A by-law shall not contain the provisions mentioned in subsection (1) unless there is an official plan in effect in the local municipality that contains provisions relating to the use of the holding symbol mentioned in subsection (1). R.S.O. 1990, c. P.13, s. 36 (2).

Appeal to O.M.B.

(3) Where an application to the council for an amendment to the by-law to remove the holding symbol is refused or the council refuses or neglects to make a decision thereon within 120 days after receipt by the clerk of the application, the applicant may appeal to the Municipal Board and the Board shall hear the appeal and dismiss the same or amend the by-law to remove the holding symbol or direct that the by-law be amended in accordance with its order. R.S.O. 1990, c. P.13, s. 36 (3); 1994, c. 23, s. 22 (1); 2004, c. 18, s. 7 (1).

Matters of provincial interest

(3.1) Where an appeal is made to the Municipal Board under subsection (3), the Minister, if he or she is of the opinion that a matter of provincial interest is, or is likely to be, adversely affected by the by-law, may so advise the Board in writing not later than 30 days before the day fixed by the Board for the hearing of the appeal and the Minister shall identify,

(a) the part or parts of the by-law by which the provincial interest is, or is likely to be, adversely affected; and

(b) the general basis for the opinion that a matter of provincial interest is, or is likely to be, adversely affected. 2004, c. 18, s. 7 (2).

No hearing or notice required

(3.2) The Minister is not required to give notice or to hold a hearing before taking any action under subsection (3.1). 2004, c. 18, s. 7 (2).

No order to be made

(3.3) If the Municipal Board has received notice from the Minister under subsection (3.1) and has made a decision on the by-law, the Board shall not make an order under subsection (3) in respect of the part or parts of the by-law identified in the notice. 2004, c. 18, s. 7 (2).

Action of L.G. in C.

(3.4) The Lieutenant Governor in Council may confirm, vary or rescind the decision of the Municipal Board in respect of the part or parts of the by-law identified in the notice and in doing so may repeal the by-law in whole or in part or amend the by-law in such a manner as the Lieutenant Governor in Council may determine. 2004, c. 18, s. 7 (2).

Application of subss. 34 (10.7, 10.9-25.1)

(4) Subsections 34 (10.7) and (10.9) to (25.1) do not apply to an amending by-law passed by the council to remove the holding symbol, but the council shall, in the manner and to the persons and public bodies and containing the information prescribed, give notice of its intention to pass the amending by-law. R.S.O. 1990, c. P.13, s. 36 (4); 1994, c. 23, s. 22 (2); 1996, c. 4, s. 22; 2009, c. 33, Sched. 21, s. 10 (6).

Increased density, etc., provision by-law

37. (1) The council of a local municipality may, in a by-law passed under section 34, authorize increases in the height and density of development otherwise permitted by the by-law that will be permitted in return for the provision of such facilities, services or matters as are set out in the by-law.

Condition

(2) A by-law shall not contain the provisions mentioned in subsection (1) unless there is an official plan in effect in the local municipality that contains provisions relating to the authorization of increases in height and density of development.

Agreements

(3) Where an owner of land elects to provide facilities, services or matters in return for an increase in the height or density of development, the municipality may require the owner to enter into one or more agreements with the municipality dealing with the facilities, services or matters.

Registration of agreement

(4) Any agreement entered into under subsection (3) may be registered against the land to which it applies and the municipality is entitled to enforce the provisions thereof against the owner and, subject to the provisions of the *Registry Act* and the *Land Titles Act*, any and all subsequent owners of the land. R.S.O. 1990, c. P.13, s. 37.

Interim control by-law

38. (1) Where the council of a local municipality has, by by-law or resolution, directed that a review or study be undertaken in respect of land use planning policies in the municipality or in any defined area or areas thereof, the council of the municipality may pass a by-law (hereinafter referred to as an interim control by-law) to be in effect for a period of time specified in the by-law, which period shall not exceed one year from the date of the passing thereof, prohibiting the use of land, buildings or structures within

the municipality or within the defined area or areas thereof for, or except for, such purposes as are set out in the by-law.

Extension of period by-law in effect

(2) The council of the municipality may amend an interim control by-law to extend the period of time during which it will be in effect, provided the total period of time does not exceed two years from the date of the passing of the interim control by-law. R.S.O. 1990, c. P.13, s. 38 (1, 2).

Notice of passing of by-law

(3) No notice or hearing is required prior to the passing of a by-law under subsection (1) or (2) but the clerk of the municipality shall, in the manner and to the persons and public bodies and containing the information prescribed, give notice of a by-law passed under subsection (1) or (2) within thirty days of the passing thereof. R.S.O. 1990, c. P.13, s. 38 (3); 1994, c. 23, s. 23 (1).

Appeal to O.M.B.

(4) Any person or public body to whom notice of a by-law was given under subsection (3) may, within sixty days from the date of the passing of the by-law, appeal to the Municipal Board by filing with the clerk of the municipality a notice of appeal setting out the objection to the by-law and the reasons in support of the objection. R.S.O. 1990, c. P.13, s. 38 (4); 1994, c. 23, s. 23 (2).

Application

(5) If a notice of appeal is filed under subsection (4), subsections 34 (23) to (26) apply with necessary modifications to the appeal. 1996, c. 4, s. 23.

When prior zoning by-law again has effect

(6) Where the period of time during which an interim control by-law is in effect has expired and the council has not passed a by-law under section 34 consequent on the completion of the review or study within the period of time specified in the interim control by-law, or where an interim control by-law is repealed or the extent of the area covered thereby is reduced, the provisions of any by-law passed under section 34 that applied immediately prior to the coming into force of the interim control by-law again come into force and have effect in respect of all lands, buildings or structures formerly subject to the interim control by-law. R.S.O. 1990, c. P.13, s. 38 (6).

Where by-law appealed

(6.1) If the period of time during which an interim control by-law is in effect has expired and the council has passed a by-law under section 34 consequent on the completion of the review or study within the period of time specified in the interim control by-law, but there is an appeal of the by-law under subsection 34 (19), the interim control by-law continues in effect as if it had not expired until the date of the order of the Municipal Board or until the date of a notice issued by the secretary of the Board under subsection 34 (23.1) unless the interim control by-law is repealed. 1994, c. 23, s. 23 (3).

Prohibition

(7) Where an interim control by-law ceases to be in effect, the council of the municipality may not for a period of three years pass a further interim control by-law that applies to any lands to which the original interim control by-law applied.

Application of s. 34 (9)

(8) Subsection 34 (9) applies with necessary modifications to a by-law passed under subsection (1) or (2). R.S.O. 1990, c. P.13, s. 38 (7, 8).

Temporary use provisions

39. (1) The council of a local municipality may, in a by-law passed under section 34, authorize the temporary use of land, buildings or structures for any purpose set out therein that is otherwise prohibited by the by-law. R.S.O. 1990, c. P.13, s. 39 (1).

(1.1), (1.2) REPEALED: 2002, c. 17, Sched. B, s. 11 (1).

Area and time in effect

(2) A by-law authorizing a temporary use under subsection (1) shall define the area to which it applies and specify the period of time for which the authorization shall be in effect, which shall not exceed three years from the day of the passing of the by-law. 2002, c. 17, Sched. B, s. 11 (2).

Extension

(3) Despite subsection (2), the council may by by-law grant further periods of not more than three years each during which the temporary use is authorized. R.S.O. 1990, c. P.13, s. 39 (3).

Non-application of cl. 34 (9) (a)

(4) Upon the expiry of the period or periods of time mentioned in subsections (2) and (3), clause 34 (9) (a) does not apply so as to permit the continued use of the land, buildings or structures for the purpose temporarily authorized. R.S.O. 1990, c. P.13, s. 39 (4).

Garden suites

39.1 (1) As a condition to passing a by-law authorizing the temporary use of a garden suite under subsection 39 (1), the council may require the owner of the suite or any other person to enter into an agreement with the municipality dealing with such matters related to the temporary use of the garden suite as the council considers necessary or advisable, including,

(a) the installation, maintenance and removal of the garden suite;

(b) the period of occupancy of the garden suite by any of the persons named in the agreement; and

(c) the monetary or other form of security that the council may require for actual or potential costs to the municipality related to the garden suite. 2002, c. 17, Sched. B, s. 12; 2009, c. 33, Sched. 21, s. 10 (7).

Definition

(2) In this section,

"garden suite" means a one-unit detached residential structure containing bathroom and kitchen facilities that is ancillary to an existing residential structure and that is designed to be portable. 2002, c. 17, Sched. B, s. 12.

Area and time in effect

(3) Despite subsection 39 (2), a by-law authorizing the temporary use of a garden suite shall define the area to which it applies and specify the period of time for which the authorization shall be in effect, which shall not exceed 20 years from the day of the passing of the by-law. 2011, c. 6, Sched. 2, s. 7.

Extension

(4) Despite subsection (3), the council may by by-law grant further periods of not more than three years each during which the temporary use is authorized. 2002, c. 17, Sched. B, s. 12.

Non-application

(5) Upon the expiry of the period or periods of time mentioned in subsections (3) and (4), clause 34 (9) (a) does not apply so as to permit the continued use of the garden suite. 2002, c. 17, Sched. B, s. 12.

Agreement exempting owner from requirement to provide parking

40. (1) Where an owner or occupant of a building is required under a by-law of a local municipality to provide and maintain parking facilities on land that is not part of a highway, the council of the municipality and such owner or occupant may enter into an agreement exempting the owner or occupant, to the extent specified in the agreement, from the requirement of providing or maintaining the parking facilities. R.S.O. 1990, c. P.13, s. 40 (1).

Payment of money

(2) An agreement entered into under subsection (1) shall provide for the making of one or more payments of money to the municipality as consideration for the granting of the exemption and shall set forth the basis upon which such payment is calculated. R.S.O. 1990, c. P.13, s. 40 (2).

Special account

(3) All money received by a municipality under an agreement entered into under this section shall be paid into a special account and,

(a) the money in that account shall be applied for the same purposes as a reserve fund established under the *Municipal Act, 2001* or the *City of Toronto Act, 2006*, as the case may be;

(b) the money in that account may be invested in securities in which the municipality is permitted to invest under the *Municipal Act, 2001* or the *City of Toronto Act, 2006*, as the case may be;

(c) earnings derived from the investment of the money in the special account shall be paid into that account; and

(d) the auditor of the municipality, in the auditor's annual report, shall report on the activities and position of the account. 2002, c. 17, Sched. B, s. 13 (1); 2006, c. 32, Sched. C, s. 47 (6).

Registration of agreement

(4) An agreement entered into under this section may be registered in the proper land registry office against the land to which it applies and, when so registered, any money payable to the municipality under the agreement that has become due for payment shall have priority lien status as described in section 1 of the *Municipal Act, 2001* or section 3 of the *City of Toronto Act, 2006*, as the case may be. 2002, c. 17, Sched. B, s. 13 (2); 2006, c. 32, Sched. C, s. 47 (7).

Certificate

(5) When all money payable to the municipality under an agreement registered under subsection (4) has been paid, or such agreement has been terminated, the clerk of the municipality shall, at the request of the owner of the land, provide a certificate in a form registrable in the proper land registry office, certifying that the money has been paid or that the agreement has been terminated. R.S.O. 1990, c. P.13, s. 40 (5).

Site plan control area

41. (1) In this section,

"development" means the construction, erection or placing of one or more buildings or structures on land or the making of an addition or alteration to a building or structure that has the effect of substantially increasing the size or usability thereof, or the laying out and establishment of a commercial parking lot or of sites for the location of three or more trailers as defined in subsection 164 (4) of the *Municipal Act, 2001* or subsection 3 (1) of the *City of Toronto Act, 2006*, as the case may be, or of sites for the location of three or more mobile homes as defined in subsection 46 (1) of this Act or of sites for the construction, erection or location of three or more land lease community homes as defined in subsection 46 (1) of this Act. R.S.O. 1990, c. P.13, s. 41 (1); 1994, c. 4, s. 14; 2002, c. 17, Sched. B, s. 14 (1); 2006, c. 32, Sched. C, s. 47 (8).

Exception

(1.1) The definition of "development" in subsection (1) does not include the placement of a portable classroom on a school site of a district school board if the school site was in existence on January 1, 2007. 2006, c. 23, s. 16 (1).

Establishment of site plan control area

(2) Where in an official plan an area is shown or described as a proposed site plan control area, the council of the local municipality in which the proposed area is situate may, by by-law, designate the whole or any part of such area as a site plan control area. R.S.O. 1990, c. P.13, s. 41 (2).

Designation of site plan control area

(3) A by-law passed under subsection (2) may designate a site plan control area by reference to one or more land use designations contained in a by-law passed under section 34. R.S.O. 1990, c. P.13, s. 41 (3).

Consultation

(3.1) The council,

(a) shall permit applicants to consult with the municipality before submitting plans and drawings for approval under subsection (4); and

(b) may, by by-law, require applicants to consult with the municipality as described in clause (a). 2006, c. 23, s. 16 (2).

Approval of plans or drawings

(4) No person shall undertake any development in an area designated under subsection (2) unless the council of the municipality or, where a referral has been made under subsection (12), the Municipal Board has approved one or both, as the council may determine, of the following:

1. Plans showing the location of all buildings and structures to be erected and showing the location of all facilities and works to be provided in conjunction therewith and of all facilities and works required under clause (7) (a), including facilities designed to have regard for accessibility for persons with disabilities.
2. Drawings showing plan, elevation and cross-section views for each building to be erected, except a building to be used for residential purposes containing less than twenty-five dwelling units, which drawings are sufficient to display,
   (a) the massing and conceptual design of the proposed building;
   (b) the relationship of the proposed building to adjacent buildings, streets, and exterior areas to which members of the public have access;
   (c) the provision of interior walkways, stairs, elevators and escalators to which members of the public have access from streets, open spaces and interior walkways in adjacent buildings;
   (d) matters relating to exterior design, including without limitation the character, scale, appearance and design features of buildings, and their sustainable design, but only to the extent that it is a matter of exterior design, if an official plan and a by-law passed under subsection (2) that both contain provisions relating to such matters are in effect in the municipality;
   (e) the sustainable design elements on any adjoining highway under a municipality's jurisdiction, including without limitation trees, shrubs, hedges, plantings or other ground cover, permeable paving materials, street furniture, curb ramps, waste and recycling containers and bicycle parking facilities, if an official plan and a by-law passed under subsection (2) that both contain provisions relating to such matters are in effect in the municipality; and
   (f) facilities designed to have regard for accessibility for persons with disabilities. R.S.O. 1990, c. P.13, s. 41 (4); 2002, c. 9, s. 56 (1); 2006, c. 23, s. 16 (3, 4); 2009, c. 33, Sched. 21, s. 10 (9).

Exclusions from site plan control

(4.1) The following matters relating to buildings described in paragraph 2 of subsection (4) are not subject to site plan control:

1. Interior design.
2. The layout of interior areas, excluding interior walkways, stairs, elevators and escalators referred to in subparagraph 2 (c) of subsection (4).
3. The manner of construction and standards for construction. 2006, c. 23, s. 16 (5).

Dispute about scope of site plan control

(4.2) The owner of land or the municipality may make a motion for directions to have the Municipal Board determine a dispute about whether a matter referred to in paragraph 1 or 2 of subsection (4) is subject to site plan control. 2006, c. 23, s. 16 (5).

Final determination

(4.3) The Municipal Board's determination under subsection (4.2) is not subject to appeal or review. 2006, c. 23, s. 16 (5).

Drawings for residential buildings

(5) Despite the exception provided in paragraph 2 of subsection (4), the council of the municipality may require the drawings mentioned therein for a building to be used for residential purposes containing less than twenty-five dwelling units if the proposed building is to be located in an area specifically designated in the official plan mentioned in subsection (2) as an area wherein such drawings may be required. R.S.O. 1990, c. P.13, s. 41 (5).

Proviso

(6) Nothing in this section shall be deemed to confer on the council of the municipality power to limit the height or density of buildings to be erected on the land. R.S.O. 1990, c. P.13, s. 41 (6).

Conditions to approval of plans

(7) As a condition to the approval of the plans and drawings referred to in subsection (4), a municipality may require the owner of the land to,

(a) provide to the satisfaction of and at no expense to the municipality any or all of the following:

1. Subject to the provisions of subsections (8) and (9), widenings of highways that abut on the land.
2. Subject to the *Public Transportation and Highway Improvement Act*, facilities to provide access to and from the land such as access ramps and curbings and traffic direction signs.
3. Off-street vehicular loading and parking facilities, either covered or uncovered, access driveways, including driveways for emergency vehicles, and the surfacing of such areas and driveways.
4. Walkways and walkway ramps, including the surfacing thereof, and all other means of pedestrian access.

4.1 Facilities designed to have regard for accessibility for persons with disabilities.

5. Facilities for the lighting, including floodlighting, of the land or of any buildings or structures thereon.
6. Walls, fences, hedges, trees, shrubs or other groundcover or facilities for the landscaping of the lands or the protection of adjoining lands.
7. Vaults, central storage and collection areas and other facilities and enclosures for the storage of garbage and other waste material.
8. Easements conveyed to the municipality for the construction, maintenance or improvement of watercourses, ditches, land drainage works, sanitary sewage facilities and other public utilities of the municipality or local board thereof on the land.
9. Grading or alteration in elevation or contour of the land and provision for the disposal of storm, surface and waste water from the land and from any buildings or structures thereon;

(b) maintain to the satisfaction of the municipality and at the sole risk and expense of the owner any or all of the facilities or works mentioned in paragraphs 2, 3, 4, 5, 6, 7, 8 and 9 of clause (a), including the removal of snow from access ramps and driveways, parking and loading areas and walkways;

(c) enter into one or more agreements with the municipality dealing with and ensuring the provision of any or all of the facilities, works or matters mentioned in clause (a) or (d) and the maintenance thereof as mentioned in clause (b) or with the provision and approval of the plans and drawings referred to in subsection (4);

(c.1) enter into one or more agreements with the municipality ensuring that development proceeds in accordance with the plans and drawings approved under subsection (4);

(d) subject to subsection (9.1), convey part of the land to the municipality to the satisfaction of and at no expense to the municipality for a public transit right of way. R.S.O. 1990, c. P.13, s. 41 (7); 1996, c. 4, s. 24 (1, 2); 2006, c. 23, s. 16 (6, 7).

Where area is in upper-tier municipality

(8) If an area designated under subsection (2) is within an upper-tier municipality, plans and drawings in respect of any development proposed to be undertaken in the area shall not be approved until the upper-tier municipality has been advised of the proposed development and afforded a reasonable opportunity to require the owner of the land to,

(a) provide to the satisfaction of and at no expense to the upper-tier municipality any or all of the following:

(i) subject to subsection (9), widenings of highways that are under the jurisdiction of the upper-tier municipality and that abut on the land,

(ii) subject to the *Public Transportation and Highway Improvement Act*, where the land abuts a highway under the jurisdiction of the upper-tier municipality, facilities to provide access to and from the land such as access ramps and curbings and traffic direction signs,

(iii) where the land abuts a highway under the jurisdiction of the upper-tier municipality, offstreet vehicular loading and parking facilities, either covered or uncovered, access driveways, including driveways for emergency vehicles, and the surfacing of such areas and driveways,

(iv) where the land abuts a highway under the jurisdiction of the upper-tier municipality, grading or alteration in elevation or contour of the land in relation to the elevation of the highway and provision for the disposal of storm and surface water from the land,

(v) where the land abuts a highway under the jurisdiction of the upper-tier municipality, facilities designed to have regard for accessibility for persons with disabilities;

(b) enter into one or more agreements with the upper-tier municipality dealing with and ensuring the provision of any or all of the facilities, works or matters mentioned in clause (a) or (c) and the maintenance thereof at the sole risk and expense of the owner, including the removal of snow from access ramps and driveways and parking and loading areas;

(c) subject to subsection (9.1), convey part of the land to the upper-tier municipality to the satisfaction of and at no expense to the municipality for a public transit right of way. 2002, c. 17, Sched. B, s. 14 (2); 2006, c. 23, s. 16 (8).

Widening must be described in official plan

(9) An owner may not be required to provide a highway widening under paragraph 1 of clause (7) (a) or under paragraph 1 of clause (8) (a) unless the highway to be widened is shown on or described in an official plan as a highway to be widened and the extent of the proposed widening is likewise shown or described. R.S.O. 1990, c. P.13, s. 41 (9).

Limitation

(9.1) An owner of land may not be required to convey land under clause (7) (d) or (8) (c) unless the public transit right of way to be provided is shown on or described in an official plan. 1994, c. 23, s. 24 (3); 1996, c. 4, s. 24 (3).

Registration of agreements

(10) Any agreement entered into under clause (7) (c) or (c.1) or under clause (8) (b) may be registered against the land to which it applies and the municipality is entitled to enforce the provisions thereof against the owner and, subject to the provisions of the *Registry Act* and the *Land Titles Act*, any and all subsequent owners of the land. R.S.O. 1990, c. P.13, s. 41 (10); 2002, c. 17, Sched. B, s. 14 (3); 2006, c. 23, s. 16 (9).

Application of *Municipal Act, 2001* or *City of Toronto Act, 2006*

(11) Section 446 of the *Municipal Act, 2001* or section 386 of the *City of Toronto Act, 2006*, as the case may be, applies to any requirements made under clauses (7) (a) and (b) and to any requirements made under an agreement entered into under clause (7) (c) or (c.1). R.S.O. 1990, c. P.13, s. 41 (11); 2002, c. 17, Sched. B, s. 14 (4); 2006, c. 23, s. 16 (10); 2006, c. 32, Sched. C, s. 47 (9).

Appeal to O.M.B.

(12) If the municipality fails to approve the plans or drawings referred to in subsection (4) within 30 days after they are submitted to the municipality or if the owner of the land is not satisfied with any requirement made by the municipality under subsection (7) or by the upper-tier municipality under subsection (8) or with any part thereof, including the terms of any agreement required, the owner may require the plans or drawings or the unsatisfactory requirements, or parts thereof, including the terms of any agreement required, to be referred to the Municipal Board by written notice to the secretary of the Board and to the clerk of the municipality or upper-tier municipality, as appropriate. 2002, c. 17, Sched. B, s. 14 (5).

Hearing

(12.1) The Municipal Board shall hear and determine the matter in issue and determine the details of the plans or drawings and determine the requirements, including the provisions of any agreement required, and the decision of the Board is final. 2002, c. 17, Sched. B, s. 14 (5).

Classes of development, delegation

(13) Where the council of a municipality has designated a site plan control area under this section, the council may, by by-law,

(a) define any class or classes of development that may be undertaken without the approval of plans and drawings otherwise required under subsection (4) or (5); and

(b) delegate to either a committee of the council or to an appointed officer of the municipality identified in the by-law either by name or position occupied, any of the council's powers or authority under this section, except the authority to define any class or classes of development as mentioned in clause (a). R.S.O. 1990, c. P.13, s. 41 (13).

Proviso

(14) Section 35a of *The Planning Act*, being chapter 349 of the Revised Statutes of Ontario, 1970, as it existed on the 21st day of June, 1979, shall be deemed to continue in force in respect of any by-law passed under that section on or before that day. R.S.O. 1990, c. P.13, s. 41 (14).

Certain agreements declared valid and binding

(15) Every agreement entered into by a municipality after the 16th day of December, 1973 and before the 22nd day of June, 1979, to the extent that the agreement deals with facilities and matters mentioned in subsection 35a (2) of *The Planning Act*, being chapter 349 of the Revised Statutes of Ontario, 1970, as it existed on the 21st day of June, 1979, is hereby declared to be valid and binding. R.S.O. 1990, c. P.13, s. 41 (15).

City of Toronto

(16) This section does not apply to the City of Toronto, except for subsection (1.1), paragraph 1 of subsection (4), subparagraph 2 (f) of subsection (4) and paragraph 4.1 of clause (7) (a), which provisions apply with necessary modifications. 2006, c. 23, s. 16 (11).

Conveyance of land for park purposes

42. (1) As a condition of development or redevelopment of land, the council of a local municipality may, by by-law applicable to the whole municipality or to any defined area or areas thereof, require that land in an amount not exceeding, in the case of land proposed for development or redevelopment for commercial or industrial purposes, 2 per cent and in all other cases 5 per cent of the land be conveyed to the municipality for park or other public recreational purposes. R.S.O. 1990, c. P.13, s. 42 (1).

Definition

(2) For the purposes of subsection (3),

"dwelling unit" means any property that is used or designed for use as a domestic establishment in which one or more persons may sleep and prepare and serve meals. R.S.O. 1990, c. P.13, s. 42 (2).

Alternative requirement

(3) Subject to subsection (4), as an alternative to requiring the conveyance provided for in subsection (1), in the case of land proposed for development or redevelopment for residential purposes, the by-law may require that land be conveyed to the municipality for park or other public recreational purposes at a rate of one hectare for each 300 dwelling units proposed or at such lesser rate as may be specified in the by-law. R.S.O. 1990, c. P.13, s. 42 (3).

Official plan requirement

(4) The alternative requirement authorized by subsection (3) may not be provided for in a by-law passed under this section unless there is an official plan in effect in the local municipality that contains specific policies dealing with the provision of lands for park or other public recreational purposes and the use of the alternative requirement. R.S.O. 1990, c. P.13, s. 42 (4).

Use and sale of land

(5) Land conveyed to a municipality under this section shall be used for park or other public recreational purposes, but may be sold at any time. R.S.O. 1990, c. P.13, s. 42 (5).

Payment instead of conveyance

(6) The council of a local municipality may require the payment of money to the value of the land otherwise required to be conveyed under this section in lieu of the conveyance. 2006, c. 23, s. 17 (1).

No building without payment

(6.1) If a payment is required under subsection (6), no person shall construct a building on the land proposed for development or redevelopment unless the payment has been made or arrangements for the payment that are satisfactory to the council have been made. 2006, c. 23, s. 17 (1).

Redevelopment, reduction of payment

(6.2) If land in a local municipality is proposed for redevelopment, a part of the land meets sustainability criteria set out in the official plan and the conditions set out in subsection (6.3) are met, the council shall reduce the amount of any payment required under subsection (6) by the value of that part. 2006, c. 23, s. 17 (1).

Same

(6.3) The conditions mentioned in subsection (6.2) are:

1. The official plan contains policies relating to the reduction of payments required under subsection (6).
2. No land is available to be conveyed for park or other public recreational purposes under this section. 2006, c. 23, s. 17 (1).

Determination of value

(6.4) For the purposes of subsections (6) and (6.2), the value of the land shall be determined as of the day before the day the building permit is issued in respect of the development or redevelopment or, if more than one building permit is required for the development or redevelopment, as of the day before the day the first permit is issued. 2006, c. 23, s. 17 (1).

Where land conveyed

(7) If land has been conveyed or is required to be conveyed to a municipality for park or other public purposes or a payment of money in lieu of such conveyance has been received by the municipality or is owing to it under this section or a condition imposed under section 51.1 or 53, no additional conveyance or payment in respect of the land subject to the earlier conveyance or payment may be required by a municipality in respect of subsequent development or redevelopment unless,

(a) there is a change in the proposed development or redevelopment which would increase the density of development; or

(b) land originally proposed for development or redevelopment for commercial or industrial purposes is now proposed for development or redevelopment for other purposes. 1994, c. 23, s. 25.

Non-application

(8) Despite clauses 74.1 (2) (h) and (i), subsection (7) does not apply to land proposed for development or redevelopment if, before this subsection comes into force, the land was subject to a condition that land be conveyed to a municipality for park or other public purposes or that a payment of money in lieu of such conveyance be made under this section or under section 51 or 53. 1994, c. 23, s. 25.

Changes

(9) If there is a change under clause (7) (a) or (b), the land that has been conveyed or is required to be conveyed or the payment of money that has been received or that is owing, as the case may be, shall be included in determining the amount of land or payment of money in lieu of it that may subsequently be required under this section on the development, further development or redevelopment of the lands or part of them in respect of which the original conveyance or payment was made. 1994, c. 23, s. 25.

Disputes

(10) In the event of a dispute between a municipality and an owner of land on the value of land determined under subsection (6.4), either party may apply to the Municipal Board to have the value determined and the Board shall, in accordance as nearly as may be with the *Expropriations Act*, determine the value of the land and, if a payment has been made under protest under subsection (12), the Board may order that a refund be made to the owner. 1994, c. 23, s. 25; 2006, c. 23, s. 17 (2).

Same

(11) In the event of a dispute between a municipality and an owner of land as to the amount of land or payment of money that may be required under subsection (9), either party may apply to the Municipal Board and the Board shall make a final determination of the matter. 1994, c. 23, s. 25.

Payment under protest

(12) If there is a dispute between a municipality and the owner of land under subsection (10), the owner may pay the amount required by the municipality under protest and shall make an application to the Municipal Board under subsection (10) within 30 days of the payment of the amount. 1994, c. 23, s. 25.

Notice

(13) If an owner of land makes a payment under protest and an application to the Municipal Board under subsection (12), the owner shall give notice of the application to the municipality within 15 days after the application is made. 1994, c. 23, s. 25.

Park purposes

(14) The council of a municipality may include in its estimates an amount to be used for the acquisition of land to be used for park or other public recreational purposes and may pay into the fund provided for in subsection (15) that amount, and any person may pay any sum into the same fund. 1994, c. 23, s. 25.

Special account

(15) All money received by the municipality under subsections (6) and (14) and all money received on the sale of land under subsection (5), less any amount spent by the municipality out of its general funds in respect of the land, shall be paid into a special account and spent only for the acquisition of land to be used for park or other public recreational purposes, including the erection, improvement or repair of buildings and the acquisition of machinery for park or other public recreational purposes. 1994, c. 23, s. 25; 2009, c. 33, Sched. 21, s. 10 (10).

Investments

(16) The money in the special account may be invested in securities in which the municipality is permitted to invest under the *Municipal Act, 2001* or the *City of Toronto Act, 2006*, as the case may be, and the earnings derived from the investment of the money shall be paid into the special account, and the auditor in the auditor's annual report shall report on the activities and status of the account. 1994, c. 23, s. 25; 1996, c. 32, s. 82 (5); 2002, c. 17, Sched. B, s. 15; 2006, c. 32, Sched. C, s. 47 (10).

Application of subss. 34 (12-34)

43. (1) Subsections 34 (12) to (34) do not apply to a by-law that amends a by-law only to express a word, term or measurement in the by-law in a unit of measurement set out in Schedule I of the *Weights and Measures Act* (Canada) in accordance with the definitions set out in Schedule II of that Act and that,

(a) does not round any measurement so expressed further than to the next higher or lower multiple of 0.5 metres or 0.5 square metres, as the case may be; or

(b) does not vary by more than 5 per cent any measurement so expressed. R.S.O. 1990, c. P.13, s. 43 (1); 1993, c. 26, s. 55.

Effect of amendment that conforms with subs. (1)

(2) Any land, building or structure that otherwise conforms with a by-law passed under section 34 or a predecessor thereof or an order made by the Minister under section 47 or a predecessor thereof does not cease to conform with the by-law or order by reason only of an amendment to the by-law or order that conforms with subsection (1). R.S.O. 1990, c. P.13, s. 43 (2).

Committee of adjustment

44. (1) If a municipality has passed a by-law under section 34 or a predecessor of such section, the council of the municipality may by by-law constitute and appoint a committee of adjustment for the municipality composed of such persons, not fewer than three, as the council considers advisable. R.S.O. 1990, c. P.13, s. 44 (1).

Copy of by-law to Minister

(2) Where a by-law is passed under subsection (1), a certified copy of the by-law shall be sent to the Minister by registered mail by the clerk of the municipality within thirty days of the passing thereof. R.S.O. 1990, c. P.13, s. 44 (2).

Term of office

(3) The members of the committee who are not members of a municipal council shall hold office for the term of the council that appointed them and the members of the committee who are members of a municipal council shall be appointed annually. R.S.O. 1990, c. P.13, s. 44 (3).

Idem

(4) Members of the committee shall hold office until their successors are appointed, and are eligible for reappointment, and, where a member ceases to be a member before the expiration of his or her term, the council shall appoint another eligible person for the unexpired portion of the term. R.S.O. 1990, c. P.13, s. 44 (4).

Quorum

(5) Where a committee is composed of three members, two members constitute a quorum, and where a committee is composed of more than three members, three members constitute a quorum. R.S.O. 1990, c. P.13, s. 44 (5).

Vacancy not to impair powers

(6) Subject to subsection (5), a vacancy in the membership or the absence or inability of a member to act does not impair the powers of the committee or of the remaining members. R.S.O. 1990, c. P.13, s. 44 (6).

Chair

(7) The members of the committee shall elect one of themselves as chair, and, when the chair is absent through illness or otherwise, the committee may appoint another member to act as acting chair. R.S.O. 1990, c. P.13, s. 44 (7).

Secretary-treasurer, employees

(8) The committee shall appoint a secretary-treasurer, who may be a member of the committee, and may engage such employees and consultants as is considered expedient, within the limits of the money appropriated for the purpose. R.S.O. 1990, c. P.13, s. 44 (8).

Remuneration

(9) The members of the committee shall be paid such compensation as the council may provide. R.S.O. 1990, c. P.13, s. 44 (9).

Filing of documents, etc.

(10) The secretary-treasurer shall keep on file minutes and records of all applications and the decisions thereon and of all other official business of the committee, and section 253 of the *Municipal Act, 2001* or section 199 of the *City of Toronto Act, 2006*, as the case may be, applies with necessary modifications to such documents. R.S.O. 1990, c. P.13, s. 44 (10); 2002, c. 17, Sched. B, s. 16; 2006, c. 32, Sched. C, s. 47 (11).

Rules of procedure

(11) In addition to complying with the requirements of this Act, the committee shall comply with such rules of procedure as are prescribed. R.S.O. 1990, c. P.13, s. 44 (11).

Powers of committee

45. (1) The committee of adjustment, upon the application of the owner of any land, building or structure affected by any by-law that is passed under section 34 or 38, or a predecessor of such sections, or any person authorized in writing by the owner, may, despite any other Act, authorize such minor

variance from the provisions of the by-law, in respect of the land, building or structure or the use thereof, as in its opinion is desirable for the appropriate development or use of the land, building or structure, if in the opinion of the committee the general intent and purpose of the by-law and of the official plan, if any, are maintained. R.S.O. 1990, c. P.13, s. 45 (1); 2006, c. 23, s. 18 (1); 2009, c. 33, Sched. 21, s. 10 (11).

Restriction

(1.1) Subsection (1) does not allow the committee to authorize a minor variance from conditions imposed under subsection 34 (16) of this Act or under subsection 113 (2) of the *City of Toronto Act, 2006*. 2006, c. 23, s. 18 (2).

Other powers

(2) In addition to its powers under subsection (1), the committee, upon any such application,

(a) where any land, building or structure, on the day the by-law was passed, was lawfully used for a purpose prohibited by the by-law, may permit,

(i) the enlargement or extension of the building or structure, if the use that was made of the building or structure on the day the by-law was passed, or a use permitted under subclause (ii) continued until the date of the application to the committee, but no permission may be given to enlarge or extend the building or structure beyond the limits of the land owned and used in connection therewith on the day the by-law was passed, or

(ii) the use of such land, building or structure for a purpose that, in the opinion of the committee, is similar to the purpose for which it was used on the day the by-law was passed or is more compatible with the uses permitted by the by-law than the purpose for which it was used on the day the by-law was passed, if the use for a purpose prohibited by the by-law or another use for a purpose previously permitted by the committee continued until the date of the application to the committee; or

(b) where the uses of land, buildings or structures permitted in the by-law are defined in general terms, may permit the use of any land, building or structure for any purpose that, in the opinion of the committee, conforms with the uses permitted in the by-law. R.S.O. 1990, c. P.13, s. 45 (2).

Power of committee to grant minor variances

(3) A council that has constituted a committee of adjustment may by by-law empower the committee of adjustment to grant minor variances from the provisions of any by-law of the municipality that implements an official plan, or from such by-laws of the municipality as are specified and that implement an official plan, and when a committee of adjustment is so empowered subsection (1) applies with necessary modifications. R.S.O. 1990, c. P.13, s. 45 (3).

Time for hearing

(4) The hearing on any application shall be held within thirty days after the application is received by the secretary-treasurer. R.S.O. 1990, c. P.13, s. 45 (4).

Notice of hearing

(5) The committee, before hearing an application, shall in the manner and to the persons and public bodies and containing the information prescribed, give notice of the application. R.S.O. 1990, c. P.13, s. 45 (5); 1994, c. 23, s. 26 (1).

Hearing

(6) The hearing of every application shall be held in public, and the committee shall hear the applicant and every other person who desires to be heard in favour of or against the application, and the committee may adjourn the hearing or reserve its decision. R.S.O. 1990, c. P.13, s. 45 (6).

Oaths

(7) The chair, or in his or her absence the acting chair, may administer oaths. R.S.O. 1990, c. P.13, s. 45 (7).

Decision

(8) No decision of the committee on an application is valid unless it is concurred in by the majority of the members of the committee that heard the application, and the decision of the committee, whether

granting or refusing an application, shall be in writing and shall set out the reasons for the decision, and shall be signed by the members who concur in the decision. R.S.O. 1990, c. P.13, s. 45 (8).

Conditions in decision

(9) Any authority or permission granted by the committee under subsections (1), (2) and (3) may be for such time and subject to such terms and conditions as the committee considers advisable and as are set out in the decision. R.S.O. 1990, c. P.13, s. 45 (9).

Agreement re terms and conditions

(9.1) If the committee imposes terms and conditions under subsection (9), it may also require the owner of the land to enter into one or more agreements with the municipality dealing with some or all of the terms and conditions, and in that case the requirement shall be set out in the decision. 2006, c. 23, s. 18 (3).

Registration of agreement

(9.2) An agreement entered into under subsection (9.1) may be registered against the land to which it applies and the municipality is entitled to enforce the agreement against the owner and, subject to the *Registry Act* and the *Land Titles Act*, against any and all subsequent owners of the land. 2006, c. 23, s. 18 (3).

Notice of decision

(10) The secretary-treasurer shall not later than ten days from the making of the decision send one copy of the decision, certified by him or her,

(a) to the Minister, if the Minister has notified the committee by registered mail that he or she wishes to receive a copy of all decisions of the committee;

(b) to the applicant; and

(c) to each person who appeared in person or by counsel at the hearing and who filed with the secretary-treasurer a written request for notice of the decision,

together with a notice of the last day for appealing to the Municipal Board. R.S.O. 1990, c. P.13, s. 45 (10).

Additional material

(11) Where the secretary-treasurer is required to send a copy of the decision to the Minister under subsection (10), he or she shall also send to the Minister such other information and material as may be prescribed. R.S.O. 1990, c. P.13, s. 45 (11).

Appeal to O.M.B.

(12) The applicant, the Minister or any other person or public body who has an interest in the matter may within 20 days of the making of the decision appeal to the Municipal Board against the decision of the committee by filing with the secretary-treasurer of the committee a notice of appeal setting out the objection to the decision and the reasons in support of the objection accompanied by payment to the secretary-treasurer of the fee prescribed by the Municipal Board under the *Ontario Municipal Board Act* as payable on an appeal from a committee of adjustment to the Board. 1994, c. 23, s. 26 (2).

Idem

(13) The secretary-treasurer of a committee, upon receipt of a notice of appeal filed under subsection (12), shall forthwith forward the notice of appeal and the amount of the fee mentioned in subsection (12) to the Municipal Board by registered mail together with all papers and documents filed with the committee of adjustment relating to the matter appealed from and such other documents and papers as may be required by the Board. R.S.O. 1990, c. P.13, s. 45 (13).

Exception

(13.1) Despite subsection (13), if all appeals under subsection (12) are withdrawn within 15 days after the last day for filing a notice of appeal, the secretary-treasurer is not required to forward the materials described under subsection (13) to the Municipal Board. 1999, c. 12, Sched. M, s. 26.

Decision final

(13.2) If all appeals under subsection (12) are withdrawn within 15 days after the last day for filing a notice of appeal, the decision of the committee is final and binding and the secretary-treasurer of the committee shall notify the applicant and file a certified copy of the decision with the clerk of the municipality. 1999, c. 12, Sched. M, s. 26.

Where no appeal

(14) If within such 20 days no notice of appeal is given, the decision of the committee is final and binding, and the secretary-treasurer shall notify the applicant and shall file a certified copy of the decision with the clerk of the municipality. R.S.O. 1990, c. P.13, s. 45 (14); 1994, c. 23, s. 26 (3).

Where appeals withdrawn

(15) Where all appeals to the Municipal Board are withdrawn, the decision of the committee is final and binding and the secretary of the Board shall notify the secretary-treasurer of the committee who in turn shall notify the applicant and file a certified copy of the decision with the clerk of the municipality. R.S.O. 1990, c. P.13, s. 45 (15); 1994, c. 23, s. 26 (4).

Hearing

(16) On an appeal to the Municipal Board, the Board shall, except as provided in subsections (15) and (17), hold a hearing of which notice shall be given to the applicant, the appellant, the secretary-treasurer of the committee and to such other persons or public bodies and in such manner as the Board may determine. R.S.O. 1990, c. P.13, s. 45 (16); 1994, c. 23, s. 26 (5).

Dismissal without hearing

(17) Despite the *Statutory Powers Procedure Act* and subsection (16), the Municipal Board may dismiss all or part of an appeal without holding a hearing, on its own initiative or on the motion of any party, if,

(a) it is of the opinion that,

(i) the reasons set out in the notice of appeal do not disclose any apparent land use planning ground upon which the Board could allow all or part of the appeal,

(ii) the appeal is not made in good faith or is frivolous or vexatious,

(iii) the appeal is made only for the purpose of delay, or

(iv) the appellant has persistently and without reasonable grounds commenced before the Board proceedings that constitute an abuse of process;

(b) the appellant has not provided written reasons for the appeal;

(c) the appellant has not paid the fee prescribed under the *Ontario Municipal Board Act*; or

(d) the appellant has not responded to a request by the Municipal Board for further information within the time specified by the Board. 1994, c. 23, s. 26 (6); 2006, c. 23, s. 18 (4, 5).

Representation

(17.1) Before dismissing all or part of an appeal, the Municipal Board shall notify the appellant and give the appellant the opportunity to make representation on the proposed dismissal but this subsection does not apply if the appellant has not complied with a request made under clause (17) (d). 2000, c. 26, Sched. K, s. 5 (3).

Dismissal

(17.2) The Municipal Board may dismiss all or part of an appeal after holding a hearing or without holding a hearing on the motion under subsection (17), as it considers appropriate. 2000, c. 26, Sched. K, s. 5 (3).

Powers of O.M.B.

(18) The Municipal Board may dismiss the appeal and may make any decision that the committee could have made on the original application. R.S.O. 1990, c. P.13, s. 45 (18).

Amended application

(18.1) On an appeal, the Municipal Board may make a decision on an application which has been amended from the original application if, before issuing its order, written notice is given to the persons

and public bodies who received notice of the original application under subsection (5) and to other persons and agencies prescribed under that subsection. 1993, c. 26, s. 56; 1994, c. 23, s. 26 (7).

Exception

(18.1.1) The Municipal Board is not required to give notice under subsection (18.1) if, in its opinion, the amendment to the original application is minor. 1996, c. 4, s. 25 (1).

Notice of intent

(18.2) Any person or public body who receives notice under subsection (18.1) may, not later than thirty days after the day that written notice was given, notify the Board of an intention to appear at the hearing or the resumption of the hearing, as the case may be. 1993, c. 26, s. 56; 1994, c. 23, s. 26 (8).

Order

(18.3) If, after the expiry of the time period in subsection (18.2), no notice of intent has been received, the Board may issue its order. 1993, c. 26, s. 56.

Hearing

(18.4) If a notice of intent is received, the Board may hold a hearing or resume the hearing on the amended application or it may issue its order without holding a hearing or resuming the hearing. 1996, c. 4, s. 25 (2).

Notice of decision

(19) When the Municipal Board makes an order on an appeal, the secretary of the Board shall send a copy thereof to the applicant, the appellant and the secretary-treasurer of the committee. R.S.O. 1990, c. P.13, s. 45 (19).

Idem

(20) The secretary-treasurer shall file a copy of the order of the Municipal Board with the clerk of the municipality. R.S.O. 1990, c. P.13, s. 45 (20).

Mobile homes, land lease community homes

46. (1) In this section,

"land lease community home" means any dwelling that is a permanent structure where the owner of the dwelling leases the land used or intended for use as the site for the dwelling, but does not include a mobile home; ("maison de communauté de terrains à bail")

"mobile home" means any dwelling that is designed to be made mobile, and constructed or manufactured to provide a permanent residence for one or more persons, but does not include a travel trailer or tent trailer or trailer otherwise designed; ("maison mobile")

"parcel of land" means a lot or block within a registered plan of subdivision or any land that may be legally conveyed under the exemption provided in clause 50 (3) (b) or clause 50 (5) (a). ("parcelle de terrain") R.S.O. 1990, c. P.13, s. 46 (1); 1994, c. 4, s. 15 (1).

One mobile home per parcel of land

(2) Unless otherwise authorized by a by-law in force under section 34 or an order of the Minister made under clause 47 (1) (a), or a permit issued under section 13 of the *Public Lands Act*, no person shall erect or locate or use or cause to be erected, located or used, a mobile home except on a parcel of land as defined in subsection (1), and in no case except as otherwise so authorized shall any person erect, locate or use or cause to be erected, located or used more than one mobile home on any such parcel of land. R.S.O. 1990, c. P.13, s. 46 (2).

One land lease community home per parcel of land

(2.1) Unless otherwise authorized by a by-law in force under section 34 or an order of the Minister made under clause 47 (1) (a), or a permit issued under section 13 of the *Public Lands Act*, no person shall construct or erect or locate or use or cause to be constructed, erected, located or used a land lease community home except on a parcel of land as defined in subsection (1), and in no case except as otherwise so authorized shall any person construct, erect, locate or use or cause to be constructed, erected, located or used more than one land lease community home on any such parcel of land. 1994, c. 4, s. 15 (2).

Saving

(3) This section does not apply to prevent the continued use in the same location of any mobile home that,

(a) was erected or located and in use prior to the 1st day of June, 1977; or

(b) was erected or located in accordance with a building permit issued prior to the 1st day of June, 1977. R.S.O. 1990, c. P.13, s. 46 (3).

Same

(4) This section does not apply to prevent the continued use in the same location of any land lease community home that,

(a) was constructed, erected or located and in use prior to the day the *Land Lease Statute Law Amendment Act, 1994* receives Royal Assent; or

(b) was constructed, erected or located in accordance with a building permit issued prior to the day the *Land Lease Statute Law Amendment Act, 1994* receives Royal Assent. 1994, c. 4, s. 15 (3).

Power of Minister re zoning and subdivision control

47. (1) The Minister may by order,

(a) in respect of any land in Ontario, exercise any of the powers conferred upon councils by section 34, 38 or 39, but subsections 34 (11) to (34) do not apply to the exercise of such powers; and

(b) in respect of any land in Ontario, exercise the powers conferred upon councils by subsection 50 (4). R.S.O. 1990, c. P.13, s. 47 (1); 1994, c. 23, s. 27 (1).

Power of Minister to allow minor variances

(2) Where an order has been made under clause (1) (a), the Minister, in respect of the lands affected by the order, has all the powers in respect of such order as a committee of adjustment has under subsections 45 (1) and (2) in respect of a by-law passed under section 34, but subsections 45 (4) to (8) and (10) to (20) do not apply to the exercise by the Minister of such powers. R.S.O. 1990, c. P.13, s. 47 (2).

Order prevails over by-law in event of conflict

(3) In the event of a conflict between an order made under clause (1) (a) and a by-law that is in effect under section 34 or 38, or a predecessor thereof, the order prevails to the extent of such conflict, but in all other respects the by-law remains in full force and effect. R.S.O. 1990, c. P.13, s. 47 (3).

Deemed by-law of municipality

(4) The Minister may, in the order or by separate order, provide that all or part of an order made under clause (1) (a) and any amendments to it in respect of land in a municipality, the council of which has the powers conferred by section 34, shall be deemed for all purposes, except the purposes of section 24, to be and to always have been a by-law passed by the council of the municipality in which the land is situate. 2001, c. 9, Sched. J, s. 2 (1).

Notice

(5) No notice or hearing is required prior to the making of an order under subsection (1) but the Minister shall give notice of any such order within thirty days of the making thereof in such manner as the Minister considers proper and shall set out in the notice the provisions of subsections (8), (9) and (10). R.S.O. 1990, c. P.13, s. 47 (5).

Idem

(6) The Minister shall cause a duplicate or certified copy of an order made under clause (1) (a),

(a) where the land affected is situate in a local municipality, to be lodged in the office of the clerk of the municipality, or where the land affected is situate in two or more local municipalities, in the office of the clerk of each of such municipalities; and

(b) where the land affected is situate in territory without municipal organization, to be lodged in the proper land registry office, where it shall be made available to the public as a production. R.S.O. 1990, c. P.13, s. 47 (6); 2002, c. 17, Sched. B, s. 17.

Registration

(7) The Minister shall cause a certified copy or duplicate of an order made under clause (1) (b) to be registered in the proper land registry office. R.S.O. 1990, c. P.13, s. 47 (7).

Revocation or amendment

(8) The Minister may, on his or her own initiative or at the request of any person or public body, by order, amend or revoke in whole or in part any order made under subsection (1). R.S.O. 1990, c. P.13, s. 47 (8); 1994, c. 23, s. 27 (2).

Information

(8.1) A request under subsection (8) shall include the prescribed information and material and such other information or material as the Minister may require. 1993, c. 26, s. 57 (2).

Refusal to consider

(8.2) The Minister may refuse to accept or further consider a request under subsection (8) until the prescribed information and material and the required fee are received. 1994, c. 23, s. 27 (3).

Notice

(9) Except as provided in subsection (10), the Minister before amending or revoking in whole or in part an order made under subsection (1) shall give notice or cause to be given notice thereof in such manner as the Minister considers proper and shall allow such period of time as he or she considers appropriate for the submission of representations in respect thereof. R.S.O. 1990, c. P.13, s. 47 (9).

Hearing by O.M.B.

(10) Where an application is made to the Minister to amend or revoke in whole or in part any order made under subsection (1), the Minister may, and on the request of any person or public body shall, request the Municipal Board to hold a hearing on the application and thereupon the Board shall hold a hearing as to whether the order should be amended or revoked in whole or in part. R.S.O. 1990, c. P.13, s. 47 (10); 1994, c. 23, s. 27 (4).

Reasons

(10.1) A request for a hearing must set out the reasons for the request and be accompanied by the fee prescribed under the *Ontario Municipal Board Act*. 1994, c. 23, s. 27 (5).

Refusal to refer

(11) The Minister may refuse to refer a request under subsection (10) to the Municipal Board if,

(a) the Minister is of the opinion that,

(i) the reasons set out in the request do not disclose any apparent land use planning ground upon which the Municipal Board could amend or revoke or refuse to revoke all or part of the order,

(ii) the request is not made in good faith or is frivolous or vexatious, or

(iii) the request is made only for the purpose of delay;

(b) the person or public body requesting the hearing has not provided written reasons for the request. 1994, c. 23, s. 27 (6); 1996, c. 4, s. 26 (1).

Notice of hearing

(12) Where the Minister has requested the Municipal Board to hold a hearing as provided for in subsection (10), notice of the hearing shall be given in such manner and to such persons as the Board may direct, and the Board shall hear any submissions that any person may desire to bring to the attention of the Board. R.S.O. 1990, c. P.13, s. 47 (12).

Dismissal without hearing

(12.1) Despite the *Statutory Powers Procedure Act* and subsection (10), the Municipal Board may dismiss a request to hold a hearing without holding a hearing, on its own initiative or on the motion of any party, if,

(a) it is of the opinion that,

(i) the reasons set out in the request do not disclose any apparent land use planning ground upon which the Board could amend or revoke or refuse to amend or revoke all or part of the order,

(ii) the request is not made in good faith or is frivolous or vexatious,

(iii) the request is made only for the purpose of delay, or

(iv) the person or public body requesting the hearing has persistently and without reasonable grounds commenced before the Board proceedings that constitute an abuse of process;

(b) the person or public body requesting the hearing has not provided written reasons for the request;

(c) the person or public body requesting the hearing has not paid the fee prescribed under the *Ontario Municipal Board Act*; or

(d) the person or public body requesting the hearing has not responded to a request by the Municipal Board for further information within the time specified by the Board. 1994, c. 23, s. 27 (7); 1996, c. 4, s. 26 (2); 2006, c. 23, s. 19 (1, 2).

Representation

(12.2) Before dismissing a request to hold a hearing, the Municipal Board shall notify the person or public body requesting the hearing and give the person or public body the opportunity to make representation on the proposed dismissal but this subsection does not apply if the person or public body has not complied with a request made under clause (12.1) (d). 2000, c. 26, Sched. K, s. 5 (4).

Dismissal

(12.3) The Municipal Board may dismiss a request after holding a hearing or without holding a hearing on the motion under subsection (12.1), as it considers appropriate. 2000, c. 26, Sched. K, s. 5 (4).

Decision of O.M.B.

(13) The Municipal Board after the conclusion of the hearing shall make a decision to either amend or revoke the order in whole or in part or refuse to amend or revoke the order in whole or in part and the Minister shall give effect to the decision of the Board. R.S.O. 1990, c. P.13, s. 47 (13); 1996, c. 4, s. 26 (3).

Minister's notice re matters of provincial interest

(13.1) If the Municipal Board has been requested to hold a hearing as provided for in subsection (10) and the Minister is of the opinion that a matter of provincial interest is, or is likely to be, adversely affected by the requested amendment or revocation, the Minister may so notify the Board in writing, not later than 30 days before the day fixed by the Board for the hearing. 2006, c. 23, s. 19 (3).

Same

(13.2) The Minister's notice shall identify,

(a) the provisions of the order by whose amendment or revocation the provincial interest is, or is likely to be, adversely affected; and

(b) the general basis for the opinion that a matter of provincial interest is, or is likely to be, adversely affected. 2006, c. 23, s. 19 (3).

Same

(13.3) The Minister is not required to give notice or to hold a hearing before giving notice under subsection (13.1). 2006, c. 23, s. 19 (3).

Effect of notice

(13.4) If the Municipal Board receives notice from the Minister under subsection (13.1), the decision of the Board is not final and binding with respect to the amendment or revocation of provisions identified in the notice, until the Lieutenant Governor in Council confirms the decision in that respect. 2006, c. 23, s. 19 (3).

Power of Lieutenant Governor in Council

(13.5) The Lieutenant Governor in Council may confirm, vary or rescind the Municipal Board's decision with respect to the amendment or revocation of provisions identified in the notice, and may direct the Minister to amend or revoke the order, in whole or in part. 2006, c. 23, s. 19 (3).

Notification of decision

(14) A copy of the decision of the Municipal Board shall be sent to each person who appeared at the hearing and made representations and to any person who in writing requests a copy of the decision. R.S.O. 1990, c. P.13, s. 47 (14).

(15)-(17) REPEALED: 1994, c. 23, s. 27 (8).

Effect of land use order

(18) An order of the Minister made under clause (1) (b) has the same effect as a by-law passed under subsection 50 (4). R.S.O. 1990, c. P.13, s. 47 (18).

Deemed by-law

(19) The Minister may, in the order or by separate order, provide that all or part of an order made under clause (1) (a) and any amendments to it in respect of land in the planning area of a planning board shall be deemed to be and to always have been a by-law passed under section 34 by the planning board in which the land is situate. 2001, c. 9, Sched. J, s. 2 (2).

Where licence, etc., not to issue

48. Despite the provisions of any other general or special Act, a licence, permit, approval or permission shall not be issued or granted nor any utility or service provided by a utilities distributor or a public or Crown agency in respect of any land, building or structure where the proposed use of the land or the erection or proposed use of the building or structure would be in contravention of section 46 or of an order made under section 47 or of a by-law passed by a planning board under section 34 or 38. R.S.O. 1990, c. P.13, s. 48; 1994, c. 23, s. 28; 2006, c. 23, s. 20.

Power of entry

49. (1) In this section,

"officer" means an officer who has been assigned the responsibility of enforcing section 46, orders of the Minister made under clause 47 (1) (a) or zoning by-laws passed under section 34.

Entry and inspection

(2) Subject to subsection (3), where an officer believes on reasonable grounds that section 46, an order of the Minister made under clause 47 (1) (a) or a by-law passed under section 34 or 38 is being contravened, the officer or any person acting under his or her instructions may, at all reasonable times and upon producing proper identification, enter and inspect any property on or in respect of which he or she believes the contravention is occurring. R.S.O. 1990, c. P.13, s. 49 (1, 2).

Where warrant required

(3) Except under the authority of a search warrant issued under section 49.1, an officer or any person acting under his or her instructions shall not enter any room or place actually used as a dwelling without requesting and obtaining the consent of the occupier, first having informed the occupier that the right of entry may be refused and entry made only under the authority of a search warrant. R.S.O. 1990, c. P.13, s. 49 (3); 1994, c. 2, s. 45 (1).

Obstruction

(4) No person shall obstruct or attempt to obstruct an officer or a person acting under the officer's instructions in the exercise of a power under this section. 1994, c. 2, s. 45 (2).

Search warrant

49.1 (1) A provincial judge or justice of the peace may at any time issue a warrant in the prescribed form authorizing a person named in the warrant to enter and search a building, receptacle or place if the provincial judge or justice of the peace is satisfied by information on oath that there are reasonable grounds to believe that,

(a) an offence under section 67 has been committed; and

Schedule 1	Information and material to be provided in an application for approval of a development permit

Definition

1. (1) In this Regulation,

"development" means,

(a) the construction, erection or placing of one or more buildings or structures on land,

(b) the making of an addition or alteration to a building or structure that has the effect of substantially increasing its size or usability,

(c) the laying out and establishment of,

(i) a commercial parking lot,

(ii) sites for the location of three or more mobile homes as defined in subsection 46 (1) of the Act,

(iii) sites for the construction, erection or location of three or more land lease community homes as defined in subsection 46 (1) of the Act, or

(iv) sites for the location of three or more trailers as defined in subsection 164 (4) of the *Municipal Act, 2001*,

(d) site alteration, including but not limited to,

(i) alteration of the grade of land, and

(ii) placing or dumping fill, or

(e) the removal of vegetation. O. Reg. 608/06, s. 1 (1).

(2) Subsection (1) applies instead of the definition of "development" in subsection 41 (1) of the Act or subsection 114 (1) of the *City of Toronto Act, 2006*. O. Reg. 608/06, s. 1 (2); O. Reg. 448/07, s. 1.

Development permit system

2. The council of a local municipality may by by-law establish a development permit system within the municipality for any area or areas set out in the by-law. O. Reg. 608/06, s. 2.

Conditions re official plan

3. (1) The council shall not pass a development permit by-law for any area in the municipality unless, before the passing of the by-law, the official plan in effect in the municipality,

(a) identifies the area as a proposed development permit area;

(b) sets out the scope of the authority that may be delegated and any limitations on the delegation, if the council intends to delegate any authority under the development permit by-law; and

(c) for each proposed development permit area identified under clause (a),

(i) contains a statement of the municipality's goals, objectives and policies in proposing a development permit system for the area,

(ii) sets out the types of criteria that may be included in the development permit by-law for determining whether any class of development or any use of land may be permitted by development permit, and

(iii) sets out the types of conditions that may be included in the development permit by-law in accordance with clause 4 (2) (i) and subsections 4 (4), (5) and (6). O. Reg. 608/06, s. 3 (1).

(2) The types of criteria described in subclause (1) (c) (ii) and the types of conditions described in subclause (1) (c) (iii) shall be in accordance with the goals, objectives and policies described in subclause (1) (c) (i). O. Reg. 608/06, s. 3 (2).

(3) For greater certainty, subsection (1) is subject to subsection 24 (2) of the Act. O. Reg. 608/06, s. 3 (3).

(4) The official plan may,

(a) set out information and materials that are required, in addition to those set out in Schedule 1, in an application for a development permit; and

(b) exempt any class of development or any use of land from any of the requirements of Schedule 1, but only if the official plan sets out what information and materials are to be provided in an application that falls within that class or use. O. Reg. 608/06, s. 3 (4).

(5) The official plan may contain policies relating to the application of paragraph 5 of subsection 4 (5), respecting conditions requiring the provision of specified facilities, services and matters in exchange for a specified height or density of development, which may be within the ranges set out under clause 4 (2) (c) or outside those ranges as set out under clause 4 (3) (f). O. Reg. 608/06, s. 3 (5).

Development permit by-law

4. (1) Section 34 of the Act, section 113 of the *City of Toronto Act, 2006* and the regulations made under those sections apply, with necessary modifications, to the making of a development permit by-law, and the by-law is deemed to be a by-law passed under section 34 of the Act, except as set out in this Regulation. O. Reg. 608/06, s. 4 (1).

(2) A development permit by-law shall,

(a) contain a description of the area to which the by-law applies, which shall be within the boundaries of an area identified in the official plan as a proposed development permit area;

(b) set out and define the permitted uses of land;

(c) set out a list of minimum and maximum standards for development;

(d) set out any internal review procedures regarding decisions made under subsection 10 (8);

(e) set out the manner in which notice shall be given, under subsection 10 (12), of decisions made under subsection 10 (8);

(f) provide that a development permit may be amended as described in the by-law;

(g) provide that an agreement referred to in paragraph 7 of subsection (5) may be amended as described in the by-law;

(h) provide that an agreement referred to in section 6 may be amended in the same way as an agreement referred to in paragraph 7 of subsection (5);

(i) if the council wishes to impose conditions in making decisions under subsection 10 (8), outline the conditions;

(j) if the council is delegating any authority under the by-law, set out the scope of the authority that is delegated and any limitations on the delegation; and

(k) state that the placement of a portable classroom on a school site of a district school board is exempt from the requirement for a development permit if the school site was in existence on January 1, 2007, in accordance with section 16. O. Reg. 608/06, s. 4 (2).

(3) A development permit by-law may, in addition to the matters set out in subsection 34 (1) of the Act,

(a) prohibit any development or change of use of land unless a development permit is obtained;

(b) set out and define classes of development;

(c) exempt any defined class of development or use of land from the requirement for a development permit;

(d) set out a list of classes of development or uses of land that may be permitted if the criteria set out in the official plan and in the by-law have been met;

(e) set out criteria that the council shall use in making decisions under subsection 10 (8); and

(f) set out a range of possible variations from the standards referred to in clause (2) (c) that may be authorized in connection with the issuing of a development permit. O. Reg. 608/06, s. 4 (3).

(4) A condition that is outlined for the purposes of clause (2) (i),

(a) shall be of a type that is permitted by the official plan;

(b) shall be reasonable for and related to the appropriate use of the land; and

(c) shall not conflict with federal and provincial statutes and regulations. O. Reg. 608/06, s. 4 (4).

(5) Some examples of conditions that may be outlined for the purposes of clause (2) (i) are:

1. A condition that is permitted by section 34, 40, 41 or 42 of the Act or by section 113 or 114 of the *City of Toronto Act, 2006*.
2. A condition that is related to the removal or restoration of vegetation.

3. A condition that is related to site alteration, including but not limited to,
   i. alteration or restoration of the grade of land, and
   ii. placing or dumping fill.
4. A condition that is related to ongoing monitoring requirements that are considered necessary for the protection of,
   i. public health and safety, or
   ii. the natural environment.
5. A condition that requires the provision of specified facilities, services and matters in exchange for a specified height or density of development, which may be within the ranges set out under clause (2) (c) or outside those ranges as set out under clause (3) (f).
6. With respect to land described in paragraph 3, 3.1 or 3.2 of subsection 34 (1) of the Act, a condition that is related to the matters that would otherwise be prohibited under those paragraphs.
7. A condition requiring the owner of the land to enter into one or more agreements with the municipality respecting one or more other conditions imposed under clause 10 (8) (c), (d) or (e). O. Reg. 608/06, s. 4 (5).

(6) A condition described in paragraph 5 of subsection (5) may be imposed only if,

(a) the official plan sets out policies relating to the application of that paragraph;

(b) the by-law specifically identifies the area of the municipality in respect of which a condition described in that paragraph may be imposed; and

(c) the by-law establishes a proportional relationship between the quantity or monetary value of the facilities, services and matters that may be required and the height or density of development that may be allowed. O. Reg. 608/06, s. 4 (6).

Agreement between municipality and owner

5. (1) An agreement referred to in paragraph 7 of subsection 4 (5) may be registered against the land to which it applies, and the municipality is entitled to enforce it against the owner and, subject to the *Registry Act* and the *Land Titles Act*, against any and all subsequent owners of the land. O. Reg. 608/06, s. 5 (1).

(2) The ability to impose a condition referred to in paragraph 7 of subsection 4 (5) is in addition to the powers set out in clauses 41 (7) (c) and (c.1) of the Act and in clauses 114 (11) (c) and (d) of the *City of Toronto Act, 2006*. O. Reg. 608/06, s. 5 (2).

Pre-existing agreements under s. 41 of Act or s. 114 of *City of Toronto Act, 2006*

6. When an agreement has been entered into by a municipality under section 41 of the Act or section 114 of the *City of Toronto Act, 2006*, and afterwards a development permit by-law that applies to the same land as the agreement comes into force under this Regulation,

(a) the agreement continues to be valid and binding; and

(b) the agreement may be amended as if it were an agreement referred to in paragraph 7 of subsection 4 (5). O. Reg. 608/06, s. 6.

Notice of proposed by-law

7. In addition to the requirements set out in section 6 of Ontario Regulation 545/06 (Zoning By-laws, Holding By-laws and Interim Control By-laws) made under the Act, written notice of a proposed development permit by-law shall contain,

(a) a description of the purpose and effect of the development permit system in the municipality;

(b) a description of the proposed development permit area or areas;

(c) a statement that an appeal to the Municipal Board against a decision on a development permit application may be made only by the owner of the land to which the application relates; and

(d) a description of any internal review procedures contained in the by-law. O. Reg. 608/06, s. 7.

Non-application of certain provisions of Act and *City of Toronto Act, 2006*

8. (1) Subsection 34 (21) and section 45 of the Act do not apply to a development permit by-law. O. Reg. 608/06, s. 8 (1).

(2) Section 37 and subsections 41 (2), (3) and (13) of the Act and subsections 114 (2), (3) and (17) of the *City of Toronto Act, 2006* do not apply to land subject to a development permit by-law. O. Reg. 608/06, s. 8 (2).

Commencement of by-law

9. (1) A development permit by-law comes into force on,

(a) the day after the last day for filing a notice of appeal, if there are no appeals; or

(b) the day after the day on which all the appeals are disposed of by the Municipal Board, or such later date as the Board may otherwise order, subject to subsection (2). O. Reg. 608/06, s. 9 (1).

(2) If there are appeals that have not yet been disposed of, the Municipal Board may, on its own initiative or on the motion of any person or public body, make an order providing that any part of the development permit by-law that is not in issue in such an appeal is deemed to have come into force on,

(a) the day after the last day for filing a notice of appeal; or

(b) such later date as the Board may otherwise order. O. Reg. 608/06, s. 9 (2).

(3) On the day the development permit by-law comes into force, all by-laws passed under section 34 of the Act are deemed to be repealed with respect to the area covered by the development permit by-law. O. Reg. 608/06, s. 9 (3).

(4) If subsection (2) applies, the relevant parts of by-laws passed under section 34 of the Act are deemed to be repealed with respect to the area covered by the part of the development permit by-law that is deemed to have come into force early. O. Reg. 608/06, s. 9 (4).

Application for development permit

10. (1) An owner of land or the owner's authorized agent may apply to the council of the municipality for a development permit with respect to land subject to a development permit by-law. O. Reg. 608/06, s. 10 (1).

(2) An application for a development permit shall contain the information and material set out in Schedule 1, except as provided in subsection 3 (4). O. Reg. 608/06, s. 10 (2).

(3) The council may require that additional information and materials be included in an application for a development permit, as described in clause 3 (4) (a). O. Reg. 608/06, s. 10 (3).

(4) Until the council has received the information and material referred to in subsections (2) and (3), if any, and any fee under section 69 of the Act,

(a) the council may refuse to accept or further consider the application; and

(b) the 45-day period referred to in subsection 12 (1) does not begin. O. Reg. 608/06, s. 10 (4).

(5) When an applicant applies for a development permit, the applicant or the municipality may make a motion for directions to have the Municipal Board determine,

(a) whether the information and material required under subsections (2) and (3) have in fact been provided; or

(b) whether a requirement made under subsection (3) is reasonable. O. Reg. 608/06, s. 10 (5).

(6) The council shall consider the application for a development permit,

(a) when the information and material and fee have been received as described in subsection (4); or

(b) when the Municipal Board makes a determination to that effect under subsection (5). O. Reg. 608/06, s. 10 (6).

(7) If the Municipal Board makes the determination described in clause (6) (b), the 45-day period referred to in subsection 12 (1) is counted from the day on which the information, material and fee referred to in subsection (4) had all been received. O. Reg. 608/06, s. 10 (7).

(8) On considering the application, the council may,

(a) refuse the application;

(b) approve the application and issue a development permit with no conditions attached;

(c) approve the application and require that conditions be met before issuing a development permit;

(d) approve the application and issue a development permit with conditions attached; or

(e) approve the application, require that conditions be met before issuing a development permit and, when the conditions have been met, issue a development permit with conditions attached. O. Reg. 608/06, s. 10 (8).

(9) A condition that is imposed under clause (8) (c), (d) or (e) shall meet the following requirements:

1. The condition shall be clear, precise and quantifiable.
2. The condition shall include a clear statement of whether it must be complied with before construction, renovation or change of use of a building.
3. The condition shall not deal with the following aspects of buildings and structures:
   i. interior design,
   ii. the layout of interior areas, other than interior walkways, stairs, elevators and escalators to which members of the public have access from streets, open spaces and interior walkways in adjacent buildings,
   iii. the manner of construction and construction standards. O. Reg. 608/06, s. 10 (9).

(10) When the council attaches a condition to a development permit under clause (8) (d) or (e), it may require that the fulfilment of the condition be secured in a way that is satisfactory to the council. O. Reg. 608/06, s. 10 (10).

(11) The council, in considering an application for a development permit, may confer with any persons or public bodies that the council considers to have an interest in the application. O. Reg. 608/06, s. 10 (11).

(12) Within 15 days after the council makes a decision under subsection (8), written notice of the decision, including reasons and any conditions imposed, shall be given to the applicant and to each person or public body that filed a written request to be informed of the decision with the clerk of the municipality. O. Reg. 608/06, s. 10 (12).

(13) Section 41 of the Act or section 114 of the *City of Toronto Act, 2006* applies, with necessary modifications, to an application for a development permit, except as otherwise provided in this Regulation. O. Reg. 608/06, s. 10 (13).

(14) Subsections 41 (6), (12) and (12.1) of the Act and subsections 114 (10), (15) and (16) of the *City of Toronto Act, 2006* do not apply to an application for a development permit. O. Reg. 608/06, s. 10 (14).

Motion for directions re fulfillment of condition

11. In the case of a decision under clause 10 (8) (c), (d) or (e) the applicant may, at any time, make a motion for directions to have the Municipal Board determine whether a specified condition has been fulfilled. O. Reg. 608/06, s. 11.

Appeal to O.M.B.

12. (1) If the council fails to make a decision under subsection 10 (8) within 45 days after the date on which the information and material and fee are received as described in subsection 10 (4) or (7), the applicant may appeal to the Municipal Board against the failure to make a decision. O. Reg. 608/06, s. 12 (1).

(2) The applicant may appeal any decision made under subsection 10 (8) to the Municipal Board no later than 20 days after the day notice of the decision is given. O. Reg. 608/06, s. 12 (2).

(3) The appeal may be made by filing with the clerk of the municipality a notice of appeal setting out the reasons for the appeal, accompanied by the fee prescribed under the *Ontario Municipal Board Act*. O. Reg. 608/06, s. 12 (3).

Duties of clerk

13. On receiving a notice of appeal under section 12, the clerk of the municipality shall ensure that,

(a) a record is compiled that includes,
   (i) the original or a true copy of the application,
   (ii) a copy of the development permit by-law, certified by the clerk,
   (iii) a copy of any decision of council relating to the application, certified by the clerk, and
   (iv) an affidavit or sworn declaration by an employee of the municipality that the notice requirements of subsection 10 (12) have been complied with; and

(b) the notice of appeal, the record and the fee are forwarded to the Municipal Board within 15 days after the notice of appeal is received under section 12. O. Reg. 608/06, s. 13.

Decision of O.M.B.

14. (1) On an appeal under section 12, the Municipal Board,

(a) shall hold a hearing and determine the matter in issue; and

(b) may make any decision that the council could have made under subsection 10 (8). O. Reg. 608/06, s. 14 (1).

(2) The Municipal Board's decision is final. O. Reg. 608/06, s. 14 (2).

(3) If the Municipal Board orders that a development permit be issued, the council shall issue it, except that if the Municipal Board imposes conditions, the development permit shall not be issued until,

(a) in the case of conditions that are required to be met before the development permit is issued, the council is satisfied that the conditions have been met;

(b) in the case of conditions that are attached to the development permit, their fulfillment has been secured in a way that is satisfactory to the council. O. Reg. 608/06, s. 14 (3).

(4) Subsection 10 (12) applies to orders of the Municipal Board, with necessary modifications. O. Reg. 608/06, s. 14 (4).

Delegation by council

15. (1) If clauses 3 (1) (b) and 4 (2) (j) have been complied with, the council may delegate the authority described in subsection (2) to,

(a) a committee appointed by the council, including a committee of the council; or

(b) an employee of the municipality, identified by name or position. O. Reg. 608/06, s. 15 (1).

(2) The authority that may be delegated is authority to,

(a) make any decision that the council is authorized to make under subsection 10 (8); and

(b) enter into agreements referred to in paragraph 7 of subsection 4 (5). O. Reg. 608/06, s. 15 (2).

(3) The authority delegated as described in clause (2) (a) or (b) or as described in both clauses may be made subject to any limitations that are set out in the delegation. O. Reg. 608/06, s. 15 (3).

Exemption

16. The placement of a portable classroom on a school site of a district school board is exempt from the requirement for a development permit if the school site was in existence on January 1, 2007. O. Reg. 608/06, s. 16.

Transition

17. (1) In this section,

"development permit by-law" means By-law 2004-180 of the Township of Lake of Bays, including any amendments made before the day this Regulation comes into force. O. Reg. 608/06, s. 17 (1).

(2) Until the council of the Township of Lake of Bays revokes the development permit by-law and replaces it in accordance with this Regulation,

(a) despite the revocation of Ontario Regulation 246/01, the development permit by-law continues to be in force, shall be interpreted and may be amended as if that regulation were still in force;

(b) the council may amend the development permit by-law to extend its application to any area within the Township of Lake of Bays in addition to the land described in section 3 of Schedule 1 to Ontario Regulation 246/01. O. Reg. 608/06, s. 17 (2).

18. OMITTED (REVOKES OTHER REGULATIONS). O. Reg. 608/06, s. 18.

19. OMITTED (PROVIDES FOR COMING INTO FORCE OF PROVISIONS OF THIS REGULATION). O. Reg. 608/06, s. 19.

SCHEDULE 1
INFORMATION AND MATERIAL TO BE PROVIDED IN AN APPLICATION FOR APPROVAL OF A DEVELOPMENT PERMIT

1. The name, address, telephone number and, if applicable, the e-mail address of the owner of the subject land, and of the agent if the applicant is an authorized agent.

2. The current designation of the subject land in the applicable official plan and the land uses that the designation authorizes.

3. Whether a variation is requested within the provisions set out in the development permit by-law.

4. Whether the proposed use is,

(a) a permitted use; or

(b) a use that may be permitted subject to criteria as set out in the development permit by-law.

5. If the answer to section 3 or clause 4 (b) is yes, a statement regarding how the applicable criteria have been addressed.

6. A description of the subject land, including such information as the municipality, concession and lot numbers, registered plan and lot numbers, reference plan and part numbers and street names and numbers.

7. The frontage, depth and area of the subject land, in metric units.

8. Whether access to the subject land is,

(a) by a provincial highway, a municipal road that is maintained all year or seasonally, another public road or a right of way; or

(b) by water.

9. If access to the subject land is by water only, the parking and docking facilities used or to be used and the approximate distance of these facilities from the subject land and the nearest public road.

10. The existing uses of the subject land.

11. Whether there are any buildings or structures on the subject land.

12. If the answer to section 11 is yes, the following information for each building or structure:

(a) the type of building or structure; and

(b) in metric units, the setback from the front lot line, rear lot line and side lot lines, the height of the building or structure and its dimensions or floor area.

13. The proposed uses of the subject land.

14. Whether any buildings or structures are proposed to be built on the subject land.

15. If the answer to section 14 is yes, the following information for each proposed building or structure:

(a) the type of building or structure; and

(b) in metric units, the setback from the front lot line, rear lot line and side lot lines, the height of the building or structure and its dimensions or floor area.

16. Whether the proposed building or structure is within an area described in the official plan and development permit by-law as an area within which plans and drawings under subsection 41 (4) or (5) of the Act or subsection 114 (5) or (9) of the *City of Toronto Act, 2006* may be required.

17. One or both of the following, as required by the development permit by-law:

1. Plans that show the location of all buildings and structures to be erected, the location of all facilities and works to be provided in conjunction with the buildings and structures, and the location of all facilities and works required under clause 41 (7) (a) of the Act or clause 114 (11) (a) of the *City of Toronto Act, 2006*, including facilities designed to have regard for accessibility for persons with disabilities.

2. Drawings that show plan, elevation and cross-section views for each building to be erected and are sufficient to display,

   i. the massing and conceptual design of the proposed building,

ii. the relationship of the proposed building to adjacent buildings, streets, and exterior areas to which members of the public have access,

iii. the provision of interior walkways, stairs, elevators and escalators to which members of the public have access from streets, open spaces and interior walkways in adjacent buildings,

iv. matters relating to exterior design, including without limitation the character, scale, appearance and design features of the proposed building, and its sustainable design, but only to the extent that it is a matter of exterior design, if the official plan contains provisions relating to such matters,

v. the sustainable design elements on any adjoining highway under a municipality's jurisdiction, including without limitation trees, shrubs, hedges, plantings or other ground cover, permeable paving materials, street furniture, curb ramps, waste and recycling containers and bicycle parking facilities, and

vi. facilities designed to have regard for accessibility for persons with disabilities.

18. Plans and drawings referred to in section 17 shall not include the following:

1. Interior design.

2. The layout of interior areas, other than the interior walkways, stairs, elevators and escalators referred to in subparagraph 2 iii of section 17.

3. The manner of construction and standards for construction.

19. If known,

(a) the date the subject land was acquired by the current owner;

(b) the date any existing buildings or structures on the subject land were constructed; and

(c) the length of time that the existing uses of the subject land have continued.

20. Whether water is provided to the subject land by a publicly owned and operated piped water system, a privately owned and operated individual or communal well, a lake or other water body or other means.

21. Whether sewage disposal is provided to the subject land by a publicly owned and operated sanitary sewage system, a privately owned and operated individual or communal septic system, a privy or other means.

22. Whether storm drainage is provided by sewers, ditches, swales or other means.

23. If known,

(a) whether the subject land has ever been the subject of an application under the Act for approval of a plan of subdivision or a consent;

(b) if the answer to clause (a) is yes, the file number and status of the application;

(c) whether the subject land has ever been the subject of an application under section 34 or 45 of the Act; and

(d) if the answer to clause (c) is yes, the file number and status of the application.

24. A sketch showing, in metric units,

(a) the boundaries and dimensions of the subject land;

(b) the location, size and type of all existing and proposed buildings and structures on the subject land, indicating their distance from the front yard lot line, rear yard lot line and side yard lot lines;

(c) the approximate location of all natural and artificial features (for example, buildings, railways, roads, watercourses, drainage ditches, banks of rivers or streams, wetlands, wooded areas, wells and septic tanks) that,

(i) are located on the subject land and on land that is adjacent to it, and

(ii) in the applicant's opinion, may affect the application;

(d) the current uses of land that is adjacent to the subject land;

(e) the location, width and name of any roads within or abutting the subject land, indicating whether it is an unopened road allowance, a public travelled road, a private road or a right of way;

(f) if access to the subject land is by water only, the location of the parking and docking facilities to be used; and

(g) the location and nature of any easement or restrictive covenant affecting the subject land.

25. An affidavit or sworn declaration by the applicant that the information required under this Schedule and provided by the applicant is accurate.

O. Reg. 608/06, Sched. 1.

INTERPRETATION

Interpretation

1. (1) In this Regulation,

"building" means a structure consisting of a roof, wall or floor, but does not include floating structures, docks, boathouses, tents or ice huts;

"dredge" means to remove or displace material from any shore lands, but does not include the removal or displacement of material for the purpose of installing service cables, heat loops or water intakes for private residences;

"invasive aquatic vegetation" means plants listed in the document entitled "Ontario's Invasive Aquatic Plant List" and dated March 11, 2013, that is published by the Ministry and available on the Ministry website;

"in-water work related to an activity" means any work related to the activity that is conducted in the water of a lake, river, stream or pond;

"In-water Work Timing Window Guidelines" means the document entitled "In-water Work Timing Window Guidelines" and dated March 11, 2013, that is published by the Ministry and available on the Ministry website;

"native aquatic vegetation" means plants that grow partly or wholly in water and that may be rooted or floating, but does not include invasive aquatic vegetation;

"Registry" means the registry known as the Ministry of Natural Resources Registry available on the Ministry website;

"road" has the same meaning as in Part II of the Act;

"shore lands" means lands covered or seasonally inundated by the water of a lake, river, stream or pond;

"trail" means a path over public lands that is not used for mineral exploration or extraction;

"water crossing" means a bridge, culvert or causeway constructed to provide access to two points separated by water;

"waterfront property" means a parcel of land having a boundary on a lake, river, stream or pond;

"work permit" means a work permit issued under the Act. O. Reg. 239/13, s. 1 (1).

(2) A reference in this Regulation to a person carrying out an activity is deemed to include a reference to a person causing the activity to be carried out. O. Reg. 239/13, s. 1 (2).

PROHIBITED ACTIVITIES AND REQUIREMENT TO OBTAIN A WORK PERMIT

Activities prohibited unless carried out in accordance with work permits

2. (1) No person shall carry out any of the following activities except under the authority of and in accordance with the terms and conditions of a work permit that authorizes the activity:

1. Construct or place a building on public land.
2. Construct a trail, water crossing or road on public land.
3. Dredge shore lands.
4. Fill shore lands.
5. Remove invasive aquatic vegetation or native aquatic vegetation by mechanical means or by hand from shore lands.
6. Construct or place a structure or combination of structures that occupies more than 15 square metres on shore lands. O. Reg. 239/13, s. 2 (1).

(2) For the purposes of paragraph 5 of subsection (1), removal by mechanical means includes removal with a rake, cutter-bar device or mechanical harvester, but does not include dredging. O. Reg. 239/13, s. 2 (2).

Non-application of prohibition under s. 2

3. Nothing in section 2 prohibits a person from acting under the authority of and in accordance with the terms and conditions of an instrument that,

(a) is granted under the Act; and

(b) authorizes an activity that would otherwise be prohibited, except if carried out under the authority of and in accordance with the terms and conditions of a work permit. O. Reg. 239/13, s. 3.

Non-application of prohibition under par. 2 of s. 2 (1)

4. (1) The prohibition under paragraph 2 of subsection 2 (1) does not apply with respect to a trail, water crossing or road that has been authorized under a forest management plan under the *Crown Forest Sustainability Act, 1994* or constructed as part of a forest operation to which that Act applies. O. Reg. 239/13, s. 4 (1).

(2) The prohibition under paragraph 2 of subsection 2 (1) does not apply with respect to minor maintenance activities carried out on a trail, water crossing or road, including the following activities:

1. Water crossing cleaning for the purpose of maintaining the flow of water.
2. Superficial grading of trails or roads.
3. Clearing of existing ditches.
4. Spot gravelling.
5. Clearing or brushing of existing road or trail surface.
6. Snow plowing.
7. Sanding or dust control.
8. Repair or replacement of posted signage. O. Reg. 239/13, s. 4 (2).

EXEMPTIONS FROM REQUIREMENT TO OBTAIN A WORK PERMIT

Construction or placement of buildings within unpatented mining claims

5. (1) A person is not required under paragraph 1 of subsection 2 (1) to obtain a work permit to construct or place one or more buildings within the boundaries of an unpatented mining claim for the purpose of mineral exploration and development, if the person complies with the requirements set out in subsection (2). O. Reg. 239/13, s. 5 (1).

(2) The requirements referred to in subsection (1) are the following:

1. The person is the holder of the unpatented mining claim on which the construction or placement of the building or buildings is to be carried out.
2. The person must ensure that the building or buildings meet the following requirements:
   i. The building or buildings must not be constructed or placed within the 120 metre shoreline reservation authorized by subsection 40 (1) of the *Mining Act*.
   ii. The building or buildings must not be constructed or placed on land to which the surface rights are held by another person.
3. At least 10 business days before the commencement date of the construction or placement of the building or buildings, the person gives the Minister notice of the fact that the person is about to begin the activity, by submitting a notice of activity form available on the Registry to the Minister through the Registry and the notice must include a description of the activity and of the location where it is to be carried out.
4. The person follows the requirements of subsections (3) and (4) with respect to the completion of the notice of activity form and the keeping of records relating to the notice of activity form. O. Reg. 239/13, s. 5 (2).

(3) Before submitting a notice of activity form to the Minister, the person must ensure that,

(a) all mandatory information requested on the form, including the person's contact information, has been provided; and

(b) the information provided on the form is complete and accurate. O. Reg. 239/13, s. 5 (3).

(4) After submitting a notice of activity form to the Minister, the person must,

(a) promptly upon obtaining from the Ministry confirmation that a notice of activity form submitted through the Registry has been received by the Minister, make a record of the confirmation; and

(b) for as long as the activity is being carried out,

(i) keep the record of the confirmation on site, and

(ii) make the record of the confirmation available to the Ministry upon receiving a request for it. O. Reg. 239/13, s. 5 (4).

(5) A person who provides incomplete, false or misleading information on a notice of activity form is deemed not to have submitted the notice of activity form. O. Reg. 239/13, s. 5 (5).

(6) For the purposes of this section,

"commencement date of the construction or placement of the building or buildings" means the first day of operation of machinery or equipment,

(a) in connection with the construction or placement of the building, if there is one building; or

(b) in connection with the construction or placement of the first building, if there is more than one building. O. Reg. 239/13, s. 5 (6).

Dredging of shore lands previously dredged

6. (1) A person is not required under paragraph 3 of subsection 2 (1) to obtain a work permit to dredge shore lands that were initially dredged under the authority of a work permit, if the person complies with the requirements set out in subsection (2). O. Reg. 239/13, s. 6 (1).

(2) The requirements referred to in subsection (1) are the following:

1. The person is the owner of the waterfront property adjacent to the shore lands where the proposed dredging is to be carried out.
2. The person carried out the initial dredging under the authority of a work permit issued on or after January 1, 2009.
3. The commencement date of the proposed dredging is,
   i. in the case of the first dredging following the initial dredging, no later than on the fifth anniversary of the day the work permit referred to in paragraph 2 is issued, and
   ii. in the case of each subsequent dredging, no later than on the fifth anniversary of the date of completion of the immediately preceding dredging.
4. The person carries out the activity in accordance with the following requirements:
   i. The activity must be carried out within the straight line production of the sidelines of the waterfront property.
   ii. The area to be dredged must comply with the requirements of subsections (4) and (5) with respect to its dimensions and location.
   iii. Blasting or open water disposal must not be used in connection with the activity.
   iv. In-water work related to the activity must not be carried out during the timing windows when in-water work related to the activity is restricted, as determined in accordance with the In-water Work Timing Window Guidelines.
   v. If any work related to the activity is likely to disturb sediments, sediment controls containing the area where the work is carried out,
      A. must be installed before the work begins,
      B. must be maintained for the duration of the work, and
      C. must not be removed until after the area has stabilized.
   vi. Wheeled or tracked machinery or equipment used in connection with the activity,
      A. must be used on dry land or used from a barge or vessel,
      B. must be operated from dry land or operated from a barge or vessel, and
      C. must be stored on dry land or stored on a barge or vessel.
   vii. Any material that results from the activity, including sediment, debris and aquatic vegetation, must be disposed of on dry land and in a manner that prevents it from entering or re-entering any lake, river, stream or pond. O. Reg. 239/13, s. 6 (2).

(3) For the purposes of an exemption under this section, if the commencement date referred to in paragraph 3 of subsection (2) falls within a timing window referred to in subparagraph 4 iv of subsection

31. (1) Despite anything in any general or special Act, no person, including a municipality and a local board, as defined in the *Municipal Affairs Act*,

(a) shall obstruct or deposit material on, along, under or across the King's Highway or take up or in any way interfere with the King's Highway; or

(b) shall construct or change the use of any private road, entranceway, gate or other structure or facility as a means of access to the King's Highway, other than a controlled-access highway,

except in accordance with the conditions of a permit issued therefor by the Minister and those conditions may include such fees or other consideration as the Minister may specify. R.S.O. 1990, c. P.50, s. 31 (1); 1994, c. 17, s. 63; 2002, c. 17, Sched. F, Table.

Offence

(2) Every person who contravenes subsection (1) is guilty of an offence and on conviction is liable to a fine of not less than $200 and not more than $5,000. R.S.O. 1990, c. P.50, s. 31 (2).

Use of highway by vehicles and animals

32. (1) The Minister may make regulations prohibiting or regulating the use of the King's Highway by any class of vehicles or animals and may impose penalties for contravention thereof, but no such regulation has any force or effect until approved by the Lieutenant Governor in Council after notice to any municipality affected thereby.

Horses, cattle, etc., on highway

(2) Every person who, being the owner or having the care, custody or control of horses, cattle, swine, sheep or goats, suffers or permits them or any of them to run at large within the limits of the King's Highway is guilty of an offence and on conviction is liable to a fine of not more than $50 for every such animal found at large upon the highway, but this section does not create any civil liability on the part of the owner of the animal for damage caused to the property of others as a result of the animal running at large within the limits of the King's Highway. R.S.O. 1990, c. P.50, s. 32.

Ministry to maintain and repair

33. (1) The King's Highway shall be maintained and kept in repair by the Ministry and any municipality in which any part of the King's Highway is situate is relieved from any liability therefor, but this does not apply to any sidewalk or municipal undertaking or work constructed or in course of construction by a municipality or which a municipality may lawfully do or construct upon the highway, and the municipality is liable for want of repair of the sidewalk, municipal undertaking or work, whether the want of repair is the result of nonfeasance or misfeasance, in the same manner and to the same extent as in the case of any other like work constructed by the municipality. R.S.O. 1990, c. P.50, s. 33 (1).

Liability for damage in case of default

(2) In case of default by the Ministry to keep the King's Highway in repair, the Crown is liable for all damage sustained by any person by reason of the default, and the amount recoverable by a person by reason of the default may be agreed upon with the Minister before or after the commencement of an action for the recovery of damages. R.S.O. 1990, c. P.50, s. 33 (2).

Insufficiency of fence, etc.

(3) No action shall be brought against the Crown for the recovery of damages caused by the presence or absence or insufficiency of any wall, fence, guide rail, railing or barrier adjacent to or in, along or upon the King's Highway or caused by or on account of any construction, obstruction or erection or any situation, arrangement or disposition of any earth, rock, tree or other material or thing adjacent to or in, along or upon the King's Highway that is not on the roadway. R.S.O. 1990, c. P.50, s. 33 (3).

Notice claim

(4) No action shall be brought for the recovery of the damages mentioned in subsection (2) unless notice in writing of the claim and of the injury complained of has been served upon or sent by registered letter to the Minister within ten days after the happening of the injury, but the failure to give or the insufficiency of the notice is not a bar to the action if a judge finds that there is reasonable excuse for the want or insufficiency of the notice and that the Crown is not thereby prejudiced in its defence. R.S.O. 1990, c. P.50, s. 33 (4); 2002, c. 24, Sched. B, s. 45.

(5) REPEALED: 2002, c. 24, Sched. B, s. 25.

Judgment, how payable

(6) All damages and costs recovered under this section and any amount payable as the result of an agreement in settlement of a claim for damages and costs that has been approved of in writing by counsel is payable in the same manner as in the case of a judgment recovered against the Crown in any other action. R.S.O. 1990, c. P.50, s. 33 (6).

Style of action

(7) In an action against the Crown under this section, the defendant shall be described as "Her Majesty the Queen in right of the Province of Ontario, represented by the Minister of Transportation for the Province of Ontario" in English or as "Sa Majesté du chef de l'Ontario, représentée par le Ministre des Transports de l'Ontario" in French, and it is not necessary to proceed by petition of right or to procure the fiat of the Lieutenant Governor or the consent of the Attorney General before commencing the action, but every such action may be instituted and carried on and judgment may be given thereon in the same manner as in an action brought by a subject of Her Majesty against another subject. R.S.O. 1990, c. P.50, s. 33 (7).

Counterclaims and third party proceedings

(8) Despite any general or special Act, in an action against the Crown under this section, the defendant may set up by way of counterclaim any right or claim, whether the right or claim sounds in damages or not, and may claim contribution or indemnity from or any other relief over against any person not a party to the action, and every such counterclaim and claim may be instituted and carried on and judgment may be given as if such counterclaim or claim was made by a subject of Her Majesty against another subject. R.S.O. 1990, c. P.50, s. 33 (8).

Action to be tried without jury

(9) An action against the Crown under this section shall be tried by a judge without the intervention of a jury, and the trial shall take place in the county in which the default occurred unless otherwise ordered upon an application by any party. R.S.O. 1990, c. P.50, s. 33 (9).

Liability not to exceed that of municipality

(10) The liability imposed by this section does not extend to a case in which a municipality having jurisdiction and control over the highway would not have been liable for the damage sustained. R.S.O. 1990, c. P.50, s. 33 (10).

Roadside controls, King's Highway

34. (1) In this section,

"agricultural product" means an agricultural product that is not edible, an agricultural food product or a food product that is processed on a farm in Ontario from an agricultural food product; ("produit agricole")

"centre point of an intersection" is the point where the centre line of the through part or parts of the King's Highway meets the centre line of or the centre line of the prolongation of any other highway that intersects or meets the King's Highway; ("point central d'une intersection")

"portable sign" means a sign or advertising device that is not permanently attached to the ground, a building or a structure or that is designed to be moved from place to place. ("panneau portatif") R.S.O. 1990, c. P.50, s. 34 (1); 2008, c. 22, s. 1 (1).

Interpretation, agricultural product

(1.1) For the purposes of this section, an agricultural product that is processed on a farm in Ontario from an agricultural food product shall be deemed to be produced on the premises on which the agricultural food product is produced. 2008, c. 22, s. 1 (2).

Roadside buildings, trees, signs, activities, etc.

(2) Despite any general or special Act, regulation, by-law or other authority, no person shall, except under a permit therefor from the Minister,

(a) place, erect or alter any building, fence, gasoline pump or other structure or any road upon or within 45 metres of any limit of the King's Highway or upon or within 180 metres of the centre point of an intersection;

(b) place any tree, shrub or hedge within 45 metres of any limit of the King's Highway or within 180 metres of the centre point of an intersection;

(c) display any sign, notice or advertising device, whether it contains words or not, within 400 metres of any limit of the King's highway, other than,

(i) one sign not more than 60 centimetres by 30 centimetres in size displaying the name or the name and occupation of the owner of the premises where it is displayed or the name of the premises,

(ii) a maximum of two single-sided signs, each being not more than 122 centimetres by 122 centimetres in size and facing in different directions, or one single-sided sign not more than 122 centimetres by 244 centimetres in size if,

(A) the signs display information about the sale of agricultural products, other than tobacco, that are produced and offered for sale on the premises where the signs are displayed, and

(B) the signs are displayed on premises that is zoned for agricultural uses and that is not owned by the Crown in right of Canada or the public sector as defined in subsection 2 (1) of the *Public Sector Salary Disclosure Act, 1996*, or

(iii) a maximum of two single-sided signs, each being not more than 122 centimetres by 122 centimetres in size and facing in different directions, or one single-sided sign not more than 122 centimetres by 244 centimetres in size if,

(A) the signs display directions to a place where agricultural products produced in Ontario, other than tobacco, are offered for sale or information about the sale,

(B) the owner of the signs also owns or rents the land on which the agricultural products mentioned in sub-subclause (A) were produced,

(C) the signs are displayed on premises that is zoned for agricultural uses and that is not owned by the Crown in right of Canada or the public sector as defined in subsection 2 (1) of the *Public Sector Salary Disclosure Act, 1996*, and

(D) the signs are displayed only during the season during which the agricultural products mentioned in sub-subclause (A) are offered for sale;

(d) use any land, any part of which lies within 800 metres of any limit of the King's Highway, for the purposes of a shopping centre, stadium, fair ground, race track, drive-in theatre or any other purpose that causes persons to congregate in large numbers;

(e) sell, offer for sale or display produce, goods or merchandise upon the King's Highway; or

(f) construct or use any private road, entranceway, gate or other structure or facility as a means of access to the King's Highway. R.S.O. 1990, c. P.50, s. 34 (2); 2008, c. 22, s. 1 (3).

Direction to stop sales, etc.

(3) The Minister may direct any person to stop selling, offering for sale or displaying any produce, goods or merchandise within 45 metres of any limit of the King's Highway or within 180 metres of the centre point of an intersection and every person to whom such direction is given shall forthwith comply with the direction. R.S.O. 1990, c. P.50, s. 34 (3).

No authorization by others

(4) No person shall authorize or permit any act prohibited by subsection (2). R.S.O. 1990, c. P.50, s. 34 (4).

Application

(5) The Minister may order that subsection (2) or such clauses thereof as the Minister specifies do not apply within the limits of any local municipality or such parts thereof as the Minister specifies. R.S.O. 1990, c. P.50, s. 34 (5); 2002, c. 17, Sched. F, Table.

Order not regulation

(5.1) An order made by the Minister under subsection (5) is not a regulation within the meaning of Part III (Regulations) of the *Legislation Act, 2006*. 2006, c. 21, Sched. F, s. 128 (6).

Direction to remove, etc.

(6) The Minister may direct any owner of land,

(a) to remove therefrom or alter thereon any building, fence, gasoline pump or other structure or any road, tree, shrub or hedge placed, erected or altered;

(b) to remove therefrom or alter thereon any sign, notice or advertising device displayed; or

(c) to close up any private road, entranceway, gate or other structure or facility constructed or used,

in contravention of subsection (2). R.S.O. 1990, c. P.50, s. 34 (6).

Exception

(7) Clause (6) (b) does not apply to a portable sign. R.S.O. 1990, c. P.50, s. 34 (7).

Direction to remove

(8) Where a portable sign is displayed contrary to subsection (2), the Minister may direct,

(a) the owner of the portable sign, if the Minister is able to ascertain who and where the owner is;

(b) the person on whose behalf the portable sign is displayed, if clause (a) does not apply but the Minister is able to ascertain who and where that person is; or

(c) the owner of the land on which the portable sign is displayed, if clauses (a) and (b) do not apply,

to remove the sign. R.S.O. 1990, c. P.50, s. 34 (8).

Removal of sign

(9) Where a sign in respect of which a direction is given under subsection (8) is not removed within five days after the direction is given, the Minister may in writing authorize any person to enter upon the land involved and to do whatever is necessary to remove the sign. R.S.O. 1990, c. P.50, s. 34 (9).

Service of direction

(10) Every direction given under subsection (3), (6), (8), 38 (5) or 38 (7) shall be in writing and shall be served personally or by registered letter and in the case of service by registered letter shall be deemed to have been received on the second day following its mailing. R.S.O. 1990, c. P.50, s. 34 (10).

Failure to comply with direction

(11) Where a direction given under subsection (6) or 38 (5) is not complied with within thirty days after its receipt, the Minister may in writing authorize any person to enter upon the land involved to do whatever is necessary to comply with the direction. R.S.O. 1990, c. P.50, s. 34 (11).

No liability for damages

(12) An authorization under subsection (9), (11) or 38 (8) is authority to the person named therein to enter on the land described therein and to remove the sign as directed and neither the Minister nor that person is liable for any damages that may be caused in effecting the removal. R.S.O. 1990, c. P.50, s. 34 (12).

Offence

(13) Every person who contravenes subsection (2), (4), 38 (2) or 38 (3) or who fails to comply with a direction given under subsection (3), (6), (8), 38 (5) or 38 (7) is guilty of an offence and on conviction is liable to a fine of not less than $50 and not more than $500 for a first offence and not less than $200 and not more than $1,000 for any subsequent offence. R.S.O. 1990, c. P.50, s. 34 (13).

Compensation

(14) Where a direction given under subsection (6) has been complied with, the Minister shall make due compensation to the owner of the land if the building, fence, gasoline pump or other structure or a road, tree, shrub, hedge, sign, notice or advertising device was placed, erected or altered, as the case may be,

(a) before the 24th day of March, 1950, and in compliance with *The Highway Improvement Act*, being chapter 56 of the Revised Statutes of Ontario, 1937, and the regulations thereunder;

(b) before the day on which the King's Highway was so designated and in compliance with *The Highway Improvement Act* that was in force on that day; or

(c) in compliance with a permit therefor, in which case the making of compensation is subject to the provisions of the permit. R.S.O. 1990, c. P.50, s. 34 (14).

Procedure

(15) Every claim for such compensation shall be determined in accordance with subsections 14 (2) to (5). R.S.O. 1990, c. P.50, s. 34 (15).

Permits

(16) The Minister may issue permits under this section in such form and upon such terms and conditions as he or she considers proper, and may in his or her discretion cancel any such permit at any time. R.S.O. 1990, c. P.50, s. 34 (16).

Fee

(17) The Minister may prescribe the fee to be paid for any permit or class of permit under this section. R.S.O. 1990, c. P.50, s. 34 (17).

Intersections, territory without municipal organization

35. (1) In this section,

"intersection" means the part of the King's Highway contained within the prolongation or connection of the boundary lines of a private road that crosses the King's Highway.

Private road, King's Highway intersections in unorganized territory

(2) The Lieutenant Governor in Council may make regulations designating provisions of the *Highway Traffic Act* or the regulations thereunder that shall not apply in intersections in territory without municipal organization. R.S.O. 1990, c. P.50, s. 35.

PART II
CONTROLLED-ACCESS HIGHWAYS

Controlled-access highway designation

36. (1) The Lieutenant Governor in Council may designate any,

(a) highway; or

(b) proposed highway,

as a controlled-access highway and every highway so designated shall be deemed to be part of the King's Highway and the provisions of this Act and the regulations that apply to the King's Highway apply with necessary modifications to such controlled-access highway. R.S.O. 1990, c. P.50, s. 36 (1).

Previous controlled-access designation

(2) Any part of the King's Highway heretofore designated as a controlled-access highway under this Act or a predecessor thereof shall be deemed to have been designated in accordance with this section. R.S.O. 1990, c. P.50, s. 36 (2).

Order in council to be registered

(3) The order in council designating a highway or proposed highway as a controlled-access highway shall be registered in the proper land registry office and any such order in council heretofore registered shall be deemed to have been required to be so registered. R.S.O. 1990, c. P.50, s. 36 (3).

Designation not regulation

(4) A designation under this section is not a regulation within the meaning of Part III (Regulations) of the *Legislation Act, 2006*. R.S.O. 1990, c. P.50, s. 36 (4); 2006, c. 21, Sched. F, s. 136 (1).

Closing of intersecting municipal roads

37. (1) In this section,

"road" includes an unopened road allowance. R.S.O. 1990, c. P.50, s. 37 (1).

Same

(2) Subject to the approval of the Board, the Minister may close any road, other than a highway that is under the jurisdiction and control of the Ministry, that intersects or runs into a controlled-access highway. R.S.O. 1990, c. P.50, s. 37 (2).

Application for approval

(3) The Board may direct that notice of an application for approval of the closing of a road under this section shall be given at such time, in such manner and to such persons, including municipalities and local boards, as defined in the *Municipal Affairs Act*, as the Board determines, and may further direct that particulars of objections to the closing shall be filed with the Board and the Minister within such time as the Board directs. R.S.O. 1990, c. P.50, s. 37 (3); 2002, c. 17, Sched. F, Table.

Powers of Board

(4) Upon the hearing of the application, the Board may make an order refusing its approval or granting its approval upon such terms and conditions as it considers proper. R.S.O. 1990, c. P.50, s. 37 (4).

Appeal

(5) The Minister or a person, including a municipality or local board, as defined in the *Municipal Affairs Act*, that has filed particulars of an objection may, with leave of the Divisional Court, appeal to that court from any order made under subsection (4), and subsections 14 (4) and (5) apply with necessary modifications thereto. R.S.O. 1990, c. P.50, s. 37 (5); 2002, c. 17, Sched. F, Table.

Effect of physical closing

(6) Any road heretofore or hereafter closed under this section by the Minister in accordance with the approval of the Board by the placing or erecting of a fence, barricade or other work on the limit of a controlled-access highway shall be deemed to have been thereby legally closed. R.S.O. 1990, c. P.50, s. 37 (6).

Roadside controls, controlled-access highways

38. (1) In this section,

"centre point of an intersection" is the point where the centre line of the through part or parts of a controlled-access highway meets the centre line of or the centre line of the prolongation of any other highway that intersects or meets the controlled-access highway; ("point central d'une intersection")

"portable sign" means a sign or advertising device that is not permanently attached to the ground, a building or a structure or that is designed to be moved from place to place. ("panneau portatif") R.S.O. 1990, c. P.50, s. 38 (1).

Roadside buildings, trees, signs, activities, etc.

(2) Despite any general or special Act, regulation, by-law or other authority, no person shall, except under a permit therefor from the Minister,

(a) place, erect or alter any building, fence, gasoline pump or other structure or any road upon or within 45 metres of any limit of a controlled-access highway or upon or within 395 metres of the centre point of an intersection;

(b) place any tree, shrub or hedge within 45 metres of any limit of a controlled-access highway or within 395 metres of the centre point of an intersection;

(c) sell, offer or expose for sale any vegetables, fruit or other produce or any goods or merchandise upon or within 45 metres of any limit of a controlled-access highway or within 395 metres of the centre point of an intersection;

(d) place, erect or alter any power line, pole line or other transmission line within 400 metres of any limit of a controlled-access highway;

(e) display any sign, notice or advertising device, whether it contains words or not, other than one sign not more than sixty centimetres by thirty centimetres in size displaying the name or the name and occupation of the owner of the premises to which it is affixed or the name of such premises within 400 metres of any limit of a controlled-access highway;

(f) use any land, any part of which lies within 800 metres of any limit of a controlled-access highway, for the purposes of a shopping centre, stadium, fair ground, race track, drive-in theatre or any other purpose that causes persons to congregate in large numbers; or

(g) construct or use any private road, entranceway, gate or other structure or facility as a means of access to a controlled-access highway. R.S.O. 1990, c. P.50, s. 38 (2).

No authorization by others

(3) No person shall authorize or permit any act prohibited by subsection (2). R.S.O. 1990, c. P.50, s. 38 (3).

Application

(4) The Minister may order that subsection (2) or such clauses thereof as the Minister specifies do not apply within the limits of any local municipality or such parts thereof as the Minister specifies. R.S.O. 1990, c. P.50, s. 38 (4); 2002, c. 17, Sched. F, Table.

Order not regulation

(4.1) An order made by the Minister under subsection (4) is not a regulation within the meaning of Part III (Regulations) of the *Legislation Act, 2006*. 2006, c. 21, Sched. F, s. 128 (7).

Direction to remove, etc.

(5) The Minister may direct any owner of land,

(a) to remove therefrom or alter thereon any building, fence, gasoline pump or other structure or any road, tree, shrub, hedge, power line, pole line or other transmission line placed, erected or altered;

(b) to remove therefrom or alter thereon any sign, notice or advertising device displayed; or

(c) to close up any private road, entranceway, gate or other structure or facility constructed or maintained as a means of access to a controlled-access highway,

in contravention of subsection (2). R.S.O. 1990, c. P.50, s. 38 (5).

Exception

(6) Clause (5) (b) does not apply to a portable sign. R.S.O. 1990, c. P.50, s. 38 (6).

Direction to remove

(7) Where a portable sign is displayed contrary to the provisions of subsection (2), the Minister may direct,

(a) the owner of the portable sign, if the Minister is able to ascertain who and where the owner is;

(b) the person on whose behalf the portable sign is displayed, if clause (a) does not apply but the Minister is able to ascertain who and where that person is; or

(c) the owner of the land on which the portable sign is displayed, if clauses (a) and (b) do not apply,

to remove the sign. R.S.O. 1990, c. P.50, s. 38 (7).

Removal of sign

(8) Where a sign in respect of which a direction is given under subsection (7) is not removed within five days after the direction is given, the Minister may in writing authorize any person to enter upon the land involved and to do whatever is necessary to remove the sign. R.S.O. 1990, c. P.50, s. 38 (8).

Compensation

(9) Where a direction given under subsection (5) has been complied with, the Minister shall make due compensation to the owner of the land if the building, fence, gasoline pump or other structure or any road, tree, shrub, hedge, power line, pole line or other transmission line, sign, notice or advertising device, private road, entranceway, gate or other structure or facility was placed, erected, altered, constructed or used, as the case may be,

(a) before the 24th day of March, 1950, and in compliance with *The Highway Improvement Act*, being chapter 56 of the Revised Statutes of Ontario, 1937, and the regulations thereunder;

(b) before the day on which the controlled-access highway was so designated and in compliance with *The Highway Improvement Act* that was in force on that day; or

(c) in compliance with a permit therefor, in which case the making of compensation is subject to the provisions of the permit. R.S.O. 1990, c. P.50, s. 38 (9).

Procedure

(10) Every claim for such compensation shall be determined in accordance with subsections 14 (2) to (5). R.S.O. 1990, c. P.50, s. 38 (10).

Permits

(11) The Minister may issue permits under this section in such form and upon such terms and conditions as he or she considers proper and may in his or her discretion cancel any such permit at any time. R.S.O. 1990, c. P.50, s. 38 (11).

Fee

(12) The Minister may prescribe the fee to be paid for any permit or class of permit under this section. R.S.O. 1990, c. P.50, s. 38 (12).

Service roads

39. The Minister and any municipality may enter into agreements for the establishment, construction and apportionment of the cost of roads within the municipality for the purpose of providing means of access to a controlled-access highway at a point where access is permitted. R.S.O. 1990, c. P.50, s. 39.

PART III
SECONDARY HIGHWAYS

Secondary highways, designation

40. (1) The Lieutenant Governor in Council may designate any highway as a secondary highway and thereupon Part I and all the other provisions of this Act and the regulations that apply to the King's Highway apply with necessary modifications to such secondary highway. R.S.O. 1990, c. P.50, s. 40.

Designation not regulation

(2) A designation under this section is not a regulation within the meaning of Part III (Regulations) of the *Legislation Act, 2006*. 2006, c. 21, Sched. F, s. 128 (8).

PART IV
TERTIARY ROADS

Tertiary roads, designation

41. (1) The Lieutenant Governor in Council may designate an existing road that is in whole or in part in territory without municipal organization as a tertiary road, and thereupon the provisions of this Act and the regulations that apply to the King's Highway, except sections 33 and 34, apply with necessary modifications to such tertiary road. R.S.O. 1990, c. P.50, s. 41 (1).

maintenance

(2) Subject to subsections (4) and (5), a tertiary road shall be maintained by the Ministry, but such maintenance does not include the clearing or removal of snow therefrom or the application of chemicals or abrasives to the icy surfaces thereof. R.S.O. 1990, c. P.50, s. 41 (2).

liability for damages

(3) No action shall be brought against the Crown for damages caused by the default of the Ministry in maintaining a tertiary road, and the Crown is not liable for any damage sustained by any person using a tertiary road. R.S.O. 1990, c. P.50, s. 41 (3).

snow removal

(4) The Minister may enter into an agreement with any person for the removal of snow from a tertiary road or the application of chemicals or abrasives to the ice surfaces thereof, and the agreement shall provide that not more than 50 per cent of the cost of the work shall be paid out of the money appropriated therefor by the Legislature. R.S.O. 1990, c. P.50, s. 41 (4).

maintenance contributions

(5) Where the Minister considers it desirable that persons who own land in territory without municipal organization in which a tertiary road is situate should establish a local roads area and maintain it under the *Local Roads Boards Act* or elect road commissioners and maintain it under the *Statute Labour Act* or become incorporated under the *Municipal Act, 2001* or otherwise contribute to its maintenance, it shall not be maintained by the Ministry unless the interested persons enter into an agreement with the Minister for such maintenance, and the agreement shall provide that not more than 50 per cent of the cost of the work shall be paid out of money appropriated therefor by the Legislature. R.S.O. 1990, c. P.50, s. 41 (5); 2002, c. 17, Sched. F, Table.

Designation not regulation

(6) A designation under this section is not a regulation within the meaning of Part III (Regulations) of the *Legislation Act, 2006*. 2006, c. 21, Sched. F, s. 128 (9).

PART V
RESOURCE ROADS

Resource roads, designation

42. (1) The Lieutenant Governor in Council may designate a tertiary road as a resource road. R.S.O. 1990, c. P.50, s. 42 (1).

Load limits, etc., do not apply

(2) Sections 80, 108, 109, 110, 111 and 114 of the *Highway Traffic Act* do not apply to a resource road or to vehicles operated upon a resource road, as the case may be. R.S.O. 1990, c. P.50, s. 42 (2).

Designation not regulation

(3) A designation under this section is not a regulation within the meaning of Part III (Regulations) of the *Legislation Act, 2006*. 2006, c. 21, Sched. F, s. 128 (10).

PART VI
INDUSTRIAL ROADS

Industrial roads, designation

43. (1) The Minister may designate as an industrial road a private road that he or she considers necessary for the development or operation of the lumbering, pulp or mining industry but which in his or her opinion should also be used by the public for road purposes other than those of the industry. R.S.O. 1990, c. P.50, s. 43 (1).

Maintenance

(2) The Minister and the owner of an industrial road may enter into an agreement for the maintenance of the industrial road by the owner, and as long as the owner permits the public to use the industrial road the Minister may direct payment out of the money appropriated therefor by the Legislature of such proportion of the cost of maintenance as he or she considers requisite. R.S.O. 1990, c. P.50, s. 43 (2).

Jurisdiction and control

(3) Despite any other Act, an industrial road remains a private road under the jurisdiction and control of the owner, but subject to the use of the public as described in subsections (1) and (2). R.S.O. 1990, c. P.50, s. 43 (3).

Designation not regulation

(4) A designation under this section is not a regulation within the meaning of Part III (Regulations) of the *Legislation Act, 2006*. 2006, c. 21, Sched. F, s. 128 (11).

PART VII REPEALED

44. REPEALED: 2002, c. 17, Sched. F, Table.

45. REPEALED: 1996, c. 1, Sched. M, s. 52.

46. REPEALED: 2002, c. 17, Sched. F, Table.

47.-53. REPEALED: 1996, c. 1, Sched. M, s. 54.

54., 55. REPEALED: 2002, c. 17, Sched. F, Table.

SHORT TITLE	DESCRIPTION	CITATIONS	*STATUTE REF.*
1121472 Ontario Inc. v. Toronto (City)	**The scale of a dance floor and entertainment provided removed a use from being a 'restaurant' to an 'entertainment facility'.**	**(1998), 39 OR. (3d) 535 (Ont. CA)**	***PA s. 34.***
1218897 Ontario Limited v. Ann Borooah, Chief Building Official,City of Toronto and Ryding Auto Body Ltd.	**New evidence in addition to the information before the CBO may be entered on an appeal from the CBO's decision.** **The burden is on the applicant to show the CBO's decision was unreasonable or wrong in law.** **A standard close to correctness will be applied to decisions based on law or jurisdiction and a standard of reasonableness will be applied to questions of fact. Within the standard of reasonableness, the degree of deference or the "weight" to be given to any particular determination will depend on the circumstances.** **The relevant legality of a non-conforming use concerns it's status under the terms of the zoning by-law. Any unlawful or illegal matter relating to the use or occupation of the lands outside of the *Planning Act* is irrelevant.** **The requirement of continuity for a legal non-conforming use can be met although use/occupation has been interrupted by an event beyond the owner's control where there is a an intention to continue the non-conforming use and that use is continued as far as possible in the circumstances.**	**Ontario Superior Court of Justice, Court File No: 05-CV-285838PD2, 2005/10/28**	***BCA s.25*** ***PA s. 34(9)***
1514904 Ontario Ltd. and Wilson Bassile v. the Corporation of The Town of Mississippi Mills	**Where the basis of a challenge to a CBO's decision is not directed at its legal correctness but another aspect, the test is reasonableness of the decision. In the latter regard, it is not enough that the reviewing appeal body may have come to a different decision. The challenged decision must be unreasonable.**	**Ontario Superior Court of Justice, Perth Court File No: 686/05, 2005/08/25**	***BCA s. 25***

1423107 Ontario Inc. v. Woodstock (City)	**Any doubt about the compliance of a use to the zoning should be resolved in favour of the proponent. The use of premises for full nudity non-therapeutic body massage is not permitted by the applicable zoning by-laws permission for a 'health club', nor is the operation of a tanning bed facility. The building permit was properly refused.**	**[2001] O.J. No. 1330 , Court File No. 462/00 , Ontario Superior Court of Justice , Woodstock, Ontario , Heeney J. , Judgment: April 2, 2001.**	***BCA s. 8(2), PA s. 34.***
382671 Ontario Ltd. v. London (City) Chief Building Official	**Space within an apartment building which has the status of a legal non-conforming use may be converted to another apartment unit. In this regard, a building can be altered beyond its precise non-conforming status so long as such is reasonable.**	**28 O.R. (3d) 718, [1996] O.J. No. 1352, Court File No. 20060/96 Ontario Court (General Division), Killeen J., April 4, 1996**	***BCA s. 8(2), PA S. 34(9).***
723 Rymal Inc. v. Hamilton (City) Chief Building Official	**A zoning by-law permitting a (i) "Community and Residential Care Access Centre"; and, (ii) a restaurant, required both uses to exist to comply with the zoning. A demolition permit for an existing building, identified in a site plan approval of the restaurant use, is properly denied as the result would be the remaining "Community and Residential Care Access Centre" would violate the by-law.**	**[2001] O.J. No. 832, Court File No. 00-2262, Ontario Superior Court of Justice, Lofchik J., January 9, 2001.**	***BCA s. 8(1), PA s. 34.***
861168 Ontario Inc. v Foreshew, CBO of Lindsay (Town)	**Neither the costs of renovation nor the change in income-generating ability are determinative of whether the work requires site plan approval. If fewer people will be using a building after renovations that is indicative of the usability of the building being reduced. changes in 'usability' should be measured in relation to the facilities and matters set out in sec. 41(7)(a) of the Planning Act.**	**(1991), 3 OR. (3d) 721, 6 M.P.L.R. (2d) 84 (Gen. Div.)**	***BCA s. 8(2), PA s. 41..***

Alaimo v. York (City) Chief Building Official	**A CBO is under no common law duty to protect property neighbouring the site of new construction which would allow him to refuse a building permit for construction that complies with the BC. The law of nuisance is not applicable law for the consideration of building permit issuance. New construction which would put the chimney on a neighbouring building out of compliance with building standards is nonetheless legal.**	**(1995), 26 M.P.L.R. (2d) 69 (Ont. Gen. Div.)**	***BCA S. 8(2), BC s.9.21.4.4***
Albert Bloom Ltd. v. Bentinck	**A by-law passed to lift a holding 'H' provision in a zoning by-law is not capable of being tested against official plan conformity.**	**(1996), 31 OR. (3d) 317,37 M.P.L.R. (2d) 156,**	***PA s. 24, 36***
Albert Bloom Ltd. v. Bentinck (Township) Chief Building Official	**Where the issuance of a building permit is challenged by a third party evidence can be introduced by the permit applicant which was not before the CBO.**	**(August 17, 1995). Doc. No. RE 4858/95 (Ont. Gen. Div.)**	***BCA s. 25***
Association of PEO v. Minister of Municipal Affairs and David Brezer, Director	**The Building Code Act does not authorize a regulation which duplicates the professional regulation of Professional Engineers in Ontario, particularly as it respects their conduct or competency. To the extent the Building Code imposes such conditions, it should be read as excluding those members of professions already subject to a statutory professional regulatory regime.**	**March 28, 2007, Ont. Div. Ct. COURT FILE NO.: DC-06-081239-00**	***BCA s. 1.1, 8, and 15 (5) to (7) BC Art. 2.3.1.1, 2.17***
A.W Banfield Construction Ltd. v. Oshawa (City)	**The fact a demolition permit for an existing residential building has not been issued is not good reason to refuse the issuance of a building permit for a new building.**	**(1978) 6 M.P.L.R. 61,21 OR. (2d) 157 (Div. Ct.)**	***BCA S. 8, PA s. 33***
Axelrod Toronto (City)	**A By-law which provides that where a building of a certain type presently exists, it may only be replaced by a building with the height, floor area and density limitations prescribed in the by-law is not concerned with use of property or construction standards but rather with limiting future use where certain structures presently exist. While this may be a proper and meritorious planning purpose, it is not a purpose authorized by The Planning Act and such a by-law is invalid.**	**(1981), 15 M.P.L.R. 143 (Div. Ct.)**	***PA s. 34.***
Ayerswood Development Corporation v. London (City)	**A condition to the issuance of a building permit requiring the repair or replacement of a gabion wall specified in a site plan agreement was authorized by the Building Code Act as the site plan agreement imposed on-going maintenance responsibilities in respect of the gabion wall (which had failed) and therefore bore a nexus to the use of the land.**	**Docket: 33338;1501, 2006 CanLII 18521 (ON S.C.D.C.)**	***B.C.A. Sec. 8(3) P.A. Sec. 41 (13)***

Bakhtiari v. Axes Investments Inc.	**The plans examiner failed to require interior fire separation doors in a building although a by-law called for them in plain language.. If the employee had a problem with the requirement, he acted unreasonably in failing to take it up with his superiors and obtain an interpretation. That is enough for liability. By way of defence, there must be a reasonable explanation for how this could happen if their employee had exercised reasonable care. This is a life safety matter whose importance is well known in the industry. It is utterly foreseeable that failure to require these devices would, in the case of fire, place the health and lives of the occupants at risk.**	**[2001] O.J. No. 4720 , Court File No. 95-CQ-61731CM , Ontario Superior Court of Justice, November 30, 2001**	***BCAs. 31, CL.***
Bice v. Mississaugas of the New Credit	**A legal non-conforming use may be established even though it is not in operation i.e. a gasoline station which is set up but has not sold any product. The lack of proof of necessary certification of fuel tanks prevents the establishment of a legal non-conforming use.**	**DRS 98-09722 ,Court File No. T-1410-96 ,Federal Court, Trial Division ,Jerome, A.C.J. ,March 25, 1998.**	***PA s. 34 (9)***
Bondy v. Lessard	**A permit issued with full information regarding illegal construction on a property cannot subsequently be revoked when the relevant facts have not changed.**	**[1996] O.J. Kally s Restaurant Inc. v. Scarborough (City)	**A municipality cannot require the provision of more parking than that required by it's zoning by-law, as it stood on the date of the application for site plan approval, as a condition of site plan approval. Where a municipality imposes unlawful conditions to site plan approval the applicant is entitled to a building permit notwithstanding the site plan approval is outstanding.**	**(1993), 12 OR. (3d) 312, 14 M.P.L.R. (2d) 117, 99 D.L.R. (4th) 381, 62 O.A.C. 143 (Div. Ct.)**	***BCA s. 8(2), PA s. 41(4), (9).***
Kally's Restaurant Inc. v. Scarborough (City)	**Where the zoning examiner calculated a buildings parking requirement based on an erroneous interpretation of the by-law the court will direct the rescission of the permit with a direction that a new permit be issued if the plans are in accordance with the correct by-law interpretation.**	**Ontario Judgments: [1989] O.J. No. 1994, Action No. M186156/89 Ontario District Court - York Judicial District, Toronto, Ontario, Haley D.C.J., November 22, 1989.**	***BCA s. 25.***
Kamloops (City) v. Nielsen	**In order to obtain recovery for economic loss there must be a private law duty to the injured landowner alongside the public law duty. The plaintiff has to belong to the limited class of owners or occupiers of the property at the time the damage manifests itself. Loss caused as a result of policy decisions made by the public authority in the bona fide exercise of discretion will not be compensable. Loss caused in the implementation of policy decisions will not be compensable if the operational decision includes a policy element. Loss caused in the implementation of policy decisions, i.e. operational negligence will be compensable. Loss will also be compensable if the implementation involves policy considerations and the discretion exercised by the public authority is not exercised in good faith. Economic loss will only be recoverable if as a matter of statutory interpretation it is a type of loss the statute intended to guard against.**	**[1984] 2 SCR. 2, [1984] 5 W.W.R. 1. 10 D.L.R. (4th) 641, 29 C.C.L.T. 97, 26 M.P.L.R. 81, 8 C.L.R. 1, 54 N.R. 1, 66 B.C.L.R. 273**	***CL.***
Kim v. Mississauga (City)	**The BCA does not authorize 'part permits'. A permit issued to allow the plumbing for a car wash gives the car wash building, not just it's plumbing, protection from subsequently passed zoning by-laws.**	**(1996), 33 M.P.L.R. (2d) 135, 29 C.L.R. (2d) 98 (Ont. Gen.Div.)**	***BCA s. 1(1)(c), 7(a), 8(2), PA s. 34(9).***

Kingsbridge Development Inc. v. Hanson Needler Corp.	**A right included in an agreement of purchase and sale to allow the purchaser a subterranean easement for building purposes on the vendor's retained lands, is not denied or violated by the fact there are utilities in the easement area since their placement did not frustrate the construction necessary for the purchaser's building.**	**(1990), 71 OR. (2d) 636, 37 C.L.R. 180 (H.C.)**	***CL.***

La Sucrerie Casselman Inc. v. Cambridge (Township)	**The issuance of a building permit for a building on catastrophe-prone erosion area was a breach of the municipalities duty of care and rendered it liable to make good the damages. In the circumstances of this case there were no damages.**	**[2000] O.J. No. 4650, Court File No. 97-CV-002942-CM, Ontario Superior Court of Justice , Morin J.**	***BCA s.31, CL.***
Leeds & Grenville Board of Education v. Gerrard	**A geothermal heat pump system related to a new building is a 'building' as defined by the BCA. The Environmental Protection Act is 'applicable law'.**	**(1991), 8 C.E.L.R. (N.S.) 266 (Ont. Gen. Div.)**	***BCA s. 1, 8(2), EPA.***
Littler v. Mission (District)	**An inspector is under a duty of care not to issue permits/licenses which do not comply with zoning by-laws and liability will exist for damages suffered by the owner relying on the issuance.**	**(1991), 6 M.P.L.R. (2d) 164 (B.C. S.C.)**	***BCA s. 31, CL.***
Loblaws Inc. v. Ancaster (Town) Chief Building Official	**A building constructed pursuant to a permit issued for an intended use which does not comply with the zoning by-law is to require the occupant to comply with the by-law. The permit need not be rescinded. The official plan can be looked at to interpret the meaning of a zoning by-law provision. A use which is comprised of permitted and prohibited activities is not in compliance with zoning and the remedy is to limit the use to the permitted activities.**	**(1993), 13 M.RL.R. (2d) 94, 95 D.L.R. (4th) 695, 10 C.P.C. 232 (Ont. Gen. Div.)**	***BCA s. 8(2), 25, PA s. 34.***
Lock v. Middlesex Centre (Township) Chief Building Official	**In reviewing a decision of a CBO a standard of correctness will generally be applied to decisions based on law or jurisdiction and a standard of reasonableness will be applied to questions of fact. With respect to questions of mixed fact and law, the more the decision of the chief building official is a determination of law, the closer the standard will be to correctness whereas if the decision is dependent upon factual determinations within the special expertise of the chief building official the more deferential will be the standard. A nutrient management by-law which adopts the provinces minimum distance separation formulas is applicable law. THE MDS II formula does not apply to a single lot zoning residential, but to an area zoned residential.**	**[2001] O.J. No. 3588 , Court File No. 30955, Ontario Superior Court of Justice , Leitch June 29, 2001.**	***BCA 8(2), PA , S. 3(1).***

Lofaro v. North York (City) Chief Building Official	**Minor variances which relate to an 'existing' dwelling cease to have application when the building has ceased to exist except for a small fragment.**	**Action No. 17/91 and 439/91, 11 M.P.L.R. (2d) 278, Ontario Court of Justice - General Division, Toronto, Sheard J., July 14, 1992**	***BCA s. 8(2), PA s. 34(9).***

Maitland Valley Conservation v Cranbrook Swine	**To successfully defend charges on the basis of 'officially-induced error' the accused must show: (1) he considered the legal consequences of its actions and sought legal advice, (2) the legal advice obtained must have been given by an appropriate official, (3) the legal advice was erroneous, (4) the person receiving the advice relied on it, and (5) the reliance was reasonable.**	**DOCKET: C37250 and C37262, COURT OF APPEAL, ABELLA, MACPHERSON and SIMMONS JJ.A., APR 28 2003**	***BCA s. 36.***
Manchester v. North York (City) Chief Building Official	**Interim Control By-laws should be given a strict construction. The municipality's failure to give timely notice of passage of an ICB makes the by-law ineffective from the last date to give notice and not from the date of the by-law's passage.**	**(1994), 20 M.P.L.R. (2d) 213, 18 OR. (3d) 540, 115 D.L.R. (4th) 432, 72 O.A.C. 263 (Div. Ct.)(1993), affirming 15 OR. (3d) 690, 17 M.P.L.R.(2d) 150, 106 D.L.R. (4th) 646 (Gen. Div.)**	***BCA s. 8(2), PA s. 38.***
Mariani v. Puslinch Twp.	**A vendor who constructs his own house has the same obligation as a commercial builder-for-sale for damages suffered by a subsequent owner by negligent construction which raises a foreseeable risk of injury to persons or danger to property. The damages are the cost of putting the house in a non-dangerous state.**	**ONTARIO COURT OF APPEAL, MAY 12 2004**	***CL.***
Mayhew v. Hamilton (Twp.)	**A building permit is properly issued for a parcel of land which was required by the terms of a subdivision agreement to be zoned so as to prohibit buildings, but which in fact was zoned to allow buildings, as a subdivision agreement is not applicable law.**	**Court File No. 004918 Feb. 6, 2002**	***BCA s. 8(2) PA s. 51(26)***
McDonald's Restaurants of Canada Ltd. v. Humm	**No ownership in the lands is necessary to make a permit application. Certainly the owner of a leasehold interest in the lands under a long-term lease is entitled to apply. Section 5(2) of the 1983 Building Code Act which gives power to council to enact by-laws as to the application forms should not be construed to allow council to extend its authority in effect by compelling the applicant to agree to do anything. The applicant cannot be required to enter into an agreement with the applicant. The CBO does not make a discretionary decision in deciding to issue or deny a permit. Private agreements restricting the use of a site are not 'applicable law'.**	**(1983), 24 M.P.L.R. 103 (Co. Ct.)**	***BCA s. 7(b), 8(2).***
McLear v. Mason	**An unlicensed salvage yard was an illegal non-conforming use due to the lack of a license.**	**(1988), 65 OR. (2d) 228, 39 M.P.L.R. 111 (H.C.)**	***BCA s. 8(2), PA s. 34(9).***

Midland (Town) v. Fred DaSilva Enterprises Ltd.	**A building permit issued ostensibly for a weeping tile bed for a shopping centre will give the intended building grandparent rights over a subsequently passed zoning restriction prohibiting the use.**	**(1977), 3 M.P.L.R. 158, 16 OR. (2d) 657, 79 D.L.R. (3d) 88 (CA.)**	***BCA s. 8(2), PA s. 34(9).***
Mississauga (City of) , Peel District Public School Board et al v. Britannia North Holdings Inc.	**A condition of draft subdivision approval requiring satisfaction of the school boards regarding the adequate provision and distribution of educational facilities is within the jurisdiction of the approval authority. The 'adequate provision and distribution' of educational facilities is distinct from 'the adequacy of school sites'.**	**Ontario Superior Court of Justice, Divisional Court, MacFarland, Dunnet and McCartney JJ. Judgment: December 3, 1999**	***PA s. 51(24)(j).***
Mississauga (City) v. Vandenbergh	**Section 76(1) of the Planning Act does not authorize the increase in the number of apartment units within an existing multi-unit building.**	**Court File No. A4740/96, Ontario Court of Justice (General Division), Brampton, MacKenzie J., January 7, 1998**	***PA s. 76(1).***
Mortimer v. Cameron	**The failure by a plans examiner and a site inspector to use reasonable care in the approval of a renovation was the causative factor in personal damages awarded in the amount of $4.5 millions.**	**(1994), 19 M.P.L.R. (2d) 286, 17 OR. (3d) 1, 68 O.A.C. 332,111 D.L.R. (4th) 428 (CA.), additional reasons at (June 24, 1994), Doc. CAC12036 (Ont. CA.). leave to appeal to SCC. refused (1994), 23 M.P.L.R. No. 4545, Court File No. 01-CV-205761, Ontario Superior Court of Justice, Day J., Judgment: November 21, 2001.**	***BCA s. 25.***
Olympia & York Developments Ltd. v. Toronto (City)	**For the purposes of a site plan agreement a municipality is entitled to demand the registered owner, not only a long-term ground lessee, execute the agreement. A ground lessee is not an owner.**	**(1980), 29 OR. (2d) 353. 12 M.P.L.R. 219, 113 D.L.R. (3d) 695 (Div. Ct.)**	***BCA s. 8(2), PA s. 41.***
Ottawa (City of) v. The Chief Building Official of the City of Ottawa and 1479333 Ontario, Inc.	**For a law to be relevant and applicable to the question of the issuance of a building permit a real and logical nexus must exist between the applicable law and the essential purpose of the BCA, which is the construction, and demolition of buildings.**	**Ontario Divisional Court, November 21, 2003, [2003] O.J. No. 4530, Court File No. 03-DV-857**	***BCA s. 8***
Ottawa (City) v Shore & Horwitz Construction Co.	**A building constructed for the federal crown on federal land is not subject to provincial building permit regulation.**	**[1960] OWN. 137, 22 D.L.R. (2d) 247 (H.C.)**	***BCA s. 8(2).***
Oxbow Lake Cottagers Association v. Lake of Bays (Township)	**The protection provided by the Planning Act to legal non-conforming uses does not extend to permitting the introduction of new buildings or structures for the protected uses.**	**2006 CanLII 32324 (ON S.C.), Court File No. 04-B7727**	***P.A. Sec. 34(9)***

Paris (Town) v Smith	**A term in a site plan agreement restricting the use of the site was an illegal, but severable, provision.**	**(1995), 29 M.P.L.R. (2d) 277 (Ont. Gen. Div.)**	***PA s. 41.***
Peacock v. CBO of Norfolk County	**An applicant's permit rights crystallize on the date the CBO makes the decision to issue or refuse a permit. An interim control by-law passed after an application is filed but before the decision must, absent extraordinary facts, be taken into account. A statute prohibiting the discharge of contaminants is applicable law relative to a permit application for a hog barn. The doctrine of legal non-conforming use cannot be used to protect expansion that necessarily entails grave environmental and public safety dangers.**	**SUPERIOR COURT OF JUSTICE, COURT FILE NO.: 0002/02, 2003/07/03** **Ontario Court of Appeal Court File no. C42944, June 28, 2006**	***BCA s. 8(2), 25, PA s. 34(9).***
Pedwell v. Pelham (Town)	**The fact a condition precedent to the issuance of a building permit (Health Unit septic approval) is not satisfied is irrelevant where the municipality frustrated the satisfaction of the condition by advising the approval authority that the proposed land use was prohibited by the zoning by-law. A municipal council has no authority to direct the CBO to not do an act which the CBO is statue bound to carry out. Compensation for damages follows the wrongful refusal to issue a building permit.**	**(1998). 47 M.P.L.R. (2d) 222 (Ont. Gen. Div.), additional reasons at (February 26, 1999), Doc. Toronto 5650.5/95 (Ont. Gen. Div.)**	***BCA s. 8(2), 31.***
Pedwll V Town of Pelham	**A CBO has a right to consult with other Town officials but must make an independent decision. The Environmental Assessment Act is applicable law.**	**DOCKET: C30587, COURT OF APPEAL, WEILER, ROSENBERG and ARMSTRONG JJ.A., MAY 9, 2003**	***BCA s. 8, EAA.***
Pension Fund Realty Ltd. v. Ottawa (City)	**A park levy relating to an addition to an existing building is to be calculated without regard for the portion of the site relating to the existing building. Where lands have been cleared of existing buildings, new construction is proposed 'development' and not 'redevelopment' .**	**(1981), 32 OR. (2d) 611, 122 D.L.R. (3d) 308 (H.C.)**	***PA s. 42(1).***
Peterson v. Ajax (Town) Fire Marshal	**In the absence of any evidence that a change in facts has increased fire hazards in a building neither an order of a fire marshall nor a Fire Code Commission ruling can be sustained.**	**Ontario Court of Justice (General Division), Divisional Court, [1998] O.J. No. 3303, Court File No. 750-9, B. Wright J., August 18, 1998.**	***BCA s. 12(2), FC s. 21, 26, 27.***

Petruzzi v. Coveny	**The purchaser of a house constructed by the previous owner is entitled to damages jointly from the owner/builder and the municipality whose inspector was negligent in inspecting the work. Mental distress damages are properly awarded. The original owner/builder is also responsible for damages relating to non-building code defects.**	**(1991), 7 M.P.L.R. (2d) 183, 48 C.L.R. 225 (Ont. Gen. Div.)**	***BCA s. 12, 31, CL.***
Pettinato v. Oakville (Town)	**Clear language is required to avoid an interpretation of a zoning by-law which advances a residential community's quality of life.**	**(1996), 33 M.P.L.R. (2d) 216 (Ont. Gen. Div.)**	***PA s. 34.***
Philpott v. Innisfil (Town)	**It is not correct/reasonable to respond to a building permit application submitted after the passage of a zoning by-law amendment which would have (inadvertently) permitted the building/use which was the subject of the permit where the by-law error was subsequently corrected (and at no time was the by-law in law amended to permit the said building/use).**	**2006 CanLII 28741 (ON S.C.), Docket: CV-06-145** **Appeal Dismissed Mar. 28/07 ONCA, CT. FILE NO.: DC-06-081239-00**	***B.C.A. Sec. 8 P.A. Sec 34***
Phi Delta Beta of London Inc. v. London (City) C.B.O.	**A CBO is entitled to consider the intended use of a property in considering the conformity to zoning although that use has not yet been established. A fraternity house cannot be considered a 'single housekeeping unit'.**	**(1995), 25 M.P.L.R. (2d) 140 (Ont. Gen. Div.), aff'd (1996), 36 M.P.L.R. 319 (Ont. Div. Ct.)**	***BCA s. 8(2), PA s. 35.***
Pickle Lake (Township of) v. Shetterly Enterprises Ltd.	**The test of "reasonableness" is applicable to review of an application under Section 15(10)(1) of the BCA to confirm an order of a CBO consequent on the CBO's decision that there existed an "immediate danger to the health or safety of any person" and to obtain an order respecting the reimbursement of costs.**	**Ontario Superior Court of Justice, Court File No: 05-114, Date: 2006-02-27**	***BCA s. 15(10)***
Polla v. Toronto (City) Chief Building Official	**Where the legality of site plan conditions is in issue the court has jurisdiction and will exercise it even though an appeal may be lodged with the OMB. A site plan condition requiring the removal of a lawful structure is illegal.**	**[2000] O.J. No. 4399, Court File No. 00-CV-194025, Superior Court of Justice, Molloy J., November 21, 2000.**	***BCA s. 8(2), PA s. 41.***
Putnam v. Stirling-Rawdon (Township)	**A dwelling and garage connected by an underground tunnel is one building. As the CBO issued a building permit for a structure at a location not permitted by the by-law the municipality is estopped from challenging the regularity of the garage.**	**[2000] O.J. No. 734, Belleville Court File No. 1880/99, Superior Court of Justice, Belch J., March 6, 2000.**	***BCA s. 1, 12.***

Quay West v. Toronto (City)	**A proposed development does not have grandparent rights where a building permit 'ought to have been issued' before the passage of a prohibitory by-law, but had not in fact been issued. Site plan approval is a prerequisite to the issuance of a building permit, absent unusual circumstances.**	**(1989), 47 M.P.L.R. 109 (Ont. Div. Ct.), leave to appeal to CA. refused (1989), 47 M.P.L.R. 109 (Ont. CA.)**	***BCA, s. 8(2), PA s. 34(9), 38(8).***
R. Pickles	**The limitation period for laying a charge for building without a permit starts the day the work is complete, not the day the municipality discovers the offence was committed. The discoverability rule is not applicable.**	**COURT OF APPEAL FOR ONTARIO, DOHERTY, MACPHERSON and SIMMONS JJ.A, February 24, 2004.**	***BCA s.36(8).***
R. v. 1267017 Ontario Ltd.	**A charge of failing to comply with an order to stop work until a building permit is obtained will be dismissed, despite the recipient's subsequent failure to obtain a permit, where there is no evidence that work continued. An order to comply requiring a building permit to be obtained is violated regardless of when the illegal work was done when no permit is applied for.**	**[2001] O.J. No. 3412, Ontario Court of Justice Newmarket, Ontario, Lampkin J. Oral judgment: July 19, 2001**	***BCA s. 12(2), 14.***
R. v. 593288 Ontario Ltd.	**In the case of proceedings for failure to comply with an order to comply, the one year limitation in section 36 (8) runs from the time when damage manifested itself.**	**[1998] O.J. No. 5670, DRS 99-07931, Ontario Court of Justice (Provincial Division), Newmarket, Lampkin Prov. J., December 18, 1998**	***BCA s. 36(8).***
R. v. King Insulation Services Ltd.	**The installation of insulation requires a building permit even though no structural alterations are involved. Such installation is a material alteration of a building.**	**(1981), 13 M.P.L.R. 127 (Div. Ct.)**	***BCA s. 1.***
R. v. Springman,	**At common law, a 'building or structure' does not include mobile trailers.**	**[1964] SCR. 267, 42 CR. 407, 47 W.W.R. 298, [1964] 3 CCC. 105**	***BCA s. 1.***

Re A.W. Banfield Construction Ltd. et al. and City of Oshawa et al.

21 O.R. (2d) 157
ONTARIO

ONTARIO
HIGH COURT OF JUSTICE
DIVISIONAL COURT
GRIFFITHS, RUTHERFORD AND STEELE, JJ.
5TH SEPTEMBER 1978.

APPLICATION to compel the issuance of building and demolition permits.

J. G. Parkinson, Q.C., for applicants.

R. M. Holland, for respondents.

The judgment of the Court was delivered orally by

STEELE, J.:-- This is an application for judicial review and for an order directing the City of Oshawa and its building commissioner to issue a building permit to the applicants to permit them to build an eight-unit apartment building on certain lands in the city owned by the applicant, and a further order directing the city to deliver a demolition permit to the applicants with respect to the structure now on the lands.

The lands are zoned in such a manner as to permit the use of the site for the proposed apartment and the city, by its building commissioner, has in fact approved the plans for construction of the building.

The lands are subject to a demolition control by-law enacted pursuant to s. 37a of the Planning Act, R.S.O. 1970, c. 349, as amended [1974, c. 53, s. 6], and demolition is required in connection with the applicant's plans to replace the existing structure with the proposed apartment building.

The applicant applied to the city for a demolition permit and on November 21, 1977, Council of the city passed a resolution as follows:

> That Council advise the Applicant that should he wish to proceed with construction of the proposed building, his plans will be reviewed at the time of application for a building permit and should the proposed building conform to the existing zoning of the site, Council will then issue a demolition permit for the existing structure at 105 Agnes Street.

Subsequently, the applicant filed the permit and received a letter from the building commissioner which read, in part, as follows:

> Subject to the foregoing, please be advised that the building permit is available from this office for the proposed apartment building at the reference location, upon approval by Oshawa City Council re Park Dedication (By-law number 165-75) and Demolition Control (By-law number 9-75).

It has subsequently been ascertained that the proper park dedication in accordance with By-law 165-75 is $2,100 and the applicant has tendered such sum in payment therefor. I might also indicate that the applicant has tendered various sums in purported compliance with sewer connections and other matters that may be properly applicable to the application.

As a result of this communication, the applicants were advised by the employees of the City of Oshawa that the application would be before City Council on December 19th. At that meeting, the solicitor for the applicants attended the Council meeting and requested permission to make representations. The Council refused to hear him and referred the application back to the Planning and Development Committee and, at the same time, Council refused to deliver the demolition permit in accordance with its earlier resolution.

At a meeting in April of 1978, the Council rescinded its earlier resolution with respect to the demolition permit and from that date, until the present, neither a building permit nor a demolition permit has been issued by the city and, in

fact, such issuance is resisted.

The basic argument of the city is that a building permit should not be issued until the demolition permit has been issued and relies on its by-law passed under s. 37a of the Planning Act. The argument is that s-s. (3) of s. 37a relates to a straightforward demolition permit application and gives the Council a discretion to issue or to refuse, and that that section is applicable to the present case. It says that s-s. (6) is not applicable, because no building permit has been issued. Subsection (6) provides that a council must issue a demolition permit where a building permit has been issued to erect a new building.

I reject this submission because I am of the opinion that it does not reflect the intention of the Legislature in enacting s. 37a. It should be noted that s. 37a provides authority only when the municipality has a by-law enacted under s. 36 [rep. & sub. 1972, c. 118, s. 7] in force. Section 36 of the Planning Act relates to by-laws prescribing standards for the maintenance and occupancy of residential property. Considering this in light of the fact that the only conditions that a municipality may impose upon a demolition permit relate to an assurance that a new building will be erected and the provision of a penalty if it is not erected, I am of the opinion that s. 37a was enacted to maintain residential properties within a municipality. Section 37a has two purposes. First, under s-s. (3), to provide for a demolition permit where a person proposes to demolish a residential building without any immediate future plans. Secondly, under s-s. (6), to provide that a municipality must issue a demolition permit where a building permit for the erection of a new building has been issued. In this latter case, the municipality may impose conditions.

It was submitted that because there was a right of appeal from the Council's refusal to issue a demolition permit, either
under s-s. (3) or s-s. (6) to the Ontario Municipal Board that the jurisdiction of this Court was fettered and relief in the nature of mandamus should not issue. I am of the opinion that there is nothing in s. 37a which interferes with the normal rights of an applicant to obtain a building permit where he is otherwise clearly entitled thereto. If the Legislature had intended otherwise, it should have said so in clear and unambiguous terms.

I am of the opinion that the principles set out in City of Ottawa et al. v. Boyd Builders Ltd., [1965] S.C.R. 408, 50 D.L.R. (2d) 704, are applicable and that the applicants have a prima facie right to the building permit requested. An order will issue directing such permit upon the applicants paying to the city the $2,100 park levy and such other appropriate sewer connection fees, or other matters that have already been tendered. I do not go into the details of such fees because I am sure that they are not matters which are in issue and are not matters which would warrant, in any respect, the refusal to order the building permit.

With respect to the application to order the issuance of the demolition permit, I am of the opinion that other factors prevail. While it may be that the city has acted in a manner which leaves much to be desired by reason of their recession of their stated resolution, I do not think that this Court has authority to order the issuance of a demolition permit at this time. The original city resolution may merely be a statement of what in fact the law is, as we have found it, that a demolition permit shall issue after the issuance of the building permit. However, the conduct of the city would indicate that for some reason unknown to this Court, they have changed their mind and wish to delay the construction of building in this area. Be that as it may, there is clear authority under s. 37a(6) of the Planning Act for the city to impose conditions upon a demolition permit and that, if the applicant is dissatisfied with such conditions, there is a right of appeal or application to the Ontario Municipal Board not only in the first instance, but even after the initial conditions have been imposed if they are found not to be able to be complied with at a later date. The order of this Court ordering the issuance of the building permit does not in fact issue such permit. That is within the control of the municipality. Although we may assume that the municipality will comply with the order given by this Court, the permit has not in fact been issued at the present time. In addition, the Council has authority to impose conditions and

there is a right of appeal to the Ontario Municipal Board. There being another remedy open to the applicant with respect to the demolition permit the remedy of mandamus should not be granted. The application for an order for the issuance of the demolition permit will therefore be refused.

The costs of this application will be payable by the respondents to the applicants.

Order accordingly.

Alaimo v. York (City) (Chief Building Official)

Between
Peter Alaimo, applicant, and
P.D. Hansen, Chief Building Official, City of York, respondent

[1995] O.J. No. 862
DRS 95-15150
Court File No: RE4741/94

Ontario Court of Justice (General Division)
D. Lane J.
Heard: January 31, 1995.
Judgment: March 30, 1995.

Counsel:
Karl D. Jaffary, Q.C., for the applicant.
Brian W. Haley, for the respondent.

[para1] D. LANE J.:-- This is an application by Peter Alaimo, a property owner in the City of York, against the Chief Building Official of that City. The application is brought pursuant to s. 25(1) of the Building Code Act which provides that any person who considers himself aggrieved by an order or decision made by a Chief Building Official may appeal the decision to a Judge of the Ontario Court (General Division).

[para2] The decision appealed from is contained in a letter dated November 30, 1994 in which the Respondent refused to issue a permit for certain construction on lands known municipally as 46 Snider Avenue in the City of York.

[para3] The Applicant seeks an order requiring the Respondent to issue the building permit, and costs.

[para4] The most significant facts are not in dispute. The Applicant obtained certain variations to the City of York zoning by-law from the Committee of Adjustment of the City of York on March 13, 1990. Thereafter, on May 4, 1992, the Applicant's agent applied for a building permit based on certain plans that were examined by the Respondent's staff, which took the position that s. 9.21.4.4(1) of the Ontario Building Code prohibited the intended construction because of the proximity and height of chimneys on the adjacent building. Shortly put, the Code requires that a chimney must extend not less than 600mm above the highest surface within 3 metres of the chimney. A permit for the building was not issued. The Applicant acknowledges that, in the belief that a permit would be issued shortly, he proceeded with form work for the new foundation, but he was ordered to stop work on June 2, 1992 and did so.

[para5] Attempts to find a solution satisfactory to the Building Department were not successful and on April 6, 1993, the Respondent classified the application as "non-active". In 1994, the Applicant submitted a new set of drawings. The design of the second floor had been revised in a fashion that would satisfy the concerns of the Respondent. The second floor level was set back to provide a separation from the neighbouring chimneys. A permit based on those drawings was issued on August 3, 1994. The Applicant states that it was his hope that he would be able to construct the building he had originally applied for, and that before construction reached the second floor level, he would have solved the problem of the adjacent chimneys in some other way.

[para6] Sometime after the issuance of the building permit, the Applicant learned of the provisions of s. 24 of the Building Code Act, providing for an application to the Building Code Commission for the resolution of any dispute between any applicant or holder of a permit and the Chief Building Official. The Applicant applied to the Building Code Commission which conducted a hearing and issued a ruling on November 22, 1994. The Building Code Commission considered the interpretation of Article 9.21.4.4 of the Building Code Act and the submissions of both the Applicant and the

Respondent Chief Building Official. At the hearing, the Respondent put his position, that the article prevented new construction based on the location of the two existing chimneys on the adjacent property. He also argued that he had a common law duty of care extending to neighbouring properties

and that he considered the common law to be "applicable law" under s. 8(2) of the Building Code Act.

[para7] The Commission ruled in favour of the Applicant. It decided that Article 9.21.4.4 applied only to the proposed construction on the Applicant's property and was not applicable to existing chimneys on adjacent properties. It also ruled that the Code does not address any adverse effect to adjacent properties in the matter of chimney flues, and that if there is any cause for concern after construction, with regard to life safety and the protection of property of the adjacent buildings, other legislation is available. It appears to me that this decision of a statutory tribunal acting within its powers in a dispute between the very parties before me renders the merits of the dispute res judicata. The principle is not confined to decisions of courts. However, the case was not argued on the basis of res judicata and accordingly I will not decide it on that ground.

[para8] Shortly after the Building Code Commission decision, the Applicant again attempted to obtain a permit for the building he wished to build, the one shown in the drawings filed in 1992. Applicant's counsel advised the City of York that the Applicant persisted in his demand for a permit. On December 1, 1994, the Applicant received the letter dated November 30, 1994 giving the Respondent's decision. The Applicant reattended at the municipal offices on December 2, 1994 to make certain that it was clear that he was seeking a permit on the drawings that are before the court. In his affidavit, the Applicant says that a member of the City of York Building Department advised that "a permit cannot be issued on the plans because they do not address the issue of the chimney".

[para9] This application was then launched on December 8, 1994.

[para10] Section 8(2) of the Building Code Act provides in part as follows:

> "The Chief Building Official shall issue a permit...unless,
>
> (a) the proposed building, construction or demolition will contravene this Act or the building code or any other applicable law;"

[para11] The Building Code provides in s. 1.1.3.2, the definition section, in part as follows:

> "The words and terms in italics in this code have the following meaning for the purposes of this Code, and where indicated, the following meaning for the Act as well."

[para12] The following definition was added to the Code by Ontario Regulation 160/93:

> "Applicable law means, for the purposes of s. 8 of the Act, any general or special Act, and all regulations and by-laws enacted thereunder, which prohibit the proposed construction or demolition of the building unless the Act, regulation or by-law is complied with." (emphasis in original)

[para13] The Applicant submits that "the common law right of every man is to build upon his own land whatever kind of building he sees fit so long as it is not a nuisance, public or private. It requires an express statute to take away that right of property": City of Toronto v. King (1923) 54 O.L.R. 100, 102, (App.Div.). That has been the law since long before the enactment of the Ontario Building Code Act. In Mackenzie v. City of Toronto [1915] O.W.N. 820, at 821, Middleton J. observed:

> "When the plans and specifications of the proposed building conform to the building by-law the duty of the civic official is to issue the permit. ... The company proceeds entirely at its own risk, and must at its peril avoid committing any nuisance or the violation of any valid regulation applicable to its undertaking."

[para14] Rogers, Canadian Law of Municipal Corporations at p. 862.17 cites Mackenzie, supra, in support of the statement:

> "So a permit cannot be refused on the grounds that the building may be used in such a manner as to become a
>
> nuisance....".

[para15] Rogers, supra, also notes at p. 862.16:

> "The question has arisen in some cases whether the duty to issue a permit is absolute once compliance with all by-laws is shown or whether the council or its official has a discretion to refuse a permit notwithstanding. It seems that in all provinces the duty to issue a permit is an absolute one and does not involve an exercise of discretion as there is in the granting of municipal trade or business licences";

and at p. 862.17:

> "Thus it appears that a building permit cannot be refused for reasons which are extraneous to the question whether the plans for the building comply with the by-laws in force relating to construction and whether the intended uses of the property are within the permitted uses of the by-law."

[para16] Accordingly, it is well established that: "An

owner who has been refused a permit to erect or alter a building which conforms with the requirements of a building construction or building restriction by-law is entitled to a mandatory order directing the issue of the permit.": Roseburg v. North Grimsby, [1952] O.W.N. 745 (C.A.).

[para17] These authorities show that an official has no discretion to refuse to issue a permit when all of the statutory requirements have been fulfilled.

[para18] The Applicant further submits that the Respondent cannot rely on any general common law duty of care to adjoining residents, unless such duties can be grounded in "applicable law" within the meaning of the Ontario Building Code Act.

[para19] The Respondent finds support for the concept of common law power for Chief Building Officials in the decision of Cosgrove J. in Leeds and Grenville v. Gerard, (unreported, Oct. 4, 8, [1991] O.J. No. 1825). Cosgrove J. found that the Chief Official was required to act "responsibly - that is professionally and reasonably" and that he had a duty of care to persons whose relationship was sufficiently close that they

should be within his contemplation as likely to be injured by a breach of that duty. The Leeds case turned on the issue of whether persons proposing to pump a toxic chemical into pipes that could leak into the ground water required a certificate of approval under the Environmental Protection Act, and the court found that such an approval was required.

[para20] The Leeds case proceeds upon the basis that the Chief Building Official has a duty at common law not to grant a permit where the result might be to cause damage to someone. I think that is what Cosgrove J. meant by saying the official must act "responsibly - that is professionally and reasonably" and by citing the duty of care referred to in City of Kamloops v. Nielsen et al, [1984] 2 S.C.R. 2.

[para21] Since 1991, when Leeds was decided, the Building Code has been amended to define "applicable law" in terms that confine it to statutes, regulations or by-laws which prohibit the proposed construction of the building unless complied with. This definition excludes common law considerations such as nuisance. It also confines the relevant enactments to those prohibiting the erection of buildings unless complied with. It seems to me that the decision in Leeds has not

survived this statutory change.

[para22] If I am wrong in this conclusion, I turn to the common law as put forward by the respondent.

[para23] It is argued that the Chief Building Official has

a common law duty of care to those who foreseeably may be affected by his act of approving the building permit: City of Kamloops v. Nielsen and Hughes, [1984] 2 S.C.R. 2. Accepting that to be the law, does that justify withholding the permit in the instant case? In my view, it does not for two reasons:

> (1) The duty of care may be fully discharged by warning the neighbouring land owner to review the effectiveness of his chimney in the new circumstances. There is no need to prohibit the erection of the nearby building.
>
> (2) The Chief Building official can only be liable if he acts in breach of his duty under the statute. Kamloops, supra, is not authority for the view that the Municipality is liable for the consequences to neighbours of every building erected under a permit issued by it. There must be an underlying breach of duty under the Code
>
> before there can be any question of liability to others. In Kamloops itself, the Municipality knew of the placing of the foundations upon fill rather than solid ground and did not effectively prevent the builder from continuing construction without remedying the defect.

[para24] At p. 21, Wilson J. defined the two important questions: "(1) What was it that the building inspector failed to do that is alleged to have contributed to the plaintiff's damage? and (2) Was he under a duty to do that thing?" She goes on to point out that unless the inspector was under a duty to do what he failed to do, there could be no liability. In short, Kamloops widens the scope of persons affected by a municipality's breach of duty, but does not create new duties.

[para25] In the case at bar, the prospect of civil liability does not add to the Chief Building Official's powers nor to his obligations. They remain the same, as defined in the statute - to issue the permit unless the proposed structure would contravene the Building Code Act or any other applicable law. There is no power to attach extraneous conditions through some right derived in common law: Napanee v. Doornekamp, [1970] 2 O.R. 419, 424 (H.C.J.).

[para26] The essence of the Chief Building Officer's position is set out in his letter of November 30, 1994:

> "Although the Code may or may not directly deal with the problems relative to the neighbouring chimney, I am under a common law duty not to permit construction which may create a hazard with respect to the functioning of the neighbours chimney(s)."

[para27] In my view, no such common law duty exists. Its existence would be in direct conflict with the Building Code Act which commands the issuance of the permit unless a contravention of applicable law as defined is shown.

[para28] Neither the Respondent's belief in the proper interpretation of s. 9.21.4.4 of the Ontario Building Code, nor his objections to the decision of the Building Code Commission set out in paragraph 33 of his affidavit, can be a basis for withholding a permit.

[para29] The Respondent refers in paragraph 34 of his affidavit to the Code of the American National Fire Protection

Association, to a textbook on gas utilization and to excerpts from publications by the British Department of the Environment and by the Canadian Standards Association. None of these documents is "applicable law" within the meaning of the Building Code Act.

[para30] The Respondent, in paragraph 35 of his affidavit, advises that since the commencement of these proceedings he has become aware of certain provisions of the Ontario Gas Utilization Code, 1989. The Energy Act, in s. 28(1), provides that regulations may be made for the "handling and use of hydrocarbons", and particular examples of the exercise of that power are listed in subsections (a) through (p). Subsection (b) of s. 28 provides as follows:

> (b) requiring and providing for the approval of design and construction standards for appliances and works.

[para31] Section 1 of the Energy Act contains the

following definitions:

"Appliance" means a device that uses a hydrocarbon and includes all valves, fittings, controls and components

attached or to be attached thereto;

"Work" used as a noun means the facilities used in the handling of a hydrocarbon.

[para32] Pursuant to the power contained in s. 28(1), Regulation 331 of the Revised Regulations of Ontario was enacted entitled "Gas Utilization Code". By s. 9 of that Regulation, the Ontario Gas Utilization Code, 1989 is adopted by reference into the Building Code.

[para33] Section 5.14 of the Ontario Gas Utilization Code does set standards for the height of the chimneys of gas appliances in relation to both the roof of the building through which it passes and "any other obstruction". The regulations contemplated by s. 28(1)(b) of the Energy Act are regulations governing the construction and the standards for works used in the handling of a hydrocarbon. Regulations under that Act do not purport to regulate construction of adjacent structures or buildings. No such power is contained in the Energy Act, or purported to be given by that Act's power to make regulations. While incorporation into the Building Code makes them "applicable law", it does not alter

their substantive effect. If it were otherwise, any owner of a building with a low chimney and a gas furnace would, by the act of building his chimney, have imposed height restrictions on his neighbour's land. No statute, by-law or code in Ontario purports to create such restriction. The sections of the Code relied on do not regulate adjacent buildings; they regulate chimneys. It is for the owner of the regulated gas appliance to bring and keep his machinery and his chimney in compliance with the regulations that govern its operation.

[para34] As the Commission ruled, if there is any cause for concern following construction, other legislation is available. I add to that the common law of nuisance: T.H. Critelli Ltd. v Lincoln Trust and Savings Co. et al. (1978) 20 O.R. (2d) 81, (H.C.J.). While those who build in a way that has an adverse impact on neighbouring buildings may be liable in damages for nuisance, it is no part of a Chief Building Official's duty to anticipate such a claim, or to attempt to prevent construction that might be adjudged in the future to have given a property owner a civil remedy. The law of nuisance is not "applicable law" within the meaning of the Building Code Act.

[para35] It is clear that the Respondent has been adamant in his view since June of 1992. Notwithstanding the "final" resolution of the matter by the Building Code Commission on November 22, 1994, the Respondent has refused to do his statutory duty and issue the permit. Instead he launched a collateral attack on the Commission's ruling by the manner in which this application was defended, particularly paragraph 33 of the Respondent's affidavit. It was submitted that the Applicant should have his costs on a solicitor and client basis. There is much merit in this submission, but there is another matter that bears on the disposition of costs. The Chief Building Official's affidavit discloses that the Applicant, having obtained the building permit as a result of revising his application to show the second floor set back to create separation from the chimney, then proceeded to build the second floor without the set-back. It would be incongruous to reward such conduct with a higher level of costs. As well, I accept that the Respondent was throughout actuated by a genuine concern for his duty as he saw it. In the circumstances the Applicant will have party and party costs.

[para36] The Applicant is therefore entitled to:

(a) an order requiring the Respondent to issue a permit forthwith for the building as shown on the plans that are Exhibit "B" to the Affidavit of Peter Alaimo; and

(b) the costs of this application, on a party and party basis.

Albert Bloom Ltd. v. Bentinck (Township) (Chief Building Official)

Application under Section 25 of the Building Code Act

Application under section Part IX of the Municipal Act

Between
Albert Bloom Limited and 280703 Ontario Limited carrying on business as Hanover County Fair Plaza, applicants, and
Joe Gray, Chief Building Official of the Township of Bentinck and Bentan Investments Limited, respondents

And between
Albert Bloom Limited and 280703 Ontario Limited carrying on business as Hanover County Fair Plaza, applicants, and
The Corporation of the Township of Bentinck and Bentan Investments Limited, respondents

[1995] O.J. No. 2425
DRS 95-18465
Court File Nos. RE 4858/95 and RE 4886/95

Ontario Court of Justice (General Division)
Motions Court
Sharpe J.
Heard: August 14, 1995.
Oral judgment: August 17, 1995.

Counsel:
A.J. Brown, counsel for the applicants.
J. Worzman, counsel for the defendant Joe Gray.

[para1] SHARPE J. (orally):-- This motion arises from an application by way of an appeal from the decision of the respondent Joe Gray, Chief Building Official of the Township of Bentinck, to issue a building permit to Bentan Investments Limited and a related application for an order quashing a by-law removing a holding provision from a site specific by-law governing the lands which are the subject of this matter.

[para2] This motion is brought pursuant to rule 25.11 and asks for an order striking out certain affidavit evidence which has been filed by Bentan on these two matters. The affidavit material relates, in particular, to the appeal from the decision of the Chief Building Official. It is alleged by the applicants that the affidavit material offends rule 25.11 in that it is scandalous, frivolous or vexatious.

[para3] The by-law in question provides "the use must be 'dry' in nature, not requiring a piped water and municipal sewage system to accommodate it". The affidavit evidence which Bentan seeks to have before the judge hearing this appeal relates to that provision of the by-law. It is the position of the applicants/appellants that an appeal to the court pursuant to s. 25 of the Building Code Act, S.O. 1992, c. 23, requires the judge hearing the appeal to stand in the shoes of the Building Official and to decide the matter on the basis of the situation as it appeared to the Building Official at the time the building permit was granted. It is the position of the applicants/appellants that the parties seeking the building permit cannot bolster the decision on appeal by supplying affidavit evidence with respect to facts which, although relevant to the criteria of the by-law, were not given to the Building Official at the time he or she made the decision.

[para4] In my view, the motion to strike out this affidavit material should be dismissed. First of all, it is my view that matters of this kind are best dealt with by the judge who actually hears the appeal. This may mean, as counsel contended, that certain steps have to be taken by way of cross-examination or filing responding material which prove unnecessary should the judge reject the evidence. On balance, however, it is preferable that a matter of this kind not be dealt with piecemeal but rather be dealt with at one time by the judge who is seized of the appeal proper.

[para5] Secondly, it is also my view that, in any event,

the applicants/appellants have failed to meet the test of rule 25.11 in the context of this proceeding. Their position represents too rigid an approach given the nature of the proceedings before the Building Official and the purpose of an appeal from that decision. As counsel for the respondent has submitted, the proceedings before the Building Official are not in the nature of a trial. The matter proceeds on the basis of a written application provided to the Building Official and he or she makes a decision based on that material. In this case, that decision has been challenged by someone who was not a party to that proceeding and who has filed voluminous material, including affidavit evidence attacking the decision of the Building Official. The respondent seeks to meet that challenge and to provide the court with what it submits are relevant facts.

[para6] As I have indicated, the final decision as to the admissibility or weight or relevance to be attached to the evidence sought to be adduced is not for me but for the judge hearing the appeal. However, I do not think the applicants/appellants have met the test of rule 25.11, which would justify striking that evidence as a preliminary or threshold matter. In my view, the cases cited by the applicants, namely, Summit Glen v. Toronto (City) (1989), 44 M.P.L.R. 50 and Re Woodglen & Co. Ltd. and City of North York (1984), 47 O.R. (2d) 614 are both distinguishable. Those cases hold that, on appeal, the matter is to be determined on the basis of the law as it existed at the time the Building Official granted or refused the building permit. Those cases dealt not with evidence as to the facts as they existed at the time the Building Official dealt with the matter but were concerned with legal changes to the by-laws subsequent to the decision of the building official.

[para7] In my view, it would be unfairly prejudicial to an applicant for a building permit if the applicant's position were accepted. The result would be that a party submits a simple written application for a building permit, is successful on that application, finds the decision challenged on a number of grounds by someone who was not privy to the original application, the challenge is supported by extensive evidence, but the party obtaining the building permit would not be permitted to file responding material.

[para8] Accordingly, this motion to strike out the affidavit evidence in question is dismissed.

[para9] Costs in favour of the respondent Bentan Investments Limited fixed at $2,500 payable forthwith.

SHARPE J.

Re **Albert Bloom Limited** et al. and Gray, Chief Building Official of the Township of Bentinck et al.

31 O.R. (3d) 317
[1996] O.J. No. 4096
No. C24739

Court of Appeal of Ontario
Doherty, Weiler and Laskin JJ.A.
November 22, 1996

BY THE COURT: -- The appellants raised four grounds of appeal. The second and third grounds (as numbered in the appellants' factum) are:

> (2) The proposed Wal-Mart store constitutes a "Retail Store", a use not permitted in the Space Extensive Commercial zone.
>
> (3) By-law 40-1994 purports to authorize uses of the subject lands which do not comply with the requirements of the Township's site-specific by-law (By-law 213-90).

Both issues were fully canvassed and rejected in the extensive reasons provided by the trial judge ((1996), 29 O.R. (3d) 681, 33 M.P.L.R. (2d) 53). In deciding both issues against the appellants, the trial judge preferred the evidence of certain witnesses and made findings of fact. We cannot interfere with those findings and are in substantial agreement with those reasons of the trial judge. We would not give effect to either argument.

The first ground of appeal was framed by the appellants in these terms:

> By-law 40-1994 purports to authorize uses of the subject lands which do not conform with the Township's Official Plan and therefore contravenes section 24(1) of the Planning Act.

The Township of Bentinck's "Official Plan" ("O.P."), as amended in 1989, redesignated lands, including the property in question, from "Restricted Rural" to "Space Extensive Commercial". The O.P. also provided:

> The commercial uses must be "dry" in nature. A "dry" use is one which does not require a piped water and municipal sewage system to accommodate it, and is one where the only waste water discharges are from employee washrooms.

(Emphasis added)

In 1990, pursuant to s. 34 of the Planning Act, R.S.O. 1990, c. P.13, the Township passed By-law 213-90 which amended the zoning of the relevant land from "Restricted Rural" to "Space Extensive Commercial/Holding".

The by-law contained a definition of Space Extensive Commercial use. That definition included the following:

> The use must be "dry" in nature, not requiring a piped water and municipal sewage system to accommodate it.

The reference to "dry" in the by-law included only the first part of the corresponding reference in the O.P. The words "is one where the only waste water discharges are from employee washrooms" appear in the O.P. but not in By-law 213-90.

The appellants do not purport to challenge the validity of By-law 213-90 in these proceedings. Indeed they cannot. By-law 213-90 was not challenged when passed and by operation of s. 24(4) of the Planning Act is conclusively deemed to be in conformity with the O.P.

By-law 213-90 fixed the uses to which the relevant property could be put. The property could not, however, be used for those purposes immediately as the by-law was subject to a holding designation. Section 36 of the Planning Act allows a municipality to designate property for certain uses, but to further designate that property may not be used for such purposes until the holding designation is lifted. In 1994, the Township passed By-law 40-1994 amending By-law 213-90 by lifting the holding provision. By-law 40-1994 said nothing about the uses to which the property could be put, but merely authorized the uses provided for in By-law 213-90.

The appellants contend that the legality of all by-laws must

be tested against s. 24(1) of the Planning Act. That section provides in part:

> 24(1) . . . where an Official Plan is in effect, no public work shall be undertaken and except as provided in subsections (2) and (4) no by-law shall be passed for any purpose that does not conform therewith.

The appellants submit that By-law 40-1994 contemplates uses which require public washrooms and therefore permits uses which go beyond those contemplated by the O.P.

We do not agree with these submissions. By-law 40-1994 was passed pursuant to s. 36 of the Planning Act and had nothing to do with the use to which the property could be put. That use was settled by By-law 213-90 which is deemed to be in conformity with the O.P. In our view, a by-law passed under s. 36 of the Planning Act for the purpose of lifting the holding designation placed on property is not a by-law which is passed for a purpose which is capable or indeed incapable of conforming with an O.P. In our view, it is the earlier by-law which zones the property which must be tested against s. 24 of the Planning Act. The time for challenging By-law 213-90 has long since passed.

The planning process would be thrown into disarray if the appellants' submissions were accepted. The planning process with respect to these lands was completed some six years ago. The respondents were entitled to rely on by-laws which were conclusively deemed to be in compliance with the O.P. and to proceed accordingly. The appellants, who could have challenged decisions made in the course of the planning process, but chose not to, cannot now turn the clock back six years and challenge those decisions by way of a challenge to the validity of the by-law lifting the holding designation.

The fourth ground of appeal raises an issue which was not raised in the court below. The appellants put this issue in these terms:

> The agreement between Bentan and the Township, conditional to the lifting of the holding designation, is unauthorized by law, thereby rendering By-law 40-1994 invalid.

The appellants argue that the Township placed certain obligations on Bentan Investments in the site plan and that these obligations violated s. 41 of the Planning Act. The appellants contend that as a consequence, By-law 40-1994 is invalid. The irony of this submission is striking. The appellants rely on the Township's alleged improper imposition of certain burdens on Bentan Investments Limited as a basis for striking down a by-law which Bentan Investments Limited insists is perfectly valid.

The factual premise for this submission rests in the appellants' contention that the Township would not have enacted By-law 40-1994 in the absence of an approved site plan agreement binding Bentan Investments to undertake certain matters as conditions of site plan approval. This premise is based on an assumption and not on evidence. We are not prepared to make that assumption.

The appellants are trying to launch a collateral attack on By-law 40-1994 by challenging the legality of the by-law referable to the site plan agreement. Assuming that the appellants, as strangers to the site plan agreement, have some right to challenge that agreement, there is simply no evidence that the enactment of By-law 40-1994 was conditional upon Bentan Investments' agreement to the provisions of the site plan agreement which the appellants contend contravened the Planning Act.

The appeal is dismissed with costs.

Counsel are to be commended for their excellent written and oral presentations. We are also indebted to the trial judge for his thorough and clear analysis of the evidence and the legal issues.

Bryan Finlay, Q.C., Ian James Lord and Barnet Kussner, for appellant.
J. Robert Boxma, for respondents, Corporation of the Township of Bentinck and Joe Gray.
James M. Wortzman, for respondent, Bentan Investments Ltd.

Axelrod v. Toronto (City)

IN THE MATTER OF The Judicial Review Procedure Act, S.O.1971, c. 48

Between
Ben Axelrod and Ben Axelrod Holdings Limited, applicants, and
The Corporation of the City of Toronto and M.L. Nixon, Chief Building Official, respondents

[1981] O.J. No. 709

Ontario Supreme Court - High Court of Justice
Divisional Court
Osler, Saunders and Callaghan JJ.
Heard: May 12 and 13, 1981.
Judgment: June 25, 1981.

Counsel:
J. Spence Stewart, Q.C., for the applicants.

Morris J. Winer, for the respondents.

The judgment of the Court was delivered by

[para1] SAUNDERS J.:-- This is an application for an order in the nature of mandamus requiring the Chief Building Official of the City of Toronto to issue a building permit and for an order quashing two city by-laws.

[para2] The corporate applicant, Ben Axelrod Holdings Limited, is the registered owner of three apartment buildings on the north side of Eglinton Avenue between Old Forest Hill Road and Bathurst Street containing in the aggregate a hundred and thirty-five units. The applicant, Ben Axelrod, is the beneficial owner of part of the property. The corporate applicant proposes to demolish the present buildings and construct on the lands a condominium apartment building containing ninety-eight units. There is opposition to the proposal because it is said that it would deprive the tenants in the present buildings of accommodation at affordable rates. The proposal is an illustration of a problem said to exist throughout the municipality that is giving concern to members of city council and to city planning officials. On October 1,

1980, the city amended its zoning by-laws by enacting By-law 734-80, 735-80 and 736-80 to deal with the problem in a general way. By-law 735-80 applies to the lands owned by the applicants. By-law 395-80, enacted in April, 1980, also amended the zoning by-law relating to the lands by restricting the length of apartment buildings. City officials have taken the position that By-law 395-80 also applies to the building proposed to be constructed by the applicant. A building permit has not been issued and the applicants have applied for an order requiring it to be issued and for an order quashing both By-law 735-80 and 395-80.

[para3] The last word in the building permit process prior to the launching of this application was a city examiner's notice dated January 6, 1981 which it is agreed fully sets out the current position on the permit application taken by the respondent Chief Building Official. Such notice states as follows:

> Further to my Examiner's Notices dated October 10, 1980 and October 17, 1980 and following your most recent submission of revised plans and letter dated December 18, 1980 that purports to address the matters raised in my

Examiner's Notice of October 17, 1980 I advise that the set of plans submitted on December 18, 1980 contravene applicable By-laws as follows:

1. Forest Hill Village By-law 1051 which restricts the height of apartment buildings to 3 storeys above the finished ground level.

2. Forest Hill Village By-law 1643 which restricts the use of land for apartment building purposes in this location to the lands situated within 100' 0" north from the north street line of Eglinton Ave. W.

3. Forest Hill Village By-law 913 which requires a 25' 0" setback from Old Forest Hill Rd.

4. By-law 395-80 which restricts the length of apartment buildings on lots with a front lot line of less than 61 metres to that of 17 metres beyond the minimum front lot line set back requirement (the length of the proposed building is 130.9 metres).

5. By-law 291-68 in the following respects:

   (i) gross floor area exceeds the permitted maximum of 17,338.304 sq. metres (186,630 sq.ft.) by approximately 944 sq. metres (10,161 sq. ft.)

   (ii) height of the westerly portion of the building exceeds the permitted maximum of 18.3 metres by approximately 3.475 metres (11' 4 1/2").

   (iii) external walls that face each other do not comply with Section 3 Subsection 5.

   (iv) the circular drive at the front of the building does not comply with Section 3 Subsection 6(a) (slope more than 2%).

   (v) proposal contravenes the provisions of Section 15(2) (f) which:

      (a) limits the gross floor area to one times the lot area (proposed is over two times the lot area).

      (b) restricts the height of the building to that of 11.0 metres above "grade" (proposed is 17.919 metres above "grade"), and

      (c) limits the number of dwelling units on this site to that of 86 (proposed number of dwelling units is 98)

   (vi) the recently annexed lands, known as #142 Old Forest Hill Road, are zoned R.1. A.2. Since such zoning designation does not permit apartment houses, the aforesaid lands cannot be incorporated with the lands comprising the lot of the proposed apartment house for the purpose of lengthening the frontage of such lot on Old Forest Hill Road.

In view of the above this department is unable to approve your application for permit at this time.

This is a Zoning examination only and does not constitute an examination under the Ontario Building Code.

[para4] It is agreed that Forest Hill By-laws 1051, 1643 and 913 (referred to in paragraphs 1, 2 and 3 of the examiner's notes) have no application and can be disregarded. The remaining alleged contraventions will have to be considered. By-law 395-80 (paragraphs 4 and 5 (vi) of the examiner's notes):

[para5] The applicants attack the validity of the by-law and further say that in any event non-compliance with it cannot be raised on an application for a building permit. I will deal with those two issues later but will for now assume that the by-law may be cited by the examiner if its terms are applicable. The by-law restricts the length of apartment buildings to seventeen metres where the front lot line of a property is less than sixty-one metres. The applicants say that there is a frontage on Eglinton well in excess of sixty-one metres. The city's reply is that the proposed building is on a corner lot so that it is the frontage on Old Forest Hill Road that is relevant which is less than sixty-one metres. The applicants then say that the property is not a "corner lot" within the meaning set out in s. 1(64) (a) of By-law 291-68. Without detailing the by-law provisions, it is clear that a corner lot may be a parcel of land situated at

the intersection of two streets and that at least part of the property is a corner lot within the meaning of the by-law. This means that it is the frontage on Old Forest Hill Road that must be considered which is less than sixty-one metres. In order to meet this objection, the applicant, Ben Axelrod, has agreed to purchase additional frontage on Old Forest Hill Road immediately to the north of the subject property. The property to be purchased presently contains a single family residence and is in a residential zone which prohibits the use and erection of apartment buildings. In my opinion, if the additional property were to be purchased, the existing residence demolished and no part of the proposed condominium apartment placed on the additional property, the added frontage still could not be taken into account for the purpose of bringing the permit application into compliance with By-law 395-80. The acquired lands would have to be considered as part of the overall property and the condominium apartment would be constructed on lands which were partly in a zone in which such a building was prohibited. The acquired lands would thus be used for a purpose prohibited by the general zoning by-law.

By-law 291-68 (paragraph 5 of the examiner's notes):

(i) The gross floor area in the plans exceeds the maximum permitted by the by-law by over five per cent. It was submitted that uncertainties over the location of the main level and service facilities made it difficult to determine how the plans might be changed to bring them into compliance. Nevertheless, as the plans have not been altered and as the difference is substantial, the Chief Building Inspector was, in my view, entitled not to issue a building permit on that ground alone.

(ii) The height of the westerly portion of the building exceeds the permitted maximum. The court was told that the plans had been amended to remove the excess and that this item need not be further considered.

(iii) There are external walls facing each other. While this may be a technical objection, the plans have not as yet been altered to conform with the by-law requirement.

(iv) The slope of the circular driveway does not comply with the by-law. This would appear to be a minor matter which could easily be corrected in the course of construction. This

item alone should not stand in the way of a building permit.

(v) The matters set out in paragraph 5(v) of the examiner's report all refer to non-compliance with provisions in By-law 735-80 which amended By-law 291-68. It is not necessary to discuss these items in detail as the applicant concedes that if By-law 735-80 is applicable, the proposed condominium apartment cannot be built.

[para6] Even disregarding By-laws 395-80 and 735-80, there was good reason for the examiner on January 6, 1981 to advise the applicant that his department was then unable to approve the application for a building permit. There was substantial non-compliance with By-law 291-68 (as it stood apart from the amendments made by By-law 395-80 and 735-80) and there had as yet been no examination under the Ontario Building Code. The application for an order in the nature of mandamus is, to say the least, premature and should be dismissed. (See Re Cambridge Leaseholds Ltd. and City of Toronto et al. (1973), 3 O.R. 378 and Karavos v. City of Toronto et al. (1948), O.W.N. 17).

[para7] While the application for mandamus has been disposed of, there is one matter that was raised in the course of argument on which a comment should be made. Section 6(1)(a) of The Building Code Act, S.O. 1974, c. 74 provides as follows:-

> 6.- (1) The chief official shall issue a permit except where,
>
> (a) the proposed building or the proposed construction or demolition will not comply with this Act or the building code or will contravene any other applicable law; or ...

[para8] It was submitted on behalf of the applicants that municipal zoning by-laws could not be considered as "applicable law" on the basis of an unreported decision of His Honour Judge Shapiro in Riverview Heights Ratepayers Association v. Menu Foods Limited et al. - November 28, 1980. A review of the reasons in that case clearly shows that the learned Judge was considering the ambit of appeals under The Building Code Act and that his decision does not stand for the proposition that the Chief Building Official is precluded from considering zoning by-law compliance on a building permit application. It would be irrational to hold that he was so precluded. Such a holding would mean that he could not refuse to issue a permit for a factory in a residential zone if the Building Code and all other applicable laws were complied with.

[para9] There remains the issue of the validity of By-laws 395-80 and 735-80. An application to quash a municipal by-law may be brought by a resident of the municipality within one year of its passage. The applicant, Ben Axelrod, is described as "of the City of Toronto" and no objection was made to his status to bring the application.

[para10] By-law 395-80 was enacted on April 28, 1980. As previously indicated, it amends zoning By-law 291-68 by in effect preventing the erection of apartment buildings longer than seventeen metres on lots having a frontage of less than sixty-one metres. City council expressed its intent to enact the by-law in June, 1978. The evidence, in my opinion, falls far short of showing bad faith on the part of the city council in enacting the by-law. Counsel for the applicants did not strenuously urge that it was an invalid by-law but rather

stated that it was inapplicable to the subject property. The application to quash By-law 395-80 is dismissed.

[para11] By-law 735-80 was enacted on October 1, 1980. City council had before it at the meeting at which it was passed a report of its planning and development department which contained the following statement:-

> 2. Need for an Interim Holding By-law
> Pending the completion of a land use study to determine the characteristics of the City's rental housing stock, its vulnerability to redevelopment pressures, the implications of redevelopment and appropriate changes to zoning policies, it would be appropriate for Council to impose restrictions on the height and density of any new buildings erected to replace apartment buildings built before 1960; that is, built with building permits issued after December 31, 1959. It would be appropriate to request that the Ontario Municipal Board approve such a holding by-law for a period of two years.

[para12] By-law 735-80 was enacted pursuant to the recommendation contained in the report and provides as follows:

> No. 735-80. A BY-LAW
>
> To amend By-law No. 291-68 respecting the replacement of certain buildings in the City of Toronto formerly comprising parts of the Village of Forest Hill.
>
> (Passed October 1, 1980.)
>
> The Council of the Corporation of the City of Toronto enacts as follows:
>
> 1. Subsection (2) of Section 15 of Bylaw No. 291-68, being "A By-law To regulate the use of land and the erection, use, bulk, height, spacing of and other matters relating to buildings and structures and to prohibit certain uses of lands and the erection and use of certain buildings and structures in certain areas of the City of Toronto formerly comprising parts of the Village of Forest Hill", is amended by adding thereto paragraph (f) as follows:
>
> "(f) (1) No person shall erect or use a building on a lot on which, on the 1st day of October, 1980, a building containing 6 or more dwelling units or an apartment house is erected, unless
>
> (i) the building or structure which is proposed to be erected does not exceed a height of 11.0 metres above grade,
>
> (ii) the gross floor area of such building or structure proposed to be erected does not exceed 1.0 times the area of the lot, and
>
> (iii) the number of dwelling units proposed to be contained in such building or structure does not exceed 100 units per hectare.
>
> (2) This paragraph shall not apply to prevent the erection or use of a building containing 6 or more dwelling units or an apartment house in respect of which the building permit was issued after December 31, 1959."
>
> 2. This by-law shall not come into force without the

approval of the Ontario Municipal Board.

[para13] The word "use" in paragraph 1 is troublesome and might be unnecessary to carry out the recommendation. As presently worded, there is a prohibition against existing use which however would remain permissible as a prior non-conforming use.

[para14] Paragraph (2) is even more troublesome. It seems to say that a building containing six or more dwelling units or an apartment house may be erected or used if a building permit is obtained after 1959. Such a provision may render paragraph (1) ineffective and the whole by-law an absurdity. Clearly an amendment of paragraph (2) is required to carry out the recommendation in the report. Paragraph (2) might be amended by adding after the word "building", where it first appears, the words " ... on a lot on which on the first day of October, 1980 a building ... ". Alternatively, there might be added in paragraph (1), after the word "erected" where it first appears, the words "in respect of which a building permit was issued before January 1, 1960 ... ".

[para15] The court has no power to amend a by-law by adding words that are not there and it must strain to interpret the words in the by-law to avoid an absurdity. Doing the best I can, I conclude that nothing in paragraph (1) can prevent the erection or use of the kind of building described in paragraph (2) provided a building permit is obtained and the requirements of paragraph (1) are complied with. Such an interpretation would result in a substantially different application from that recommended by the planning and development department.

[para16] It is fundamental that an owner of land has the right to use and improve it as he sees fit subject only to restrictions imposed by law and to not creating a nuisance. It is also fundamental that the municipality may only act within the powers conferred on it by the provincial legislature.

[para17] The city submits that By-law 735-80 may be passed under the authority conferred by ss. 35(1) - 4 and 35(1a) of The Planning Act, R.S.O. 1970, c. 349 which provide as follows:-

> 35.- (1) By-laws may be passed by the councils of municipalities:
>
> ...
>
> 4. For regulating the cost or type of construction and the height, bulk, location, size, floor area, spacing, external design, character and use of buildings or structures to be erected within the municipality or within any defined area or areas or upon land abutting on any defined highway or part of a highway, and the minimum frontage and depth of the parcel of land and the proportion of the area thereof that any building or structure may occupy.
> ...
>
> (1a) The authority to regulate provided in paragraph 4 of subsection 1 includes and, notwithstanding the decision of any court, shall be deemed always to have included the authority to regulate the minimum area of the parcel of land mentioned therein and to regulate the density of development in the municipality or in the area or areas defined in the by-law.

[para18] In considering a municipal by-law, there is a presumption of validity. If a by-law is capable of an intra vires interpretation, it should be so interpreted. It is submitted that the judicial approach should be to interpret it benevolently and to support it if possible. It is further submitted that in determing whether a by-law is authorized by statute, the court must look at the "essence" and "substance" of the by-law. In essence and substance, By-law 735-80 provides that where a building of a certain type presently exists, it may only be replaced by a building with the height, floor area and density limitations prescribed in the by-law. The by-law can receive no more beneficial interpretation. It follows that where buildings of the specified type do not exist in the municipality or in any area thereof, the limitations do not apply. In substance, the by-law is not concerned with use of property or construction standards but rather with limiting future use where certain structures presently exist. While this may be a proper and meritorious planning purpose, it is not a purpose authorized by The Planning Act. There is nothing in s. 35 that authorizes the preservation of existing buildings. The impugned by-law does not apply to buildings or structures to be erected within the municipality or within any defined area or areas as provided for in s. 35(1) - 4 of The Planning Act but rather applies to buildings or structures in undefined areas in the municipality where certain types of structures presently exist. In my opinion, the by-law is ultra vires and should be quashed.

[para19] It is, therefore, unnecessary to deal with the other grounds advanced by the applicants to attack the validity of the by-law.

[para20] In the result, there will be an order quashing By-law 735-80. The remainder of the application will be dismissed. As success is divided, there will be no order as to costs.

Bice v. Council of the Mississaugas of the New Credit

Between
Lawrence Bice, applicant, and
The Council of the Mississaugas of the New Credit, respondent

[1998] F.C.J. No. 393
DRS 98-09722
Court File No. T-1410-96

Federal Court of Canada - Trial Division
Toronto, Ontario
Jerome, A.C.J.
Heard: December 2, 1997
Judgment: March 25, 1998

Counsel:
Lonny Bomberry, for the applicant.
Peter Quinlan, for the respondent.

[para1] JEROME J. (Reasons for Order):-- This application for judicial review of a decision by the respondent denying the applicant permission to establish a gas station on an Indian reserve came on for hearing before me at Toronto, Ontario, on December 2, 1997. The applicant seeks a declaration that his gas station does not violate By-Law No. 1996-01 passed by the Council of the Mississaugas of New Credit. At the close of oral argument, I took the matter under reserve.

[para2] The applicant is a member of the Mississaugas of the New Credit band and resides on the New Credit Indian Reserve No. 40A in Ontario. The respondent is the government of the Mississaugas Indian Reserve and is elected by the membership of the Mississaugas of the New Credit in accordance with section 74 of the Indian Act, R.S.C. 1985. c. I-5.

[para3] On November 2, 1994, the applicant purchased a parcel of land on the reserve in order to construct a gasoline station to sell gasoline products to the public. In spring 1995, the applicant commenced construction of the gas station and, by July 1995, he had excavated and levelled the land and put approximately $10,000 of gravel onto it. In June of 1995, the applicant informed the respondent that he was constructing a gasoline station on the land. He also requested its approval to approach the Motor Fuels and Tobacco Tax Branch of the Ministry of Finance of Ontario to obtain tax-exempt vouchers in order to sell tax-exempt gas to Indians at the location.

[para4] On July 11, 1995, the Chief Councillor of the respondent advised the applicant that the respondent had denied him permission to build the gasoline station. At that time, there was no by-law in effect to prevent the applicant from constructing and operating a gasoline station on the reserve.

[para5] In summer and early fall of 1995, the applicant installed gasoline tanks and poured the concrete kiosk. By November 7, 1995, the applicant had obtained approval from the Ontario government's Fuels Safety Branch to sell gasoline subject to final inspection. On November 2, 1995, the respondent submitted a letter to the Motor Fuels and Tobacco Tax Branch demanding that the branch not issue a permit to the applicant to sell gasoline. In December 1995, the applicant had electricity connected to his station, filled the tanks with gasoline and was ready to commence operations subject to final inspection by the Fuels Safety Branch. From December 1995 to February 1996, the applicant made frequent requests of the Fuels Safety Branch to make a final inspection but this was refused due to the respondent's letter.

[para6] On February 9, 1996, the respondent approved a zoning by-law passed pursuant to section 81(1)(g), (h), (q) and (r) of the Indian Act that prohibited the operation of a gasoline station on this land. The by-law was approved by the Deputy Minister of Indian Affairs on February 27, 1996 and became effective as of that date.

[para7] On April 1, 1996, the applicant's solicitor advised the respondent that the applicant had established a non-conforming use to the zoning by-law and asked the

respondent to cease withholding its approval. On June 6, 1996, the applicant was told that the respondent would not sanction the applicant's gasoline station since it violated the bylaw passed on February 9, 1996.

[para8] At the hearing, the respondent conceded that the gas bar began construction before the by-law was passed. The gas bar is currently in contravention of the terms of the by-law. It is unclear whether the applicant was selling gasoline prior to the passing of the by-law.

[para9] The respondent's first argument is that the applicant is not the proper party to bring this application because his wife, Irene Laforme, is the actual land owner. The respondent transferred the land to her in November 1995. Thus, the respondent submits that the applicant is not directly affected by the matter and therefore has no standing to apply for judicial review pursuant to subsection 18.1(1):

> 18.1(1) Application for judicial review - An application for judicial review may be made by the Attorney General of Canada or by anyone directly affected by the matter in respect of which relief is sought.

[para10] Although the applicant does not own the land, his actions are directly in issue. The respondent is concerned with the use of the land, specifically, the construction and operation of a gas station in an area which is no longer zoned for that use. The only communications concerning this issue are between the applicant, the respondent, their solicitors and various government officials. The decision for which judicial review is sought was directed at the applicant. The applicant's wife has remained, at best, a silent partner in this whole affair. The "matter" in issue is the applicant's use of the land and thus the applicant is directly affected by it and should be entitled to seek relief. In my opinion, the applicant has standing to seek judicial review.

[para11] Another issue of minor dispute between the parties was whether the applicant had established use of the property as a gas station prior to the date the by-law came into effect. Although there is some question whether the applicant had sold gas at that date, a finding that the station was not operational is not fatal. In Town of Richmond Hill v. Miller Paving Ltd. (1978), 22 O.R. (2d) 779 (H.C.J.) [hereinafter Town of Richmond Hill], the court cited the decisions in Re Hartley and City of Toronto (1924), 56 O.L.R. 433 (C.A.) [hereinafter Hartley], and Central Jewish Institute v. City of Toronto, [1948] S.C.R. 101 where the owners in both cases had engaged in hastily-arranged limited use due to an anticipated restrictive by-law. In both cases the position of the owner was upheld. In Hartley, Hodgins, J.A., said at page 435:

> Where possession is taken so far as it can be done and in good faith for the purpose for which the building was acquired, the law ought to be, and I think is, that that user is such as the enactment contemplates as saving the property from the restriction under the statute, and is not affected by mere temporary use of a part, necessitated by or consequent upon the effect of a change of ownership. The test of the bona fides of the user must be whether the acts done disclose a real intention to use the building for its intended purpose and an actual user so far as that purpose could be carried out at the time.

The court in Town of Richmond Hill agreed with that statement and added that "any doubt as to prior use should be resolved in favour of the owner ..." (at page 782). These principles have been accepted in recent cases including British Columbia Custom Car Assn. v. Mission (District) (1990), 3 M.P.L.R. (2d) 278 (B.C.S.C.) and Cowichan Valley (Regional District) v. Yole (1988), 41 M.P.L.R. 78 (B.C.C.A.).

[para12] The applicant had installed and filled the gasoline tanks, constructed the concrete kiosk and connected electricity to the station, acts which disclose a real intention to use the premises as a gasoline station. Although I have no doubt as to its use, if I had any it would have been resolved in favour of the applicant.

[para13] The main issue here is whether the applicant had established a legal non-conforming use before the by-law came into effect. The respondent claims that the applicant has not

proven compliance with the Gasoline Handling Act, R.S.O. 1990, c. G.4, and therefore the applicant has not established a legal non-conforming use. The applicant contends that provincial law does not apply to reserve land and so his use was legal and occurred prior to the passing of the by-law.

[para14] A review of the jurisprudence reveals that provincial laws apply to aboriginals and aboriginal lands unless they fall under certain exceptions carved out in the case law. In Native Law (looseleaf) (Toronto: Carswell, 1989), Woodward sets out these exceptions as follows:

> 1) provincial laws cannot derogate from constitutionally protected Indian rights;
>
> 2) provincial laws may not affect "Indianness" - the status or capacities of Indians;
>
> 3) provincial laws may not single out Indians for special treatment;
>
> 4) provincial laws may not affect the Indian interest in
>
> land;
>
> 5) provincial laws are subject to paramount federal legislation.

[para15] Although one might argue that the fourth exclusion should exclude the operation of the Gasoline Handling Act, I do not think that this statute should be characterized as one that regulates the Indian interest in land. In Cardinal v. Alberta (Attorney General), [1974] S.C.R. 695, Martland J., speaking for the majority, discussed the application of provincial statutes to Indians and Indian Reserves at page 703:

> A Provincial Legislature could not enact legislation in relation to Indians, or in relation to Indian Reserves, but this is far from saying that the effect of s. 91(24) of the British North America Act, 1867, was to create enclaves within a Province within the boundaries of which Provincial legislation could have no application. In my opinion, the test as to the application of Provincial legislation within a Reserve is the same as with respect to its application within the Province and that is that
>
> it must be within the authority of s. 92 and must not be in relation to a subject-matter assigned exclusively to the Canadian Parliament under s. 91. Two of those subjects are Indians and Indian Reserves, but if Provincial legislation within the limits of s. 92 is not construed as being legislation in relation to those classes of subjects (or any other subject under s. 91) it is applicable anywhere in the Province, including Indian Reserves, even though Indians or Indian Reserves might be affected by it. My point is that s. 91(24) enumerates classes of subjects over which the Federal Parliament has the exclusive power to legislate, but it does not purport to define areas within a Province within which the power of a Province to enact legislation, otherwise within its powers, is to be excluded.

[para16] Following this approach (most recently adopted on a similar issue in Rempel Brothers Concrete Ltd. v. Chilliwack (District) (1994), 88 B.C.L.R. (2d) 209 (C.A.)), one must examine the pith and substance of the statute. In this case, it appears that the pith and substance concerns the safe handling of gasoline. It is true that some sections of the Gasoline Handling Code (which is adopted as part of the regulations to the Gasoline Handling Act pursuant to O. Reg. 521/93) provide, for example, the depth that an underground storage tank must be buried and would therefore have an effect on the land. However, these effects are incidental to the prime focus of the legislation which is safety.

[para17] The case at bar is also similar to R. v. Fiddler (1993), 108 Sask. R. 5 (Q.B.) where the court held that section 15(a) of the Prairie and Forest Fires Act, 1982 S.S. 1982-83, c. P-22.1 applied to an Indian who had set an outdoor fire without taking sufficient precautions. The court cited with approval the submission of the Attorney General that the impugned section was "manifestly the type of regulation that controls the conduct and activities of people and not the use

of land. Any requirement to actually do something to the land in order to comply with the section is so incidental that it cannot change the characterization of the law into a land use law" (at page 15). Moreover, the court noted that a fire can spread beyond the borders of the reserve and damage life and property which falls within provincial jurisdiction. A similar finding can be made in this case because a gas leak can easily spread outside the reserve borders, particularly since the applicant's gas station was located just inside the reserve.

Similarly, the Gasoline Handling Act is a law of general application concerned with safety in the handling of gasoline and should apply on an Indian reserve.

[para18] The remaining question is whether the applicant has satisfied the court that he was engaged in a legal non-conforming use prior to the date the by-law came into effect (see City of Toronto v. San Joaquin Investments Ltd. et al. (1978), 18 O.R. (2d) 730 (H.C.J.)). Although the applicant could not receive a final inspection because an official from the Fuels Safety Branch was not allowed on the reserve, there is no evidence that the applicant had received certification for any of the other requirements under the Gasoline Handling Act. The storage tanks, whether underground or aboveground, must be certified pursuant to the Gasoline Handling Code, but there is no evidence of this certification. The record is devoid of evidence of any inspections. This applicant has not met the evidenciary burden required to persuade me of the existence of a non-conforming use which would exempt him from the application of this by-law.

[para19] For the reasons outlined above, this application for judicial review is dismissed.

JEROME A.C.J.

Brantford (Township) v. Doctor

Between
The Corporation of the Township of Brantford, applicant, and
Leslie Doctor and Helen Doctor, respondents

[1995] O.J. No. 3061
DRS 95-20117
Court File No. 1820/93

Ontario Court of Justice (General Division)
Brantford, Ontario
Kent J.
September 26, 1995.

KENT J.:
--

ISSUE:

[para1] Do provisions contained in the Ontario Building Code Act, S.O. 1992 c. 23, apply to the respondents who are "Status Indians"?

BACKGROUND:

[para2] The respondents, husband and wife, describe themselves as Status Indians and have provided the court with evidence to establish that legal status. They occupy, use and benefit from, certain lands within the geographic boundaries of the Township of Brantford, namely part of lot 45, concession 2. For several years, the respondents have operated a trailer park on the lands in question. They also maintain a residence on the premises for themselves. Other residents of the respondents' trailer park are neither First Nations persons or Status Indians.

[para3] The respondents have erected a building and constructed a swimming pool on the subject lands. The Chief Building Official of the Township of Brantford, who is responsible for the enforcement of the Ontario Building Code Act within the Township, states that the respondents failed to obtain a building permit, failed to comply with the Public Pool provisions, failed to respond to an Order to Comply and failed to stop work when he issued a Stop Work Order. All of the foregoing constitute non-compliance with the Building Code Act and regulations thereunder.

[para4] The respondents do not dispute any of the foregoing. They contend, however, that because their lands are "Indian lands" they cannot be required to comply with the requirements of Provincial Legislation.

HISTORY OF THE LANDS:

[para5] The lands in question were part of what has come to be known as the Haldimand Grant or Deed made the 25th day of October, 1784 and registered the 20th day of March, 1795. That document authorized and permitted Mohawk Indians and others of the Six Nations to take possession of and settle upon lands six miles deep on either side of the Grand River from Lake Erie to the head of the said river, forever. The area in which the subject lands are located came to be known as the Johnson Settlement. Peter Green, an ancestor of the respondent, Leslie Doctor, took possession of a portion of the lands in the Johnson Settlement and the use and benefit of the subject lands has devolved through the descendants of Peter Green, ultimately to the respondent, Leslie Doctor and his spouse, Helen. No deed exists for the lands in question, but the respondents have presented sufficient evidence to satisfy me that it is more probable than not that they have derived their current occupation, use and benefit of the subject lands from a devolution traceable to the aforementioned Peter Green.

[para6] As I understand the evidence, the practice that has developed to permit a deed to be obtained is that a conditional, or less than absolute, release or surrender of lands is made to the Crown and the Crown then executes and delivers a patent or deed as directed by the surrendering party or parties. Another means that has been used to create documentation of title is for the individual occupant of lands or a band council to make an absolute surrender of land or lands to the Crown with the Crown then being free to grant a

patent of those lands at some subsequent point in time.

[para7] Although the possibility exists that there may have been either an absolute surrender or a conditional surrender of the subject lands as part of some larger surrender, on the evidence that I heard, it seems more probable than not that neither an absolute surrender or a conditional surrender of the subject lands has ever taken place. If that is correct then the respondents have the most significant interest in the lands, namely possession, use and benefit. However, the Band Council may have an underlying reversionary interest and the Crown may also have an underlying interest. These underlying interests exist because no patent or deed may be created without the involvement of the Band Council and the Crown.

[para8] Depending on the application of the definition of "designated lands" found in Section 2 of the Indian Act, R.S.C., 1985, c. I-5, it is also possible that the lands are part of an Indian Reserve.

[para9] Given the foregoing, it is safe to assume, for purposes of this application, without actually deciding the point, that the subject lands are "Indian Lands".

LAW:

[para10] Although the Supreme Court of Canada has ruled that Provinces may legislate, within their sphere of jurisdiction, over Indians, certain rules have evolved which create exclusions for Indians and Indian lands. See Dick v. The Queen [1985] 2 S.C.R. 309. Woodward in his text on Native Law addresses the exclusions at pages 120 to 124. No Provincial legislation that encroaches upon constitutionally protected native rights can apply to Indians or Indian lands. There was no evidence on this application that the respondents relied on any such rights.

[para11] Provincial legislation may not impair the status or capacity of Indians. There is no suggestion in the evidence or argument that the Provincial legislation in question affects the essential characteristics of the respondents as Indian persons.

[para12] The Provincial legislation may not single out Indians or Indian lands for special treatment. The subject legislation treats all persons occupying land in the Province of Ontario in the same fashion.

[para13] The Provincial legislation may not affect the Indian right to possession of reserve lands. The subject legislation does not purport to affect possession.

[para14] The Provincial legislation may not come into conflict with the provisions of the Indian Act of Canada or other Federal enactments relating to Indians. The normal rules of paramountcy apply and if there is actual conflict Federal legislation prevails.

[para15] If none of the five exceptions above apply, and they do not appear to apply in this matter, then the basic rule is that Provincial laws may apply to Indians and Indian lands.

[para16] Counsel for the respondents refers to two cases which appear to provide general support for the respondents contention that the subject legislation should not apply to them. The decision of the British Columbia Court of Appeal Surrey v. Peace Arch Enterprises Ltd. and Surfside Recreations Ltd. reported 74 W.W.R. at 380 was subsequently upheld by the Supreme Court of Canada but it arose in 1970 and the decision was not referred to by the Supreme Court of Canada in Dick. In Palm Dairies v. The Queen, a 1978 decision in the trial division of the Federal Court the Provincial legislation sought to be applied was clearly going to affect an Indian interest in land. It, therefore, fell within one of the above exceptions, addressed by Woodward and could not be applied to Indians or Indian Bands. The Surrey and Palm Dairies cases are the strongest authorities in support of the respondents' position. They may both be distinguishable and were decided well before the decision of the Supreme Court of Canada in Dick.

[para17] I have concluded that the Provincial legislation

in question is a law of general application. I have reviewed the relevant Federal Legislation set out in the various provisions of the Indian Act and in particular Sections 64, 66, 73, 83 and 88. I am satisfied that no Federal legislation occupies the field sought to be occupied by the Provincial legislation in question. The Provincial legislation may then move into that unoccupied field.

PUBLIC POLICY:

[para18] The societal interest sought to be protected by the Provincial legislation is the safety and health of all inhabitants of the Province. In order to protect that interest, the Province seeks to regulate all those who engage in building and construction projects. Enforcement of the legislation is delegated to the municipality. There is no policy reason why the Provincial legislation should not extend to protect all residents of the Province. There should be no enclave where some persons are left unprotected because others are not required to comply with codified safe and healthy building and construction practices. The legislation applies directly and specifically to conduct. It only incidentally relates to land.

DECISION:

[para19] Neither the law nor any public policy consideration can exclude the applicability of the Ontario Building Code Act to the respondents. Accordingly, an Order will go restraining the respondents from using or occupying or allowing the use or occupation by anyone of the administration building and/or pool in question until such time as they have complied with the Ontario Building Code Act.

KENT J.

Re Budman and Town of Gravenhurst et al.

44 O.R. (2d) 696

ONTARIO
HIGH COURT OF JUSTICE
DIVISIONAL COURT
OSLER, STEELE AND EBERLE JJ.
1ST DECEMBER 1983.

APPEAL from a judgment of Hogg D.C.J. upholding the revocation of a building permit; APPLICATION for judicial review of a stop-work order.

M. H. Chusid, Q.C., for appellant.

W. G. Beatty, for respondent.

The judgment of the court was delivered orally by

STEELE J.:-- This is an appeal from the decision of the Honourable Judge Hogg with respect to a building permit application and termination thereof. It is also an application for judicial review of the decision of the building inspector of the Town of Gravenhurst placing a "stop-work" order on the building.

The appellant is the owner of lands in the Town of Gravenhurst. He applied to the committee of adjustment for a minor variance to permit a 460 sq. ft. addition to an existing cabin on the property. He filed with the application a sketch of the existing cabin which showed the shape and size of the addition sought. It provided for an addition of some 23 ft. on one side and 12 ft. on the other side. In addition, he filed a plan showing the reproduced floor plan of the finished product. These same plans were subsequently filed with the building inspector at the time of the application for building permit.

It is clear that the application to the committee of adjustment was for an addition to an existing building and the reasons of the committee clearly show that that was what was granted. It was on the basis of that decision of the committee of adjustment that the building permit was applied for and issued for the same purpose. The appellant commenced work on the project and on June 4, 1981, the building inspector for the town arrived at the scene and posted a "stop-work" order on the work. It is conceded that the former building had been totally demolished except for some building blocks lying on the ground that had formed the foundation of the former building. Judge Hogg found as a fact that the former building had been substantially demolished.

The appellant appealed to Judge Hogg under the provisions of the Building Code Act, R.S.O. 1980, c. 51, stating that the

permit was improperly revoked. It is my opinion that under the factual circumstances so found there was no building to which the outstanding permit to construct an addition could apply. By the appellant's own acts the facts had totally changed at the time of the "stop-work" order and revocation of the permit from those stated at the time that the permit was issued.

A committee of adjustment has power to permit the extension or enlargement of an existing legal non-conforming use. It has no power to permit the replacement of such a use. Each case is a question of fact as to what extent alterations to an existing building may be required to permit the addition or extension. However, in the present case on the facts as found by the district court judge it was not a necessary alteration, it was a total demolition.

We are not concerned with these issues of fact, because they have already been determined and we see no error therein. It is our view, however, that if the submission of the appellant were adopted, in effect, what would happen would be that the appellant would be allowed to build a totally new building on the site as opposed to what was authorized by the building permit and the committee of adjustment. Under the provisions of s. 6(4) of the Building Code Act, the building permit was issued on mistaken information, because if it had been known to the building commissioner that a total replacement of the building was to take place, he would not have had power to

issue the permit. It is my opinion that there was power to the building inspector to revoke the permit and we therefore see no reason to interfere with the decision of Judge Hogg.

I turn now to deal with the application for judicial review. If it is argued that a person should be entitled to a hearing by a building commissioner before a permit is revoked, I do not agree. The Act has provided for an appeal to the district court judge who has all the powers of the building inspector. That appeal and hearing has now been had. In our view, on the facts of this case where the applicant has himself demolished the building and created his own problem, we do not think that it is a situation where we should exercise our discretion to grant any relief. For these reasons, the appeal will be dismissed and the application for judicial review will also be dismissed. The respondent should have its costs.

Appeal and application dismissed.

Campeau Corporation v. Township of Gloucester et al.

21 O.R. (2d) 4
ONTARIO

ONTARIO
HIGH COURT OF JUSTICE
R. E. HOLLAND, J.
31ST AUGUST 1978.

APPLICATIONS to prohibit a municipality from issuing a building permit.

G. F. Henderson, Q.C., and R. Nelson, for plaintiff, Campeau Corporation.

P. D. Rasmussen, for plaintiff, Regional Municipality of Ottawa-Carleton.

T. Kerzner and C. B. MacFarlane, for plaintiff, City of Ottawa.

R. W. Macauley, Q.C., and J. Robert Boxma, for defendant, Township of Gloucester.

J. J. Carthy, Q.C., for defendants, Cadillac Fairview

Corporation Ltd. and Tartan Development Corporation.

R. E. HOLLAND, J.:-- There are three applications before me for injunctive relief. The first by Campeau Corporation (Campeau) against the Corporation of the Township of Gloucester (Gloucester) and Paul Lahey, the second by the Regional Municipality of Ottawa-Carleton against Gloucester and Lahey and the third by the Corporation of the City of Ottawa against Gloucester and Lahey. Cadillac Fairview Corporation Limited (Cadillac) was added as a party defendant in the Campeau action by order of Grange, J. There was a preliminary application before me by Cadillac to be added as a party defendant in the second and third action and by Tartan Development Corporation (Tartan) to be added as a party defendant in all three actions. Tartan is a co-venturer with Cadillac in the land in question (Blossom Park). Against the opposition of the plaintiffs, I exercised my discretion to make the order adding these parties. I did so because the added parties are vitally interested financially in the outcome of the litigation and because damages suffered by such parties by reason of any injunction may be substantial and will be different from the damages suffered by the municipal corporations.

The applications before me were originally for interlocutory injunctions but, on the application of counsel for Cadillac and Tartan, unopposed by all other counsel, I directed that the applications be turned into motions for judgment pursuant to Rule 222 [enacted O. Reg. 107/74, s. 3].

The injunction sought is to restrain the issue of a building permit for the construction of a shopping centre on the Blossom Park site, located in Gloucester, at the south-east corner of Highway 31 and Sieveright Rd., being part of Lots 6 and 7, Concession 4, Rideau front, until those portions of the official plan of the Regional Municipality of Ottawa-Carleton, dealing with the area in question and referred to the Ontario Municipal Board have been disposed of by that Board.

The township is a municipality in the south-east portion of the regional municipality. Lahey is the building inspector for the township. Since the mid-1960s Campeau has owned a parcel of approximately 50 acres of land in the City of Ottawa (the South Keyes site), which parcel is located about half a mile from Blossom Park. Campeau is attempting to get permission to develop South Keyes as a regional shopping centre. Cadillac and

Tartan are also attempting to develop Blossom Park as a regional shopping centre. The area will not support two regional shopping centres.

Blossom Park was originally the subject of zoning under By-law 26 of 1960 of the township. It was zoned "C" -- Commercial. The uses permitted included the use of the property for a shopping centre. As of June 15, 1968, pursuant to the

Regional Municipality of Ottawa-Carleton Act, 1968 (Ont.), c. 115, the inhabitants of the regional area, which includes the township and the City of Ottawa, were constituted a body corporate under the name of the Regional Municipality of Ottawa-Carleton. The new regional area was designated a planning area pursuant to the Planning Act of Ontario, R.S.O. 1970, c. 349. Under the Regional Municipality of Ottawa-Carleton Act, R.S.O. 1970, c. 407, the regional government is charged with the duty of preparing a regional official plan. On October 9, 1974, the Council of the regional municipality enacted the official plan. The Minister approved the plan on August 30, 1976. Blossom Park is shown as residential on the official plan. The question of the location of the regional shopping centre in the area is to be dealt with in a hearing before the Ontario Municipal Board scheduled for September 11, 1978.

With this background the plaintiffs are faced with the expressed intention of the township to issue a building permit to Cadillac and Tartan for the construction of a shopping centre at Blossom Park. If such a shopping centre is constructed then the planned shopping centre in the City of Ottawa, proposed by Campeau, is no longer feasible. If a building permit is issued then it may well be that by virtue of s. 35(7)(b) of the Planning Act any by-law passed in the future would not prevent the erection of the shopping centre and Cadillac and Tartan would have established a legal non-conforming use.

Section 68(7) of the Regional Municipality of Ottawa-Carleton Act reads as follows:

> 68(7) When the Minister has approved an official plan adopted by the Regional Council,
>
> (a) every official plan and every by-law passed under section 35 of The Planning Act or a predecessor thereof then in effect in the planning area affected thereby shall be amended forthwith to conform therewith;
>
> (b) no official plan of a subsidiary planning area shall be approved that does not conform therewith.

It is the submission of the applicants that the area in question having been designated as residential on the official plan, there is a statutory obligation on the township to amend its by-laws forthwith to conform therewith and it is submitted that the by-laws not having been amended there is an obligation on the township not to issue a building permit that would fly in the face of the official plan. It is suggested that the official plan indicates a clear planning intention to rezone and that as such any application for mandamus for a building permit would be refused and the application adjourned until the question of rezoning had been fully dealt with by the Ontario Municipal Board.

On behalf of the defendants it is submitted first that the applicants have no status to bring this application and second, that the official plan is only a statement of future policy and that Cadillac and Tartan have a right to a building permit under the present zoning.

I will deal first with the question of status. It is submitted on behalf of the defendants that the plaintiffs have no status either by statute or at common law.

Section 470 of the Municipal Act, R.S.O. 1970, c. 284, is as follows:

> 470. Where any by-law of a municipality or of a local board thereof, passed under the authority of this or any other general or special Act, is contravened, in addition to any other remedy and to any penalty imposed by the by-law, such contravention may be restrained by action at the instance of a ratepayer or the corporation or local board.

It is suggested that this section does not apply since no by-law is being contravened but only, at the most, a section of a statute. It is pointed out on behalf of the plaintiffs that the official plan was passed by by-law and that the official plan is being contravened as well as a statute of the provincial Legislature.

It is further submitted on behalf of the defendants that

there is no status in the plaintiffs at common law and reliance is placed upon the decision of the House of Lords in Gouriet v. Union of Post Office Workers et al., [1977] 3 All E.R. 70. The plaintiff in Gouriet, however, had no interest other than as a member of the public. In this case all the plaintiffs have a special interest in the subject-matter of the litigation and, in addition, in my view, the municipal plaintiffs have a statutory right of action by virtue of s. 343 of the Municipal Act, which section reads, in part, as follows:

> 343. Where a duty, obligation or liability is imposed by statute upon any person in favour of a municipal corporation, or the inhabitants, or some of the inhabitants, of a municipality ... the corporation has the right by action to enforce it and to obtain as complete and as full relief and remedy as could be obtained in an action by the Minister of Justice and Attorney General, as plaintiff ...

For the above reasons I have come to the conclusion that all plaintiffs have status to maintain the actions.

The applications are strongly resisted on the basis that Cadillac and Tartan are entitled to a building permit upon application. Section 6(1) of the Building Code Act, 1974 (Ont.), c. 74, reads as follows:

> 6(1) The chief official shall issue a permit except where,
>
> (a) the proposed building or the proposed construction or demolition will not comply with this Act or the building code or will contravene any other applicable law; or
>
> (b) the application therefor is incomplete or any fees due are unpaid.

It is submitted that there is no applicable law that would prohibit the issue of the permit in this case and that the land in question is zoned so as to permit shopping centre development. Reliance is placed upon Re Steven Polon Ltd. and Metropolitan Licensing Com'n, [1961] O.R. 810, 29 D.L.R. (2d) 620, in which Mr. Justice McLennan held that an official plan, although adopted by a municipality, is merely a statement of intention as to future plans when not implemented by a zoning by-law and held in that case that a licensing commission could not consider the official plan in deciding whether or not to issue a licence for specific use of certain land. Reference is also made to s. 1(h) of the Planning Act, which defines "official plan" as meaning "a program and policy ... approved by the Minister from time to time ...". The matter was dealt with by Henry, J., in Re Cadillac Development Corp. Ltd. et al. and City of Toronto (1973), 1 O.R. (2d) 20 at p. 28, 39 D.L.R. (3d) 188 at p. 195:

> The Official Plan therefore, as it is in effect from time to time, represents a policy or program having legislative effect, governing the area to which it applies. It is clear from the scheme of the Act that the Official Plan is not immutable (s. 17) and does not have effect to implement the policy outlined by it. Implementation is to be effected by by-laws of the Municipal Council that conform to the policy specified in the plan.

In my view, the distinguishing feature of this case is that the official plan in question is the official plan of the regional municipality, and the provisions of s. 68(7) of the Regional Municipality of Ottawa-Carleton Act, which requires the amendment forthwith of By-law 26 of 1960 of the township to conform with the official plan. It is nearly two years now since the official plan was approved by the Minister and under any interpretation of the word "forthwith" time for amendment has surely long since expired. It is true that the Legislature could have been more definite in its legislation as, for example, in Saskatchewan where s. 4(3) of 1973-74 (Sask.), c. 76 [amending s. 38 of the Planning and Development Act, 1973 (Sask.), c. 73], provides that any zoning controls that are inconsistent with the municipal development plan shall to the extent that they are inconsistent with the plan be of no effect. However, I do not think that this is necessary. There is a statutory obligation imposed upon the municipality to amend its by-laws and in the interim the municipality should refuse any application for a building permit, even though such application complies with its by-law if the by-law does not conform to the official plan of the regional municipality.

For the above reasons I have come to the conclusion that a building permit should not be issued in this case because it would contravene the applicable law. This result, it seems to me, is also equitable. The municipalities and developers are engaged in a contest for the right to construct a shopping centre and it is only fair that the matter proceed in an orderly way for proper evaluation before the Ontario Municipal Board.

An application was made by counsel on behalf of the regional municipality to amend the writ to claim in addition to an injunction a mandatory order directing the township to amend its existing By-law 26 of 1960, to conform with the official plan of the regional municipality. This application was really made in order to underpin the application for an injunction but, in my view, the amendment sought is so wide that it should not be permitted on a motion for an injunction which has been turned into a motion for judgment. A separate action may be brought for this relief if necessary. The application is, therefore, refused. In my view an injunction should issue in this matter because the plaintiffs are entitled to succeed and damages will not be an adequate remedy for the plaintiffs should the building permit issue. The injunction will maintain the status quo and will permit the Ontario Municipal Board to proceed with its hearing as scheduled on September 11th next. The plaintiffs are entitled to their costs of the applications against the defendant municipality. The action will be dismissed without costs as against the defendants Cadillac and Tartan. Judgment will issue accordingly.

Judgment accordingly.

Re **Cogan et al. and City of Toronto** et al.

(1974), 3 O.R. (2d) 661

ONTARIO
HIGH COURT OF JUSTICE
DIVISIONAL COURT
DONOHUE, KEITH and
CROMARTY, JJ.
13TH MAY 1974

APPLICATION for an order of mandamus directing the respondents to issue a building permit.

J.J. Carthy, Q.C., for applicants.

D.H. Sandler and E.R. Finn, for respondents.

The judgment of the Court was delivered by

KEITH, J.:-- The applicants seek an order directing the respondents to issue to the applicants a building permit providing for the construction of a 20-storey retail store and office building approximately 250 ft. in height, with three basement levels which would include underground parking as required. The site of the proposed building is on the north side of Bloor St., west of Bay St., Toronto, and known municipally as Nos. 110-28 Bloor St. W. The applicants claim to be entitled as of right to such building permit pursuant to its application filed June 8, 1973, as revised on November 2, 1973.

The evidence discloses that in early 1972, Messrs. Crang & Boake, a well-known firm of architects in Toronto, were instructed to design the building that is the subject of this application. There were many factors to be considered having regard to the site. Pedestrian and vehicular traffic in the area is heavily congested and it was recognized that the impact of a new and substantial building on the traffic situation would inevitably be serious unless special arrangements were made.

In the same year, 1972, the City of Toronto Department of Development issued a sketch of the area in central Toronto bounded on the west by Avenue Rd. and Queen's Park, on the north by Yorkville Ave., on the east by Park Rd. and on the south to a distance a little north of Sultan and Hayter Sts. This of course included the site of the building proposed by the applicants. The sketch was entitled Bloor-Bay-Yonge Area -- Proposed Pedestrian Mall System integrated with development and showed projects completed, projects under construction, projects imminent including a large parking garage, areas of potential future development, the location of proposed underground and above ground pedestrian malls and the location of existing subway stations: see ex. B to affidavit of Derry Menzies Robertson, sworn November 8, 1973.

This sketch contemplated a pedestrian bridge above ground connecting the applicants' proposed building with a large existing building known as the Colonnade directly opposite on the south side of Bloor St. W.

The sketch further indicated an underground pedestrian mall commencing from a point directly below the northern end of the above-ground bridge, within the site of the applicants' proposed building and continuing north and east until it connected with the subway stations.

The applicants' site is bounded on the north by a public thoroughfare known as Critchley Lane which continues easterly until it connects with Bellair St., a narrow street running north from Bloor St. W., intersecting Cumberland St. and ending with its intersection with Yorkville Ave.

Critchley Lane ends approximately at the western limit of the applicants' site. A survey of the area prepared by the City of Toronto surveyor and entered in evidence on consent discloses that the north boundary of the applicants' site is approximately 190 ft. in length from east to west and that for all but the easterly 10 ft., Critchley Lane to the north is about 10 ft. 9 in. wide. From the point mentioned easterly to Bellair St., Critchley Lane is 18 ft. 6 in. wide.

North of Critchley Lane to Cumberland St., a distance of a little over 80 ft. is a municipal parking lot and subway station. The westerly section to the north of the narrow part of Critchley Lane is owned by the Municipality of Metropolitan Toronto, and leased to the City of Toronto Parking Authority and the easterly section is owned by the City of Toronto.

It is conceded that there is no legal impediment to provide for vehicular access to the applicant's proposed building from Bloor St. but it is equally conceded that any such design would result in creating a chaotic situation for vehicles and pedestrians on Bloor St.

As a result, and with full consultation with the City of Toronto authorities and all others interested, the building was in fact designed to provide for the overhead pedestrian bridge from the proposed building to the Colonnade and for vehicular access to the underground parking facilities by a ramp leading south from Cumberland St. at the west end of the Metropolitan Toronto property and entering the proposed building below grade at the westerly end of the north face of the building.

In addition, provision was made for pedestrian traffic underground for the purposes already noted.

Prior to May, 1973, it appeared that the municipal authorities and neighbourhood interests became very interested in the conversion of the existing motor-car parking lot on the south side of Cumberland St. through to Critchley Lane, into a municipal park and recreation area. To accommodate this concept the architects made provision for retail store display windows to be inserted in the otherwise blank facade on the north side of the proposed building.

It is clear from the evidence that the applicants and their architects from the very inception of planning for this building, whose cost is estimated at nearly $11,000,000 to be built on an extremely expensive site, have worked closely and in harmony not only with the municipal authorities, departments and committees, but also with representatives of the neighbourhood and adjacent landowners, services such as electric and gas companies, and the municipal transit commission.

In April, 1973, an application was made for a permit to demolish the existing buildings on the site and such permit was granted on May 9, 1973. The clearing of the site has been largely completed in accordance with this permit.

On June 8, 1973, formal application was made for a building permit conforming to the foregoing planning factors together with supporting drawings, which as far as the applicants and their architects knew, were in accordance with the newly-established municipal procedures.

Under date of July 5, 1973, the architects received the usual examiner's notice with respect to the application and documents submitted, which notice stated that the proposed building contravened the City of Toronto Zoning By-law 20623 in two respects -- namely, that the gross floor area exceeded permissible limits by about 14,000 sq. ft. and that some 96 parking spaces were too short. The first problem was quickly resolved and the second proved to be erroneous. Neither objection has been raised since and it is agreed that they are no longer of concern.

It was of course realized, that agreements would have to be concluded with services, adjacent landowners and others affected, but these were well in hand and at the time of this application are available.

Unfortunately in the summer of 1973, difficulties arose with respect to the proposed public park including serious questions as to how the ramp access from Cumberland St. to the underground area of the proposed building would affect the park.

On September 4, 1973, at a meeting of a so-called working committee for "Cumberland Park" a decision was reached that consultants should be retained to advise on the park. A perusal of the minutes of that meeting makes it abundantly clear that agreement, if it would ever be reached, was far in the future and without such agreement the planned ramp access to the building could not be proceeded with.

In addition, other serious problems were developing. On February 28, 1973, the mayor of Toronto submitted a memorandum to the Buildings and Development Committee premising that the city's zoning by-law initiated in 1953 "is not sufficient to create orderly growth and stability in Toronto", complaining that the city is "completely unable to influence the form of development" and concluding with the following recommendations:

> Recommendation: Accordingly, I would ask this Committee to recommend that Council request the Planning Board, in conjunction with the Commissioner of Development to:
>
> (1) Identify areas of change in which increased control powers would be desirable.
>
> (2) Establish priorities for detailed studies of such areas (where none have been done) and for revisions to the Official Plan and the Zoning By-law as they apply to these areas.
>
> (3) Prepare with the City Solicitor, a Draft Official Plan Amendment outlining the policies and criteria which will govern the enacting of Holding By-laws and Development Control By-laws. (See Note II-Re Criteria.)
>
> (4) Prepare, in conjunction with the City Solicitor, one or more Draft Holding By-laws. (See Note I-Re Holding By-laws.)
>
> (5) Prepare with the City Solicitor a new Draft of a Private Bill empowering the City to engage in general development control.

From this start, Toronto City Council on September 14, 1973, adopted the following recommendations, among others, of the Buildings and Development Committee:

> (3) That Council indicate its intention to pass by-laws covering the Downtown and Midtown Planning Areas, in the general form of the by-law contained in Appendix C of the Chief Planner's report, prohibiting the erection of buildings exceeding 45 feet in height and 40,000 square feet in gross floor area to apply to the following areas;--
>
> . . . . .
>
> Midtown:
>
> the area bounded (1) on the south by a line parallel to and distant 100 feet from the north limit of College and Carlton Streets (2) on the west by a line parallel to and distant 100 feet west of the west limit of Spadina Avenue and Spadina Road (3) on the east by the east limit of Sherbourne Street, thence parallel to and 100 feet north of the north limit of Bloor Street to Jarvis Street, thence parallel to and distant 100 feet northeast of Rosedale Valley Road to Yonge Street, thence parallel to and distant 100 feet west of the west limit of Yonge Street from Rosedale Valley Road to the CPR tracks and (4) on the north by the CPR tracks as shown on Map 2 of the Chief Planner's report;

The applicant's original hope was to have commenced actual construction by June, 1973. As of November, 1973, their out-of-pocket expenses included rental of the site (it is held on a long-term lease) of $75,000 per month with no return as the previously existing buildings have been demolished, realty taxes of $47,000 per year, consultants fees of nearly $300,000 to date, an expense of $260,000 to buy in unexpired terms of leases and demolition costs of about $35,000.

In view of all these matters, the solicitors for the applicants wrote to the respondent Hadley on October 22, 1973, as follows:

> Dear Sir:
>
> Re: 110 Bloor Street West
>
> We are presently advising the developers of the above property as to their legal position and have come to the conclusion that the interest of our client is best served by

stating to the city precisely the position we find ourselves in and asking the city for a statement of its position.

I will not go into a history of the planning for this site as it is well known to everyone concerned at City Hall. It is sufficient to say that as of this summer full plans for a building permit had been filed but a permit had not been issued because negotiations for the pedestrian walkway across Bloor Street were still under way as were discussions concerning the access ramp from the rear of the premises to Cumberland Street on the north and the tunnel to the subway. Our position became confused by the city retaining a consultant to advise on the best ultimate use of the area to the north of this site and was further confused by the processing of the proposed holding by-law in September.

The consultant's study is to our knowledge not completed but interim findings suggest alternatives that may or may not accommodate the ramp from our site to Cumberland. We and you have no present knowledge of when or in what form the conclusions of that study will become definitive planning.

With respect to the proposed holding by-law we are unable to do more than put an interpretation upon its wording as to whether or not the city intends to exclude this site from its application. It is not a specifically excluded site and may or may not be excluded, depending upon whether the city takes the position that full plans had been filed prior to September 14th.

This has created a further uncertainty and stands against the ongoing steps of the developer towards construction. Demolition pursuant to the demolition permit is almost complete, contracts are being let, and construction is to start in the spring. This dictates that our client must know its position in the very near future.

With this in mind, a small alteration is being made to the plans for the building so as to eliminate the below grade access at the rear and bring that access up to grade to permit the use of Critchley Lane. We will then be asking for a permit and if one is issued we will proceed to construction, prepared at any time when appropriate decisions have been made to construct the ramp as originally planned, the connection to the subway, and the connection across Bloor Street. None of those items are or will be part of the building permit application but all will be available to the city.

That approach makes most sense to me because it makes available everything that the city has indicated it has wanted but it also assures that the developer is not prejudiced and can proceed as planned.

In other circumstances it might well be suggested that we await the consultant's report or some other decision. However, in view of the proposed holding by-law and the threat it imposes, our client's legal rights must be tested immediately in court or they will be lost, mandamus being a remedy that is only granted to a person who proceeds with expedition. In addition, we are also under severe time pressure because of the construction schedule.

Therefore, if the city does not see fit to issue a permit when this change is made in the plans the developer will be compelled to take immediate steps in court to assert its rights if it has any.

To the best of my ability this is a frank presentation of the position of our clients and we simply ask that the city give consideration to its position and make a frank and early response to us so that we will both know where we stand.

Mr. Hadley's reply dated October 26, 1973, reads as follows:

Dear Sir:

Re: 110 Bloor Street West

Your letter dated October 22, 1973 concerning the proposed building at 110 Bloor Street West is acknowledged.

The plans submitted with the application cannot be approved because of lack of legal access to the underground parking

areas.

Considering the intent of Council passed September 14, 1973 limiting buildings to 45 feet in height and 40,000 square feet gross floor area at this location, I cannot entertain revised plans to bring the application into compliance.

The revisions referred to in the solicitor's letter were submitted to the respondents on November 2, 1973. The architects were informed that although the revised drawings would be received, they would not be processed in view of Mr. Hadley's letter already quoted.

These revisions are described in more detail in para. 24 of Mr. Robertson's affidavit of November 8, 1973, as follows:

24. The changes made in the drawings are quite modest and are limited to bringing the access point up to the surface, bringing the internal ramp up to meet that access point and making certain other rearrangements of space within the building to accommodate the change in location of the ramp. In addition, the tunnel to the subway has been removed from the submission. The effect of this change is to make the vehicle access along Critchley Lane and into the building at grade rather than down a ramp from Cumberland Street and into the building below grade. To my knowledge all of this is in complete accordance with the by-laws applicable.

This application was launched on November 8, 1973. On December 7, 1973, the Council of the City of Toronto enacted By-laws 347-73 and 348-73.

By-law 347-73 consists of an amendment to the City of Toronto Official Plan and reads as follows:

NO. 347-73. A BY-LAW

To adopt Section 8.7 of the Official Plan for the City of Toronto.

[Passed December 7, 1973.]

The Council of The Corporation of the City of Toronto enacts as follows:

1. The Official Plan of the portion of the City of Toronto

Planning Area comprising the City of Toronto as constituted on the 31st day of December, 1966, and the area which on such date comprised the Village of Swansea is hereby amended by the adoption of the following Section 8.7, namely:

"8.7 Notwithstanding any other provisions of this Plan, Council may pass by-laws, for which an approval period of not more than two years will be sought, applicable to any area, imposing land use restrictions additional to those in force in such area, subject to such by-laws having the effect of permitting in such area only such buildings and uses, or buildings and uses, as are in the opinion of Council not detrimental to the character and functions of such area. Such by-laws shall include a preamble wherein the reason or reasons for their enactment are stated. It is the policy of Council, concurrent with the enactment of by-laws of this type, to request that a planning study of the area affected by the by-law be undertaken.

It is the policy of Council to enact special by-laws to exempt buildings or uses from the provisions of by-laws of this type, provided, in the opinion of Council, such buildings or uses are not inappropriate in, nor will

prejudicially affect the character of the areas subject to such by-laws.

It is the policy of Council, in the event that the studies as aforesaid are incomplete at the time of expiry of the effective period of a by-law of this type, to apply for extensions to said period or to enact a new by-law having the effect of continuing the provisions of the expired by-law."

2. The Clerk is hereby directed to submit this By-law to the Treasurer of Ontario and Minister of Economics and

Intergovernmental Affairs pursuant to The Planning Act.

The Court was informed by counsel that although this by-law has been submitted in accordance with para. 2 thereof, it is still awaiting approval.

By-law 348-73 was passed to implement the resolution of the City Council of September 14, 1973, by amending the Zoning By-law 23063 and the relevant portions read as follows:

Whereas as expressed in the Official Plan for the City of

Toronto Planning Area, it is the policy of Council to encourage and take measures to provide for the efficiency, amenity, appearance, and enjoyability of the area; to maintain and enhance the distinctive character of parts of this area; to improve and maintain the quality of its residence areas and to improve the quality of life for each resident, by, among other things,

providing convenient and rapid access by a full range of transportation services, particularly mass transit,

formulating overall design concepts for the important centres of the City,

providing public open space, including local and district parks,

providing landscaping, plazas, pedestrian ways and other features,

regulating the form, function and location of buildings and the spaces between them,

maintaining a high standard of design for all public works and facilities,

designating buildings and sites of historical and architectural merit and taking all necessary steps to ensure their preservation;

And whereas the Planning Board and Core Area Task Force are undertaking planning studies of the area for the purpose of developing policies and action whereby the objectives outlined above and established by the planning studies could be achieved, with the intention that such policies and programmes for action shall be recommended to Council;

And whereas, until such policies as may be recommended by the aforesaid planning studies or other policies in lieu thereof, may become effective, it is desirable that the City have power to review significant development proposals within the area;

1. Subsection (2) of Section 16 of By-law No. 20623, being "A By-law To regulate the use of land and the erection, use, bulk, height, spacing of and other matters

relating to buildings and structures and to prohibit certain uses of lands and the erection and use of certain buildings and structures in various areas of the City of Toronto", is amended by adding thereto paragraph (cccc) as follows:

"(cccc) (1) No person shall, within the area hereinafter firstly described, erect or use any building or structure having a height exceeding 45 feet above grade.

(2) No person shall, within the area hereinafter firstly described, erect or use any building or structure having a gross floor area exceeding 40,000 square feet.

. . . . .

(4) None of the provisions of this paragraph shall apply to prevent the erection or use of any building or structure the plans for which have, prior to September 28, 1973, been approved by the Commissioner of Buildings for

the Corporation.

(5) None of the provisions of this paragraph shall apply to prevent the erection or use of any building or structure for which an application was made, before September 14, 1973, for a building permit, if such application and the materials filed therewith show that such building or structure would comply with all the by-laws of the Corporation and any other relevant enactments."

2. This By-law shall not come into force without the approval of the Ontario Municipal Board.

The Court was informed that although an application for approval of this by-law by the Ontario Municipal Board has been filed, no date for hearing has as yet been set.

In resisting this application for mandamus the respondent municipality, in addition and alternatively to asserting that the applicants are not entitled to the order sought, ask that final disposal of this application be deferred until By-law 348-73 has been dealt with by the Ontario Municipal Board.

In view of the enactment of these by-laws and the reliance placed on them by the respondent municipality, the applicants by supplementary notice of motion seek a declaration that the said by-laws are void or in the alternative, that they cannot affect the applicants' rights.

The first question to be decided then is whether the applicants' material as presently before the respondents is such that mandamus ought to be granted, having regard to the by-laws of the municipality in full force and effect from the date of the initial application on June 8, 1973, down to the present time. For this purpose By-law 348-73 must be disregarded as it is still lacking Municipal Board approval.

I have already dealt with the two points raised in the examiner's notice of July 5, 1973, alleging contraventions of Zoning By-law 20623, and have noted that these were promptly resolved.

There were four other requirements set out in the examiner's notice, all of which related to matters incidental to the proposed ramp access from Cumberland St. These, of course, are now irrelevant since access to the underground facilities is now directly from Critchley Lane, according to the revision of the plans on November 2, 1973.

Although the respondents declined to process the plans as revised, material has been filed on this application alleging deficiencies in these plans which the respondents assert are sufficiently major in nature as to disentitle the applicants to even a conditional order. These are classified as zoning deficiencies and deficiencies in compliance with City of Toronto Building By-law 300-68 as amended.

Dealing then with the alleged zoning deficiencies, the first of these was based on an allegation that Critchley Lane is not available to the applicants for access to their proposed building by reason of a one foot reserve strip owned by the City of Toronto and never dedicated to public highway purposes. This objection was withdrawn by counsel for the respondents and need not be further considered.

The second alleged zoning deficiency also concerns Critchley Lane in that by reason of its constriction to 10 ft. 9 in. along the full northern face of the proposed building, the lane is inadequate for modern vehicle access. This argument is based on the following provisions of the zoning by-law:

13. The owner or occupant of every building or structure to be erected or used for the purpose of [then follows a list of purposes ranging from private residences to office buildings] shall provide and maintain motor vehicle parking spaces ... to the extent at least prescribed in the schedule hereto for the respective classes of buildings or structures set out therein.

This is followed by a schedule and then the by-law continues:

(a) For the purpose of this sub-section ... "parking space"

> means an unobstructed area at least nineteen (19) feet, six (6) inches in length, and at least eight (8) feet, six (6) inches in width which is readily accessible at all times for the parking and removal of a motor vehicle without the necessity of moving any other motor vehicle and which, ... is entered by means of a driveway or passageway having a minimum unobstructed width of eighteen (18) feet.
>
> (b) Ingress and egress to and from the parking facilities prescribed by this subsection shall be provided by a sufficient number of adequate, unobstructed driveways or passageways.

Based on the above-quoted provisions and particularly the passage that I have italicized, the respondents assert that since Critchley Lane abutting the proposed building is substantially less than 18 ft., the applicants fail to comply with these provisions of the zoning by-law.

Counsel for the applicants argues that the provisions quoted are referable only to on-site driveways or passageways and not to the width of public thoroughfares, or other off-site approaches to the parking facilities.

I think on a fair reading of these provisions the position of the applicants is sound. I am fortified in this view by the language of another subsection of the zoning by-law put in evidence by the respondents as follows:

> 6.(a) Where ingress or egress to or from motor vehicle parking or loading facilities in a building ... is provided by way of a ramp, no part of such ramp between the levels of one (1) foot above and one (1) foot below street level shall be located closer to a street than twenty (20) feet and the lateral boundaries of any driveway or passageway connecting such ramp with the street shall, within such distance of twenty (20) feet ... be constructed at right angles to the street.
>
> (b) For the purposes of paragraph (a), "ramp" means a driveway or passageway, or portion thereof, inclined at a slope equal to or greater than one (1) foot vertical to each fifty (50) feet horizontal; and "street level" means the average elevation of the portion of the street abutting the driveway or passageway connecting a ramp with such street.

It is obvious that all references to driveways and passageways deal with driveways and passageways ending at a street and hence must be on site and not referable to a street. "Street" is defined in the zoning by-law itself as "a public highway or private thoroughfare". Reference may also be made to By-law 12519, a by-law "Respecting Streets" where street is defined as follows:

> The word "street" wherever used shall mean and include any public highway, road, street, lane, alley, square, place, thoroughfare or way within the City of Toronto.

These definitions to my mind make it abundantly clear that for the purposes of the zoning by-law, Critchley Lane is a "street" and the objection of the respondents based on any alleged inadequacy in width of Critchley Lane is simply not sustainable.

The third and last zoning deficiency alleged by the respondents is that the proposed building does not comply with By-law 348-73 in that it will be far in excess of the height and gross floor areas sought to be established by that by-law.

There is no question but that this is so. However, that by-law has not as yet been approved by the Municipal Board and hence unless the Court accedes to the submission of the respondents that this application should be adjourned to await the decision of the Municipal Board, its existence can have no legal or practical effect on the applicants.

Disregarding for the moment the application for a building permit made on June 8, 1973, since the application for mandamus before the Court is based on the revised application filed on November 2, 1973, two things are clear; namely, that as of that date, having regard to the then and now existing zoning by-laws in full force and effect, the applicants had a clear prima facie right to the order sought, and secondly, that as of

November 2, 1973, and indeed ever since September 14, 1973, the municipality through its Council had expressed a clear and unmistakable intent to amend the zoning by-law in the manner set out in By-law 348-73.

Many authorities were cited to us by counsel, illustrative of cases where the Courts in some instances had granted the adjournment sought and in others, had refused such adjournment and made the mandatory order sought.

In my view, no useful purpose is served in quoting passages from such authorities one way or the other, because the result in each case clearly depended on many factors and not solely on a comparison of the relative dates of the expression of a legislative intent and the date of the filing of an application for a building permit.

Moreover, in this case By-law 348-73 is acknowledged to be an attempt by the municipality to restrict new building in the areas affected in such a way, having regard to land values and economic use that no building of any consequence could be expected to be planned for this central area of Toronto, let alone receive a building permit until "such policies as may be recommended by the aforesaid planning studies or other policies in lieu thereof, may become effective" to quote from the preamble of By-law 348-73.

As counsel for the applicants put it, this by-law discloses only an intention to plan for the areas in question when studies have been completed and recommendations brought forward in due course within a period of two years from December, 1973, the declared intended life-span of this "Holding By-law".

Counsel for the respondents frankly conceded that no by-law such as this one has ever been the subject of judicial decision up to the present time. The by-laws that have had to be considered in relation to an application for an adjournment of a motion for mandamus have been by-laws specifically rezoning specified areas, large and small.

It is equally obvious from the history of the planning for this building as already recited, that it in no way is at variance with any rezoning contemplated for this particular site. Indeed, it is clear from the evidence that the long period involved in the planning for the applicants' building was not occasioned in any way by problems with or objections to the building itself, but with peripheral matters of concern to the municipality such as the creation of a park, the use of an access route over the parking lot, the pedestrian bridge over Bloor St., and so on. The applicants were under no legal obligation to become involved in these matters. In my view, having been delayed so long in an endeavour to cooperate in solving municipal problems, it is most unjust and inequitable that these applicants should, as suggested by counsel for the respondents, await approval of By-law 348-73 by the Municipal Board (if such be forthcoming), at some unknown time in the future and then seek a further amendment to the zoning by-law as amended by By-law 378-73 to exempt the applicants' site.

This proposal would, of course, involve continuing heavy financial loss to the applicants, without the slightest assurance as to when such an application would be dealt with, or that it would receive the blessing of City Council to whose uncontrolled discretion the applicants would be subjected. One cannot take such a proposal seriously.

The proposal is even more remarkable having regard to a report of the City of Toronto Planning Board dated January 29, 1974, on the subject as stated thereon, namely, a "Report on guidelines for dealing with requests for exemption from By-law 348-73 (The Holding By-Law) prior to its approval by the Ontario Municipal Board". It is to be noted that By-law 348-73 as enacted by City Council contained specific exemptions from it.

The report notes that as of December 17, 1973, there were no less than 59 formal written requests for exemption from this by-law including one by the present applicants. These are listed with what are called relevant basic details, and the note appended to the reference to the applicants' property reads "(Building Permit applied for June 8, 1973 -- refused for lack of legal access and other Building By-law contraventions. A Mandamus Action is pending and discussions are being

continued with applicant)".

After listing these 59 applications the report continues:

4. Eligibility for Exemption

Eight applications, listed in Appendix "A", have already been granted exemption by the Committee on Buildings and Development upon the recommendation of the Technical Planning Committee, the latter having reviewed them against the criteria contained in Clause 1 of Report 25 of the Committee on Buildings and Development, as amended and adopted by City Council. A further application in that Appendix has been reported upon by the Technical Planning Committee.

With respect to applications for which City Council, its Committees or officials have been negotiating with a developer over a lengthy period of time prior to the enactment of By-law 348-73, or where there is a lease requirement by the Metropolitan Subway Property Committee, or where an approved application has been made for a payment in lieu of providing parking, it would seem reasonable that these negotiations be continued with a view to considering exemption from the Holding By-law.

However, if the project for which exemption is sought would involve the demolition of a designated historic building or is located in an area serviced by an active Working Committee which is negotiating on changes in the submitted form of the project, that project should not be afforded exemption.

Eight of the applications involve buildings on the Toronto Historical Board list of buildings of architectural or historic merit. These applications are listed in Appendix "B" and are recommended to be required to be dealt with as rezoning applications, during the processing of which full examination of the disposition of the historic building or buildings on the site could be undertaken. Application No. 7, D-W-S Holdings Limited (former Dow Brewery site at Dundas and St. Patrick Streets), is currently the subject of negotiation between the developer and the South-east Spadina Working Committee, the latter seeking the inclusion of a residential component within the commercial office development now planned. This application should, therefore, not be considered for exempton.

Those applications for which exemption is sought and which do not appear to have been the subject of prior consultation or Municipal commitment should not be considered for exemption from the By-law, but should be the subject of future rezoning applications. These applications are listed in Appendix "C".

Finally, Appendix "D" lists eight applications which would appear to meet the criteria for eligibility for consideration for exemption as used in this report, together with an application involving the long and short term expansion of Molson's Brewery. It is recommended that these applications be referred to the Technical Planning Committee for reports, with the applicants requested to submit copies of available plans in sufficient numbers for the purposes of the members of that Committee; direction would be given that all reports as received by that Committee be forwarded to the Chief Planner for his report on the application to the Committee on Buildings and Development.

Reporting would continue to involve an assessment of each application against the criteria set forth in Clause 1 of Report 25 of the Committee on Buildings and Development.

The report concludes with a series of recommendations as follows:

RECOMMENDATIONS:

1. That only those applications listed in Appendix "D" to this report be further considered for exemption, and that each application on this list be referred to the Technical Planning Committee for reports.

2. That the applicant in the case of each application listed

in Appendix "D" be requested to file all material normally required in connection with applications for rezoning, in those cases where this has not already been done.

3. That the Chief Planner be requested to report on each of the applications listed in Appendix "D" upon receipt of reports from the Technical Planning Committee, and to recommend whether or not the exemption should be granted, his recommendation to be based not only on the review of the application by the Technical Planning Committee, but also on his own evaluation of the intended development against the City's existing or emerging planning objectives for the area in which the development site is located, as they appear to him at the present time.

4. That the City Solicitor be requested to report on the methods of exemption as set forth under Section 5 of this report or other methods that may appear to him to merit consideration.

5. That all applications for exemption not listed in Appendix "D" be required to be filed and processed as standard rezoning applications, which will not be reported on until the development of interim criteria as stated on Page 4 of this report.

The applicants' property is one of those listed in App. "D" as eligible for further consideration for exemption.

There could be no clearer evidence that from the planning point of view, there is no intention to alter the existing zoning affecting the applicants' property.

In these circumstances the judgment of this Court in Re Bismark Holdings Ltd. et al. and City of Toronto et al., [1973] 3 O.R. 887, 38 D.L.R. (3d) 531, becomes decidedly relevant. I quote from that judgment at pp. 890-1 O.R., pp. 534-5 D.L.R.:

> This raises a type of question that our Courts are often called upon to decide. Under certain circumstances where certain requirements have been met there are cases where an application for mandamus is adjourned until the municipality has an opportunity of obtaining the approval of the Ontario Municipal Board to a proposed zoning by-law. The principles applicable to such cases have been very fully dealt with in Hammond and Hammond v. City of Hamilton, [1954] O.R. 209, [1954] 2 D.L.R. 604; City of Ottawa et al. v. Boyd Builders Ltd., [1965] S.C.R. 408, 50 D.L.R. (2d) 704; R. v. City of Barrie et al., Ex p. Bernick, [1970] 1 O.R. 200, 8 D.L.R. (3d) 52; Re Bruce and City of Toronto et al., [1971] 3 O.R. 62, 19 D.L.R. (3d) 386, and Re Donald Bye Excavating Co. Ltd. and City of Peterborough, [1973] 1 O.R. 139, 30 D.L.R. (3d) 415, and the cases therein cited. I also refer to the recent case of Re Cambridge Leaseholds Ltd. and City of Toronto et al., which is a judgment of Osler, J., released March 30, 1973, and not yet reported. My information is that an appeal is pending in that case and in any event I do not feel it necessary to rely on it [now reported, ante, p. 378, 37 D.L.R. (3d) 60]. I refer to a quotation from the judgment of Spence, J., for the Court in City of Ottawa v. Boyd Builders Ltd., supra, which is quoted frequently in cases such as the present one. It reads [at p. 410 S.C.R., p.705 D.L.R.]:
>
> > "An owner has a prima facie right to utilize his own property in whatever manner he deems fit subject only to the rights of surrounding owners, e.g., nuisance, etc. This prima facie right may be defeated or superseded by rezoning if three prerequisites are established by the municipality, (a) a clear intent to restrict or zone existing before the application by the owner for a building permit, (b) that council has proceeded in good faith, and (c) that council has proceeded with dispatch."
>
> That excerpt is very helpful but was directed to its particular facts. The more recent cases in the Court of Appeal, particularly R. v. City of Barrie et al., Ex p. Bernick, supra, and Re Bruce and City of Toronto et al., supra, indicate that the considerations in that excerpt may not be completely exhaustive, and somewhat wider consideration that indicated by it, may, in appropriate cases, be given to the equities as between the citizens of a municipality as represented by its council and the applicant

for a building permit.

In the present case we are all of the opinion that the crucial date is July 13th. On that date an application was made which was in compliance with the zoning and other requirements then existing in all matters of substance and at that time had been no indication whatsoever of an intention to change the applicable by-law. It has been held on more than one occasion, including Ottawa v. Boyd, supra, that these rather minor defects in details in such an application do not preclude the Court granting the remedy of mandamus subject to them being remedied. In the instant case we understand this has already been done.

The respondent city in my view had not satisfied all the requirements that would entitle it to an adjournment, under the principles discussed in the Boyd case. To do so it would have to show such a situation that having regard to all the evidence, the Court should exercise its discretion to adjourn the matter until the municipality has had an opportunity to bring the by-law before the Ontario Municipal Board so as to complete what was necessary from the by-law to be fully effective in law. Quite apart from the specific tests set out in the Boyd case, in our opinion, the equities as between the parties were such that no adjournment should be granted.

(Emphasis added.)

In the result then, the application by the respondents for an adjournment of the application for mandamus is refused.

As a corollary, it becomes unnecessary to deal with the motion by the applicants to quash By-laws 347-73 and 348-73.

It may not be amiss however, to raise serious doubts as to the propriety of municipal legislation that openly invites uneven application to citizens, private or corporate. Such legislation would appear to fly in the face of a principle enshrined in the Canadian Bill of Rights, namely, that all citizens are equal before the law. This legislation openly provides for special treatment for some, who for reasons that can never be truly known, will obtain exemptions from By-law 348-73 or amendments to the zoning by-law and others will be refused. Apart from the objection that it is designed to be unequally applied, despite the declared benevolent intention of such legislation, it is fraught with obvious possibilities for abuse.

I have considered the judgment of the Supreme Court of Canada in Sanbay Developments Ltd. v. City of London et al., 45 D.L.R. (3d) 403, pronounced April 29, 1974, but in view of my finding that it is unnecessary to deal with the motion to quash By-laws 347-73 and 348-73, it is not necessary to consider the implications of that judgment in so far as these by-laws are concerned.

There remains to be considered the deficiencies alleged by the respondents to exist with respect to the application for a building permit on November 2, 1973, in so far as the building by-laws and other matters not connected with the zoning by-law are concerned.

In my view these, even if valid, which with respect to some is more than doubtful, have either been resolved or can readily be resolved. I am satisfied that with respect to such deficiencies, if any still exist, amendments thereto are "specific and in train" which satisfies the test adopted by this Court in Re David Gallo Building Co. Ltd. and City of Toronto, [1973] 3 O.R. 892 at p. 903, 38 D.L.R. (3d) 536 at p. 547.

Having dealt with this matter generally, I now refer to the specific deficiencies alleged:

(a) "The proposed plans have not been approved by the Dept. of Labour." In support of this objection, counsel for the respondents argues that there must be compliance with s. 16(1) [now s. 17(1)], of the Industrial Safety Act, R.S.O. 1970, c. 220, [repealed by s. 46 of and replaced by Industrial Safety Act, 1971, Vol. 2, c. 43] before a building permit can be issued. That section reads as follows:

16(1) No person shall commence to construct or reconstruct

a building or add to or alter an existing building,

(a) that is to be or is used as a factory;

(b) that is to be or is used as a shop or office building and is to be or is more than two storeys in height; or

(c) that is to be or is used as a shop or office building and is to have or has more than 5,000 square feet of gross horizontal area in any storey enclosed within,

(i) exterior walls, or

(ii) any combination of exterior walls and interior fire-resistive walls without any opening to another building,

or install or alter in an industrial establishment any equipment, machinery or device designated by the regulations until the drawings and specifications thereof have been approved by an engineer of the Department.

The short answer to this objection is that it is no part of the business of the City of Toronto or its employees to see to the observance of this statute.

(b) "Certain of the work for the proposed building was to encroach over the street line onto the City property and such encroachment is not permitted unless the approval of the Department of Public Works is obtained."

This no doubt was a valid objection but that permission has now been obtained.

(c) "Certain of the tie-backs during the construction of the proposed building were to be placed into the property of adjoining property owners. Such encroachment is not permitted without the consent of adjoining land owners."

This again is a meddlesome objection of no validity. The matter is purely a civil one between the applicant and its neighbours. If the applicant trespasses he does so on his own responsibility and the municipality neither can nor should attempt to police the matter.

(d) "The area of unprotected openings, namely windows, on the north face of the building is in excess of the area

permitted."

This is a valid objection, but the applicants are ready to delete the extra windows if required to do so. Provision was made for them in the form of retail display windows, not originally planned, but to make the north face of the building more attractive to users of the projected municipal park area.

If the city wants them eliminated to comply with the building by-law, that must and will be done. The city may prefer to grant an exemption however.

(e) "The architectural plans filed with the application were lacking in detail and no structural plans were filed."

If this objection ever had any factual validity, the evidence is that all required plans have long since been filed.

In the result, therefore, an unconditional order directing the respondents to issue to the applicants a building permit providing for the construction of a building municipally known as Nos. 110 to 128 Bloor St. W. in accordance with the application for such permit originally filed with the respondents on June 8, 1973, but as revised on November 2, 1973, will issue.

The applicants are entitled to their costs.

Application granted.

Conin Construction Co. Ltd. v. Borough of Scarborough;

Premium Forest Products Ltd., Third Party

32 O.R. (2d) 500
122 D.L.R. (3d) 291

ONTARIO
HIGH COURT OF JUSTICE
SAUNDERS J.
13TH APRIL 1981.

ACTION to recover money paid to a municipality as a charge imposed under a municipal by-law.

A. C. Gluek, for plaintiff.

L. C. Mangoff, for defendant.

V. A. R. Lampkin, for third party.

SAUNDERS J.:-- The issue in this action is whether the plaintiff may recover an amount paid by it to a municipality as a charge imposed under a municipal by-law.

The plaintiff, Conin Construction Company Limited ("Conin") had agreed with the third party, Premium Forest Products Limited ("Premium") to demolish certain buildings and to construct a new building on lands owned by Premium in the Borough of Scarborough.

After several prior consultations with municipal officials, Conin applied on August 10, 1977, for a building permit to do the work. In the application form, Conin is described as the "Applicant" and Premium is described as the "Owner". Scarborough By-law 16830 under the Building Code Act, 1974 (Ont.), c. 74, requires an application for a building permit to be signed by the owner or his authorized agent and this was done by James W. Booth, the president of Conin, who described himself as the agent for the owner.

On September 2, 1977, Conin was told that the building permit was ready to be picked up. When Mr. Booth attended at the municipal offices to obtain the permit, he was advised for the first time that a charge under By-law 16902 would have to be paid before the permit would be issued.

It is agreed that By-law 16902 was enacted pursuant to s. 359 [since am. 1978, c. 87, s. 40(5)] of the Municipal Act, R.S.O. 1970, c. 284. Section 359 provides as follows:

359(1) With the approval of the Municipal Board, councils of local municipalities may, by by-law, define the class or classes of buildings to be erected or enlarged after the effective date of the by-law that impose or may impose a heavy load on the sewer system or water system, or both, by reason of which expenditures are or may be required to provide additional sanitary or storm sewer or water supply capacity that in the opinion of a council would not otherwise be required, and may impose upon the owners of such buildings a special charge or charges over and above all other rates and charges to pay for all or part of the cost of providing the additional capacity.

(2) The special charge or charges under any by-law shall refer specifically to sewage works or water works as defined in section 362, or to both, as the case may be.

(3) The proceeds of the charge or charges authorized by any such by-law shall be deemed to be a reserve fund established under section 308.

(4) The by-law may provide that the charge or charges imposed under it are a lien upon the land on which the building is erected, and may be collected in the same manner and with the same remedies as provided by this Act for the collection of real property taxes.

(5) Any charge or charges to be imposed under the by-law may be made payable on an application for a building permit or at any time thereafter.

(6) The following are exempt from any charge or charges

imposed under the by-law:

1. Every building on land exempt from taxation under any general or special Act.

2. Every building on land in respect of which an agreement has been entered into with the municipality under section 33 of The Planning Act or any predecessor thereof.

3. Every building or any land in respect of which a contribution to provide sanitary or storm sewers or water supply facilities has been made within the ten years previous to the application for a building permit, to the extent of the contribution so made.

4. Every residential building having not more than two dwelling units.

5. Every building, other than a residential building, with an inside floor area of not more than 3,000 square feet.

By-law 16902 was approved by the Ontario Municipal Board on July 6, 1976, and was in force at all relevant times. It provides as follows:

BOROUGH OF SCARBOROUGH

BY-LAW NUMBER 16902

being a by-law to impose a special charge on classes of buildings that impose or may impose a heavy load on the municipal sewer and water systems.

WHEREAS the erection or enlargement of residential, commercial and industrial buildings impose or may impose a heavy load on the municipal sewer and water systems by reason of which municipal expenditures are or may be required to provide additional sanitary and storm sewer and water supply capacity that would not otherwise be required;

AND WHEREAS authorization has been given to impose a special charge over and above all other rates and charges to pay for all or part of the cost providing such additional capacity;

AND WHEREAS The Ontario Municipal Board by its Order No. M 7661 approved the imposition of the special charges hereinafter set forth.

THEREFORE the Council of the Borough of Scarborough enacts as follows:--

1. THAT from and after the passage of this by-law, as a condition of the issuance of a building permit for the erection or enlargement of any of the classes of buildings set out in Column I of the Table, the charges in the amounts set out in Column II of the Table in respect of Storm and Sanitary Sewers and in the amounts set out in Column III of the Table in respect of Water Supply Facilities, shall be payable over and above all other rates and charges, prior to and as a condition of the issuance of such building permit.

[See original judgment for table]

2. THAT the lot area for commercial and industrial buildings be calculated as the minimum lot on which the building or addition could be erected under the coverage provisions of the appropriate Zoning By-law.

3. THAT the following are exempt from any charges imposed under this By-Law:

(a) Every building on land exempt from taxation under any general or special Act.

(b) Every building on land in respect of which an agreement has been entered into with the municipality under Section 33 of The Planning Act or any predecessor thereof.

(c) Every building or any land in respect of which a contribution to provide sanitary or storm sewers or water supply facilities has been made within the ten years previous to the application for a building permit, to the extent of

the contribution so made.

(d) Every residential building having not more than two dwelling units.

(e) Every building, other than a residential building, with an inside floor area of not more than 3,000 square feet.

4. THIS By-Law shall not be effective until approved by The Ontario Municipal Board.

5. THAT By-Law Number 17181 is hereby repealed.

The amount of the charge under the by-law, as calculated by the municipal officials, was $8,546.48 and that amount was paid by Conin to the borough on September 2, 1977. Conin contends that it should not have been charged because the by-law is invalid.

A by-law enacted pursuant to legislation similar to s. 359 and containing provisions of general application without reference to actual or estimated expenditures has been upheld: City of Ottawa v. Royal Trust Co. et al., [1964] S.C.R. 526, 45 D.L.R. (2d) 220. In another case, the validity of a similar by-law was not questioned: Re Rose Park St. James Investments Ltd. et al. and City of Toronto, a decision of the Divisional Court released on February 28, 1979, 23 O.R. (2d) 683, 97 D.L.R. (3d) 149. It would appear that a charge may be imposed even if, as in the case at bar, the particular construction could not possibly require expenditures to provide additional sanitary or storm sewers or water supply capacity that would not otherwise be required.

Conin attacks the by-law on two grounds. First, while s. 359 entitles the municipality to impose a charge on the owner, the by-law does not specify who is liable for the charge and as the charge is imposed as a condition to the issuance of a building permit, it might be levied on persons who are not owners. Second, while s. 359 provides that the charge may be payable on an application for a building permit, the section does not authorize imposing the charge as a condition precedent to the issuance of such a permit.

It is trite to say that a municipality may only act within the powers conferred on it by its enabling legislation. Section 359 authorized the imposition of a charge on an owner. The by-law does not state the person upon whom the charge is imposed nor does it refer to the enabling legislation. The charge is imposed as a condition to the issuance of a building permit. If the by-law is not defective for lack of specifying the person liable for the charge, such person must be ascertained by examining the wording of the by-law. It would seem that such person must be the applicant for the building permit as he must pay the charge as a condition of the issuance of the permit to him. The Building Code Act, 1974 does not specify who may apply for a building permit. It would seem that not only owners but other persons apply for building permits: see Re Chief Building Official for City of Toronto and Manolan Enterprises Ltd. et al. (1978), 22 O.R. (2d) 60, where an owner was not held responsible for the failure of a tenant to obtain a building permit. Scarborough By-law 16830, which regulates the issuance of building permits, requires that applications must be signed by an owner or his authorized agent but draws a distinction throughout the by-law between an owner and an applicant. The form of application used by the borough indicates that the owner and the applicant may be different persons. Bearing in mind that a municipality is presumed to intend to act within the powers conferred upon it and as it may be that in Scarborough an application for a building permit must be made either by an owner or his agent, I would hesitate to declare By-law 16902 invalid on the ground that it does not specify that the charge is imposed on the owner.

The second ground of attack is that the enabling legislation does not authorize the imposition of the charge as a condition of issuance of the permit. Counsel for the borough contends that s. 359(5) authorizes the municipality to make the payment of the charge a condition of issuance. It seems to me, however, that in imposing the condition the borough has done more than it was authorized to do by statute. A municipality may not impose a financial requirement as a condition without statutory authorization: see Re Sorokolit et al. and Regional Municipality of Peel et al. (1977), 16 O.R. (2d) 607, 78 D.L.R. (3d) 715, 2 M.P.L.R. 249 sub nom. Re Sorokolit et al. and

Mississauga. The by-law could have provided (although it did not) that the charge would be a lien on the land and might be collected in the same manner and with the same remedies as real property taxes. In my opinion, all the municipality was entitled to do under s. 359(5) was to provide that the charge would be payable on the application. The enabling legislation did not entitle the municipality to go the extra step and impose payment as a condition. The enabling legislation provides for collection by other procedures.

Plaintiff's counsel referred to Chateau Developments Ltd. v. City of Edmonton et al. (1977), 4 Alta. L.R. (2d) 19, 7 A.R. 612, 4 M.P.L.R. 25, a decision of the Trial Division of the Alberta Supreme Court. In that case, enabling legislation empowered the municipality to levy a development charge at the time that an application for development permit was received. The by-law provided for the imposition of the charge "at the time the development permit is issued ... and as a condition thereof" and required payment to be made prior to the issuance of the building permit. The provisions of the by-law imposing the charge and requiring it to be paid was held to be void. It should be pointed out that in other provisions in the enabling legislation dealing with similar charges, the municipality was authorized to refuse to issue a permit until the specified charge had been paid. The absence of such a provision in the part of the enabling legislation under consideration influenced the Court in making its decision. However, it should be observed that s. 359 does provide for a means of collection of the charge and it might be said that if the Legislature intended that the municipality should be able to impose the charge as a condition it could have so provided.

I recognize that if payment is not made at the time of issuance, the municipality might be able to resist an order for mandamus requiring it to issue a permit. In my view, that is a different matter and would depend on the circumstances in each individual case.

I therefore find that the by-law is invalid as exceeding the power granted by the enabling legislation and that the municipality therefore was not entitled to demand the payment charged to the plaintiff.

It must next be determined whether the moneys paid to the municipality may now be recovered. Subject to certain exceptions, money paid under a mutual mistake of law cannot be recovered. One exception is where the payment is made under the practical compulsion of necessity. Lord Reading C.J. in Maskell v. Horner, [1915] 3 K.B. 106, said of such a payment [at p. 118]:

> The payment is made for the purpose of averting a threatened evil and is made not with the intention of giving up a right but under immediate necessity and with the intention of preserving the right to dispute the legality of the demand.

A further exception is where the parties cannot be said to be in pari delicto. In Kiriri Cotton Co. Ltd. v. Dewani, [1960] A.C. 192, Lord Denning said at p. 204:

> If there is something more in addition to a mistake of law --if there is something in the defendant's conduct which shows that, of the two of them, he is the one primarily responsible for the mistake--then it may be recovered back. Thus, if as between the two of them the duty of observing the law is placed on the shoulders of the one rather than the other--it being imposed on him specially for the protection of the other--then they are not in pari delicto and the money can be recovered back ... Likewise, if the responsibility for the mistake lies more on the one than the other--because he had misled the other when he ought to know better--then again they are not in pari delicto and the money can be recovered back ...

In Eadie v. Township of Brantford, [1967] S.C.R. 573, 63 D.L.R. (2d) 561, the appellant as a taxpayer and inhabitant of the defendant corporation was dealing with the clerk-treasurer of the corporation. The Supreme Court of Canada held that the clerk-treasurer was under a duty towards the appellant and other taxpayers of the municipality. When that clerk-treasurer demanded payment of a sum of money on the basis of an illegal by-law, the Court further held that he was not in pari delicto to the taxpayer who was required to pay the sum even if the clerk-treasurer did not then know of its illegality.

Conin had entered into a fixed price contract with Premium which was required to be completed by June 1, 1978, subject to extension in the event of certain delays. Under the contract, Conin agreed to provide all necessary consents and permits from the municipality. In my opinion, a delay in obtaining a permit might not have entitled Conin under the contract to an extension of the completion date.

Conin was anxious to get the foundations and footings completed before the fall freeze-up and Mr. Booth felt that if this was not done, it would be difficult to complete the contract within the stipulated time. The work which was to be done involved taking down an existing building and constructing a new building which was disruptive to the employees and operations of Premium.

Until September 2, 1977, when he went to pick up the licence, Mr. Booth had never heard of the charge under By-law 16902. He was upset and tried to obtain an explanation from the municipal officials which was not given to his satisfaction. He was told that if he did not pay he would not get the permit which was an approach consistent with the terms of the by-law. If he was unable to obtain the permit and could not start the building on time, he was in danger not only of increasing his costs but also of breaking his contract. Commencing construction without a permit was not a practical alternative.

Mr. Booth concluded that he had no choice but to pay the charge as required but advised the officials that he would seek to recover the amount and was told, in effect, that he would be able to apply for such recovery.

The facts would seem to fit within the dictum of Lord Reading. The payment was made not with the intention of giving up a right but under immediate practical necessity and with the intention of preserving the right to dispute the legality of the demand. Furthermore, the circumstances under which the payment was demanded are similar to those in Eadie, supra. The officials of the defendant borough were not, in the circumstances, in pari delicto with the plaintiff.

I therefore conclude that the plaintiff is entitled to recover from the defendant the amount of $8,546.48 together with interest in accordance with the provisions of the Judicature Act, R.S.O. 1970, c. 228, and costs. The third party action will be dismissed with costs.

Judgment for plaintiff.

Csele v. Pelham (Town)

Between
Arthur Csele, applicant, and
Corporation of the Town of Pelham and Judge, Chief Building Official for the Town of Pelham, respondents

[1985] O.J. No. 1829
Suit No. 112/85

Ontario District Court - Niagara South Judicial District
Fleury D.C.J.
Oral Judgment: February 19, 1985

Counsel:
A.T. Lacavera, for the applicant.
G.F. Brooks, for the respondents.

[para1] FLEURY D.C.J. (orally):-- This is an application pursuant to s. 15 of the Building Code Act of Ontario, R.S.O. 1980, c. 51, to rescind a decision of the chief building inspector for the Town of Pelham.

[para2] The application was launched by notice of application dated February 7, 1985 and was originally returnable on Wednesday, the 20th day of February, 1985. As a result of conflicting Court schedules it was agreed between counsel that the matter could be heard on Tuesday, the 19th of February 1985 and I take it that neither counsel is objecting to that particular procedure. Is that correct? Mr. Brooks: Yes your Honour. Mr. Lacavera: Yes.

[para3] In considering this application I have had to accept certain facts outlined in the materials before me and I will summarize these facts very briefly.

[para4] The applicant in this case, Arthur Csele, purchased certain lands under an agreement of purchase and sale, dated, August 9, 1984. The agreement of purchase and sale contained certain conditions outlining the prerequisites that Mr. Csele was imposing on the closing of this transaction, one of these conditions being the obtention of certain "necessary absolute permits". I am not sure of the exact significance of the words used but generally speaking these could be considered as referring to the obtaining of building permits.

[para5] One or about the 5th day of November 1984, the applicant through his solicitor received a letter from the chief building official for the Town of Pelham the respondent in this particular application, indicating that the lands in question were zoned for commercial use, that services were available on Highway 20 which is in the immediate vicinity of the lands in question. The last paragraph of this letter contains the following statement:

> "The town will permit connection of the services, (water and sewer). However, Ministry of Transportation and Communication permits will be required".

[para6] The inescapable conclusion arising from a reading of this letter, dated, November 5, 1984, was that the Town of Pelham would raise no objections to the proposals put forth by the applicant. On the faith of this particular letter the conditions which had been included in the agreement of purchase and sale were withdrawn by a document dated the same day, November 5, 1984 and signed by Mr. Csele on November 6, 1984. That document is appended as Ex. C, in the application record of the applicant. A transaction was eventually completed and an application for a building permit was eventually forwarded to the Town of Pelham, that application for building permit being dated, January 10, 1985.

[para7] Subsequent to the application for the building permit and during the process of obtaining the usual clearance from various departments, the Town of Pelham was made aware of certain conflicting provisions between the Regional Municipality Official Plan and the town's own official plan. As a result of this, the same official who had written the November 5, 1984, letter, Mr. Judge, the chief building official, sent a letter to Mr. Csele indicating that the application for a building permit was refused. The reason for refusing the building permit was stated in the last paragraph of the first page of the letter dated, February 5, 1985, which is shown as Ex. E in the application record:

"The Zoning By-Law for the Town being By-Law No. 279 (1974), as amended, zones this property as Commercial General however, the Regional Municipality of Niagara's Official Plan designates the property as Good Tender Fruit Area and it would appear that this document supercedes the

Town's Zoning By-Law and thereby nullifies the Commercial General Zone."

[para8] It should be pointed out that no such comment or any similar paragraph was contained in the letter dated, November 5, 1984, which was forwarded to the applicant's solicitor.

[para9] It does appear and it was certainly made very clear during the argument of this application that what prompted the reversal of its position by the Town of Pelham, was the conflicting line of cases heard in the Supreme Court of Ontario, on applications similar to this one. Counsel were very helpful in providing me with a case brief and in very eloquently and expertly, analyzing the various provisions of the various lines of cases which have produced the somewhat confusing legal situation that appears to prevail today.

[para10] The first line of cases appears to date back to a conflict which occurred in the Regional Municipality of Ottawa-Carleton, in the year 1978. It is the Campeau Corp. v. Gloucester, (1978), 21 O.R. (2d) 4. In that particular decision, Mr. Justice Holland, of the Supreme Court of Ontario, was hearing three applications for injunctive relief. The injunction sought in those cases was to restrain the issue of a building permit for the construction of a shopping centre in a certain location located in the Township of Gloucester until those portions of the Official Plans of the Regional Municipality of Ottawa-Carleton dealing with the particular question of this shopping centre had been disposed of by the Municipal Board.

[para11] It seems very clear from my reading of the Campeau Corp. case, that the learned trial Judge was preoccupied, firstly, with the equities in that particular case. He makes a statement on p. 6 of the report which very clearly spells out some of the problems that could arise from a decision by the building inspector to issue the building permit and that statement is that, "the area will not support two regional shopping centres".

[para12] In the face of that conclusion that the learned trial Judge made I assume after hearing evidence on that aspect of the matter, he also comments on the fact that the township had apparently determined to issue a building permit to one of the applicants despite the known provisions of the proposed Regional Municipality of Ottawa - Carleton Official Plan.

[para13] He then goes on to consider the question of s. 6 of the Building Code Act which is the section which I am asked to interpret today and he distinguishes previous decisions on the basis of the alleged special character of a Regional Municipality Official Plan. In the Campeau Corp. case there appeared to be an obligation under the Regional Municipality Ottawa - Carleton Act for all of the local municipalities to amend their zoning by-laws to conform with the official plan of the regional municipality, and that obligation was to do so forthwith. The local municipality in that case, the Township of Gloucester had not amended the zoning by-law and the learned trial Judge concluded that there was a statutory obligation imposed upon the municipality to amend its by-laws and that this statutory obligation as contained in the Regional Municipality of Ottawa - Carleton Act, R.S.O. 1970, c. 407, amounted to what could be described as, "other applicable law", as contained in s. 6(1)(a) of the Building Code Act of Ontario.

[para14] This decision was appealed and the Court of Appeal in a very succinct judgment simply affirmed the decision of the trial Judge and did not provide the legal profession with much clarification as to how the Court of Appeal had reached that particular decision.

[para15] I am satisfied that the learned trial Judge in the Campeau Corp. case was dealing with different principles than the ones that I am asked to consider today. The principles he was looking at involved primarily an application for injunctive relief which calls in the equitable jurisdiction of the Supreme Court of Ontario. Any applicant for equitable remedies must come to Court with clean hands. I am satisfied that in that particular case the learned trial Judge concluded that some of

the applicants for mandamus did not come to Court with clean hands. He states at p 9 of the report; "this result it seems to me is also equitable, the municipalities and developers are engaged in a contest for the right to construct a shopping centre and it is only fair that the matter proceed in an orderly way for proper evaluation before the Ontario Municipal Board". I am satisfied that those factors had a major impact on the trial Judge's decision and on his interpretation of s. 68(7) of the Regional Municipality of Ottawa - Carleton Act.

[para16] The second line of cases I have had to look at is a more recent one and stems from a decision of Mr. Justice Southey speaking for the Divisional Court in Re Woodglen & Co. and North York (1984), 47 O.R. (2d) 614, and it appears to be on all fours with the situation which I have to decide this morning. In that particular decision the conflict was between the local official plan and the zoning by-law enacted under a predecessor of the official plan that was apparently being violated in that particular case. In that case, Mr. Justice Southey in summarizing the law of Ontario as it relates to official plans indicated very clearly at p. 617 O.R. that official plans are a recommendation, or statement of intention only which may or may not be implemented by the municipality by the enactment of appropriate zoning by-laws.

[para17] In reviewing the grounds for this decision I also referred to the Planning Act, S.O. 1983, c. 1, and to the definition section in s. 1(h) of the Planning Act, which defines that:

> " 'official plan' means a document approved by the Minister containing objectives and policies established primarily to provide guidelines for the physical development of a municipality, or a part thereof, or an area that is without municipal organization while having regard to relevant social, economic and environmental matters."

[para18] I think it is trite law to say that official plans are basically an outline of long-term objectives proposed by a municipality and certainly do not take any legal significance until they have actually been implemented by the passage of appropriate zoning by-laws.

[para19] I am satisfied that there is a requirement for the passing of a by-law even though a municipality may wish to amend the official plan. In this case, I was told during the hearing of this application that the Town OF Pelham had proposed revisions to its official plan and that these revisions were presently before the Minister and this was raised as an element and I was urged to consider this in determing whether or not the building permit should be issued. Section 24(2), of the Planning Act of of 1983, very clearly provides for this very eventuality. It says:

> "Where a council has adopted an amendment to an official plan, it may before the Minister has approved the amendment, pass a by-law that does not conform with the official plan but will conform therewith if the amendment is approved, and the by-law shall be conclusively deemed to
>
> have conformed with the official plan on and from the day it was passed if the Minister approves the amendment to the official plan;".

[para20] Therefore, in this particular case had the Town of Pelham been concerned about the potential for redevelopment of this particular area, or of all the areas, as they were affected by the regional municipality official plan it certainly could have passed a by-law which although it would not have conformed to the existing official plan would have conformed to the proposed official plan.

[para21] I am also aware of the provision of s. 27 of the Planning Act 1983, which provides for the overriding power of a regional municipality to in effect enact local zoning by-laws and amendments to the local official plans:

> "Where the local municipality fails to act where there is a conflict between the regional plan and the local plan;".

[para22] The remedies provided in s. 27(2) are remedies that are available to regional municipalities and if they do not avail themselves of these remedies then they can hardly later on criticize the local municipalities for acting in accordance with existing zoning by-laws which have not been altered either by the local authorities, or by the regional authorities.

[para23] It seems to me that the legal background has changed considerably since the Campeau decision and that in light of the present legislation it would not be necessary anymore to apply for a mandamus or a prohibition order to prevent what was happening in the Campeau situation. It may very well be that the Campeau decision prompted the amendments, or some of the amendments that were made to the Planning Act.

[para24] I note that in the Woodglen case, there had been first of all a refusal by the Divisional Court to hear an application for a mandamus, it was felt that there were other appropriate remedies available to the applicant in that case and that the other remedies should be followed. That also lends some authority to my interpretation that the background of the law has changed and therefore makes it a much clearer area in which to reach a decision on this point.

[para25] I am in complete agreement with the ratio of the Woodglen case, I consider that Mr. Justice Southey has accurately expressed the law as it presently stands in Ontario. I am satisfied that as a Judge sitting in an appeal under s. 15(1), of the Building Code Act, I have very little discretion; that my jurisdiction is to consider the decision that was made by the chief official under the Act and to rescind, or affirm the order, or decision of the inspector, or chief official and to order what I consider that the inspector, or chief official should have done if he had properly interpreted the Act.

[para26] I am satisfied that in this case there is no applicable law that would be contravened if a building permit were to issue in the instant case and therefore that the building inspector was in error in refusing to grant the building permit and I therefore find for the applicant and I order that a building permit be issued forthwith.

FLEURY D.C.J.

Czumak v. Etobicoke (City) (Ont. Ct. (Prov. Div.))

Between
John Czumak, Peter Czumak and Cherry Park Contracting Inc.,
Appellants, and
City of Etobicoke, Respondent

[1994] O.J. No. 2247
DRS 95-01084

Ontario Court of Justice - Provincial Division
Toronto, Ontario
Fairgrieve Prov. Div. J.
September 16, 1994.

Mark Carniglia, for the Appellants.
J.R. Hart, for the Respondent.

[para1] FAIRGRIEVE PROV. DIV. J.:-- The three appellants are two brothers, John and Peter Czumak, and their incorporated home renovation business, Cherry Park Contracting Inc. On February 9, 1994, they were convicted by a justice of the peace in the Provincial Offences Court at Etobicoke of all 41 charges against them under the Building Code Act, S.O. 1992, Chap. 23. The same day, fines totalling $454,500 were imposed. They have appealed now against all of the convictions and sentences, with the exception of one conviction for each of them on a charge relating to construction that was not in accordance with a building permit that had been issued. The abandoned that particular appeal when the appeals were argued on August 15, 1994.

[para2] The number of convictions and the magnitude of the fines imposed convey, in my opinion, a completely wrong impression of the seriousness of the appellants' conduct, and it will quickly become apparent that I take a view of this case that differs substantially from that taken by the justice at trial. In fact, I see no reason to defer a statement of the inescapable conclusion that the learned justice of the peace both fundamentally misinterpreted the provisions of the statute and misapprehended the legal significance of the evidence she heard. Moreover, in my view, she went on to impose fines which were grossly disproportionate to the gravity of the offences she erroneously found had been committed, and she ignored the principles which govern sentence in cases of this kind.

[para3] In fairness to the justice of the peace at trial, however, it should be noted that the defendant, John Czumak, appeared before her without counsel and as agent for the other unrepresented defendants. As a consequence, the trial court did not have the benefit of the very able and helpful submissions that were made by Mr. Carniglia on the appeal. As well, some of the provisions of the Building Code Act can be regarded as rather technical in nature and might, understandably, not have been very familiar to the presiding justice. This was the sort of case, then, where any court would have found itself particularly reliant on the assistance of counsel to identify the issues and to argue the respective positions taken. The absence of defence counsel at trial made the task for the justice of the peace much more difficult than it might otherwise have been. Having said that, however, it obviously did not relieve the court of its duty to apply the law properly and to deal with the defendants fairly: see R. v. McGibbon (1988), 45 C.C.C. (3d) 334 at p. 347 (Ont. C.A.).

Overview of the Case

[para4] Although it will still be necessary to review the evidence in some detail so that it can be related to the various charges, it might be helpful to put matters in context first by providing a brief overview of the case. Without wanting to oversimplify, I think it is fair to say that the whole case really boiled down to a situation where the defendants, making renovations to their family's house, proceeded to make some changes to a second storey addition which were not in accordance with the plans which had been approved by the municipality at the time that work commenced. These changes were described as an additional window on one side of the house, an enlargement of the master bedroom, and the movement of a second-floor ensuite bathroom from its

original position. It was conceded that this work started before the architect had finished revised drawings for submission to the City, and before a new building permit could be issued. It was pointed out on the appeal, although not necessarily understood at trial, that the City was obliged to grant approval of these changes and to issue the new permit, because the revised construction complied with all of the legal requirements. Approval was ultimately given and the revised permit was issued, but not until at least two weeks after the work had commenced.

[para5] During the period before the revised permit was obtained, an "Order to Comply" was issued by a building inspector, and some work continued thereafter. There was no proof, however, that any of the work after the "Order to Comply" was issued was not in accordance with the original building permit. In any event, the fact that work continued led to a "Stop Work Order" being posted. Even after this "Stop Work Order", some construction was observed to have continued.

[para6] On seven occasions from October 22 to November 1, 1993, Mr. Chalmers, the senior building inspector, attended at the house, but entry was refused to him by one or other of the defendants. At the same time, although Mr. Chalmers testified that he had not been aware of it before trial, other inspectors were allowed to enter so that they could conduct inspections, and they approved the work that had been done. Mr. Chalmers was finally allowed to enter on November 1st, but only after he produced a warrant for entry or search, and only after Mr. Czumak had spoken to his lawyer concerning the warrant.

[para7] On the basis of those facts essentially, the defendants were convicted of the 41 offences and fined, as already stated, a total of $454,500, as follows:

[See original for chart]

The Evidence

[para8] There was very little dispute concerning the facts. The prosecution called two witnesses, Randy Chalmers, the senior building inspector, and Enzo Galli, a building inspector, both employed by the City of Etobicoke. John Czumak gave evidence for the defence, not so much to challenge the evidence given by the prosecution witnesses as to explain the defendants' conduct from his perspective. The justice of the peace was not really called upon to make findings of credibility, given that all three witnesses were obviously honest, reasonable people who had provided reliable and generally consistent evidence.

[para9] John Czumak and Peter Czumak lived with their parents in a house located at 1 Sunnydale Drive in Etobicoke. The parents had bought this house in the summer of 1993, and the two brothers, as part of their corporate business, proceeded to renovate the house that Fall, converting what had been an ordinary suburban bungalow into what the photographs showed to be a handsome two-storey dwelling. Mr. Czumak testified that as well as enlarging and improving his family's accommodation, the renovated house was intended to provide a showpiece of their craftsmanship for prospective clients. Local approval had been given for the construction, including the second storey addition, after drawings had been filed, and work had started under the building permit which had been issued by the City on September 1, 1993.

[para10] On September 27th, in answer to a neighbour's complaint that a window had been installed upstairs on one side of the house that had not been shown on the approved drawing, Mr. Galli went to the house, although he did not say what, if anything, he did on that occasion. On October 12th, Mr. Galli was called by the defendants to come to the house to conduct what he described as a "framing inspection". Mr. Galli testified that he found the work to be well done, although he did not have the approved plans with him at that time. The next day, Mr. Galli received a report from the heating inspector that the pipes and a partition did not line up according to the approved drawing, and that the defendants had apparently extended the master bedroom on the second floor over the back of the garage further than had been approved. On October 14th, Mr. Galli called Peter Czumak to ask him about what had been reported to him. Mr. Czumak

acknowledged that the report was accurate, and advised him that they were having revised drawings prepared that he would submit to the City. Mr. Galli also testified that they had some minor plumbing and heating work to be rectified or which

required revised drawings.

[para11] Later the same day, October 14th, Mr. Galli attended the property and observed himself that a bedroom had been made larger and that the bathroom had been moved from its original position on the drawing to a spot over behind the garage. Mr. Galli then issued what he referred to as "a compliance". This "Order to Comply", dated October 14, 1993, was filed as an exhibit. It read, in part, as follows:

> An inspection of the property/building at the above location has disclosed the following contravention(s) of the Building Code Act, R.S.O. 1992 [sic] and/or Ontario Regulation 413/90 as amended. In accordance with subsection 12(2) of the Act, you are hereby directed to comply with the corresponding provisions by taking corrective action.
> Act/Code Reference: Ontario Building Code Act, Section 8(13)
>
> Contravention: No construction except in accordance with approved plans
>
> Remarks: 2nd floor addition not per approved plans. Cease all work and submit revised plans showing deviations and changes for authorization by the Chief Building Official. [emphasis added]
>
> [Above] shall be carried out forthwith. [emphasis in original]

[para12] Mr. Galli next visited the house on October 20th, after checking with his office to find that no application for revision had been received; in fact, his records showed that the application was not received until the following day, October 21st When Mr. Galli attended on October 20th, he found that "work was still in progress" and that "it had been drywalled and... taping was going on". The work at that time was not otherwise described.

[para13] Mr. Chalmers, the senior inspector, went to the address the next morning, October 21st, and posted a "Stop Work Order", signed by himself and the Chief Building Official. This document was also entered as an exhibit Under very large lettering saying "Stop Work Order", it read as follows:

> In accordance with Subsection 14(1) of the Building Code Act and pursuant to the Order to Comply issued by Inspector Enzo Galli dated October 14, 1993, it was found that on October 21, 1993, the contraventions identified on the said Order have not been rectified. You are hereby ordered to cease all work immediately except for any corrective work necessary to eliminate the contraventions and any work necessary to alleviate hazardous conditions.

When asked by the prosecutor what the purpose of the "Stop Work Order" had been, Mr. Chalmers replied that work had continued in contravention of the "Order to Comply" which had been issued on October 14th. Mr. Chalmers stated, "The Order was issued on October 14th and work was continuing up until October -- and on October 21st". He also testified that on October 21st, he observed that "there was masonry work continuing on the front of the house and there were workers inside working on drywall", and he produced a photograph taken that day showing workmen doing masonry work on the second floor balcony at the left front of the house. It is of some significance, I think, that the stone balcony was in fact part of the original approved plan, and that there was no evidence of where in the building the continuing drywall work was being done.

[para14] Because the defendants were convicted of numerous offences allegedly committed over the following days, it is necessary to state briefly what occurred on each of those dates.

[para15] Mr. Chalmers testified that when he returned to the house on the Friday morning, October 22nd, the day after the "Stop Work Order" was posted, he observed workmen cleaning and removing construction debris from the house. He also stated that he noted that the building permit card was not posted, as required, in a conspicuous place, and he asked that it be posted on the site. Mr. Chalmers returned during the afternoon of the same day and spoke to Peter Czumak, who told him that there would be no entry allowed into the house. The reasons given then by Mr. Czumak were that there were people in the house, and he was not prepared for an inspection because he was applying for a new permit that had not yet been issued. Peter Czumak told Mr. Chalmers that he would allow him entry the following Monday morning.

[para16] On Monday, October 25th, Peter Czumak phoned Mr. Chalmers to cancel the inspection and to make further inquiries concerning the progress with his permit. Mr. Chalmers attended nonetheless, bringing Mr. Galli with him. Although a person, identified by Mr. Chalmers simply as "the builder", told him that he-would allow him entry as long as he left his camera outside, which Mr. Chalmers agreed to do, he was then refused entry to the property. Mr. Chalmers took photographs of masonry work going on on the second floor balcony and the front porch of the house. Mr. Chalmers also observed that the "Stop Work Order" was still in place, but the building permit had not been posted.

[para17] The next day, October 26th, Mr. Chalmers again spoke to Peter Czumak on the phone to make him aware that work was continuing in violation of the "Stop Work Order" and that they were being denied entry into the house. Mr. Czumak repeated that there would be no entry allowed into the house. Mr. Chalmers and Mr. Galli went to the house anyway. At that time, Peter Czumak told them that he would not allow them to enter, saying that he thought people were sleeping in the house, and that they were trespassing and should not come on the property again. Mr. Chalmers testified that on that day he observed some soil removal and grading work going on at the front of the house. The building permit card was still not posted, according to Mr. Chalmers' evidence.

[para18] The following afternoon, on October 27th, Mr. Chalmers returned to the house Peter Czumak told them again that they were trespassing. Mr. Chalmers testified that work was continuing on the front balcony, and that he heard the noise of hammering and skilsaws coming from inside the house. He also observed that the building permit card was still not displayed, although a Cherry Park Contracting Inc. advertising sign had been put up. In terms of the additional work since his last visit, Mr. Chalmers pointed to the photographs which showed changes to the front pillars and the floor of the second floor balcony.

[para19] Mr. Chalmers went back the next day, October 28th, to find that workmen were putting down marble for a stone floor on the balcony. Peter Czumak told him to get off the property, and not to trespass. He also warned Mr. Chalmers that if he entered the property again, he would be removed.

[para20] The following day, Friday, October 29th, Mr. Chalmers and Mr. Galli went to the house and found that the sodding in the front yard had been completed. Mr. Chalmers also testified that they were refused entry to the property again, this time by John Czumak. The building permit card, he said, was still not posted.

[para21] Also on October 29th, the additional permit that had been applied for on October 21st was issued. It was accepted that this permit provided proper authority for the changes from the original approved drawing. Mr. Chalmers testified that according to the Building Code Regulations, the "Stop Work Order" would have been lifted with the issuance of the new permit.

[para22] Mr. Chalmers returned to the house the following Monday, November 1, 1993, with a warrant. He testified that he was not given entry on his first attempt John Czumak testified that he told the inspectors to wait while he called his lawyer to seek advice concerning the validity of the warrant, and that there was a 20-minute delay before he allowed Mr. Chalmers in. Mr. Chalmers ultimately found that the additional permit had been issued the previous Friday.

[para23] Mr. Galli agreed in cross-examination that he had been told by both Peter Czumak and John Czumak that he could attend the property at any time to inspect it, as long as he was not with Mr. Chalmers. Mr. Galli further testified that in fact he had gone there without Mr. Chalmers after the "Stop Work Order" had been posted, and that he had been allowed in on those occasions. John Czumak testified that the defendants never denied access to any inspector except for Mr. Chalmers. In reply, Mr. Chalmers conceded that he had been unaware of Mr. Galli's visits until the morning of trial. The reason why they did not want to let Mr. Chalmers in, according to Mr. Czumak's evidence, was that when the senior inspector first attended, he had wanted to come in with a camera, and they did not want him to take pictures. Mr. Czumak testified that Mr. Chalmers had replied that "he didn't need to take pictures to gather evidence for court, so we felt threatened at that point in time, so we never let him in".

[para24] Mr. Czumak also testified that all the work that was done after the "stop work" did not worsen or "affect the situation at all". He stated that the work on the balcony continued because it was a hazard with no railings there, and that they kept going with other work because his whole family was living in the dwelling and they were anxious to complete it before the cold weather.

[para25] With respect to the delay in obtaining approval for the changes and the revised permit, Mr. Czumak explained that the new drawings took some time to be produced by their architect, and that the approval process, which a clerk behind the counter had said might take two or three hours, ended up taking two weeks. The preparation of the revised plan, he testified, had started before the "Order to Comply" was issued. Mr. Czumak also testified as to his knowledge of other projects where revisions were approved on the spot, without the need to submit revised plans, but he did not suggest that even if that had occurred on other occasion, it would have provided them with any defence to the charge here of construction that was not in accordance with the approved plans.

The Convictions

(a) Construction not in accordance with approved plans

[para26] At the commencement of the hearing of the appeal, as already stated, the defendants abandoned their appeals from their convictions on the counts against each of them that on October 14, 1993, they committed the offence of "constructing or causing to be constructed a building addition except in accordance with the plans and specifications and other information on the basis of which a permit was issued or any changes thereto authorized by the Chief Official", contrary to sections 8(13) and 36 of the Building Code Act. Those appeals are accordingly dismissed as abandoned.

(b) Failure to comply with the Inspector's Order

[para27] The three defendants were each convicted of an offence, contrary to s. 12(2) of the Act, alleged to have been committed on October 20, 1993. The section reads as follows:

> 12(2) - Order. An inspector who finds a contravention of this Act or the building code may make an order directing compliance with this Act or the building code and may require the order to be carried out immediately or within such time as is specified in the order.

Failure to comply with such an order is made an offence by s. 36(1)(b) of the Act:

> 36(1) - Offences. A person is guilty of an offence if the person,
>
> ...
>
> (b) fails to comply with an order, direction or other requirement made under this Act; ...

[para28] The difficulty with the "Order to Comply" issued by Mr. Galli on October 14th was that it included a direction

to "cease all work" that Mr. Galli was not authorized by the statute to give. While he could have ordered no further construction except in accordance with the building permit, that is not what his "Order to Comply" said, nor does it appear to have been the interpretation given to the Order by Mr. Chalmers or by the learned justice of the peace at trial. The charges themselves were framed in a way that alleged a failure to comply with Mr. Galli's order, inter alia, "requiring that all work cease".

[para29] The only evidence concerning October 20th was, as already noted, that unspecified "work was still in progress" and that "it had been drywalled and... taping was going on". There was no evidence that any of this work on October 20th was not in accordance with the original building permit. In convicting the defendants on the basis of that evidence, the only evidence before her, the learned justice must have considered it sufficient that any work at all after the "Order to Comply" had been issued made out the offence. She was in error, in my respectful view, if that was her assumption.

[para30] The other reference in the charge to Mr. Galli's "Order to Comply" was its "requiring that ... revised drawings be submitted for authorization by the Chief Building Officer". Indeed, Mr. Galli's Order required that this be done "forthwith". The unchallenged evidence, however, was that the defendants' architects were in the process of preparing the revised drawings when the Order was issued, and they were in fact submitted within seven days. I do not think that it would be reasonable to interpret "forthwith" in the context of Mr. Galli's Order to mean simply "immediately", as if such drawings would instantly materialize upon their being demanded. The Order must be read, in my opinion, as a direction to be complied with "as soon as reasonably practicable" in the circumstances which, in this case, meant as soon as the architectural drawings were completed and available for submission. In R. v. Thomsen (1988), 40 C.C.C. (3d) 411 at pp. 419-20 (S.C.C.), LeDain J. referred to the authorities supporting the appellant's submission there that there is no difference between forthwith" and "forthwith or as soon as practicable", and he went on to quote, without expressing any disagreement, from the judgment of Finlayson J.A. in R. v. Seo (1986), 25 C.C.C. (3d) 385 at p. 409 (Ont. C.A.):

> In my opinion, there is no difference in meaning between "forthwith" and "forthwith or as soon as practicable". Both mean the same thing having regard to the nature of the test and the condition that it is designed to monitor. The breath sample under s. 234.1 or s. 235 is to he provided as quickly as it effectively can be and if this means waiting for the device to arrive or taking the detained person to a place where there is such a device, this would be within the definition of "forthwith". It does not mean "immediately".

Even if the later decision of the Supreme Court of Canada in R. v. Grant (1991), 67 C.C.C. (3d) 268, casts doubt on that conclusion in the particular context of roadside screening tests, I do not think it changes the meaning to be ascribed to "forthwith" in the context here.

[para31] Once Mr. Galli's "Order to Comply" is properly construed, I do not think the evidence permitted a finding that this part of the Order had not been complied with. In any event, the learned justice in her reasons gave no indication that she based her finding of guilt concerning these counts on the failure to submit drawings, to which she made no reference at all. Rather, it was apparent that the convictions resulted from her conclusion, which was wrong in my view, that any continued construction established the offence charged.

[para32] In my opinion, the prosecution failed to prove any failure to comply with the Order issued on October 14th by Mr. Galli, if the Order is interpreted in a way that conforms with the authority he had under s. 12(2) to make it. It follows that the appeal from the convictions in relation to that offence must be allowed, the convictions set aside, and acquittals entered.

(c) Contraventions of the "Stop Work Order"

[para33] The three defendants were each convicted of five counts alleging violations of the "Stop Work Order" that had been posted by Mr. Chalmers on October 21, 1993. These offences were found to have been committed on the five days following the posting of the Order. The provisions regarding a "Stop Work Order" are set out in s. 14 of the Act, as follows:

> 14.-(1) Stop Work Over. If an order made under section 12 or 13 is not complied with within the time specified in it, or where no time is specified, within a reasonable time, the chief
>
> building official may order that all or any part of the construction or demolition cease.
>
> (2) Service. The order shall be served on such persons affected thereby as the chief building official determines and a copy shall be posted on the site of the construction or demolition.
>
> (3) Timing. The order is effective from the time it is posted under subsection (2).
>
> (4) Effect of Order. If an order to cease construction or demolition is made, no person shall perform any act in the construction or demolition of the building in respect of which the order is made other than work necessary to carry out the order made under section 12 or 13.

The appellants challenged both the validity of the "Stop Work Order" and the adequacy of the evidence to establish violations of it.

[para34] Mr. Hart fairly conceded that there was no evidence of any "construction or demolition" on October 22, 1993, and that the defendants should not have been found guilty of the three charges relating to that date. The only evidence concerning October 22nd was that there was some "cleaning" and "removal of debris" observed. Although it clearly would have been preferable for the prosecutor to have made the same concession at trial, and for the justice to have examined the evidence more carefully before entering the convictions and imposing $31,000 in fines for this innocuous conduct, Mr. Hart's concession was still appropriate. The appeals against the convictions for violating the "Stop Work Order" on October 22, 1993, are accordingly allowed, the convictions set aside, and acquittals entered.

[para35] Similarly, with respect to October 26th, another of the five alleged offence dates, the only evidence in support of the charge was Mr. Chalmers' evidence that when he went to the house, he observed some "soil removal" and "grading work" going on in front of the house. "Construction" and "demolition" are both defined in s. 1(1) of the Act, and the definitions do not encompass the work in the yard observed by Mr. Chalmers. The offences alleged to have been committed on October 26th were not proved, and the appeals relating to those counts will be allowed, the convictions set aside, and acquittals entered.

[para36] With respect to the three remaining dates on which the "Stop Work Order" was alleged to have been contravened, October 25th, 27th and 28th, the appellants' position was that an offence could be committed only if the "Stop Work Order" was valid. One of the conditions required by s. 14(1) for a "Stop Work Order" is a failure to comply with an order under s. 12, in this case, Mr. Galli's Order issued on October 14th. Mr. Carniglia submitted that since no failure to comply with Mr. Galli's Order had been proved, both because no unauthorized work was proved to have been done after the Order was made and because the revised drawings had been filed on October 21st, the chief building official had no authority to make the "Stop Work Order". I agree with this submission. If the "Stop Work Order" was made outside the authority conferred by the statute, then there was no obligation on the part of the appellants to comply with it: see Regina v. Grant supra, per Lamer C.J.C. at pp. 276-7.

[para37] The appeals against all of the convictions for failing to comply with the "Stop Work Order" must be allowed,

then, with acquittals being substituted for the convictions that are set aside.

(d) Failing to assist entry

[para38] The two individual defendants were each convicted on seven counts alleging violations of s. 19(3) of the Act. The section reads as follows:

> 19.-(3) Assistant. Every person shall assist any entry, inspection, examination, testing or inquiry by an inspector or chief building official in the exercise of a power or a performance of a duty under this Act.

There was evidence that either Peter Czumak or John Czumak had, on six of the seven specified dates; refused Mr. Chalmers entry to the property. On the seventh date, November 1, 1993, John Czumak did not initially allow Mr. Chalmers' entry, but did so only after a delay of about 20 minutes, after he had spoken to his lawyer.

[para39] The issue of whether each individual defendant was a party to an offence allegedly committed by his brother was not raised either at trial or on the appeal. Although on each occasion involving a refusal to allow Mr. Chalmers entry, only one of the brothers dealt with him, there might have been evidence sufficient to establish that both were parties to each offence, within the meaning of s. 77 of the Provincial Offences Act, R.S.O. 1990, c. P.33. I do not think that such a conclusion was inevitable, however, and I think that before convicting both persons on each of the counts, the learned justice ought to have at least analyzed the evidence in this regard. Her bald statement that "I find you both liable, responsible and guilty" was not, it seems to me, adequate in the circumstances. In any event, I think the appeals from these convictions can be decided without considering the point.

[para40] An offence under s. 19(3) requires that an inspector, in this case Mr. Chalmers, be engaged "in the exercise of a power or a performance of a duty" under the Act. The prosecutor's position at trial was that on each occasion when Mr. Chalmers attempted to gain entry to the premises, he was exercising his power under s. 12(1) of the

Act, which reads as follows:

> 12.-(1) Inspection. An inspector may enter upon land and into buildings at any reasonable time without a warrant for the purpose of inspecting the building or site in respect of which a permit is issued or an application for a permit is made.

Although not brought to the attention of the learned justice of the peace, another provision of the Building Code Act is also relevant. Section 16(1) provides:

> 16.-(1) Entry to Dwellings. Despite sections 8, 12 and 15, an inspector shall not enter or remain in any room or place actually being used as a dwelling unless,
>
> (a) the consent of the occupier or a warrant issued under this Act is obtained;
>
> (b) the delay necessary to obtain a warrant or the consent of the occupier would result in an immediate danger to the health or safety of
>
> any person;
>
> (c) the entry is necessary to terminate a danger under subsection 17(3); or
>
> (d) the requirements of subsection (2) are met and the entry is necessary either to remove a building or restore a site under subsection 8(6) or to remove an unsafe condition under clause 15(5)(b).

Further, s. 21(1) provides for the warrant referred to in s. 16(1)(a):

> 21.-(1) Warrant for Entry and Search. A provincial judge or justice of the peace may at any time issue a warrant in the prescribed form authorizing a person named in the warrant to enter and search a building, receptacle or place if the provincial judge or justice of the peace is satisfied by information on oath that there is reasonable ground to believe that,
>
> (a) an offence under this Act has been committed; and
>
> (b) the entry into and search of the building, receptacle or place will afford evidence relevant to the commission of the offence.

[para41] In his submissions before the defendants were found guilty of all the offences, Mr. Czumak made the following argument:

> ... All my inspections were passed by each individual inspector, except for the heating inspector and he was never denied access. My plumbing inspection was passed, my electrical, my insulation inspection was passed, so the only thing left to check to Code, which there is no Code for, is the heating inspection.
> As for rights to come into the house, I'm not sure if people have the right just to walk into somebody's dwelling whenever they please, while somebody's living there. That will be all, thank you.

[para42] In her reasons for judgment, the justice of the peace stated as follows:

> Just to get the formalities out of the way, Mr. Czumak, I find in each case the Crown has made its case out beyond any doubt, and I convict both Peter and yourself and this company.
>
> What has caused me tremendous concern, sir, is that I see the exhibits and I see that you are a registered party to the company known as Cherry Park Contracting Inc. And I am concerned and alarmed that you would conduct yourself in the fashion you have. Denying access to Mr. Chalmers, notwithstanding the fact that he is indeed a representative of the City of Etobicoke and a building inspector.
>
> As for your last comment, sir, I am looking at the Building Code, section 18. Under section 18, it is the powers of the inspector, and I am quoting ...
>
> You had no right to deny Mr. Chalmers access merely by virtue of what you feel is justifiable, because he had a camera. And even when he chose to set the camera aside, sir, again you denied him access. Now, I am going to go through each day and I am going to endorse on the record what my findings are, sir, but generally speaking, it is alarming to hear that you can stand before me and feel that you have done nothing wrong.
>
> Indeed I find that each turn, sir, at each occasion, you obstructed wilfully the inspection of the property on Sunnydale, because for no other reason than you thought you could. You forced the City of Etobicoke to take the drastic step of obtaining a search warrant, because you refused access inside the building. And again, sir, considering yourself to be a professional in the contracting business, that causes me concern. ...
>
> ...
>
> It appears that your defence has been one of it is well, it was inconvenient to allow them in, because people were living in the building. Whether or not people were living in the building, it does not prohibit the inspectors authority, rights or obligations to enter the property.

[para43] The evidence was uncontradicted both that the property was at all times a place actually being used as a dwelling occupied by the Czumak family, and that access to the premises was given to all of the City inspectors, except for Mr. Chalmers or persons in his company, whenever they sought it. While the apparent personality conflict between the senior building inspector and the defendants may have been unfortunate, I do not think it warranted the finding that the defendants had defied the City's authority or disregarded their obligations under the statute in the way the justice suggested.

[para44] In any event, it is apparent that s. 16(1) prohibited Mr. Chalmers from entering the dwelling without having either the consent of the occupier or a warrant. Prior to November 1st, he had neither. While one can readily understand that the justice of the peace would not be familiar with the particular section of the Building Code Act, it is a little surprising that she would consider that a municipal building inspector would have statutory authority, without prior authorization and in the absence of exigent circumstances, to override the reasonable expectations of privacy that occupants of dwelling houses have come to expect the law to protect. In R. v. Landry (1986), 25 C.C.C. (3d) 1 (S.C.C.), La Forest J., while dissenting in the result, stated at p. 16:

> The sanctity of the home is deeply rooted in our traditions. It serves to protect the security of the person and individual privacy. The same thought was expressed as early as 1604 in the language of the day in the first proposition of the celebrated Semayne's Case (1604), 5 Co. Rep. 91a at p. 91b, 77 E.R. 194 at p. 195, as follows:
>
> > "That the house of every one is to him as his castle and fortress, as well for his defence against injury and violence, as for his repose."

Recent judgments of the Supreme Court of Canada have made it clear that s. 8 of the Charter provides protection against warrantless searches of the perimeters of dwellings as well: see R. v. Kokesch (1990), 61 C.C.C. (3d) 207 (S.C.C.), Wiley v. The Queen (1993), 84 C.C.C. (3d) 161 (S.C.C.), R. v. Grant (1993), 84 C.C.C. (3d) 173 (S.C.C.), and R. v. Plant (1993), 84 C.C.C. (3d) 203 (S.C.C.). I think it is apparent that Mr. Czumak's layman's instinct concerning his right to refuse Mr. Chalmers entry to his family's home was right in law, and that the justice of the peace was in error.

[para45] Quite apart from the legal error at trial, I might say that I have considerable difficulty understanding why Mr. Chalmers, who was evidently aware of the warrant provisions that he ultimately resorted to, would return to the Czumak residence day after day after the occupants' lack of consent to his entry had already been communicated to him. Because none of the participants in the trial asked him why he did not use the warrant procedure after the first refusal, it is not possible to assess the sincerity of his attempts to enter the premises or the reasons for the unnecessary repeated confrontations with members of the Czumak family.

[para46] While the right of the defendants to refuse entry prior to a warrant being obtained provides an answer to the six charges between October 22nd and 29th, the appellants were also convicted of an offence relating to Mr. Chalmers' visit on November 1st after he had obtained the warrant. The evidence was that Mr. Chalmers' initial attempt was unsuccessful, because Mr. Czumak wanted to call his lawyer to obtain legal advice concerning the warrant. Entry was delayed for 20 minutes until after he had spoken to his lawyer, and the senior inspector had returned with police officers. It appeared to be the prosecutor's position, since he sought and obtained a conviction relating to this conduct, that Mr. Czumak's seeking legal advice before admitting Mr. Chalmers constituted the alleged offence, and one, incidentally, that Mr. Hart later submitted called for fines approximating the $27,000 actually imposed by the justice of the peace.

[para47] I think it is wrong to characterize the defendant's conduct in the way the prosecutor contended. By way of analogy, in the context of failing or refusing to supply breath samples for breathalyzer testing, it has been

held both that the failure or refusal must be clear and unequivocal, and that a denial of the right to counsel provides a reasonable excuse for failing to comply with a lawful demand that was made. In Jumaga v. The Queen (1976), 29 C.C.C. (2d) 271 (S.C.C.), Laskin C.J.C., in a judgment which dissented on other grounds, stated at p. 272 that the Manitoba Court of Appeal had erred in regarding as a "refusal" the accused's deferring a decision pending a requested opportunity to consult with a lawyer by telephone:

> The statutory meaning of a refusal cannot be made to depend on whether an accused says "no, I wish to consult my lawyer" rather than "please wait until I consult my lawyer". On any reasonable construction, there is no refusal in either case.

Pigeon J., for the majority at pp. 276-7, expressly agreed with the Chief Justice on the point I think that Mr. Czumak's conduct should be viewed in the same way. The evidence was that the defendant, in effect, deferred his decision as to whether to allow entry until speaking to his lawyer, and that 20 minutes later, he allowed Mr. Chalmers to enter. Those facts do not make out an offence of "failing to assist entry", contrary to s. 19(3), and in my opinion, the charges relating to November 1st should have been dismissed as well.

[para48] The appeals against all of the convictions for failing to assist entry are allowed, the convictions set aside, and acquittals entered.

(e) The failure to post the building permit

[para49] The three appellants were each convicted of two counts of failing to post the building permit in a conspicuous place relating to October 25 and 26, 1993, contrary to s. 2.4.2.1. of the Building Code Regulation, O. Reg. 160/93. The section in question reads as follows:

> 2.4.2.1. Where a permit has been issued pursuant to the Act, the person to whom it is issued shall have the permit or a copy thereof posted at all times during construction or demolition in a conspicuous place on the property in respect of which the permit was issued.

While the building permit which had been issued and which should have been posted was not itself filed as an exhibit, Mr. Chalmers testified that the building permit for the property, No. 71981, issued on September 1, 1993, was issued to John Czumak. Both the "Order to Comply" and the "Stop Work Order", which were made exhibits, also referred to the same permit as "Issued to John Czumak".

[para50] There was no evidence, then, that the permit had been issued to anyone other than John Czumak. It follows, I think, that there was no evidence of either of the other appellants having had any duty, under s. 2.4.2.1. of the Regulation, to post the permit. There was also no evidence that either of them aided, abetted, counselled or procured the commission of this alleged offence by John Czumak, within the meaning of s. 77 or s. 78 of the Provincial Offences Act. The convictions, therefore, of Peter Czumak and. the corporation were, I think, unreasonable and unsupported by the evidence. Their appeals are allowed, their convictions set aside, and acquittals entered.

[para51] Mr. Chalmers testified that when he visited the property on October 25th and 26th, he observed that the building permit in question had not been posted. Although Mr. Chalmers did not actually observe any construction work being done on October 26th, there was evidence of work both before and after that date, so I think the duty to post the permit "during construction" applied to that date as well. A different conclusion was not suggested by Mr. Carniglia. Mr. Chalmers' evidence was not contradicted by the defence at trial, although during the reasons for sentence given by the justice of the peace, when she referred to these offences, Mr. Czumak stated, "The permit was posted". Although I think it would have been fairer, particularly since he was unrepresented by counsel, if the learned justice had brought to his attention that he had given no evidence concerning that matter and made further inquiries about whether he wished to apply to reopen the defence, no complaint was made about her failure to do so. Rather, Mr. Carniglia argued that

the "rules of natural justice" required a specific warning to be issued, prior to charging a person with this offence. I reject that submission. The obligation imposed by the Regulation is clear, and the evidence supported the findings made by the justice in this regard.

[para52] John Czumak's appeals against his two convictions for failing to post his building permit are dismissed.

The Sentence Appeals

[para53] Mr. Hart quite candidly described the sentences imposed by the learned justice of the peace as "unique" and "out of whack". Mr. Carniglia suggested that the justice appeared to have lost sight of the fact that she was dealing with real people whose lives would be devastated by her injudicious actions. While harsh, I do not think that observation is without foundation. The fines imposed, however, were still less than the sentences Mr. Hart had sought, and he repeated that his instructions had been to recommend for the "less serious offences", 10% of the maximum fines for each defendant for each count, and 50% of the maximum penalty for the "serious charges", into which category he put the failure to assist entry and the violation of the "Stop Work Order" offences. The maximum penalty for a first offence prescribed by s. 36(3) and (4) of the Act is a $25,000 fine for a person and a $50,000 fine for a corporation.

[para54] Mr. Hart also suggested that the justice of the peace, because of the number of counts and the large amounts of the fines she imposed, had simply lost track of the arithmetic. He likened the experience for him to playing a slot machine and having it spew out endless money. While it may be that counsel acting on behalf of municipalities prosecuting provincial charges do not consider themselves to have the same obligations of fairness and reason that Crown Attorneys have when prosecuting criminal cases, although I do not know why their responsibilities should be different, I think it is obvious that the justice of the peace was seriously misled by the submissions that were made. The result was that outrageously excessive fines were imposed and a serious injustice occurred.

[para55] In any event, of the 41 convictions at trial, the ones that remain are one conviction for each appellant on a charge of construction not in accordance with a building permit and, in the case of John Czumak, two convictions for failing to post his building permit on two successive days. For the first of the offences, the justice of the peace imposed fines of $2,000 on the individual defendants, and $5,000 on the corporation. With respect to John Czumak's failures to post his building permit, she imposed a fine of $4,000 for the first and $5,000 for the second. They are all clearly outside the appropriate range, in my view, and require adjustment.

[para56] It is an error in principle to impose a fine without an investigation into the defendant's ability to pay it, or to impose a fine which he or she lacks the means to pay within a reasonable time: see R. v. Ward (1980), 56 C.C.C. (2d) 15 (Ont. C.A.), and R. v. Snider (1977), 37 C.C.C. (2d) 189 (Ont. C.A.). As well, s. 57(3) of the Provincial Offences Act provides that the court may make such inquiries concerning the defendant's economic circumstances as it considers desirable. In this case, after the prosecutor's submissions concerning sentence, Mr. Czumak stated simply, "I can't afford those fines". He went on to explain that he and his brother did not have any assets, and that their company was almost insolvent Mr. Czumak stated that they had not been paid for their last three projects. As well, although the prosecutor referred to evidence that the defendants' parents had purchased the house for $220,000 and that it was then listed for sale at $449,000, Mr. explained that with the cost of the property and the construction, there would be Czumak little profit. The purpose of the project had been to demonstrate their workmanship to obtain spin-off work, and because the house had been over-improved for the area, their margin was very slim.

[para57] It was not clear whether the fact that the total fines approximated the listing price of the house was merely

a coincidence or whether they were intended to penalize both the parents for what they had invested in their home and the brothers for the cost of the work that they had done. Even if the evidence had supported the justice's findings concerning all the offences, there was still no rational basis that I can see for imposing fines of the magnitude she imposed. On even the most sinister interpretation of the appellants' conduct, one could not justify fines which would have the effect of bankrupting the business or financially ruining the family.

[para58] Mr. Hart did not dispute Mr. Carniglia's further submissions as to sentence which were made on the appeal. These included reference to the defendants' circumstances that had not been elicited in the trial court. No prior record of any kind was alleged for any of the defendants. Although not stated expressly, John Czumak appeared to be in his late twenties or early thirties. Although the brothers had been struggling with their business, they had contributed substantial voluntary construction work for local charitable organizations, including Ronald McDonald House and Sunnybrook Hospital. There was no basis, in my view, for regarding the defendants as ether than decent, hard-working and productive members of the community who, on this isolated occasion, contravened the Building Code Act by committing the relatively minor offences.

[para59] General deterrence is important when dealing with Building Code violations, having regard to the statute's safety and consumer protection objectives. The Act ensures compliance with minimum construction standards and allows municipalities to maintain the quality of their neighbourhoods. The courts have a role to play in the enforcement of the statute by imposing penalties which appropriately repudiate the offences that are found to have been committed and which persuade builders that compliance with the law is required.

[para60] Mr. Carniglia, a former city prosecutor himself, suggested that the usual sentence for construction not in accordance with a building permit ranged from a suspended sentence, which is not uncommon, to perhaps a $1,000 fine where particular aggravating factors are present. He challenged Mr. Hart to cite any case where more than a $2,000 fine had been imposed. Mr. Hart did not do so, but he pressed his submission that a far more severe penalty was required. It is significant, I think, that this was not a case where an owner proceeded with major construction without any permit at all, or where the work was found not to have been of good quality or not to have been authorized by a revised permit issued only a few days later. The defendants permitted access to inspectors not accompanied by Mr. Chalmers, so that there was no attempt to conceal the work or to avoid the Building Code Act approval procedures.

[para61] Having regard to the circumstances, I think a $300 fine would be appropriate for the violation concerning the work that was not in accordance with the building permit. This amount would reflect the need for deterrence, I think, but still take the mitigating factors into account. Since the corporation was the vehicle used by the brothers for their renovation work. I do not think that any purpose would be served by dividing the fine among the defendants or imposing separate individual fines which total more than that amount.

For the convictions relating to this offence, then, a fine of $300 is imposed on Cherry Park Contracting Inc., with the 15 days to pay provided by s. 66(1) of the P.O.A. With respect to John Czumak and Peter Czumak, sentence will be suspended, with probation for six months on only the conditions set out in s. 72(2) of the P.O.A.

[para62] With respect to John Czumak's convictions for failing to post his building permit, there will be a fine of $100 for the count relating to October 25, 1993, and a suspended sentence, with the same probation already ordered, for the continuation of the same offence the following day. Mr. Czumak will also have the 15 days provided by the P.O.A. to pay this fine.

Costs

[para63] This is a case where the appellants should have all their costs of the appeal, pursuant to s. 129(1) of the

Provincial Offences Act. If the parties are unable to agree as to the amount to be paid by way of costs to the appellants by the respondent, the appellants may apply to me within thirty days following release of this judgment for an order, pursuant to s. 129(2), fixing the amount, directing payment to the clerk of the trial court for payment over to the appellants, and fixing the period within which the costs shall be paid.

Disposition

[para64] For the reasons stated, the appeals are allowed with costs. Of the 41 convictions, 36 are set aside, and acquittals are entered. The sentences with respect to the remaining convictions are varied by reducing the fine imposed on the corporation for construction not in accordance with the approved plans from $5,000 to $300, with 15 days to pay, and for the individual appellants, from $2,000 to a suspended sentence in each case. With respect to John Czumak's convictions for failing to post his building permit, the fine on the first count is reduced from $4,000 to $100, with 15 days to pay, and on the second count, from $5,000 to a suspended sentence.

FAIRGRIEVE PROV. DIV. J.

Re **David Gallo Building** Co. Ltd. and City of Toronto et al.

[1973] 3 O.R. 892

ONTARIO
HIGH COURT OF JUSTICE
DIVISIONAL COURT
WELLS, C.J.H.C., FRASER and WRIGHT,JJ.
14TH MAY 1973

APPLICATION for judicial review for an order in the nature of mandamus to compel the issue of a building permit.

T.R. Hawkins, for applicant.

D.C. Lyons, for respondents.

The judgment of the Court was delivered by

WRIGHT, J.,:-- This is an application under the Judicial Review Procedure Act, 1971 (Ont.), Vol. 2 c. 48, for an order "in the nature of mandamus" requiring the issue of a building permit for an apartment hotel and retail store building at the south-east corner of Danforth and Westlake Aves. in the City of Toronto.

Although it stands on its own feet, it is in fact one of a series of applications for judicial review of the refusal of the City of Toronto to issue building permits for apartment hotels except in areas now defined in Toronto City By-law 51-73. This was enacted February 27, 1973, and is subject to the approval of the Ontario Municipal Board, which has not yet been given although notice of application for it is now in train.

A. The general background of this and like applications

It is convenient, therefore, in this case to outline the general background of this series of applications and to deal with some of the arguments on the authorities which have become common to most of the applications made in this Court in this particular series, without in any way foreclosing the right of other applicants to renew the arguments on issues not germane to our decision in this case.

From the evidence before us, it appears that from September, 1972, and even before, there had been active concern among some public building and planning officials in Toronto, about the practice of granting permits for new residential construction and commercial "apartment hotels" on lands zoned for industrial or commercial use. The land for such buildings has already been assembled for other commercial uses and has been available at comparatively low prices in relation to the price of land in residential districts. The prevailing densites in commercial districts, and the standards applicable in such districts under the City of Toronto zoning by-law, are markedly different to those applicable to residential districts. Nevertheless the respondent corporation has supported certain of these projects in the past three years, to help to alleviate the shortage of much needed low income housing. The city's chief planner, in a report on January 18, 1973, referred to these developments as "what might be colloquially termed a big loop hole in the Zoning By-Law".

Late in January, 1973, the Committee on Buildings and Development of the City Council submitted reports on these developments to the Toronto Executive Committee and City Council recommending that City Council express its intention of passing a by-law to prohibit hotels and apartment hotels anywhere in the city except in two defined central areas, that such intention be advertised in the daily newspaper and that a special meeting of City Council be called within three weeks "to hear those in support of and opposing the enactment of such a by-law".

These recommendations were adopted in Council on January 31, 1973. Public notice of Council's intention was given on February 9 and 12, 1973. A special meeting of City Council was held on February 19th to consider the enactment of a by-law to prohibit hotels, apartment hotels and dwelling units in C1, C2, C3, and C4 districts and to hear representations from interested parties on this proposal. It met from 2 p.m. until 6 p.m. that day. It then adjourned and met again on February 23, 1973, in this matter from 8:30 p.m. until 12:50 a.m., made

two amendments to the bill amending the city's zoning by-law and passed it as amended as By-Law 51-73 on February 27, 1973. Ths city os proceeding with reasonable expedition towards the approval of the Ontario Municipal Board.

B. The particular facts of this application

The applicant intending to build an apartment hotel sought by an agreement of purchase and sale of the lands in question, accepted on August 11, 1972, to buy the lands for $325,000, conditional on a commitment for new financing, and subject to what would appear to be a representation or condition that the property was zoned "C1-V1". This permitted apartment hotels and retail stores at that time. All the lands were so zoned except for a strip along the south boundary 130 ft. long and from four to eight feet wide.

The applicant, in August, 1972, employed George G. Feher as its architect for the buildings it proposed, and on September 5, 1972, applied for building permits for excavation, foundation, and superstructure of an apartment hotel building of 94 apartment suites, and 95 hotel-rooms on the lands in question. Structural, mechanical and electrical drawings, specifications and quantities were not submitted with those applications as required by art. 6 of the City Building By-law 300-68. On October 4, 1972, the respondents sent Mr. Feher an examiner's notice, that the proposal "now complies with the requirements of Zoning By-Law 20623, as amended".

The applicant had delayed closing the transaction of purchase and sale until the preliminary zoning approval of October 4th was received. The transaction was closed on December 12, 1972. During November and December, 1972, the applicant secured five commitments to lease some retail stores in the proposed building. It took soil tests.

In December, 1972, the applicant changed from its architect, Mr. Feher, and retained the firm Huang and Danczkay Limited. The project was then changed in a number of ways, but it was considered by the applicant and its advisors to be still within the provisions of the zoning by-law.

The work of preparing plans, drawings and specifications proceeded in December, 1972, and January, 1973.

On February 2, 1973, city officials refused to accept "completed architectural drawings for the Applicant's project as a revision to the application or applications made by the Applicant on or about the 5th day of September, 1972", and insisted that a new permit be applied for, supported by the architectural drawings and completed mechanical, electrical and shoring drawings. It is alleged that the applicant was not then told that the intentions expressed by City Council on January 31, 1973, were "so clear that it was pointless to do so". Close to 20-25 people worked on fresh drawings which were completed on Febraury 11, 1973, and submitted on February 12th. A new permit was applied for on a latter day to meet the requirement of the city's Department of Buildings.

On February 15, 1973, the Department of Buildings wrote the applicant reciting the relevant proceedings of City Council on January 31st and stating that the respondent Milne was precluded from issuing a permit in view of the prohibition in the by-law which Council had expressed its intention to enact.

On February 16, 1973, the same department wrote the applicant stating, in effect, that the materials filed on September 5, 1972, were incomplete and that they did not constitute an application for a building permit.

On February 16, 1973, the applicant's solicitors wrote the respondent Milne outlining its position under the application of September 5, 1972, and saying:

> We can appreciate that some minor matters in the plans may require amendments but if you would advise us in this regard, we will advise the applicant to make such amendments forthwith.

When Mr. Pattantyus, a principal of the applicant's incorporated engineers, was being cross-examined on April 6,

1973, on an affidavit, he made it clear that any additional information required by the city would be furnished and that

any changes required to meet the city's interpretations of its by-laws would be made. This was repeated by Mr. Hawkins before us. Mr. Dennis Williams, a zoning plan examiner in the city's Department of Buildings, testified on his cross-examination on one of his affidavits filed, that the normal procedure in the department was "if plans submitted were found to be not in compliance with the zoning By-law, the Applicant would be permitted, if the changes were not too severe, to revise the plans and work under the same application". He also admitted that it was "possible" that the changes later suggested by Mr. Pattantyus to meet his objections could be made.

The applicant, in purchasing the land and preparing its project, has assumed mortgage debts of $284,000 and has incurred expenses and liabilities in excess of $160,000. If the permits are not granted, it claims that "it will suffer the loss of the expenses and liabilities, it has incurred for architects' fees, mortgage deposits, stand-by fees, soil tests and real estate commission in a sum in excess of $108,000".

C. The issue before the Court

The notice of application for judicial review dated March 5, 1972, asked for an order for a bulding permit for the applications made on September 5, 1972, as modified on February 12, 1973, on the grounds that respondents acted arbitrarily in failing to consider that applications complied with the city by-laws and that the applicant had a legal right to its permits, and that the respondents acted only on the expressed intention of City Council. Before us, Mr. Hawkins asked for an order directing the respondents issue a building permit in accordance with materails filed on February 12, 1973, conditional on the applicant doing what is necessary to comply with the city's zoning and building by-laws or, in the alternative, an order in the same terms with respect to the material filed on and after September 5, 1973.

D. Questions to be considered by the Court

In the particular circumstances of this case and in the light of the argument before us, we apprehend that our decision depends on the answers to the following questions which will be discussed under the lettered headings indicated.

E. Was the application of September 5, 1972, in order at the time it was made?

F. Have any deficiencies it may have had been cured by the conduct of the respondents?

G. Were the details of the application of February 12, 1973, simply modifications of the project for which a permit was applied for on September 5, 1972?

H. Was the application of February 12, 1973, in order at the time at which it was made?

I. Can any deficiencies in either application now be cured or disregarded, or should a conditional mandatory order be made?

E. Was the application of September 5, 1972, in order at the time it was made?

It complied with the zoning by-law, but it did not satisfy important requirements of the building by-law. It was argued in effect that by specific waivers and consistent practice, the respondents had wavied the requirements of the by-law, or had at least lulled the applicant into a false sense of security, and that this should be considered in exercising discretion and granting a mandatory order in favour of the applicant. We do not agree with these arguments in this case. In general, such conduct by the respondents cannot convert a basically deficient application into one worthy of a mandatory order for a permit.

F. Have any deficiencies it may have had been cured by the conduct of the respondents?

Much was sought to be made, in this case, of the way in which civic employees carried on their duties with regard to applications for building permits, and in the light of the declared intention of City Council to amend the zoning by-law.

It was argued:

(1) That the respondents could not, to the prejudice of the applicant, alter the way in which they invited applications for building permits and considered them.

(2) That the civic employees had no right to require a fresh application for a building permit on February 2nd without at least warning the applicant how pointless it would be.

(3) That the civic employees concerned had a duty to tell the applicant that if the proposed by-law passed, no permit would be granted nor would one be issued meanwhile, no matter how regular the application for it might otherwise be.

(4) That the fact that the civic employees did not tell the applicant on February 2, 1973, of the Council's intent to pass the amending by-law, was evidence that the city had then no clear intention of passing it.

(5) That the respondents' letter of February 15, 1973, stating they were precluded from issuing a permit by reason of Council's intention to enact the by-law, was misleading and did not frankly outline the other objections to the application.

(6) That the respondents' letter of February 16, 1973, rejecting the application of September 5, 1972, was belated and unfair.

These alleged improprieties were in some respects relied on as evidence that there was no clear intent to pass the projected by-law and, in other aspects, as evidence that the respondents were not acting in good faith. But these considerations are relevant to the issue of whether the municipality is entitled to an adjournment, not to the issue of whether the applicant is entitled to a permit.

In any event we no not agree with these criticisms. The actions of the civic empolyees were dictated either by their duty to do what they were told from time to time, or be benevolent consideration of some of the practical problems created for applicants under the by-law.

Courtesy, kindness and consistent dealing towards applicants are graceful attributes to the discharge of public responsibilities but they are not legal duties nor is their absence necessarily evidence of bad faith; nor do they create in others entitlements to mandatory orders.

Those who rely on legal rights must comply with the legal requirements. They cannot absolutely rely on the sensible indulgences often granted by public servants: Karavos v. City of Toronto and Gillies, [1948] O.W.N. 17 at p. 19-20, [1948] 3 D.L.R. 294 at pp. 228-9, per Lailaw, J.A. (Ont. C.A.). These may be discontinued as readily as they were instituted or maintained.

I have already said in R. v. City of Toronto et al., Ex p. Lawson, [1971] 1 O.R. 451 at p. 454, 15 D.L.R. (3d) 553 at p. 556, that once a City Council has passed a by-law, "its employees are bound to do the business of the city, when they have a discretion to exercise, in accordance with the by-law, even if the by-law has not passed the Municipal Board". But this can be asserted more broadly and can be extended to the duty of civic employees to conform to the declared intention or policy of Council, and of course to the normal obedience to direction that every employee, in the course of his duties, owes to his employer. In this case, once Council had expressed its intention to enact the by-law and had set in motion the machinery to do this, civic officials were bound to act accordingly. In acting as they did, they only did their bounden duty, in the circumstances.

Much was sought to be made of the futility of the applicant proceeding further after Council's resolution of January 31, 1973, and the obligation of the civic officials to make this plain to the applicant in their communications.

We do not think that once a clear intention is expressed or a by-law passed, the cause of an applicant is perforce lose. If the applicant wishes the assistance of the Court in judicial

review, it must do all it can to justify the issue of a permit. In the Bismark case, above, this was done and was a powerful factor in the mandatory order granted by this Court. In this case, if the applicant had expeditiously completed its orginal application of September 5, 1972, it might well have been successful. It was for the applicant and its advisors to decide what it should do. It was no part of the duty of the civic officials to advise them on its position, or the law, or what it should do.

G. Were the details of the application of February 12, 1973, simply modifications of the project for which a permit was applied for on September 5, 1972?

We agree with the opinions of Mr. Dennis Williams, a zoning plan examiner for the respondent city, that the second application is substantially different from the first, and is a new and different one and not a modification of the first. As he establishes: the first application is for a nine-storey building, the second for a twelve-storey building; no part of the building in the first application extends into an area zoned residential, the basement of the second does; the building in the first is rectangular, in the second irregular; the floor area in each application and for each floor differ significantly; in the first, stairways are within the confines of the general perimeter, in the second, they project outside; in the first application there is one basement for parking, in the second two, including a dining-room and kitchen and game, hobby and health rooms; the parking arrangements differ significantly. It is evident from the cross-examination of Mr. Pattantyus that he was unfamiliar with the plans for the earlier project and, indeed, he admitted that he did not "know any details of the first plans". What appears to have happened is that the first project, which was well within the zoning by-law, was displaced by the second project in which it was sought to use every available square foot under the zoning by-law. The project was thus significantly altered and the zoning by-law broken. We find that the new project of February 12, 1973, was substantially different from the first one of

September 5, 1972, and not merely a modification of it.

H. Was the application of February 12, 1973, in order at the time at which it was made?

Here again we agree with opinions of Mr. Williams, the zoning plan examiner, and find that the second application of February 12, 1973, was not in conformity with the city zoning by-law in the following respects:

(a) Eighteen of the required parking spaces extend from three feet to seven feet into an area zoned residential, as do portions of the basement.

(b) Only one loading space is provided and the by-law calls for two.

(c) The gross floor area permitted under the by-law had been exceeded.

(d) The ramp to the underground garages is not shown to comply with the by-law.

I. Can any deficiencies in either application now be cured or disregarded, or should a conditional mandatory order be?

Much evidence was presented to us of adjustments that might be made to the plans submitted on February 12, 1973, to comply with the zoning by-law, and we were invited to make a conditional mandatory order so that these adjustments might be made and the project carried on with them. It is clear that we have some discretion to do so with regard to the building By-law 300-68, as had the Commissioner of Buildings under art. 10 of that by-law: Re Permanent Investment Corp. Ltd. and Township of Ops and Graham, [1967] 2 O.R. 13 at p. 17, 62 D.L.R. (2d) 258 at p. 262, per Schroeder, J.A. (Ont. C.A.).

But the situation under the zoning By-law 20623 may be different. In it there is no explicit power of variation. There is provision under s. 42(1) of the Planning Act, R.S.O. 1970, c. 349, for the committee of adjustment to authorize such minor variance from the by-law "as in its opinion is desirable for the appropriate development or use of the land, building or structure, provided that in the opinion of the committee the

general intent and purpose of the by-law and the official plan, if any, are maintained". The Legislature having given that power of variation to the committee of adjustment, this Court cannot exercise it: Re Bruce and City of Toronto et al., [1971] 3 O.R. 62 at p. 68, 19 D.L.R. (3d) 386 at p. 392, per Kelly J.A. In so far as the integrity of planning and zoning by-laws and minor variance are concerned, the Court can in those cases, only grant mandatory relief on the condition that application be made successfully to the committee of adjustment for such variance.

It was basic to the applicant's case before us, that once an application for a building permit for an apartment hotel on the C-zoned portion of the applicant's land had been made, the applicant was at liberty to alter it, and if it did not as altered comply with the building or zoning by-law, the applicant could undertake to make specific changes to meet objections, or could undertake generally to make changes to meet changes to meet any and all objections the respondents might have and a conditional order could be issued.

There are three answers to these propositions in this case:

(1) The prior position taken by the applicant with regard to the objections was that they were unsound and that the applications had fully complied with the by-laws.

(2) The letter of the applicant's solicitors of February 16, 1973, did not undertake, on behalf of the applicant, to make amendments, but merely said that if there were minor matters requiring amendment, the solicitors would advise the applicant to make such amendments forthwith. That is a severly limited undertaking and in no way bound the applicant.

(3) It was not until the cross-examination of Mr. Pattantyus on April 6, 1973, that the willingness of the applicant to meet the city's objections was made clear. Up to that time the applicant had maintained that it was entitled to a building permit without amendment, although it had suggested a number of changes or arguments, to meet the respondents' case. In our view, that was not too late. In Re Bismark Holdings Ltd. et al., and City of Toronto et al. (unreported April 10, 1973 [now reported, ante, p. 887]), decided in favour of the applicant in that case, there was no argument against the objections by the owner who made it clear throughout that it would meet the city's objections and who, in fact, did.

We do not regard Mr. Williams' evidence that the changes were possible, as anything more than that they were not impossible, a limited opinion that carries the applicant's case no distance in its way.

In our view, the blanket willingness to meet any objections of the city at any time, is not enough. The original application for a building permit must be essentially in order, and any amendments should be specific and in train. Otherwise it would be sufficient to file any application for a building permit, undertake to comply with any city requirements, and ask for a conditional mandatory order. No owner is entitled to such an order in such circumstances.

J. Disposition of the issues

In the light of the answers which we have given to these question, we conclude that the applicant's original application of September 5, 1972, was not then in proper form, nor subsequently perfected, that the changes finally submitted as a new application on February 1, 1973, were not modifications but substantially a new application which did not conform with the by-laws then in force, that it has never been put in proper form and that this is not a case for a conditional order.

This application is, therefore, dismissed with costs.

Application dismissed.

Davison v. Orangeville (Town)

Between
Shannah Gail Davison, applicant, and
The Corporation of the Town of Orangeville, respondent

[1996] O.J. No. 3469
DRS 97-01393
Court File No. 404/96

Ontario Court of Justice (General Division)
Zelinski J.
July 22, 1996.

Counsel:
William B. Stutz, for the applicant.
Allan Young, Director of Planning Agent, for the respondent.

ZELINSKI J.:--

THE ISSUES

[para1] On June 14th, 1996, I concluded that this application was not governed by s. 41 of the Planning Act, R.S.O. 1990 c. P.13, (the "Planning Act"), with the result that site approval is not required irrespective of the result of the remaining issue on which I reserved.

[para2] That unresolved issue can be stated as follows:

> The site in question is zoned C5. The Applicant seeks to renovate an existing triplex to convert it into combined residential and commercial uses. If the application is successful, the present three unit residential use is to continue, however, certain of the former residential space will become retail, with the balance of the commercial space to be converted to an office.
>
> It is conceded that each of the intended uses is an appropriate use in a C5 zone, when not combined.

HISTORY OF THE OFFICIAL PLAN POLICY

[para3] Since 1994 when an amendment to its official plan was adopted by council, (the "O.P. Amendment") the relief sought conforms to Official Plan policy. That present policy is stated, in part, as follows:

> E2.9 RESTRICTED COMMERCIAL/RESIDENTIAL
>
> E2.9.2 Permitted uses include commercial and residential uses, alone or in combination ...

[para4] The Respondent's By-law #22-90 is its Zoning By-law (the "Zoning By-law"). When that By-law was enacted in 1990, the Official Plan policy did not contemplate residential and commercial uses in combination in Restricted Commercial/Residential zones. Prior to the O.P. Amendment, such zones were classified, in the Official Plan, as areas in transition.

THE LAW

[para5] This Application is framed in s. 25 of the Building Code Act S.O. 1992, c. 23 ("BCA"). Its success is dependent upon the present Official Plan policy, as stated in the O.P. Amendment, being incorporated into the "applicable law" which the Chief Building Official ("CBO") must consider when determining whether a building permit will issue.

[para6] Counsel for the Applicant relies upon s. 24(1) of the Planning Act to assist him to advance this interpretation.

[para7] For convenience those statutory provisions which are relevant, are set out as follows:

PLANNING ACT

[para8]

> 24(1) Despite any other general or special Act, where an official plan is in effect, no public work shall be

undertaken and, except as provided in subsections (2) and (4), no by-law shall be passed for any purpose that does not conform therewith. 1983, c. 1, s. 24(1).

27(1) When the Minister has approved an official plan adopted by a county or by a regional, metropolitan or district municipality,

(a) every official plan; and

(b) every zoning by-law passed under section 34 of this Act or a predecessor thereof, that is then in effect in the area affected ... shall be amended to conform therewith.

BCA

[para9]

8(1) No person shall construct or demolish a building or cause a building to be constructed or demolished in a municipality unless a permit has been issued therefor by the chief building official.

(2) The chief building official shall issue a permit under subsection (1) unless,

(a) the proposed building, construction or demolition will contravene this Act or the building code of any other applicable law ... (Emphasis added)

25(1) Any person who considers themself aggrieved by an order or decision made by an inspector or chief building official under this Act or the regulations, except a decision not to issue a conditional permit under subsection 8(3), may, within twenty days after the order or decision is made, appeal the order or decision to a judge of the Ontario Court (General Division).

(4) If an appeal is made under this section, the judge shall hold a hearing and may rescind or affirm the order or decision of the inspector or chief building official or take such action as the judge considers the inspector or chief building official ought to take in accordance with this Act and the regulations and, for such purpose, may substitute his or her opinion for that of the inspector or chief building official.

[para10] Section 24(1) of the Planning Act is clearly prospective in its application. The Respondent's Zoning By-law was passed on a basis which was consistent and in conformity with the Official Plan then in effect. While, pursuant to s. 24(1) of the Planning Act, no amendments to the Zoning By-law can now be passed without regard to the policy set out in the O.P. Amendment, the fact that the existing Zoning By-law is more restrictive than present policy does not in any way offend s. 24(1) of the Planning Act. The Zoning By-law continues to be valid.

[para11] Under s. 8(1) BCA, the CBO must issue a building permit if the present Official Plan, which includes the O.P. Amendment, is "applicable law". His failure to do so would otherwise be in contravention of "applicable law".

[para12] In Re Woodglen & Co. Ltd. and City of North York (1984) 43 O.R. (2d) 289, Haley, J. concluded that an Official Plan does not constitute "applicable law" with reference to s. 8(1) BCA determinations. In an appeal to the Divisional Court

((1984) 47 O.R. (2d) 614) Southey, J. confirmed the findings of Judge Haley, as she then was, stating at p. 617:

Counsel for the appellants argued that the official plan was part of the "applicable law" within the meaning of s. 6(1)(a) of the Building Code Act, and that the chief building officer was not obliged to issue a permit to cover construction that would not be in conformance with the official plan. In my judgment, the learned county court judge was right in rejecting that submission, on the ground that an official plan and amendments thereto are not effective in themselves to regulate land use and

> are not part of the applicable law which the chief official is to obey. As appears from the authorities to which the learned judge referred, an official plan is recommendation, or statement of intention only, which may or may not be implemented by the municipality by the enactment of appropriate zoning by-laws: see Re Steven Polon Ltd. and Metropolitan Licensing Com'n, [1961] O.R. 810, 29 D.L.R. (2d) 620; Re Township of Southwold and Caplice et al. (1978), 22 O.R. (2d) 804, 94 D.L.R. (3d) 134, 8 M.P.L.R. 1; Cadillac Development Corp. Ltd. et al. and City of Toronto (1973), 1 O.R. (2d) 20, 39 D.L.R. (3d) 188.

[para13] In her analysis, Madam Justice Haley, as she now is, went on to consider, at p. 297, those authorities which were distinguishable on the basis that "there was a specific statutory duty placed upon the municipality to bring its Zoning By-laws into conformity within the Official Plan of the Region." There was no such statutory duty in her case. Similarly, in this case, the parties have not referred to any "specific statutory duty on the [Respondent] to effect such compliance", as would be the case if s. 27(1) of the Planning Act had application. (See J. & R. Rite Holdings (Oshawa) Inc. and City of Oshawa (1988) 64 O.R. (2d) 471).

[para14] Summing up on this point, the Official Plan and its amendment are not "applicable law" which the CBO was required to consider.

[para15] In Re Woodglen, Haley, J. was proceeding under s. 15(1) of the BCA which is the predecessor of the present s. 25(1) BCA. She went on to consider at p. 298 "... whether I have any broader powers under the appeal provisions in [s. 25] of the Building Code Act to review the decision of the chief officer by applying the principles in the Boyd case." (City of Ottawa et al. v. Boyd Builders Ltd. [1965] S.C.R. 408)

[para16] She concluded that she had such powers as an appellate court. Those powers included the granting of an order of mandamus.

[para17] At p. 300, Haley, J. summarized the principles upon which equitable relief should be granted, on the basis of the Boyd case as follows:

> Application of equitable principles. Before, the passing of the Building Code Act appeals were taken from decisions of building inspectors on building permits by way of mandamus applications to the High Court. Mandamus being an equitable remedy, the court was able to develop building permits on grounds not open to the building inspector. Such principles are reflected in the three tests in the Boyd Builders case referred to above.
>
> As I have said, the onus is on the municipality in persuading the court to exercise its equitable discretion to show it has fulfilled three prerequisites:
>
> (a) a clear intent to restrict or zone existing before the application by the owner for a building permit;
>
> (b) that council has proceeded in good faith;
>
> (c) that council has proceeded with dispatch.

[para18] In this application the clear intent of the OP Amendment is to permit multiple uses in combination. Bad faith as a result of the failure of council to amend the Zoning By-law to assure consistency with the amendment was not argued. In Re Woodglen, the "delay in proceeding" between the approval of the district plan and the application before Madam Justice Haley was some ten years. In the case before me the delay between the O.P. Amendment and this application is approximately two years.

[para19] I questioned Mr. Young, representing the Respondent, whether the Zoning By-law and the "combination of uses" policy stated in the O.P. Amendment were not mutually exclusive. He agreed that they were. He then conceded that, until the Zoning By-law is itself amended, the O.P. Amendment and the Zoning By-law will not conform to each other. His response to my concerns about the failure to amend the Zoning

By-law to incorporate present policy was, essentially, to "trust us", citing problems inherent in procedures necessary to amend a Zoning By-law as the basis of delay.

[para20] While I am not completely satisfied with that response I am satisfied that Mr. Young has a legitimate concern about the problems he contemplates.

[para21] Thus, while it has not been satisfactorily established that council will, shortly, proceed in good faith to pass amendments to the Zoning By-law so as to conform to the O.P. Amendment, there has not been undue delay at this time.

[para22] I am certain that these reasons will be treated as notice to the Respondent's council of the priority of getting on with the task of amending its Zoning By-law. Failure to do so may, on another occasion, cause a different result.

[para23] The language of the Zoning By-law is inconsistent with combinations of uses, at present, in C5 zones. If it were, the O.P. Amendment would not have been necessary. In other commercial zones where combinations of uses are permitted in the Zoning By-law, that by-law specifically includes language which permits such combinations. In relation to the subject site, the Zoning By-law is silent in that respect.

[para24] The Respondent relies on the reasons of Fraser, J. in S.R.V. Developments Ltd. v. Courtenay (City) (1992) 12 M.P.L.R. (2d) p. 154, wherein at p. 155, the learned justice defined a similar issue as follows:

> In the separate zones designated in the zoning by-law as "Commercial One" (C-1), the "Central Commercial" zones, "Liquor store" is a specifically permitted use. The city concedes that a liquor store could come within the expression "retail or wholesale outlet" but says that, by specifically designating "liquor store" as a permitted use in C-1, it has winkled out and excluded the use from the more general one in C-2.

[para25] Fraser, J. accepted this argument, following, in part, the reasons of MacGillivray, J.A. in Cambridge Leaseholds Ltd. v. Hewitson (O.C.A.) [Unreported]. I adopt his conclusion. When there are references, as here, to combinations of uses in certain zones, but silence on that point in the subject zone, that silence has the result of excluding combinations of uses in the subject zone.

CONCLUSION

[para26] The decision of the CBO not to issue a Building Permit was correct.

[para27] The exercise of my jurisdiction to make an order in the nature of mandamus is premature at this stage.

[para28] The Application is denied.

[para29] Mr. Young is a planner and not counsel. He was permitted to argue before me on the basis of an authorization from the Town, and the consent of Mr. Stutz. This procedure should not be encouraged in my view.

[para30] No order as to costs.

ZELINSKI J.

Dominion Stores Ltd. v. Etobicoke, Borough of et al.

(1982), 37 O.R. (2d) 661

ONTARIO
HIGH COURT OF JUSTICE
DIVISIONAL COURT
GALLIGAN, OSBORNE and TRAINOR JJ.
APRIL 28, 1982*

Released June 21, 1982

APPLICATION for judicial review to order the issuance of a building permit.

J. L. McDougall, Q.C., and R. L. Armstrong, for applicant.

J. H. Reble, for respondents.

The judgment of the Court was delivered orally by

GALLIGAN J.:-- This application for judicial review seeks an order requiring the issuance of a building permit. The facts are not in dispute and I do not intend to make very much reference to them. The applicant's land is bounded by Eglinton Avenue, Lloyd Manor Road and Warrender Road. Eglinton Avenue is a Metropolitan Toronto road. The latter two are local streets under the municipality's jurisdiction. Because the municipality of Metropolitan Toronto owns a 17-ft. strip between the applicant's land and Eglingtion Avenue, the only means of access to the applicant's lands is by Lloyd Manor or Warrender Road.

The applicant wishes to build and operate a large supermarket on the site. The proposed use is in all respects in compliance with the zoning by-laws of the municipality. The applicant applied for a building permit and it is admitted that it has complied in all respects with the requirements therefore. Accordingly it is prima facie entitled to a building permit; City of Ottawa et al. v. Boyd Builders Ltd., [1965] S.C.R. 408, 50 D.L.R. (2d) 704.

The respondent has refused to issue the building permit because it has not given development control approval under s. 40 of the Planning Act, R.S.O. 1980, c. 379. It is clear beyond peradventure that the only reason that the respondent has not given its approval is that it does not want to permit access onto the applicant's lands from either of the local streets. It has refused to approve any development plans or drawings or enter into any development agreement which in any way provide access to or from the proposed supermarket onto those local streets.

The issue before this Court is whether the municipality is legally entitled to refuse to give development approval on that ground. While a certain amount of discussion took place before us as to whether development approval under s. 40 of the Planning Act is or is not a condition precedent to the issue of a building permit I do not think it is necessary for the purposes of this application to decide that issue. I am of the opinion assuming without deciding that development approval is a condition precedent to the issuance of the building permit, that a municipality may not withhold such approval for a reason that is not authorized by law. If it were otherwise an applicant's legal right to a building permit could easily be frustrated.

In this case the applicant's lands are landlocked unless it has access to either Lloyd Manor or Warrender Road. Its proposed use of its lands for a supermarket is authorized by the zoning by-laws. It is clear that at common law a land owner was entitled to access to a public road touching his land and that a municipality in the absence of an express statutory right to the contrary could not by denying access deprive him of the lawful use of his land. See Toronto Transportation Com'n v. Village of Swansea, [1935] S.C.R. 455, 457, [1935] 3 D.L.R. 619, and Marshall et al. v. Blackpool Corp., [1935] A.C. 16, 22. In the light of that principle s. 40 of the Planning Act must be scrutinized because if statutory authority is to be found justifying the respondent's refusal to approve, it is not suggested that it can be found anywhere else but in that section. The relevant parts of s. 40 of the Planning Act are s-ss. (1) to (6) inclusive.

40(1) In this section, "development" means the

construction, erection or placing of one or more buildings or structures on land or the making of an addition or alteration to a building or structure that has the effect of substantially increasing the size or usability thereof, or the laying out and establishment of a commercial parking lot.

(2) Where there is an official plan in effect in a municipality, the council of the municipality may, by by-law, designate the whole or any part of the area covered by the official plan as a site plan control area, but nothing herein authorizes the council to designate an area that is not within the limits of the municipality of which it is the council.

(3) A by-law passed under subsection (2) may designate a site plan control area by reference to one or more land use designations contained in a by-law passed under section 39.

(4) No person shall undertake any development in an area designated under subsection (2) unless the council of the municipality or, where a referral has been made under subsection (9), the Municipal Board has approved one or both, as the council may determine, of the following:

1. Plans showing the location of all buildings and structures to be erected and showing the location of all facilities and works to be provided in a conjunction therewith and of all facilities and works required under clause (6)(a).

2. Drawings showing plan, elevation and cross-section views for each industrial and commercial building to be erected and for each residential building containing twenty-five or more dwelling sites to be erected which are sufficient to display,

   (a) the massing and conceptual design of the proposed building;

   (b) the relationship of the proposed building to adjacent buildings, streets, and exterior areas to which members of the public have access; and

   (c) the provision of interior walkways, stairs and escalators to which members of the public have access from streets, open spaces and interior walkways in adjacent buildings,

   but which exclude the layout of interior areas, other than the interior walkways, stairs and escalators referred to in clause (c), the colour, texture and type of materials, window detail, construction details, architectural detail and interior design.

(5) Nothing in this section shall be deemed to confer on the council of the municipality power to limit the height or density of buildings to be erected on the land.

(6) As a condition to the approval of the plans and drawings referred to in subsection (4), a municipality may require the owner of the land to,

(a) provide to the satisfaction of and at no expense to the municipality any or all of the following:

1. Widening of highways that abut on the land.

2. Subject to the Public Transportation and Highway Improvement Act, facilities to provide access to and from the land such as access ramps and curbings and traffic direction signs.

3. Off-street vehicular loading and parking facilities, either covered or uncovered, access driveways, including driveways for emergency vehicles, and the surfacing of such areas and driveways.

4. Walkways, including the surfacing thereof, and all other means of pedestrian access.

5. Facilities for the lighting, including floodlighting, of the land or of any buildings or structures thereon.

6. Walls, fences, hedges, trees, shrubs or other

groundcover or facilities for the landscaping of the lands or the protection of adjoining lands.

7. Vaults, central storage and collection areas and other facilities and enclosures for the storage of garbage and other waste material.

8. Easements conveyed to the municipality for the construction, maintenance or improvement of watercourses, ditches, land drainage works and sanitary sewerage facilities on the land.

9. Grading or alteration in elevation or contour of the land and provision for the disposal of storm, surface and waste water from the land and from any buildings or structures thereon;

(b) maintain to the satisfaction of the municipality and at the sole risk and expense of the owner any or all of the facilities or works mentioned in paragraphs 2, 3, 4, 5, 6, 7, 8 and 9 of clause (a), including the removal of snow from access ramps and driveways, parking and loading areas and walkways;

(c) enter into one or more agreements with the municipality dealing with any or all of the facilities, works or matters mentioned in clause (a) or with the provision and approval of the plans and drawings referred to in subsection (4).

Subsections (4) and (6) respectively authorize a municipality to approve plans for the provision of and to extract from the land owner an undertaking to provide for facilities for access to and from the land, such as access ramps and curbings and traffic direction signs. Those subsections do not expressly authorize a municipality to deny access for the purpose of denying the lawful use of the property. I cannot find any implication of such power in the language of those provisions. Those subsections authorize approval of plans that provide access. In my opinion they cannot be tortured into legislative sanction for the refusal of approval of plans for the reason that they provide for facilities of access to and from the land.

The record in this case is extensive. A close perusal of it leads me to the inescapable conclusion that the sole reason for the refusal to approve the development plans is that they provide for access to those local streets. It is my opinion that that reason is not one authorized by law. I do not think that a municipality is entitled to refuse developmental approval for an unlawful reason and thereby efffectively frustrate a land owner's prima facie right to issue of the building permit. The municipality withheld this building permit for a reason that is not authorized by law. It follows therefore, that it must now issue it. In my opinion therefore, the applicant is entitled to its building permit and the municipality is ordered to issue it.

Mr. Reble argued that s. 40(9) of the Planning Act provides the applicant an alternative remedy and that therefore, this Court should refuse to exercise its discretion in favour of the applicant.

(9) Where the municipality fails to approve the plans or drawings referred to in subsection (4) within thirty days after they are submitted to the municipality for approval or where the owner of the land is not satisfied with any of the requirements made by the municipality under subsection (6) or with any part thereof, including the terms of any agreement required, the owner of the land may require the plans or drawings or the unsatisfactory requirements or parts thereof or the agreement, as the case may be, to be referred to the Municipal Board by written notice to the secretary of the Board and to the clerk of the municipality, and the Board shall then hear and determine the matter in issue and settle and determine the details of the plans or drawings and approve the same and settle and determine the requirements, including the provisions of any agreement required, and the decision of the Board is final.

That section provides a means of arbitrating a dispute about the details of plans or drawings or the terms of an agreement. If this case involved a legitimate dispute about details or terms there would be great force in that argument. But in this case I think that there is no legitimate dispute. There is

what seems to me to be nothing more nor less then unlawful obstinacy. Therefore I do not think that the applicant is required to go to the Ontario Municipal Board before coming to this Court.

I make it clear that this Court does not order that the municipality approve the application for developmental control approval which has been submitted to it. It does declare that the municipality's reason for refusing that approval is unlawful. In the event of failure of approval or to arrive at an agreement for some lawful reason then s. 40(9) provides an adequate remedy.

In the result an order will go directing the issue of the building permit.

Order granted.

Doublerink Arenas Ltd. v. North York (City) Chief Building Official

Between
Doublerink Arenas Limited, applicant, and
E.Y. Uzumeri, in his capacity as Chief Building Official of The Corporation of the City of North York and Lauridon Sports Management Inc., respondents

[1996] O.J. No. 3519
DRS 97-02524
Court File No. RE6080/95

Ontario Court of Justice (General Division)
Lax J.
October 9, 1996.
(2 pp.)

Costs -- Party and party costs -- Excessive costs.

HELD: Lauridon's costs were fixed at $10,000. The costs claimed were excessive. The matter was not complex and the City was the main respondent.

Counsel:
Ronald D. Kanter and Jeffrey E. Canto-Thaler for the applicant.
Stephen R. LeDrew and Ian R. Dick for the respondent, Lauridon Sports Management Inc.

[para1] LAX J. (endorsement):-- I have been asked to fix the costs of the respondent, Lauridon in this matter which was before me on June 6 and 7, 1996. I have considered the written cost submissions of Doublerink and of Lauridon. It is my view that the costs claimed by Lauridon (some $53,000.00) are out of all proportion to the costs which ought to be awarded to a successful party following an application of this kind. The issue was novel, but not complex. The solicitors for Lauridon concentrate in this area of law. The principal respondent was the City of North York. It has settled its costs for $7,500.00 which it describes as "an extremely low figure" and Doublerink describes as "a reasonable amount". I recognize that there is a difference between the interests of the two respondents. I also recognize that the outcome was of importance to Lauridon in view of its financial investment in the project at issue. But, I do not agree that this 1 1/2 day argument required almost 300 hours of work from four senior counsel, at rates of $180.00 to $200.00 per hour, particularly when the City defended the action, filed comprehensive materials and participated fully in the argument.

[para2] Costs of Lauridon are fixed at $10,000.00 plus disbursements and G.S.T.

Vancouver Registry No. A890281

[1989] B.C.J. No. 668

British Columbia Supreme Court
Vancouver, British Columbia (In Chambers)
Maczko J.

Heard: February 23, 1989
Judgment: April 17, 1989

Counsel for the Petitioners: Tom R.I. Dusevic.
Counsel for the Respondents: Grant Anderson.

Maczko J.:--

FACTS

The petitioners apply for an order of mandamus to compel the respondent Regional District to exercise its power pursuant to s. 751 of the Municipal Act, R.S.B.C. 1979, c. 290, to restrain the respondent Purcell Helicopter Skiing Ltd. ("Purcell") from using the subject property in a manner that does not conform to the permitted uses outlined in Highway Planning Area No. 1 Development Permit Bylaw 1979, No. 282 and Schedule "A" thereto ("by-law"). Regulation 3.04 provides:

> The use of land, buildings and structures in Zone No. 1 is restricted to:
>
> (a) residential;
>
> (b) farming, namely cultivating land,or using land for agricultural, horticultural, poultry raisirg, stock raising, dairying, fur farming, veterinary clinics and beekeeping purposes or any or all of them;
>
> (c) extraction and removal of natural resources;
>
> and all other uses are prohibited.

Since approximately December 4, 1988, Purcell has been using the subject property to operate a helicopter skiing business and landing pad for helicopters. This use is in clear contravention of the aforementioned regulation.

The petitioners do not have the authority to compel compliance with the by-law. Only the Regional District has this authority, which derives from s. 751 of the Municipal Act. Section 751 provides:

> 751. Where a building is erected or used, or land is used, in contravention of a bylaw adopted under this Act, in addition to any other remedy provided in this Act, and to any
>
> penalty imposed by the bylaw, the contravention may be restramed by a court proceeding at the instance of the municipality alone.

BACKGROUND

In late June, 1987 Purcell submitted an application to rezone the subject property to permit commercial use. After having conducted the requisite public hearings, the by-law having had second and third reading by the Regional Board, and having obtained the requisite approval from the Minister of Transportation and Highways, it was learned on June 10th, 1988 that the Minister of Municipal Affairs did not approve the

proposed by-law. Purcell then relocated its landing area in the fall of 1988. On November 7th, 1988 Purcell submitted a new application for rezoning, together with a letter indicating it was prepared to grant a covenant restricting helicopter activity to the east side of the property, which is the side furthest away from the petitioners' property. Again, the proposed by-law received first and second reading and public hearings were conducted. On December 7th, 1988 the petitioners

wrote to the Regional District requesting that the Board enforce the existing by-law. At an in-camera meeting of the Board on December 16th, 1988 the Board confirmed its policy not to enforce a zoning by-law when an active application was in progress. This policy was communicated to the petitioners in a January 13th, 1989 letter.

PETITIONERS' ARGUMENT

The petitioners argue as follows:

(i) the Regional District has a duty to enforce the existing bylaw, which it has failed to discharge;

(ii) even if enforcement of the existing bylaw is a discretionary power of the Regional District, this discretion has been exercised in bad faith, since the Regional District has permitted the ongoing non-conforming use of the property notwithstanding the disapproval of the Minister of Municipal Affairs;

(iii) even if the discretionary power of the Regional District has been exercised in good faith, by refusing to

enforce the existing bylaw, the Regional District in effect has circumvented the legislation and rezoned the property by resolution rather than through a bylaw as required by statute.

Are the petitioners entitled to their order of mandamus?

The prerequisites to the granting of an order of mandamus are set out in the Canadian Encyclopedic Digest (Western), 3rd ed., Vol. 28, at Title 117 Prerogative Remedies pp. 117-80:

(1) a clear legal right to performance of a duty: (2) evidence that the performance of the duty is owed: (3) an absence of discretion as to whether the duty must be performed: and (4) proof of a demand that the duty be performed and a refusal thereof.

These prerequisites are also set out in Karavos v. Toronto and Gilles, [1948] 3 D.L.R. 294 (Ont. C.A.) at p. 297, which case is judicially noticed in Dombrowski v. Dalhousie University (1976), 15 N.S.R. (2d) (N.S.C.A.) at pp. 309-10.

I do not intend to deal with each of these prerequisites

because I find that the petitioners cannot be successful if they fail on any one of them. I find that the duty to enforce the by-law is discretionary and mandamus would only issue if the respondent Regional District exercised that discretion in bad faith.

DUTY TO ENFORCE THE BY-LAW

The language of ss. 294 and 750(1) of the Municipal Act is permissive. Those sections read as follows:

294. The council of a municipality may make bylaws for the purposes of enforcing the bylaws of the municipality by fine, imprisonment or both, and for inflicting fines, penalties and costs.

750. (1) A bylaw adopted under this Act may be enforced, and the breach of this Act or a bylaw, resolution or regulation of the council restrained by a proceeding in the Supreme Court or the County Court whether or not a penalty has been imposed for the breach.

There are no other sections in the statute which would compel the Regional District to enforce its by-laws. Absent any statutory duty to enforce the by-law, is there common law duty to enforce? Certainly prior to Kamloops v. Nelson, [1984] 5 W.W.R. (S.C.C.), no such common law duty existed. McIntyre, J.

(Estey, J. concurring) said, at p. 12:

> It has been held that a municipality has no duty to enforce by-laws passed under statutory powers which leave a discretion as to whether such powers may be exercised or not. The provisions of the Municipal Act of British Columbia which empower the passage of a building by-law are found in s. 714 of the Act and are clearly permissive. The provisions of ss. 734, 735 and 715, cited above, give a power to take legal steps towards enforcement but impose no duty.

McIntyre, J. then went on to review several judgments which dealt with the issue of the common law duty to enforce a by-law by instituting legal proceedings. He stated at p. 12:

> In Brown v. Hamilton (1902), 4 O.L.R. 249 (H.C.), the city of Hamilton had passed a by-law which prohibited the setting off of fireworks in the city streets. The by-law had for many years been ignored by the public and, presumably, by the city. The plaintiff was injured by a roman candle during a display of fireworks in the streets. He sued the city for damages arising from its failure to enforce its by-law. In the High Court, Chancellor Boyd said, at p. 251:
>
> > Having enacted such a by-law, there is no duty cast on the municipality to see to its enforcement.

McIntyre, J. then quoted, at p. 15, from Toronto v. Polai (1969), 8 D.L.R. (3d) 689 (Ont. C.A.) (affirmed [1973] S.C.R. 38), where it was held at pp. 707-8:

> Municipal council has a discretion as to when it will prosecute for a breach of or sue to enforce the provisions of the zoning by-law. To deny the discretion in municipal council would be to place the most technical breach of the by-law beside the most blatant and to remove from consideration the harm done to the offender and the value to the community of the proposed proceedings when considering when they ought to be taken. The discretion when to prosecute or when to sue which rests with the municipal corporation or the comparable discretion which rests with public authorities charged with the responsibility of enforcirg the rights of the public when they are violated, is one of the great strengths of our system of justice.

Much like the Attorney General's prosecutorial discretion, the exercise of a municipality's discretion is not a matter that is judiciary reviewable unless it is exercised in bad faith. As stated by Schroeder, J.A. in Toronto v. Polai, supra, at pp. 696-7:

> As members of the city corporation the inhabitants are entitled to look to the duly elected representatives who comprise the municipal council for enforcement of the provisions of by-laws passed for their protection, and in
>
> enforcing those by-laws the corporation, whether by means of a prosecution or in a suit for injunctive relief, acts on behalf of all the inhabitants. The municipality acting through its council and duly appointed officials, occupies in a more restricted sense the same position as does the Attorney General who represents the Crown in its capacity as parens patriae charged with the responsibility of enforcing the rights of the public when they are violated. The decision whether or not the Attorney General sbould prosecute or sue is a matter for him, and the Courts have no power to question his right to do so or to refrain from doing so as distinct from his right to refief.

This statement was adopted by McIntyre, J. at p. 13. At p. 20, McIntyre, J. concluded:

> At common law, a municipality has no duty to enforce its by-laws by court proceedings. The matter is discretionary. Failure to exercise enforcement powers in court does not give rise to a private cause of action in negligence to those suffering harm from nort-enforcement.

The majority decision in Kamloops v. Neilson, on the other hand, recognized that at least insofar as "operational" decision-making was concerned, a municipality did have a

private law duty to prevent foreseeable harm to its "neighbours" caused by its failure to enforce municipal by-laws. Wilson, J. (for the majority) discounted the "floodgates" argument and held at pp. 37-8:

> ... the applicable legislation or the subordinate legislation enacted pursuant to it must impose a private law duty on the municipality or public official before the principle in Anns applies. Further, the principle will not apply to purely policy decisions made in the bona fide exercise of discretion. This is, in my view, an extremely important feature of the Anns principle because it prevents the courts from usurping the proper authority of elected representatives and their officials. At the same time, however, the principle ensures that in the operational area, i.e., in implementing their policy decisions, public officials wit be exposed to the same liability as other people if they fail in discharging their duty to take reasonable care to avoid injury to their neighbours.

I conclude that the Kamloops decision is not of assistance to the petitioner, as it can be distinguished from the case at bar. First, in the Kamloops case, a provision of the building by-law passed by the City pursuant to the discretionary provision of the Municipal Act, dealt specifically with enforcement and stated:

> The building inspector shall enforce the provisions of this by-law and administer the by-law.

The by-law in the case at bar is silent on the question of enforcement. In this statutory vacuum the existence of a duty to enforce must be determined according to the common law, which seems to dictate that the responsibility for by-law enforcement is in fact no more than a "power" and is therefore discretionary.

Secondly, the resolution at issue in the case at bar cannot be characterized as an operational decision, which is a prerequisite to Wilson, J.'s test for the existence of a private law "duty" to enforce. She held at p. 37:

> ... the city could have made a policy decision either to prosecute or to seek an injunction. If it had taken either of those steps, it could not be faulted. Moreover, if it had considered taking either of those steps and decided against them, it could likewise not be faulted. But not to consider taking them at all was not open to it. In other words, as I read his reasons, his view was that the city at the very least had to give serious consideration to taking the steps that were open to it. If it decided against taking them, say on economic grounds, then that would be a legitimate policy decision within the operational context and the courts should not interfere with it. It would be a decision made, as Lord Wilberforce put it, within the limits of a discretion bona fide exercised.

I find that the Regional District considered the question of whether to enforce the by-law and made a policy decision not to enforce it, pending the outcome of the rezoning application. Section 751 of the Municipal Act gives the Regional District a discretion and the courts should not interfere with the clear intention of the Legislature.

BAD FAITH

Did the Regional District act in bad faith when it passed the resolution not to enforce, given the prior disapproval of the proposed by-law by the Minister of Municipal Affairs?

Where the court is satisfied that a municipal council has acted in good faith and within the limits of its power, the court should refrain from interfering with its decision (Sundance Beach v. W.A.W. Holdings Ltd., [1981] 1 W.W.R. 581 (Alta. C.A.)). As stated by Dickson, J. (as he then was) in Prince George v. Payne, [1977] 4 W.W.R. 275 (S.C.C.) at p. 281:

> It is the prerogative of the council to make the decision one way or the other provided its discretion is exercised within the limitations imposed by law and is not activated by indirect or improper motives or based upon irrelevant or alien grounds, or exercised without taking relevant facts into consideration.

In the absence of evidence to the contrary, bona fides are assumed. The by-law or resolution itself, when considered in terms of the public interest, may provide objective evidence as to whether or not the council was acting in good faith, quite apart from any subjective evidence on that point (W.A.W. Holdings Ltd. v. Sundance Beach, [1980] 1 W.W.R. 97 (Alta. Q.B.) p. 115, per Miller, J.). Miller, J. stated at p. 116:

> This approach of finding objective evidence that the improper motives or lack of good faith existed in the decision itself has been accepted by the House of Lords in Roberts v. Hopwood, [1925] A.C. 578. In the opinion of Lord Atkinson, at p. 593:
>
> > In the absence of precise and detailed information as to the grounds on which the Council acted, their action, must, in my opinion, be judged by its results.

The mere fact that the operation of a by-law appears to benefit one party more than others does not necessarily establish a motive inconsistent with the "public interest". As held by Brown, J. in Re Central Burnaby Citizens' and Ratepayers' Ass'n (1956), 6 D.L.R. (2d) 511 (B.C.S.C.) at p. 518:

> But, though the operation of a by-law benefits one or more persons more than others, it does not follow that by enacting it a corporation must be taken to "give any bonus" within the Municipal Act, 1906, sec. 194, nor can a by-law be said to be outside the powers conferred by sec. 125 of the Vancouver Act, 1900, merely because steps taken in the public interest are accompanied by benefit specifically accruing to private persons.

Is there something inherently improper about a decision not to act in the face of a blatant contravention of a municipal by-law? In my opinion, there may be bona fide policy reasons in the public interest which argue in favour of temporarily suspending the enforcement of a by-law while it is under review and subject to change, e.g., avoidance of the unnecessary expense of enforcement proceedings which may become superfluous if the by-law is amended, or unnecessarily putting a company out of business.

Even though a municipality is at liberty to decide against enforcement of a particular by-law for valid policy reasons, it cannot adopt a general policy not to enforce its by-laws. Quoting from Toronto v. Polai, supra, McIntyre, J. held, at p. 14 of the Kamloops decision:

> ... the Court has neither the right nor the power to control the exercise of Council's discretion by either direct or indirect means, except possibly, in a case where Council lays down a general policy not to enforce its restrictive zoning by-laws.

The only evidence which the petitioners have adduced to support their allegation "improper motive" is the fact that the enforcement of the existing by-law was suspended notwithstanding the Minister of Municipal Affairs' disapproval of the initial application for rezoning. However, the impugned resolution was passed subsequent to a renewed application, which was predicated on new circumstances (i.e. the granting of a covenant by Purcell). It is possible that the Minister's decision might be different as a result of the new circumstances. In the absence of more cogent evidence of bad faith, I must assume that the impugned resolution was passed with the public interest in mind.

This is not a case of a municipality adopting a general policy not to enforce its restrictive zoning by-laws. Due consideration was given to the question of whether or not the Regional District would enforce this particular by-law against Purcell. Because of bona fide policy reasons for which the Regional District is entitled to receive the benefit of the doubt, I conclude that it acted with the public interest in mind when it passed the resolution at issue.

The petitioners have failed to discharge the onus upon them to prove bad faith on the part of the Regional District.

REZONING

Where a municipality exercises its statutory discretion to do a certain act in a colourable attempt to rezone a property, rather than invoking the rezoning machinery provided for in the Municipal Act, this act can be assailed.

The courts seem concerned that the "many safeguards" in place to protect the zoning process from abuse should not be circumvented through an improper and colourable use of a municipality's discretionary powers. For this reason, where the courts have concluded that the "sole object" of a municipality's action was to circumvent the statutory rezoning machinery, an order of mandamus was justified. See Active Trading v. City of New Westminster, [1947] 5 W.W.R. 354 (B.C.S.C.) and Wilcox v. Township of Pickering et al. (1961) 29 D.L.R. (2d), 428 (Ont. H.C.).

It does not necessarily follow that every time a municipality's discretionary power is used in a way that incidentally alters a zoning requirement, it must be viewed as an "unlawfW exercise of power". There may be bona fide policy reasons for taking such a course of action, in which case this exercise of discretion retains its lawfulness.

In Toronto v. Polai, supra, the zoning by-law dating back many years, stipulated that certain dwellings could be used only as "private detached" (and not multiple family) "dwelling houses". Since 1949, the city had maintained a "deferred list" of known offenders of the by-law against whom no prosecution would be brought. The rationale for the development of this list in the first instance related to the fact that during the preceding war years it was necessary that certain dwellings be used in a manner contrary to the by-law. The plaintiff municipality sought a restraining order to prevent the unlawful use of a particular dwelling as a multiple family dwelling. The

defendant argued that the plaintiff was not entitled to such relief since it had acted inequitably by maintaining the deferred list. The defendant was successful at trial, and the municipality appealed on the ground that it had a discretion in carrying out the by-law, and the Court had no power to dictate the manner in which that discretion could be exercised. It was held by Brooke, J.A., at p. 706:

> There was very little evidence as to the conditions which prevailed at the time of the passing of this resolution. The probability is that there were a considerable number of premises being used in violation of the suspended prohibitory provisions of the by-laws. I think it is probable that what was sought by the resolution was an orderly termination of these uses. The deferred list, then, if this was its origin, and I believe it was, was born of necessity and not for the purpose of some motive which might be criticized.

Even though the municipality effected a change in the zoning by-law without the safeguards provided by statute, the Court held that there was nothing improper about the discretion exercised by the municipality. Schroeder, J.A. held, at p. 694-5:

> It is of prime importance that the Committee did not inaugurate a policy of granting perpetual immunity to violators of the by-law but merely deferred action in cases which on due consideration they approved ...

Similarly, in the case at bar it cannot be said that the Regional District in passing the resolution at issue was driven by "some motive which might be criticized". This particular resolution as wet did not grant "perpetual immunity to violators of the by-law".

The time of enforcement of municipal by-laws is a matter that is properly within the discretion of a municipality. At p. 656 of Re Cornenki and Township of Tecumseth (1971), 19 D.L.R. (3d) 655 (O.H.C.), Oster, J. held:

> While there is undoubtedly a duty towards the citizens on the part of a municipal council to look to enforcement of the by-laws it enacts, the particular time, place and mode of enforcement must be left, except under most exceptional circumstances, to the discretion of the elected council and is not the type of duty that can be enforced by mandamus in the very general way requested in this application.

In the case at bar, the Regional District adopted a policy to stay enforcement proceedings against a by-law violator pending the outcome of a zoning application which might impact on the existing by-law. Because no evidence of an improper motive was adduced, I must assume that there were valid reasons for adopting this policy. It is true that in so acting the Regional District managed to rezone the subject property without the safeguards afforded by the legislative scheme. However, this was an incidental effect of an otherwise valid exercise of discretion and for this reason the decision of the Regional District is not assailed. If, however, there was evidence that the Regional District was attempting to circumvent the legislative scheme by postponing enforcement indefinitely, it might show evidence of bad faith. Even if the Regional District was acting in good faith, in the sense that it was acting in what it perceived to be the public interest, mandamus might issue if the effect of its decision was to amend the by-law without complying with all aspects of the statute. The decision to delay enforcement cannot be continued indefinitely. I think it is not an unreasonable decision to delay enforcement until the Minister makes a decision on the new set of circumstances, provided that the Regional District proceeds expeditiously to present the by-law for approval.

Costs follow the event.

Maczko J.

Egarhos v. City of Ottawa

52 O.R. (2d) 190

ONTARIO
DISTRICT COURT OF ONTARIO
SOUBLIERE D.C.J.
12TH JUNE 1985.

ACTION to recover a development fee paid under protest.

Gordon E. Sheiner, for plaintiff.

Pierre DesRoches, for defendant.

SOUBLIERE D.C.J. (orally):-- The plaintiff brings this claim for return of the sum of $7,260 which he paid to the City of Ottawa when he decided in 1980 to make changes to one of the floors of his apartment building. He paid the sum to the city in order to obtain the building permit to effect the changes. The city alleged that such levy was payable as the proposed changes constituted a redevelopment pursuant to the Planning Act, R.S.O. 1970, c. 349, s. 35a, and therefore attracted payment of 5% of the value of the lands in lieu of park land.

The defendant city in its pleadings raises, as a defence, the fact that these moneys had been paid voluntarily and that, regardless of whether the sum was justly payable, the plaintiff is not entitled to a refund of the sum because he had, in fact, paid the moneys voluntarily. Counsel for the city did not press the matter in front of me and I may say that on that point I would have found against him. The sum indeed had been paid under practical compulsion and the authorities cited to me would have justified the payment then as well as a refund now.

The issue

The real issue which is before me deals with the nature of the changes made by Mr. Egarhos. Are they a redevelopment within the meaning of the Planning Act?

The facts

Mr. Egarhos is the owner of the building at 263 McLaren St. in which there are 13 floors; one is the basement, the main floor was a lobby and an elevator, the second floor was office space and the remaining 10 floors consisted of 80 apartment units. When he acquired the building it was fully occupied, save and except for the office space on the second floor. He has filed, I believe as exs. 2 and 3, statements showing the income and expenses related to the apartment building and these reflect that he was, in fact, incurring a deficit of some $18,000 or $19,000 in his cash flow by reason of the fact that the office space on the second floor was not rented despite his best efforts to do so. Accordingly, he decided to convert these to apartment units much the same as the other 10 floors and he hired Mr. Koffman, an architect in Ottawa, to make the necessary plans and specifications and to apply to the City of Ottawa for the building permit. The City of Ottawa processed the application and granted it but demanded as a prerequisite a fee payable pursuant to the provisions of the Planning Act and a by-law which the city had passed pursuant to those provisions. The plaintiff paid the sum of $7,260 on December 12, 1980, under protest and now brings this action for repayment of the sum.

We are not told what was the total value or the purchase price of the apartment building when the plaintiff acquired it or its value at the time of this application, however, some idea of its value can be gleaned from the statements of income and expenses that have been filed, as well as the mortgages payable, etc. We do know from the application for the building permit that the nature and the cost of the renovations was in the area of $50,000 and Mr. Koffman gave evidence as to what was necessary in order to effect those renovations.

There were no changes made to the outside of the building and as to the interior, there were no structural changes, however, new partitions were required in order to divide the second floor into eight units or apartments. Obviously, carpeting, walls, and ceilings were changed in order to provide the

necessary amenities required for apartments as opposed to the existing office space and back walls. Also, there were stairs leading from the lobby to the second floor; these were filled in and replaced on the ground floor by a rental office and upstairs by an apartment unit. The net effect of the changes was to increase the total residential units from 80 on the other 10 floors to 88, including this additional floor; in other words, eight additional units were created on the second floor.

The City of Ottawa takes the position that those changes constitute a development or redevelopment of these lands under the provisions of the Planning Act and its by-law and are therefore subject to the levy of a fee for park land.

The position of the plaintiff is that the changes do not constitute a development or redevelopment and that, in any event, even if they are, having in mind the magnitude of the work, it does not attract the application of the relevant sections.

The law

To decide this matter, it is essential to set out and consider the history of the relevant legislation and by-law. At the time the by-law was passed (in 1974), s. 35a of the Planning Act defined "redevelopment" as follows:

> 35a(1) ... "redevelopment" means the removal of buildings or structures from land and the construction or erection of other buildings or structures thereon.

There was no definition in the Act of the word "development". It is not surprising, therefore, that By-law 40-74 does not define "development" either and that para. 1 of its provisions contained a definition of "redevelopment" in identical words to those in the Act as it then was.

In 1979 [c. 59, s. 1] the Planning Act was amended, s. 35a was repealed, and a new section enacted. Strangely, the section now omits a definition of "redevelopment" but defines "development" as follows:

> 35a(1) ... the construction, erection or placing of one or more buildings or structures on land or the making of an addition or alteration to a building or structure that has the effect of substantially increasing the size or usability thereof, or the laying out and establishment of a commercial parking lot.

The changes in the definition of "development" and "redevelopment" are important because the only three authorities cited to me that are relevant predate this amendment and the decisions do not consider the section in its present wording. However, By-law 40-74 has not been modified so as to conform to the Planning Act as amended. Is there then any significance to the apparent anomaly of a definition of "development" in the Act far different from the definition of "redevelopment" in the by-law and in the absence of further definitions? For our purposes I find not. First, I note that para. 2 of the by-law reads as follows:

> Subject to Section 3, no person shall develop or redevelop land for residential purposes unless and until the owner of the land has:
>
> (a) conveyed to the Corporation five (5) percent of the land proposed for development or redevelopment for park purposes or other purposes, or,
>
> (b) paid to the Corporation money to the value of five (5) percent of the land proposed for development or redevelopment for park purposes or other purposes.

Under the by-law, both development and redevelopment attract the levy of the same fee. The work done by the plaintiff was clearly not a redevelopment under the by-law: no buildings or structures were removed. If the plaintiff is to be liable to payment of the fee, it must be on account of a "development". I find that the test to be applied is development as defined in the Act, without reference to the definition of "redevelopment" in the by-law. The municipality cannot exceed the powers granted to it under the Act. Further, in the absence of a definition of "development" in the by-law, that contained in the Act must apply. Finally, it is clear the relevant

amendments were passed to clear up any ambiguity that may have resulted following the decisions in Re Slau Ltd. and City of Ottawa et al. (1976), 14 O.R. (2d) 514, 74 D.L.R. (3d) 181, 1 M.P.L.R. 234 (Div. Ct.), Re Thomas C. Assaly Corp. Ltd. in Trust and City of Ottawa (1977), 18 O.R. (2d) 198, 82 D.L.R. (3d) 124, 4 M.P.L.R. 213 (Div. Ct.), and Pension Fund Realty Ltd. v. City of Ottawa (1981), 32 O.R. (2d) 611, 122 D.L.R. (3d) 308 (H.C.J.); affirmed 40 O.R. (2d) 501n, 139 D.L.R. (3d) 576n (C.A.). Effect should be given to this intent. It is not necessary for me to decide what effect the amendment would have in the event of a "redevelopment" and I expressly refrain from doing so.

Hence the court must decide whether the changes made by the plaintiff were a development as defined in the amendment. For our purposes, the question can be put as follows: Was the change "the making of an addition or alteration to a building or structure that has the effect of substantially increasing the size or usability thereof "? Here, there was no addition, there was no increase in size; the total area remained the same. We are left then to consider if the change was an alteration to the building or structure that has the effect of substantially increasing the usability thereof.

I have consulted three dictionaries for the meaning of "usability". None defined that term but they refer the reader to the term "use". In the Shorter Oxford English Dictionary on Historical Principles, 3rd ed., at p. 2441, under the word "use", the first definition reads as follows: "I. Act of using or fact of being used. 1. The act of using a thing for any (esp. a profitable) purpose; the fact, state, or condition of being so used". Paragraph 2 deals with the habit of using, the third one with the manner of using, and the fourth paragraph deals with the purpose served, and under that particular subheading there are the following definitions:

> 1. A purpose, object, or end, esp. of a useful or advantageous nature. 2. The fact or quality of serving the needs or ends of a person or persons. 3. Law. The advantage of a specified person or persons in respect of profit or benefit from lands, etc. ... 5. The character, property, or quality which makes a thing useful or suitable for some purpose; utility; advantage, benefit.

Black's Law Dictionary, 4th ed., at p. 1710, defines "use" as follows: "Act of employing everything, or state of being employed; application; employment, as the use of a pen, or his machines are in use. Also the fact of being used or employed habitually."

Further down: "The purpose served, a purpose, object or end for useful or advantageous nature."

Butterworth's Words and Phrases, 2nd ed., makes reference to three cases at p. 266: "The first meaning assigned to the word 'use' in Johnson's Dictionary is 'to employ to any purpose'; it is, therefore, a word of wide significance." That same definition is approved of in another case recited therein where it says: "The word 'use' in its natural meaning is a word of wide import ... " and that case adopts that same definition. And, finally, from a third case: " 'Use' is not a word of precise meaning, but in general it conveys the idea of enjoyment derived by the user from the corpus of the object enjoyed."

In order to apply these definitions, I have to deal with the benefits that the plaintiff obtained from the change or alterations. Whereas he formerly had office space which he was not able to rent, despite his best efforts, he then renovated the second floor into eight apartment units which he was able to rent immediately. He thereby obtained an immediate benefit or advantage from these alterations and in my mind comes within the wording of the definition in that it was an alteration that had the effect of increasing the usability thereof. I find comfort in attributing that meaning from the wording of the amendment itself and the obvious intention of the amendment to include changes to a building or structure which, without changing the size of it, would obtain some benefit to the person making the changes by reason of the increased usability of the building itself. That being so, then the question that remains for the Court is whether or not the increase of the usability was substantial.

Those same dictionaries define the word "substantially". In the Shorter Oxford English Dictionary on Historical Principles, at p. 2172, under the heading "substantial", the following appears (and I omit irrelevant passages):

> A. 1. That is, or exists as, a substance, having a real existence ... 4. That is, constitutes, or involves an essential part, point, or feature; 5. Of food, a meal: Affording ample or abundant nourishment. 6. Of structures, etc: Of solid material or workmanship. 7. Of ample or considerable amount, quantity or dimensions ... 9. Of acts, measures, etc: Having weight, force and effect; 10. Possessing "substance", property, or wealth; 11. Of real worth, reliability, or repute ... 13. Having substance, not imaginary, unreal, or apparent only;

In Black's Law Dictionary, at p. 1597, there appears under the word "substantial":

> Of real worth and importance; of considerable value; valuable. Belonging to substance; actually existing; real, not seeming or imaginary; not illusive; solid; true; veritable. Something worth while as distinguishable from something without value or merely nominal. Synonymous with material.

And, finally, in Butterworth's Words and Phrases, there are several pages dealing with "substantial" which I quote, in part, from p. 141:

> What does "substantial" mean? It is plain that the phrase requires a comparison with the whole rent, and the whole rent means the entire contractual rent payable by the tenant in return for the occupation of the premises together with all the other covenants of the landlord. "Substantial" in this connection is not the same as "not unsubstantial", i.e. just enough to avoid the "de minimus" principle. One of the primary meanings of the word is equivalent to considerable, solid, or big. It is in this sense that we speak of a substantial fortune, a substantial meal, a substantial man, a substantial argument or ground of defence. Applying the word in this sense, it must be left to the discretion of the judge of fact to decide as best he can according to the circumstances in each case, the onus being on the landlord.

It would appear, therefore, that the word "substantial" admits of various meanings, depending in which context it is employed. Obviously, in order to give the word its proper legal interpretation, one has to look at the entire phrase: "an alteration to a building or structure that has the effect of substantially increasing the usability thereof ".

I have come to the conclusion that the changes did substantially increase the usability of the property. It cannot be said that the changes were minimal: They had the immediate effect of adding eight further residential units which constitutes an increase of 10% in residential units that the owner was then renting. Economically, the new units will provide a substantially larger revenue both by reason of the better utilization of the space itself, as well as by reason of the existence of eight individual rental units, as opposed to the potential use of one office area before. Such a change is also more in tune with the rest of the building and with modern design of apartment buildings which frequently have the first floor for commercial use and the remaining ones for residential use. In addition, one cannot help but note that the provisions of the Planning Act were intended to control subdivisions of land and their zoning. More particularly, s. 41 was designed specifically in mind to allow a municipality to obtain land for park purposes (or the equivalent thereof) in the event of new residential subdivisions. Such is the case here; there will be eight new family units residing in this area.

For these reasons, I find that the city was justified in exacting the levy, the plaintiff is not entitled to reimbursement of the sum so paid, and the action will therefore be dismissed.

I have given close consideration to the three cases relied on by the plaintiff, and as well, relied upon by the defendant, cited by me earlier, and all involving the City of Ottawa. While those cases are of substantial assistance to me in placing the subject-matter of this trial in its proper perspective, none the less because of the amendment to the

definition of "development", they do not immediately assist the court in arriving at its conclusion.

It may at first blush be unfair that the owner be required to pay this levy, notwithstanding that the former owner may have also paid it at the outset, and that, further, the basis for the calculation of the payment is the same in both cases. I agree; however, this is an anomaly in the law which was obviously intended by the legislator and the court cannot derogate from such a clear intention.

[Submissions heard on costs]

THE COURT: As I have already pointed out to Mr. DesRoches, the matter of any costs on the proceedings for interpretation are not before me; I do not have to deal with them and I do not take that into consideration. As pointed out by counsel for the plaintiff, this is a new point that arises by reason of the extension of the definition of "development". There were no previous cases.

I must say that the court reluctantly came to the conclusion which it did; my sympathy was with the plaintiff. Had the definition section been without the amendment, I would probably

have given judgment in his favour, however, the amendment was, in my mind, conclusive of the matter.

Also, even if the court has found that these alterations were substantial, none the less having regard to the entire cost, namely, $50,000, having regard to the fact that the levy is based on the total square footage of the land, whereas the alterations were mainly to the second floor of a 12-storey building, I think the ends of justice are best served by not allowing any costs on this matter. Each party will pay its own costs.

I have endorsed the action: "Action dismissed. No costs to either party."

Judgment for defendant.

Erin Dancer Holding Corp. v. Richmond Hill
(Town)

Between
Erin Dancer Holding Corporation, applicant, and
The Corporation of the Town of Richmond Hill, respondent

[1996] O.J. No. 5118
Doc. 35682/95

Ontario Court of Justice (General Division)
Divisional Court
McRae, Howden and MacPherson JJ.
Heard: March 18, 1996.
Judgment: March 22, 1996.

Counsel:
L. Naijar, for the appellant.
K. Jaffary, for the respondent.

Reasons for judgment were delivered by McRae J., concurred in by Howden J. Separate reasons were delivered by

MacPherson J.

[para1] McRAE J.:-- I am of the view that the application should succeed.

[para2] The by-law for the Town of Richmond Hill provided for a refund of excessive building permit fees if three conditions are fulfilled.

[para3] If the applicant disagrees with the prescribed value of the work, the applicant must pay the prescribed fee, complete the work, and submit to the chief building inspector an audited statement detailing the costs of all component parts of the work if the actual cost is found to be less than the prescribed value. On following this procedure the by-law entitled the applicant to consideration by the Town's Chief Building Official within the terms of the by-law and, if that official is satisfied that the submission covers all parts of the work, to a refund in accordance with it.

[para4] The applicants have attempted to fully comply with the by-law. Despite repeal by the Town of this provision shortly after receipt of the first set of applications for the completed subdivisions, the applicants had a vested right to consideration by the Building Official of the Town of their applications within the terms of the by-law, and to a refund if he is satisfied that the statements comply. His discretion is not to be exercised arbitrarily or on irrelevant factors. Falconbridge Nickel Mines Limited v. Ontario (Minister of Revenue) (1981), 121 D.L.R. (3d) 403 at p. 411.

[para5] The following statement was cited by the Court of Appeal with approval in Falconbridge at p. 410 and applies to this case (from Director of Public Works v. Sang, [1961] 2 All E.R. 721, by Lord Morris of Borth-y-Gest):

> It may be ... that, under some repealed enactment, a right has been given but that, in respect of it, some investigation or legal proceeding is necessary. The right is then unaffected and preserved. It will be preserved even if a process of quantification is necessary. But there is a manifest distinction between an investigation in respect of a right and an investigation which is to decide whether some right should or should not be given. On a repeal, the former is preserved by the Interpretation Act. The latter is not.

[para6] And the Court of Appeal stated at p. 418, again I find with direct application to this case:

> A right is no less a right recognized by the law solely because all of the steps necessary to be taken before it can be acted upon may not yet have been taken. In this case the right to claim a refund came into being once the overpayment of tax had been made. At that time there was

> no restriction in the law on the time within which the claim could be advanced ...

[para7] I see no difference in principal between the repeal of the refund provision in this case after fees were paid, work was completed and applications for refunds began, and the case of enactment of a limitation period which could not be complied with in Falconbridge.

[para8] This By-law was not retrospective nor could it have been. It did not extinguish the applicants' vested rights. The rescinding by-law did not state, in clear and precise words, that it was retrospective and in any event the Town does not have jurisdiction to cancel vested rights. Interpretation Act, R.S.O. 1990, ch. I. 11 Rogers, Law of Canadian Municipal Corporations (2nd Ed.), pp. 488.16-.20.

[para9] There is no merit in the Town's much belated argument that the onus was on the applicant to somehow articulate its disagreement with the prescribed value at the time the fees were paid. Nothing in the by-law suggests that this is the case. The Town, by virtue of the by-law, has always known it was in jeopardy of being required to remit excess fees "if the actual cost of the work is found to be less than the prescribed value."

[para10] The By-law section reads:

> (1) The Chief Official shall determine the prescribed value of the work proposed and the applicant shall pay the fees based on such prescribed value in accordance with Schedule "A" and no permit shall be issued until the fees therefore have been paid in full.
>
> (2) If the applicant disagrees with such prescribed value, the prescribed fees shall be paid and upon completion of the work if the actual cost of the work is found to be less than the prescribed value determined by the Chief Official, an audited statement may be submitted detailing the costs of all component parts of the work. Where the Chief Official is satisfied that the statement contains the cost of all component parts of the work upon which the prescribed value is required to be based, the fees shall be adjusted in accordance with this statement and a refund, if required, shall be paid.

[para11] The refund provisions provide a detailed scheme for applying for and obtaining a refund. It anticipates that only "upon the completion of the work if the actual cost of the work is found to be less than the prescribed value" (my emphasis), an audited statement may be submitted and if the Chief Building Official is satisfied with its completeness, a refund "shall be paid" in accordance therewith.

[para12] The scheme does not require that there be notice of disagreement at the time the permit fees are paid. The scheme instead sets out steps to be taken, all in the future. As well, it contains no limitation period as the Town had attempted to suggest; in fact, it assumes some delay as the audited costs could not be known until after the subdivision construction was completed which took several years.

[para13] It is submitted for the Town that it was entitled to notice of disagreement at the time of payment and that because of not knowing of the disagreement from the start, it loses the ability to monitor costs as the work proceeds. Apart from the lack of any requirement for a contemporaneous notice of disagreement in the by-law passed by the Town as I have noted, the evidence establishes that there was no system in the building department to receive a notice of disagreement - no form to be filled in and no practice to be followed. The evidence also establishes that the Town would be unable to monitor the cost of an individual building as it was being constructed. They simply lacked the resources. This submission also ignores the fact that costs could not be known in any event until completion of the work, something the Town's by-law specifically allowed for.

[para14] The Town implicitly acknowledged this by the letter of September 25, 1990 to the Green Park consortium from

David Potter, now Chief Building Official for the Town. He acknowledged that construction costs had turned downward and that "our by-law does allow for adjustments provided an audited statement is verified following construction of a dwelling". The letter also is proof of the fact that the Town, at least on September 7, 1990, became aware that construction costs had dropped significantly.

[para15] In view of this letter and all of the attempts by the Town since then to avoid liability including some which it no longer argues, it is clear to me that the Town is simply trying by all means to avoid its clear duty to honour its obligations to the applicants.

[para16] The Town's argument that the audited statements are inadequate is another belated attempt to obstruct the applicants. In my view the only solution to this issue in fairness to both parties is to direct a new review of the audited statements by the Town's Building Official, this time on proper principles free of what I find to be uncalled for, irrelevant and improper factors not in the by-law's refund procedure or requirements.

[para17] The applicants have attempted in good faith to comply with the requirement for audited statements - the Town has simply obstructed and delayed its efforts to obtain whatever its legitimate refunds may properly be found to be, if any.

[para18] Therefore, judgment should issue in the following terms:

A. an order quashing the decision of the Chief Building Official;

B. a declaration that the applications are not precluded from consideration or affected by By-law 102-92 which purported to repeal the refund provision;

C. a declaration that the applications for refunds comply with all requirements of the Town's by-laws 13-81, 25-82, 67-85, 201-88 and 363-90, save and except the acceptability on accounting principles and coverage of the work in the audited statements, the satisfaction for which is for the Chief Building Official to determine, based on a building by building cost, and

D. an order in the nature of mandamus that the Chief Building Official reconsider, on proper principles and in accordance with the provisions of the by-law effective at the time the fees were paid, the applications for refunds and to provide written reasons for his decision.

E. The question of costs is reserved to be decided on receipt of written argument.

[para19] Counsel for the applicant should have his argument in and circulated by Monday, April 1, 1996. Counsel for the Respondent will be given until April 8, 1996 to reply.

McRAE J.
HOWDEN J. -- I concur.

[para20] MacPHERSON J. (dissenting):-- This is an application for judicial review of the decision of the Chief Building Official of the Town of Richmond Hill. It began as an application to compel the Chief Building Official to consider the applicants' request for building fee refunds and to provide written reasons for his decision. The Chief Building Official has done this, so the application proceeds on a second track, namely an attempt to set aside his decision and compel him to reconsider the applicants' request on proper legal principles.

[para21] The crucial provisions at the heart of this application are ss. 7(1) and 7(2) of by-law 201-88 of the Corporation of the Town of Richmond Hill (later repealed) which provide:

7. FEES

(1) The Chief Official shall determine the prescribed value of the work proposed and the applicant shall pay the fees based on such prescribed value in accordance with Schedule "A" and no permit shall be issued until the fees therefore have been paid in full.

(2) If the applicant disagrees with such prescribed value, the prescribed fees shall be paid and upon completion of the work if the actual cost of the work is found to be less than the prescribed value determined by the Chief Official, an audited statement may be submitted detailing the costs of all component parts of the work. Where the Chief Official is satisfied that the statement contains the cost of all component parts of the work upon which the prescribed value is required to be based, the fees shall be adjusted in accordance with this statement and a refund, if required, shall be paid.

[para22] The applicants have submitted requests for refunds pursuant to s. 7(2). These requests were made long after, sometimes years after, the fees were paid. The applicants did not challenge the quantum of the fees at the time they paid them. They decided to do this later on the ground that their actual costs of construction were less than the prescribed value of the work which formed the basis for the fees they had paid.

[para23] The Chief Building Official has rejected the applicants' submission on several bases.

[para24] First, he says that the applicants must disagree with his determination of the prescribed value of the work before they obtain their building permits. The applicants did not indicate such disagreement; indeed they raised their objections only after construction was completed.

[para25] I agree with the Chief Building Official's interpretation for three reasons. First, and most importantly, it is consistent with the wording of ss. 7(1) and 7(2) which links disagreement with payment of the fees under protest. Section 7(1) authorizes the Chief Building Official to determine the prescribed value of the work. Then s. 7(2) says that "if" the applicant disagrees with this prescribed value he should nevertheless pay the fees and then later "if" the actual cost of the work is less than the prescribed value he can seek a refund for some of the fees paid by providing appropriate documentation. In my view, there is a chronology in ss. 7(1) and 7(2). Read together, and paying particular attention to the word "if" in two places in s. 7(2), the chronology is this:

Step 1 - Chief Building Official determines prescribed value of work;

Step 2 - builder disagrees with this determination;

Step 3 - builder pays fees anyway;

Step 4 - builder proceeds with construction; it keeps

records;

Step 5 - builder requests a refund if actual construction costs are lower than prescribed value of work.

[para26] Second, the Chief Building Officer's interpretation makes sense because it puts the Town on notice that a builder disagrees with the fees it is paying. This permits the Town to monitor construction in the full knowledge that a claim for a refund may be forthcoming.

[para27] Third, this interpretation also makes sense because it forces both the Town and the builder to address the issue of fees in a year when the fees are part of the Town's revenue. If the builder could disagree about a fee years later, there would potentially be large problems of evidence (on both sides). Such an interpretation is not required by the wording of s. 7(2); indeed as I suggested above, an

interpretation linking disagreement with the payment of the fee is a coherent and permissible interpretation.

[para28] For these reasons, I agree with the Chief Building Official's decision that the applicants cannot advance a claim for refund because they did not signal their disagreement with the prescribed value of the work when they paid their fees.

[para29] A second basis on which the Chief Building Officer rejected the applicants' claims for refunds was his conclusion that the information provided by the applicants was insufficient to support their claims. He deals with this aspect of the claim in considerable detail at pp. 5-11 of his decision.

[para30] I note that s. 7(2) says that the fees should be adjusted "where the Chief Official is satisfied" that the information presented by the builder contains the costs of all component parts of the construction work. I do not believe that a court should interfere lightly with the determination by a senior and experienced government official on a complex question relating to the adequacy of financial statements tendered to support a claim for a refund. Moreover, a court should be especially reluctant to interfere with an official's decision when the legal standard for that decision is the subjective one of his satisfaction.

[para31] In any case, there is, in my view, more than enough evidence on the record to justify the Chief Building Officer's decision. Without repeating in detail the factors analyzed at pp. 5-11 of that decision, I would highlight the following:

1. Even the applicants concede that the financial statements they filed originally were completely inadequate. Since then, they have engaged in a long process of trying to patch together more and better financial material to support their claims.

2. Two of the six applicants did not even make a claim until February, 1995. This was years after construction was completed. This is, in my view, a ridiculously long time to wait to make a substantial claim on public funds. It puts the Town in a very difficult position with respect to verification of construction costs and trying to find funds for refunds.

3. Even in oral argument, counsel for the applicants admitted that there are still errors in the applicants' financial statements.

4. The Chief Building Officer's conclusion that the audited statements in support of a claim must be on a lot-by-lot basis, rather than subdivision-by-subdivision basis, in order for him to be able to determine that the applicant has, pursuant to s. 7(2), "detail[ed] the costs of all component parts of the work" is, in my view, an entirely reasonable conclusion. In any case, it is precisely this type of administrative decision that should not be lightly interfered with by courts performing a judicial review function.

5. The Chief Building Officer's careful analysis of the omissions and discrepancies in the financial statements filed by the applicants is, in my view, persuasive.

[para32] For these reasons, I do not think that the decision of the Chief Building Official that he was not satisfied that the financial statements provided by the applicants were sufficient to justify refunds should be overturned.

[para33] In summary, I believe that the Chief Building Official's decision was correct on both of the main points he considered.

[para34] For the sake of completeness, on the vested

rights/retrospectivity issue, I agree with the reasoning and conclusion of my colleagues. The Chief Building Officer erred on this issue. However, since he was correct in his analysis on the two issues I considered above, it follows that, in my view, his overall decision was correct. Hence, unlike my colleagues, I would dismiss the application.

MacPHERSON J.

HEARD: May 11, 1998

E N D O R S E M E N T

[1] The appellant ("the Town") appeals from a decision of the Divisional Court requiring the Chief Building Official to reconsider certain applications for partial refunds of building permit fees paid by the respondent developers and builders ("the builders").

[2] The issues raised on this appeal involve the interpretation of s.7 of By-Law 201 Section 7 states:

(1) The Chief Official shall determine the prescribed value of the work proposed and the applicant shall pay the fees based on such prescribed value in accordance with Schedule"A", and no permit shall be issued until the fees therefore have been paid in full.

(2) If the applicant disagrees with such prescribed value, the prescribed fees shall be paid and, upon completion of the work, if the actual cost of the work is found to be less than the prescribed value determined by the Chief Official, an audited statement may be submitted detailing the costs of all component parts of the work. Where the Chief Official is satisfied that the statement contains the cost of all component parts of the work upon which the prescribed value is required to be based, the fees shall be adjusted in accordance with this statement and a refund, if required, shall be paid.

[3] The term "prescribed value" is defined in s. 2(1) (g) as:

Prescribed value means, as determined by the Chief official, the value of construction of a proposed building including the total value of all work, services and materials in respect of its construction and of all professional and related services.

[4] The by-law does not explicitly state that notice of a disagreement must be communicated to the Town at the time that the fees are paid. The majority of the Divisional Court held that, as a result, there is no requirement that the applicant articulate its disagreement with the prescribed value at the time the fees were paid. McPherson J., in dissent, was of the opinion that the by-law implicitly required the applicants to indicate their disagreement prior to payment of the fees. His opinion was based in part on the wording of the section which says, "if" the applicant disagrees, the prescribed fee should be paid nevertheless. The use of the word "if" implies that some indication of disagreement must be given before the fees are paid. The

approach of requiring notice of a disagreement was, in McPherson J.'s opinion, in accord with the chronology set forth in the section, namely: (1) a determination by the Chief Building Official of the value of the work; (2) disagreeent by the builder with this determination; (3) payment by the builder of the fee in any event; (4) construction of the work; and (5) request by the builder of a refund if actual construction costs are lower than the prescribed value of the work. McPherson J. also held that the Town's position of prior notice of disagreement by the builder before payment of the fee made sense because it would enable the Town to monitor construction in the knowledge that a claim for a refund could be made and also because it enabled the Town to consider the impact of a refund on its revenue.

[5] We agree with McPherson J.'s interpretation and conclusion respecting s.7 of the by-law. The majority of the Divisional Court would read ss.7(2) of the by-law to permit a builder to apply for a refund simply on the basis that the actual cost of the work has proven to be less than the prescribed value. This approach ignores the phrase, "if the applicant disagrees with such prescribed value," in the opening words of ss. 7(2). The definition of prescribed value refers to the value of construction of a "proposed building" and not a completed building. When ss. 7(2) is read with the definition of prescribed value, the subsection indicates that if the applicant disagrees with the "value of construction of a proposed building," the prescribed fees must be paid in any event. The word disagreement requires of the builder a positive course of action in relation to a proposed building and not a completed building. Silence is not consistent with disagreement. A silent difference of opinion which is not expressed is not a disagreement. Absent expression of disagreement, there is an implied acceptance of the Building Inspector's fee. Such an interpretation of the by-law is not only a rational way of reading the by-law, it is consistent with the notion of estoppel by conduct.

[6] It is clear that, in interpreting legislation, the consequences of a proposed interpretation may be taken into account. The interpretation of the majority of the Divisional Court would expose the Town to contingent liability for an unlimited period of time for every fee paid. Given the absence of a limitation period from ss.7(2), this interpretation creates a result which would produce an unacceptable consequence to the Town. The Town would not have intended this result. By contrast, the absence of a limitation period is of no moment if the by-law is interpreted in a manner which requires the builder to indicate its disagreement at the time the fee is paid.

[7] The requirement of notice of a disagreement also accords with a contextual interpretation of the by-law. There are three options available to an applicant for a building permit: (1) elect to accept the assessment; (2) challenge the valuation by resort to s.15(1) of the *Building Code Act*; or (3) record a disagreement under s.7(2) of the by-law. Under the Building Code, if a builder disagrees with the prescribed value of a building, there is an appeal process which must be triggered within a period of twenty days of the officer's determination of prescribed value. The appeal delays construction and is of no assistance if, at the end of the project, the actual costs are lower than the prescribed value. There is no opportunity to reserve rights and to go ahead with construction under the *Building Code Act.* Section 7(2) of the by-law in question provides an alternative procedure to an appeal under the *Building Code Act* by enabling a builder to object to the prescribed value and to reserve the right to a reassessment until the end of the project. The by-law is thus complementary legislation to the *Building Code Act* which solves the problem of enabling construction to proceed in a timely manner while still reserving rights to the builder. In order to avail itself of the benefit of the section, the builder is required to indicate his disagreement as to the prescribed value at that time. It is an alternative to the appeal process under that Act which puts in place a different mechanism.

[8] The majority of the Divisional Court erred in deciding that the builders were not required to advise the Town, at the time the building permits were issued, of a dispute or disagreement regarding the amount of building permit fees payable. Such communication was a condition precedent to preserving the right to a refund. None of the builders did this and consequently the Chief Official's decision that no partial refunds of building fees are payable, was correct, as was McPherson J.'s conclusion that the application for judicial review should be dismissed.

[9] As we have concluded that the builders were not entitled to apply for a refund under s.7(2), it follows that their cross-appeal challenging the Divisional Court's holding that lot-by-lot audited financial statements were

required under s.7(2) must be dismissed. We express no opinion on this question.

[10] We would allow the appeal and set aside the order of the Divisional Court with costs to the appellant.

Famous Players Inc. v. Toronto (City)

Between
Famous Players Inc. and 730995 Ontario Inc., Applicants, and
Corporation of the City of Toronto and Michael L. Nixon,
Respondents

Ontario Judgments: [1987] O.J. No. 1699
Action No. M157628/87

Ontario District Court - York Judicial District
Toronto, Ontario
Hudson D.C.J.
December 9, 1987

J.D. Brownlie, Q.C., for the Applicants.
P. Gordon, for the Respondents.
R.J. Rolls, Q.C., for Cineplex Odeon Corporation.

HUDSON D.C.J.:-- Cineplex Odeon Corporation, hereinafter referred to as "Cineplex", is the owner of the northerly portion of a building, and Famous Players Inc., hereinafter referred to as "Famous Players", is the owner of the southerly portion of the same building. The entire building was formerly operated as the Imperial Six Thea-tre and is located on the west side of Victoria Street between Dundas Square and Shuter Street in the City of Toronto.

On or about November 20th, 1987, Michael L. Nixon, chief official, Toronto, hereinafter referred to as "Nixon", issued a building permit to Cineplex. Cineplex has worked industriously pursuant to the building permit to prepare the building for its official opening as the Pantages Theatre on December 10th, 1987.

On December 4th, 1987, Famous Players commenced an application pursuant to s. 15(1) of the Building Code Act, R.S.O. 1980, Chapter 51, hereinafter referred to as "the Act", to rescind the aforesaid building permit. The grounds are that the building permit should not have been issued because the Cineplex plans did not comply with the Ontario Building Code. This application is returnable December 18th, 1987. It should be observed that this is eight days after the planned official opening of the Pantages Theatre.

Counsel for Cineplex were advised on December 8th, 1987, by the Legal Department of the City of Toronto to cease all work immediately. This advice was given because it is the City's understanding that the application of Famous Players under s. 15(1) of the Act operated as an automatic stay of the building permit. Counsel for Cineplex were also advised that if they wished to proceed with the construction, then they should bring a motion under s. 15(6) of the Act for an order that the building permit not be stayed.

Counsel for Cineplex moved with lightning speed. The motion under s. 15(6) of the Act was argued before me today, December 9th, 1987.

Section 15(1) of the Act reads:

> 15(1) Any person who considers himself aggrieved by an order given or decision made by an inspector or chief official under this Act or the regulations may, within twenty days after the order or decision is made, apply to the judge of the county or district court for a hearing and appeal."

As previously stated, Famous Players is the owner of the southerly portion of the building, and Cineplex is the owner of the northerly portion of the same building. The premises owned by the two parties adjoin each other. In my opinion, Famous Players has status to commence an application as an aggrieved party under s. 15(1) of the Act.

There is no complaint that they were out of time or that there was any other irregularity.

In my opinion, the building permit was issued pursuant to a decision or order of an inspector or chief official.

Does such an application operate as an automatic stay of the decision to issue a building permit? Counsel have given me the benefit of their thoughtful and careful submissions. Obviously, I must give my decision today. Unfortunately, time does not permit me to do justice to the very helpful arguments of counsel.

Section 15(6) of the Act reads:

> 15(6) The judge may, upon application therefor which may be made ex parte, order that the order or decision appealed from be not stayed pending the outcome of the appeal but shall take effect immediately where, in his opinion, such action is necessary in the interest of Public safety and would not destroy the subject-matter of the appeal."

Although the section provides that the application "Under s. 15(6) may be made ex parte, in my opinion, it was not only proper but necessary that counsel for Cineplex advise counsel for Famous Players of this motion, and such was done. Counsel for Famous Players was in attendance today.

Section 15(6) of the Act only makes sense if the drafters of the legislation proceeded on the understanding that an appeal or application under s. 15(1) operated as an automatic stay of the decision to issue a building permit.

Section 25(1) of the Statutory Powers Procedures Act:

> 25(1) Unless it is expressly provided to the contrary in the Act under which the proceedings arise, an appeal from a decision of a tribunal to a court or other appellate tribunal operates as a stay in the matter except where the tribunal or the court or other body to which the appeal is taken otherwise orders."

Tribunal is defined in s. 1(1)(e) of the same Act. Tribunal means one or more persons, whether or not incorporated and however described, upon which a statutory power of decision is conferred by or under a statute. Therefore, in my opinion, Nixon, acting in his official capacity, is included within the definition of a tribunal.

Therefore, in my opinion, the decision to issue the building permit is automatically stayed by virtue of s. 25(1) of the Statutory Powers Procedure Act.

If I am correct that there is an automatic stay, then should I order the decision to be not stayed pending the outcome of the appeal or application commenced by Famous Players, which application is to be argued December 18th, 1987?

I am advised by counsel for Nixon that the building permit was issued in compliance with the Ontario Building Code and that the construction by Cineplex has proceeded in compliance with the building permit.

I am advised by counsel for Cineplex that:

> (a) Cineplex has completed all of the construction referred to in tbe Notice of Application of Famous Players;
>
> (b) that the Pantages Theatre cannot be opened to the public without a permit issued by the office of the appropriate fire inspection authorities;
>
> (c) that Cineplex has spent hundreds of thousands of dollars doing its construction and advertising and promoting its official opening tomorrow;
>
> (d) that the most profitable time to open a new theatre is during the Christmas season.

I am satisfied that there is no danger to the public if I order that the building permit be not stayed because

(a) the construction has proceeded in compliance with the building permit which was issued in compliance with the Building Code;

(b) the Pantages Theatre cannot be opened to the public without a permit issued by, the office of the appropriate fire inspection authorities.

I am also satisfied that Cineplex will suffer substantial pecuniary loss that will be difficult or impossible to calculate if it is not able to open the Pantages Theatre tomorrow as planned.

In my opinion, the damages suffered by Famous Players as a result of the Pantages Theatre opening tomorrow can be fairly readily calculated if Famous Players is successful upon its application December 18th, 1987.

Therefore, the overwhelming balance of convenience is to order that the building permit be not stayed; however, I must pay attention to the wording of s. 15(6) of the Act.

It is not necessary in the interest of public safety that the building permit be not stayed. On the other hand, it is not contrary to the interest of public safety that the building permit be not stayed. In my opinion, the section should not be narrowly and restrictively interpreted so as to unreasonably limit my discretion in a situation where the overwhelming balance of convenience is in favour of the exercise of such discretion.

Clearly, referring to the last few words of s. 15(6) of the Act, the subject-matter of the Famous Players' application for appeal will not be destroyed if I exercise my discretion. In the result, therefore, I have decided that the building permit should not be stayed.

Corporation of the Town of **Flamborough v.436291 Ontario** Ltd. and Hughes

2 O.R. (3d) 31

ONTARIO
District Court of Ontario
McTurk D.C.J.
September 6, 1990

ACTION for a declaratory judgment and injunctions pursuant to s. 45 of the Planning Act, 1983.

Brent J. Foreman, for plaintiff.

David J. Sherman, for 436291 Ontario Limited, defendant.

S. Vasan, for Edward Hughes, defendant.

MCTURK D.C.J.:-- At the opening of the trial on May 14, 1990, on consent, the action was dismissed against the defendant Hughes, costs related thereto to be dealt with at the end of the trial. The evidence at the trial continued on May 14, 15 and 16 and at the conclusion of the evidence written submissions were ordered; such submissions to have been delivered as follows: by the plaintiff, June 8, 1990; by the defendant, June 22, 1990 and reply by the plaintiff, if any, June 29, 1990.

Before the commencement of the evidence there was an application by Mr. Sherman on behalf of the defendant, 436291 Ontario Limited, that the action be stayed until some or all of the occupants of the various units on the land owned by the numbered company were notified. Such application was refused.

It was admitted at the outset that the real property in question consisted of approximately 75 acres being part of Lot Four in the eleventh concession of the Township of Flamborough which was owned by the defendant corporation since 1981.

Exhibits 1(a) to (d) inclusive were four aerial photos taken of the subject property in September of 1983. Exhibits 2(a) to (e) were five aerial photos taken of the same property in April of 1987.

In this action the plaintiff alleges that the defendant corporation is operating a mobile home park on part or all of its property contrary to s. 45 of the Planning Act, 1983, S.O. 1983, c. 1 as amended. The plaintiff seeks a declaratory judgment that the defendant's property is subject to the provisions of s. 45 of the said Act and further claims an injunction restraining the defendant from locating or causing to be located or used, a mobile home or homes on the subject property, contrary to the Act and further claims a mandatory injunction requiring the defendant to remove or cause to be removed any and all mobile homes located on the subject property. Section 45(2) of the Planning Act, 1983 provides as follows:

> (2) Unless otherwise authorized by a by-law in force under section 34 ... no person shall erect or locate or use or cause to be erected, located or used, a mobile home except on a parcel of land as defined in clause (1)(b) of this section, and in no case except as otherwise so authorized shall any person erect, locate or use or cause to be erected, located or used more than one mobile home on any such parcel of land.

(The parties hereto are agreed that references in s. 45(2) to orders of the Minister or to permits issued under the Public Lands Act, R.S.O. 1980, c. 413, are not relevant to this proceeding.)

Section 45(3) provides an exception to s. 45(2) insofar as it exempts the continued use in the same location of any mobile home that:

(a) was erected or located and in use prior to the 1st day of June, 1977; or

(b) was erected or located in accordance with a building permit issued prior to the 1st day of June, 1977.

The position of the defendant is as follows:

1. that the plaintiff has failed to establish that the various units on the property are mobile homes as defined by the

Planning Act, 1983;

2. in the alternative, if those units are mobile homes, the plaintiff has failed to establish that the defendant caused the erection or location of the said homes on the defendant's property;

3. in the further alternative, that the plaintiff has failed to establish that such units were not located as otherwise authorized by s. 34 [am. S.O. 1989, c. 5, s. 14] of the Planning Act, 1983 or;

4. in the further alternative, that the plaintiff has failed to establish that the units were not used continuously in the same location having been erected or located in accordance with a building permit issued prior to June 1, 1977;

5. the defendant further submits that the relief of a mandatory injunction should not be granted in the absence of notice to each and every unit owner, giving that owner the right to take part in the proceedings.

It is clear on the evidence and I find that the defendant corporation has been the owner of the subject property since early 1981. The evidence of Cindy Willis, president of the defendant company, indicates that the company has been operating a park on the property since 1981; that they charge fees for sites rented to unit home-owners or to people who wish to use the property for the recreational facilities that are available. The rates charged for the units include monthly and seasonal rates and indicate that there are many of the units that are there for extended periods of time (Exhibit 15 indicates a list of some 22 tenants who have lived on the property for ten months or more. Many of the unit sites are serviced with hydro, septic and water connections; that many of the larger units brought on the property are directed to a specific site on which the unit is to be located; that many of the larger units are in excess of 50 feet in length and required to be set up by a crew. Some units have additional facilities attached to them when set up such as bump-out additions to the units, fences, TV masts, steel chimneys, some hydro meters attached to the structures, some underground hydro service, some have small verandahs and wood stairs providing access to the units.

The main issue to be decided is whether the defendant is using the lands herein for the operation of a mobile home park contrary to the Planning Act, 1983. Section 45(2) of the Planning Act, 1983 provides as follows:

> (2) Unless otherwise authorized by a by-law in force under section 34 ... no person shall erect or locate or use or cause to be erected, located or used, a mobile home except on a parcel of land as defined in clause (1)(b) of this section, and in no case except as otherwise so authorized shall any person erect, locate or use or cause to be erected, located or used more than one mobile home on any such parcel of land.

The evidence of Guy Paparella, director of planning for the plaintiff, whose uncontradicted evidence I accept, is that there is no by-law in force which authorizes the operation of a mobile home park on the subject property. I further find that the current zoning by-law of the township, By-law 75-65-EF-Z (Exhibit 6) designates the property as agricultural and limits the uses to which it can be put to the permitted uses described in s. 8.1, which I find did not authorize a mobile home park although it did, by para. 8.1(f), include the operation of a trailer or tourist park. The previous zoning by-law, No. 1341 (Exhibit 7), I find did not authorize the operation of a mobile home park on the subject property.

The by-law governing mobile homes, namely By-law 75-59-M (para. 1, part (a), s. 2) provides that no mobile home shall be located in the municipality except in an approved mobile home park or where permitted by by-law. I accept the evidence of Mr. Paparella that the subject park is not an approved mobile home park and that there have been no zoning amendments or zoning by-laws passed to permit the operation of a mobile home park on the subject property.

The first question to be decided then is whether any of the units located on the subject property as disclosed in the evidence are mobile homes.

Section 45(1) of the Planning Act, 1983 defines "mobile home" as follows:

> ... any dwelling that is designed to be made mobile, and constructed or manufactured to provide a permanent residence for one or more persons, but does not include a travel trailer or tent trailer or trailer otherwise designed.

It will be seen that the two elements to establish a mobile home are (1) that it is designed to be made mobile and (2) that it is constructed or manufactured to provide a permanent residence for one or more persons. The evidence of Miss Willis confirmed that many of the larger units are dwelling units which are mobile in the sense that they were manufactured elsewhere and brought onto the property by a truck and the unit set up on blocks or pillars, connected to the hydro, telephone and septic services by a crew.

In dealing with the second element, that is whether they were constructed or manufactured to provide a permanent residence for one or more persons but do not include travel trailers, tent trailers or trailers otherwise designed, one must consider whether these units come within the definition of a trailer.

The Municipal Act, R.S.O. 1980, c. 302 [s. 210 para. 95(a)] defines "trailer" as follows:

> ... any vehicle so constructed that it is suitable for being attached to a motor vehicle for the purpose of being drawn or propelled by the motor vehicle, and capable of being used for the living, sleeping or eating accommodation of persons, notwithstanding that such vehicle is jacked-up or that its running gear is removed.

Before a "mobile home" can be a "trailer" it must be found to be a vehicle. This matter was dealt with by the Supreme Court of Canada in Farr v. Moore (Township), [1978] 2 S.C.R. 504, 81 D.L.R. (3d) 755, 19 N.R. 341. I found the judgment of Mr. Justice Spence of considerable help and very appropriate to the matter before the court. At p. 508 S.C.R. of the judgment, Justice Spence says as follows:

> Before there can be any determination that the mobile home is a "trailer", the mobile home must be found to be a "vehicle". I am of the opinion that each particular apparatus purchased and installed by each of these appellants was not a "vehicle". It was not a means of conveyance, although it was provided with wheels, and it was not used for the carriage of persons or goods. The purpose of the apparatus, and it is quite apparent from the evidence, was that it should be hauled quite empty to a site and there placed on the site and used, not for the conveyance of persons or goods, but for the installation of goods, to wit, furniture and the residence of people. I am of the view that this determination would be sufficient to dispose of the appeal.

In arriving at this conclusion Mr. Justice Spence noted that in the Farr case the units had been brought onto the site by truck, wheels had been removed, units set on blocks or pillars and the units connected to hydro, telephone, water, septic services, provisions made for heating with oil tanks erected outside the units. Cindy Willis indicated in her evidence that some of the units were brought onto the site by truck and assembled there by a crew. While there was no evidence as to the inside facilities of the various units, there have been filed, as Exhibit 3 and Exhibit 4, photographs with information sheets attached as to the type of units located on the property. It has been said that a picture is worth a thousand words. While this may not always be the case, the photographs as shown in Exhibit 3 and Exhibit 4, together with the information sheets attached, clearly indicated and led one to no other conclusion than [that] many of the units shown are not vehicles. I find that many of the units depicted are intended to be hauled empty to a site, placed thereon; that such units were not conveyances for persons or goods but for the installation of furniture and to use as residences for people

on a more or less permanent basis, certainly over an extended period of time, and I find such units to be mobile homes. This

view is reinforced by the photographs which show that many of the units have fences around part of the property, TV masts installed, steel chimneys attached, hydro meters attached to the sides of the structures, some have steps leading up to the entrances; the size of many of the units exceeds that which would normally be applied to vehicles to permit them being moved along a highway without a special permit being obtained under the Highway Traffic Act, R.S.O. 1980, c. 198. Many of the units have bump-outs or structural additions added to the original unit themselves.

It has been put forward in argument that the court should make a finding with respect to each unit located on the property according to the evidence. I find that this is neither feasible nor necessary under the circumstances. I find that the defendant is carrying on the operation of a mobile home park on the property and without making an exhaustive finding with respect to each unit on the property on the basis of Exhibit 4, which contains some 62 photographs and information sheets of units located on the property, and without in any way finding this to be an exhaustive list, I would find that the following are mobile homes: Exhibit 4, scene 2; Exhibit 4, scene 3; Exhibit 4, scene 4; Exhibit 4, scene 5; Exhibit 4, scene 6; Exhibit 4, scene 7; Exhibit 4, scene 8; Exhibit 4, scene 10; Exhibit 4, scene 11; Exhibit 4, scene 12; Exhibit 4, scene 14; Exhibit 4, scene 15; Exhibit 4, scene 16; Exhibit 4, scene 17; Exhibit 4, scene 18; Exhibit 4, scene 19; Exhibit 4, scene 20; Exhibit 4, scene 21; Exhibit 4, scene 22; Exhibit 4, scene 23; Exhibit 4, scene 24; Exhibit 4, scene 25; Exhibit 4, scene 26; Exhibit 4, scene 27; Exhibit 4, scene 28; Exhibit 4, scene 29; Exhibit 4, scene 30; Exhibit 4, scene 31; Exhibit 4, scene 32; Exhibit 4, scene 33; Exhibit 4, scene 35; Exhibit 4, scene 36; Exhibit 4, scene 41; Exhibit 4, scene 53; Exhibit 4, scene 54; Exhibit 4, scene 61; Exhibit 4, scene 67.

Having found that the property in question has been used as a mobile home park, the next question to be determined is whether it is in breach of the Planning Act, 1983 in so doing.

Section 45 of the Planning Act, 1983 permits the location or use of mobile homes only under the following circumstances:

(a) where such mobile homes are authorized by by-law as referred to in s. 45(2) of the Planning Act, 1983 or

(b) where such mobile homes have been used continuously in the same location since prior to June 1977 or have been used continuously in the same location after having been erected or located in accordance with a building permit issued prior to June, 1977.

In dealing with the first exception, that is, that the mobile homes are authorized by by-law as referred to in s. 45(2) of the Planning Act, 1983, I find on the uncontradicted evidence of the witness Paparella, that there are no by-laws authorizing the operation of a mobile home park on the property.

With respect to the second exception that such homes have been used continuously since prior to 1977 or located thereon with a building permit issued prior to June 1, 1977, it is my view that the onus to show that the operation comes within that exception is upon the defendant on the balance of probabilities. No such evidence has been called and there is no evidence before the court which establishes that a mobile home was operating within such exception. In the event that it should be held that the onus is not upon the defendant to show that it comes within such exception, it is my view that there is still a duty upon the defendant to call evidence as to the situation which exists if it hopes to come within such exception. No such evidence was called. [See] Toronto (City) v. San Joaquin Investments Ltd. (1978), 18 O.R. (2d) 730, 83 D.L.R. (3d) 584, 5 M.P.L.R. 113 (H.C.J.) [affd (1979), 26 O.R. (2d) 775, 106 D.L.R. (3d) 546, 11 M.P.L.R. 83 (C.A.); leave to appeal to S.C.C. refused (1980), 26 O.R. (2d) 775n, 106 D.L.R. (3d) 546n, 32 N.R. 442n (S.C.C.)], at p. 739 O.R., where Steele J. stated as follows:

> There is an onus upon a defendant to prove that he has an exemption to a by-law which proof must go not only to the use of the lands at the time of the amendment to the by-law but also to its continued use until the time of the issuance of the writ.

In any event I agree with the submission of the plaintiff and

I find that the evidence discloses that many of the units found to be mobile homes had been brought onto the property subsequent to June 1, 1977.

There is no evidence to support the suggestion by counsel for the respondent that these units may have been brought onto the property by a building permit issued prior to June of 1977 and I discount that argument out of hand.

A further matter to be decided is: has the plaintiff established that the defendant corporation erected, located or used or caused to be erected, located or used, more than one mobile home on the parcel of land contrary to s. 45(2) of the Planning Act, 1983?

It seems clear on the evidence that the defendant did not erect, locate or use more than one mobile home on the lands in question but the issue is, as well: did the defendant cause such erection, location or use? The evidence of Cindy Willis, president of the defendant corporation, indicates that the company had been operating a park on the property since 1981. This operation included the charging of fees for sites rented to unit owners on a weekend, weekly, monthly or seasonal basis. The rates charged for the unit sites varied. A substantial number of long term tenants reside on the property. Many of the sites are serviced with hydro, septic [and] water connections. The defendant corporation has allowed a substantial number of larger units to be brought on the property since 1981 and in my view, a most important consideration is that, on bringing a unit onto the property, the occupant must first obtain permissions from the defendant company who advises the owner where to locate the unit and can require the owner to remove the unit on completion of the period of occupancy. These factors, I find, clearly indicate that the defendant corporation "caused" the location and use of the mobile homes on the lands in question. It is a reasonable inference to draw that from the evidence of Cindy Willis as well as from the exhibits filed, the owners, certainly of the larger units, were invited to install such homes as permanent residences. I reject the submission on behalf of the respondent that the respondent merely stood by and permitted the various owners to install their homes on the sites in question and I find that the actions of the defendant were positive acts and fall within the prohibition in s. 45(2) of the Planning Act, 1983.

The respondent submits that notwithstanding the fact that the plaintiff's current Zoning By-law 75-65-EF-Z (Exhibit 6) does not authorize the operation of a tourist or trailer camp on the property and that the previous Zoning By-law 1431 (Exhibit 7) did not authorize such an operation, nonetheless such an operation was ongoing and had been recognized by the plaintiff as being a legal non-conforming use. No evidence was led with respect to the operation at the time of the municipality's by-law. While the evidence discloses that there were some trailers which used the site from time to time, the evidence as to the exact nature of the use was vague and certainly, in my view, did not establish its use as a mobile home park. The use of the lands by the defendants or their predecessors has not been shown to be a pre-existing use which would become a non-conforming one by reason of a subsequent by-law prohibiting that use and, in my view, does not fall within the category of a legal non-conforming use. In addition the evidence discloses that there was a substantial increase in the area used and operated as a business by the respondents over the past few years and even if it could be said that the lands had been used as a trailer park, the extent of the increase of their use and the nature of their use and the type of units and facilities provided would raise a serious question as to whether or not it had changed the character of its original use.

Having found therefore, that the defendant corporation has been operating a mobile home park on the lands in question, contrary to s. 45 of the Planning Act, 1983, I hold that the plaintiff is entitled to a judgment declaring that the property is subject to s. 45 of the Planning Act, 1983; that the operation of a mobile home within the property in question is contrary to the Planning Act, 1983. The plaintiff is further entitled to an injunction restraining the defendant from locating, using or causing to be located or used, a mobile home or homes on the subject property, contrary to the Act.

It has been submitted that such relief should not be obtained since individual occupants would not have a right to be heard,

they not having been made parties to the action. In my view it would not be appropriate on this hearing to make an order with respect to individual units but to leave that matter to be determined between the defendant corporation and the various occupants since there may well be different circumstances and situations and agreements under which the occupancy has occurred. For instance, the Landlord and Tenant Act, R.S.O. 1980, c. 232, may apply to some, may not apply to others. Some units may be in for storage purposes or under a separate specialized agreement; the occupants may have other claims between themselves and the defendant which would be more appropriately dealt with at the same time. Therefore, the issues between the individual occupants and the defendant should not be dealt with on this application except as to state that the defendant must discontinue the operation of a mobile home park on the lands in question.

As indicated at the conclusion of the trial, counsel may arrange to speak to me on the question of costs together with counsel for Edward Hughes against whom the action was dismissed at the opening of the hearing.

Judgment for plaintiff accordingly.

Friends of Toronto Parkland v. Corp. of the City of Toronto and Nixon, Commissioner and Chief Building Official for Corp. of the City of Toronto

6 O.R. (3d) 196
[1991] O.J. No. 2205
Action No. 280/91

ONTARIO
Ontario Court (General Division), Divisional Court,
O'Driscoll, Hartt and O'Brien JJ.
December 12, 1991

APPEAL pursuant to s. 16 of the Building Code Act, from a judgment of the General Division dismissing an appeal under s. 16 of the Act.

Karl D. Jaffary, Q.C., for appellant.

D.B. Leibson, for respondents.

THE COURT:

I. The issue

In 1931, the House of Lords was asked to decide: "Who, then, in law is my neighbour?" (Donoghue (or McAlister) v. Stevenson, [1932] A.C. 562, [1932] All E.R. Rep. 1 (H.L.), at p. 580 A.C., p. 11 All E.R.).

In this case, the court is asked to decide: In law, who is any "person who considers himself aggrieved" as that term is used in s. 15(1) of the Building Code Act, R.S.O. 1980, c. 51 (formerly s. 14 of the Building Code Act, 1974, enacted S.O. 1974, c. 74) (the Act)?

Section 15(1) of the Act states:

15.(1) Any person who considers himself aggrieved by an order given or decision made by an inspector or chief official under this Act or the regulations may, within twenty days after the order or decision is made, apply to the judge of the county or district court for a hearing and appeal.

II. Nature of the proceedings

Under s. 15(1) of the Act, the appellant purported to appeal to the Ontario Court of Justice from the issuance, on March 8, 1991, of a building permit to the corporation of the city of Toronto by the respondent Nixon, chief building official for the corporation of the city of Toronto.

On April 10, 1991, after hearing a preliminary motion as to the appellant's standing, Hoilett J. held that the appellant was not a person who felt himself aggrieved within s. 15(1) of the Act; the appeal was dismissed. The appellant then launched this appeal under s. 16 of the Act.

III. The parties and their status

The material placed before the court by the respondents shows that Eglinton Park, located approximately one km. west of Yonge Street, Toronto, is a large district park serving the entire North Toronto area. It is operated and maintained by the City of Toronto's Department of Parks and Recreation.

Eglinton Park is 22.7 acres in area; it accommodates local and regional uses which attract a large number of organized amateur sports leagues (baseball, football, soccer, cricket and hockey); the park also has many casual users.

Within Eglinton Park is located: (a) a 45,000 square foot arena; (b) a surface parking lot for 144 cars; (c) playing fields and baseball diamonds.

Until demolition in March 1991, Eglinton Park contained a 156 foot outdoor swimming pool and deck as well as a small building known as the Memorial Gardens, a community centre with 20 surface parking spaces accessory to it. It is proposed that these facilities will be replaced by the North Toronto Community Centre which, with its amenities (including the

outdoor ice rink over the underground parking facility) will take up approximately the same area.

When completed, the City of Toronto will operate the new facilities through the Department of Parks and Recreation; it proposes a minimum charge for parking for park users of approximately 50/65[cents] per hour in the underground parking facility.

The material placed before the court by the appellants shows that the appellant is a non-profit Ontario corporation with its head office in Toronto. It has 63 supporting members who each pay $25. It has four voting members.

Members of the appellant corporation reside at various addresses within the City of Toronto, some near the Eglinton Park; apparently, one resides in a high-rise which abuts the park. The appellant is not a ratepayer; it has no financial or legal interest in the lands known as Eglinton Park.

If the construction of the parking facility proceeds, members of the appellant allege that they will be affected, but concede that the appellant, a non-profit corporation, will suffer no direct financial loss.

The appellant has expressed concerns that the trees removed will not be replanted, that green space will be lost, that green space adjacent to the facility will be affected, and that the introduction of cars and a roadway to the underground garage will impair the enjoyment of the park; will render the park unsafe; and will require users of the park to exercise great care both for themselves and their animals.

IV. Chronology

From October 1984 to January 1990, Toronto City Council studied the proposed construction of the North Toronto Community Centre. Preliminary planning, public meetings and consultation with citizen groups and committees took place during those years; parking, traffic, access, size, uses and noise were studied and analyzed.

In January 1990, Toronto City Council authorized the construction of the facility.

Part of the proposed approval was the construction of a 150-space underground parking garage for the users of Eglinton Park and its amenities -- the underground garage was to be part of the new community centre. The planning process revealed that because of present inadequate on-site parking facilities, residential streets close to the park were being used as an overflow parking lot when the park was busy.

In March 1990, the City of Toronto applied to the Ontario Municipal Board (OMB) for approval of the design, construction and financing under s. 64 of the Ontario Municipal Board Act, R.S.O. 1980, c. 347. It was proposed that an $18 million debenture would finance the centre.

Under s. 64, the city also sought an order from the OMB to dispense with a public hearing. On April 5, 1990, OMB approved the proposal and dispensed with a public hearing. In its letter of April 5, 1990, granting exemption from a public hearing the board said, in part:

> The Board notes that the City's Commissioner of Planning and Development is of the opinion that the Centre is a permitted use under the zoning by-law and that it is in conformity with the Official Plan.

On April 12, 1990, the appellant was incorporated as a non-profit Ontario corporation under the Corporations Act, R.S.O. 1980, c. 95.

Members of the appellant requested that the OMB reconsider the matter and hold a public hearing.

One of the eight submissions put to the OMB at the time of seeking the rehearing was that the underground parking facility proposed in conjunction with the community centre was in violation of the city's zoning by-law.

The Ontario Municipal Board directed the city's solicitors to respond to the allegation. They did so. The OMB had available

some 20 studies, or excerpts from studies, that City Council had considered.

On May 9, 1990, the chairman of the OMB, in written reasons, refused to reconsider the matter. He had personally met with two directors and officers of the appellant.

The appellant then applied to the Divisional Court for a leave to appeal OMB's refusal to rehear the matter.

One of the grounds put forward was the same zoning issue: that the community centre is in a "G" zone, and By-law 438-86 is silent concerning a parking garage in a "G" zone; therefore, parking is prohibited. On the other hand, the city's position is: this is a "public park" and "accessory uses" are permitted under the by-law; those are uses "that are naturally and normally incidental subordinate and exclusively devoted to a principal use, building or structure". Therefore, the city's position is that the principal use is a "public park", which is permitted in a "G" zone, and one of the "accessory uses" is a parking facility to a public park; therefore, the proposed 150-space underground parking garage is permitted under the by-law.

On July 25, 1990, the Divisional Court refused leave to appeal. The handwritten endorsement of MacFarland J. states:

July 25, 1990

I am not satisfied that there was any error on the part of the OMB to consider matters required to be considered by that board by virtue of s. 62 of the Ontario Municipal Board Act. It is apparent to me on the evidence before me that the board did consider the issues it was required to consider. The original letter sent to the board by the city which is dated April 3, 1990, was considered by the board as can be seen from their letter of May 9, 1990, to counsel for the applicant. That letter clearly by its terms canvassed those matters required to be considered by the board under s. 62.

Insofar as the board's failure to hold a public hearing is concerned, I am of the view that s. 66 of the OMB Act is a complete answer and that I am bound in any event by the decision of the Divisional Court in the Provincial Sanitation Case. It was within the board's authority to decline a public hearing.

In the result I am not persuaded that there is here raised any question of law which should go to the Divisional Court and accordingly the application for leave to appeal is dismissed with costs.

J. MacFarland J.

By agreement of counsel costs of the respondent are hereby fixed in the sum of $1,000 and are payable within three months of this date.

J. MacFarland J.

The appellant then petitioned the Lieutenant Governor in Council to renew the OMB petition including the zoning question; the Lieutenant Governor in Council refused.

On March 8, 1991, Building Permit No. 304111 was issued by the respondent commissioner and chief building official to the corporation of the City of Toronto to build the "public park (community centre)". The permit allows construction of a community centre; an indoor and an outdoor swimming pool; and auxiliary basement parking for 150 cars. It is proposed that there will be tennis courts in summer and a winter skating rink at the site of the tennis courts on the roof of the basement parking structure.

The appellant then appealed the granting of the building permit to Hoilett J. under the provisions of s. 15 of the Building Code Act.

On April 19, 1991, Hoilett J. granted a preliminary motion brought by the city and held that the appellant had no status to launch the appeal because it was not a person who felt himself aggrieved within the provisions of s. 15(1) of the Act.

Hoilett J. held that the appellant corporation did not have any economic interest, did not have any direct interest that

was being infringed or threatened, any interest that the appellant did have was peripheral, and the appellant was an ad hoc corporation pursuing a role of public conscience.

The appellant then launched this appeal to the Divisional Court under the provisions of s. 16 of the Building Code Act.

On July 29, 1991, Somers J. heard a motion brought by the appellant to stay the order of Hoilett J. pending this appeal. Somers J. dismissed the motion and wrote the following endorsement:

> In my view having regard to the issue of hardship to the respective parties if this order were to be granted, this in my opinion substantially favours the city of Toronto. The applicants have taken extensive proceedings to try and block the project -- politically and in the courts and at the Ontario Municipal Board. The effect of granting this stay would be to close down the project at least until the hearing of the main motion, probably not before December 1991. The estimated extra cost is $1.5 million. There has been substantial public participation in the decision to go ahead with this project -- publicly elected officials who have had the benefit of several reports from various experts and consultants. One is left with the thought that the applicant is prepared to take whatever manoeuvre they can to thwart the public will. This application is dismissed -- costs reserved to be dealt with by the panel hearing the appeal.

We were advised by counsel for the city that as of November 6, 1991, the concrete form work was 85 per cent completed in the parking area; 10 per cent completed for the new centre; 95 per cent completed for the swimming pools.

V. What tests, or conditions, if any, must a person fulfill in order to obtain standing as any "person who considers himself aggrieved" under s. 15(1) of the Act?

The legislature seems to have posited a subjective test. But did the legislature intend that the subjective test was to be completely open-ended?

Counsel for the appellant conceded s. 15 of the Act should be read as though it stated "any person who reasonably considers himself aggrieved".

The question to be decided is whether words should be read into s. 15(1) of the Act or should the court, as master and guardian of its own process, be the gatekeeper? Should admission to the courtroom be limited or should the process be open to everyone with the court requiring the fulfilment of conditions before a person has the right to audience?

This case involves interpretation of a section of a provincial statute. This case does not involve constitutional law, nor does it fit into the category of "public interest intervention": Canada (Minister of Finance) v. Finlay, [1986] 2 S.C.R. 607, 33 D.L.R. (4th) 321.

A. Time of determination

At what stage of the proceedings should the issue of standing be determined? We adopt the position set forth by Le Dain J. for "public interest cases" in Canada (Minister of Finance v. Finlay, supra, at pp. 616-17 S.C.R., p. 328 D.L.R.:

> This question was also considered by the High Court of Australia in Australian Conservation Foundation Inc. v. Commonwealth of Australia (1980), 28 A.L.R. 257, where the opinion was expressed that it is a matter of judicial discretion, having regard to the particular circumstances of a case, whether to determine the question of standing with final effect as a preliminary matter or to reserve it for consideration on the merits. The Court held that for reasons of cost and convenience the judge had properly exercised that discretion in dealing with the question of standing as a preliminary matter and striking out the statement of claim. Assuming that the question whether an issue of standing to sue may be properly determined as a preliminary matter in a particular case is one which a court should consider, whether or not it has been raised by the parties, I agree with the

view expressed in the Australian Conservation Foundation case. It depends on the nature of the issues raised and whether the court has sufficient material before it, in the way of allegations of fact, considerations of law, and argument, for a proper understanding at a preliminary stage of the nature of the interest asserted. In my opinion the present case is one in which the question of standing can be properly determined on a motion to strike.

B. Who qualifies for s. 15 standing?

The critical words for consideration in this section, in our view, are "Any person who considers himself aggrieved" (emphasis added). In our view, the correct approach to this issue is that of Zalev D.C.J. in the decision Giglio Enterprises Ltd. v. Edward Link (as yet unreported other than (1989) O.J. No. 1652, Action No. DCM 4355/89). In that matter, Zalev D.C.J. was considering an application under s. 15 of the Act by a property owner who complained that an adjoining business had been constructed contrary to the applicable Windsor zoning by-law and there was insufficient parking provided for the new construction. The applicant's complaint was that as a result there would be a real risk of trespass to his adjoining parking area which would be a significant problem in conducting his grocery business.

Zalev D.C.J. held that the applicant's concern was a real risk and found that the applicant did have the right to bring an application under s. 15 (p. 18 of the reasons):

> It must be noted that s. 15(1) uses the words "any person who considers himself aggrieved". This must include a class of persons wider than "any person aggrieved". . . . In any event, it cannot include every person who, for whatever reason, has a personal axe to grind, whether real or fanciful, against the municipal authorities, Building Department, landowner, and those involved in the actual construction. At the very least there must be reasonable grounds for believing oneself aggrieved. If the reasonable grounds had to be a legal grievance in accordance with Halifax Atlantic v. City of Halifax, supra, the result would be the same. However, I need not attempt any all-inclusive determination.

Zalev D.C.J. concluded that the use of the words "who considers himself aggrieved" enlarged the rights from those in other statutes which referred only to "a person aggrieved" (p. 17 of the reasons):

> There are many statutes which give a right of appeal to "a person aggrieved". There are many judgments interpreting those words within the context of those statutes. The judgments are remarkable for their inconsistency. Many of them are collected and considered in the judgment of the Nova Scotia Supreme Court, Appeal Division, in Re Halifax Atlantic Investments Ltd. and City of Halifax (1979), 90 D.L.R. (3d) 633. The court held the appellant must have suffered a legal grievance in the sense of having been wrongfully deprived of something or having title to something wrongfully affected. It was further held that increased economic competition as a result of the decision appealed from did not make the appellant "a person aggrieved". In his decision, Hoilett J. made the following statement:
>
> The applicant, in my view, is not any person who might reasonably consider himself aggrieved within s. 15(1) of the Building Code as that term has been judicially construed.

It is to be noted that in effect, Hoilett J. has inserted the word "reasonably" into s. 15(1). This is essentially the approach taken in the interpretation of that section by Zalev D.C.J.

In our view, this is a reasonable and logical approach to this matter.

The appellant's counsel, in argument, conceded that there must be some reasonable grounds or some legitimate concern on the part of an applicant under s. 15(1). He did not take the position that any person who held some unfounded consideration of being aggrieved could successfully apply.

Approaching the question of status from that basis, and considering the information concerning the appellant's

membership as outlined above, we agree with the decision reached by Hoilett J. that the appellants have no status under s. 15 of the Building Code.

The words of s. 15 of the Building Code Act represent an express provision intended by the legislature to be dispositive of the question of standing under that statute. While the word "aggrieved" is not to be understood in some traditional sense relating to a person's legal interest, nevertheless, the legislature clearly intended that some threshold test be applied and it would be inappropriate to leave the whole matter either to the subjective whim of the appellant or solely to the discretion of the court. The word "aggrieved" is to be considered in its ordinary dictionary meaning and not as a legal term of art. It is used today only in the passive voice referring generally to distraught or agitated states of mind. Persons who consider themselves aggrieved are persons who consider themselves wronged by a decision of the Chief Official within the context of the Building Code Act. In our view, persons may be aggrieved within the meaning of that term in s. 15 though they have suffered no legal harm. It is the responsibility of the courts, when requested to do so, to determine if a particular administrative action is legitimately within the scope of the statutory power and an appeal is not to be barred simply because the appellant does not have a personal proprietary or pecuniary interest.

On the facts before us, it is clear that the appellants have a different approach to the appropriate use of parks and park lands. Their main objective was to prevent or obstruct the construction of the community centre project. This was a battle which they had fought and lost. Questioning the parking component of the building permit as constituting a violation of the by-law was a last effort to realize their goal. Considering the history of their involvement, it is doubtful that they considered themselves aggrieved by the underground facilities for parking permitted by the building permit. But even if they did, in our opinion, Hoilett J., exercising his discretion as he did, came to the proper decision. Every superior court has the inherent jurisdiction to protect the integrity of its own process.

Public interest litigation

A good deal of argument was presented on that point, particularly along the lines of that considered in Canada (Minister of Finance) v. Finlay, supra. The appellant's counsel conceded, however, that the application and this appeal were under a statute, s. 15(1) of the Building Code, with "some role in" the public interest decisions.

In our view, the application and this appeal are properly dealt with and considered as an application under a statute -- s. 15 of the Building Code Act. We do not believe it is necessary to consider the decisions dealing with public interest litigation which were referred to in argument.

Moreover, we are persuaded that the principle set out in McDonald's Restaurants of Canada Ltd. v. Etobicoke (Borough) (1977), 5 C.P.C. 55 (Ont. Div. Ct.), is applicable to an appeal of this nature. In that case, the court refused intervener status to the head of a local homeowner's association whose interest was identical with that of the municipality; it refused a building permit to McDonald's because the proposed use would contravene the building by-law (per Krever J. at p. 58 C.P.C.):

> I am sympathetic generally to the concept of public interest intervention in matters before the Courts, but I recognize that there must be some reasonable limits on the willingness of Courts to permit intervention. The borough has taken the position that the applicant McDonald's is not entitled to a building permit because the proposed building would be a drive-in restaurant and a drive-in restaurant is not a permitted use under the borough's zoning by-law. I accept, as a proper and reasonable test of the Court's willingness to permit intervention, the second last paragraph of Grange J.'s reasons for judgment in Re Starr and Puslinch (1976), 12 O.R. (2d) 40 at p. 46 (Div. Ct.). I read the part of the paragraph which seems to me to be appropriate:
>
> I can only conclude from these cases that there is no absolute rule that for a party to be added he must have a

> direct interest in the very issue to be determined. It is, I think, sufficient in the words of Lord Denning, supra, that the "determination of that dispute will directly affect a third person in his legal rights or in his pocket". I also believe that it is clear from the cases that even when the applicant satisfies that condition it is entirely discretionary in the Court whether he will be allowed to intervene or not, and the Court may always decline the application where it considers that the interest of the applicant is already adequately represented.
>
> I emphasize what Grange J. has said, that it is entirely discretionary in the Court whether he will be allowed to intervene or not and the Court may always decline the application where it considers that the interest of the applicant is already adequately represented.

VI. Conclusions

Hoilett J. was right to decide the matter as a preliminary motion because he had sufficient material before him to make the determination as to standing: Finlay, supra.

Hoilett J. was right when he said:

> The applicant has demonstrated, in my view, no economic or direct interest that has been at least infringed or threatened. At best, and even that is dubious, the applicant's interests are peripheral.
>
> The motives of the applicant may be high, indeed, but the record shows them to be no more than an ad hoc corporation formed to pursue their role as public conscience in some generalized kind of way. The group's interest has a broader focus than the issues raised in relation to the Eglinton Park in particular.
>
> In concluding, I find, therefore, the applicant has no status in these proceedings. The application is ordered dismissed.

The appellant is a non-share capital corporation incorporated on April 12, 1990. It is without, as far as the record discloses, any assets.

Section 327 of the Municipal Act, R.S.O. 1980, c. 302, states:

> 327. Where any by-law of a municipality or of a local board thereof, passed under the authority of this or any other general or special Act, is contravened, in addition to any other remedy and to any penalty imposed by the by-law, such contravention may be restrained by action at the instance of a ratepayer or the corporation or local board.

As stated earlier, the appellant does not qualify as a "ratepayer".

In view of the history of the appellant's involvement as an incorporated entity and prior to that the involvement of some of its members, we conclude that there were other reasonable and effective ways that this "issue could have been brought before the court" -- that is, by a ratepayer.

We are of the view that more than a little significance emerges from the fact that this project has been on the drawing board for more than ten years, it has been to the OMB on two occasions and to this court on an earlier occasion, yet no "ratepayer" has emerged to question the alleged infraction of By-law 438-86 of the City of Toronto.

The cumulative effect of the record demonstrates that the appellant does not qualify as an appellant under s. 15 of the Act; indeed, the appellant lacks bona fides.

In Finlay, supra, at p. 633 S.C.R., p. 341 D.L.R., Le Dain J. said:

> The judicial concern about the allocation of scarce judicial resources and the need to screen out the mere busybody is addressed by the requirements affirmed in Borowski that there be a serious issue raised and that a

citizen have a genuine interest in the issue.

On the record before us, we do not think that the appellant meets those requirements. The appellant has not been and will not be injuriously or deleteriously affected.

VII. Costs

In dismissing the appeal because the appellant had no standing, Hoilett J. said:

> The respondent shall have its costs of this application fixed in the amount of $7,500. I have fixed the costs having regard to counsel's submissions on the issue; mindful of the fact that such costs should not be so prohibitive as to inhibit reasonable initiative on the part of citizens; but by the same token citizens' groups ought thoughtfully to pursue such initiative in a realization that there is a cost attached. We have heard no reason why we should disturb that exercise of discretion.

The costs of the respondent before MacFarland J. were fixed at $1,000. Neither that award nor that quantum is before us.

The costs before Somers J. were reserved to this court.

Counsel for the "appellant" submits that the two appearances before Somers J. should not attract any costs. Counsel for the city asks for $2,000 costs on the "appellant's" motion to stay before Somers J.

The applicant is to pay to the respondent/city its costs before Somers J. set at $1,000.

Counsel for the respondent city, if successful on this appeal, asked for costs to be set at $3,000 payable to it by the appellant.

Counsel for the appellant submitted that the costs before Hoilett J. were excessive and if the appellant should be ordered to pay costs on the appeal, the costs should be ordered on the basis of $500 on the proceeding before Hoilett J., nothing before Somers J. and $3,000 on the appeal to the Divisional Court.

The costs before Hoilett J. and Somers J. have been decided above; we order that the appellant pay to the respondent city its costs of this appeal set at $3,000.

Appeal dismissed.

Gadutsis et al. v. Milne et al.

[1973] 2 O.R. 503

ONTARIO
HIGH COURT OF JUSTICE
PARKER, J.
20TH DECEMBER 1972

ACTION for damages for negligent misrepresentation and for negligence in the issuing of a building permit.

M. Teplitsky, for plaintiffs.

D.C. Lyons, for defendants.

PARKER, J.:-- The plaintiffs' claim is for damages for negligence. During the month of July, 1969, the plaintiffs who were partners sold the small restaurant they were operating and were looking for a location to build a larger restaurant. They entered into discussions with Mr. Leslie Kerenvi regarding property municipally known as 610 Markham St., Toronto. Mr. K erenvi was the lessee of this property and was prepared to make an assignment of his lease to the plaintiffs. Before signing the sublease Mr. Petropoulos attended with Mr. Kerenvi at the zoning department of the City of Toronto and inquired of Mr. Shimski, a civic employee, as to whether a restaurant could be built at 610 Markham St. Mr. Shimski advised him that the zoning by-law permitted a restaurant to be built at that address.

The plaintiffs then attended at the office of their solicitor, Mr. Leslie Vasilaros. The solicitor went over the terms of the lease with them, telephoned the zoning department and inquired whether a restaurant could be built on the west side of Markham St. He was informed that it could be. The solicitor did not read the zoning regulations, but relying on the information he was given over the telephone advised his clients that they could proceed with the lease. The plaintiffs then executed the lease and made their first payment of rent.

After plans were prepared for the alteration of the building, the plaintiffs attended at the building department of the City of Toronto and made application for a permit to build a restaurant at 610 Markham St. The application, dated August 20, 1969, was signed by Mr. Gadutsis. On September 19th, a building permit was issued to the owner of the property. The plaintiffs then entered into an agreement with Mr. Kerenvi to undertake the alterations and install restaurant equipment at a cost of $26,419 and work was commenced immediately.

On October 7, 1969, R.H. Milne, Commissioner of Buildings for the City of Toronto, sent a letter to the owner of 610 Markham St. with a copy to Mr. Gadutsis. The letter reads as follows:

> On September 19, 1969, permit No. 3204 was issued to you to make alterations and build addition to detached lodging house for restaurant and dwelling building at the above location.
>
> I advise that the provisions of Article 7(1)(c) of Building By-law No. 300-68 preclude me from issuing any permit which is in contravention of any by-law of the Corporation.
>
> It has been brought to my attention that By-law No. 22598 amended Zoning By-law No. 20623, Section 16(2)(jj)(3) as follows:
>
> "... no person shall, within the C.1.S. district on the west side of Markham Street between Bloor Street West and Lennox Street, use any lot or erect or use any building for the purposes of an eating establishment or a school for the performing arts."
>
> Therefore, I have no alternative but to inform you that permit No. 3204 issued to Mr. L. Racz dated September 19, 1969 is hereby revoked.

Construction work was stopped at once but by this time dividing walls had been removed, plaster had been stripped off the walls, windows had been sealed, new stairways had been installed and work had been done on the foundation of the building for the construction of an outside stairway. The plaintiffs questioned Mr. Shimski as to what the problem was and he replied: "Sorry, I made a mistake." There is no doubt that the information given to Mr. Petropoulos was incorrect and

that a building permit should not have been issued. The plaintiffs then consulted a solicitor who got in touch with the city officials and attempted to either have the premises rezoned or to negotiate a settlement. These attempts failed. The plaintiffs paid their rent to the end of January, 1970, but made no further payments after that time to Mr. Kerenvi either on the lease or the agreement to alter the building.

An action was commenced by Mr. Kerenvi against Mr. Gadutsis, Mr. Petropoulos, and the Corporation of the City of Toronto claiming damages for breach of agreement and negligence. The plaintiffs then commenced this action. Although pleadings were delivered, the Kerenvi action was not proceeded with for various reasons, probably the main one being that Mr. Kerenvi was able to mitigate his loss by surrendering the lease.

I find that the zoning examiner, Mr. Shimski, was negligent when he represented to Mr. Petropoulos that a restaurant could be built at 610 Markham St. contrary to s. 16(2)(jj)(3) of the zoning by-law and also that he was negligent when he gave the same information over the telephone to Mr. Vasilaros.

Mr. Milne admits that only the Building Commissioner is authorized to issue building permits. He has a staff of approximately 240 people and normally is not involved with an application for a permit unless a member of his staff consults him. Although all permits are issued in Mr. Milne's name the processing is done by his staff. This is quite understandable since in 1969 alone there were over 11,000 permits. The person who made the search and who signed the Building Commissioner's signature to the permit was authorized to do so. The employee who issued the permit to allow work to commence contrary to the zoning by-law was negligent.

Counsel for the plaintiffs makes a distinction between the period of time prior to the issuance of a building permit and the period afterwards and makes a separate claim for each period based on two different theories of liability. The first claim is based on the negligent misrepresentation made by Mr.

Shimski to Mr. Petropoulos when he attended at the City Hall and inquired as to whether a restaurant could be built at 610 Markham St. The second claim is based on the negligent act of the corporation in issuing the building permit.

Counsel for the plaintiffs referred to Windsor Motors Ltd. v. District of Powell River (1969), 4 D.L.R. (3d) 155, 68 W.W.R. 173, a decision of the British Columbia Court of Appeal which is somewhat similar on the facts. The Court there held that the municipality was negligent for incorrect information given out by a licence inspector which resulted in financial loss to the plaintiff. Although the Windosr Motors case treated the negligent giving of information and the subsequent issue of a permit as one act, counsel in the present case felt that only part of the plaintiffs' damages flowed from the original negligence and the balance from the negligent act of issuing a building permit.

Counsel for the defendants submitted that it made no difference whether the negligent statement was made directly over the telephone or whether a permit was issued erroneously. The action was based on economic loss resulting from misinformation.

Dealing with the first claim based on negligent misrepresentation, it is now settled law that where there is a duty to be careful negligent misrepresentation affords a cause of action: Hedley Byrne & Co. Ltd. v. Heller & Partners Ltd., [1964] A.C. 465. Lord Morris of Borth-y-Gest at pp. 502-3 in considering this question, said:

> My Lords, I consider that if follows and that it should now be regarded as settled that if someone possessed of a special skill undertakes, quite irrespective of contract, to apply that skill for the assistance of another person who relies upon such skill, a duty of care will arise. The fact that the service is to be given by means of or by the instrumentality of words can make no difference. Furthermore, if in a sphere in which a person is so placed that others could reasonably rely upon his judgment or his skill or upon his ability to make careful inquiry, a person takes it upon himself to give information or advice to, or allows his information or advice to be passed on to, another person who, as he knows or should know, will place reliance upon it, then a duty of care will arise.

Counsel for the defendants takes the position that whether or not they were careless and whether or not the plaintiffs suffered damage as a result, the defendants must succeed on the ground that no duty was owed by them, since the plaintiffs were not in their contemplation at the time the information was given. He referred to the case of Mutual Life & Citizens' Ass'ce Co. Ltd. v. Evatt, [1971] A.C. 793, an action against an insurance company for giving gratuitous information where it was held that since the company's business did not include giving advice on investments and it did not claim to have the necessary skill and competence to give such advice, its duty towards the plaintiff was merely the duty to give him an honest answer to his inquiry, and accordingly, the circumstances alleged did not disclose a cause of action. Although the decision of the majority would seem to restrict the application of Hedley Byrne & Co. Ltd. v. Heller & Partners Ltd., supra, one must look at the facts in each case to ascertain whether a duty exists. It was not the normal or usual duty of an insurance company to give out financial advice about other companies. In the present case, the employees in the zoning department of the municipality were there to give out information as to zoning. The city employees in the zoning department must have known that persons inquiring would place reliance upon what they said. Mr. Shimski gave out incorrect information in the course of his employment directly to the person seeking information. Under these circumstances, I find that the municipality owed a duty of care to Mr. Petropoulos, that it failed to discharge such duty and that as a consequence, the plaintiffs suffered loss.

Dealing with the second claim based on the commission of a negligent act, it would seem to be settled law that municipal corporations acting through their employees are liable for negligence in the performance of their duties. The principle is set out in Dixon v. City of Edmonton, [1924] S.C.R. 640 at p. 645, [1925] 1 D.L.R. 80 at p. 86, by Newcombe, J., quoting from Mersey Docks Trustees v. Gibbs (1866), L.R. 1 H.L. 93 at p. 110, as follows:

> "In the absence of something to shew a contrary intention, the legislature intends that the body, the creature of the statute, shall have the same duties, and that its funds shall be rendered subject to the same liabilities as the general law would impose on a private person doing the same things."

Under the Ontario Planning Act, R.S.O. 1970, c. 349, municipalities are given power to regulate building. The defendant municipality chose to exercise that power and passed a building by-law. It was in the performance of its duty under the by-law that this negligence occurred. The Building Commissioner should not have issued a permit in the circumstances of this case and the issuance of the building permit was a negligent act. When the Building Commissioner issued a building permit he, or his employees, must have known that the person to whom it was issued might rely on it and a duty of care was owed to such person. The plaintiffs were within the ambit of the risk and suffered damages as a result.

Counsel for the defendants submitted that Mr. Milne could only be personally liable for the negligence of Shimski if Mr. Milne were an employer or if he had been personally negligent. There was no evidence to indicate that Mr. Milne had been personally negligent. Municipal officers are not generally responsible in law for acts done on behalf of the municipality in the exercise of their powers: Rogers, Law of Canadian Municipal Corporations (1971), s. 61.2.

Counsel for the defendants submitted that the plaintiffs even though they were given incorrect information by a municipal employee did not rely on it but went to a solicitor before taking any steps. He submitted that a client is entitled to expect his solicitor will make a proper search and read any zoning by-laws before advising him thereon. Since the plaintiffs' solicitor is not a party to this action, I need not consider whether he was negligent in advising his client without having read the zoning by-law. At this time I am only concerned with whether there was such an opportunity of inspection as would excuse the defendants. A similar argument was raised in Marschler v. G. Masser's Garage, [1956] O.R. 328, 2 D.L.R. (2d) 484, a decision involving the liability of a repairer of motor vehicles to third parties. LeBel, J., at p. 337 O.R., p. 493 D.L.R., said: "... the kind of inspection intended is one that is practicable or is contemplated by the parties. A mere opportunity to inspect is not enough". I cannot find on the evidence that when the employees of the city were giving out information as to zoning it was contemplated

that an examination would be made in each case by a solicitor on behalf of the person inquiring.

The application for the building permit signed by Mr. Gadutsis contained a disclaimer of responsibility which reads as follows:

> The undersigned hereby applies for a permit to build according to the plans, specifications and block plan, herewith submitted, and agrees to comply with all By-laws and civic regulations, it being expressly understood that the issuing of a permit does not relieve the applicant from complying with all said By-laws and civic regulations, though not called for in the specifications or shown on plans submitted. The applicant further agrees that if a permit is revoked for any cause or irregularity or non-conformance of the said By-laws or regulations, that in consideration of the issuing of the permit all claims are waived arising therefrom against the Corporation of the City of Toronto.

There may be some question as to the power of a municipality to insert such a waiver but since Mr. Gadutsis signed the application for a building permit it may be inferred that he acquiesced in its inclusion and approbated the waiver.

Counsel for the defendants submitted that the disclaimer on the application was sufficient to warn the plaintiffs that the municipality was not accepting responsibility for the information given out by its employee and that where the only thing for which the defendant could be responsible is negligence that general words would exculpate. It is the last sentence of the waiver on which he relies. The sentence reads:

> The applicant further agrees that if a permit is revoked for any cause or irregularity or non-conformance of the said By-laws or regulations, that in consideration of the issuing of the permit all claims are waived arising therefrom against the Corporation of the City of Toronto.

The words become of importance in deciding whether liability for negligence was assumed by the defendant corporation. Counsel for the plaintiffs argues that the words are not sufficiently precise to exclude liability for negligence. The matter of disclaimer was dealt with in Hedley Byrne & Co. Ltd. v. Heller & Partners Ltd., supra, by Lord Morris of Borth-y-Gest at p. 504 as follows:

> There is much to be said, therefore, for the view that if a banker gives a reference in the form of a brief expression of opinion in regard to credit-worthiness he does not accept, and there is not expected from him, any higher duty than that of giving an honest answer. I need not, however, seek to
>
> deal further with this aspect of the matter, which perhaps cannot be covered by any statement of general application, because, in my judgment, the bank in the present case, by the words which they employed, effectively disclaimed any assumption of a duty of care. They stated that they only responded to the inquiry on the basis that their reply was without responsibility. If the inquirers chose to receive and act upon the reply they cannot disregard the definite terms upon which it was given. They cannot accept a reply given with a stipulation and then reject the stipulation. Furthermore, within accepted principles (as illustrated in Rutter v. Palmer, [1922] 2 K.B.) the words employed were apt to exclude any liability for negligence.

In Rutter v. Palmer, [1922] 2 K.B. 87 at p. 92, Scrutton, L.J., said:

> In construing an exemption clause certain general rules may be applied: First the defendant is not exempted from liability for the negligence of his servants unless adequate words are used; secondly, the liability of the defendant apart from the exempting words must be ascertained; then the particular clause in question must be considered; and if the only liability of the party pleading the exemption is a liability for negligence, the clause will more readily operate to exempt him ...

Three guiding principles were set out for interpreting such clauses in Canada Steamship Lines Ltd. v. The King, [1952] 2 D.L.R. 786 at pp. 793-4, [1952] A.C. 192, 5 W.W.R. (N.S.) 609:

> (1) If the clause contains language which expressly exempts the person in whose favour it is made (hereafter called "the

proferens") from the consequence of the negligence of his own servants, effect must be given to that provision. Any doubts which existed whether this was the law in the Province of Quebec were removed by the decision of the Supreme Court of Canada in Glengoil SS. Co. v. Pilkington (1897), 28 S.C.R. 146.

(2) If there is no express reference to negligence, the Court must consider whether the words used are wide enough, in their ordinary meaning, to cover negligence on the part of the servants of the proferens. If a doubt arises at this point, it must be resolved against the proferens in accordance with art. 1019 of the Civil Code: "In cases of doubt, the contract is interpreted against him who has stipulated and in favour of him who has contracted the obligation."

(3) If the words used are wide enough for the above purpose, the Court must then consider whether "the head of damage may be based on some ground other than that of negligence" to quote again Lord Greene in the Alderslade case [[1945] K.B. 189 at p. 192]. The "other ground" must not be so fanciful or remote that the proferens cannot be supposed to have desired protection against it; but subject to this qualification, which is no doubt to be implied from Lord Greene's words, the existence of a possible head of damage other than that of negligence is fatal to the proferens even if the words used are prima facie wide enough to cover negligence on the part of his servants.

Counsel for the defendants submitted that the plaintiffs' claim arose from the revocation and should be covered by the disclaimer. Counsel for the plaintiffs, however, submitted that no damages flowed from the revocation, they flowed from the negligent issue of a building permit. The plaintiffs make no claim based on revocation. The city was quite right to revoke under the circumstances of this case.

The disclaimer in the present case is not a general one, it is specific. It refers only to claims arising from revocation of the building permit. The plaintiffs make no claim because of the revocation. All the damages suffered were caused by the granting of the permit. Under the circumstances of this case, I do not think the disclaimer relieves the municipality of responsibility.

Counsel for the plaintiffs agreed that the only damage his clients could prove up until the building permit was issued was the rent paid during this period. The rent paid for August and September totalled $1,000. I therefore assess the damages for the first period in that amount.

The damages claimed for the second period are special damages for $14,293.18. The only real issue as to the special damages was as to the down payment of $6,000 under the contract with Mr. Kerenvi to make the alterations to the building. The plaintiffs had a claim against Mr. Kerenvi under another building contract which arose from a clause dealing with delay in completion. This claim was settled for $3,500 and the plaintiffs were allowed to set this off against the down payment. I am satisfied this was a legitimate set-off and that the other amounts covering work done were incurred or paid for by the plaintiffs. I assess the damages for this portion of the claim at $14,293.18. The plaintiffs originally claimed interest on the special damages, but this was abandoned at trial. The plaintiffs also abandoned in this action the claim for whatever they may have to pay to Kerenvi under the lease and agreement. They are prepared to leave that to be decided in third party proceedings over against the municipality, should that action be proceeded with.

There will, therefore, be judgment for the plaintiffs agaisnt the municipality both on the ground of negligent misrepresentation and on the ground of negligence in the issuing of a building permit for $15,293.18 with costs forthwith after taxation thereof. The action is dismissed as against R.H. Milne but without costs.

Judgment for plaintiffs.

Galway and Cavendish (United Townships) v. Windover

Between
The Corporation of the United Townships of Galway and Cavendish, plaintiff, and
Donald N. Windover, defendant

[1995] O.J. No. 3932
DRS 96-06004
File No. 5017/90

Ontario Court of Justice (General Division)
Murphy J.
Heard: May 2, 1995.
Judgment: August 31, 1995.
(25 pp.)

Counsel:
S.P. Kylie, for the plaintiff.
L.L. Wilcox-Whetung, for the defendant.

MURPHY J.--

[para1] The facts are as set out in an Agreed Statement of Facts:

1. The plaintiff is a municipal corporation in the County of Peterborough and Province of Ontario.

2. The Defendant resides in the Township of Cavendish and is the registered owner of Part of Lot One, Registered Plan Number 2, in the township of Cavendish which lands are more particularly described in Registered Instrument Number 110456, registered in the Land Registry Office for the County of Peterborough (No. 45) and which are shown as Parcel Seven on a Plan of Survey dated May 27, 1959 by G.W. Elliott, Ontario Land Surveyor (hereinafter called the "lands"). A copy of Instrument Number 1104565 is attached as Exhibit 1 and the survey showing the "lands" outlined in red is attached as Exhibit 2.

3. The said lands border on Mississauga Lake which is a "feeder lake" for the Trent Severn Waterway and as such the high and low water marks vary as much as six to eight feet during the year and as a result, the shoreline varies dramatically during the spring, summer and fall.

4. The Lake is navigable. The bed of the Lake is owned by Her Majesty the Queen in Right of Ontario. The waters of the lake are within the jurisdiction of the Plaintiff and in addition are either within the jurisdiction of Her Majesty the Queen in Right of Ontario (Ministry of Natural Resources) or Her Majesty the Queen in Right of Canada (Trent Severn Waterway).

5. Mississauga Lake is located within the boundaries of the Plaintiff.

6. On October 14, 1978, the Council of the Plaintiff passed By-law Number 78-43, being a comprehensive Zoning By-law for the United townships of Galway and Cavendish (herein called the Zoning By-law"), which By-law provides for overall land use controls in the said Townships. A certified copy of this By-law is attached as Exhibit 3.

7. Pursuant to Schedule "G" of the zoning By-law, the lands are zoned "Recreational Residential".

8. On February 25, 1984, the Council of the Plaintiff passed By-law Number 84-4, being a By-law to regulate the construction, alteration and repair of buildings (herein called the "Building By-law"). A copy of this By-law is attached as Exhibit 4.

9. In 1975, the Defendant constructed a "U-shaped" wooden dock (the "Dock"). Styrofoam was placed under the dock to make it float.

10. The Dock was anchored by a chain attached to stakes driven into the bed or the shore of the Lake. The

Dock floated and moved from time to time to accommodate the changing high water mark of Mississauga lake.

11. During the summer months from 1974 to 1986, the Defendant located his 16 foot aluminum fishing boat to this Dock.

12. In 1986, the defendant built a partial enclosure on top of the Dock, while the Dock remained floating in the water, to protect his fishing boat from the elements.

13. This partially enclosed Dock consisted of wooden stud walls, rafters, a sloping steel roof and fibreglass nailed to the outside of the walls and is approximately 18 feet long by 14 feet wide. One end of the enclosed Dock has a large opening of sufficient size to permit a boat to be freely moved in and out. The opposite end has a window. This "structure" is used to house the Defendant's 14 foot fishing boat and gas cans.

14. This partially enclosed Dock is anchored in the identical manner that the Dock was.

15. The Defendant has on occasion propelled this floating enclosed dock out into the main body of the Lake by either putting his boat inside or alongside the enclosed Dock and using the motor on the boat to propel the Dock and the enclosure.

16. At one time the Defendant applied for and obtained a vessel licence for this structure from the Federal Department of National Revenue (Customs & Excise) and he placed the vessel identification numbers on the sides of the structure, being licence No. 36E29606. A copy of the same is attached as Exhibit 5.

17. As a result of an inquiry from the Plaintiff, the said licence was revoked by the Federal Department of National Revenue (Customs & Excise) and a copy of the letter revoking the same is attached as Exhibit 6. This licence has never been returned to Customs & Excise Canada.

18. This partially enclosed Dock remains on the water and is pulled partially onshore during the winter months. During the spring thaw, it rises up as the water level rises.

19. On or about July 28th, 1987, the Plaintiff's Chief Building Official, James Pennington, served upon the Defendant an Order to Comply with Act or Code and a Stop Work Order issued on that same date. A copy of the Stop Work is attached as Exhibit 7 and a copy of the Order to Comply with Act or Code is attached as Exhibit 8. The Plaintiff continued to construct the enclosed Dock after July 28th, 1987.

20. At no time has the Defendant applied for a rezoning of By-law No. 78-43 or a minor variance with respect to the partially enclosed dock.

21. The Ministry of Natural Resources of Ontario requires that a permit or a license to maintain the partially enclosed dock on the surface of Mississauga Lake be obtained, however, at no time did the Defendant apply for such permit or license. The Federal Minister of Transport requires that a permit be issued under the Navigable Water Protection Act before any structure can be built or placed on any navigable water, however, at no time did the Defendant apply for such permit or licence.

22. The Defendant is illiterate and did not understand that he had been served with a Stop Work Order, although the Chief Building Official had told him verbally that he could not build the partially enclosed Dock without further elaboration. A few hours after being served the Defendant's spouse read the Orders to the Defendant.

23. Notwithstanding the recommendation of the Chief Building Official, it was and remains the

Defendant's belief that a building Permit was not required to construct the enclosure and therefore he did not apply for the same.

24. Photograph numbers 1 to 12, inclusive, attached as Exhibit 9 and Photograph numbers 13 to 15 inclusive, attached as Exhibit 10, all accurately depict the "structure" which is the subject of this Action.

The issues to be determined

[para2]

1. Does the Municipality have authority to pass a by-law concerning the waters of the Mississauga Lake?

2. If the Municipality does have authority to cover the waters of Mississauga Lake, has the field been occupied by the Province as a result of the passage of the Public Lands Act, in particular Regulation 975 passed under the act.

3. If the By-law does govern the waters of the Mississauga Lake, is the By-law so poorly drafted that it is not clear that it covers the waters of Mississauga Lake and can the By-law be strictly construed as it infringes on the individual's rights.

4. Is Mr. Windover's structure a vessel, boat, dock or boathouse and is it a structure within the meaning of the By-law.

5. Does the structure in question conform with the building By-law and the Building Code Act of Ontario.

[para3] Before I embark on a discussion on the issue of jurisdiction I should determine what Mr. Windover's structure is.

[para4] In my judgment the structure is not a boat or a vessel. It is a floating dock that has been converted to a boathouse. It started out as a floating dock to which walls and a roof have been added. That, in my judgment, makes it a boathouse. It is in effect a structure in which a boat is stored.

Jurisdiction

[para5] Municipalities have the power to pass by-laws to regulate matters on land covered by water provided they do not permit structures which would interfere with navigation. That is a federal jurisdiction. In Hamilton Harbour Commissioners v. City of Hamilton et al. (1978) 21 O.R. (2d) 459 the Harbour Commissioners brought an action against the Corporation of the City of Hamilton for a declaration that certain of the City's zoning by-laws and a by-law amending the Official Plan were ultra vires. The Commissioners sought a declaration that they had exclusive jurisdiction to regulate and develop the lands. she legislation had been established by the federal government. The court held at p. 483:

"The Courts have recognized "overlapping" or "concurrent" fields of jurisdiction in some instances with the result

that both authorities are permitted to legislate in a particular field."

At p. 484:

"In my opinion, land-use control within a harbour has both provincial and federal aspects. I conclude that the City pursuant to s. 35 of the Planning Act may validly pass a zoning by-law affecting land use within the harbour so long as it does not explicitly attempt to prohibit or regulate the use of land for purposes related to navigation and shipping. Similarly, the Commissioners, pursuant to s. 15 of the Commissioners' Act, 1912, may validly pass by-laws to regulate and control the use and development of land within the harbour for purposes related to navigation and shipping. Only if conflict arises with respect to the use of a parcel of land within the limits of the harbour, will the paramountcy of the federal power cause the operation of the by-law of the

City to be suspended."

[para6] The federal power, under the Navigable Waters Protection Act, R.S.C. 1970 may give permission to build a structure but that, in itself, does not prevent the Municipality acting under valid provincial legislation from regulating the use of that structure.

[para7] In Township of Moore v. Hamilton (1979) 23 O.R. (2d) 418 Mr. Hamilton obtained a permit to build a commercial gravel dock under the Navigable Waters Protection Act. The township's zoning by-law did not permit the use of a commercial gravel dock in that location. The trial judge held the By-law was an attempt to prevent the use related to navigation and shipping. The paramountcy of the federal power must prevail. The Court of Appeal allowed an appeal and held that the By-law was restricted to land use control and did not purport to regulate matters related to navigation and shipping. Municipalities do have jurisdiction to zone lands covered by water.

[para8] Corporation of the Township of Humphrey v. Robinette (1993) 16 M.P.L.R. (2d) 150 is a case involving the occupation of a boathouse as a residence. At p. 162 the Court held:

"It is clear that the Municipality has the jurisdiction

to zone land covered by water. This is by virtue of the fact that "land" within Section 1 of the Municipal Act, R.S.O. 1990, c. M.45, includes lands covered by water."

[para9] I am satisfied The Corporation of the United Townships of Galway and Cavendish does have jurisdiction to pass a by-law to regulate the use of land covered by water. That power is given to the Municipalities by the province under the Planning Act.

Does the Province occupy the field

[para10] If so, is there concurrent jurisdiction or does the paramountcy of the provincial power cause the operation of the bylaw of the Municipality to be suspended. The province has passed the Public Lands Act which provides for the administration of all Crown lands by the Ministry of Natural Resources. The land in question is public land as the ownership of the bed of lakes is vested in the Crown in the right of the Province.

[para11] Counsel for the Municipality concedes that the Ministry of Natural Resources on occasion will give permits for the construction of docks and boathouses. The Municipality recognizes the authority of the Ministry of Natural Resources to issue permits for a dock or a boathouse.

[para12] The plaintiff's position is that the defendant has not obtained a permit from the Ministry of Natural Resources. The authority of the Municipality to govern and control the waters has therefore not been displaced. It is the plaintiff's position that the jurisdiction over the waters is concurrent between the municipalities and the Ministry of Natural Resources. The defendant could have applied to obtain a permit from the Ministry of Natural Resources but has not done so. It was only when the Ministry of Natural Resources would issue a permit that there would be any conflict with the zoning by-law of the municipality.

[para13] The Public Lands Act recognizes the Municipalities' right to have some control of lands covered by water. Section 14 permits the Ministry of Natural Resources to issue work permits for work along the shore of lands. Section 2 (1) of the Regulation states:

"An officer shall issue a work permit to any person who

applies therefor unless the officer is of the opinion that the work for which a permit is required,

(b) is inconsistent with or does not conform to,

(i) an official plan as defined in the Planning Act"

[para14] A paramountcy, in my judgement, only arises if there is a conflict between two pieces of legislation. If there is a conflict then the legislation passed by the

superior authority, i.e. the Province, takes precedence over the inferior body, i.e. the Municipality.

[para15] In Regina v. Trabulsey et al. (1995) 97 C.C.C. (3d) 147, at p. 160 Justice Labrosse indicates:

> "The constitutional doctrine of paramountcy applies in cases where there is a conflict or inconsistency between federal and provincial legislation."

[para16] In Superior Propane Inc. et al. and Corporation of the City of York (1995) 23 O.R. (3d) 161 illustrates an application of the paramountcy doctrine. The Court of Appeal held that a bylaw of the City of York was invalid. The by-law conflicted with a provincial Act, The Energy Act R.S.O. 198 ch. 139. The Energy Act contained a comprehensive scheme to regulate propane dispensing, handling and storage and that these matters are not subject to the legislative authority by municipalities.

[para17] The Court of Appeal agreed with the conclusion of the dissent of Justice Hollingworth in the Divisional Court that the provincial law and the by-law were at cross purposes.

At p. 163:

> "We think that the by-law is at cross-purposes with the regulation because it negates the operating effect of the latter respecting tank size, height, setbacks, and protection."

[para18] The Court of Appeal disagreed with the majority of the Divisional Court that held that the by-law merely enhanced the statute. In my judgement there is no conflict or inconsistency between the municipal by-law and the Provincial

Public Lands Act. There has been no evidence advanced to show any conflict or inconsistency. The plaintiff has not shown it would be entitled to obtain a permit from the Ministry of Natural Resources. It is not shown there is any use that is permitted under the provincial Act that would be forbidden under the by-law.

[para19] I am satisfied the doctrine of paramountcy does not apply and the municipality has jurisdiction to pass a zoning by-law to govern the water lots.

Build Code Act violation

[para20] In this case the plaintiff alleges that the defendant has violated the Building Code Act in the building of his boathouse. Section 5(1) of Building Code Act states:

> "No person shall construct or demolish or cause to be constructed or demolished a building in a municipality unless a permit has been issued therefore by, the chief official."

[para21] Section 6 states:

> (1) "The chief official shall issue a permit except where,
>
> (a) the proposed building or the proposed construction or demolition will not comply with this Act or the building code or will contravene any other applicable law;"

[para22] The Act defines a structures as:

> "... occupying an area greater than 10 square metres consisting of a wall, roof and floor, or any one or more of them ..."

[para23] The defendant initially alleged the plaintiff has failed to comply with a limitation period. Section 24 (4) of the Building Code Act provides:

> "No proceeding under this section shall be commenced more than one year after the time when the subject-matter of the proceeding arose."

[para24] The defendant alleges the plaintiff should have charged the defendant under the Provincial Offences Act with a breach of the Building Code Act and got a conviction before

coming to this Court to obtain an injunction or relief.

[para25] The defendant's counsel has only recently taken over the matter on behalf of the defendant. It appears when the matter was being conducted by a previous solicitor the defendant was charged. The defendant's then counsel agreed to have the matter adjourned sine die several years ago pending resolution of this application. If the present counsel wishes to revoke that consent, she could have been done before the commencement of this hearing.

[para26] In my judgment the plaintiff is estopped from advancing that argument against the defendant. The defendant has acquiesced in the decision. The charge under the Building Code Act was adjourned until the hearing of this application.
Compliance with the plaintiff's zoning by-law

[para27] Does the by-law govern water lots? The township has the right to pass a zoning by-law to govern water lots.

[para28] Does this by-law cover the land in question? Section 1.7 of the "Comprehensive Zoning Bylaw, The Corporation of the United Townships of Galway and Cavendish" states:

> "For the purpose of this Bylaw, all land within the Corporation of the United townships of Galway & Cavendish is hereby divided into use zones as set out in Section 3 and on Schedules A to H and the zone boundaries are:
>
> 1.7.1 The centre line of any road, right-of-way or watercourse ..."

[para29] It is the plaintiff's position that a by-law governs all the lands in the township of Galway including the boundaries of a watercourse and Lake Mississauga is a watercourse. It is the plaintiff's position that the zoning designation of any land fronting on water is extended into the middle point of that watercourse. The defendant owns property on the shore which is in a zone RR, Recreation Residential. The township's position is that the zoning by-law extends and covers not only the defendant's landholding but extends to the water lot in the front of his lot to the middle of the lake.

I am satisfied the by-law applies to water lots before the court.

Compliance with zoning by-law

[para30] It is the plaintiff's position that the zoning bylaw does not permit a building on any water lot. The by-law does not say so directly. The plaintiff's submission is that by looking at the various requirements of the by-law it is clear no boathouse would be permitted on a water lot. The by-law has a set-back requirement of 70 feet from the high water mark. A boathouse is defined in the by-law. The by-law does not permit the building of a boathouse per se. It permits a boathouse as an accessory use to the main use. The defendant has not constructed any building on the lot that he owns on land. There is no main use and without a main use there can be no accessory use.

[para31] It is difficult to imagine why anyone would build a boathouse if it requires a 70 foot set-back. A boathouse in that location would be, of course, useless. There are boathouses on this lake that are not 70 feet from the shoreline. The by-law does permit the construction of a dock or a pumphouse up to the lot line, i.e., up to the high water mark.

[para32] The defendant's position is the by-law only governs building and structures that are on land. The by-law does not refer to structures that are on water lots.

[para33] The defendant also argues that the floating boathouse is not a building or structure within the meaning of the by-law. The by-law definition is not helpful.

[para34] Section 4.6 provides:

> "Building means any edifice used or intended to be used for shelter, accommodation or enclosure of persons, animals or chattels other than a lawful boundary wall or fence."

[para35] The defendant argues "edifice" is defined in various dictionaries as follows:

"An edifice is a building, especially one of large size

or imposing appearance."

[para36] The defendant argues that the building before us is hardly an "edifice", is hardly one of a large size or imposing appearance.

[para37] Counsel for the defendant concedes the dictionary definition of structure is a little more helpful. The by-law definition of structure is:

"Structure means anything that is erected, built or constructed of parts joined together, the use of which required location in or on the ground, or attached to something having location in or on the ground."

[para38] Counsel concedes that the first part of the definition "built or constructed or parts joined together" might well apply to the structure before us but it does not meet the second part which refers to the "the use of which required location in or on the ground, or attached to something having location in or on the ground." This structure is not attached to the ground, it floats and is tied up to shore. Counsel argues that if the court finds that this is a structure or a building, then what would a houseboat be? Would that also be a structure or a building under the definition. It has a roof and walls and all the things you need to fall within this by-law.

[para39] Structure has also been defined in Black's Law Dictionary:

"Any construction or any production or piece of work artificially built up or composed of parts joined together in some definite manner. That which is built or constructed. An edifice or building of any kind."

"A combination of materials to form a construction for occupancy use or ornamentation whether installed on, above or below the surface of a parcel of land."

[para40] I am satisfied that the floating boathouse is a structure within the meaning of the by-law as defined in Black's Law Dictionary. The lands in question are zoned RD, Residential Recreation. The explanatory note reveals that recreational dwelling requires a footage and lots with certain area, i.e. 100 foot frontage.

[para41] The defendant's position is that the by-law applies only to buildings and structures that are on a lot as opposed to the plaintiff's position that the by-law requires a building and structure to be on a lot. The plaintiff argues there is no authority in the by-law to authorize or allow a structure on a water lot within the municipality.

[para42] The defendant argues the definition of a houseboat in the by-law is unhelpful. Other than talking about it as an accessory use, it is not dealt with elsewhere. It is the defendant's position the by-law does not talk about whether you can or cannot construct things on water lots.

[para43] Whether I should accept the defendant's position or the plaintiff's position turns on how the by-law should be interpreted.

[para44] The interpretation of the By-law does cause me some concern. It is not well drafted. It does not specifically prevent structures on water lots. Defense counsel relies on the decision of L.D.C.M. Investments Ltd. et al. and Town of Newcastle et al. (1975) 8 O.R. (2d) 504 (Div. Ct.). The headnote states:

"Where a zoning by-law is poorly and carelessly drafted so that there is considerable doubt as to its scope or effect and thus gives rise to an issue between a landowner and the municipality as to the uses to which the land may be put, the by-law should not be construed liberally. If the expressions used in the by-law are doubtful, the doubt must be resolved in favour of the landowner."

[para45] The court referred to the decision of Bayshore Shopping Centre Ltd. v. Township of Nepean et al. [1972]

S.C.R. 755, 25 D.L.R. (3d) 443 where Spence J. found at p. 764 S.C.R., p. 449 D.L.R.:

> "I find little assistance from the decisions which purport to indicate the philosophic attitude which the Court should adopt in construing zoning by-laws. No authority need be cited for the proposition that a man's property is his own which he may utilize as he deems fit so long as in such utilization he does not commit nuisance, entrap the unwary or act in breach of statutory prohibitions, and therefore by-law restrictive of that right should be strictly construed."

[para46] In Woodglen & Co. v. North York (City) Chief Building Official (1994) 23 M.P.L.R. (2d) 219, Rosenberg J. acknowledged that there were two lines of authorities dealing with the interpretation of by-laws. He reviewed some of these decisions that are authority that a by-law should be given a strict interpretation including the L.C.D.M. Investments Ltd. v. Newcastle - (Town) (1975) 8 O.R. (2d) 504; Wilson v. Jones [1968] S.C.R. 554, 68 D.L.R. (2d) 273; Thunder Bay (City) v. Potts (1982), 39 O.R. (2d) 725. He also reviewed the authorities which suggest that the by-law should receive a liberal interpretation: Montreal (City) v. Morgan (1920) 60 S.C.R., 393; Bruce v. Toronto (City) [1971] 3 O.R. 62 where the Ontario Court of Appeal at p. 66 stated:

> "The recitals immediately preceding the operative sections of By-law 20623 set out that the by-law was passed for the purpose of implementing the official plan of the planning area of Toronto within the meaning of the Planning Act. An "official plan" is defined in the Planning Act, supra, and was similarly defined in the Planning Act in force at the time of the passing of the by-law as a programme or policy designed to secure the safety, convenience, and welfare of the inhabitants. The underlying purpose of the implementing by-law is, accordingly, to establish and maintain for each of the areas or zones into which the municipality is divided for the purposes of the plan, standards with respect to the use of land and the use and erection of buildings which will enhance and preserve the quality of life in the municipality and the amenities considered conducive to the health, safety, convenience and welfare of the inhabitants. On this account, I consider the by-law to be remedial and one to be accorded a liberal interpretation to the end that it may afford to the people of the community protection against departures from or encroachment upon the standards adopted by the municipality as expressive of these purposes.

And further:

> "Notwithstanding this, it is my belief that Ontario Courts now accept that the obligation imposed on the municipal council to plan for the growth and development of the community demands recognition of the necessity for means to compel the observance of the rights of the community to determine and enforce the direction in which the community should be shaped, and that in this regard the rights of the community are paramount to the rights of the owner."

[para47] In Harrison et al. v. City of Toronto (1982) 39 O.R. (2d) 721, Galligan J. at p. 724 indicates:

> "while by-laws may not be as benevolently interpreted now as they once were, it remains the duty of the court, if reasonably possible, to construe a by-law to give affect to the object intended by council."

[para48] In determining which of the two approaches should decide the case whether the zoning by-law should be given a strict or liberal interpretation, there is in the explanation note for By-law 78-43:

> "The purpose of this by-law is to provide overall land use controls for the United Townships of Galway and Cavendish. This by-law applies to all lands in the corporation of the United Townships of Galway and Cavendish."

[para49] The zoning approach given in the official plan is:

> "... existing developments and areas where resources

should be protected be zoned for their present uses. Areas where development may be permitted but where this must be checked according to policies in the Plan will be placed in rural or holding zones which may be amended to permit development when conformity to Official Plan policy is established. Where development is not permitted this Bylaw may not be amended and specific zones may exclude development where necessary."

[para50] In my judgement the by-law should be given a liberal interpretation. I am satisfied that it is a structure within the meaning of the by-law. I accept the plaintiff's position that the by-law requires a building structure to be on land.

Building By-law, Building Code Act

[para51] The defendant argued that a similar problem arises with the building by-law and the Building Code Act. Neither would apply to the floating boathouse. Both apply only to buildings on land. The building by-law talks about how a building is to be constructed. Section 3(b) of the By-law 84-4 requires a building to be on concrete footings, on piers, it has be adequately reinforced. The purpose of the building by-law is to ensure a building is properly constructed in regards to safety. A building must be properly secured to the ground so it will not fall down. It does not deal with structures like the one before us that floats. It would not, in the defendant's position, be an accessory building within the meaning of By-law 84-4. The by-law is silent as to the requirement of an accessory building except it has a minimum floor area. It does not talk about the structure of an accessory building. It is the defendant's submission that the building by-law does not apply to a structure that floats.

[para52] In the Building Code Act, Section 27 provides:

"The Act and the Building Code made under s.19 of the Building Code Act supersedes all municipal by-laws respecting the construction or demolition of buildings as defined in s. 1."

[para53] The defendant argues that even if I find it is a structure within the meaning of the township building by-law, the Building Code supersedes it. The defendant argues that it is difficult to determine what a building is within the meaning of the Building Code Act.

[para54] The Act does give some parameters to buildings. It has to be of a certain size, it has to have walls, a roof and a floor. A floating boathouse, which is the structure before us, is not a building within the meaning of the Building Code Act. It is the intent of the Building Code Act to apply to things out of water. I am satisfied that it is a structure according to the definition in Black's Law Dictionary. It is therefore a structure within the meaning of the Building By-law and the Building Code.

[para55] The township agrees that the dock which Mr. Windover built predated the passing of the By-law and he can continue to use his structure as a floating dock.

[para56] The plaintiff is entitled to the relief as set out in the statement of Claim in paragraph 1 (a), (b) and paragraph 1(c) to be amended with the words "to tear down and remove the said building or structure" to be replaced with the words "to tear down and remove the walls and roof of the said building or structure."

[para57] I have not heard submissions on the issue of costs. If the parties can not agree on costs, they may make submissions. It does appear that the matter was novel and perhaps there should be no order as to costs.

Greater Toronto Airports Authority v. Corporation of the City of Mississauga

Corporation of the City of Mississauga v. Greater Toronto Airports Authority et al.

Greater Toronto Airports Authority v. Corporation of the City of Mississauga et al.

[Indexed as: Greater Toronto Airports Authority v. Mississauga (City)]

43 O.R. (3d) 9
[1999] O.J. No. 36
Docket Nos. 98-CV-145928, 98-CV-145932 and 98-CV-146719

Ontario Court (General Division)
MacPherson J.
January 19, 1999

APPLICATIONS for declarations with respect to the applicability of a municipal building code regime to a development project at a federally owned airport.

Brian G. Morgan and Mahmud Jamal, for Greater Toronto Airports Authority.
Thomas G. Heintzman, Q.C., Joseph J. Colangelo and John P. Brown, for the Corporation of the City of Mississauga and Shane Hamilton.
Peter M. Southey and Shelley C. Quinn, for the Attorney General of Canada.

R. Kent Gillespie, for the Regional Municipality of Peel.
James A. Easto, for Peel District School Board.
Chris G. Paliare, Andrew K. Lokan and Jolanta Malicki, for Nav Canada.

MACPHERSON J.: --

INTRODUCTION

The largest airport in Canada and the seventh largest in North America is the Lester B. Pearson International Airport ("Pearson Airport"). It occupies approximately 4,400 acres and includes airside, terminal, ground side and aviation support facilities. It currently has four runways in operation; approximately 90 planes can take off from or land on these runways every hour. The airport has three large commercial passenger terminals, each of which handles domestic, transborder (Canada -- United States) and international passengers and cargo. Fifty-nine airlines currently provide regular air service at the airport. In 1997 the airport handled approximately 26.1 million passengers and approximately 379,000 tonnes of air cargo.

Pearson Airport is located in the City of Mississauga. Indeed, the airport constitutes about 10 per cent of the land mass of the city. There is a very close relationship between the city and the airport. Many of the residents of Mississauga work at the airport and the activities at the airport inject substantial revenues into Mississauga. On the other hand, the airport could not exist without the services provided to it by Mississauga. To cite but one example, the Mississauga fire department has primary responsibility to respond to fires in all of the buildings at the airport.

Pearson Airport is about to become much larger. The projected increases in demand for the airport are quite striking. Passenger demand is expected to grow to 28 million annually by 2000 and to 36 million by 2010. Separate aircraft movements are forecast to reach 399,000 annually by 2000 and 480,000 by 2010. Air cargo traffic will increase, it is forecast, by 3.8 per cent annually until 2005 and by 2.5 per cent after 2005.

In order to cope with these projected increases in demand, a massive redevelopment project is underway at Pearson Airport. On the airside of the operation, a new air traffic control tower has been constructed and is in use. Additionally, three new runways, and corresponding taxiways, are to be built. On the ground side of the operation, the anchor of the project is the demolition of existing Terminals 1 and 2 and construction

of a massive new terminal. When the entire redevelopment project is completed, Pearson Airport should be able to handle traffic volumes in the range of 40 to 50 million passengers per year and corresponding increases in other airport activities such as cargo deliveries.

Unfortunately, the redevelopment project has given rise to serious dispute. Mississauga asserts that its building code by-law applies to the construction of all buildings at the airport. It also contends that the companies involved in the redevelopment project, namely Greater Toronto Airports Authority and Nav Canada, must pay development charges to Mississauga. These companies, supported by the Attorney General of Canada, resist both of Mississauga's claims. They say that Mississauga does not have the constitutional jurisdiction to apply its building code and development charges regimes to the redevelopment project.

The disagreement between the Greater Toronto Airports Authority and Mississauga was the subject of discussions and negotiations in 1996, 1997 and early 1998. Unfortunately, the jurisdictional dispute was not resolved and both parties resorted to litigation on the same day, April 20, 1998. This litigation raises questions of property law and of statutory interpretation. However, fundamentally the case is about the "old" pre-Charter of Rights and Freedoms component of Canadian constitutional law, namely the distribution of legislative powers between federal and provincial/municipal governments. The core of this case is about, in a word, federalism. It pits federal jurisdiction over the subject matters of federal public property and aeronautics against provincial/municipal jurisdiction over property and civil rights.

I. FACTUAL BACKGROUND

I propose to divide this section of the judgment into three parts: first, a description of the parties; second, a brief summary of the redevelopment project at Pearson Airport; and third, an overview of the proceedings that are before me.

(1) The Parties

The Greater Toronto Airports Authority ("GTAA") is a private non-profit corporation. Its Board of Directors is comprised of nominees from the regional municipalities of Durham, Halton, Peel and York, the City of Toronto, the Province of Ontario and the federal government. The Board includes members chosen to reflect the interests of the business community, organized labour and consumers. In December 1996, the assets, operations and undertakings of Pearson Airport were transferred to the GTAA pursuant to a lease between it and Her Majesty the Queen in Right of Canada as represented by the Minister of Transport. The GTAA's mandate under this lease is, essentially, to manage, operate and develop the airport for an initial 60-year period (with the possibility of a 20-year extension).

Nav Canada is similar to the GTAA. It is also a private non-profit corporation. It was established pursuant to the Civil Air Navigation Services Commercialization Act, S.C. 1996, c. 20, in order to own, operate and develop Canada's civil air navigation system. This system includes air traffic control systems together with a variety of communication, navigation and information services provided to aircraft in Canadian-controlled airspace. These services are provided through a variety of facilities across Canada. One of those facilities is a new air traffic control tower at Pearson Airport. The development project for this tower began in February 1995. Construction is now complete; the tower went into service about a week before the court hearing in these proceedings.

The City of Mississauga ("Mississauga") is a municipality. Almost all of Pearson Airport is located within its boundaries. The airport forms about 10 per cent of the land mass of Mississauga.

The Regional Municipality of Peel ("Peel") is the regional municipality containing Mississauga. Its interest in these proceedings is derivative; it is a recipient of development charges paid to Mississauga. Hence Peel supports Mississauga's attempt to collect these charges from the GTAA and Nav Canada.

The Attorney General of Canada represents the Government of

Canada in these proceedings. The federal government is the owner of all the land at Pearson Airport. Moreover, it has purported to take important steps with the land through the 1996@2 lease it entered into with the GTAA. The Attorney General of Canada supports the position taken in these proceedings by the GTAA and Nav Canada.

The GTAA, Nav Canada, Mississauga, Peel and the Attorney General of Canada are the five principal parties in these proceedings. For completeness, I should mention the other parties named in the styles of cause. The Peel District School Board was represented by counsel at the commencement of the five-day hearing. Counsel sought to state his client's position, namely agreement with the position of Mississauga and Peel. Counsel was given permission to do this and to retire from the hearing. Three other parties named in the style of cause did not appear at the hearing. They are Her Majesty the Queen in Right of Ontario, the Dufferin-Peel Roman Catholic Separate School Board and Mississauga Hydro-Electric Commission.

(2) The Project

In the introductory section of these reasons I provided some background about the redevelopment project at Pearson Airport. That background related essentially to the reasons for the project, namely a great increase in the demand for the aviation services provided by the airport. In this section I want to provide a brief description of the project itself.

A redevelopment project designed to equip a modern international airport to receive up to 50 million passengers per year is obviously a massive project. The project at Pearson Airport is divided into four components; a brief description of them might include the following:

(a) The Airside Development Project: The principal objectives of this project are to increase airfield capacity and to improve operational efficiency at Pearson Airport. The project includes the building of three new runways and their associated taxiway systems, the construction of a new centralized six-bay de-icing facility and the installation of an advanced aircraft surface monitoring and guidance control system aimed at boosting the airport's capacity during poor weather conditions.

(b) The Terminal Development Project: The primary objective of this project is to replace the outdated and capacity constrained Terminals 1 and 2 with a single new terminal building to be constructed on the site where Terminals 1 and 2 are currently located. The new terminal will be a very large facility capable of handling domestic, transborder and international air traffic and all commercial aircraft types. Additionally, airline space, including business and frequent flyer lounges, will be constructed and retail concession space will be interspersed throughout the terminal. The new terminal will have a three-level roadway system (i.e., arrivals, departures and service vehicle levels) and a new integrated Ground Transportation Facility including a multi-level 12,500 space public parking garage. The project will also preserve rights of way for future mass transit access to the airport.

(c) The Infield Development Project: This project is designed to meet the demand for ancillary aviation facilities and to accommodate relocated tenants who will be displaced as a result of the Terminal Development Project. Air cargo and flight kitchen tenants will be relocated to a multi-tenant air cargo complex and separate flight kitchen facilities on the infield between the runways. A restricted vehicular access will be constructed to link the infield with the highway system to the west of the airport. A restricted airside vehicular access linking the infield with the passenger terminal apron will be provided via a 500-metre airside tunnel under one of the runways. A new hangar for 747 aircraft will be constructed, as will a ten-gate temporary holdroom designed to augment the capacity of the existing terminals during construction of the new terminal.

(d) The Utilities and Airport Support Project: This project will provide an expanded electrical network, heating and roofing systems, new sewage systems, improved telecommunications infrastructure, and firefighting and maintenance support facilities for Pearson Airport.

(3) The Proceedings

There are three formal legal proceedings before me. Two were initiated on April 20, 1998. The first is the GTAA's application brought against Mississauga. The second is Mississauga's application brought principally against the GTAA but also against Nav Canada and the Attorney General of Canada (as true respondents) and against several other entities, including Peel (as respondents only for the sake of completeness). With respect to Mississauga's application, Peel has brought a counter-application against Mississauga and the GTAA; this counter-application has a narrow, and probably unnecessary, purpose; namely to ensure that Peel receives its share of any development charges Mississauga collects from the GTAA and Nav Canada.

The third application was initiated by the GTAA on April 30, 1998. It is simply a companion to the GTAA's main application. It is an appeal against decisions made by Shane Hamilton, a building inspector employed by Mississauga. Mr. Hamilton made orders requiring the GTAA to comply with Mississauga's building code by-law; the GTAA contends that it need not comply with this by-law.

In important respects, the GTAA's main application and Mississauga's application are mirror images of each other. They both pose essentially the same basic question -- can Mississauga's building code and development charges regimes be applied to the operations of the GTAA at Pearson Airport? For the sake of clarity and completeness I set out the relief sought by the GTAA:

1. The Applicant makes application for:

(a) A declaration that the Development Charges Act . . . the Building Code Act . . . the Planning Act . . . and any municipal by-laws and regulations enacted thereunder are inapplicable to each of the components of the Airport Development Program at Lester B. Pearson International Airport . . . namely, the Airside Development Project, the Terminal Development Project, the Infield Development Project, and the Utilities and Airport Support Project, by virtue of the provisions of the Constitution Act, 1867, and consequently, that the Respondent has no constitutional authority:

(i) to require the Applicant to pay the Respondent any amounts for development charges in respect of the Airport Development Program;

(ii) to require the Applicant to obtain building permits from the Respondent or to pay the Respondent any amounts for such permits in respect of the Airport

Development program; or

(iii) to require the Applicant to comply with provincial or municipal building codes in respect of the Airport Development Program.

In an amendment to its application the GTAA sought the following additional relief:

1. (a-1) A declaration that the Topsoil Preservation Act . . . and any municipal by-laws and regulations enacted thereunder, are inapplicable to the Airport Development Program at Lester B. Pearson International Airport, by virtue of the provisions of the Constitution Act, 1867 and consequently:

(i) the Notice of Contravention of Erosion and Sediment By-Law No. 512-91 dated July 24, 1998 made pursuant to the Topsoil Preservation Act is a nullity.

Mississauga seeks relief in a more detailed fashion in its application. In essence, however, the relief it seeks in paras. 1(a)-(j) of its notice of application is a direct response to the relief sought by the GTAA. Essentially, Mississauga seeks declarations to the effect that its building code and development charges regimes apply to the GTAA and Nav Canada.

However, in addition to the relief sought on the jurisdictional issues, Mississauga also seeks different kinds of relief in its amended notice of application. I set out in

full these matters:

(j) A declaration that pursuant to Article 5 of the Ground Lease, the Minister of Transport may require the GTAA to pay development charges to the City of Mississauga and may do so notwithstanding the provisions of the Ground Lease and may require Nav Canada to pay development charges pursuant to Article 3.01.04 of a Lease for Land effective December 2, 1996 between the Minister of Transport and Nav Canada;

(k) In the alternative, if an Order is made that the City of Mississauga does not have jurisdiction over the. GTAA in respect of the Building Code Act, a declaration that Mississauga Fire and Emergency Services is not required to respond to fires and/or emergencies at the Airport;

(l) A declaration that pursuant to Section 14.02 of the Ground Lease, the Minister of Transport was entitled to require the GTAA to negotiate, and the GTAA was required to negotiate, with the City of Mississauga on the basis of the obligations set forth in Section 14.02.03(a) to (g); and in particular,

(i) on the basis that the planning processes and procedures of general application of the City of Mississauga, including the Building Code Act and the City of Mississauga's Building Permit By-law, apply to the Airport as if it is property other than a federal public property;

(ii) on the basis that any development of the Airport will be in harmony with the overall planning of the Applicant; and

(iii) on the basis that any development of the Airport will not be inconsistent with the Approved Land Use Plan as required by Section 14.02.01.

II. LEGAL ISSUES

The legal issues that must be addressed in these proceedings are:

(1) Constitutional Issues

(a) Is Mississauga's building code regime inapplicable to construction at Pearson Airport because Pearson Airport is federal public property and therefore within the exclusive jurisdiction of Parliament under s. 91(1A) of the Constitution Act, 1867?

(b) Is Mississauga's building code regime inapplicable to construction at Pearson Airport because matters relating to airports, and especially the physical structures at airports, are part of the subject matter of aeronautics which is within the exclusive jurisdiction of Parliament under the "peace, order and good government" words in the preamble to s. 91 of the Constitution Act, 1867?

(c) Is Mississauga's building code regime inapplicable to construction at Pearson Airport because the airport is a federal work or undertaking within the exclusive jurisdiction of Parliament under s. 92(10)(a) of the Constitution Act, 1867?

(2) Development Charges Issue

Can Mississauga apply its development charges regime to construction at Pearson Airport?

(3) Ground Lease Issues

(a) Does Mississauga have standing to seek any relief with respect to the ground lease between the federal government and the GTAA?

(b) If the answer to (a) is in the affirmative, should this court make the declarations sought against the Minister of Transport and the GTAA with respect to the payment of development charges and negotiations between the GTAA and Mississauga?

(4) Withdrawal of Services Issue

Is Mississauga entitled to a declaration that the Mississauga Fire and Emergency Services is not required to respond to fires and emergencies at Pearson Airport if Mississauga's building code regime is inapplicable to construction at the airport?

I will consider these legal issues in turn.

III. ANALYSIS

(1) Constitutional Issues

In its notices of application, notice of constitutional question, and orders made by city officials, Mississauga has asserted that it can apply four provincial statutes, and municipal by-laws enacted thereunder, to the GTAA and Nav Canada. The four statutes are the Building Code Act, S.O. 1992, c. 23; the Development Charges Act, R.S.O. 1990, c. D.9; the Planning Act, R.S.O. 1990, c. P.13 and the Topsoil Preservation Act, R.S.O. 1990, c. T.12.

At the hearing, Mississauga formally abandoned its request for a declaration that the GTAA and Nav Canada had to comply with the Planning Act. Moreover, Mississauga advanced no argument with respect to the application of the Topsoil Preservation Act to the GTAA and Nav Canada. Since that statute applies specifically to part of the land (i.e., the topsoil), I think it fair to conclude that Mississauga has also abandoned its claim under it.

Mississauga maintains its position with respect to the Building Code Act and the Development Charges Act and the Mississauga by-laws enacted pursuant to these statutes. There are constitutional issues with respect to the application of both of these statutes to construction at Pearson Airport. Hence there is a fair degree of overlap in the analysis. Nevertheless, I think it convenient to deal first, and separately, with the building code regime because it raises squarely the central constitutional issues that must be addressed.

(a) The federal public property issue

There is no question that the Building Code Act is valid provincial legislation under s. 92(13) of the Constitution Act, 1867 which gives to provincial legislatures the power to enact laws in relation to "property and civil rights in the province". Nor is there any dispute that Mississauga's building code by-law has been properly enacted under the Building Code Act.

However, the GTAA and Nav Canada take the position that Mississauga cannot apply its building code regime to the redevelopment project at Pearson Airport because to do so would interfere with federal jurisdiction over "the public debt and property" contained in s. 91(1A) of the Constitution Act, 1867.

It is common ground that the federal government is the owner of the land at Pearson Airport. However, Mississauga contends that the application of its building code regime to the construction of buildings at the airport would not intrude into federal jurisdiction under s. 91(1A). Mississauga takes this position for a variety of reasons, some relating to the nature of its building code regime and others grounded in the fact that the federal government has leased the airport land to the GTAA. In brief form, I would describe Mississauga's arguments as follows:

(1) The proper characterization of the building code regime is safety in buildings, not the physical construction of buildings; hence the subject matter of the regime is not "property" and there can be no question of improper intrusion into federal jurisdiction over "federal public property".

(2) Alternatively, the building code regime applies to persons, not property; hence, as in (1), there is no question of intrusion.

(3) The building code regime can apply to the activities of third parties, such as the GTAA and Nav Canada, on federal land.

(4) The GTAA's leasehold interest in the airport land is not protected by s. 91(1A).

I will consider these arguments in turn.

(i) Mississauga's building code regime -- what is its subject matter?

Mississauga contends that the subject matter of the provincial Building Code Act and of its building code by-law regime is not buildings per se, but rather safety in buildings. Laws dealing with safety, submits Mississauga, are not in relation to property and therefore cannot run afoul of s. 91(1A) of the Constitution Act, 1867.

In support of its position, Mississauga relies on the user's guide to the 1997 edition of the Ontario Building Code, especially this passage at p. 1:

> The Code is essentially a set of minimum provisions respecting the safety of buildings with reference to public health, fire protection and structural sufficiency. It is not intended to be a textbook on building design, advice on which should be sought from professional sources. Its primary purpose is the promotion of public safety through the application of appropriate uniform building standards.

The problem with this passage, aside from the fact that it is not contained in the legislation itself, is that it speaks of intention and purpose, not subject-matter. The subject-matter of the Building Code Act is, in my view, as its title suggests, buildings. The Act is a relatively short and general one. However, its essence is, per s. 34, "standards for the

construction and demolition of buildings". The Act provides municipalities with extensive powers to regulate property development, such as by specifying rules for the construction, demolition, use and occupation of buildings and requiring the submission of plans to a municipal building department for approval before construction may proceed. The Act provides municipal building officials with the power to remove buildings from land and to have them demolished. Those officials are also empowered to make assessments of the structural adequacy of buildings for the purpose for which they are to be used, and they have broad p owers to enter and search property and to make orders against both owners of buildings and many other persons who have dealings with buildings, thus affecting the property rights of anyone with an interest in the property. The Act also provides for a number of liens which may be visited on the land itself. In short, the subject-matter of the Act is buildings and the land on which they are placed.

I make one other observation about Mississauga's argument on this point. "Safety" is not a separate subject matter for constitutional law purposes. It is not found in either s. 91 or s. 92 of the Constitution Act, 1867. If the Building Code Act is to apply at Pearson Airport, it must first be found to be valid under some head of power in s. 92. The obvious, and long accepted, head is s. 92(13), specifically the "property" component of that head. Mississauga's "safety" argument has the potential to remove the anchor for all its other arguments.

(ii) Mississauga's building code regime applies to persons, not property

Mississauga contends that its building code regime applies to the GTAA and Nav Canada personally. As expressed at para. 187 of its factum:

> In any event, provincial and municipal building code regimes are directed to persons, other than the federal Crown itself, who are constructing buildings even if they are using federal Crown lands. Any immunity of the federal Crown to these laws does not extend to such users.

I must confess that I have some difficulty understanding this argument. All laws apply to persons; that truism does not identify the subject-matter of a law. The subject-matter of the provincial and municipal building code regime is buildings and land. If there was any doubt on this score it was resolved by the recent decision of the Supreme Court of Canada in Ontario Home Builders' Assn. v. York Regional Board of Education, [1996] 2 S.C.R. 929, 137 D.L.R. (4th) 449, wherein Iacobucci

J. said, at p. 987:

> As noted above, the [Development Charges Act] is one component of a comprehensive regulatory framework governing land development in Ontario, comprised of at least nine different statutes: the Building Code Act . . . .

(Emphasis added)

The fact that the statute and subject-matter identified by Iacobucci J. -- namely, the Building Code Act and land development in Ontario -- apply, as Mississauga asserts, to "persons" is obvious; constitutionally speaking, it is also irrelevant.

(iii) Mississauga's building code regime can apply to the activities of the GTAA and Nav Canada on federal land

Mississauga submits that it is now well accepted that provincial laws of general application can apply to federal Crown lands provided they do not nullify or destroy the Crown's use, or intended use, of the land or affect a federal real property interest. In support of its submission, Mississauga relies on Construction Montcalm Inc. v. Minimum Wage Commission, [1979] 1 S.C.R. 754, 93 D.L.R. (3d) 641. In that case the question was whether Quebec's minimum wage legislation applied to Construction Montcalm's employees while they constructed an airport runway on federal Crown lands. The company claimed that the provincial law was inapplicable on federal Crown lands. The Supreme Court of Canada rejected this submission. Beetz J. said, at pp. 777-78:

> In its second submission, Montcalm contends that provincial law does not apply on federal Crown lands. Again I disagree. The exclusive power of the Province to make laws in relation to property and civil rights under s. 92(13) of the Constitution is territorially limited only by the words "in the Province", and Mirabel is located in the Province. The enumeration of exclusive federal powers in s. 91 of the Constitution, including the power to make laws in relation to the public debt and property, operates as a limitation ratione materiae upon provincial jurisdiction, not as a territorial limitation. The impugned provisions relate neither to federal property nor to any other federal subject but to civil rights and, in my view, they govern the civil rights of Montcalm and its employees on federal property. Federal Crown lands do not constitute extra-territorial enclaves within provincial boundaries any more than indian reserves.

In my view, this passage from Construction Montcalm does not support Mississauga's position in these proceedings. There is no question that provincial laws of general application can apply to a wide range of activities which occur on federal property. Labour relations, occupational safety and many other matters coming under the "civil rights in the province" component of s. 92(13), or indeed matters coming under other heads of provincial jurisdiction, can be regulated on federal property by provincial laws of general application.

However, there is a fundamental distinction between the subject-matter of activities on federal Crown lands and the subject matter of the lands themselves. Beetz J. makes explicit this distinction in the passage set out above when he says:

> The enumeration of exclusive federal powers in s. 91 of the Constitution, including the power to make laws in relation to the public debt and property, operates as a limitation ratione materiae upon provincial jurisdiction . . . .

Black's Law Dictionary, 5th ed. (1979) defines ratione materiae as "[b]y reason of the matter involved; in consequence of, or in the nature of, the subject-matter." The "nature of the subject-matter" of the Building Code Act, and Mississauga's building code regime enacted thereunder, is not activities on federal Crown lands; rather it is, as Iacobucci J. said in Ontario Home Builders' Assn., supra, "land development in Ontario" (p. 987). Accordingly, Mississauga's building code regime intrudes directly into the very subject matter that is reserved to Parliament under s. 91(1A) of the Constitution Act, 1867.

Construction Montcalm was not a case relating to a provincial

building code. However, there have been many such cases. With the possible exception of one case, they have all held that provincial building code laws cannot apply to the construction of buildings on federal Crown lands. One important case in this category is Ottawa (City) v. Shore & Horwitz Construction Co. (1960), 22 D.L.R. (2d) 247 (Ont. H.C.J.) in which Donnelly J. held that a private construction company was not required to obtain a municipal building permit before constructing a barracks building at Rockcliffe Airport in Ottawa. Donnelly J. said, at p. 251:

> The barracks built by the accused firm and the land on which they were located were owned by the Crown in the Right of Canada and formed part of the Public Debt and Property over which s. 91(1A) of the B.N.A. Act excludes the Province from any legislative authority and over which the Government of Canada has the exclusive right to legislate.

Donnelly J.'s decision was explicitly acknowledged and agreed with in Construction Montcalm by both the majority judges (per Beetz J. at p. 771) and dissenting judges (per Laskin C.J.C., at p. 759). See also International Aviation Terminals (Vancouver) Ltd. v. Richmond (Township), [1992] 4 W.W.R. 550, 89 D.L.R. (4th) 1 (B.C.C.A.) and Delta v. Aztec Aviation Group (1985), 28 M.P.L.R. 215 (B.C.S.C.); contra Shuniah (Township) v. Richard (1982), 37 O.R. (2d) 471, 136 D.L.R. (3d) 638 (H.C.J.) which is, in my respectful view, inconsistent with the decisions of the Supreme Court of Canada in both Construction Montcalm (1979) and Ontario Home Builders' Assn. (1996).

(iv) The GTAA's leasehold interest in the land at Pearson Airport is not protected by s. 91(1A) of the Constitution Act, 1867

Mississauga contends that the GTAA's leasehold interest in Pearson airport is not federal public property. As expressed at para. 178 of its factum:

> In these applications, the Court is not required to determine whether the OBCA, the Building Code and Mississauga's building permit by-law would apply to LBPIA if it were still owned and operated by HMQ Canada. What is very clear is that the leasehold interest and the buildings owned by GTAA and Nav Canada are not federal Crown property and thus s. 91(1A) of the Constitution Act does not apply to them.

In my view, this position is not supported by the authorities. Section 91(1A) is an important federal power with respect to federal Crown land. In Reference re Employment & Social Insurance Act, [1936] S.C.R. 427, Duff C.J.C. (dissenting, but not on this point) said, at p. 431:

> The exclusive legislative authority of Parliament extends inter alia to the subject "The Public Debt and Property". It cannot be doubted, we think, that "property" here is used in its broadest sense, and includes every kind of asset.

In his leading text, Natural Resources and Public Property under the Canadian Constitution (Toronto: University of Toronto Press, 1969), Professor G.V. La Forest said, at p. 134:

> In a word, the term "property" in section 91(1A) is used in its broadest sense, and includes every kind of asset and partial interest.

It is also clear that the broad federal power over federal public property acts not only as a positive source of federal jurisdiction, but also operates defensively to shield such property from provincial laws in relation to it. According to Laskin's Canadian Constitutional Law, 3rd ed. (Toronto: Carswell, 1969) at p. 556:

> Federal legislative authority in relation to federal public property clearly operates defensively to preclude provincial legislation against such property: see Spooner Oils Ltd. v. Turner Valley Gas Conservation Board, [1933] S.C.R. 629.

The Spooner Oils case referred to in this passage is central to these proceedings relating to jurisdiction over construction at Pearson Airport. In that case an individual held a lease of public lands in the Turner Valley, granted by federal regulations under the Dominion Lands Act, giving him the right to work the lands for petroleum and natural gas. The province

of Alberta then passed a statute, the Turner Valley Gas Conservation Act, 1932, whose broad purpose was to reduce the loss of gas in the Turner Valley by burning it as waste.

The Supreme Court of Canada held that the provincial law could not apply to the leased federal public property. Speaking generally about the relationship between s. 91(1A) of the Constitution Act, 1867 and provincial laws affecting federal public property, Duff C.J.C. said, at p. 643:

> Indeed, the public lands of the Dominion are vested in Parliament, in the sense that only by virtue of Parliamentary authority can such lands be disposed of or dealt with. The right of the lessee, in each case, is to take from a specified tract of land, which is leased to him for that purpose alone, certain substances and to convert them to his own use. Until so taken, they remain, subject to his right to take them during the specified term, the property of the Dominion -- part of the public lands of the Dominion. To take away this right, or to prohibit the exercise of it, would be to nullify pro tanto the statutory enactment creating the right. It is obvious, of course, that the provincial legislature could not validly have passed the enactments of the Dominion Lands Act, or the Regulations of 1910 and 1911, under which the lessee became entitled to exercise his rights.

(Emphasis added)

Against the background of these general observations, Duff C.J.C. turned to consider whether the fact that the provincial law applied to federal public property that had been leased to a private party made any difference. He held that it did not, stating at pp. 643-44:

> Nor is it material that, by the lease, an interest in the tract has passed to the lessee. The Dominion Lands Act, and the Regulations enacted pursuant to it, give statutory effect to plans for dealing with Dominion public lands, including lands containing petroleum and natural gas, which, it must be assumed, were conceived by Parliament, and the authorities nominated by Parliament, as calculated to serve the general interest in the development and exploitation of such lands and the minerals in them. It is not competent to a provincial legislature pro tanto to nullify the regulations, to which Parliament has given the force of law in execution of such plans, by limiting and restricting the exercise of the rights in the public lands, created by such regulations in carrying the purpose of Parliament into effect. Indeed, an administrative order, which the legislature has professed to endow with the force of statute, directed against a tract of public land, the property of the Dominion, held by a lessee under the Regulations of 1910 and 1911, and which professed to regulate the exercise, by the lessee, of his right to take gas and petroleum from the demised lands, would truly be an attempt to legislate in relation to a subject reserved for the exclusive legislative jurisdiction of the Dominion by s. 91(1), "The Public . . . Property" of the Dominion.

In my view, all of this passage, but especially the last sentence, has direct application to the present case. The application of the Mississauga building code regime to Pearson Airport would be an application aimed at the land and buildings at the airport; it would be, in Duff C.J.C.'s words, "an attempt to legislate in relation to . . . 'The Public . . . Property' of the Dominion".

There is a second reason why Spooner Oils is conclusive against Mississauga's argument that the existence of a lease to a private party removes the leased federal Crown land from the protection of s. 91(1A). In the passages set out above Duff C.J.C. stated clearly that s. 91(1A) created a subject matter limitation against provincial laws -- they cannot apply to federal lands qua federal lands. Later in Spooner Oils, Duff C.J.C. stated, at p. 646:

> Where the regulations, under which Dominion lands are leased, or the stipulations of such leases, contain provisions dealing with the very subject matter of the provincial legislation, then it is quite obvious that such regulations and stipulations must prevail in case of conflict.

(Emphasis added)

The emphasized words are, in my view, important in the present case. They establish a second reason why Mississauga's argument must fail. The ground lease between the federal government and the GTAA is not silent on the topic of building codes; on the contrary, it deals with this subject matter explicitly in s. 14.03.04:

> Where the tenant and the municipality in which a part of the Airport is located have not entered into a Municipal-Authority Agreement, no new facility shall be constructed on such part of the Airport and no Existing Facility on such part of the Airport shall be altered in a way that is not in full compliance with the National Building Code and the National Fire Code of Canada which, in such circumstances, shall be deemed to be the applicable building and construction standards for purposes of this Lease.

The GTAA and Mississauga have not been able to conclude a Municipal-Authority Agreement. In that circumstance, the ground lease is perfectly clear -- all construction must comply with the National Building Code and the National Fire Code. This result flows from a stipulation in the lease which, according to Duff C.J.C. in Spooner Oils, is permissible. Moreover, the stipulation in the lease, in Duff C.J.C.'s words, "must prevail in case of conflict" with a provincial law dealing with the same subject matter. In my view, there is a clear conflict. The ground lease states that the National Building Code and National Fire Code must be applied; Mississauga says that the GTAA must comply with its own building code regime.

(v) Conclusion

The application of Mississauga's building code regime to the demolition, alteration and construction of buildings at Pearson Airport would intrude into exclusive federal jurisdiction over federal public property.

Strictly speaking, this conclusion is sufficient to dispose of the building code issue in these proceedings. However, in the interests of completeness, I will now consider the aeronautics and federal undertakings arguments advanced by the GTAA and Nav Canada.

(b) The aeronautics issue

As a second line of constitutional attack, the GTAA, Nav Canada and the Attorney General of Canada contend that Mississauga cannot apply its building code regime to the redevelopment project at Pearson Airport because to do so would interfere with federal jurisdiction over aeronautics.

Since 1932 the subject matter of aeronautics has been assigned to federal jurisdiction under what is known as the "national dimensions" component of the peace, order and good government power. As expressed by Lord Sankey L.C. in Re Regulation & Control of Aeronautics in Canada, [1932] A.C. 54 at p. 77, 101 L.J.P.C. 1:

> . . . substantially the whole field of legislation in regard to aerial navigation belongs to the Dominion. There may be a small portion of the field which is not by virtue of specific words in the British North America Act vested in the Dominion; but neither is it vested by specific words in the Provinces. As to that small portion it appears to the Board that it must necessarily belong to the Dominion under its power to make laws for the peace, order and good government of Canada. Further, their Lordships are influenced by the facts that the subject of aerial navigation and the fulfilment of Canadian obligations under s. 132 are matters of national interest and importance; and that aerial navigation is a class of subject which has attained such dimensions as to affect the body politic of the Dominion.

In this passage Lord Sankey twice used the expression "aerial navigation" to describe the "class of subject" being assigned to federal jurisdiction. In the first major decision of the Supreme Court of Canada dealing with aeronautics, Johannesson v. West St. Paul (Rural Municipality), [1952] 1 S.C.R. 292, [1951] 4 D.L.R. 609, this federal subject matter was described by several judges: "the whole field of aerial transportation" (Rinfret C.J.C., p. 303); "the subject of air navigation" (Kerwin J., p. 308); "aerial navigation as a whole" (Kellock J., p. 311); and "the operation of the aeroplane

from the moment it leaves the earth until it returns thereto" (Estey J., p. 319).

All of these early formulations might create the visual image of airplanes actually in the air as the core content of the federal aeronautics power. However, it is clear that federal jurisdiction is not just celestial; it is also terrestrial. It extends to those things in the air and on the ground that are essential for "aerial navigation" or "air transportation" to take place.

A long line of cases establishes that airports, or in the early cases "aerodromes", are integral to the subject matter of aeronautics. Johannesson itself dealt with the location of an aerodrome in Manitoba. The Supreme Court held that a municipal by-law could not affect this subject matter. Kellock J. said, at p. 311:

> It is no doubt true that legislation of the character involved in the provincial legislation regarded from the standpoint of the use of property is normally legislation as to civil rights, but use of property for the purposes of an aerodrome, or the prohibition of such use cannot, in my opinion, be divorced from the subject matter of aeronautics or aerial navigation as a whole.

Estey J. said, at p. 319:

> Legislation which in pith and substance is in relation to the aerodrome is legislation in relation to the larger subject of aeronautics and is, therefore, beyond the competence of the Provincial Legislatures.

The inclusion of airports within the federal aeronautics power has been confirmed recently by the Supreme Court of Canada. In Air Canada v. Ontario (Liquor Control Board), [1997] 2 S.C.R. 581, 148 D.L.R. (4th) 193, Iacobucci J. said, at p. 610:

> . . . the federal aeronautics jurisdiction encompasses not only the regulation of the operation of aircraft, but also the regulation of the operation of airports.

Anchored in Johannesson (1952) and Air Canada (1997), and in many similar cases between these two, another long line of cases has held that a variety of provincial and municipal property development laws are inapplicable to airports: see, for example, Orangeville Airport Ltd. and Caledon (Town) (1976), 11 O.R. (2d) 546 (C.A.); Delta v. Aztec Aviation Group, supra; International Aviation Terminals (Vancouver) Ltd. v. Richmond (Township) (1991), 54 B.C.L.R. (2d) 325, 4 M.P.L.R. (2d) 282 (S.C.), reversed but the appeal court agreed with the trial judge on this point, supra; Toronto (City) v. Canada (Minister of Transport) (1990), 35 F.T.R. 214; Walker v. Ontario (Minister of Housing) (1983), 41 O.R. (2d) 9, 144 D.L.R. (3d) 86 (C.A.); Venchiarutti v. Longhurst (1992), 8 O.R. (3d) 422 (C.A.); and Niagara Falls (City) v. Executive Helicopter Services Inc. (1994), 23 M.P.L.R. (2d) 296 (Ont. Prov. Div.).

Mississauga contends that several of these cases do not deal with the subject matter in issue in these proceedings, namely construction at an airport. Johannesson itself dealt with a zoning by-law, as did Orangeville, Walker and Venchiarutti. Mississauga concedes that four of the cases, Delta, International Aviation Terminals, Toronto v. Canada (Minister of Transport) and Executive Helicopter Services, dealt with the relationship between municipal building code by-laws and construction at airports; Mississauga submits that these decisions by, respectively, a judge of the British Columbia Supreme Court, the British Columbia Court of Appeal, a judge of the Federal Court, Trial Division, and a judge of the provincial division of this court, were wrongly decided, are not binding on me, and should not be followed.

Mississauga contends that not everything that takes place at an airport is integral to aeronautics. In support of this proposition, Mississauga relies on a line of cases which has held that certain activities that take place at an airport, or even inside an airplane, can be regulated by provincial and municipal laws: see, for example, Air Canada v. Ontario (Liquor Control Board), supra -- provincial tax permitted on sales of in-flight liquor; KLM Royal Dutch Airlines v. British Columbia (1998), 156 D.L.R. (4th) 203, 47 B.C.L.R. (3d) 207 (C.A.) --

provincial tax applied to airline fuel; United Assn. of Journeymen & Apprentices of the Plumbing & Pipefitting Industry of the United States and Canada, Local 496 v. Vipond Automatic Sprinklers Co. (1976), 67 D.L.R. (3d) 381 (Alta. S.C.) -- provincial labour law applied to employees constructing a building at an airport; Murray Hill Limousine Service Ltd. v. Batson, [1965] B.R. 778 (Que. C.A.) -- provincial labour law applied to an airport porter service; Service d'Entretien Avant-Garde Inc. v. Canada Labour Relations Board (1985), 26 D.L.R. (4th) 331 (Que. S.C.) -- provincial labour law applied to employees of a private company which had a contract to provide cleaning services at an airport; Toronto Auto Parks (Airport) Ltd. v. Canadian Union of Public Employees, [1978] O.J. No. 1187 (Div. Ct.) -- provincial labour law applied to a company operating a parking facility at an airport; and Colonial Coachlines Ltd. v. Ontario (Highway Transport Board), [1967] 2 O.R. 25, 62 D.L.R. (2d) 270 (H.C.J.) -- provincial licensing law applied to a limousine company transporting air crews and passengers to an airport.

Based on these cases, Mississauga advances the proposition that some activities which take place at or near an airport, and even inside a flying airplane, are not integral to aeronautics. The GTAA, Nav Canada and the Attorney General of Canada do not quarrel with that proposition.

Mississauga further submits that the construction of all buildings at an airport is a subject-matter that is not integral to aeronautics. It is this further submission that divides the parties in these proceedings. The GTAA, Nav Canada and the Attorney General of Canada draw a different line than Mississauga; they say that the construction of buildings at an airport is integral to aeronautics and is, therefore, beyond the reach of provincial and municipal laws.

As the preceding paragraphs make clear, all parties identified and considered a large number of cases in support of their positions. Interestingly, and in my view correctly, all counsel identified the same case as the most important one for resolving what I have labelled "the aeronautics issue". That case is the decision of the Supreme Court of Canada in Construction Montcalm Inc. v. Minimum Wage Commission, supra. In their facta, and especially in their oral submissions, counsel devoted a great deal of time to this decision. Such close attention was entirely appropriate because, in my view, Construction Montcalm does resolve the aeronautics issue in these proceedings.

Construction Montcalm was a case relating to construction work on the runways at Mirabel Airport. The legal issue was whether Quebec's Minimum Wage Act applied to the employees of a private company which, under contract with the federal Crown, was performing construction work on the runways. The Supreme Court of Canada held that the law could apply. In his judgment for a majority of the court, Beetz J. dealt very carefully with the relationship between provincial laws of general application and the federal subject matter of aeronautics. Moreover, he did this in the context of construction work at airports, precisely the central issue in these proceedings.

I begin my attempt to apply Construction Montcalm to the issues before me by setting out an extended passage from Beetz J.'s judgment, at pp. 769-74 [footnotes omitted]:

> The main submission made on behalf of Montcalm starts from the premise that aeronautics is a class of subjects which comes under exclusive federal authority; Johannesson v. The Rural Municipality of West St. Paul. It was contended that aeronautics comprises the matter of airports and that the construction of airports, including the conditions of employment of workers engaged in the construction of airports, whoever employs them, is an integral part of aeronautics.
>
> The issue was also discussed as if the Mirabel airport were a federal work or undertaking, and it could indeed be argued that an international airport is a work which forms part of an undertaking connecting a province with a foreign country or extending beyond the limits of a province. An obiter dictum of Lord Watson in Canadian Pacific Railway v. Notre-Dame de Bonsecours (the Notre-Dame de Bonsecours case) at p. 372 was quoted to us in support of Montcalm's main submission:

> . . . the Parliament of Canada has, in the opinion of their Lordships exclusive right to prescribe regulations for the construction, repair and alteration of the railway, and for its management, and to dictate the constitution of the company;

(Underlining is mine [i.e. Beetz J.'s])

The construction of an airport, it was argued, is as much a matter for exclusive federal control as the construction of a federal railway.

In my view, the main submission is not supported by the principles enunciated above: it does not meet the test set out in the Stevedoring case according to which Parliament has no authority over labour relations except in so far as such authority is an integral element of its primary jurisdiction over some other matter; furthermore, it implicitly but clearly ignores the requirement of the Agence Maritime & Letter Carriers' cases that an undertaking, service or business be not characterized as a federal or provincial one on account of casual factors.

The construction of an airport is not in every respect an integral part of aeronautics. Much depends on what is meant by the word "construction". To decide whether to build an airport and where to build it involves aspects of airport construction which undoubtedly constitute matters of exclusive federal concern: the Johannesson case. This is why decisions of this type are not subject to municipal regulation or permission: the Johannesson case; City of Toronto v. Bell Telephone Co.; the result in Ottawa v. Shore and Horwitz Construction Co. can also be justified on this ground. Similarly, the design of a future airport, its dimensions, the materials to be incorporated into the various buildings, runways and structures, and other similar specifications are, from a legislative point of view and apart from contract, matters of exclusive federal concern. The reason is that decisions made on these subjects will be permanently reflected in the structure of the finished produ ct and are such as to have a direct effect upon its operational qualities and, therefore, upon its suitability for the purposes of aeronautics. But the mode or manner of carrying out the same decisions in the act of constructing an airport stand on a different footing. Thus, the requirement that workers wear a protective helmet on all construction sites including the construction site of a new airport has everything to do with construction and with provincial safety regulations and nothing to do with aeronautics: see R. v. Beaver Foundations Ltd. and R. v. Concrete Column Clamps (1961) Ltd. See also Re United Association of Journeymen, etc. Local 496 and Vipond Automatic Sprinkler Co. Ltd., where Cavanagh J. of the Alberta Supreme Court held that "the fact of construction of a building called an air terminal does not . . . show that the construction is connected with aeronautics" and that, while an aerodrome is a federal work, employees constructing such a building are subject to provincial labour relations legislation. In my opinion what wages shall be paid by an independent contractor like Montcalm to his employees engaged in the construction of runways is a matter so far removed from aerial navigation or from the operation of an airport that it cannot be said that the power to regulate this matter forms an integral part of primary federal competence over aeronautics or is related to the operation of a federal work, undertaking, service or business. (For the purpose of the main submission, it is unnecessary to express any view as to whether Parliament could, in a provision of an ancillary nature, incidentally touch upon the conditions of employment of workers engaged in the construction of airports).

The Notre-Dame de Bonsecours case is relied on by Montcalm. The Judicial Committee held that provincial legislation prescribing the cleaning of ditches was intra vires of the provincial legislature and applicable to a federal railway since it did not affect the structure of the railway. Lord Watson's dictum, quoted above, is preceded by this statement: (at p. 372)

> The British North America Act, whilst it gives the legislative control of the appellants' railway quÔ railway to the Parliament of the Dominion, does not declare that the railway shall cease to be part of the provinces in which it is situated, or that it shall, in other respects,

be exempted from the jurisdiction of the provincial legislatures.

(Underlining is mine [i.e. Beetz J.'s])

Lord Watson's dictum is then followed by the following passage (at pp. 372 and 373):

It was obviously in the contemplation of the Act of 1867 that the "railway legislations", strictly so called, applicable to those lines which were placed under its charge should belong to the Dominion Parliament. It therefore appears to their Lordships that any attempt by the Legislature of Quebec to regulate by enactment, whether described as municipal or not, the structure of a ditch forming part of the appellant company's authorized works would be legislation in excess of its powers. If, on the other hand, the enactment had no reference to the structure of the ditch, but provided that, in the event of its becoming choked with silt or rubbish, so as to cause overflow and injury to other property in the parish, it should be thoroughly cleaned out by the appellant company, then the enactment would, in their Lordships' opinion, be a piece of municipal legislation competent to the Legislature of Quebec.

(Underlining is mine [i.e. Beetz J.'s])

The views of the Judicial Committee were further explained in Madden v. Nelson and Fort Sheppard Railway Company, where a provincial statute aimed at obliging federal railway companies to erect proper fences on their railways by imposing civil liability upon them for the killing or maiming of cattle, was found ultra vires (at pp. 628 and 629):

Their Lordships think it unnecessary to do more than to say that in this case the line seems to have been drawn with sufficient precision in the case of the Canadian Pacific Ry. Co. v. Corporation of the Parish of Notre-Dame de Bonsecours where it was decided that although any direction of the provincial legislature to create new works on the railway and make a new drain and to alter its construction would be beyond the jurisdiction of the provincial legislature, the railway company were not exempted from the municipal state of the law as it then existed -- that all landowners, including the railway company, should clean out their ditches so as to prevent a nuisance. It is not necessary to do more here than to say that this case raises no such question anywhere near the line, because in this case there is the actual provision that there shall be a liability on the railway company unless they create such and such works upon their roadway. This is manifestly and clearly beyond the jurisdiction of the provincial legislature.

(Underlining is mine [i.e. Beetz J.'s])

These passages make it clear that what the Judicial Committee had in mind in referring to the power of regulating the construction of a railway was those directions which result in the structural alteration of a federal work, or in the creation of new works, or, presumably and a fortiori, in the prohibition of new works. But, as is shown by the Notre-Dame de Bonsecours case, at p. 374, provincial law applies even if it affects "the physical condition" of a railway ditch, as long as the "structure of the ditch" remains intact.

In the case at bar, the impugned legislation does not purport to regulate the structure of runways. The application of its provisions to Montcalm and its employees has no effect on the structural design of the runways; it does not prevent the runways from being properly constructed in accordance with federal specifications; nor has it even been shown, assuming it could be, that "the physical condition" of the runways, as opposed to their structure, is affected by the wages and conditions of employment of the workers who build them.

Mississauga relies on this passage to support its submission that the activity of constructing buildings at an airport is different than the operation of those buildings after they are constructed. Provincial laws can apply to the former but not to the latter. Mississauga especially relies on Beetz J.'s

juxtaposition of subject-matters at pp. 770-71 of the judgment. On the federal jurisdiction side are decisions concerning whether and where to build an airport, the design of a future airport, its dimensions and the materials to be incorporated into the buildings. On the provincial jurisdiction side are "the mode or manner of carrying out decisions in the act of constructing the airport". Mississauga submits that its building code regime falls on "the act of constructing" side of the line.

With respect, I disagree. In my view, a careful reading of Beetz J.'s decision supports the GTAA's, Nav Canada's and the Attorney General of Canada's position that the actual physical structure of buildings at an airport is part of the protected federal subject matter of aeronautics. I reach this conclusion for several reasons.

First, as illustrations of the types of matters that relate to the mode or manner of carrying out decisions in the act of constructing the airport, Beetz J. cites three cases (at p. 771) -- R. v. Beaver Foundations Ltd. (1968), 69 D.L.R. (2d) 649 (Ont. Mag. Ct.); R. v. Concrete Column Clamps (1961) Ltd., [1972] 1 O.R. 42 (Prov. Ct.); and Vipond Automatic Sprinkler Co., supra.

Vipond Automatic Sprinkler Co. is one of the many decisions in which provincial labour laws have been held to apply to employees involved in construction work at an airport; it is an "activity" case. So is Concrete Column Clamps which held that a provincial construction safety law would apply to a company engaged in a construction work on a federal building. After reviewing some case law, Hutton Prov. Ct. J. said, at p. 56:

> These cases make it clear to me that a Province is not precluded from regulating activities of persons within the Province simply because the activities occur on properties owned by the Crown in Right of Canada.

(Emphasis added)

The third case, Beaver Foundation, is, in my view, a particularly instructive one. In a short three-page judgment in 1968, Magistrate Drukarsh of the County of Renfrew Magistrate's Court held that a provincial construction safety law could apply to workers on an interprovincial bridge. He said, at p. 651:

> [The Construction Safety Act, 1961-62] is a regulatory Act and strictly for the purpose of saving lives and workmen from harm and injury.

Importantly, Magistrate Drukarsh contrasted this permitted application of the law with something that would be impermissible. He said, at pp. 650-51:

> If the Construction Safety Act, 1961-62, in any way forbid the building of the bridge or in any way instructed or gave instructions as to how many bricks were to be placed in any portion of the bridge or how much steel was to be placed in any portion of the bridge or were it to try to enforce the thickness, width, length or breadth of the bridge, I would have no hesitation in ruling that this Act did not apply.

This passage contains a practical description of precisely the kind of matters that building codes address. Beetz J.'s decision to cite this case -- really quite an obscure and terse decision -- is, in my view, a clear signal that he agreed with the distinction made by the magistrate. Activities relating to the construction of buildings, such as labour relations or occupational safety, are different than the physical structure of buildings.

Second, the cases cited by Beetz J. as being on the federal jurisdiction side of the dividing line uniformly support the position of the parties opposing the application of Mississauga's building code regime to the redevelopment project at Pearson Airport. Toronto (City) v. Bell Telephone Co., [1905] A.C. 52, was a case in which it was held that the City of Toronto could not prevent the construction of telephone lines under the streets of the city. Ottawa v. Shore and Horwitz Construction Co., supra, another quite obscure case cited by Beetz J., and specifically stated by him to be supportable under the federal aeronautics power, was a case in

which the trial judge held that a municipal building code

regime could not apply to the construction of a military barracks at an airport. In Canadian Pacific Railway v. Notre-Dame de Bonsecours, [1899] A.C. 367, which Beetz J. discusses in detail, the Privy Council drew a distinction between a provincial law prescribing the cle aning of ditches (applicable to ditches alongside a federal railway) and one that would regulate "the structure of a ditch" forming part of the railway's works (inapplicable). And in Madden v. Nelson & Fort Sheppard Railway Co., [1899] A.C. 626, a provincial law compelling federal railway companies to erect fences on their railways was held to be ultra vires.

Third, Beetz J. states in a clear fashion the reason for the distinction between the physical structure of buildings and activities that take place during the construction process. He said, at p. 771:

> Similarly, the design of a future airport, its dimensions, the materials to be incorporated into the various buildings . . . are . . . matters of exclusive federal concern. The reason is that decisions made on these subjects will be permanently reflected in the structure of the finished product and are such as to have a direct effect upon its operational qualities and, therefore, upon its suitability for the purposes of aeronautics.

In my view, the practical on the ground decisions made by building inspectors have the potential to relate directly to "the structure of the finished product" and can have "a direct effect upon its operational qualities".

Fourth, it seems to me that in the final two paragraphs of the long passage from Beetz J.'s judgment set out above he makes it abundantly clear that provincial laws cannot apply to the physical structures associated with the operation of an airport. His choice of words in describing what is beyond provincial jurisdiction is telling -- "directions which result in the structural alteration", "the creation of new works", "the prohibition of new works", "the structure of", "the structural design of", "properly constructed".

For these reasons, I conclude that Construction Montcalm is decisive against Mississauga's claim. Mississauga cannot apply its building code regime to the redevelopment project at Pearson Airport.

Before leaving the aeronautics issue, it is necessary to deal with one final argument advanced by Mississauga. It is an alternative argument. Mississauga invites the court to examine in detail all of the buildings that will be demolished, altered and newly constructed as part of the redevelopment project at Pearson Airport and declare which are central or integral to the operation of an airport and which are not. Those buildings which are not central, Mississauga submits, could be subject to its building code regime.

I do not think it necessary to embark upon such an exercise. In argument, when Mississauga's counsel was asked to identify buildings which could fall on the provincial side of the line, he identified the parking garage and the electric generation plant. When it is recalled that Pearson Airport currently handles 26.1 million passengers annually and that the redevelopment project will increase potential capacity to 50 million passengers, a large parking garage attached to the terminals and a new electric generation plant strike me as entirely appropriate, and aeronautics-related, components. In cross-examination on their affidavits the two experts put forward by Mississauga agreed that Pearson Airport is a modern international airport and that all of the facilities the GTAA

proposes to build as part of the Airport Development Program are required for a modern international airport: see cross-examinations of Alexander Metcalf, October 9, 1998, transcripts, vol. 1, tab 1, pp. 31-34 and 37-52; and Jean-Marc Labelle, October 16, 1998, transcripts, vol., tab 7, pp. 8-9, 15-19 and 19-22.

I acknowledge that it might be possible to operate an international airport without an on-site parking garage. And I suppose that the electric generation plant could be placed in the quiet of the Caledon hills and hooked up to the airport. However, in my view, if these facilities are required for the

operation of an international airport, I see no reason for not locating them at the airport. There is nothing wrong with the GTAA's decision to integrate them into a massive project which also involves the construction of runways, terminal buildings and an air traffic control tower.

For these reasons, I conclude that the application of Mississauga's building code regime to the demolition, alteration and construction of buildings in the redevelopment project at Pearson Airport would intrude into exclusive federal jurisdiction over aeronautics.

(c) The federal works and undertakings issue

As a third line of constitutional attack, the GTAA, Nav Canada and the Attorney General of Canada contend that Mississauga cannot apply its building code regime to the redevelopment project at Pearson Airport because to do so would interfere with federal jurisdiction over a federal work or undertaking pursuant to s. 92(10)(a) of the Constitution Act, 1867.

All counsel proceeded on the basis that there was no real difference between the aeronautics and works and undertakings issues. In my view, this is correct. In Construction Montcalm, supra, Beetz J. said, at pp. 769-70:

> The main submission made on behalf of Montcalm starts from the premise that aeronautics is a class of subjects which comes under exclusive federal authority . . .
>
> The issue was also discussed as if the Mirabel airport were a federal work or undertaking, and it could indeed be argued that an international airport is a work which forms part of an undertaking connecting a province with a foreign country or extending beyond the limits of a province.

Beetz J. then proceeded to his analysis of the relevant legal principles and case law. In that analysis he did not separate aeronautics and federal works and undertakings.

My conclusion is, therefore, the same as it was on the aeronautics issue. The application of Mississauga's building code regime to the demolition, alteration and construction of buildings in the redevelopment project at Pearson Airport would intrude into exclusive federal jurisdiction over federal works and undertakings.

(2) The Development Charges Issue

Mississauga asserts that the GTAA and Nav Canada must pay municipal development charges in connection with the redevelopment project at Pearson Airport. In its notice of application, Mississauga makes this assertion on two bases, statutory and common law:

> 1. The Applicant makes application for:
>
> (a) A declaration that . . . the GTAA and . . . NAV CANADA . . . are required to pay development charges with respect to any development or redevelopment at the Lester B. Pearson International Airport in accordance with the provisions of the Development Charges Act . . . and By-law 532-91 (Development Charge By-law):
>
> (b) In addition or in the alternative a declaration that . . . the GTAA and . . . NAV CANADA . . . are required to pay any capital costs of the applicant referrable to any development of the Lester B. Pearson International Airport on a fair, reasonable and equitable basis.

I will deal with these two bases for Mississauga's claim in turn.

(a) Statutory basis

Mississauga concedes that the statutory anchor for its development charges claim against the GTAA and Nav Canada is inextricably linked to the application of its building code regime to construction at Pearson Airport. Since I have concluded that Mississauga's building code regime is inapplicable to construction at Pearson Airport, it follows

that, as a matter of both statutory interpretation and constitutional law, Mississauga's development charges regime is also inapplicable.

(b) Common law basis

Mississauga seeks a declaration that the GTAA and Nav Canada are required to pay Mississauga's capital costs associated with the redevelopment project at Pearson Airport on "a fair, reasonable and equitable basis". The principal authority relied on by Mississauga in support of this submission is the decision of the Privy Council in Canada (Minister of Justice) v. Levis (City), [1919] A.C. 505. In that case the court was asked to determine whether the municipality was entitled to payment from the Government of Canada, which was the owner of a building situate in the municipality, for the water supply being delivered to the building. The City conceded that the government was free from all liability to taxation, but claimed that the government was not entitled to a supply of water without payment. The Privy Council agreed with the City. Lord Parmoor said, at p. 511:

> Water supplied at the cost of the municipality from artificially constructed waterworks is in the nature of a merchantable commodity, and their Lordships are of opinion, that unless some statutory right is established, the Government of Canada cannot claim to have a supply of water for the Government building, unless it is prepared to pay and to continue to pay in respect thereof a fair and reasonable price.

In my view, City of Levis has no application to these proceedings. The Levis principle provides only that a fair and reasonable payment should be made for merchantable commodities, like water, provided by a municipality to a customer. The GTAA and Nav Canada, qua customers, do not quarrel with this principle. They have paid, and will continue to pay, for any commodities or services they purchase.

Development charges are very different from charges for commodities. They are in the nature of taxes on development: see Ontario Home Builders' Assn. v. York Region Board of Education, supra, and Ontario Cancer Treatment and Research Foundation v. Ottawa (City) (1998), 38 O.R. (3d) 224, 157 D.L.R. (4th) 38 (C.A.). The Province of Ontario and the municipality of Mississauga have together enacted a statutory development charges regime. Mississauga has asserted that this regime is applicable to all development projects in Mississauga, including the redevelopment project at Pearson Airport. That is how Mississauga says a "fair and reasonable" payment should be made. I have held that its attempt to apply this regime to Pearson Airport fails for constitutional reasons. In such a circumstance, Mississauga's attempt to achieve the same result through reliance on a common law principle relating to a different subject matter (commodities) is a fairly obvious attempt to do indirectly what it cannot do directly.

There is a further reason why the declaration sought by Mississauga should not be made. The provincial/municipal regime is not the only statutory regime dealing with potential payments to municipalities for services it provides to federal entities or to private entities located on federal property. The federal government has long recognized that strict reliance on its constitutional shield might give it an unfair advantage over other taxpayers and recipients of services in a community. Accordingly, Parliament has also enacted a statute in this domain. It is the Municipal Grants Act, R.S.C. 1985, c. M-13, which has established a "grant in lieu of taxes' regime" ("GILT") by which the federal government will contribute money to municipalities although it may not be obligated to do so as a matter of constitutional law. Section 3(1) of the Act authorizes the federal Government to make a grant to a municipality in lieu of several kinds of taxes, including a "frontage or area tax". In s. 2(1) this kind o f tax is defined as "any tax that is levied on the owners of real property that is in the nature of . . . a development tax". Thus Mississauga is eligible to apply for a GILT payment.

Finally, I note that the GTAA has contracted with the federal government to make GILT payments in lieu of development charges. Section 5.04 of the ground lease requires the GTAA to make payments to the federal government to enable it to make

grants in lieu of "Real Property Taxes" to municipalities. "Real Property Taxes" are defined in s. 5.01 of the ground lease as including "all taxes . . . and development charges, whether general or special, ordinary or extraordinary, foreseen or unforeseen, of every nature or kind whatsoever." These provisions in the ground lease are another indication that the federal government recognizes that, as a matter of morality albeit not constitutional law, it should pay its fair share of taxes and other charges in the municipalities in which it owns property.

I do not criticize Mississauga, as does the GTAA, for not applying for a GILT payment up to now. Mississauga was entitled to assert that its own statutory regime applied directly to Pearson Airport. However, that position is, in my view, constitutionally untenable. Mississauga can, and should, now resort to the federal statutory regime which is clearly available to it; that availability is a strong factor militating against granting a declaration, especially one as vague and artificial as the one Mississauga seeks.

(3) Ground Lease Issues

In paras. 1(j) and (l) of its notice of application Mississauga seeks declarations that the federal Minister of Transport may require the GTAA and Nav Canada to pay development charges to Mississauga and that the Minister of Transport was entitled to require the GTAA, and the GTAA was required, to negotiate with Mississauga on the basis of obligations set out in the ground lease.

At the hearing, the GTAA and Nav Canada challenged Mississauga's standing to seek these declarations. Following argument, I ruled that Mississauga lacked the requisite standing. I reached this conclusion for two reasons.

First, the ground lease is a private contract between the federal Crown and the GTAA. Mississauga is not a party to it. It is an elementary principle of contract law that an applicant cannot claim a private right under a contract to which the applicant is not a party: see Greenwood Shopping Plaza Ltd. v. Beattie, [1980] 2 S.C.R. 228 at pp. 236-37, 111 D.L.R. (3d) 257, and G.H.L. Fridman, The Law of Contract in Canada, 3rd ed. (Toronto: Carswell, 1994) at p. 582.

There are exceptions to the privity doctrine. A contract may confer enforceable rights upon a third party in three situations -- where a party to a contract has acted as an agent for the stranger in acquiring the contractual rights, where a party to the contract has constituted himself trustee of the contractual rights for the benefit of the stranger, and where

employees of a party to the contract were clearly intended to receive the benefit of an exclusion of liability relating to their employer in circumstances where the employees were acting in the course of their duties for that employer on matters under the contract: see Greenwood Shopping Plaza, supra, and London Drugs Ltd. v. Kuehne & Nagel International Ltd., [1992] 3 S.C.R. 299, 97 D.L.R. (4th) 261. Mississauga does not attempt to bring itself within any of these exceptions.

Second, I see no good reason for issuing declarations in the air that a Minister of the Crown "may" do something. The Minister involved with Pearson Airport is the Minister of Transport. He has duties as contracting party and landlord relating to the ground lease, and the federal government has duties as regulator in the field of aeronautics. The courts should assume that the Minister and government will fulfil those responsibilities in accordance with the law and the terms of the contract. If they do not, then parties to the contract, and perhaps other interested parties, could challenge particular decisions they make. However, at this juncture the relief sought by Mississauga is so nebulous that, in my view, it counts against granting Mississauga standing to seek it. On this point, I close by noting that the declaratory relief sought by Mississauga relating to the duties of the Minister of Transport were added to the notice of application on November 13, 1998, seven months after the original notice was pr epared and filed and just two weeks before the court hearing.

(4) Withdrawal of Services Issue

Mississauga seeks a declaration that the Mississauga Fire and Emergency Services is not required to respond to fires and

emergencies at Pearson Airport if Mississauga's building code regime does not apply to construction at the airport.

This relief was sought for the first time when Mississauga amended its notice of application on November 13, 1998. Unlike the respectable relief sought on constitutional and property law principles, this component of the relief has an air of school yard "I'm taking my marbles and going home" about it. There is nothing before me that would even permit me to consider such a far-fetched declaration. Does the Mississauga fire department refuse to attend fires at the homes of residents who have been slow about shovelling snow from their walkways in violation of a municipal by-law, or at a small corner grocery that is late paying its property taxes? Somehow I doubt it. And what happens in Mississauga now at a construction site where a Mississauga building inspector has found building code violations? If there is a fire, does the fire department refuse to attend? Again, I doubt it.

Without being unduly harsh, I would simply say that the declaration sought by Mississauga is, at a minimum, premature. There is a federal statutory regime that may provide Mississauga with every penny of the development charges it seeks with respect to Pearson Airport. Until Mississauga exhausts that route, raising the spectre of silent fire engines is premature.

IV. DISPOSITION

The Greater Toronto Airports Authority is entitled to the relief it seeks in its notice of application and in its appeals with respect to orders made against it under the Building Code Act and the Topsoil Preservation Act.

The application brought by the Corporation of the City of Mississauga is dismissed.

The counter-application brought by the Regional Municipality of Peel is dismissed.

Costs may be spoken to if necessary.

Order accordingly.

Green v. Dixon

Between
Daniel Philip Green and Susan May Green, Plaintiffs, and
Alex Dixon, Royal LePage Real Estate Services Ltd., Dale Bell,
The Corporation of the Township of Orillia, Simcoe County
District Health Unit and Ernest C.R. McGowan, defendants, and
Don Leatherdale, third party

[1995] O.J. No. 834
DRS 95-11548
Court File Nos. G8581, G8581A

Ontario Court of Justice (General Division)
Civil Non-Jury, Barrie, Ontario
Tobias J.
March 24, 1995.

Counsel:
Paul J. Daffern, for the plaintiffs.
Trevor Whiffen, for Royal LePage Real Estate Services Ltd.
Michael Miller, for the Corporation of the Township of Orillia.
K. William McKenzie, for Alex Dixon.
J. Daniel Dooley, for Earnest McGowan.
Trevor Whiffen, for Don Leatherdale.

[para1] TOBIAS J.:-- The plaintiffs purchased a single family residence from Mr. Alex Dixon, (Dixon), a home builder, on the 30th of June, 1986. Royal Lepage Real Estate Services Ltd. (Royal Lepage) was the listing broker and Mr. Don Leatherdale (Leatherdale) the listing real estate agent. Mr. Ernest McGowan (McGowan) acted as the solicitor for the plaintiffs as purchasers and subsequently as their counsel with respect to their claims for alleged defects in the subject premises and its private waste disposal system (System). The Corporation of the Township of Orillia (Township) issued a building permit to Dixon for the construction of the single family residence ultimately purchased by the plaintiffs. This action has been discontinued against the defendants Dale Bell (Bell) and Simcoe County District Health Unit (Health Unit).

[para2] The plaintiffs claim damages against the defendant Dixon on the grounds that he fraudulently misrepresented to them that the subject premises contained three useable bedrooms when he knew that the Health Unit had approved a system which permitted the lawful use of only two bedrooms. The plaintiffs also claim damages against Dixon for breach of the warranty contained in the agreement of purchase and sale covering the condition and operation of the System, and for breach of warranty of fitness relating to the garage floor and back yard drainage.

[para3] The plaintiffs claim against Royal Lepage for damages for negligent misstatements alleged to have been made to the plaintiffs in the listing agreement prepared by its agents respecting the number of bedrooms available, and the capacity of the System serving the dwelling.

[para4] The plaintiffs claim against the Township on the grounds that its building inspector was negligent in issuing a building permit to Dixon in the face of certain unsatisfied conditions contained in the Certificate of Approval issued by the Health Unit to Dixon.

[para5] The plaintiffs claim against McGowan on the grounds that he was negligent in failing to draw to the attention of the plaintiffs before closing, the provisions of the Certificate of Approval of the Health Unit which indicated that only two rooms of the dwelling could be used as bedrooms. In addition, the plaintiffs claim against McGowan for negligence for failing to institute an action within the six month limitation period established by the Public Authorities Protection Act, R.S.O. 1990, Chapter P.38, claiming damages

against the Health Unit for negligently issuing a use permit in the presence of patent defects in the System.

[para6] Dixon was an active home builder in the Orillia area in the 1980's. He purchased a number of building lots in the Maplewood Park Estate subdivision situated on the north shore of Lake Simcoe some few miles south-west of the city. On one of these lots, Lot 5 plan M-22, (Lot 5), Dixon made preparations in 1985 for the construction of a three bedroom, single family residence. He made application to the Health Unit on the 15th of May, 1985, for approval of a system to service a three bedroom home on that lot. Accompanying the application was a plan of the System which indicated it would be installed in the front yard comprised of an irregularly shaped parcel having a depth of 70 feet.

[para7] The System lay-out was recommended by Mr. V.J. Kepka, (Kepka), a director of the Health Unit, appointed under the Environmental Protection Act R.S.O. 1990, Chapter E19. Kepka prepared conditions of approval on the 28th of May, 1985, and attached these conditions to the Health Unit Approval dated the 29th of May, 1985. He forwarded a copy to Dixon. At the same time Kepka forwarded a copy of Dixon's application, the System plan and the conditions of approval to the building inspector of the Township. The building inspector had no authority to issue a building permit to Dixon for the construction of the home on Lot 5 without first having received the System approval from the Health Unit in accordance with Section 76 of The Environmental Protection Act, (supra).

[para8] The present building inspector of the Township admitted that he and his predecessors never looked at the Health Unit approval of a system for a new home, and never considered the system plan or any conditions attached to the approval before issuing a building permit. As a consequence, the building inspector issued a building permit to Dixon unaware that one of the conditions of approval of the Health Unit for the construction of the System on Lot 5 provided the following;

> 3) A 50 foot mantle of granular fill a minimum of one foot deep must be added downgrade on the road side of the tile bed. A two foot wide clay berm, keyed into the original soil and having the same finished grades as the tile bed and mantle must be placed along both sides of the bed and mantle. This will entail setting the building back an additional sixty two feet. (my emphasis)

[para9] On the 5th of November, 1985, Dixon requested and obtained an amendment to the Health Unit approval, and Kepka's note of that date made on his copy of the original Health Unit approval reads;

> note;
>
> Distribution pipe reduced to 428 feet as the number of bedrooms was reduced to two bedrooms from three. Eight hundred gallon septic tank permitted as dwelling size is not estate size.

[para10] A two bedroom system was installed by Dixon's subcontractor. When the house was almost completed Dixon's own home was destroyed by fire and so he and his family moved into the partially completed home on Lot 5.

[para11] Dixon customarily employed the services of Leatherdale, a real estate agent in the employ of Royal Lepage in Orillia. Leatherdale sold almost all of the homes built or acquired by Dixon. They had worked together very closely over a number of years, and together built and sold over forty homes in the Orillia area. When the home was sufficiently advanced to be sold, Dixon listed Lot 5 with Royal Lepage through Leatherdale. By chance, Bell had established contact

with the plaintiffs. As an agent with Royal Lepage, he encouraged the plaintiffs to view Dixon's house on Lot 5. When the plaintiffs inspected the premises with Bell, Dixon was present, either inside the home or immediately outside working on the front yard. Inside the house Bell and the plaintiffs found three completely furnished bedrooms, obviously being used by Dixon and his family.

[para12] The plaintiffs had earlier experienced difficulties with a septic tank system in the District of Muskoka. They were sensitive about that issue. Bell says the plaintiffs told him of their concerns and in the presence of the plaintiffs, Bell asked Dixon about the status of the System and its operation. Dixon denies this conversation. In any event, the following clause was inserted into the offer to purchase by Bell on behalf of the plaintiffs:

> THE VENDOR REPRESENTS and warrants that during his occupancy, the septic tank system has operated satisfactorily and will be in good and working order at the time of closing.

[para13] Before the offer was signed by the plaintiffs they delivered it to the office of McGowan in Bracebridge for his approval. There is nothing in the offer indicating the number of bedrooms contained in the home. McGowan advised the plaintiffs he saw no problems with the offer and that they were at liberty to sign it. The offer was signed and presented to Dixon who accepted it in substantially the same terms, but at a somewhat increased price. Upon receiving the executed agreement of purchase and sale, McGowan, or a member of his staff requested and received from the Kepka, at the Health Unit, the following written statement dated the 5th of June, 1986:

> This copy does not constitute any verification as to the efficiency of the operation of the sewage system nor does it necessarily indicate the structural dimensions of the system at this time, but indicates what was seen and inspected on the date indicated on the use permit. We have no outstanding work orders on file for this property.

When the plaintiffs delivered the executed agreement of purchase and sale to McGowan's office, they say they included a copy of the Royal Lepage listing agreement and a copy of the Plan of Subdivision M-22. McGowan met with the plaintiffs in his office before closing to review the documentation and the details of the transaction. He obtained their signatures on various documents. He did not show the plaintiffs the use permit forwarded to him by the Health Unit on the 5th of June, 1986.

[para14] The purchase transaction was completed on the 30th of June, 1986. McGowan provided the plaintiffs with his report on their purchase, but made no mention of the contents of the Health Unit's use permit which indicated that the System was approved for a two bedroom home. In the Spring of 1988, the plaintiffs became aware of large quantities of a malodorous liquid flowing from the low end of the tile bed in the front yard of their home. On the 4th of May, 1988, after a telephone request from the plaintiffs, Kepka, from the Health Unit, attended on the premises and inspected the tile bed. On the 14th of May, 1988, the sub-contractor who had installed the tile bed also attended on the premises and attempted to raise one end of the header pipe from which the fluid from the septic tank flowed into the tile bed distribution pipes.

[para15] Nothing further took place until the 18th of November, 1988, when the plaintiff met with Kepka, Dixon, and the System installer to discuss the problems and attempt to find a solution. The header and small sections of the distribution pipes in the tile bed were uncovered. They were found flooded in watery effluent. Dixon and his installer proposed to increase the amount of granular fill on the mantle

at a cost of $700.00 to the plaintiffs. Kepka would not give the plaintiffs written authority to carry out that work, and the plaintiffs, therefore, refused to proceed with that proposal. During this meeting it was somehow disclosed to the plaintiffs that the System for Lot 5 permitted the use of only two bedrooms in the home. The plaintiffs were understandably upset; they immediately contacted McGowan. On the 23rd of November, 1988, McGowan dictated a letter over the phone, which the plaintiffs wrote and dispatched immediately to the Health Unit. It stated:

> I/We hereby give you written notice that I, Susan Green and Daniel P. Green intend to make a claim against you for damages suffered by us as a result of you approving the installation of a septic system which is faulty on lot 5 plan M-22, Township of Orillia.

[para16] On the same day, the plaintiffs retained the services of Mr. Victor Wilcox, P.Eng., (Wilcox), of Trade Engineering Ltd., Orillia, to design a new three bedroom sewage system for the home and obtain the approval of the Health Unit. The Health Unit refused to accept the proposition subsequently advanced by Wilcox that a large body of granular material lay a short distance beneath the existing tile bed of the plaintiff's System, and that with proper excavation, that body of material would be available to absorb and carry away the liquids produced by the System. However, the Health Unit did give approval for a two bedroom system based on the plans and specifications of Wilcox, and agreed to inspect the site when the excavation for the new tile bed had been completed, with a view to establishing the presence of the body of granular material suggested by Wilcox. The plaintiffs were not prepared to proceed on this conditional approval, steadfastly maintaining their initial position that they would not be satisfied with a system which did not provide them with the authority to use the three bedrooms in their home.

[para17] The plaintiffs then turned for help to Orillia

Engineering Associates Ltd., (Orillia Engineering), consulting engineers, who prepared plans and received the approval of the Health Unit for a completely new three bedroom System to be placed in the back yard of the plaintiffs' lot. The plaintiffs did not proceed with that installation.

[para18] In March of 1992, the plaintiffs retained the services of Peto MacCallum Ltd., consulting engineers of Barrie. Mr. Turney Lee-Bun (Lee-Bun) is a civil engineer who is the manager of the geotechnical services provided by that firm. He is a civil engineer of considerable experience in soil technology. In particular he has been involved in the evaluation and preparation of geotechnical assessments involving foundations, shoring, slope stability, pavement systems and underground services. He was qualified as an expert witness.

[para19] Lee-Bun carried out a detailed inspection of the System in the front yard of the plaintiff's home on Lot 5. He concluded that it was impossible to construct an efficient sewage disposal system in that location. He considered that the area between the face of the plaintiffs' residence and the front yard boundary at the street line was so limited in area that a system placed there could not deal effectively with the sewage disposal requirements of the home. As well, the underlying substrata formation of hard packed glacial silts were of insufficient porosity to provide a supplemental means to dissipate the effluent generated by the residence of the plaintiffs.

[para20] Lee-Bun adopted the proposal of Orillia Engineering to install an entirely new System behind the home of the plaintiffs. He was satisfied that a new back yard system would provide more than adequate area for distribution pipes, tile bed and mantle, and would allow for the importation of sufficient granular fill to overcome the lack

of porosity in the native glacial silt sub-soil. In addition, Lee-Bun agreed with the proposed large-sized mantle of imported granular fill contiguous to the tile bed to provide additional percolation and sewage disposition facilities. Since the backyard sloped upwards from the plaintiffs home, he endorsed the proposed installation of an effluent pump to carry the fluids from the septic tank to the somewhat elevated tile bed and mantle.

[para21] The entire concrete floor in the two car garage of the plaintiffs' home cracked and settled nearly four inches. Their premises were covered by the HUDAC Warranty Program (HUDAC) of the Province of Ontario which insures purchasers of new homes against major structural defects. The plaintiffs complained to HUDAC about the condition of the garage floor. A HUDAC inspector attended at the premises to find that the plaintiffs had constructed a single flue chimney resting on the garage floor without installing a supplementary footing for it. In addition, the HUDAC inspector found a chord and a half of firewood piled on the garage floor. He attributed the overall cracking and settlement of the floor to the added weight of the chimney and the firewood. He failed to consider other possible causes. I find his opinions are not well-founded.

[para22] During Spring freshets and severe rain storms, water flowing from the rear yard would drain into a basement window-well at the rear of the premises of the plaintiffs, and run under a window, and through the basement wall at that point to fill the basement, on some occasions, with six inches of water. The plaintiffs are claiming damages not only for the problems with the System but also for the replacement of the garage floor and remedial exterior grading to the rear lot required to re-direct the drainage of surface water away from their house.

THE PARTIES TO THE ACTION:

[para23] The plaintiff Susan Green did not give evidence. The plaintiff Daniel Green is a 42 year old, six foot two, broad shouldered, red haired, angry crusader. One of his neighbours called as a witness for the plaintiffs gratuitously described him as overbearing and very forceful. I agree with that description. During the trial it became evident that Mr. Green would not permit the truth to interfere with his vendetta with the defendants. At one point prior to trial, Mr. Green told the manager of Royal Lepage, in Orillia, that he intended to ram his motor vehicle through the glass store-front of their office to ensure that he drove home his point. Mr. Green was charged immediately with extortion and threatening as a result of that rather assaultive approach to Royal Lepage. To resolve the matter, he entered into a bond, and promised to keep the peace and be of good behaviour. During cross-examination at trial, he brushed away the suggestion that he was being overly aggressive towards Royal Lepage with the simple retort that he had been misunderstood.

[para24] In the course of his examination for discovery, before the trial, Mr. Green made it clear that he would not abide by any restrictions of the Health Unit which might limit his family's use of all three bedrooms in his home. During the trial, however, he described with great animation how, upon learning of his illegal use of three bedrooms, he immediately removed all bedroom furniture from one bedroom and replaced it with his office furniture and equipment. He failed completely to explain the differences in his sworn testimony given on these two separate occasions. I concluded that some of his evidence was not credible.

[para25] Dixon is a hard-working creative individual, but he suffers from two serious weaknesses, greed and prevarication. In my respectful opinion, Dixon's dealings with the plaintiffs in this matter demonstrated that he lacked that degree of honesty which one is entitled to expect from a businessman in our community. Dixon told us that he has built over fifty homes in the Orillia area. He obviously became

very experienced in his work; in my opinion, however, he is a game player. He manipulates people for his own selfish ends. He was trapped on several occasions by the falsity of his testimony. His evidence was riddled with inconsistencies. He fabricated a story of a retired couple who purportedly intended to purchase the new house on Lot 5 so that he could justify changing his Health Unit application from a three bedroom System to a two bedroom System for that home. Throughout the history of the construction and sale of his home to the plaintiffs, Dixon withheld critical information from those to whom he owed an obligation of disclosure. Dixon's intentional misrepresentation of facts amounts to tortious conduct which caused damage to those who trusted him.

[para26] Leatherdale, the third party, gave evidence on his own behalf and for Royal Lepage. It is not surprising that Leatherdale's memory of events which occurred almost nine years ago did not permit him to give precise details of his business dealings with Dixon. I was impressed with Leatherdale's efforts to give a truthful explanation of his involvement with Dixon. I found him to be a credible witness whose testimony turned aside the criticisms and accusations of Dixon. I find nothing in the evidence adduced which might 'compromise the integrity of Royal Lepage in its dealings with Dixon.

[para27] Mr. Roy Booth (Booth) is the chief by-law enforcement officer and the building inspector of the Township. He did not hold that position in 1985 when the Township issued a building permit to Dixon for the construction of a single family residence on Lot 5. He gave evidence as to the past and present procedures followed by the Township building department when issuing a building permit. He indicated that the receipt by his office of the written approval of the Health Unit for the construction of a system was a condition precedent to the issuance of a building permit by the Township. Booth explained that the Township building department traditionally saw no need to review the terms and conditions of the Health Unit's approval before issuing a building permit. The approach of the Township in that regard is both antiquated and ill-advised, in my respectful opinion, and in the case at bar amounted to negligence.

[para28] The Township owed a duty of care to the Heath Unit in particular, and to the community in general, to ensure that the issuance of a building permit did not derogate from the provisions of the approval granted by the Health Unit. By failing reasonably to ensure that the building permit established set backs in accordance with the approval of the Health Unit, the Township was in breach of its duty to the Plaintiffs, and, without more, could be found liable to the Plaintiffs in damages for the harm caused to them when the foreseeable risk materialized.

[para29] McGowan has carried on the private practice of law in the Town of Bracebridge since his call to the Bar in 1980. Most of his practice involves acting for vendors or purchasers of summer cottages and residential premises. I found him an honest witness, but he had little recall for the details of his involvement with the plaintiffs in their purchase of Lot 5. Moreover, his file on this transaction was singularly silent with respect to the steps he took to represent the plaintiffs in their purchase. His final report of this transaction to the plaintiffs indicates little sophistication; although it treats each subject carefully, it is apparent, in my respectful opinion, that it is the product of his secretary; it does not bear the stamp of his personal attention.

FINDINGS OF FACT:

[para30] Although a further review of the evidence may be considered tedious, it is essential to a clear understanding of the respective liability of the defendants.

[para31] Dixon first made application to the Health Unit

for the approval of a three bedroom system. He changed his mind, returned later to the offices of the Health Unit, and arranged that his application be changed to a two bedroom system. Dixon said the change was as a result of an oral offer made by two middle-aged persons who were looking for a two bedroom home. Based upon this alleged offer, Dixon convinced the Health Unit to reduce the septic tank fluid capacity, the length of the distribution pipes in the tile field, and the surface area of the mantle to accord with the less onerous and less expensive requirements of a two bedroom home System. In my opinion, Dixon fabricated the story of the middle-aged couple to reduce his costs of construction of the System.

[para32] At the time that the Health Unit forwarded its initial approval to the building department of the Township, it was quite evident that the System was subject to three conditions of approval. The third and final condition of approval related to an increase of sixty-two feet in the setback of the front of the home from the street line. The setback described on the original plan of the System attached to the Health Unit approval was seventy feet, but it was not changed by Dixon or the Health Unit. It would have been obvious to anyone reading the conditions of approval that the total front yard setback of the house from the street line initially established by the plan, had been increased to 132 feet. Since it is not the custom of the Township building department to read the Health Unit approval or the conditions attached to it, the Township issued a building permit to Dixon which provided for a front yard setback of only about 87.5 feet. The area of the front yard of the house, therefore, was insufficient to satisfy the conditions of approval of the Health Unit. The whole sewage disposal unit was crammed into a much smaller area than that required by the Health Unit.

[para33] Dixon was well aware that he had not complied with the conditions of the approval of the Health Unit, but he proceeded nevertheless with the construction of the System in cramped quarters. Dixon alone must be held responsible for the construction of the undersized System because his sub-contractor followed his plans explicitly. From its inception, the construction of the System was sub-standard, failing to satisfy the requirements of the approval, providing less granular fill and fewer lineal feet of disposal pipe in the tile bed, and significantly overrunning the side yard allowances between Dixon and his neighbour to the west. As well, the tile bed and the mantle did not contain the quantity of imported granular fill required by the Health Unit approval. By some sort of subterfuge Dixon convinced the Health Unit official who inspected the site that the bed was, or would be constructed properly, and in accordance with the provisions of the conditions of approval.

[para34] It is true that some of the setbacks of the tile field, the amounts of granular fill imported to the site and the size of the mantle do not meet the requirements established by the Health Unit and its authorizing legislation. However, I have concluded after considering all of the evidence, that Dixon, a well known and respected builder, satisfied the Health Unit inspector that the System would be completed in a fashion which would satisfy the Health Unit's requirements. The exercise of the discretion of the Health Unit inspector to give relief to Dixon from strict compliance, under the circumstances was not negligence, but rather a reliance upon a builder who had met his past obligations, but on this occasion resorted to fraudulent misrepresentation to cloak the shortcomings of the System. Even if the Health Inspector breached his duty of care to inspect the System in a careful and prudent manner so as to ensure that the System was constructed in accordance with the regulations, the Health Unit cannot now be found liable in damages because this action was withdrawn against it before trial.

[para35] When Dixon signed the listing agreement with Royal Lepage for the sale of Lot 5, he did not advise

Leatherdale that the septic tank system was approved for only two bedrooms. Leatherdale had worked with Dixon for a number of years. Dixon insists that he warned Leatherdale that even though the listing agreement on Lot 5 showed a three bedroom home, it could only be used as a two bedroom home, but I have rejected his explanation as untrue. I am satisfied that Dixon once again misled a business associate, in this case Leatherdale, so as to maximize his financial gain on the sale of the home to the plaintiffs.

[para36] Soo Que Lem, a long time employee of Dixon, told us that he specifically recalled a certain conversation between Dixon and Leatherdale. Lem was very exact in his recollection of the details of that conversation in 1986, what he had been doing that day in the house on Lot 5, and almost the precise words that Dixon spoke to Leatherdale complaining about the inaccuracy of the listing agreement. I reject this evidence of Lem as untrue.

[para37] When Bell, another agent for Royal Lepage, showed the plaintiffs through the subject premises, Dixon was inside the house. Bell asked questions of Dixon relating to the System because the plaintiffs had earlier experienced trouble with such a system. Dixon said nothing about the two bedroom limitation on the System. It was a cogent opportunity for him to disclose that limitation. It is a perfect example of Dixon's dishonesty. I reject his allegation that Leatherdale and Royal Lepage prepared the listing agreement in a negligent fashion.

[para38] The plaintiffs liked Dixon's home; they requested Bell to prepare an offer. The offer was forwarded to McGowan before the plaintiffs signed it. He reviewed the offer, approved it, and told the plaintiffs they could sign it. The offer was then signed by the plaintiffs. After some negotiation as to price, that offer was accepted by Dixon. Green says he took a copy of the executed offer, a copy of the listing agreement, and a copy of the plan of subdivision M-22 to McGowan's office. It is clear that McGowan, or a member of his staff, immediately wrote to the Health Unit requesting a report on the status of the System. The form reply of the Health Unit received by McGowan shortly thereafter enclosed a copy of the Use Permit for that property. It stated that the Health Unit had no outstanding work orders on file for the property. The Use Permit to which the Health Unit's reply referred indicates approval had been granted for a two bedroom, newly constructed, single family dwelling. McGowan did not notice that reservation in the reply of the Health Unit; in due course he closed the transaction. In his testimony McGowan stated that he could not recollect receiving the listing agreement from the plaintiffs.

[para39] About a year and a half later, the environs of the tile bed and mantle became waterlogged and smelly. Neighbours complained about the stench of sewage. As earlier recounted, the Health Unit inspector appeared on the property on the 4th of May, 1988, and the subcontractor who installed the system on the 14th of May, 1988, to see what could be done. There was a long delay of six months to the 18th of November, 1988, when the plaintiffs arranged for a meeting with Mr. Dixon, his sub-contractor and the Health Unit inspector. At that time, some considerable digging took place in order to expose the header pipe, and some of the distribution pipes in the tile bed. In his evidence, the Health Unit inspector explained that the flooding of the entire system indicated that the granular material upon which the distribution pipes in the tile bed had been laid, had become plugged with a bio-mass which prevented the tile bed from absorbing the liquid effluent from the house.

[para40] It is clear that the whole system was flooded with liquid effluent. Dixon and his sub-contractor made a proposal to the plaintiffs to increase the granular material on the mantle but the plaintiffs would not proceed with that work without the written approval of the Health Unit inspector. The Health Unit inspector would not provide

written authority; the meeting ended inconclusively.

[para41] The plaintiffs immediately contacted McGowan and he dictated to them, over the telephone, a letter to the Health Unit putting the Health Unit on notice that they were claiming damages against it for negligently approving the sewage system on Lot 5. Concurrently with the delivery of the letter, the plaintiffs retained Trade Engineering Ltd. of Orillia to evaluate the system and to design a three bedroom system in the front yard of Lot 5. For reasons earlier referred to, (page 10, supra), the Health Unit refused to approve the proposed system as a three bedroom system, but did approve it as a two bedroom system on the understanding that upon further exploration of the subsoil, a three bedroom system might be approved.

[para42] The plaintiffs were dissatisfied with the efforts of Trade Engineering to obtain approval for a three bedroom system, so they turned to Orillia Engineering for further assistance. Orillia Engineering focused its efforts on the placement of a three bedroom system in the back yard of Lot 5. After submitting plans and specifications to the Health Unit in or about the November of 1992, Orillia Engineering subsequently obtained preliminary approval for a three bedroom system located in the backyard of the plaintiff's home. The plaintiffs did not proceed with the work necessary to install and construct this system.

[para43] Shortly after the plaintiffs had delivered their letter to the Health Unit giving notice of a claim against it, they requested advice from McGowan on how they might recover their damages suffered as a result of the misrepresentation of Dixon on the usable bedrooms, and with respect to the warranty on the System given by Dixon in the agreement of purchase and sale. McGowan attempted to negotiate with the solicitors for Dixon without success. On the 13th of October, 1989, he commenced a claim in this Court which included those defendants to which I have referred, and Leatherdale who was joined by Dixon as a third party.

[para44] The plaintiffs' claim against McGowan in negligence for failing to discover that the Use Permit issued by the Health Unit for Dixon's new home authorized only a two bedroom System must fail for the following reasons. Firstly, I do not accept the evidence of Daniel Green that he delivered to McGowan a copy of the listing agreement issued by Royal Lepage and Leatherdale with the agreement of purchase and sale.

[para45] I can see no good reason why the plaintiffs would leave a copy of the listing agreement with their solicitor unless they had a problem with it. If they did have a problem, there is no evidence that they attempted to discuss it with McGowan. I am not convinced by the opinion of a handwriting expert called on behalf of the plaintiffs, indicating a 51% probability that a small handwritten notation in blue ink on the face of a copy of the listing agreement produced at trial, was in McGowan's hand, was in fact McGowan's note. I am not prepared, therefore, to find that McGowan had the Royal Lepage listing agreement in his possession before the date of closing. Even if I were prepared to accept that allegation, I accept the opinion evidence of Mr. Donald Lamont, L.S.C., Mr. John Cockburn, and Mr. Michael Fitton, all sophisticated and experienced solicitors that unless the plaintiffs had warned McGowan of the potential problem generated by the Health Unit certificate which granted approval for only a two bedroom house, McGowan was under no professional obligation, or duty of care to the plaintiffs to review that certificate with them before closing. I find comfort for this determination in the reasons for decision in Victoria & Grey Trust Co. v. Apple, 25 M.P.L.R., 220 at p. 235, where Madam Justice McKinlay outlined the professional duty owed by a solicitor to his clients in a real estate transaction in the following general terms:

i.) To exercise the care and skill of a reasonably

competent solicitor in accordance with the standards of the professions.

ii.) When the matter for which he has been retained is the carrying out of a contract between his clients and another party, to see that the precise terms of that contract for which a solicitor would normally be responsible are carried out in accordance with the terms of the contract, unless he has received instructions to the contrary.

[para46] I reject the argument of the plaintiffs that the terms of the agreement of purchase and sale between the plaintiffs and Dixon triggered a duty in McGowan to enquire into the issue of the number of bedrooms which were permitted under the Health Unit's certificate of approval. I cannot, therefore, find that McGowan was in breach of his duty of care to the plaintiffs for failing to review with them the Certificate of Approval from the Health Unit.

[para47] With respect to the issue of McGowan's negligence for failing to commence an action against the Health Unit, in a timely fashion, Section 7 of the Public Authorities Protection Act R.S.O. 1980 chapter 406 reads:

7(1) No action, prosecution or other proceeding lies or shall be instituted against any person for an act done in pursuance or execution or intended execution of any statutory or other public duty or authority or in respect of any alleged neglect or default in the execution of any such duty or authority unless it is commenced within six months next after the cause of action arose, or, in case of continuance of injury or damage, within six months after the ceasing thereof.

[para48] The plaintiffs state that McGowan became aware of the plaintiffs claim against the Health Unit after he had discussed the issue with them and dictated a letter to the Health Unit giving notice of their claims for negligence. As earlier indicated, this letter is dated the 21st of November, 1988. There is little doubt in my mind that when McGowan instructed his clients to advise the Health Unit without delay of their claim for damages, he was concerned about the existence of some sort of statutory limitation period which might have protected the Health Unit from such a claim. Nevertheless, in the face of that concern, McGowan waited until the 13th of October, 1989, to commence an action against the Health Unit.

[para49] I cannot accept the arguments made on behalf of McGowan that the plaintiffs' only interest was the installation of a three bedroom system in the backyard of their home, and that the only party against whom such a claim could be made was Dixon. In my opinion, that argument overlooks the clear duty of a solicitor to take all steps necessary to protect the interests of his clients within the time prescribed by any applicable statutory limitation period. McGowan owed a duty to commence an action in time against all those parties who might in some way contribute to the payment of the damages claimed by the plaintiffs, among which was the Health Unit.

[para50] Although McGowan did join the Health Unit as a defendant in the claim, he was late. I find that he was in breach of his duty of care to the plaintiffs in that regard. Notwithstanding this finding of negligence on the part of McGowan, in view of my earlier finding of fact that the Health Unit was not negligent in the exercise of its statutory obligations to the plaintiffs, even if the Health Unit had been joined in time as a party to the action, the plaintiffs would not have recovered damages against it. In the result, no damages flow from McGowan's failure to join the Health Unit as a party to this action in a timely fashion, and the plaintiffs are not entitled to damages against him.

[para51] In my respectful opinion, the Township was

negligent in failing to review the terms and conditions of the approval of the Health Unit for the placement of the System on Lot 5. In this most complex of worlds, it is unrealistic to suggest that a municipal employee has any obligation to review a policy decision of a local health unit as to the parameters of installation of a sewage system serving a house to be built under a municipal building permit. I believe it reasonable to say that the building inspector of a municipality has no authority to interfere with the decisions made by a health unit as to the type and the placement of a system. On the other hand, if the terms and conditions of the approval of a health unit in any way change or impinge upon the prescribed placement of dwellings within the municipality in accordance with the building and zoning bylaws, it is obvious that a municipal building inspector must ensure that he issue a building permit which accords with the specifications established by the Health Unit for construction of the system.

[para52] A building inspector does not meet his obligations by simply saying, 6,the approval of the Health Unit is none of my affair", and then to proceed to issue a building permit without any reference to the terms and conditions of the approval of the Health Unit. In that regard the reasons for decision of the Supreme Court of Canada in City of Kamloops v. Nielsen et al 26 M.P.L.R. 81 at page 83 are helpful:

> ... the applicable legislation or the subordinate legislation enacted to it must impose a private law duty on the municipal or public official. Furthermore, the principle would not apply to purely policy decisions made in the bona fide exercise of discretion. However, public officials acting in the operational area i.e., in implementing this policy decision would be exposed to the same liability as other people if they failed in discharging their duty to take reasonable care to avoid injury to their neighbours.

There was no dispute raised in the evidence that from time immemorial the Township has never concerned itself with the terms and conditions of the approval of the Health Unit. But this is not a complete answer to that issue. As soon as Dixon obtained the building permit, he commenced the construction and placement of the System on Lot 5. At the same time, he commenced construction of the dwelling on that lot, ignoring the Health unit directives and, in due course, received a use permit for that System.

[para53] The Township takes the position that even if it was in breach of its duty to review the certificate of approval of the Health Unit, and to ensure that the front setback of the house was sufficient to satisfy the terms and conditions of that approval, once the Health Unit provided Dixon with a Use Permit, it accepted the placement and construction of the septic system in the limited area of the front yard, thereby effectively accepting and regularizing the existing setback of the house from the front lot line. The Township argues that it cannot now be held responsible for damages allegedly arising out of the misplacement of the house too close to the front lot line because the Health Unit has now adopted the setback of the building from the front lot line as acceptable; it has given its final approval of the System by issuing of a use permit. This argument has merit. The plaintiffs cannot now to say that the Township issued a building permit which conflicted with the requirements of the Health Unit when the Health Unit in fact ultimately accepted the system by issuing a use permit. I am satisfied, therefore, that the plaintiffs have failed to prove they suffered damages at the hands of the Township.

QUANTUM OF DAMAGES

[para54] The defendants argue that the plaintiffs have failed to take reasonable steps to mitigate their damages. Since November of 1988, the plaintiffs have known that the System required remedial work. The defendant Dixon offered to

provide the labour to increase the bulk of the mantle with additional imported granular fill but the plaintiffs refused this offer. The defendants further say that the Health Unit approved the installation of a new two bedroom system in the front yard of Lot 5 in 1992, coupled with the undertaking of the Health Unit to approve a three bedroom system provided that sufficient natural granular material was to be found under the front yard, but the plaintiffs refused this option. There was also a opportunity for the plaintiffs to mitigate their damages by installing a three bedroom system in the backyard as proposed by Orillia Engineering and approved by the Health Unit. The defendants say the continued delay by the plaintiffs in carrying out remedial action or in constructing a new system has amplified their damages. The defendants say that if the plaintiffs are entitled to damages those damages must be fixed as of the date when the plaintiffs could have rectified the existing system, or installed a new system on Lot 5.

[para55] I do not accept the testimony of Mr. Green that he was unable to repair or reconstruct the System because he did not have the funds to do so. It is obvious to me, from a consideration of all of the evidence, that the plaintiffs were individuals of substance and had the funds, or could have found the funds necessary to remedy the System or to reconstruct it. I do agree, however, with the position taken by the plaintiffs that they were under no obligation to mitigate their damages until after the determination of the issues raised in this action. I adopt the reasons for decision in Cormier Enterprises Ltd. v. Costello et al. a decision of the New Brunswick Supreme Court Appeal Division found in 108 D.L.R. (3d) 472 where the court held that where a builder erects a defective house in breach of warranty, and the owner delays repairs for three to four years pending the outcome of litigation, the builder is liable for the cost of repairs measured at the date of the trial, even though this is substantially greater than the cost of repairs measured at the date of the breach. It was reasonable in such circumstances for the owner to delay repairs until he has ascertained his legal position. In my respectful opinion, these reasons are equally applicable to the case at bar. It was not unreasonable for the plaintiffs to have awaited the determination of their legal rights before commencing a very substantial project for the reconstruction of a system in their backyard. The evidence does not persuade me that the costs attendant upon the reconstruction of a new system is now greater than those which would have been incurred three or four years ago; in my opinion, quite the opposite.

[para56] I accept the opinion of Lee-Bun that it would be impossible to install a good working system in the front yard of Lot 5. In accepting this opinion I am led to conclude that when the plaintiffs purchased Lot 5 from Dixon, the System could not have been working satisfactorily. Its very configuration as a two bedroom system breached the warranty given by Dixon to the plaintiffs in the agreement of purchase and sale. By reason of the deceit practised by Dixon on the Health Unit, he built a three bedroom home serviced by a two bedroom System. The intentional misrepresentations of Dixon resulted in the placement of a system which must be characterised as defective ab initio, and S find that upon the closing of the agreement of purchase and sale, Dixon was in breach of the warranty that the "system was operating satisfactorily and was in good and working order".

[para57] In addition, based on Lee-Bun's opinion, the System was operationally defective from the moment it was installed. These findings are important on the issue of merger; these findings are a complete answer to the argument that the warranty merges with the closing. In this case, the warranty survived the delivery and acceptance of the transfer.

[para58] In the result, the plaintiffs are entitled to recover damages from Dixon in the following amounts:

i) based upon the testimony of John Garfield Dunlop,

and taking into consideration a series of cost adjustments made a trial for sod, septic tank, plumbing and fill, I find that the construction, installation, and placement of the tank, distribution bed, and mantle, in the rear yard of Lot 5 requires the sum of $14,144.00, plus G.S.T. and P.S.T. where applicable;

ii) for the removal and replacement of the garage floor, and other incidental materials and labour attendant thereon, the sum of $1,447.50;

iii) for the grading to the rear yard of the premises on Lot 5 (already accomplished), the sum of $1,532.11;

iv) for engineering, services and advice,
i) To Trade Engineering, $2,273.93;
ii) To Orillia Engineering, $1,844.00;
iii) To Peter MacCallum, $2,487.64;

[para59] Judgment shall therefore go against Dixon for the total of these special damages of $23,729.18, together with G.S.T. and P.S.T. where applicable.

[para60] The misrepresentations of Dixon by which he induced the plaintiffs to purchase Lot 5 in 1987 were deceitful and reprehensible. Dixon's misstatements in my opinion, were motivated by greed. His hope was to make an unjustified profit from unsuspecting purchasers. I find he lied to the authorities concerning critical elements of the proposed home and its System, he misled his real estate agents, and he misrepresented to the plaintiffs that he was offering for sale a lawfully serviced three bedroom home. As a builder and merchant of new homes his conduct was unacceptable in the commercial or any other community.

[para61] Paragraph 31 of the plaintiff's claim reads as follows:

31. The plaintiffs state, and the fact is, that the actions of the defendant, Dixon, have been of such an unconscionable nature as to warrant the imposition of punitive damages.

In my opinion, this pleading opens the issue of a claim for punitive or exemplary damages. I am sensitive to the long development of the law of contracts which appears to deny almost completely, punitive or exemplary damages for breach of contract. See: Vorvis v. Insurance Group of B.C., (1989), 58 D.L.R., (4th), 193. A true reading of the majority opinion in this decision, I respectfully submit, reveals that in substance the Supreme Court of Canada has confined punitive damages almost exclusively to the realm of tort.

[para62] The pleading contained in paragraph 31, (supra), however, is sufficiently broad to include a claim against Dixon for exemplary damages in tort. At page 208, in the Vorvis Decision, Mr. Justice MacIntyre explains that there is an inherent distinction between the remedial objectives of tort and contract, the latter being more limited in application, precluding a punitive award in a pure contractual proceeding;

(In tort) the injured party is entitled to be made whole. The compensation he is entitled to receive depends upon the nature and extent of his injuries and not upon any private arrangement made with the tort feesor...

(In contract) the injured plaintiff is not entitled to be

made whole; he is entitled to have that which the contract provided for him or compensation for its loss.

[para63] By his deceit, Dixon forced the plaintiffs to bear the stress and unhappiness of residing in a home served

by a system both unlawful and totally inadequate. By his fraudulent misrepresentations, Dixon forced the plaintiffs to struggle with the problems of their illegal use of the third bedroom of the home which they had purchased to provide adequate sleeping facilities for themselves and their two children. By his refusal to remedy those obligations which he admitted at trial owing to the plaintiffs, he dragged them through six years of engineers and their reports, of Health Unit refusals, and of that cold unhappiness borne by the litigants in worrisome actions such as this. In my respectful opinion, this is a proper case for an award of exemplary damages. I have attempted to balance the impact of this affair upon the plaintiffs with the impact of an award of exemplary damages against Dixon. I have attempted to fix exemplary damages in a sum which equates the injury to the plaintiffs to the fraud of Dixon.

[para64] In the result, judgment shall go in favour of the plaintiffs against Dixon in the amount of $23,729.18 plus taxes for breach of contract, and in tort the sum of $10,000.00 by way of exemplary damages. The plaintiffs shall have pre-judgment interest at rate of 10% per annum on the sum of $23,729.18 from the date of the issuance of their claim, the 13th of October, 1989.

[para65] I shall expect the parties to speak to me further with respect to costs.

TOBIAS J.

H & D International Group v. Toronto (City)

Between
H & D International Group, appellant, and
Corporation of the City of Toronto and
Michael Nixon, Commissioner of Buildings and Inspections,
respondents

[1988] O.J. No. 2857
Doc. No. 88/3785

Ontario District Court
Corbertt D.C.J.
Oral judgment: March 25, 1988.

Counsel:
J. Anna Fraser, for the applicant.
A. Weretelnyk, for the respondent.

[para1] CORBETT D.C.J. (orally):-- This is an application for an order granting a hearing and appeal, pursuant to s. 15 of the Building Code Act, R.S.O. 1980, c. 51 as amended, and for an order rescinding the decision of the respondents, the Corporation of the City of Toronto, and Michael Nixon, the commissioner of buildings and inspections, delivered verbally on December 30, 1987, and confirmed in writing by a letter dated January 8, 1988, and for an order requiring the respondents to issue a building permit for the construction of a three-story structure linking two existing residential and commercial buildings of a development located at a property known municipally as 350 Queens Quay West in the City of Toronto.

[para2] The applicant is a lessee under a lease with Harbourfront Corporation, the registered owner of the property. The subject lands are located in the Harbourfront area along the City of Toronto lakefront, and in a sub-planning area as Maple Leaf Quay.

[para3] On September 10, 1987, the applicant submitted building application No. 259935 to construct a three-story commercial-retail building known as the Link Building between the other two buildings presently under construction by the applicant.

[para4] The applicant was informed in November 1987, by staff of the respondent, that the examination of plans was completed, and that zoning by-laws and building code requirements had been met. The building permit was not issued and on December 30, the director of planning and development for the applicant spoke with Michael Nixon, the commissioner of buildings and inspections, who advised the applicant that the building permit would not be issued until certain conditions imposed by council were satisfied.

[para5] The letter from the building commissioner dated January 8, 1988, refers to the refusal to grant the application on the grounds that a number of agreements remain outstanding as follows: an amending development agreement; an amending collateral agreement; an agreement relating to a proposed pedestrian bridge connection at the rear of the Link Building; the conveyance by the Federal Crown to the city of the fee simple interest and that portion of the water's-edge promenade surrounding the head of the Peter Street slip; an agreement whereby Harbourfront Corporation would agree to obtain a series of conveyances and agreements pertaining to developmentof the aforesaid portion of the water's-edge promenade; and an agreement to amend the rental housing agreement pertaining to the site.

[para6] Under s. 6 of the Building Code Act, subs. (1) provides that,

> "The chief official shall issue a permit except where,
>
> (a) the proposed building or the proposed construction or demolition will not comply with this Act or the Building Code or will contravene any other applicable law."

[para7] The City of Toronto opposes this application and submits that the proposed construction will not comply with the Building Code Act or the building code and will contravene

other applicable law.

[para8] The jurisdiction of the District Court Judge on this appeal is set out in s. 15(3) of the Building Code Act as follows:

> "Where an application is made to a judge for a hearing
>
> under subsection (1), the judge shall appoint a time for and hold the hearing and may rescind or affirm the order or decision of the inspector or chief official or take such action as the judge considers the inspector or chief official ought to take in accordance with this Act and the regulations, and for such purposes the judge may substitute his opinion for that of the inspector or chief official."

[para9] The city submits there are four chief reasons for not issuing the building permit in this case, which constitute non-compliance with cl. 6(1)(a) of the Building Code Act.

[para10] First, the city submits the application does not conform with By-law No. 209-88 being an Interim Control By-law passed by the city at its meeting on February 22, 1988, at which time city council also directed a review or study of land-use policies in the Harbourfront area, pursuant to s. 37 of the Planning Act, 1983, S.O. 1983, c. 1. It is clear that an Interim Control By-law is other applicable law within the meaning of cl. 6(1)(a) of the Building Code Act, and it, therefore, falls to be determined whether the rights of the applicant are determined at the date of the hearing before me, or at the date of the decision of the building inspector on December 30, 1987 or January 8, 1988.

[para11] The applicant submits that the rights of the applicant should be determined at the date of the decision of the chief official and relies upon the decision in Woodglen & Co. Ltd. v. North York (1984), 47 O.R. (2d) 614. In that case, it was held that the proposed use complied with the Building Code Act and did not contravene any other applicable law since an official plan was not applicable law and the permit ought to have issued.

[para12] Mr. Justice Southey discussed the jurisdiction of the District Court Judge at p. 619:

> "The duty of the judge under this subsection is to do what the judge considers the inspector or chief official ought to have done. The judge has no powers other than those that were possessed by the inspector or chief official, and has no discretion to act or defer action, if that discretion was not enjoyed by the inspector or chief official. As stated earlier, I agree with the decision of the learned county court judge, in this case, that the chief official of the municipality was under a duty to issue the permit to Woodglen, because the proposed construction would not contravene any law. That being so, the learned county court judge, in my view, was required by law to allow the appeal and order the issuance of the building permit."

[para13] Counsel for the city submits that the right of the applicant is to be determined as of the date of the Court hearing and relies upon the decision in Re Greengable Holdings and Toronto (City) (26 April 1984), Matthews D.C.J. In that case, an application for a building permit was completed on November 15, 1983, and on November 28, 1983, a by-law was passed designating the area an area of site-plan control.

[para14] The Judge referred to the powers on such an appeal in s. 15 of the Building Code Act and stated at p. 4:

> "The words quoted, employing the present tense, in my opinion, mean simply that the judge should have regard to what the Chief Official should do under section 6, having in mind the present state of legislation. The use of the present tense, in effect, incorporates the principle
>
> established by the Privy Council in the City of Toronto v. Trustees of the Roman Catholic Separate Schools in Toronto [1926] A.C. 81, that the right of the applicant is to be judged as of the date of the hearing."

[para15] The city also referred to other authorities with

respect to the proposition that the right of the applicant is to be judged as of the date of the Court hearing.

[para16] The Greengable decision was decided prior to the Woodglen decision, but counsel for the city submits that the statements made by Mr. Justice Southey were obiter dicta in the circumstances.

[para17] In my opinion, the rights of the applicant should be determined on the date of the decision of the chief building inspector. Applicants for building permits are entitled to a reasonable degree of finality respecting their entitlement to building permits, which is not afforded by determining those rights as of the date of the hearing.

[para18] I, therefore, adopt the approach taken by Mr. Justice Southey in the Woodglen case. I also agree with the remarks in that case made by Mr. Justice Southey at p. 620 that:

> "Municipalities no longer have the need to delay an application for a permit in order that new zoning by-laws may be made effective, because they have the power under s. 37 of the Planning Act, 1983, (Ont) c. 1, to pass interim control by-laws to be in effect, for one year, when land-use policies are being reviewed or studied in the municipality, or in a defined area. Such by-laws may be passed without prior notice or hearing."

[para19] In the result, I find that By-law No. 209-88, passed after the decision of the building commissioner, is not applicable law within the meaning of cl. 6(1)(a) of the Building Code Act.

[para20] Second, the city submits that the applicant contravenes s. 40 of the Planning Act, 1983.

[para21] Subsection 40(1) defines development to mean, among other things, the construction or erection of one or more buildings or structures on land, and subs. 40(2) provides that a by-law may be passed by municipalities designating an area to be a site-plan control area.

[para22] Under subs. 40(4), no person shall undertake any development in an area designated under subs. 2, unless the council of the municipality has approved one or both as council may determine of the following, and there are enumerated therein certain plans and drawings with respect to site-plan control.

[para23] By-law No. 239-86 was passed by the council of the City of Toronto designating the subject area as an area of site-plan control. The applicant submits that site-plan approval is not a necessary precondition to the issuance of a building permit and relies upon the case of Re Revenue Properties Co. and Toronto (1984), 26 M.P.L.R. 165 and in that case His Honour Judge Matlow held that the issuance of a building permit, prior to the granting of site-plan approval, would not result in any contravention of the Building Code Act. He states, and I quote:

> "In particular, I do not consider that the 'proposed construction', in the circumstances of this case, would 'contravene any other applicable law' as those words are used in s. 6(1)(a) of the Building Code Act merely because site plan approval has not yet been given. The actual construction, however, if it were to proceed without prior site plan approval would be in violation of the Planning Act. Accordingly, the issuance of a building permit would not be contrary to s. 6(1)(a) of the Building Code Act."

[para24] Counsel for the city submits that site-plan approval, pursuant to s. 40 of the Planning Act, 1983, is applicable law within the meaning of 6(1)(a) of the Building Code Act and relies on several cases, including 715113 Ont. Inc. v. Ottawa (1987), 63 O.R. (2d) 102, a decision of Mr. Justice Henry of the High Court.

[para25] In that case, an application was made to quash an Interim Control By-law and the resolution authorizing it.

[para26] The applicants had applied for a building permit for alterations on July 2, 1987, and the city then advised it would require site-plan approval prior to issuing the permit.

[para27] The applicants then instructed their agents to prepare an application for this approval by letter dated August 11, 1987. The city formally responded to the building permit application; a variety of objections and comments were made addressing site-plan approval and mechanical, electrical and structural requirements.

[para28] The applicants took steps to satisfy these requirements and also applied to the District Court for an order to compel the city to issue a building permit pursuant to s. 15 of the Building Code Act which application was dismissed on August 28, 1987, because of the matters raised by the city in its letter of August 11, 1987. At p. 105, Mr. Justice Henry stated:

> "The Court also stated that site plan approval was a prerequisite to the issuance of a building permit. An application for site plan approval was made on August 31, 1987."

[para29] At p. 108, Mr. Justice Henry stated,

> "Mr. Murdock, the president of the lessee, has also appealed to the Ontario Municipal Board from the refusal of the City to approve the site plan which by s. 40 of the Planning Act, 1983 is required before a permit can be issued. The city refused to approve the site plan as it failed to comply with the Building Code Act. Both appeals are pending."

[para30] In the result, in that case, the application to quash an interim control by-law was dismissed.

[para31] In my opinion, the proposed building does not contravene s. 40 of the Planning Act. The applicant has submitted plans for site-plan approval which plans comply with the Act and what is proposed complies with the Act. It may be that certain agreements have to be filed prior to getting the approval of the site plan and undertaking development but no contravention of s. 40 existed at the date of the decision of the building inspection.

[para32] The third ground advanced by the city for resisting the issuance of the permit is that the applicant does not comply with a master agreement which binds the applicant, and that such master agreement constitutes other applicable law within the meaning of cl. 6(1)(a) of the Building Code Act.

[para33] The Harbourfront lands of which the subject land forms a part, have been the subject of extensive planning and study. The history of which is extremely well set out in the factum of the city, and I will highlight just some of this planning:

> On June 23, 1980, council adopted a development control implementation strategy in connection with the Harbourfront City and this strategy included the adoption of official plan amendments, zoning by-law amendments, the employment of the city's development, and review and approval pursuant under s. 40 of the Planning Act, a master agreement between the city and Harbourfront Corporation respecting development control, which would require the Harbourfront Corporation to agree to comply with official plan amendments and so on, sub-area plans and requirements not to build otherwise than in accordance with them, agreements for Harbourfront Corporation to require purchasers or lessees from it to enter into a direct contract with the city to comply with the master agreement, and not to seek a mandamus order to compel the issuance of a building permit otherwise than in compliance with the master agreement, to define the content of sub-area plans, and to provide a process for the approval of sub-area plans.

[para34] On December 6, 1982, the city and the Harbourfront Corporation entered into the master agreement, which was filed on this application. Harbourfront Corporation was authorized to enter into the master agreement by Order-in-Council P.C. 1982-9/777, and the master agreement was registered against the title of the Harbourfront lands.

[para35] By a lease dated January 30, 1987, Harbourfront

Corporation leased to Peter Street Basin Properties Inc., the land which is the subject matter of this property.

[para36] By a sub-lease dated January 30, 1987, Peter Street Basin Properties subleased the land, being the subject of this application to the applicant herein.

[para37] Clause 24.21 of the sublease of the subject property provided that the tenant agrees to comply with, and be bound by, the provision of the master agreement, any sub-area plan approved pursuant to the master agreement, any conditions thereto, and agreements made pursuant to a condition to such approval insofar as and to the extent that they or any of them apply to any lands, buildings, or structures which are subject to the master agreement and which are on, or within, the land on the same basis as if it were a party to the master agreement.

[para38] Section 2.1(a) of the master agreement provides the corporation covenants.

> "(i) will not undertake or take any step itself or permit or suffer any other person to undertake or to take in step in respect of land, buildings or structures which are located in Harbourfront for the development of any land, building or structure unless either
>
> (i)(a), an approved sub-area plan, is in operation for the sub-area in which the land, building or structure in question is to be located, and the aforesaid development is in substantial conformity therewith;
>
> (b) The proposed development is permitted by the zoning by-law;
>
> (c) The plannings and drawings for the proposed development have been approved by council, if such approval is required by this Agreement and, in addition, necessary plans and drawings have been approved pursuant to Section 40 of the Planning Act R.S.O. 1980 c. 379, an amendment to or successor of such Section where approval under such Section is required by law; and
>
> (d) the development is in conformity with the provision of this Agreement as is required by this Agreement.

[para39] Approved sub-area plan is defined in the master agreement in s. 1.1(a).

[para40] In my opinion, if I were to have regard to the provisions of the master agreement, it would be because the master agreement constitutes other applicable law within the meaning of cl. 6(1)(a) of the Building Code Act.

[para41] In my opinion, the master agreement, which is binding on the applicant, insofar as it is applicable law within the meaning of cl. 6(1)(a) of the Building Code Act.

[para42] The fact that this agreement is an agreement by the Harbourfront Corporation and binds the Federal Crown does not make such an agreement "other applicable law," "and the fact that such agreement was passed pursuant to an order-in-council does not make the agreement "other applicable law".

[para43] It should be noted that the city council approved the sub-area plan for the two towers adjoining the subject lands, and approval for the sub-area plan, pertaining to this Link Building, was made conditional upon the approval of the Minister of Municipal Affairs and Housing of an official plan amendment, which was subsequently approved.

[para44] On September 21, 1987, the city council imposed a number of conditions to the approval of the sub-area plan amendment for the subject Link Building and on November 30, 1987, the city council amended its previous authority, respecting the sub-area plan amendment for 350 Queens Quay West and imposed a number of conditions, which were set out in evidence, such as, the conveyance in fee simple of this land in the water's-edge promenade surrounding the Peter Street Basin from Her Majesty the Queen in Right of Canada to the City of Toronto, the execution of an agreement between Harbourfront Corporation and the city with respect to certain

conveyances and so on.

[para45] Most of these conditions do not directly involve the applicant's land save for two matters, that the applicant may be involved such as the agreement between the City of Toronto and Harbourfront Corporation regarding Harbourfront Corporation's financial contribution toward the construction of a future bridge connection.

[para46] The final matter to be considered is whether the applicant has complied with the requirement to conform to the Building Code Act and the building code requirements.

[para47] Subsequent examination of the plans in question in February 1988, revealed six items of deficiency; namely, two exit doors swung in the wrong direction and five portions of structures did not have the required fire ratings. These items were promptly complied with by the applicant. The city submits that these items were sufficient for the inspector to refuse the permit.

[para48] In my opinion, if such items were outstanding, the chief building official could have given the applicant time to comply with these minor items, and I would make such a similar order.

[para49] However, in the circumstances, such an order is unnecessary since there has been compliance.

[para50] In the result, for the above reasons, I allow the appeal. I rescind the decision of the inspector, and I direct the respondents to issue a building permit pursuant to the application of the applicant as soon as practicable.

[para51] Costs to the application shall be paid by the respondent city to the plaintiff on a party-and-party basis to be assessed.

CORBETT D.C.J.

H.L. & M. SHOPPERS LTD. ET AL. v. TOWN OF BERWICK ET AL.,

CCH DRS 1978 P90-336, N.S.
(1978) 82 D.L.R. (3d) 23
NOVA SCOTIA
(S.C.)
1978

****

Negligence -- Duty of care -- Town building inspector negligently issuing building permit -- Plaintiff forced to demolish partially constructed building -- Plaintiff's action against inspector and town allowed.

****

The plaintiff company claimed damages arising as the result of the defendant S negligently issuing to them a building permit. S, who was the building inspector for the defendant town issued to the plaintiff a building permit allowing the plaintiff to construct a commercial building on lands owned by the plaintiff. After the building was partially completed it was discovered that the building contravened certain town by-laws and the plaintiff was forced to demolish it.

HELD: The plaintiff's action was allowed. There was a duty of care owed to the plaintiff by the defendant town and there was a breach of that duty. The defendant S was negligent in that he did not take adequate or proper steps to ascertain the meaning and effect of the relevant provisions of the by-laws of the town. S was acting in the course of his employment and the defendant town was liable for damages caused by the wrongful issue of the building permit. The plaintiff was entitled to special damages in the amount of $9,788.12. No general damages were allowed.

Regional Municipality of Haldimand-Norfolk v. Beres

27 O.R. (2d) 373
106 D.L.R. (3d) 760
ONTARIO
HIGH COURT OF JUSTICE
VAN CAMP, J.
4TH JANUARY 1980.

APPLICATION for an order compelling restoration of a building to conform with a zoning regulation.

T. A. Cline, Q.C., and R. J. Nightingale, for plaintiff.

J. J. Nadel, for defendant.

VAN CAMP, J.:-- The plaintiff municipality herein is asking for a mandatory order that the defendant restore the dwelling owned by her in the municipality to the condition it was in on May 13, 1973, and that she refrain from using the lands contrary to the order of the Minister of Economics and Intergovernmental Affairs made May 14, 1973, under s. 32 [am. 1972, c. 118, s. 4; 1973, c. 168, s. 8(1); 1976, c. 64, s. 4(1) and (2); 1978, c. 93, s. 3] of the Planning Act, R.S.O. 1970, c. 349.

The defendant was given title to the premises herein as a wedding present by a deed from her father, Geza Schmidt, dated December 9, 1977, and registered January 16, 1978. Mr. Schmidt, who has worked for the Ford Motor Company since about 1955, purchased Lot 41 and Lot 12 in September, 1976. The house on Lot 12 had burned down in the early 1970s. On Lot 41, there was an old dilapidated cottage without foundation, a well and an outhouse. The cottage was too dangerous to live in. The floor had broken through, the roof had broken and a beam had broken. Notwithstanding this, Mr. Schmidt applied for and obtained a permit for a 2,000-gallon sewage holding tank to be used with the cottage. He cut the weeds and brought in loads of topsoil and constructed a garden on Lot 12. He consulted some contractors but was advised that the house could not be rebuilt. He had the cottage torn down and he built a new two-bedroom cottage with living-room, kitchenette and washroom on a concrete foundation, which was some inches smaller than the former cottage. He obtained no building permit. It is this cottage that the plaintiff, in effect, asks to be removed. Mr. Schmidt spent $3,600 for the excavation and building of the basement, a further $9,000 for materials and he estimates that between $12,000 to $30,000 was spent in all, including the furnace, the hot-water tank, the toilet and sink, the underground hydro and furnishings.

Lot 41 and Lot 12 are approximately in the middle of a triangular peninsula of land in the former Township of Walpole in the County of Haldimand now in the City of Nanticoke in the Regional Municipality of Haldimand-Norfolk. The base of the triangle is the road allowance on the westerly side of the former Lot 19 in the first concession, the southerly side is the shore of Lake Erie, and the northerly side is the Sandusk Creek which runs into the lake at the point of the triangle at the easterly boundary of the concession lot approximately 2,000 ft. wide. Cottages began to be built on the land about 1900 on lots which ranged from small lots to large lots running from the lake back to the creek. Later in the years following 1940, more cottages were built towards the eastern end. A few have been converted into year-round use, but only one is used the year round. Over the years, the conveyancing had become chaotic and the road along the lake had been eroded. In 1955, a Judge's plan was registered whereby there was a 20-ft. public road which cut roughly across the middle of the peninsula from the

road allowance easterly. It was extended by another private road. The lots range in size from 25 ft. to 60 ft. in width. Over the years, the lots on the north side and on the south side have been divided between different owners although some of the lots still run from the lake to the creek with the road bisecting. The tendency is for the houses on the lots towards the west to be built on the north side of the road and the houses on the lots more easterly to be built on the south side of the road. Lots 43 to 46 are vacant.

In 1967, the township Zoning By-law 1421 was enacted. It defined this area as resort residential R.R. No. 2 on which the permitted uses were (1) one-family detached summer cottage on one lot and (2) uses, building and structure accessory thereto. For cottages with neither municipal water nor sanitary sewer, the minimum lot frontage was 80 ft. and the minimum lot area, 15,000 sq. ft. It did not prevent the use of any building which was in use on the day that the by-law came into force. Consequently, it did not prevent the use of the old cottage on Lot 41 which was there at that time, although the lot itself was roughly 60 ft. by 127 ft. with an area of 7,620 sq. ft.

In 1973, a series of Minister's orders made under s. 32 of the Planning Act, R.S.O. 1970, c. 349, in effect, froze all development along the lake front. The order applicable to these lands is O. Reg. 285/73. It permitted the use of the land for agricultural use only with one single-family dwelling used in connection with such agricultural use. The minimum lot area was to be 25 acres. Again, nothing in the order prevented the use of any land or building for a purpose prohibited by the order if it were lawfully used for such purpose on the day the order came into force. That order remained in effect until its revocation on August 8, 1978. During its term, it prevailed over the building by-law where there was any conflict; otherwise, the by-law remained in effect.

Under s. 5 [am. 1978, c. 40, s. 2(1) and (2)] of the Building Code Act, 1974 (Ont.), c. 74, no person was to construct or demolish a building unless a permit had been issued by the chief official of the municipality. The council of each municipality was responsible for the enforcement of the Act in the municipality. In 1974, the Regional Municipality of Haldimand-Norfolk was established by statute. It was to be a municipality and a planning area under the Planning Act and thereafter no area municipality was to exercise any powers under the Planning Act. Every by-law passed under the provisions of the Planning Act by the local municipality was to continue in force until amended or repealed by the Regional Council.

The owners of the old cottages on the different lots would have liked to follow the example of Mr. Schmidt but the Minister's order and the zoning by-law did not permit. Action has had to be taken by the municipality against some seven others. It is admitted that this new cottage with its landscaping is one of the finest in the area. It has encouraged neighbours to take an interest in improving their houses. Some three to four others have put in foundations and basements which are permitted; others have put on new siding. Mr. Schmidt has worked with his neighbours to put in breakwaters and rocks to prevent erosion of the land. The three problems to which the by-law and the Minister's order were directed, namely, the problem of erosion, the problem of potable water and the problem of waste, do not arise in the case of this cottage. It is agreed that it is an asset in the community, that it imposes no burden upon the community. The objection is that Mr. Schmidt has demolished the building and erected a new one without a permit and has not complied with the by-law or the Minister's order. This he has done while the other owners of lands in the neighbourhood have endeavoured to comply with the by-law and the order.

The order did permit certain work to be done. Section 8 of the order provided that single-family detached cottages existing on the date the order came into force might be extended or enlarged provided that, where municipal water and sanitary sewers were not provided, the minimum lot frontage would be 100 ft. and the minimum lot area, 15,000 sq. ft. Section 12 of the order provided that nothing in the order prevented reconstruction of any building or structure that was damaged or destroyed by causes beyond the control of the owner provided the dimensions of the original building or structure were not increased or its original use altered. Nothing in the order prevented strengthening or restoration to safe condition

of any building or structure or part of any such building or structure. Counsel for the defendant put forth a persuasive argument but I am unable to find that the building herein had been damaged or destroyed by causes beyond the control of the owner and I must find that the demolition and construction of the new cottage went beyond the strengthening or restoration to a safe condition of the original cottage. One of the problems in considering this action is that those provisions would seem to permit the putting in of a foundation and the gradual rebuilding step by step of an original cottage. Counsel for the plaintiff submits that the purpose of the sections which permit a legal nonconforming use is that such buildings will ultimately disappear through deterioration. However, the section which permits the strengthening or restoration to a safe condition of the old building might prevent such eventual deterioration.

In considering the equities, it is necessary to review in greater detail the action taken by Mr. Schmidt. Although it was obvious that he could not rebuild the old cottage, his application was made for a holding tank in connection therewith. An application for a holding tank for a new cottage on that land would not have been granted. After the excavation and the completion of the foundation in November, 1976, there was a stop order by the municipality. I should mention that there had been no work orders outstanding against the premises at the time of the purchase. The contractor who tore down the old cottage and built the basement advised him that no permit was necessary if the basement was not larger than the former building. After the stop work order, the subflooring was put on with the consent of the municipality in order to prevent accidents and the building material on the premises was covered with plastic during the winter months. No further work occurred until the following September.

After the stop work order, Mr. Schmidt went at once to apply for the permit. However, the application that he signed was an application to the Minister for an exemption from the order. The following April, he made a presentation to the planning and development committee of the region, which approved the new cottage as a replacement since there was no change of land use. On April 28, 1977, the Regional Council endorsed the sending of the application forward to the Minister. Mr. Schmidt was in almost daily touch to ascertain how the application was proceeding and he understood in late August that he would have his permit within a short time. However, no notice had been sent to the adjoining owners who heard of the application at almost the last minute and asked for a reference to the Ontario Municipal Board, which, in July, 1978, refused the exemption from the Minister's order. In the meantime, on the Labour Day week-end of 1977, Mr. Schmidt realized that if the work were to be done, it had to be done then. He arranged with a group of friends to help him construct the cottage and they began work on Friday night and worked quickly to put up the frame work that week-end. On Sunday, some of the neighbours called one of the Council for the region to advise that the work was proceeding. That Council member went to the premises that evening and received a non-committal answer as to whether there was a permit. The Councillor advised that he would be back on Monday with someone in authority. He returned with the chief building official. I did not believe Mr. Schmidt when he said that he planned the work and called for his assistants only after he had found the previous week that the work order was no longer on the premises and he assumed that permission had been granted; I find that he took deliberate steps to avoid meeting the chief building official that day, and I infer that the message that was given to his friends and assistants was conveyed to him. I accepted the evidence of Mr. Suprun, the chief building official, that he was not greeted with open arms, that he advised those present on the site that there was no permit and that he placed a new stop work order. The attitude of those who were working on the site was one of surprise that the chief building official would be working on the holiday.

Notwithstanding the advice that there was no permit, and although Mr. Schmidt was present at the hearings of the Ontario Municipal Board in the following February, he completed the work to make the shell which was in existence on the Labour Day week-end habitable. He had put in the furnace, the insulation, the dry-wall, the hot-water tank and the pressure system.

Charges were laid against Mr. Schmidt under the building code but were dismissed as they had not been brought within the six

months' time-limit. The writ herein was issued in December, 1978. Section 43 [rep. & sub. 1978, c. 93, s. 8] of the Planning Act states that in addition to any other remedy or penalty provided by law, any contravention of a by-law may be restrained by action by the municipality and any contravention of an order of the Minister made under s. 32 may be restrained by action at the instance of the municipality.

In Polai v. City of Toronto, [1973] S.C.R. 38, 28 D.L.R. (3d) 638, the Supreme Court of Canada considered an action for an injunction to restrain the appellant from breaching a zoning by-law where there had been persistent and defiant infringement by the use of the premises for the purposes of a multiple-family dwelling-home. It was pointed out that the city in that action was seeking to protect and enforce a public right and that lax enforcement of a zoning by-law could not afford any defence. Schroeder, J.A., in the Court of Appeal (reported under the name City of Toronto v. Polai, [1970] 1 O.R. 483, 8 D.L.R. (3d) 689) said [at pp. 491-2 O.R., pp. 697-8 D.L.R.]:

> In my opinion the city, acting in a more restricted sphere in the enforcement of its own by-laws, is likewise in a different position from the ordinary litigant. The inhabitants of the municipality are sufficiently interested in the dispute to warrant intervention by the corporation for the purpose of asserting public rights, and the dispute is not one between individuals ...
>
> . . . . .
>
> If, then, the Court has no power to control directly the exercise of Council's discretion in the manner of administration of the by-law under review, can it do so indirectly by refusing to grant injunctive relief to the city except upon the condition that it exercise its powers in a manner agreeable to the Court's view? To ask this question is to answer it ...

Jessup, J.A., said at p. 497 O.R., p. 703 D.L.R.:

> That consideration is that the public has a direct and substantial interest in the enforcement of the by-law and such public interest must prevail over the private interest of an admitted flagrant transgressor ...

It is submitted in the action before me that the plaintiff has been guilty of laches. I do not find that the plaintiff has delayed unreasonably after it knew of the activities of Mr. Schmidt, nor is the defendant in a substantially worse position than if the relief asked herein had been granted earlier. In any event, although there are some circumstances when a Court of Equity would be obliged to take into account matters of hardship or acquiescence, even when the plaintiff is a municipality, there has been no such hardship or acquiescence here.

The factors that I must weigh are that the building erected here, in contravention of the order and the by-law, is an asset to the community and is not injurious to the neighbours and, on the other hand, the interest that the municipality has in enforcing the by-law and the order. I considered the approval of these premises by the committee and by the Council, which was forwarded to the Minister in April, 1977. I also looked at the deliberate decision by Mr. Schmidt to proceed with the building notwithstanding the order, the by-law and the stop work order. The defendant herein is bound by her father's acts. In light of all the foregoing, there will be a restraining order. It will not be an order for the restoration of the dwelling to its prior condition, but it will be an order restraining the defendant, her heirs, assigns and agents from occupancy of the premises as long as the building on the premises remains in contravention of the municipal by-law. The defendant will pay the costs of the action.

Order accordingly.

Haldimand-Norfolk (Regional Municipality) v. Copland

Between
Regional Municipality of Haldimand-Norfolk,
appellant/plaintiff, and
Phyllis M. Copland, respondent/defendant

[1993] O.J. No. 4380
Doc. Hamilton D202/93

Ontario Court of Justice (General Division)
Divisional Court
O'Driscoll, O'Brien and Yates JJ.
Heard: September 8-9, 1993.
Judgment: November 25, 1993.

Counsel:
T.A. Cline, Q.C., for the appellant/plaintiff.
R.A. Grilli and R. Mahler, for the respondent/defendant.

The judgment of the court was delivered by

O'DRISCOLL J.:--

I. Nature of Proceedings

[para1] The appellant/plaintiff ("Municipality") appeals from the judgment of Forestell J. (1992), 96 D.L.R. (4th) 443, whereby the Municipality's action was dismissed, and it was ordered that upon a new application, a building permit for the deck constructed on the defendant's lands "be issued promptly, provided it complies with all other requirements."

[para2] In its action, the Municipality sought:

(a) a mandatory order requiring the removal of a structure (trailer) situate on the defendant's property, and

(b) an injunction restraining the defendant, her heirs, executors, assigns, servants, agents and employees from using the lands for any purpose in contravention of the Municipality's By-law 1-HA-86, being a by-law restricting land use.

[para3] The appeal succeeds.

II. The Agreed Facts

[para4]

1. The defendant/respondent Phyllis M. Copland, by instrument No. 75948, dated September 8, 1969, and registered October 3, 1969, became the owner of Part Lot 4, Concession 1, Town of Haldimand, Regional Municipality of Haldimand-Norfolk, Township of Rainham, County of Haldimand.

2. From 1969 to the summer of 1974, the defendant parked, year round, a 14 ft. x 7 ft. Rambler model trailer on her property.

3. In 1974, the Rambler trailer was replaced by a 20 ft. x 7 ft. Shasta model trailer. It was parked on the property during the summer months, and removed late each fall. This procedure of "placement" and "removal" continued from 1974 to the fall of 1988.

4. On June 9, 1986, the appellant/plaintiff passed By-law #1-HA-86. The By-law was approved by the Ontario Municipal Board on March 12, 1987. On the date of the passing of the by-law, the 20 ft. x 7 ft. Shasta model trailer was in place on the lands in question.

5. From the fall of 1988 until May of 1989, there was no trailer on the land.

6. In May 1989, the respondent/defendant acquired a 29 ft. x 8 ft. Prowler Park model trailer and placed it on her property, where it has been to this date. The trailer has a private sanitation sewage system for which

the respondent/defendant obtained approval in 1979 from the appellant's Health Unit.

7. It is agreed that since 1969, the sole use of each trailer was as a recreational trailer.

8. No building permit was issued for the placement on the lot of the Prowler Park model trailer.

9. There is no by-law in force under s. 34 of the Planning Act, R.S.O. 1990, c. P.13, nor is there an order of the Minister under s. 47(1)(a) of that Act, nor a permit issued under s. 13 of the Public Lands Act, R.S.O. 1990, c. P.43, authorizing a person to erect or locate or use, or cause to be erected, located, or used, a mobile home on the lands.

10. In 1989, the respondent/defendant sought a building permit from the Municipality to construct a deck around the trailer. The permit was denied, because the Building Committee of the Municipality was of the view that the trailer was illegally on the lands in contravention of By-law 1-HA-86 (supra).

III. Submissions of Counsel for the Appellant

[para5]

1. The general intention of planning legislation is eventually to eliminate non-conforming uses and replace them with permitted uses; thus the council may be said to zone out such uses. This is based on the premise that such a use is undesirable because it is incompatible with the existing permitted uses but is to be tolerated because it was a lawful use prior to its prohibition by by-law.

2. Section 34(9) of the Planning Act (supra) enables a building or structure not in conformity with a land use by-law to remain in place so long as the building or structure was lawfully used for such purpose on the date of the passing of the by-law, but only so long as the building continues to be used for that purpose.

3. In this case, in order to replace the trailer that was in place at the date of the passage of the land use by-law, the respondent would have had to comply with these conditions:

(a) apply for and obtain rezoning establishing a trailer as a permitted use on the subject lands;

(b) with the rezoning by-law passed and approved, apply for a building permit;

(c) proceed with the construction or placement of the replacement trailer in accordance with the Building Code Act, R.S.O. 1990, c. B.13;

(d) apply for a building permit relative to the deck. If it issued, proceed with the deck's construction.

4. The respondent/defendant Copland did not satisfy any of 3(a), (b), (c) or (d).

5. The replacement trailer is a "building" within the meaning of s. 1 of the Building Code Act (supra). Under s. 5 of the Building Code, a building permit is required for the replacement trailer. However, the building permit cannot issue if it will contravene any other applicable law (s. 6(1)(a)).

6. If a replacement trailer were permitted, a building permit could not issue because the structure does not comply with Reg. 413/90 passed pursuant to the Building Code Act.

IV. Submissions of Counsel for the Respondent Copland

[para6]

1. The intent of s. 34(9)(a) of the Planning Act ("saving legislation") is to preserve the right to use property in the same manner as it was used when the

restrictive by-law was enacted.

2. On the date that By-law #1-HA-86 was passed, the respondent used the land for a "trailer recreational home" for seasonal residential purposes. That same use continues.

3. Section 34(9)(a) of the Planning Act permits a property owner to intensify or enlarge the scope of the land's use so long as the property continues to be used in the manner it was used on the date the restrictive by-law was enacted.

4. Although the respondent moved out the 20 ft. x 7 ft. Shasta model trailer in the autumn of 1988 and moved in a 29 ft. x 8 ft. Prowler Park trailer in May 1989, the use of the property has not changed, and the "saving legislation" of s. 34(9)(a) of the Planning Act still prevails.

5. If the appellant succeeds, the effect will be Draconian, as the land would be rendered to be little, if any, use, as the respondent will not be able to use or erect any building or structure on the land.

V. The Issue

[para7] Is the respondent/defendant in contravention of the "Seasonal Residential Zone (R.S.)" provision of s. 15 of by-law 1-HA-86, or does the respondent/defendant qualify to be exempted under s. 34(9)(a) of the Planning Act?

[para8] The trial judge said:

... the use of the parcel of land in this case throughout by the defendant has been that of a trailer recreational home. By putting a larger trailer on the property, it does not in the least change the use of the property.

[para9] The trial judge, it appears, was of the view that the instant case fell to be decided by the decision of the Supreme Court of Canada in Central Jewish Institute v. Toronto (City), [1948] S.C.R. 101.

[para10] In that case, the City of Toronto sought to restrain the Central Jewish Institute from using the premises at 561 University Avenue, Toronto, as a school or as a summer school. Per Kerwin J.:

The trial judge and the Court of Appeal seem to have proceeded on the ground that the principal use of the premises on July 24, 1946, the date of the passing of the by-law, was as a residence and guest house and that, therefore, the appellant was not within the exception in subsection 2, s. 406, of The Municipal Act. ...

In my view this is not the determining factor. The extent of the user of premises as a school would vary from time to time and in the months of July and August it is well-known that the pupils in the ordinary classes are on vacation. It is true that the appellant had not conducted a summer school on University Avenue but there was nothing to prevent it commencing such a school as part of its curriculum. According to the evidence, a nursery school is part of the course provided by the appellant and the mere fact that no grade classes were held on the Avenue Road premises prior to the date of the passing of the by-law does not prevent the application of subsection 2 of section 406 of The Municipal Act.

...

The appellant took steps during the summer vacation, in an endeavour to bring itself within subsection 2 of section 406 of the Act and, in my opinion, has succeeded in so doing. It actually used the premises as a school and the mere fact that it was a nursery summer school does not prevent the appellant increasing the number of pupils or enlarging the scope of its activities so as to conduct classes not in operation at the relevant time. We are not concerned, in the present appeal, with any question of erecting new buildings.

[para11] During the course of argument, it was submitted

by counsel for the appellant that the Canadian Jewish Institute case involved a question of use within the "envelope" of a building. In my view, the case does not address the fact situation where the building has been removed from the property.

[para12] In my view, the Canadian Jewish Institute case does not govern this appeal, because that case speaks to a separate and distinct problem.

IV. Conclusions

[para13] 1. In my view, s. 34(9)(a) of the Planning Act grants protection to a prior existing non-conforming use "if such land, building or structure" was lawfully used for such purpose on the day the by-law was passed, and "so long as it continues to be used for that purpose." Here, in the autumn of 1988, after the by-law was passed, the defendant removed the 20 ft. x 7 ft. Shasta trailer from the land, and in May 1989 moved onto the land a 29 ft. x 8 ft. Prowler Park trailer - a totally different structure.

[para14] In my view, the protection of s. 34(9)(a) of the Planning Act does not extend to the 29 ft. x 8 ft. Prowler trailer, as it was moved onto the property some three (3) years after the by-law was passed.

[para15] In my view, the exemption of the non-conforming use ended when the defendant removed the Shasta trailer from the property in the Fall of 1988.

(a) Wilmot v. Kingston (City), [1946] O.R. 437, Laidlaw J.A.:

> Thus, if land is used on the day of the passing of a by-law for a purpose prohibited thereby, that use may continue, and such a by-law by express statutory provision is not applicable to that land so long as it continues to be used for that purpose. If the use for that purpose ceases, the by-law thereupon becomes applicable and the land cannot thereafter be used for a prohibited purpose. In the same manner, and to the same extent, the use of any building in existence at the time a by-law is passed for a purpose prohibited by the by-law may continue. But the right of a property owner or user at the date of the passing of such a by-law is fixed and limited in consequence thereof. It is thereafter subject to the provisions of any by-law enacted in the proper exercise of the legislative powers of the council of the municipality. The effect of such an enactment is to prohibit the erection of any building after the date of the passing of the by-law on premises which on that date were used for purposes prohibited thereby.

(b) Miller v. Bentinck (Township) (unreported) (Div. Ct.), September 20, 1990, per Southey J.:

> The by-law could not prevent use of the house as a dwelling despite such non-compliance because of s. 34(9)
>
> (a) of the Planning Act, but only so long as the house continued to be used as a dwelling. That use had ceased by July 3, 1984, and has never been resumed. Instead, the respondents' predecessor obtained a demolition permit on October 27, 1984, and has partially demolished the existing house.

In the circumstances, the remains of the existing house have lost the protection of s. 34(9)(a) of the Planning Act, because their use as a dwelling was discontinued. The application for a building permit contemplates their use as a garage. A new dwelling could not lawfully be constructed anywhere on the lot because of the separation provisions; the chief building officer was justified in refusing to issue a permit.

(c) "Non-Conforming Uses and Regulatory Standards," by J. Matera (1993) 2 D.M.P.L. 125 (July 1993):

> In Copland, Forestell J. held that where the use of certain lands for a trailer had not changed, the owner was entitled to continue to exchange her trailer for increasingly larger ones, even after the enactment of a zoning amendment which presumably prohibited trailers of any size and thereby rendered the use of legal non-conforming. The Court held that the change in size of trailer did not amount to a change in use.
>
> Based on this reasoning, an owner of a single family dwelling which happens to be a legal non-conforming use would be entitled to demolish and rebuild as of right a new single family dwelling of virtually any size. By extension, the owner of the legal non-conforming single dwelling would also be entitled to build an addition of any size without being required to apply for either approval to extend or enlarge pursuant to s. 45(2)(i) of the Planning Act or an amendment to the zoning by-law in accordance with s. 34(10). Meanwhile, an owner of a single family dwelling which conforms to the by-law must obtain at least a minor variance if not a rezoning to achieve the same addition or reconstruction, unless the proposed addition or reconstruction were to conform to current regulatory standards in the by-law. If the Copland case is correct, then there would be no need for ss. 45(2)(i) and 34(10) of the Planning Act.
>
> Furthermore, it makes no sense to interpret the various provisions of the Planning Act, which relate to legal non-conforming uses, in such a way that the owner of a legal non-conforming use gains a significant advantage over those whose properties happen to comply with the zoning by-law.
>
> In the Copland decision, Forestell J. fails to distinguish between use (for a trailer) and regulatory standards (the size of the trailer permitted). Forestell J. is quite right in saying the change in size of trailer did not amount to a change in use, but that is not the point. The question which the Court failed to ask is what controls exist to regulate the size and configuration of the structures and buildings serving a use which is rendered legal non-conforming.
>
> A careful reading of the Planning Act indicates that there is a reasonably consistent scheme for dealing with both existing uses which are rendered non-conforming by the enactment of a subsequent zoning amendment and regulatory or development standards which are altered by such enactment. An appropriately drafted zoning by-law can take advantage of this scheme to control legal non-conforming uses as strictly as it may control conforming uses.

V. Result

[para16] The appeal is allowed, and the formal judgment, dated September 11, 1992, is set aside, and in its place judgment will go as requested by the appellant/plaintiff in paragraphs 1(a) and 1(b) of its Statement of Claim.

VI. Costs

[para17] If within five (5) days of the date of these reasons, counsel cannot agree as to costs, within ten (10) days of the date of these reasons, counsel may file written submissions as to costs. Thereafter, costs will be fixed.

O'DRISCOLL J.

Court File No. 924/89

HENRY LEPAGE

Applicant

-and-

THE CORPORATION OF THE TOWNSHIP OF THE ARCHIPELAGO

Respondent

REASONS FOR JUDGMENT

Application before THE HONOURABLE E. LOUKIDELIS on June 6. 9, 13 and 14, 1989 at PARRY SOUND, Ontario.

APPEARANCES:

W.B. Cunningham, Esq. (Powell, Cunningham, Kennedy & Grandy) , Counsel for the applicant

D.A. Holmes. Esq., Counsel for the respondent

REASONS FOR JUDGMENT LOUKIDELIS, D.C.J. (Written):

This application comes before me by way of an appeal by Henry LePage from the decision of the chief building officer of the Township of the Archipelago refusing a building permit to construct and/or install three additional docks to the applicant's property.

The appeal is brought pursuant to section 15(1) of the Building Code Act, P.5.0. 1980. C. 51. Once I have heard the application. then under the provisions of section 15(3) of the Building Code Act, I may rescind or affirm the decision of the chief official. of "...take such action as the chief official ought to have taken...

Before dealing with the facts and arguments submitted by the parties to me, I would like firstly to deal with a preliminary point. I find that the proposed docks to be attached to the land come within the definition of :building" as set out in section 1. (1) (b) of the Building Code Act, which reads as follows:'

> "1.(1) (b) "building" means a structure occupying an area greater than 100 square feet consisting of a wall, roof and floor, or any one or more of them, or structural system serving the function thereof, including all the works, fixtures and service systems appurtenant thereto, and includes such other structures as are designated in the regulations, but does not include a structure used directly in the extraction of ore from a mine;"

Looking at the plain meaning of the words contained in this subsection, I find that a dock, provided it is greater 100 square feet, would come within that definition. This is the same conclusion reached by myself in the case of The Corporation of the Township of Humphrey v. Janet Findlay (unreported) referred to me by both counsel. The fact that the docks proposed by the applicant are floating, while in the Findlay case they were placed on a pier, does not alter my decision.

The annual installation of floating docks and removal of same, once they have been constructed, does not detract, in my view, from the fact that they are within the definition of a "building" as set out in the said Act.

Referring again to the said Act, it is obvious that there is a clear delegation of authority by the province to the chief building official. It is not a delegation from the province to or through the municipal council.

The municipal council appoints the chief building official pursuant to Section 3 of the said Act. Once this is done, however, pursuant to section 5(1), the issuing of a permit with respect to the construction or demolition of a building is up to the chief building official.

Section 6(1) imposes a mandatory duty upon the chief building official that he "shall issue a permit except where, (a) the proposed building or the proposed construction or demolition will not comply with this Act or the building code or will contravene any other applicable law;"

Briefly then, if an applicant complies with the requirements of the Building Code Act and the building code

"and does not ...contravene any other applicable law"

then the applicant is entitled as of right, to a building permit. There is no stipulation that he be of good behaviour or refrain from annoying council, refrain from disputes with his neighbour nor is the applicant required to obtain

the municipal council's opinion or approval.

Facts:

1. The applicant, Henry LePage, has been the owner of the property in question since about 1978. Located on the property is a restaurant which seats 150 people.

2. The property is accessible only by water.

3. When Mr. LePage took over the property, there was one main dock and he has since added a further four docks for a total of five. The docking facilities are for the use of the restaurant patrons. He has, however, rented and still rents overnight docking facilities to some of his patrons. Some of the users may stay more than one night.

4. The newly formed township passed a zoning by-law, number AlOO-83, in September of 1983.

5. It is acknowledged by both parties that the proposed additional docks are not in contravention of the township zoning by-law.

6. The applicant, in 1988, proceeded to install more dockage area. He was advised that he could not lengthen his existing docks past 120 feet as this was in contravention of a municipal by-law. He removed the add-on docks. He was also advised that the installation of three new docks by him required a building permit.

7. Application was then made for the three additional docks, which application was denied. It is from this decision that he now brings this application.

8. In 1988, the planning committee of the township recommended that charges be laid and action taken against Mr. LePage for proceeding with the additional dockage space without a building permit and deferred his application for a building permit at that time. This recommendation of the planning committee was adopted by the municipal council.

9. In 1989, the township planning committee passed the following resolution:

"whereas an application to expand docking has been filed for Henry's Fish Restaurant; And Whereas there are five existing docks to serve the restaurant;

And Whereas additional docks are deemed not to be necessary to reasonably facilitate the viability of the restaurant;

And Whereas additional docking would alter the character of the use of the property in contravention of the Official Plan; And Whereas there is outstanding litigation
in respect to property boundaries on the subject lands;

The planning committee recommends to Council that a building permit for additional docks at Henry's Fish Restaurant be denied."

The above resolution was adopted by council **as** its own on April 15, 1989.

10. By letter dated May 1, l989, Mrs. Tudhope, the planning administrator of the township, wrote to Mr. LePage indicating that his application had been denied and indicating in paragraph two:

"It was the opinion of council that the proposed additional docks are not necessary to reasonably facilitate the viability of the restaurant, that any additional docking would alter the character of the use of the property in contravention of the official plan of the township. The building permit for additional docking facilities will therefore be denied." It then went on to state that council was also of the opinion that the outstanding litigation with respect to property boundaries is a concern.

11. The present zoning is commercial accommodation (CA). A restaurant is a permitted use but a marina is not.

12. The chief building officer refused the application for a building permit after council had indicated its position.

13. While the official refusal letter was not signed by the chief building officer, Mr. Hachigian, it was apparently written with his consent and authority. Mr. Hachigian already had verbally denied the building permit.

Issues:

As I understand the submissions, the controversy boils down to a very few issues. They appear to be as follows:

1. Does the official plan of the Archipelago come within the definition of “other applicable law".

2. Does site plan approval come within the definition of “other applicable law”.

3. Does the proposed increase in the number of docks on the applicant’s property in fact alter the character or use of the property in that **it** would become a marina within the definition of zoning by-law.

The township zoning by-law is “other applicable law”. As mentioned earlier, however, there is no evidence that the applicant, Mr. LePage was in breach of the existing township zoning by-law. This is readily admitted by the respondent. I believe both counsel are also in agreement that the official plan of the township is a statement of purpose only whereas the zoning by-law is the applicable legislation or law.

Turning to the first issue, there appears to be some divergence of judicial opinion from the cases presented as to whether the official plan can be considered “other applicable law”. I am in agreement with the decision of Judge Haley in the case of Re Woodglen and Co. Ltd and City of North York, 43 O.R. (2d) p.289. Judge Haley, I think rightly bases her judgment on the decision of McLennan, J. in the case of Re Steven Polon Ltd and Metropolitan Licensing Com’n 1961 O.R. 810, wherein Mr. Justice McLennan states:

That the Official Plan adopted by the respondent municipality is a little more than a statement of intention of what, at the moment, the municipality plans to do in the future.” And the “municipality is not bound to carry out that intention...”

Mr. Justice McLennan is also quoted by Judge Haley as stating:

“the Official Plan is not therefore an
effective instrument restricting land user.” Judge Haley also refers with approval to the decision of Mr. Justice Henry in Re Cadillac Development Corp. Ltd. et al and City of Toronto (1973) O.R. (2d) 20 at p. 24, wherein he indicated:

“An official plan is a recommendation only and must be properly implemented by by-law.” Mr. Holmes referred the Court to several cases. The comments of Mr. Justice Reid, in the Collingwood case were, in my view, applicable to the facts in this case, as long as the prior charge against the applicant were outstanding. These charge however, were disposed of months before the written denial for a building permit was issued by the township.

The principle that a zoning by-law is “other applicable law” as set out in other cases that were referred to me by Mr. Holmes. is not in dispute. It is quite clear that the chief building official is indeed obliged to consider zoning matters.

The submission that the official plan was ignored by the different municipalities in the cases quoted. Because the applicable zoning by-laws were contradictory regarding intending use, does not detract from the clear principle relied upon by Judge Haley, and set out in the judgments of Justices McLennan and Henry.

Mr. Holmes also referred me to the Sandos case, which is apparently a District Court decision of Judge McDermid, holding the opposite position. I do not have the full text of this case as to how Judge McDermid came to the conclusion that an official plan was, in fact. “other applicable law.” The decision of Judge Haley on this point, in my view, is correct for the reasons given and particularly in yew of the fact that it was based on the decisions of the two Supreme Court cases.

Turning now to the second issue, and that :s the question of site plan control and whether this can be considered as “other applicable law.” Again I was referred to a District Court decision of Judge Matlow in the case of Re Revenue Properties Co. Ltd. and Corporation of the City of Toronto, (1984), 26 M.P.L.R. 165 dated March 5th, 1984. which reviews the question of requirement of prior site plan approval prior to the issuing of a building permit. This is set out at the bottom of page 169 and page 170. He reviews the history of the relevant section of the Planning Act relating to site plan approval and comes to the conclusion that such approval is not a prerequisite or precondition for the issuing of a building permit. I agree with that decision. I find, therefore, that neither the official plan or site plan requirements are with the definition of “other applicable law”,

Turning now to the third issue, it appears to me from the evidence of the various township officials, that the main concern of the township is that the addition of three more docks would create a fundamental change in use. This was expressed

by the planning committee's resolution adopted by township council. It was also the expressed opinion of the township planner and the chief building officer. It is obvious that the township is concerned that the property will be perceived as a marina rather than a restaurant.

I can well understand the concerns of the township. Since Mr. LePage has the legal right to rent dockage space or overnight docking and to charge the same where does one draw the line as to the number of docking spaces required to service his existing business. It is also clear from the evidence, and I am satisfied, that Mr. LePage provides no other marina type services such as selling-of gas or engine repairs, et cetera. The township planner expressed some concern, as did the chief building officer, that there would be a fundamental change in use. It is to be noted, however, that the township planner's opinion, that there are far too many boats docking at the existing facilities, was based on an erroneous guess as to the seating capacity of the applicant's restaurant (i.e. 100 rather than 150). One must also remember that there is always an overlap of patrons arriving and leaving.

I found exhibit 14, which was an aerial photograph of the property as being supportive of Mr. LePage's contention that visiting boats are now much larger and take up a great deal more docking room. When one considers a 150 seat restaurant, his contention that his existing five docks are not sufficient during meal hours is probably quite correct. I think that the concern of a changing character is based more on guess work than sound facts. The decision of the chief building officer or the municipality given through its employees shows some bias or arbitrariness not only in the guess work referred to, but it's reference to the ongoing boundary dispute between Mr. LePage and one of his neighbours.

To allow the chief building officer of a municipality or a council to place an interpretation of a zoning by-law based on some section of the official plan would, in my view, introduce an element into the decision which would not be proper. It would leave the door open to unequal treatment of property owners. While the township has concerns about the uncontrolled growth or the docking space, it must limit the same through by-laws which apply to all township residents equally. While additional docking space may give the premises an appearance of a marina, it is also necessary and directly connected to the continuing operation of the applicants restaurant.

In summary, therefore, I find that site plan approval and the official plan are not within the definition of "other applicable law". The zoning by-law has not been breached. I find further that the additional docking spaces are necessary in the operation of the applicant's restaurant. In addition, the township, through council. have shown some bias and have attempted to influence or interfere with the decision and function of the chief building officer. Under the circumstances, therefore, I would order the chief building officer of the respondent township to issue a building permit for the three additional docks as set out in the applicant's application.

As to costs, the parties may make their submissions to me on a regular motion day.

Dated at Parry Sound this 7th Day of July, 1989

"E. Loukidelis, D.C.J."

Heutinck v. Oakland (Township)

Between
John Heutinck, (applicant/appellant), and
The Corporation of the Township of Oakland,
(respondent/respondent)

[1997] O.J. No. 4796
DRS 98-07056
Docket No. C19812

Ontario Court of Appeal
Toronto, Ontario
Finlayson, Catzman and Austin JJ.A.
Heard: November 26, 1997.
Judgment: November 27, 1997.

Counsel:
Neil Gross, for the appellant.
Kevin Davis, for the respondent.

The following judgment was delivered by

[para1] THE COURT (endorsement):-- This appeal involves the interpretation of a zoning by-law enacted in 1985 by the respondent township. The appellant purchased his property in 1989. A barn on the property, believed to have been built before 1850, had been used for keeping livestock until the early 1950s and, from 1963 until 1987, for the storage of a neighbouring flour mill's products and equipment. Beginning in about 1993, the appellant sought to use the barn for raising emu. It is common ground that emu are livestock within the meaning of the by-law, that the appellant's property does not offend the by-law's provisions with respect to lot size and that the barn does not comply with the by-law's minimum set-back requirements.

[para2] The argument of this appeal centred on the proper interpretation of s. 5.13 of the by-law, which deals with non-complying uses. That section reads as follows:

5.13 Non-Complying Uses

Where a use, building or structure was legally established prior to the date of the passing of this by-law, and is permitted by the provisions of the zone in which such use, building or structure is located, but does not meet the zone provisions with respect to yards, lot area, frontage, parking, setback or any other provisions of this by-law applicable to that zone, the said building or structure shall be deemed to comply with the by-law and may be enlarged, extended, reconstructed, repaired or renovated provided that:

(a) the enlargement, extension, reconstruction, repair or renovation does not further reduce the compliance of that use, building or structure, with the provision(s) of the by-law to which it does not comply; and

(b) all other applicable provisions of this by-law are complied with.

[para3] In Mr. Gross' submission, this section imposes three conditions in respect of the appellant's property: (1) the barn must be a building or structure legally established prior to the date of the passing of the by-law; (2) the barn must be permitted by the provisions of the zone in which it is located; and (3) the barn must not meet the zone provisions with respect to setback.

[para4] With respect to the first of these conditions, Mr. Gross submitted that the establishment of the barn in the 1850s brought it within the description of a building or structure legally established prior to 1985, the date of the passing of the by-law, even though the barn was not being used for the raising of emu or, indeed, for any agricultural purpose at that time.

[para5] With respect, we do not agree. Mr. Gross' interpretation of s. 5.13 would sanction any agricultural use, building or structure that was ever established before 1985,

even if such use, building or structure had long ceased to exist before that time. In our view, s. 5.13 must be read in context as addressing a use, building or structure that was legally established at the time the by-law was enacted in 1985. Such an interpretation is consistent with the entitlement permitted by s. 5.13 to enlarge, extend, reconstruct, repair, or renovate such a building or structure. In this connection, it is not without significance that "non-complying" is defined in s. 2.83 of the by-law to mean "a permitted use, building or structure existing at the date of the passing of this by-law which does not comply with the zone requirement of the zone within which they are located."

[para6] Central to this analysis is our reliance upon the well established rule that the nature of a non-conforming use is not defined by reference to definitions in the by-law. Rather, it must be determined by reference to the use to which the property was put at the time the by-law was passed. In this case, the activity now engaged in by the appellant is fundamentally different from that which had occurred at the time of the passage of the by-law: Corporation of the Township of Glenelg v. Davis (1992), 10 M.P.L.R. (2d) 260 (Ont. C.A.) at p. 265. As the appellant's barn was not used for the purpose of raising emu at the time of the enactment of the by-law, it does not fall within the definition of a non-complying use, building or structure within the meaning of the by-law. The appellant's application for a declaration to the contrary was properly dismissed by the motions court judge.

[para7] Accordingly, the appeal is dismissed with costs.

Re **Hewitson and Hughes** et al.

31 O.R. (2d) 536
119 D.L.R. (3d) 117

ONTARIO
HIGH COURT OF JUSTICE
J. HOLLAND J.
19TH NOVEMBER 1980.

APPLICATION for a mandatory order directing the respondents to demolish certain buildings erected by them.

G. A. Grechulk, for applicant.

R. S. Vasan, for respondent.

J. HOLLAND J.:-- In this application William Hewitson, Chief Building Inspector of Burlington, asks for a mandatory order for the removal of certain buildings erected by the respondents on their lands at 1323 Snake Rd., Burlington. These lands are within the municipal boundaries of Burlington and in a rural portion of the municipality. They are located in that portion of Burlington within the Parkway Belt area. The ground upon which the order is sought is that the buildings were erected without the respondents first having obtained permits therefor contrary to the Building Code Act, 1974 (Ont.), c. 74.

For easy, but not exact, reference counsel have agreed that a sketch, being the first document in the record, shows the general location of the buildings. Only buildings numbered one to five inclusive are involved in this application. Within building No. 5 is contained a swimming pool, cabana and a concrete slab. The swimming pool was constructed after a permit was issued therefor and is not affected by this application.

These proceedings were commenced January 29, 1979. There had been a long history pre-dating this of difficulty between the respondents and the authority. Following commencement of this application there have been extensive proceedings including many cross-examinations and the prosecution of Mrs. Hughes. At the time of the hearing before me an appeal was pending by her from a conviction on a prosecution by the municipality. That fact I considered to be not relevant to the application before me.

It is an understatement to say that these many proceedings did not result in a narrowing of issues -- just the opposite appears to be the fact. Faced with this, one would have hoped that counsel would, at least, have prepared and filed statements of law and fact. This was not done. As a consequence this application took three days for argument and argument was not easy to follow. After oral argument counsel requested and obtained leave to file written argument and these have now been received. Again, both are lengthy and difficult to follow. The factual and legal issues could and should have been set out concisely, and effort, prior to the hearing, should have been made by counsel to agree on much of the factual background. This application was originally to be heard on June 4, 1980, but as the respondents, just before that date, had changed solicitors to the present one, Southey J. directed that it stand over to September 9, 1980, to proceed peremptorily on that date. Counsel for the respondents felt that delay in obtaining a legal aid certificate by his clients was a ground for a further adjournment. I directed that it proceed.

At my suggestion counsel met for a period at the outset and advised me that they had made the following agreements:

(1). Building number one was constructed pursuant to a building permit obtained from Burlington for the construction of a greenhouse. It has an an area in excess of 100 feet. While it was used as a greenhouse for a short period it was then occupied and used in the operation of an Adult Social Club. There is access from this building to most of the other buildings. There is an issue, however, whether the primary or main use was as an Adult Social Club or for farming or agricultural purposes.

(2). Building number two was constructed without a permit after one had been applied for and had been refused. A stop-work-order was issued September 16th, 1976 but was ignored by the respondents who proceeded to complete the building. It

has an area in excess of 100 square feet. It too has been occupied and used in connection with the social club but there is an issue as to its primary or main use. There is access from this building to most of the other buildings.

(3). Building number three was constructed without a permit and no application was made for a permit. It has been occupied and used as a part of the social club but there is an issue as to its primary or main use. It has an area over 100 square feet and has access to most of the other buildings.

(4). Building number 4 was constructed without a permit and none was applied for. It is a mini-barn and has an area in excess of 100 square feet. This building does not have access to the others.

(5). Building number 5 was constructed without a permit and without any application for one. It has an area in excess of 100 square feet. It has access to most of the other buildings. Within building number 5 is a canvas cabana, a pool and a concrete slab.

In addition to these it was agreed that the respondents did not at any time seek an amendment to the Parkway Belt Planning and Development Act, 1973 (Ont.), c. 53. The significance of this is that this statute, which is a land-use statute, provides:

2. The Ontario Planning and Development Act, 1973, except section 12, applies mutatis mutandis, to the Parkway Belt Planning Area, and the Parkway Belt Plan shall be deemed to be a development plan within the meaning of that Act.

. . . . .

6(1) On and after the day this Act comes into force, the Minister may, in respect of any land within the Parkway Belt Planning Area, make land use regulations and in any such regulations the Minister may exercise any of the powers conferred upon the Minister under clause a of subsection 1 of section 32 of The Planning Act, and notwithstanding subsection 4 of the said section 32, any such regulation may be made that does not conform to a local plan in effect in the area covered by the regulation.

(2) Any regulation made by the Minister under subsection 1

may be retroactive in its application and may provide that it comes into force and has effect on and after a day not earlier than the 4th day of June, 1973.

By O. Reg. 482/73 passed under the Parkway Belt Planning and Development Act, 1973, on August 4, 1973, and filed August 8, 1973, it was provided:

3. No land shall be used and no building or structure shall be erected or used except in accordance with the terms of the Regulation, but nothing in this Regulation prevents the use of any land, building or structure for a purpose prohibited by this Regulation if such land, building or structure was lawfully used for such purpose on the day this Regulation comes into force, or prevents the erection or use of any building or structure the plans for which have, prior to the day this Regulation comes into force, been approved by the municipal building inspector.

4. Every use of land and every erection or use of buildings or structures to which this Regulation applies within the Town of Burlington is prohibited, except agricultural uses, and buildings and structures accessory thereto, including one

single-family dwelling used in connection with each agricultural operation.

5. Requirements for agricultural uses and buildings and structures accessory thereto, including one single-family dwelling used in connection with the agricultural operation, are established as follows:

No more than one dwelling shall be erected on any lot

Minimum lot area
50 acres

Minimum lot frontage
900 feet

Minimum front, side and rear yards
50 feet

Minimum ground floor
one storey--1000 square area for dwellings
feet and one and one-
half storeys or more--

750 square feet

[Emphasis added.] Section 1(a) of O. Reg. 482/73 defines "accessory" as follows:

(a) "accessory", when used to describe a use, building or structure, means a use, building or structure normally incidental or subordinate to the principal use, building or structure located on the same lot;

The lands and buildings of the respondents, even if it could be said that they could qualify as "agricultural uses and buildings and structures accessory thereto, including one single-family dwelling used in connection with each agricultural operation" are only 7.9 acres in total -- far short of the 50-acre requirement. No amendment to this land-use requirement was ever sought by the respondents.

Counsel for the applicant then read in from the examination of the respondents answers to show that at all relevant times these premises were occupied and used as an adult social club.

Against this background counsel for the respondents advised that he accepted that the burden rested upon his clients to establish that permits for the construction of these buildings were not required and that as to building No. 1 the relief sought was not appropriate.

There can be no doubt that the respondents have occupied and used these lands for the purpose of operating an adult social club at all material times. Such commenced prior to the erection of any of the buildings. That club provides for the social needs of adult men and women and includes overnight facilities. The fees charged are interesting. They are:

For a couple
$50.00 annually

For a single man
$100.00 annually then
reduced to $50.00
annually

For a single woman
No charge.

I do not intend to comment further on the nature of the club operated by these respondents on these premises and in connection with which all these buildings were used. I have no doubt, however, that municipal authorities and neighbours have been disturbed by the operations of this club which appears to be directed to satisfying sexual needs or desires of consenting adults.

In addition to the club operation there is some evidence of an agricultural (market gardening) use carried on by the respondents. It is because of this that the issue of main or primary use arises.

The respondents contend that the provisions of the Building Code Act, 1974, were not applicable to the construction of the buildings. The stated reasons are taken from the respondents' written submissions:

(1). The lands and buildings are within the exclusive jurisdiction of the Parkway Belt Planning and Development authority pursuant to the Parkway Belt Planning and Development Act 1974 and that The Building Code Act does not apply to these lands and buildings.

(2). Assuming The Building Code Act applies, the buildings

are exempt from the provisions of The Building Code Act by reason of the provisions of section 2.9.2 and section 2.9.3 of the Regulations passed under The Building Code Act.

(3). In any event, the scope of an application brought by the Chief Building Official under section 25 of The Building Code Act is very limited and is confined to the purpose of enforcing compliance with the Act and does not extend to mandatory orders.

(4). On the facts, these lands and buildings fall within the provisions of either section 2.9.2 or section 2.9.3 of the Building Code regulations and are exempt. [This appears to be identical to number two.]

(5). The question of whether or not this is a building on a farm or whether the buildings were intended for farm purposes is a question of fact to be decided on the evidence and on this matter there is conflicting evidence led by both sides. The record is also voluminous. Under the circumstances the proper course for the Court is to order the trial of an issue.

(6). Alternatively, that the great volume of all testimony as well as affidavit evidence in this matter relating to the present use of the property is not relevant to an application under The Building Code Act when land use is governed in regard to the subject lands by The Parkway Belt Planning and Development Act. The proper person to complain about improper use of land in the Parkway Belt area is the authority under that statute and not the Chief Building Official under The Building Code Act.

(7). In any event the Court, in the exercise of its discretion, should not grant the drastic remedy of demolition as the buildings had been constructed at considerable cost and under a bona fide belief that The Building Code Act does not apply. It is urged that the evidence of the social club activities should not be allowed to colour the Court's discretion and judgment in making an order adverse to the respondents.

As I have previously stated counsel for the respondents, quite correctly in my view, accepted that the burden rested upon his clients to establish that in the circumstances the application should be dismissed. Except as to building No. 1, for which a permit was obtained, this has not been done. With respect to building No. 1 it was urged that as it became part of a single structural unit and as it was occupied and used as a part of the social club operation, this change in operation rendered this building part of a structural system and subject to being demolished. It was further suggested that the use or intended use for building No. 1 was shown to be as a greenhouse (as stated when the building permit was obtained) and that this was not true. In dismissing this application in so far as it relates to building No. 1, I content myself with saying that this building was constructed upon the issuance of a building permit under the Building Code Act, 1974 and for a short period at least was occupied and used for an inoffensive purpose. A change in use, by which it became part of a structural system, would not in itself be sufficient ground to order demolition.

At this point I direct my attention to the facts to be found on the evidence. There is a great deal of material before me and I do not intend to recite the evidence and the areas of conflict nor do I find it necessary to direct the trial of an issue as requested. It is clear to me that, notwithstanding some minor conflict, the evidence (except that of Hughes) leads to the irresistible conclusion that at all material times the primary and main occupation and use of these lands and buildings by the respondents was for the purposes of the adult social club. I accept that evidence in preference to that of the respondents. Any use which could be termed, in a broad sense, to be related to "farming or agriculture" was minor. The rent-a-plot scheme was a sideline. The respondents were, I am satisfied, business people who were in the business of operating the club and this club business pre-existed even the construction of building No. 1. All the buildings complained of in this application I find were built for the occupation and use by the respondents in the business operation of this club, excepting only building No. 1. They were not buildings on a farm, nor were the respondents occupying and using the lands and buildings for farm or agricultural purposes. They were built to be occupied and used in the operation of the social

club and this was the purpose for which the respondents were occupying these lands.

With respect to building No. 1, I am not to be taken as saying that I am satisfied that building No. 1 was built as a greenhouse and as a farm accessory building -- far from it -- there is some rather strong evidence to the contrary. Rather I say that a building permit for its construction having been obtained, it stands in a different position than the others. I have strong suspicions (adverse to the respondents) regarding the intended use by the respondents of this building when the permit was obtained, but suspicions are not enough. Building No. 1 has clearly been occupied and used as part of the club operation since shortly after it was constructed. It has a solid (not glass) roof -- quite inconsistent with a greenhouse roof.

I do not attribute bias, actual or any reasonable apprehension thereof to the applicant or his staff. The conclusion arrived at by the chief building official to bring this application was, I find, as a result of long and fair-minded investigation in pursuance of the duty cast upon him under this statute. I make this finding because of the lengthy argument presented to me by counsel for the respondents that the evidence of the applicant and his staff should be considered suspect for reasons of bias.

The following sections of the Building Code Act, 1974, have relevance:

1. In this Act,

. . . . .

(b) "building" means a structure occupying an area greater than 100 square feet consisting of a wall, roof and floor, or any one or more of them, or a structural system serving the function thereof, including all the works, fixtures and service systems appurtenant thereto, and includes such other structures as are designated in the regulations, but does not include a structure used directly in the extraction of ore from a mine;

. . . . .

(e) "construct" means to do anything in the erection, installation or extension or material alteration or repair of a building and includes the installation of a building unit fabricated or moved from elsewhere, and "construction" has a corresponding meaning;

. . . . .

3(1) The council of each municipality is responsible for the enforcement of this Act in the municipality.

(2) The council of each municipality shall appoint a chief building official and such inspectors as are necessary for the purposes of the enforcement of this Act in the areas in which the municipality has jurisdiction.

5(1) No person shall construct or demolish a building in a municipality unless a permit therefor has been issued by the chief official.

(2) The council of a municipality may pass by-laws and the Lieutenant Governor in Council may make regulations applicable in the area in which the municipality or Ontario, respectively, has jurisdiction for the enforcement of this Act,

(a) prescribing classes of permits for the purposes of subsection 1, including permits in respect of any stage of construction or demolition;

(b) providing for applications for permits and requiring the applications to be accompanied by such plans, specifications, documents and other information as is prescribed;

(c) requiring the payment of fees on applications for and issuance of permits and prescribing the amounts thereof;

(d) providing for the refunding of fees under such circumstances as are prescribed;

(e) prescribing the time within which notices required by the regulations must be given to the chief official or an inspector;

(f) prescribing forms respecting permits and applications for permits and providing for their use.

6(1) The chief official shall issue a permit except where,

(a) the proposed building or the proposed construction or demolition will not comply with this Act or the building code or will contravene any other applicable law; or

. . . . .

(3) An applicant for a permit shall inform the chief official of any change in any information contained in the application.

(4) Subject to section 14, the chief official may revoke a permit,

(a) where it was issued on mistaken or false information;

(b) where, after six months after its issuance, the construction or demolition in respect of which it was issued has not, in the opinion of the chief official, been seriously commenced; or

(c) where the construction or demolition of the building is, in the opinion of the chief official, substantially suspended or discontinued for a period of more than one year.

. . . . .

7. Subject to the regulations, no person shall occupy or use or permit to be occupied or used any building newly erected or installed until notice of the date of its completion is given to the chief official and,

(a) an inspection is made pursuant to such notice; or

(b) ten days have elapsed after service of the notice or after the date of completion whichever occurs last, and subject to compliance first being made with any order made by the inspector under section 8.

[Emphasis added.]

There is no dispute about the appointment of the applicant as Chief Building Inspector for Burlington or about the failure of the respondents to comply with the above provisions.

Reliance was placed by respondents upon s. 2.9.2 and s. 2.9.3 of the Building Code Regulations under the Building Code Act, 1974 as providing an exemption from the requirements of the Act. Ontario Regulation 925/75 made November 12, 1975, and filed November 24, 1975, provided:

2.9.2 A person who constructs a farm building for his own use is exempted from the requirements of the Act provided the building is not intended for residential occupancy.

2.9.3 All other farm buildings shall comply with the requirements for such buildings in Part 4.

"Residential occupancy" is defined as "the occupancy or use of a building or part thereof by persons for whom sleeping accommodation is provided but who are not harboured or detained to receive medical care or treatment or are not involuntarily detained".

In view of my previous findings, these sections cannot provide an exemption to the respondents from the requirement to obtain a building permit for any of the buildings Nos. 2 to 5 inclusive. Indeed, they attempted to get a permit for building No. 2 and when it was refused, proceeded in any event and in so doing ignored a stop-work order.

By O. Reg. 669/76, s. 1, made August 11, 1976, and filed August 17, 1976, the above sections of the Regulations were revoked and the following substituted:

> 2.9.2 A building intended for farming purposes and not intended for residential occupancy is exempt from compliance with the requirement of a permit for construction in a municipality where the council of the municipality has not passed a by-law prescribing a class of permits for the construction of such buildings.
>
> 2.9.3 Sentence 4.1.1.2.(1) applies to a building constructed on a farm for farming purposes and not intended for residential occupancy.

Again by reason of the prior findings, this amendment does not aid the respondents. Sentence 4.1.1.2.(1) provides for the design of farm buildings other than those used as a residence and requires that they conform to the Canadian Code for Farm Buildings, 1970 unless constructed by a person for his own use.

Burlington by by-law effective March 14, 1977, prescribed a class of permits for the construction of such buildings.

By O. Reg. 621/78, s. 4, made August 2, 1978, and filed August 10, 1978, the above s. 2.9.3 was repealed and the new s. 2.9.3 was inserted in its place. It reads:

> 2.9.3 A building to be constructed on a farm for farming purposes and not intended for residential purposes is exempt from the requirements of the building code except Sentence 4.1.1.2.(1).

Again by reason of the prior finding that at no time material to this application was the land a farm, or the buildings numbered two to five built for farming purposes, this does not aid the respondents.

Under the Building Code Act, 1974 and Regulations these respondents were required to obtain building permits for the construction of buildings numbered two, three, four and five and failed to do so unless saved from this requirement by the Parkway Belt Planning and Development Act, 1973.

The submission that the Parkway Belt Planning and Development Act, 1973 rendered the Building Code Act, 1974 inoperative in the area of the Parkway Belt, or provides for enforcement within that area, inconsistent with the continued authority of the Chief Building Official of Burlington, is not sound. Concurrent with the passage of the Parkway Belt Planning and Development Act, 1973 the Legislature passed the Niagara Escarpment Planning and Development Act, 1973 (Ont.), c. 52, and the Ontario Planning and Development Act, 1973 (Ont.), c. 51. The Building Code Act was passed in 1974. These are all land-use statutes. It is significant that Regulations [O. Reg. 453/75] under the Niagara Escarpment Planning and Development Act, 1973 expressly provide that:

> 3. ... zoning by-laws and Minister's Orders made under section 32 of The Planning Act, or any part thereof, set out in Schedule 1 cease to have effect in the area of development control.

By Sch. 1 that portion of Burlington within the Niagara Escarpment area is included. There is no such provision in the Parkway Belt Planning and Development Act, 1973.

The Parkway Belt Planning and Development Act, 1973 and the Building Code Act, 1974 are for different purposes. They may coexist each with the other. In the event any area of conflict arises between these two provincial statutes the Court would be required to attempt resolution of the conflict by determining legislative intention and paramountcy. No such conflict arises in the present application because the only area in which it could arise is relating to the use by the respondents of the land for "agricultural uses". These respondents never did use these lands for agricultural or farm purposes or uses in 1973 and thereafter but rather were occupying and using the land and buildings thereon for the business of operating the adult social club.

There is no provision in the Parkway Belt Planning and Development Act, 1973 that does away with the requirement for a building permit, nor do I find any support for the submission

that the Building Code Act, 1974 does not apply within the Parkway Belt area. Indeed, it is made clear that, absent conflict the municipal by-laws do coexist. See s. 5.1.3 of O.C. 2188/78 passed under Parkway Belt West Plan, and see ss. 9, 10 and 11 of the Ontario Planning and Development Act, 1973 which provides for a mechanism for resolving conflict between the plan and municipal by-laws relating to the defined area.

I am of the opinion that the Parkway Belt Planning and Development Act, 1973, does not have the effect of eliminating compliance with the Building Code Act, 1974 or of ousting the jurisdiction of the chief official to enforce compliance with the Building Code Act, 1974.

I find that the provisions of the Building Code Act, 1974 applied to the construction of each of these buildings and with respect to those numbered two, three, four and five were not complied with by the respondents.

I find the applicant is the proper person to bring this application arising out of such non-compliance. I have no hesitation in finding that the conduct of the respondents was deliberate and defiant, and lacking in any bona fide belief that a permit was not required. Their conduct cannot be regarded lightly.

The application is brought under s. 25 of the Building Code Act, 1974. It reads:

> 25(1) Where it appears to a chief official that any person does not comply with any provision of this Act, the regulations or an order made under this Act, notwithstanding the imposition of any penalty in respect of such non-compliance and in addition to any other rights he may have, the chief official may apply to a judge of the High Court for an order directing such person to comply with such provision, and upon the application, the judge may make such order or such other order as the judge thinks fit.
>
> (2) An appeal lies to the Supreme Court from an order made under subsection 1.

The jurisdiction of this Court to make the mandatory order requested re buildings numbered two, three, four and five is clear. It has been exercised on countless occasions. However, the respondents refer to the decision of my brother Southey in Hadley et al. v. Santos, heard September 20, 1977, but as yet unreported [summarized [1977] 2 A.C.W.S. 766], as supporting their position. In that case an application was brought by the Chief Building Official of Toronto and the corporation for an order requiring the repondent to cease alterations to premises without a permit and for the removal of all construction performed without a permit. Southey J. stated:

> Section 25(1) of the Building Code Act, 1974, does not expressly authorize me to make an order requiring a person who has proceeded with alterations without a permit to stop work on those alterations. Such an order would not, in my view, be an order directing such person to comply with a provision of the Act, the Regulations or an order made under the Act, although it might be the appropriate order to make in another case.

The respondents assert that this calls in question the right of the Court to make a demolition order since that would be a far more drastic order than a "stop-work-order". However, Southey J. goes on:

> As to the second relief claimed, namely, an order requiring the respondent to remove all construction performed without a permit and to restore the interior of the building to its original condition, there is no evidence before me that any of the alterations at 19 Tyndall Ave. were in breach of the Building Code Act, 1974, the Regulations or an order made under that Act, apart from the failure of the respondent to obtain a permit. If there were such evidence, then I could order that the respondent comply with the provisions of the Building Code Act, 1974, Regulations or an order made under the Act, by removing the work done in connection with the alterations or otherwise making the building comply with the Act and the Building Code.

These respondents did not comply with any of the provisions of the Building Code Act, 1974 regarding construction of

buildings numbered two, three, four and five.

In the present case I am satisfied that I am empowered to order demolition of buildings numbered two, three, four and five and this I now do. These buildings are to be demolished because the failure to obtain the required permits for their construction was deliberate and defiant and, I am satisfied, without any honest belief that such were not required. To permit these buildings to remain standing in these circumstances would be to reward the respondents' offensive conduct.

There will be an order directing that the respondents forthwith demolish buildings numbered two, three, four and five. To this end I direct that unless the respondents demolish and remove buildings numbered two, three, four and five from their lands at 1323 Snake Rd., Burlington, within 45 days or make arrangements satisfactory to the applicant and the municipality therefor, the applicant may then enter upon the lands and cause these buildings to be demolished at the expense of the respondents.

Costs of this application to be paid by the respondents to the applicant forthwith after taxation.

Application granted.

FINDINGS OF FACT

LEGAL ANALYSIS

SUMMARY

CONCLUSION

OVERVIEW

[para1] What constitutes the duties and obligations of municipal building department officials in the issuance building permits and the inspection process in circumstances where the architectural drawings submitted bear the approval stamp and seal of a professional engineer? That forms the principal issue underlying this case.

[para2] In argument, Mr. Davison underlined the crucial importance of this issue to all municipalities in the operation of their building departments. Although I doubt it

is as major as he makes it out to be, the issue discussed may increasingly arise in the future due to the prevalence of more flexible and creative procedures in the building approval process.

[para3] The plaintiff, Hilton Canada Inc. (Hilton) is a subsidiary of Hilton International and carries on the business of operating hotels throughout Canada. As such, it owns and operates a hotel located on Dixon Road in the City of Mississauga (the City) known as the Toronto Airport Hilton hotel (the hotel).

[para4] In 1986, the City approved superstructure plans for the construction of a 154 unit, 9 storey addition to the hotel, based upon preliminary drawings which were structurally deficient. Indeed, the plans lacked items as essential as steel reinforcing bars to support the structure.

[para5] In the fall of 1990, serious structural deficiencies in the building became manifest. Investigators discovered shear stress at the interior columns measuring about 120% greater than that specified by the applicable building codes. Grave concerns of sudden shear failure causing instantaneous collapse of the building floor by floor "like a deck of cards" led to the closure of the addition in September, 1991 for repairs and remedial work.

[para6] The contractor, Magil Construction Ltd. and Magil Construction (Ontario) Ltd, declared bankruptcy. Laurence L. Turner (Turner), the engineer, resided in Quebec and was president of Laurence L. Consultants Inc. a company carrying on business in the province of Quebec and elsewhere, as structural engineers. George S. Burman (Burman) carried on business as an architect in the province of Ontario, at the relevant time. Both Turner and Burman were retained by Hilton in the construction of the building. Both have admitted negligence in its structural design and have settled the claims brought against them by the plaintiff. Accordingly, this case proceeded only against the Corporation of the City of Mississauga. An index to this decision is attached as Schedule "A".

THE ALLEGATIONS

[para7] It is alleged that the City contributed to the damage sustained by Hilton by reason of its actions in approving obviously deficient plans for construction and in confirming compliance of the final plans with applicable legislation. Damages are agreed to be in the sum of $5,531,142.71.

[para8] The specific allegations contained in the pleadings are as follows:

> 43. The concrete structural design deficiencies were caused or created by the defendants in breach of their contractual duties to Hilton and in breach of their duty of care to Hilton. Hilton states that the defendants Magil, Magil Ont. and Burman have breached their contractual obligations to Hilton and all defendants were negligent in the exercise of their duties and responsibilities on the Project, particulars of which are as follows:
>
> (D) as against the City of Mississauga:
>
> (i) it appointed a Chief Building Inspector who was incompetent to carry out the duties and
>
> responsibilities required of him by the Ontario Building Code Act and the Ontario Building Code;
>
> (ii) it employed incompetent servants and agents to carry out the duties of the building inspector and the department, as overseen by the Building Inspector or otherwise;
>
> (iii) the City, or its chief inspector, for whose actions the City is in law responsible, failed to review the architectural and concrete structural designs submitted by Magil, Magil Ont., Burman, Turner Consultants and Turner adequately or at all, to ensure that they

conformed with the provisions of the Ontario Building Code and the National Building Code and any other building legislation in effect at that time;

(iv) the City, or its Building Inspector, for whose actions the City is in law responsible, failed to ensure that the plans and designs submitted

by Magil, Magil Ont., Burman, Turner Consultants and Turner adequately conformed with the by-laws passed by the City or at all;

(v) the City or its Chief Inspector, for whose actions the City is in law responsible issued a permit for construction to Magil, Magil Ont., Burman, Turner Consultants and Turner, and approved the plans and designs submitted by Magil, Magil Ont., Burman, and Turner in total and wanton disregard of the provisions of the Ontario Building Code Act, the Ontario Building Code and National Building Code in effect from time to time and failed to advise Hilton of that fact;

(vi) The City breached its statutory duty to Hilton to ensure that the plans and designs submitted in respect of the Project conformed with the provisions of and the requirements of the Ontario Building Code and the National Building Code and the Ontario Building Code Act;

(vii) the City, or its Chief Inspector, or other inspectors, for whose actions the City is in law responsible, failed to make adequate or appropriate inspections or investigations of the progress of construction from time to time as required by statute, or at all, in breach of its statutory and other common law obligations to the plaintiff, to ensure that the work performed was satisfactory and met the provisions of the Ontario Building Code and the National Building Code in effect from time to time and failed to advise Hilton of that fact;

(viii) the City knew or should have known that its actions in approving the plans submitted by Magil, Magil Ont., Burman, Turner Consultants and Turner, in direct contravention of its duties to the plaintiff, both statutory and at common law, would result in significant loss and damage to Hilton and failed to advise Hilton of that fact.

[para9] In its statement of defence, the City denied any lack of duty or negligence on its part, stating:

4. This Defendant states that it did not owe a duty of care to the Plaintiff to review the plans and drawings which included the concrete structural design referred to in the Amended Statement of Claim as those plans and drawings had been prepared by and bore the approval stamp of an independent professional engineer.

5. This Defendant states that it carried out its duties and obligations in respect of issuing building permits for and inspecting the construction of the Second Tower referred to in the Amended Statement of Claim in a reasonable and proper manner, without any breach of duty, want of care or negligence on its part or on the part of anyone for whom it is in law responsible.

6. This Defendant states that if the Plaintiff sustained the damages and losses referred to in the Amended Statement of Claim, which is not admitted, such damages and losses were not caused or

contributed to by any negligence on the part of this Defendant or on the part of anyone for whom it is in law responsible.

7. This Defendant states that all proposed plans and

specifications for the construction of the Addition were reviewed in detail by professional engineers and architects in the Plaintiff's employ, or alternatively, in the employ of its sole owner and "directing mind", Hilton International Inc.

8. This Defendant states that if the Plaintiff sustained the damages referred to in the Amended Statement of Claim, which is not admitted, such damages were caused or contributed to by negligence on the part of professional engineers and architects in its employ or in the employ of Hilton International Inc. and the contractors and consultants retained by Hilton to design and construct the Addition, Magil Construction Ltd., Magil Construction (Ontario) Ltd., Laurence L. Turner Consultants, Laurence L. Turner, George Burman, William Hurst and John Miolla for all of whose negligence the Plaintiff is in law responsible.

THE RELEVANT LEGISLATION

[para10] The following statutory and regulatory schemes governed the construction of buildings in Ontario, at the relevant time:

1) the Building Code Act R.S.O. 1980, c. 51 (the Act);

2) the Ontario Building Code, revised O. Reg. 549/84 (the Code); and

3) Corporation of the City of Mississauga By-law 902-82 - The Building By-law, as amended (the By-law).

[para11] The relevant sections of those statutes are reproduced below:

The Building Code Act

3(1) The council of each municipality is responsible for the enforcement of this Act in the municipality.

(2) The council of each municipality shall appoint a chief building official and such inspectors as are necessary for the purposes of the enforcement of this Act in the areas in which the municipality has jurisdiction.

5(1) No person shall construct or demolish or cause to be constructed or demolished a building in a municipality unless a permit has been issued therefor by the chief official.

(2) The council of a municipality may pass by-laws and the Lieutenant Governor in Council may make regulations applicable in the area in which the municipality or Ontario, respectively, has jurisdiction for the enforcement of this Act,

(a) prescribing classes of permits for the purposes of subsection (1), including permits in respect of any stage of construction or demolition;

(b) providing for applications for permits and requiring the applications to be accompanied by such plans, specifications, documents and other information as is prescribed;

(c) requiring the payment of fees on applications for and issuance of permits and prescribing the amounts thereof;

(d) providing for the refunding of fees under such circumstances as are prescribed;

(e) prescribing the time within which notices required by the regulations must be given to the chief official or an inspector;

(f) prescribing forms respecting permits and applications for permits and providing for their use;

(g) requiring that a set of plans of buildings as constructed be filed with the chief official on

completion of the construction of buildings of such class as prescribed by the regulations.

6(1) The chief official shall issue a permit except where,

(a) the proposed building or the proposed construction or demolition will not comply with this Act or the building code or will contravene any other applicable law;

(c) the application therefor is incomplete or any fees due are unpaid.

(2) Drawings, plans and specifications accompanying applications for permits shall be made available to the Association of Professional Engineers of the Province of Ontario and the Ontario Association of Architects upon request for the purpose of determining whether the Professional Engineers Act or the Architects Act is being contravened.

(3) No person shall make a material change or cause a

material change to be made to a plan, specification, document or other information on the basis of which a permit was issued without notifying the chief official and filing details of such change with him for the purpose of obtaining his authorization.

(4) No person shall construct or cause to be constructed a building in a municipality except in accordance with the plans, specifications, documents and any other information on the basis of which a permit was issued or any changes thereto authorized by the chief official. 1978, c. 40, s. 3 (3).

8(1) Subject to section 11, an inspector may, for the purpose of inspecting a building or site in respect of which a permit is issued or an application for a permit is made, enter in or upon any land or premises at any time without a warrant.

(2) Where an inspector finds that any provision of this Act or the building code is being contravened, he may give to the person whom he believes to be the contravener an order in writing directing compliance

with such provision and may require the order to be carried out forthwith or within such time as he specifies.

11(1) For the purposes of an inspection under section 8 or 10, the inspector may,

(a) require the production of the drawings and specifications of a building or any part thereof, including any drawings prescribed by the regulations, for his inspection and may require information from any person concerning any matter related to a building or part thereof;

24(1) Every person who,

(c) contravenes any provision of this Act or the regulations or of any by-law passed under the authority of this Act,

... is guilty of an offence ...

The Building Code

PART 2 GENERAL REQUIREMENTS

SECTION 2.1 APPLICATION

Subsection 2.1.1. General

2.1.1.1. Parts 1 and 2 apply to all buildings

2.1.1.2.(1) Parts 3,4,5 and 6 apply to the design and construction of,

(b) all buildings exceeding 600 m2 in building area or exceeding 3 storeys in building height used for or intended for,

(I) Group C, residential occupancies,

2.1.1.3.(1) Part 9 applies to the design and construction of buildings of 3 storeys or less in building height, having a building area not exceeding 600 m2 and which are used or intended for

(a) Group C, residential occupancies;

SECTION 2.5 DESIGN GENERAL REVIEW

Subsection 2.5.1. Design

2.5.1.1.(1) Every building or part thereof shall be designed by an architect or professional engineer or a combination of both as described in Table 2.5.1.A. and this Article.

(2) Where a building or part thereof described in Table 2.5.1.A. is designed by an architect or a professional engineer or a combination of both as required by this Section, all plans, sketches, drawings, graphic representations, specifications and other documents that are prepared by an architect, professional engineer or both and that form the basis for the issuance of a building permit or any changes thereto authorized by the chief

official shall bear the signature and seal of the architect, professional engineer or both, as applicable.

TABLE 2.5.1.A. (4)
Forming Part of Sentence 2.5.1.1.(1)

Building Classification by Major Occupancy	Building Description	Design and General Review by:
Residential occupancy only	Every building that exceeds 3 storeys in building height	Architect and professional engineer (1)

Notes to Table 2.5.1.A.

(1) An architect shall provide services within the practice of architecture and a professional engineer shall provide services within the practice of professional engineering.

Subsection 2.5.2. General Review

2.5.2.1(1) Except as permitted in Sentence (2), a person who intends to construct or have constructed a building required to be designed by an Architect, Professional Engineer or both, shall ensure that an Architect, a Professional Engineer or both are retained to undertake the general review of the construction of the building in accordance with the performance standards of the Ontario Association of Architects or the Association of Professional Engineers of Ontario, as applicable, to determine whether the construction is in general conformity with the plans, sketches, drawings, graphic representations, specifications and other documents that are prepared by an Architect, Professional Engineer or both and that form the basis for the issuance of a building permit or any changes thereto authorized by the chief official.

2.5.2.2(1) Only an Architect may carry out or provide the general review of the construction of a building,

(a) that is constructed in accordance with a design prepared or provided by an Architect; or

Caselaw

(b) in relation to services that are provided by an Architect in connection with the design in accordance with which the building is constructed.

(2) Only a Professional Engineer may carry out or provide the general review of the construction of a building;

(a) that is constructed in accordance with a design prepared or provided by a professional engineer; or

(b) in relation to services that are provided by a professional engineer in connection with the design in accordance with which the building is constructed.

SECTION 2.9 NOTICE TO CHIEF OFFICIAL

2.9.1.1(1) Where the council of a municipality passes a by-law pursuant to Section 5.(2)(e) of the Act, the person to whom the permit has been issued shall notify the chief official,

(a) of the commencement of the construction of the building;

(b) of the readiness to construct the footings;

(c) of the substantial completion of the footings and foundations;

(e) where the building is within the scope of other parts of the code, of the substantial completion of,

(i) structural framing of each storey,

(ii) insulation and vapour barriers and,

(iii) roughing-in of heating, ventilation, air-conditioning and air-contaminant extraction equipment;

(f) of the substantial completion of all required fire separations and closures and all fire protection systems including standpipe, sprinkler, fire alarms and emergency lighting systems;

(g) of the substantial completion of interior finishes and heating, ventilating, air-conditioning and air-contaminant extraction equipment;

(h) of the substantial completion of exterior cladding, fire access routes and site grading; or

(i) of the completion and availability of drawings of the building as constructed.

Part 3 of the Code is the use and occupancy section which deals with such matters as size and occupancy requirements for fire safety, safety requirements within floor area, requirements for exits, service spaces, health requirements, signs and so on.

Part 4 of the Code is the structural design section which sets out structural loads and procedures, foundations, wood, masonry, concrete, steel and aluminium general and design requirements.

Part 9 of the Code outlines exterior and interior criteria for housing and small buildings.

By Law 902-82- The Building By-law

3. APPLICATION FOR PERMIT

(1) To obtain a permit the owner or his authorized agent shall file an application in writing by completing

the forms available at the offices of the Municipality.

(2) Except as otherwise permitted by the Chief Building Official, every application for construction and/or demolition shall:

(a) identify and describe in detail the work and occupancy to be covered by the permit for which application is made;

(c) be accompanied by plans and specifications as described in subsection 4;

(d) state the names, addressed and telephone numbers of the owner, architect, engineer or other designer and the prime contractor;

(e) be accompanied, where applicable, by a written acknowledgement of the owner, which shall be confirmed by the named architect or professional engineer, that the owner has retained the named architect or professional engineer to carry out the field review as described in Section 2.4 of the Building Code;

(f) be signed by the owner or his authorized agent, who shall certify the truth of the contents of the application.

(4) Sufficient detailed drawings, specifications, calculations, test reports and the documentation thereof shall be submitted with each application for a permit to enable the Chief Building Official to determine whether or not the proposed work will conform with the Building Code Act, the Building Code and other applicable law.

(9) The Chief Building Official may issue a permit to construct a portion or a component of a building.

8. CLASSES OF PERMITS

Permits to be issued by the Chief Building Official shall be divided into the following classes:

1. Complete Building
   For new building construction including additions and alterations to existing buildings (this permit includes associated drains, plumbing and mechanical works).
2. Foundation Component

3. Superstructure Component
7. Designated Structures
   Includes all structures designated under the Regulation set out in Section 2.1.2 of the Building Code Act

PERMIT FEE
CLASSES OF PERMITS

2. STRUCTURAL COMPONENT As per Number One above
   For the structural component of a building not including any plumbing, drains or mechanical work. (Includes structures as designated in the Regulations under the Building Code Act).

NOTE: The structural component of a large building may under certain circumstances be issued in two stages as follows:

(a) Foundation only As per Number One above
   For the structural components of a building at or below finished grade level, but not including any plumbing, drains, or mechanical work.

(b) Superstructure Only No Charge
   For the structural components of a building above finished grade level (for which a Foundation Permit was previously issued), but not including any plumbing, drains, or mechanical work.

THE EVIDENCE

(a) Personnel

[para12] The following chart outlines the organization of the Mississauga building department personnel as at January 1986:

[Ed. Note: See paper copy for personnel chart.]

(b) The Witnesses

[para13] Evidence was adduced on Hilton's behalf by William R. Webster and John Paul Stephenson. The plaintiff also relies upon evidence read into the record from the examinations for discovery of some of the defendants' witnesses. The City called evidence from the following witnesses: Lennox Dinzey, Manny Navabi, Gino Guatto, Tracey Preston and Robert Halsall. It also relies upon the evidence of Keith Cowan given de bene esse.

William R. Webster

[para14] Mr. Webster (Webster) holds an operating engineer's certificate and has taken several educational and specialist courses in technical services and administrative matters with respect to building construction. He joined Hilton International as assistant chief engineer in May 1971. From 1971 to 1985, he held various positions at Hilton in Vancouver, Montreal and New York. Working in the technical services department, he was responsible for ensuring that all proposed design development was suitable for Hilton's requirements in its layout, operating efficiency etc. Through the years, he has taught senior management officials at the Creative Development Institute run by Hilton International. Webster left the company in 1985 but was re-hired in August, 1988 as vice-president of technical services. Based in London, England, he has responsibility on a worldwide basis for the technical installation and refurbishment of 170 operating hotels located in 50 countries.

[para15] Although never directly employed by the plaintiff company, Webster became heavily involved with the project at hand in the fall of 1990. According to him, sometime prior to 1985, Hilton's guidelines for specifications, planning and details were provided to Burman. As a general rule, Hilton would normally rely upon both the technical consultants it employed for a particular construction project and the "local authority review". Although the latter aspect differed in various countries, his understanding of the scope of building review in Ontario was that the public authority would review the designs, provide comments, withhold or grant a permit and then conduct field inspections at specific stages of construction. His answers are, of course, binding on the plaintiff.

[para16] When asked to comment on a letter dated February 12, 1986 from Burman to M. Tadros, director of purchasing for the plaintiff, indicating the City's requirement to proceed "in a different way than if the building construction was fully defined when applying for the permit," Webster interpreted this as meaning

> ... there are permit level submission requirements which may precede what you would call full working drawing sets being completed, and certain full working drawing sets would not have been available at this point in time given the process that was being followed.

[para17] Minutes of site meeting #3 dated April 24, 1986 referred to lack of detail on drawings and the urgent need for drawings for the remainder of the structure. Webster viewed this as showing that the construction may not have been "keeping pace" with the progression of design development.

John Paul Stephenson

[para18] Mr. Stephenson obtained an engineering degree in Applied Science from the University of Toronto in 1963. After working with a consulting engineering firm, he established John Stephenson Consulting Ltd. in 1969 to provide structural engineering expertise in the structural design of buildings. As the principal partner in the firm, he has been responsible

over the years for the structural design of over 4000 construction projects including office, apartment and condominium buildings, industrial projects, schools, shopping centres, municipal buildings, nursing homes, hospitals and churches.

[para19] In the fall of 1990, Mr. Stephenson was contacted on Hilton's behalf, regarding a potential problem with the addition. At a number of locations in the hotel, non-bearing partitions had bowed laterally to the point of breaking. When he first visited the site on November 22, 1990 the initial 1986 architectural drawings were obtained. In an interim report dated December 13, 1990 Stephenson noted "numerous cracks of significant proportions" indicative of severe overstress and concluded that the amount of deflection calculated to occur was considerably in excess of that normally permitted or expected from "properly designed and built structures". On the basis of calculations and available information, it was found in January, 1991 that the entire structure above the third floor, did not meet building code requirements. The firm's preliminary conclusions were as follows:

> The slabs are grossly overstressed in shear and must be reinforced. We do not believe that the building is in
>
> imminent danger of collapse, but recommend that prompt action be taken to remedy the situation.
>
> The building appears to have adequate strength to resist wind loads but not earthquake loads as required by code.
>
> The columns do not satisfy the code with regard to fire rating.
>
> It is also our opinion that some of the structural components below the 3rd floor are of questionable strength and may not comply with the building codes.

[para20] A subsequent review of Turner's calculations disclosed several errors which confirmed the previous finding that the slabs did not meet code requirements for punching shear. Stephenson submitted further reports dated May 21, 1991, June 3, 1991, July 5, 1991 and February 27, 1992, detailing the structural design evaluation and the outline of potential remedial measures.

[para21] An additional investigation of the structural framing from foundation to and including the third floor found several elements to be overstressed but "no signs of extreme distress or of potential catastrophic failure." It was recommended that the overstressed elements be reinforced to satisfy the appropriate codes. The nature and extent of the remedial work undertaken is not in dispute.

[para22] In his testimony, Stephenson stated that the deflection and shear capacity problems were obvious to him from the outset upon a glance at the initial drawings filed as Exhibit 6. The deficiencies in the architectural drawings, including the final drawings (filed as Exhibit 7) became apparent upon a visual review of the drawings in a manner which he described as "virtually instantaneous".

Lennox Dinzey

[para23] Lennox Dinzey obtained a diploma in building technology at a College of Technology in London England; and has been employed in the field of architectural technology since 1956. From 1968-1969, he was senior architectural draftsman for the Toronto Transit Commission working on subway design and construction. In 1969, he was hired as senior plans examiner for the Borough of Etobicoke; and in 1972, he became the senior supervisor in the Structural Plan Examination department of the City. According to his curriculum vitae, his role as supervisor included the examination of plans submitted with applications pertaining to residential, commercial, industrial, public buildings and structures to ensure they were in conformity with the relevant building codes and committee of adjustments. He also consulted with architects, engineers and building contractors regarding the design of projects. Since 1987, he has been self-employed providing, in the main, supervision for construction projects.

[para24] It was Dinzey who reviewed the initial drawings submitted by Hilton and agreed to issue a superstructure permit on conditions and subject to final approval by Mr. Franks, the CBO. He also examined the final revised drawings in August 1986. When asked why he would approve drawings which were obviously deficient for construction purposes, he explained that:

1) Hilton's representatives were "pleading and begging" for a permit as they had deadlines to meet. They were permitted to start working in order to do them

   a favour and facilitate the construction.

2) although not unique this was a special situation - the engineer came in to certify he was in complete control, would be on site and monitor everything.

3) it was Dinzey's understanding that the drawings were in preparation at the time the permit was granted. They were working on them "day and night" and revised drawings for construction would be designed and kept on site.

4) immediately upon the granting of the initial permit, the City issued a withhold letter for non-compliance with the Code, requiring Hilton to submit several sets of final architectural and structural drawings prior to the issuance of a completion permit.

[para25] Dinzey also described the City's policy of conducting a cursory review of structural design aspects of construction. His markings on the initial drawings were consistent with this approach.

Manny Navabi

[para26] Manny Navabi obtained a Bachelor of Science degree in civil engineering from Queen's University in 1966; a Masters of Science degree in structural engineering from the University of Surrey, England in late 1970; and a doctorate in civil engineering from McMaster University in 1980.

[para27] He worked as a professional engineer in Ontario commencing in 1974; was employed by the City in 1976 and remained there until October, 1990. On June 23, 1986 he became the City's chief building official and director of the building department. Prior to that, he was director of inspections.

[para28] He described the departmental policy review in respect of proposed and ongoing construction projects. This entailed a detailed examination of architectural drawings for compliance under Part 3 of the Code and a cursory review of Part 4 structural requirements. He learned the parameters of this alleged "policy" on the job from the previous engineer; and they remained constant throughout his tenure.

[para29] Navabi described in detail the type of review undertaken for the different classes of building and the rationale for this. The department issues in the neighbourhood of 8000 - 9000 permits per year. The structural plans for large buildings are designed, stamped and signed by a professional engineer and detailed checking of the engineer's calculations fell outside the scope of what could have been achieved in the building and standards department. The nature of the cursory review of the structural drawings, therefore, consisted of a checking for the seal and signature of a professional engineer licensed to practice in Ontario, the correct loads (by means of a simple calculation in the Code) and a soil report, if indicated. Navabi denied ever having checked or redone a structural design calculation on drawings submitted by a professional engineer.

[para30] The Part 3 review consisted of a more detailed checking of use and occupancy matters directly affecting the safety of building occupants such as the sprinkler system, fire alarm, fire ratings and occupant loads. In doing so, the plans examiner would follow the descriptive and relatively simple calculations in the Code tables provided under Part 3. It was ascertained early on that both architects and engineers were often not entirely familiar with Code requirements whereas the municipal officials developed expertise in this

area.

[para31] With respect to Part 9 buildings less than 3 storeys in height and 6000 square feet, a more detailed plans examination was conducted in terms of an architectural and structural review since there was no requirement for design by an architect and engineer. It was therefore incumbent upon building officials to ensure design safety for purposes of public protection.

[para32] Regarding the Part 4 inspection review process, the City's mandate was to carry out inspections for compliance with the Code in accordance with the drawings which formed part of the permitted document. In the field, the inspector, as a practical matter, looks at the construction and monitors the progress of the work. If anything unusual is detected such as water in the footings, this is brought to the attention of the architect or engineer. The site drawings are reviewed to ensure general construction compatibility only.

[para33] In cross-examination, when specifically asked about the inadequate drawings, Navabi frankly indicated that due to their incompleteness, he would normally "get in touch" with the structural engineer or supervisor. He was unable to determine the correctness of the thickness of the slabs of cement etc. from the Exhibit 7 drawings without calculations and noted the column schedule showing the rebars on the completed set of structural drawings. In response to concerns raised by the plaintiff, it was his view that the notation of 10 instead of 9 storeys on the drawings was matter of degree leaving room for some confusion, and any problem with the footings and columns called for "on the job correction" by the superintendent as a matter of discretion.

[para34] In this case, the cursory review of the structural design matters would yield satisfactory results - the load requirements under the Code were proper, the soil report determined suitable bearing capacities and foundation arrangements, and the drawings bore the seal and signature of an Ontario architect and engineer. City officials marked use and occupancy requirements in red pencil on the drawings.

Gino Guatto

[para35] Mr. Guatto graduated from Ryerson Polytechnical Institute in architectural technology in 1968. He became a building inspector for the City in December, 1973. In the main, he inspected Part 9 buildings and took courses dealing with Part 3, the use and occupancy provisions of the Code. His stated responsibilities did not include the review of structural plans or the inspection of buildings for compliance with the Part 4 Code provisions. According to Guatto, the structural review aspects were left to the professional engineer. The City relied upon the engineer to make site visits and to certify that the construction was in conformity with the proposed design. At the same time, as building inspector, he would satisfy himself that the building was in general conformity with the architecturally permitted drawings.

[para36] Regarding this project, he first attended at the site on February 7, 1986, spoke to the contractor and requested progress reports on a floor to floor basis. Between February and May 27, 1987 when the final structural report was received from the engineer, he had completed 16 field inspection visits. The superintendent on site was cooperative, the concrete smoothly finished and the project was progressing in normal manner. Site review reports were prepared and certified by Turner during the course of construction. Guatto did not specifically review the structural drawings but took an active role in Part 3 matters such as inspecting fire separations for conformity with the drawings. When the interior partitions required a permit, he issued an order to comply with Act or Code on August 22, 1986. In November 1987, a like order was issued with respect to 3 deficient items.

[para37] Guatto's efforts were clearly concentrated on Part 3 use and occupancy matters and the structural review was left to the professional engineer in accordance with departmental policy which was unwritten but "learned on the job". He was unaware as to what other inspectors did in that regard.

Tracey Preston

[para38] Tracey Preston, executive director of the Ontario Building Officials Association, gave testimony regarding the criteria for the training and certification of building officials. The Association represents 2200 building officials in 700 municipalities throughout Ontario. It sets professional standards and provides courses on a voluntary basis, for base and advanced level of competency in the plans examiner and building inspection areas. The courses in 1986 concerned Part 9 and Part 3 buildings, a legal process and responsibilities course. There was no Part 4 component then, nor is there one now; that is, there are no courses for building officials regarding structural design matters.

Robert Halsall

[para39] Robert Halsall is president and chairman of the board of Robert Halsall and Associates Limited, Consulting Engineers, a company which he founded in 1956. He received a Bachelor of Science degree in civil engineering from the University of Glasgow, Scotland in 1947. His curriculum vitae displays an impressive array of professional activities and affiliations. As senior principal of the firm, he has been involved in the design and investigation of numerous projects under the categories: apartments, condominiums and non-profit housing; commercial and retail projects; communications and computer facilities; health care facilities; laboratories and research facilities; libraries; museums, galleries, pavilions; office buildings; parking facilities; recreation and sports facilities; schools; theatre-related projects; and university and college facilities.

[para40] Halsall has appeared as an expert witness in court and alternative dispute resolution matters; and has conducted historical building assessments and restorations. His firm was retained by the City in September 1991 to investigate this matter in conjunction with the owner's expert, John Stephenson Consultants Ltd. In a report dated September 20, 1991 Halsall found shear stresses in the typical floor slabs of the building which were far beyond those allowable by current or recent codes, and which appeared to be "dangerously close to the stresses which may be expected to cause sudden failure." At the same time he noted that:

> The analysis of shear stresses in concrete flat slabs is very complex, and there is only a limited amount of experimental data available. No absolute answers are available and there is quite a wide spread between the results of different researchers.

Due to the fact that "work on punching shear stress in slabs is a rather esoteric speciality," he suggested the retention of Dr. Sydney Simmonds, consulting structural engineer at the University of Edmonton, for a second opinion. Further calculations confirmed the finding that shear stresses far exceeded the allowable stresses defined by the Code. In a report dated September 30, 1991 Mr. Halsall stated:

> Knowing that the code has a safety factor of 2.0 to 2.2 against shear failure the deviation of 97 to 130%, is dangerous and very close to the expected punching shear failure of the flat plate. This type of failure is sudden and progressive.

Dr. Simmonds also concluded that "if failure occurred it would be likely a sudden shear failure, without the warning given by further extreme deflection." In a final report dated October 15, 1991 Halsall assessed several areas of construction, the main finding being that the floor slabs were "severely overstressed at the junction between the slabs and the typical interior columns" necessitating immediate remedial action.

[para41] When Halsall was retained in September 1991, he was provided with the final set of drawings (Exhibit 7). At trial, upon a review of the earlier plans (Exhibit 6), he found them to be patently incomplete and usable only for the commencement of excavation. At the same time, he consistently expressed the opinion that the building was constructed substantially in accordance with the final plans (Exhibit 7); moreover, in the configuration of concrete flat slabs, columns and beams, both plans were similar. Finally, the structural deficiencies were not apparent by a visual review of either

sets of plans or the work under construction. The uncovering of the structural design deficiencies required a complex set of calculations.

Keith Alexander Cowan

[para42] Mr. Cowan gave his evidence de bene esse on July 18, 1997. He was the City's chief building official from the 1970s to 1983, when Alex Franks now deceased, took over that position. Navabi later became the CBO in June, 1986.

[para43] Both parties rely upon Cowan's evidence, Mr. Ricchetti because he stated that it would be "impossible to

issue a permit for a concrete building that clearly requires reinforcing"; and Mr. Davison to confirm the City's policy not to review Part 4 buildings except for fire safety and other related matters. Cowan explained the underlying rationale for this in the following exchange:

> Q. And you would have considered this to be a fairly significant decision on your part and Mr. Franks part?
>
> A. Which, which decision?
>
> Q. The decision not to review the part four buildings except for fire matters?
>
> A. It was not a conscious decision to not to do that at the beginning. It was simply impractical to, to require this -- as I say -- the, the, the structural matters like this to review it over and over again would pretty well bring the department to a stand still.
>
> Q. Mhmhmm.
>
> A. And so that is the reason why, why these -- why there is such a thing as certification, why there is such a thing as a, as a, as a certified professional engineer. That's why we have professional engineers.
>
> Q. This ...
>
> A. And we don't very often have certified professional engineers reviewing the work of other certified professional engineers. It becomes, in my mind, a little bit ludicrous as you might, as you might hire a third certified engineer to check the one that was done before. There seems to be no end. If, if the person is, is, is qualified it has to stop somewhere.

His evidence in that regard was consistent with that of the other witnesses from the City who gave testimony at trial.

(c) Findings of Credibility

[para44] This is not a case that hinges upon the credibility of witnesses. Many of the facts are not in dispute; some of the evidence is subject to different interpretations. All of the witnesses called on behalf of both parties gave their testimony in a straightforward and genuine manner and with remarkable consistency given the depth of the cross-examinations.

[para45] One important point of contention alluded to above arises from the testimony of the experts, Stephenson and Halsall, and centres upon their respective ability to ascertain problems with the structural design upon a visual review of the plans. Stephenson stated that he and anyone with a trained eye would be able to foresee potential problems based upon the deflections in the slabs, their thickness and span, and the capacity of the concrete slabs to transfer load to the columns. This is independent of the undisputed fact that the initial plans lacked steel reinforcing bars and patently could not be utilized for the actual construction.

[para46] On the other hand, Halsall was adamant and consistent in his testimony, unshaken on cross-examination, that structural deficiencies were not apparent even to him,

upon a visual review of the drawings; and that they would not have been foreseen by any competent structural engineer reviewing either the exhibit 6 or exhibit 7 drawings.

[para47] Based upon the totality of the evidence, I find the assessment of Halsall more closely reflects the reality of the matter. Notwithstanding the provision of the initial drawings to Stephenson's firm in November 1990, no mention of obvious structural defects in the plans was made in the site meeting, field review or other reports. On the contrary, the minutes of the January 16, 1991 meeting under the heading "structural discrepancies" state that "no real conclusions could be made immediately". It was subsequently concluded that the structure was not in imminent danger of collapse. During site visits, the crack pattern on the top surface of the floor slabs was examined and photographed; tests were conducted on concrete floor slabs samples. It took approximately 250 hours and six months of work, consisting mainly of calculations made by Stephenson and four other engineers, prior to the submission of a "tentative" report. Independent experts were contacted to confirm results. The City was not notified of the problem until about 10 months after the Stephenson firm was retained to review the matter.

[para48] Even with the Stephenson report in hand, it took Halsall's firm about 175 hours to perform a structural design review. The "esoteric nature" and complexity of the calculations, evident from the testimony and documentation provided, speak for themselves.

[para49] In the result, I prefer the evidence of Halsall over that of Stephenson with respect to this aspect of the case; and find that the structural deficiencies in the plans were not capable of detection upon a visual review of either exhibit 6 or exhibit 7.

(d) History Of Project

[para50] The following provides a brief review of the stages and conditions under which the construction progressed, categorized under these headings:

(i) The January 1986 plans (Exhibit 6)
(ii) Inspections and General Review
(iii) The September 1986 plans (Exhibit 7)
(iv) Fast-Track method

(v) City policy
(vi) The Engineer's seal
(vii) Remedial work

(i) The January 1986 Plans (Exhibit 6)

[para51] Hilton began preparation for the design and construction of the addition in 1984. It retained the services of an architect, Burman, for this purpose. Commencing in September 1985, meetings were held and correspondence exchanged between the parties as to the City's requirements. For example, the City required the drawings to be stamped and sealed by an engineer licensed to practice in Ontario whereas Hilton's engineer, Turner, held a Quebec licence only. By letter dated November 1, 1985 an application for a building permit was submitted to the City. However, the City was not inclined to grant the permit without further information. Indeed, a meeting held in January 1986 with City officials was described as disastrous in an inter-office memorandum at Hilton which also warned:

> The City of Mississauga will not provide any type of building, excavation, construction or foundation permits
>
> based on preliminary drawings ... All drawings and calculations must bear the seal of a professional engineer.

Due to budgetary constraints, the building proposal was changed to a concrete building as opposed to a steel structure. In late January, Burman submitted six drawings prepared by Turner, each bearing the professional seal of John Miolla (Miolla), a professional engineer holding a licence to practice in Ontario. On January 21, 1986 Dinzey reviewed the drawings, making notations and listing requirements thereon. On February 4, 1986 the CBO issued building permit #68047 for

the construction of the building "to roof only". Knowing the plans were deficient for construction purposes, Dinzey required Hilton to submit a completion permit application at the same time the initial permit was issued. As noted above, the superstructure permit was issued on condition that Hilton's engineer monitor and take responsibility for the project; and on the understanding that revised drawings would be prepared, kept on site and the construction certified by the engineer as it progressed.

[para52] The total fee for the permit and the plan

examination review was $60,820.00.

(ii) Inspections and General Review

[para53] At least fifty on-site inspections were rendered by building department officials in respect of the project between February and August, 1986. About sixteen inspections took place during the period in which the superstructure shell was constructed. When Guatto, the inspector, first attended the site on February 7, 1986 he requested progress reports on a floor to floor basis. Nevertheless, structural review matters were left to the engineer. Turner submitted his final report on May 27, 1987 confirming that the structure had been built "in accordance with our plans and specifications"; and further, that the approved drawings and revisions conformed to "all applicable codes and requirements for this building type".

[para54] The final drawings were approved by the fire marshal on June 12, 1987. After minor deficiencies were rectified, Burman again provided written confirmation that the project was constructed in general conformity with the drawings, specifications and other applicable documents submitted to the City.

(iii) The September 1986 Plans (Exhibit 7)

[para55] Pursuant to the application for the completion of building permit first made on February 5 , 1986 Hilton submitted, on July 31, 1986 seventeen revised drawings prepared and sealed by Turner. The City's approval was delayed due to an order to comply with respect to the interior partitions. When this was rectified, the City approved Hilton's application for the completion of the addition and issued building permit #73564 on September 11, 1986.

(iv) Fast-Track Method

[para56] It was Dinzey's evidence that the procedure adopted whereby a building permit is issued on condition that revised drawings are prepared and kept on site, was somewhat unusual although not unheard of or improper. This was confirmed by both Stephenson and Halsall who described such a procedure as being not particularly unusual. The underlying rationale for proceeding in such a manner is found in the following description by Halsall:

> The concept is to allow construction to go more quickly than if you are following the old or traditional method of completing documents ... you appoint a contractor by whatever method ... you produce drawings to the contractors as much ahead of time as you can but including time to build without waiting for the drawings to be finally completed. It's a very common process these days.

When asked directly in cross-examination whether it surprised him that a structural engineer would be allowed to design the building on a level by level basis as it was going up, Halsall responded, "we have done that often".

(v) City Policy

[para57] The evidence demonstrated a long-standing policy of the City whereby city officials provided a cursory examination only with respect to Part 4 Code structural aspects of a proposed building; and concentrated their efforts and energy on Part 3 aspects, being the use and occupancy provisions. The plaintiff questioned the propriety and efficacy of this policy decision. The policy itself was not reduced to writing nor was it discussed in detail at meetings or through correspondence between the various departmental

officials.

[para58] According to Dinzey, the policy was in force when he was first hired by the City in 1972. It was "standard policy" passed on by the chief and other officials through the years.

[para59] The cursory review of structural aspects consisted of making sure the floor loads were considered, the drawings coincided with the architectural drawings in dimension, and they were stamped and sealed by a professional engineer. The inspection aspects involved noticing things "out of the ordinary" such as mud covering the reinforcing bars. The rationale underlying this approach was described in detail by Dinzey who explained that engineers would be "quite annoyed if changes were made to their drawings". Further, it would be uneconomical to hire a large staff to review calculations and have them sitting around in quiet years doing nothing. Cowan scoffed at the idea of having "certified professional engineers reviewing the work of other certified professional engineers".

[para60] On the other hand, the Part 3 analysis required the seal of an architect only and the authorities "noticed that architects made a lot of errors". Accordingly, to save embarrassment and loss of revenue for owner/builders, they checked Part 3 matters in a more comprehensive manner. A more detailed review was reserved for Part 9 small buildings, as well, since the services of an architect or engineer are not always available or required and the structural calculations, far less complex.

(vi) The Engineer's Seal

[para61] It is generally agreed that the stamp and seal of an engineer communicates to the building official and to the public that the contents of the document sealed reflect professional knowledge and care; and that applicable statutes, standards, codes and regulations have been followed. See article by Eric W. Smythe, manager of Discipline and Complaints, Association of Professional Engineers of Ontario, filed as Exhibit 23. McLachlin et al. in The Canadian Law of Architecture and Engineering (Butterworths, 2d ed. 1994)

further defines these expectations as follows, at p. 106:

> While the architect or engineer is expected to have general knowledge of relevant legislation, by-laws and regulations, in complex legal matters such as title and zoning legal advisers employed by the owner may lighten the responsibility of the architect or engineer. However, unless the contract between the architect or engineer and the owner expressly relieves the architect or engineer of this responsibility, his legal duty to take reasonable care that the structure complies with all relevant by-laws and regulations continues.

[para62] The following exchange in Stephenson's cross-examination, exemplifies the common meaning attached to the engineer's seal:

> Q. So that the seal of a member of your profession is something that is pretty sacred to you as professionals?
> A. Yes, it is.
> Q. And it isn't something that you use lightly, is it?
> A. That's correct.
>
> Q. And when you put it on something, the buck stops there, doesn't it? I mean you are accepting responsibility for whatever you've applied your seal and signature to?
> A. Yes.

According to the relevant codes and guidelines for engineers, preliminary documents, drawings, specifications and reports should not be signed or sealed but should be marked "preliminary" and/or "not for construction".

(vii) Remedial Work

[para63] As noted previously, in the fall of 1990, Hilton retained Stephenson to investigate and document any structural deficiencies in the building. Upon being advised of

Stephenson's conclusions in September 1991, the City asked Halsall to look into the matter.

[para64] As a result of the investigations, the City issued a building permit for the proposed remedial work; and pursuant to an order to remedy an unsafe building, the hotel addition was shut down from September 27, 1991 to January 13, 1992. There is no issue as to the type or sufficiency of the remedial work undertaken.

FINDINGS OF FACT

[para65] Based on the evidence, I make the following findings of fact:

1. It is undisputed that the architect's original drawings formed an inadequate basis for the superstructure permit issued by the City in February, 1986. The incomplete drawings lacked certain basic elements of construction such as steel reinforcing bars and proper footings. Those plans were admittedly deficient and inadequate for construction purposes.

2. The permit was granted on certain conditions, upon the pleadings of Hilton representatives and their undertaking to have an engineer monitor the situation on site, prepare updated drawings and make immediate application for a completion permit based on the revised drawings. Accordingly, a rather unusual or "different" procedure was agreed to by the City in which the building designs were to be prepared and certified as construction progressed.

3. Updated drawings were prepared by Turner, as indicated by the signed and dated revisions noted in Exhibit 7. The building was constructed structurally, substantially in accordance with the Exhibit 7 plans. Those plans, which contained the seal and signature of the architect and engineer, were approved by the City in September, 1986 after completion of the superstructure.

4. Both sets of plans were substantially similar in the configuration of a system of slabs, columns and beams.

5. The structural deficiencies which subsequently became manifest were not readily apparent upon the face of the drawings.

6. The general review undertaken by the engineer was accompanied by certificates rendered on a floor by floor basis. Although the building inspection department conducted a comprehensive inspection of the construction as it progressed, its review concentrated on Part 3 use and occupancy matters in accordance with departmental policy. The building inspector did not review the updated or other structural plans and drawings. The review process did not involve the more usual procedure of ensuring conformity with the plans which formed the basis for the issuance of the building permit.

7. In the fall of 1990 due to bowing and cracking of partitions, an investigation was conducted into the structural aspects of the building.

8. The hotel was closed by order of the City for remedial work for a period of time between September 1991 and January 1992 as a direct result of the conclusions reached by the investigators retained by Hilton and, independently, by the City.

LEGAL ANALYSIS

[para66] The first legal consideration is whether the City owed a duty of care to the plaintiff to ensure compliance of the structural plans with applicable legislation prior to the issuance of the permit. It is well settled law that public authorities are under a duty of care and can be liable for negligence in failing to use reasonable care in the examination and approval of building plans. The scope of the

duty was formulated by Lord Wilberforce in Anns v. Merton London Borough Council, [1978] A.C. 728 (H.L.) and adopted in Kamloops (City) v. Nielsen (1984), 10 D.L.R. (4th) 641 (S.C.C.). A public authority operating under statutory powers, owes a duty of care to all who it is reasonable to conclude might be injured by the negligent exercise of those powers. The question must be approached in two stages:

(1) is there a sufficiently close relationship between the parties (the local authority and the person who has suffered the damage) so that, in the reasonable contemplation of the authority, carelessness on its part may likely cause damage to that person? If so,

(2) are there any considerations which ought to negative, reduce or limit (a) the scope of the duty,

(b) the class of persons to whom it is owed or (c) the damages to which a breach of it may give rise?

[para67] The test of proximity is easily met in these circumstances. No construction can take place without the proper permits; and the approval procedure is accompanied by a rather elaborate fee and permit allocation scheme as well as a follow-up general review and inspection process. Certainly, a sufficiently close relationship existed between the parties so that in the reasonable contemplation of City officials, carelessness on their part might cause damage to the plaintiff. The functions carried out by the City are operational in nature and hence, capable of grounding a legal duty of care.

[para68] The second branch of the test demands an inquiry as to whether the circumstances lead to the reasonable conclusion that Hilton, by its actions, excluded itself from the scope of the municipality's duty of care. As noted in the Anns case, a public authority owes no duty of care to a negligent building owner who is the source of his own loss. Not only was Hilton a party to the atypical arrangement instituted at its instance, but the evidence clearly disclosed Hilton's complicity and knowledge of the rather unusual fast-track arrangement. Indeed, on February 12, 1986 Burman advised Hilton in writing that the plans would be re-submitted for the completion of building permit once the revisions were completed. Webster understood the arrangement to mean that work would continue on the design of working drawings during the period of construction. It is evident, therefore, that Hilton was well aware of the fact that wholly deficient plans for construction purposes underscored the issuance of the initial building permit. Does this remove Hilton from the scope of the City's duty of care?

[para69] It is undisputed that Burman had authority to bind the owners, his principals, to the agreement. See McLachlin et al., The Canadian Law of Architecture and Engineering, supra at pp. 91-92. That being said, the jurisprudence in this area is fact-driven and, in my view, inconclusive for our purposes. Hilton relies upon the holding of the Supreme Court of Canada in Rothfield v. Manolakos (1989), 63 D.L.R. (4th) 449. In that case, a permit was issued for the construction of a retaining wall in circumstances where, despite the by-law requirement for an inspection prior to the pouring of concrete, no such inspection had taken place. Under the by-law, it was the responsibility of the owner to request an inspection. The issue was, therefore, whether the failure to do so precluded the owner/builder from recovery against the city. The majority held that, notwithstanding the lack of notice, the owners could not be viewed as the source of their own loss and hence, liability was apportioned between the owners and the city.

[para70] A contrary conclusion was reached in the more recent cases of Ingles v. Tutkaluk Construction Ltd. and the City of Toronto (1998) 158 D.L.R. (4th) 147 and in Hospitality Investments Ltd. v. Lord (Everett) Building Construction Ltd., [1996] 3 S.C.R. 605 (S.C.C.).

[para71] The judge at first instance in Ingles made a finding of contributory negligence against the city which was reversed on appeal. The owner had allowed the contractor to proceed without a permit in order to save time, knowing that a building permit was required and that once the work was commenced, it would be difficult, if not impossible, to carry

out an inspection. In Hospitality Investments, the owner ignored advice to obtain professional assistance and misled the municipality regarding the retention of an architect's services. In both cases, the appeal courts held that the owner, by its conduct, had excluded himself from the municipality's duty of care.

[para72] Other cases have propelled a similar result. In Acrecrest Ltd. v. W.S. Hattrell & Partners, [1983] 1 All. E.R. 17 (C.A.), the owner flouted the applicable regulations and directives of the building inspector; and in McCrea v. White Rock, [1975] 2 W.W.R. 593, the owner unreasonably relied upon the city to take the initiative in inspecting the progress of construction. In those cases too, the courts refused compensation to plaintiffs due to a course of conduct which was incompatible with compensatory relief.

[para73] In the case at bar, there was no deception, misrepresentation or improper conduct on the part of Hilton and no statutory obligation placed upon it to do anything which it failed to do, such as occurred in Rothfield. In the latter decision, however, the city had failed to notify the owners of its intention to check on the design deficiencies as construction progressed. As reasoned by Wilson J. (dissenting in part on other grounds) at p. 451:

> Thus, it seems to me perfectly reasonable for the owners, knowing the permit to proceed had been issued on the basis of the design submitted by the contractors, to assume that the design had the city's approval and that they could rely on the contractors to give whatever notices were required to be given on their, the owners', behalf.

In the instant case, the owners were well aware of deficiencies in the plans. There was no issue of proper notification. The permit was granted upon the pleadings of the owner's representative, to its knowledge. Undoubtedly, Hilton was then, in large measure, the author of its own misfortune. Yet, the candle burns both ways. The City has (and had at the time) broad power to issue permits in stages, authorize construction as it progressed, revoke a permit, order the correction of improper work or indeed, the cessation of work. The fact that city officials felt sorry for Burman or were trying to accommodate and assist Hilton in saving time and money does not, in my view, absolve the City of its duty to take reasonable care to ensure the project was built in accordance with the applicable standards. In the circumstances of this case, I am unable to find that the owner's actions took them out of the scope of that duty or that they were the sole authors of their own loss. They were still entitled to rely upon the due exercise of care owed by the public authority in the construction of buildings.

[para74] Now that I have found a prima facie duty of care, I must determine whether its imposition is excluded either by statute or by reason of the fact that the decision taken was one of policy.

[para75] The proper approach to these issues was set out by Cory J. in Just v. British Columbia (1989), 64 D.L.R. (4th) 689 (S.C.C.), a case dealing with the maintenance of highways, at p. 702:

> Even with the duty of care established, it is necessary to explore two aspects in order to determine whether liability may be imposed upon the respondent. First, the applicable legislation must be reviewed to see if it imposes any obligation upon the respondent to maintain its highways or alternatively if it provides an exemption from liability for failure to so maintain them.
>
> Secondly, it must be determined whether the province is exempted from liability on the grounds that the system of inspections, including their quantity and quality, constituted a "policy" decision of a government agency and was thus exempt from liability.

With regard to the first aspect, the relevant statutory provisions do not exempt the City from its duty to act reasonably in the granting of permits or inspecting construction of buildings. Even considering the provisions which impose the requirement of an architect and engineer's seal on drawings, the City's obligations and responsibilities

under the relevant legislation, remain intact. The fee structure which in this case required a payment of over $60,000 to the City, underscores this.

[para76] It is the second branch of the test, the exemption from liability due to a policy decision of a governmental agency, which provides cause for reflection in the circumstances of this case. The jurisprudence consistently holds that a true policy decision undertaken by a public authority constitutes a valid basis for exclusion. The rationale for this is found in Fridman, The Law of Torts in Canada (1989), Vol. 1 pp. 241-245 where a review of the case law precipitated this conclusion at pp. 244-5:

> What emerges from such decisions is that the courts have accepted that it is not their function to sit in judgment upon the way in which public bodies carry out their statutory duties or fail to fulfil them unless there is (i) bad faith, i.e., malice, the deliberate intention to cause harm; or (ii) negligence in the way in which a duty has been exercised. ... If what is involved is the way in which the body in question has arrived at a policy or planning decision, the courts will not intervene on behalf of anyone who has incurred loss as a consequence. The only resort of such a party is the ballot box. The tort of negligence is not concerned with the making of policy in governmental or quasi-governmental contexts, only with the way in which, and methods by which such policy is enforced or carried out by the particular body in question.
>
> There is a valid reason for this. It would be invidious for courts to have to decide whether a particular policy settled upon by such a body was legitimate or reasonable.
>
> Nor are the courts suited to make such decisions, which do not turn on issues of fact relating to foresight of harm and causation but involve the balancing of various social and other interests. The function of courts is to adjudicate disputes about liability for conduct which has been declared unreasonable or improper, not to decide as between disputing contenders for various aims to be achieved by governmental or similar bodies or organizations which view should prevail. In a democratic society, it is for the public to make such decisions by the exercise of votes at appropriate elections, not for a band of appointed judges to make these decisions for the public. Only if the body in question exceeds its legitimate powers under statute or at common law, or is negligent in the way those powers are exercised, can and should the courts be invoked to provide redress for an injured party. (Emphasis added)

[para77] It was the testimony of the witnesses called on the City's behalf and particularly, Dinzey, Navabi, Guatto and Cowan that there has been a long-standing policy within the City's building department to issue building permits and conduct inspections with regard to structural design matters, in a cursory manner only. More specifically, in respect of Part 4 buildings, the City routinely and consistently conducts a generalized review of structural design matters along with a more detailed review of Part 3 use and occupancy aspects of construction. Does this constitute a true policy decision?

[para78] The cases define and summarize the criteria underlying the answer to that question as follows:

> True policy decisions involve social, political and economic factors. In such decisions, the authority attempts to strike a balance between efficiency and thrift, in the context of planning and predetermining the boundaries of its undertakings and of their actual performance. True policy decisions will usually be dictated by financial, economic, social and political factors or constraints.

See for example, Laurentide Motels Ltd. v. Beauport (City), [1989] 1 S.C.R. 705; Barratt v. North Vancouver (District), [1980] 2 S.C.R. 418; Brown v. British Columbia, (1994), 112 D.L.R. (4th) 1 (S.C.C.) and Just v. British Columbia, supra.

[para79] A review of the evidence in this case demonstrates that the decision to conduct a cursory review of structural plans was in place prior to 1972 and passed along

by example and word of mouth within the building department, since that time. Moreover, it was based upon a consideration of social, political and/or economic factors. This was evident from the testimony of experienced public officials called to give evidence on behalf of the City. City officials relied upon the stamp and seal of a certified professional engineer with respect to the structural design aspects of proposed building plans. To do otherwise would be extremely costly and time consuming and, as noted by Cowan, "would pretty well bring the department to a stand still." Navabi, in his evidence, explained the rationale underlying the cursory structural review and the concentration of departmental time and resources upon matters more directly related to public safety. Given that the building department processes approximately 8000-9000 permit applications per year, this does not appear to be unreasonable.

[para80] The plaintiff questions the enforceability of the policy on the basis of vagueness and alleged inconsistency with the applicable legislation. At first glance, such a policy may appear to be unclear or contradictory in its purpose or application. That is because it is unwritten and passed on in an informal manner. Indeed, Guatto was unsure of exactly what other building inspectors did with respect to it.

[para81] Taken as a whole, however, the evidence given with respect to the policy itself and its implementation was remarkably clear and inherently consistent. The rationale for the policy was described in crucial detail in different words and by using different examples by different witnesses who played different roles at different times in the process. Yet, they all told the same story. There was nothing unclear or undefinable about it. The policy emanated as a practical matter for cogent and compelling reasons involving a balancing of various interests. Factors related to personnel and finance, including the effect of delays, budgetary and staffing issues were duly considered. Once formulated, the policy was applied uniformly and it has not changed over time.

[para82] In any event, since the decision to conduct only a cursory review of structural design matters was one of true policy, it cannot be reviewed on a common law standard of reasonableness. Clearly, it was bona fide and not so irrational as to constitute an improper exercise of governmental discretion. It is, therefore, immune from the application of private law standards of tort liability.

[para83] Further, I can find no negligence in the carrying out of the policy. The detailed on site inspections by Guatto were carried out in a conscientious and comprehensive manner, in accordance with the City's mandate. City officials placed reasonable reliance on the engineer's seal and the performance certificates issued during construction. The numerous revisions marked on Exhibit 7 appeared, on their face, to comply with applicable code and legislative provisions. The specific provision in the By-law that

> ... except as otherwise permitted by the Chief Building Official, every application shall identify and describe in detail the work and occupancy to be covered by the permit. (Emphasis added)

inferentially gives the CBO permission to proceed as he did.

[para84] Undoubtedly, it would have been preferable for the City to have approved the drawings on a staged or incremental basis. In the circumstances, however, the premature approval of the initial plans did not in any way cause or contribute to the plaintiff's damages. The only practical consequence of the City proceeding as it did enured to the benefit of the plaintiff.

[para85] As the plaintiff relied heavily upon the findings in Rothfield, I will briefly refer to it. In discussing the import of the city's policy in that case, Mr. Justice La Forest articulated the applicable standard of care, as follows at p. 455:

> It must be borne in mind that a municipality, once it has made the policy decision to inspect construction, is not bound to discover every latent defect in a given project, nor every derogation from applicable standards. That would be to hold the municipality to an impossible

standard.

Rather a municipality is only called upon to show reasonable care in the exercise of its powers of inspection. Accordingly, a municipality, whether the duty of care is owed to an owner builder or a third party, will only incur liability for such defects as it could reasonably be expected to have detected and to have ordered remedied. This is implicit in the decision of this court in Kamloops (City) v. Nielsen.

The owner/builders and third parties were, nevertheless, held in that case to be entitled to place reasonable reliance on the municipality to ensure that construction did not pose a threat to their health and safety; and the court apportioned liability accordingly. My holding otherwise in these factual circumstances is not at all inconsistent with that finding. In this case, the departmental policy, the presence of the engineer's seal, the negotiated fast-track arrangement and the latent nature of the deficiencies constitute major distinguishing factors.

[para86] The court in Rothfield specifically found at p. 451 that had the owner sent the required notices to the city, the city would have made the necessary inspections, "seen the defects in construction," and ensured they were rectified. Moreover, when the inspector did attend at the site, he was confronted with a situation in which "it must have been at once clear to him that the retaining wall was potentially substandard." The court, therefore, found that due exercise by the inspector of the powers at his disposal could have avoided the danger. In the case at bar, the evidence demonstrated the opposite - essentially, that structural failures are rare and no prudent or reasonably competent person could have detected the structural defects hidden within the design of the superstructure. Hence, the problems which ultimately occurred were not reasonably foreseeable. The plaintiff's argument that the construction may have proceeded differently had the initial permit been refused (or limited) is based on pure speculation.

[para87] I am also cognizant of the overall argument posed by the plaintiff that the legislative wording mandates ensurance by city officials of "conformity with the permitted drawings". First, a reading of the relevant provisions leaves this open to other interpretations of the City's role; secondly, my view of the legislation is that Parliament intended to provide a mechanism to ensure compliance with the standards set out in the applicable legislation. No set rules mandate the manner for doing so, however, and it was left to the discretionary power of public authorities to establish guidelines and policies in this area. Thus, the fast-track procedure, or something similar, was clearly contemplated by the legislation itself. By reason of the City's policy, in situations where the services of both an architect and engineer are mandated by the Act, the review process may be somewhat limited but it is by no means, abrogated.

SUMMARY

[para88] Pursuant to section 6(4) of the Act, no person shall construct a building except in accordance with plans on the basis of which a permit was issued or any changes authorized by the chief official. Notwithstanding the preparation and sealing of the drawings by a professional engineer, the City owed a duty to the owner and to the public to use reasonable care in the examination and approval of the building plans and in the inspection process.

[para89] A relatively unusual procedure was adopted in this case which differed from the norm but was by no means, unique. A building permit was granted by the City despite obvious deficiencies in the drawings on the condition that updated drawings be prepared, kept on side and a final completion of building permit be subject to further approval by the City. I found that Hilton's knowledge and complicity in this arrangement did not remove them from the scope of the City's duty of care.

[para90] What is the scope of the duty in circumstances where architectural drawings bear the approval stamp and seal of a professional engineer? Does the cursory review devised by the City in respect of structural design matters satisfy the duty of care imposed upon City officials by the applicable

legislation? Even if it does not, does the nature and extent of the review constitute a true policy decision so as to exempt the City from tortious claims?

[para91] Section 2.5.1 of the Code mandates that the design and general review of buildings be undertaken by an architect and professional engineer. It is not unreasonable for the City to adopt a policy in reliance upon their expertise. The policy adopted, the cursory review, reflected a true policy decision based upon a consideration of economic factors, being the allocation of resources - both human and financial. The policy was implemented in a consistent and reasonable manner. If cannot, therefore, provide the basis for a negligence claim against the municipality.

[para92] In any event, the damages sustained by the plaintiff were in no way caused or contributed to by any want of care or negligence on the part of the City.

CONCLUSION

[para93] To answer the question posed at the outset - in circumstances where the applicable legislation mandates sealed approval of drawings by an architect and a professional engineer, city officials are entitled to rely upon their expertise in respect of structural design matters. The obligation of public authorities at the permit approval and inspection stages of construction does not extend beyond the cursory review adopted and implemented by the City in this case.

[para94] Accordingly, the action of the plaintiff against the City is dismissed. If unable to agree, the parties may make arrangements to see me on the issue of costs.

[para95] The third party claim by the City against Hilton International and the cross-claim between John Miolla and Hilton International are dismissed on consent without costs.

[para96] Once again may I reiterate my appreciation to all counsel in this matter.

CHAPNIK J.

Hirmann v. Nixon, Chief Building Official, City of Toronto et al.

13 O.R. (3d) 54
[1993] O.J. No. 841
Action No. RE 2518/93

Ontario Court (General Division),
Wilson J.
April 19, 1993

APPLICATION for declarations about the applicability of a zoning by-law and for a mandatory order that a building permit to install a fire alarm system be issued.

Timothy M. Kinnaird, for applicant.

Beverley A.B. Simpson, for respondents.

WILSON J.:--The applicant is a tenant of certain leased premises at 31 Commissioner Street in Toronto (the "premises"). He seeks, in this application, the following:

(a) A declaration that the presently applicable zoning to the premises is By-law 438-86.

(b) A declaration that zoning By-law 528-88 is of no force and effect until the appeals of the said by-law are finally disposed of by the Ontario Municipal Board; and

(c) A mandatory order that the City of Toronto issue a building permit to install a fire alarm system at the premises.

Facts

The lands in question are a warehouse. The applicant seeks to use the premises for public dances. An injunction was obtained by the city on March 12, 1993. Wright J. made an order preventing the event advertised as "March Madness" or any other assembly being held until such time as the applicant was in compliance with all fire safety regulations. The issue of the zoning was not raised in argument before Wright J.

The applicant is attempting to remedy the deficiencies. On March 16, 1993, he applied to the city for a building permit to install a fire alarm system at the premises. The application was rejected by the city as the proposed use of the premises is not permitted within the current 13 D2 zoning district designation.

The City of Toronto Council passed By-laws 527-88 and 528-88 on June 17, 1988. The effect of these zoning changes was an amendment to the Official Plan, Part I, and the zoning for the premises has been altered from C4 V2 to 13 D2.

It is acknowledged that a C4 V2 zoning permits the applicant's intended use of the premises. A 13 D2 zoning, which is primarily industrial and residential, would not permit such use.

By-laws 527-88 and 528-88 were passed by city council, but have not yet been approved by the Ontario Municipal Board and are the subject of 13 appeals by various land owners. The appeals have not yet been heard and I was advised by counsel for the city that there is some hold-up within the provincial Ministry. As well, the premises are part of the central waterfront lands which are being studied by the federal Crombie Commission appointed in 1988.

Are the by-laws passed by city council in effect? Regard must be had to s. 34(30) of the Planning Act, R.S.O. 1990, c. P.13, which provides as follows:

> 34(30) Where one or more appeals have been filed under subsection (19), the by-law does not come into force until all of such appeals have been finally disposed of whereupon the by-law, except for such parts thereof as are repealed or amended in accordance with the direction of the Municipal Board or by the Lieutenant Governor in Council as mentioned in subsections (26) and (29), shall be deemed to have come into force on the day it was passed.

Section 34(30) is clear that a new by-law does not come into

force until the appeals have been finally disposed of. It is further clear that, once a by-law is passed, its effect is retroactive. It is acknowledged by the applicant that, if the by-law is passed at a future date, the applicant's intended use will be prohibited.

There is discretion in this court to adjourn such a matter in appropriate circumstances, having regard to the balance of interest between the landowner, the tenant and the city. I questioned counsel for the city as to when the Ontario Municipal Board was likely to hear the appeals in question. At first, quite candidly, she acknowledged she had no idea. At my request, inquiries were made and she was advised that it would be "a matter of months and not years". No firm date was given.

Counsel for the city relies on the decision of Whealy D.C.J. in Quay West v. Toronto (City) (Ont. Dist. Ct.). Whealy D.C.J. states at p. 9 of that unreported decision:

> It would be, in my view, unjust that a developer should be able to insist on a strictly legal application of its rights, when it is the author of the legal vacuum in which the application is made and that is in defiance of a municipal council's attempt to apply proper zoning and planning procedures with regard to important public lands. If this application was to be granted on such strictly legal grounds, then the rewards of the law could be said to be the prize for the fastest runner. In my view, the 1983 amendments to the Planning Act were to prevent such a result and to provide an orderly timed planning process with due regard to the rights of land owners.

I am mindful of the principles enunciated by Whealy D.C.J. with the Crombie Waterfront Commission. The by-law in question in Quay West was passed in 1988 and was subject to an Ontario Municipal Board appeal in 1988. The Ontario Municipal Board had been heard by the Divisional Court by the time the matter came before Whealy J. in early 1990. Delay by the Ontario Municipal Board could not be an issue.

It is the policy of the Buildings and Inspections Department of the City of Toronto to apply the most restrictive provision of the by-laws when dealing with a situation when by-laws have been passed by city council, but have not yet been approved by the Ontario Municipal Board. This internal policy may be reasonable if the passage of the new by-law is imminent and if the Ontario Municipal Board proceeds with reasonable dispatch. It is fair to both the landowner/tenant, as well as the city, as the effect of s. 34(30) is to make laws retroactive.

Based on the facts of this case, however, I find that the policy of the Buildings and Inspections Department is not reasonable. Almost five years have passed since city council passed the new by-laws. There is no timetable in place as to when the Ontario Municipal Board appeals will be heard. In the circumstances, therefore, I decline to exercise my jurisdiction to adjourn this matter to a date after the Ontario Municipal Board will hear the appeals. Had a specific date been given in the reasonably near future, I would have adjourned this matter to be heard after the appeals proceeded.

It is not, in my view, fair to numerous landowners across the city affected by the new zoning to keep them in a perpetual state of limbo. I hasten to add that s. 34(30) is retroactive. From a financial perspective, it is not practical for landowners and tenants to invest significantly in the land subject to the zoning changes, until the status of the zoning is clarified. It would seem, therefore, that it is in the public's, landowners' and city's interest that the Ontario Municipal Board proceed with these appeals as it represented to this court in a matter of months, rather than years.

I, therefore, declare that the currently applicable zoning by-law to the premises is 438-86, providing the premises with a C4 V2 zoning district designation. The zoning By-law 528-88 and the zoning district designation 13 D2 does not come into force until the outstanding appeals to the Ontario Municipal Board are finalized.

The applicant seeks a mandatory order that a building permit for a fire alarm system be issued. It is not appropriate that such an order be made by this court. The applicant must comply with the city's requirements relating both to the Fire Code, R.R.O. 1990, Reg. 454 (Fire Marshal's Act, R.S.O. 1990, c.

F.17), and other applicable building requirements in the interest of public safety. I simply make it clear that the building permit cannot be denied now based on the zoning presently in effect. The building permit must be considered in

light of the zoning in effect at the time that the application is made.

Costs of this application fixed in the amount of $1,000 payable forthwith by the city to the applicant.

Order accordingly.

HODGINS v. TORONTO et al.

Ontario County Court [Judicial District of York I,

Matlow Co. Ct. J.

Judgment - February 3, 1983.

APPEAL from decision of the chief building inspector.

J.S. Stewart, Q.C., for appellant.
D. Liebson, for respondents.

(No. 08556)

February 3, 1983. MATLOW CO. CT. J.: - This application came before me by way of "a hearing and appeal" pursuant to s. 15(1) of the Building Code Act R.S.O. 1980, c. 51. That provision reads as follows:

"15.-(1) Any person who considers himself aggrieved by an order given or decision made by an inspector or chief official under this Act or the regulations may, within twenty days after the order or decision is made, apply to the judge of the county or district court for a hearing and appeal."

The decision under review on this application is that of the respondent, Michael L. Nixon, who is the chief building official of the respondent, the corporation of the City of Toronto, which was made on September 22, 1982. By that decision, Mr. Nixon decided to revoke two building permits that had been issued to the applicant on April 8, 1980, and August 17, 1981. By s. 1(1)(d) of the Building Code Act, Mr. Nixon holds the office of "chief official" for all purposes related to that statute.

The only material before me was the affidavit of the applicant and it set out the following history of the events leading to the decision in question.

By notice dated October 7, 1981, sent to the applicant by Mr. Nixon, the applicant was given notice that a hearing would be held on November 16, 1981, at which time Mr. Nixon would consider whether or not the building permits ought to be revoked. The notice advised the applicant that Mr. Nixon had been informed and did believe that the permits in question had been issued on information "which appears to be mistaken or false".

Following the hearing referred to in the notice, it was decided that the permits had not been issued on false or mistaken information and that they not be revoked.

By a further notice dated September 3, 1982, sent to the applicant by Mr. Nixon, the applicant was given notice that a furhter hearing would take place on September 22, 1982, for the same purpose as the first hearing. That notice too also advised the applicant that Mr. Nixon had been informed and did believe that the permits had

> been issued on information which appeared to be mistaken or false. As well, this notice again made reference to s. 6(4) of the Building Code Act as the statutory authority for the power of decision that Mr. Nixon proposed to exercise.

By letter dated September 10, 1982, sent to the applicant by Mr. Nixon, Mr. Nixon advised the applicant that the hearing scheduled for September 22, 1982 "is not to consider revocation of the Permits pursuant to the Building Code Act but pursuant to the inherent jurisdiction the Commissioner of Buildings and Inspections has to revoke a permit if it was issued contrary to law".

The second hearing proceeded on September 22, 1982, following which Mr. Nixon made the decision to revoke the subject permits. This is the decision under review.

The material indicates that the subject permits had authorized the applicant to "make interior alterations and build deck at rear of dwelling house comprised of two dwelling units" at 300 Riverside Drive, Toronto. It appears that one of the issues canvassed at both of the hearings was whether or not the subject property comprised a legal nonconforming use or whether its use as a dwelling house comprised of two dwelling units was in violation of the applicable zoning by-law.

In my view, the only authority which Mr. Nixon had which entitled him to revoke the subject permits was that conferred by Sec. 6(4) of the Building Code Act. That provision reads as follows:

"6.-(4) Subject to section 15, the chief official may revoke a permit,

(a) where it was issued on mistaken or false information;

(b) where, after six months after its issuance, the construction or demolition in respect of which it was issued has not, in the opinion of the chief official, been seriously commenced; or

(c) where the construction or demolition of the building is, in the opinion of the chief official, substantially suspended or discontinued for a period of more than one year."

As well, that provision sets out the only reasons why "the chief official may revoke a permit".

By purporting to exercise "the inherent jurisdiction the Commissioner of Buildings and Inspections has to revoke a permit if it was issued contrary to law", Mr. Nixon purported to exercise a jurisdiction which he did not have and on a basis not authorized by the statute. Accordingly, his decision cannot stand and must be rescinded.

Notwithstanding Mr. Nixon's professed exercise of some inherent jurisdiction, I still regard his decision under review to be one made by him, albeit in error, pursuant to the Building Code Act. As I have indicated, any decision by a chief official purporting to revoke a building permit must be a decision "under this Act" as those words are used in s. 15(1) of the Building Code Act. Accordingly, I consider that I have jurisdiction to entertain this application which is made pursuant to that provision.

I expressly refrain from deciding whether or not the chief official may hold successive hearings to determine whether or not the same building permit may be revoked pursuant to s. 6(4) of the statute. The evidence before me is not sufficient to enable me to determine whether or not the two hearings were based on the same or different facts. For that reason I leave this issue to be determined if necessary at a later time if Mr. Nixon should determine to proceed with a further hearing pursuant to s. 6(4) of the statute.

The applicant is entitled to recover his costs from the respondents after taxation.

Appeal allowed.

Ingles v. Tutkaluk Construction Ltd.

Between
James Ingles, Plaintiff, and
Tutkaluk Construction Limited and the Corporation of the City of Toronto, Defendants

[1994] O.J. No. 1714
DRS 94-14604
Action No. 61453/90Q

Ontario Court of Justice - General Division
Toronto, Ontario
Conant J.
Heard: May 9, 10, 11, 12, 1994.
Judgment: August 11, 1994.

Barbara J. Murchie, for the Plaintiff.
Diana Dimmer, for the Defendant, the Corporation of the City of Toronto.

[para1] CONANT J.:-- This is a claim by a home-owner against a construction company and against the City of Toronto. The claim against the construction company is that it breached its contract for renovations by failing to construct underpinnings in accordance with the agreement made with the Plaintiff and was negligent in its work. The claim against the City of Toronto is that an improper and negligent inspection of the renovations did not discover the deficiency. Although the Defendant construction company submitted a Statement of Defence, the only Defendant represented at the trial of the action was the City of Toronto and all of the legal argument at the trial concerned the question of the City's negligence.

THE FACTS

[para2] The Plaintiff, Dr. James Ingles, and his spouse, Dr. Valerie Watt, own an 80 year old, 3-story home at 123 MacPherson Avenue, in an area in Toronto known as "the Annex". The Plaintiff wished to lower the basement 18 inches and build a patio and deck at the back of the house. Lowering the basement would necessitate putting in underpinnings under the existing foundation of the house in order to keep the walls from cracking and the house from falling down. The Plaintiff and his spouse, both of whom are professionals with Ph. D.'s in science, engaged in research on what would have to be done; and the Plaintiff's spouse drew up plans for the renovation. The Plaintiff then engaged a construction company, the Defendant, Tutkaluk Construction Ltd., to do all the work. He testified that he had chosen Tutkaluk because others had recommended its work and because, on the basis of an advertising flyer distributed by Tutkaluk, he believed that Tutkaluk's work was "backed by $1,000,000 liability insurance covering all work". The Plaintiff stated he checked references and after discussion with the contractor signed a contract on June 9th, 1990 for the lowering of the basement floor, renovations and installing 20 to 24 inches wide underpinning under the footings. The contract was for a total of $46,000.00 plus extras.

[para3] According to the contract, the contractor was to apply for and obtain a building permit. Tutkaluk had told the Plaintiff that the work would be delayed if he had to obtain a building permit before he began, and the Plaintiff and his spouse agreed that the work should begin as soon as possible. The work began on June 14, 1990. The building permit was applied for on June 27 and issued on June 28.

[para4] The excavation plan submitted with the building permit has been stamped with a statement that "where required, underpinning is to be carried out to the satisfaction of the building inspector". In addition, inter alia, there are two notations handwritten on the permit:

> Notify building inspector before proceeding with underpinning [and] pouring concrete.
>
> Minimum width of underpinning -- same size as existing footing.

[para5] Underpinning is installed in the following way:

The earth under the old footings is excavated in three foot sections inside the basement. This step by step process is necessary to prevent the collapse of the house which would take place if too much of the foundation were weakened at one time by excavating under it. As each section is excavated, concrete forms are built flush with the inner edge of the existing footing, and concrete is poured to within 2 to 3 inches of the bottom of the old footing. When the concrete has had time to settle, non-shrink grout is rammed between the new concrete and the existing footing. This is done all around the perimeter of the basement. The underpinning should fully cover the area under the old footing, that is, it should be co-equal to the old footing in both width and depth. After all the existing footings have been underpinned, the basement floor can be laid.

[para6] On the morning after the building permit had been issued, June 29, 1990, Mr. Tecson, a building inspector temporarily assigned to the area, noticed that construction was under way at 123 MacPherson, although no building permit was posted. Upon his request, Tecson was shown the permit along with plans of the renovations. Despite the note on the permit to notify the building inspector before proceeding with the underpinning, the underpinning had already been installed. Therefore, it was impossible for the inspector to visually determine whether or not the underpinning continued for the full width of the footing as required by the building permit. The basement was dug up for the laying of drains; and, consequently, only a few inches of the depth of the underpinning were visible because of the piles of dirt from the excavation.

[para7] Tecson spent between twenty and thirty minutes carrying out an inspection of the visible portion of the underpinning. Specifically, he looked at the underpinning and noted that the colour of the concrete was different stages of grey, indicating that it had not all been poured the same day. From this, he concluded that the concrete had been poured in stages. He then borrowed a hammer from one of the workers and struck the concrete in various places to see if it had set. The ringing sound produced indicated that the concrete was at least two weeks old and had attained something close to its maximum desired strength. Had it not hardened, he would have been able to stick something into the still soft concrete to ascertain its depth. He also noted a different coloured hardened concrete about 2 inches in width above the underpinning which he took to be the grout that had been inserted at different times. With respect to the width of the underpinning, Tecson relied on an assurance from Tutkaluk that everything had been done in accordance with the drawings attached to the building plan. On the building card, he noted that "underpinning done prior my inspection".

[para8] On July 10th, upon his return to work, Mr. Grimaldi, the regular building inspector for the area, also visited the site. By this time, the basement floor had been laid and visual inspection of the underpinning as a whole was even less possible than it had been at the time of Tecson's inspection. Grimaldi carried out the same inspection as had Tecson, as well as looking to see that the concrete was smooth and without voids, an indication that it had been packed down adequately. On the job card he wrote that "underpinning appears to be complete".

[para9] Tutkaluk finished his work on August 16th, 1990, and received full payment for the renovations.

[para10] In early September there was a water-leak problem in two corners of the basement. The Plaintiff called in Drain Masters to fix the leaks since he was getting no response from Tutkaluk. In digging out around the outside of the basement wall in the two places, Drain Masters found that only about six inches of underpinning were dug out and installed under the footings, instead of the full 24 inch width. In addition, the underpinning under the party wall to the west had not been installed to the depth stated in the plans and the north wall underpinning under the patio was much less than the four feet contracted for.

[para11] The Plaintiff engaged a professional engineer, Mr. Brown, to review and comment on the recently completed underpinning work. In a letter dated September 13, 1990, Brown stated that both the drawing submitted with the building permit application and good construction practice

require that the underpinning be extended under the full width of the footing. He urged that the work be done as soon as possible, because the present condition might be dangerous.

[para12] The Plaintiff testified that he made no effort to get Tutkaluk to carry out this work because of Tutkaluk's previous lack of response with respect to the water-leak problem. Instead, he engaged Drain Masters to carry out these recommendations. Drain Masters excavated the earth from the outside and filled in the other 14 to 16 inches of underpinning, reconstructed the back wall, and deepened the underpinning of the party wall. At the same time, it carried out certain waterproofing work. The Plaintiff also contracted with Precision Renovations to perform additional renovation services made necessary by the tearing up of the basement to re-do the underpinning.

[para13] The Plaintiff claimed that the total cost incurred for the repairs was $56,925.00 without showing clearly how he had arrived at this figure. The bill from Drain Masters is for $47,000.00. The bill from Precision Renovations is for $9,330.00. Robert E. Brown and Associates Ltd. charged $11,900.00 for its reports. This comes to a total of $57,520.00.

[para14] At trial, there were three points at issue between the Plaintiff and the City:

> (1) Did the building inspectors, and in particular, Mr. Tecson, meet the appropriate standard of care
>
> when they discovered that they could not carry out a visual inspection of the underpinning?
>
> (2) Did the inspector have the statutory power to order measures that would determine whether or not the underpinning had been laid according to the plan?
>
> (3) If the City was negligent, was the Plaintiff contributorily negligent in not seeing to it that the building permit was obtained before the underpinning was installed?

THE POSITIONS OF THE PARTIES

[para15] The Plaintiff argued that he should be able to rely on the City's inspectors for approval of the basic structural requirements of the house. He pointed to an article in the Toronto Star on renovations that he and his spouse had clipped when doing research on lowering their basement. The article contained the following statements:

> Get building permits for both drain and
>
> building work. Your municipal inspectors work for you and their on-site inspection is protection for you.

More particularly, the Plaintiff contended that the fact that the underpinning was installed prior to the issuing of the building permit should have put the inspector on notice that the contractor did not play by the rules. In such circumstances, the inspector had a duty to carry out a thorough inspection of the underpinning and not to rely on the assurances of a contractor who was not known to him.

[para16] The Plaintiff argued that the inspector should have borrowed a shovel from the workers on the site and dug down to inspect the depth of the underpinning. This would have been a quick and simple way to establish whether the underpinning extended down as far as it should. Alternately, the Plaintiff submits that the inspector should have exercised the power given him by s. 11(1)(d) of the Building Code Act, R.S.O. 1990, c.B.13, (the "Act") (repealed and replaced by the Building Code Act, 1992, S.O. 1992, c.23) to require that the Plaintiff have an inspection done at his own expense. The Plaintiff denied any negligence in the matter.

[para17] The Defendant City responded with five arguments. First, it asserted that any deficiency in inspection was the fault of the Plaintiff for not applying

for the building permit in time, so notice could have been given and an inspection carried out while the underpinning was visible. Second, it argued that the inspection was reasonable given the circumstances: Tecson had no reason to doubt that the work had been done properly and therefore was under no obligation to do anything else. Third, it submitted that, given the conditions of the ground as a result of a heavy rain that day, it would not have been possible for Tecson to dig down and uncover the full depth of the underpinning. Fourth, it claimed that the Plaintiff was attributing to the inspector a duty which he did not have, the duty to certify that the work was done properly. Finally, it submitted that the inspector had no statutory power to uncover the work.

THE LAW

[para18] In two cases, Kamloops (City) v. Nielsen, [1984] 2 S.C.R. 2 and Rothfield v. Manolakos, [1989] 2 S.C.R. 1259, 46 M.P.L.R. 217 (S.C.C.) (sub nom. Vernon (City) v.Manolakos), the Supreme Court of Canada has found cities liable for negligent building inspection. In these cases, the Court found that the city had the statutory power, although not the obligation, to regulate construction by by-law. Once the city made the policy decision to inspect building plans and construction, it owed a duty of care to all who it is reasonable to conclude might be injured by the negligent exercise of those powers: Manolakos, supra, per LaForest J. at 223.

[para19] The case at bar turns on a provincial statute, the Building Code Act. In order to determine whether there has been negligence on the part of the City in this case, it is necessary to examine the Act to determine what policy decision was made by the Province binding its creature, the City of Toronto.

A. THE ACT

[para20] The basic structure of duties and responsibilities for the regulation of construction in Ontario is set out in ss. 3, 5, and 6.

[para21] Section 3(1) of the Act specifies that the council of each municipality is responsible for the enforcement of the Act in the municipality. Section 3(2) assigns to the council of each municipality the duty to appoint a chief building official and such inspectors as are necessary for the purposes of the enforcement of this Act in the areas in which the municipality has jurisdiction. Section 5(1) provides that no person shall construct a building in a municipality unless a permit has been issued therefor by the chief official having jurisdiction for the enforcement of the Act. According to the definitions in s.1, "construct" includes extension, material alteration or repair of a building.

[para22] Section 6(1) provides for the issuing of permits by the chief official.

> 6.--(1) The chief official shall issue a permit except where
>
> (a) the proposed building or the proposed construction or demolition
>
> will not comply with this Act or the building code or will contravene any other applicable law;
>
> ...

[para23] Section 6(3) prohibits making material changes to a plan on the basis of which a permit was issued without notifying the chief official and filing details of such change for the purpose of obtaining authorization. Section 6(5) prohibits construction of a building except in accordance with the plans on the basis of which a permit was issued or any changes authorized by the chief official.

[para24] Sections 8-11 deal with inspections, orders, and the powers of the inspector. Section 8(1) permits on-site inspections at any time of buildings. These inspections may be carried out at any time after the permit has been applied

for.

> 8.--(1) Subject to section 11, an inspector may, for the purpose of inspecting a building or site in
>
> respect of which a permit is issued or an application for a permit is made, enter in or upon any land or premises at any time without a warrant.

Section 8(2) empowers the inspector to issue an order directing compliance upon finding that any provision of the Act or the building code is being contravened. Section 8(5) permits the issues of a stop work order where an order of an inspector made under s. 8 is not complied with within the time specified therein.

[para25] Section 9 deals with orders not to cover pending inspection or to uncover when there is reason to believe that any part of a building has not been constructed in compliance with the Act and that part has been covered or enclosed contrary to an order made by an inspector or chief official.
